Black community group sets priorities for city improvement

By John Marin
Staff Writer

Developing resources within the northeast section of the city topped a list of improvements being sought by the newly formed Community Development Organization of Carbondale.

Right now, there is a "lack of maximum efficient internal development in the northeast section, economically, educationally, civically, spiritually, socially and recreationally," said Melvin Stalls, a member of the group who drew up a list of priorities the organization hopes to address.

The group delayed its election of officers Wednesday, but outlined its goals as trying to get more of the city's resources in that section.

Officials discuss child safety, alternatives to fingerprinting

By Dave Saelens
Staff Writer

The process of fingerprinting children to help in case they are reported missing was denounced by Southern Illinois law enforcement officials at a public hearing in the Student Center Thursday as "giving the public a false sense of security."

The hearing was the second in a series of three being conducted throughout the state by the Illinois Criminal Justice Information Authority and the Illinois Department of Law Enforcement.

The two agencies are conducting the hearings in response to an Illinois House resolution passed in June which expresses concern about the growing number of young adults who disappear.

According to the resolution, the goal of the hearings is to hear testimony which will lead to the establishment of a statewide policy by which law enforcement agencies can evaluate the disappearance of a young adult and take the most effective action.

The most widely discussed technique of the testimonies was the process of fingerprinting children. Jackson County Sheriff William Kilquist said that the program should not be halted. "I believe it is a quick-fix solution which will lead to false sense of security and does nothing to prevent disappearances," he said.

Kilquist said the program is rapidly spreading throughout the state and is "tying up" many of the smaller law enforcement agencies.

Kilquist added that instead of using procedures such as fingerprinting, parents should be educated on techniques to prevent disappearances. He said some of these techniques would include keeping an updated photo of the child, never leaving their children unattended and helping their children to memorize their address.

One of the three members of the panel who heard the testimony, James B. Zagel, Illinois director of law enforcement, said that parents should not be required to take their child to a fingerprinting program. Kilquist said the program is "not enough."

He said that if cards, if they are going to be used, should at least be placed in the student's file at school.

One of the officials testifying at the hearing, such as Captain Carl Kirk, of the St. Louis County Security investigation division, believed that an open assembly should not be required by law enforcement agencies. "I think it's the best policy," he said.

Some of the officials present at the hearings who heard the testimony included the Illinois Criminal Justice Information Authority and the Illinois Department of Law Enforcement.

Kilquist said the program is "an atrocity." He said that "the cards, if they are going to be used, should at least be placed in the student's file at school.

The Health Service Clinic will open on a limited basis for walk-in Monday, Tuesday and Wednesday due to a scheduled power outage in the area of Group Housing during Thanksgiving break.

News Roundup

French attack Moslem positions

BEIRUT (AP) — French jets bombed, rocketed and strafed Shiite Moslem guerrillas holed up in a barracks and a hotel in the Beirut Valley Thursday in reprisal for the suicide attacks on French, U.S. and Israeli troops. Lebanese police said at least 30 were killed and 150 wounded in the raids on camps of the pro-Iranian extremists.

In Washington, U.S. officials said they knew in advance of the French strike, and a senior administration official said that if the terrorists were not wiped out there "might well be a need for the United States to carry out an attack of its own."

Congress abandons deficit package

WASHINGTON (AP) — Congress abandoned all hope Tuesday of the last minute to reverse the tide of rising deficits. House and Senate negotiators worked on a plan that would extend the government's borrowing authority into next April. The end of the $844 billion deficit-reducing package of tax increases and spending cuts proposed by Pete V. Domenici, R.N.M., and Lawton Chiles, D.Fl.

Violence marks Greystone strike

By the Associated Press

Greystone strikers clashed with police from coast to coast Thursday as the nation's largest bus company resumed limited service with non-union drivers. More than 60 arrests and half a dozen injuries were reported.

Most buses carried only a few passengers, but Greystone called the turnout "encouraging." The AFL-CIO said the resumption of service was an attempt to "destroy" the union and called for a nationwide boycott of Greystone.

Library exempted from budget limitations

By Anne Flasta
Staff Writer

Morris Library will be exempt from the budget cuts in the planning process for fiscal year 1985, John Guyon, vice president for academic affairs, said Thursday.

This marks the second time in four years that Morris Library has been exempt from self-imposed budgetary constraints, Guyon said.

Kenneth Peterson, dean of library affairs, said he was pleased with both Guyon's action and concern.

“I think the vice president is trying to recognize the needs of the library,” Peterson said. “I think that he is doing everything he can to help the situation.”

Peterson said that concerns have been expressed by faculty because of drops in both purchases and staffing, but added that the loss of positions has not been as great as many believe.

“I’ve been successful in getting Vice President Guyon to listen to the situations as they have become vacant since July 1,” Peterson said.

The library has been hurting,” he said. “Any time you lose positions, it’s not a good thing.”

Guyon said that although all areas of the University have been affected by budgetary cutbacks, the library has probably fared better than most.

“I would have to think that they’re feeling it a little less,” he said. “In one of the previous years we’ve protected it and intend to do in the future.”

But according to several library employees, it might already be just a little too late.

George Black, science librarian, said over 700 cancellations of health sciences titles may signal the beginning for future cuts.

“We’re already having to reduce more heavily on student workers and graduate assistants,” Black said.

Black also mentioned the possibility of losing more professional librarian work.

Alan Cohn, a humanities librarian and professor of English, also mentioned the increased use of student workers, noting that “they are sometimes what limited in what they can answer”.

“There’s a whole bunch of problems coming together at the same time,” Cohn said.

In addition to the loss of several positions over the last year, Cohn said the implementation of the new computer circulation system has increased the amount students are doing more work with fewer funds.

“Everything is backing up and slowing down,” Cohn said.

In something doesn’t happen, you’re going to see a diminishing of library services.”
Opinion & Commentary

Signed articles, including letters, Viewpoints and other commentaries, reflect the opinions of their authors only. Unsigned commentaries represent a consensus of the Daily Egyptian Editorial Board. Letters to the Editor are subject to editing and will be limited to 300 words. Letters of 250 words or fewer will be given preferential consideration.

Letters for which authorship cannot be verified will not be published. Students submitting letters must identify themselves by class and major. Faculty members are invited to submit comments as well, but they may be edited for length, substance, or clarity. Members of the Daily Egyptian staff are not eligible to submit letters or comments.

Letters and commentaries published in the Daily Egyptian are subject to review by the Daily Egyptian Policy and Reviews Board and are subject to legal review when necessary.

Distribution of the Daily Egyptian is restricted to Carbondale and areas immediately surrounding the Carbondale campus.

Letters

Holocaust special, MAPP tactics smack of propaganda, adversity

AND, ACCORDING TO new board President Don Garner, it is in no way denying that a teacher representative and a community representative, both is free to participate in discussions and board activities other than voting.

- Revising board policy which requires members of the public to sign up in advance before addressing the board at meetings.
- An attempt to stress informality, particularly in the one meeting each month which is officially designated an informal meeting.
- A distribution of board packets (including materials relating to items on the board's agenda) to the public before meetings.
- Establishment of a newsletter.
- Formulation of budget and citizens' advisory committees.

"YOU'LL FIND this board to be a full-disclosure board," Garner said.

If we were mistaken in believing that it could be otherwise, we won't be a bit upset when Garner and the board prove it — and they seem headed in that direction.

A scare we need

THE THREAT of nuclear war is the single greatest issue of our time — but its potential effects cross our minds ever so rarely while its danger looms each minute.

In Carbondale, ABC-TV's much-touted "The Day After," a drama depicting the effect of nuclear holocaust on the Kansas City area airs Sunday night.

If you believe that nuclear war can be avoided through an arms buildup, a nuclear freeze or an arms build-down, it's a safe bet that we all abhor the thought of such a conflict. If the thought of nuclear war isn't frightening, then you might be better off to clear your line of sight as you're trying to prevent.

Recently, a group of friends and I visited Cove Hollow on Fidar Lake, one of the beautiful, unique natural areas of Southern Illinois. To our dismay, we found that the entire wall of the deep shelter bluff had been defaced with numbers of names, locations and dates of Midwestern and Japanese students. The dates ranged from May through July of this year. Almost every foot of the wall had been written on, and some people put their names in several different areas. Some of the writing will weather off, but some will be there for a long time because the overhang keeps rain from washing down the wear. Cove Hollow is quiet, peaceful and seems very natural, and the weather we're a long time to keep the effects of that sort of thing in perspective.

MAPP has been lucky to have made the opportunity to have a better understanding of the community at large. But it can have the adverse effect of détente in a society from within by bringing unwarranted anguish, distress, and guilt into the average home. I am asked to reconsider the motives of MAPP and other groups that use the tactics of emotionalism, sensationalism, and straight propaganda, in the name of peace and respect for life. I also ask MAPP to reconsider the means they use to attain their goals — Linda Nelson, Carbondale.

Clean up wall at Cove Hollow bluff

In order to fulfill an assignment, I interviewed a young man who has cerebral palsy. His disease, which requires him to walk with special crutches, does not stop him from pursuing his goal to receive a degree in physical therapy, to ultimately walk without the aid of his crutches — a battle he has fought the past 19 years of his life. He has already made exceptional progress, and he won’t quit until he achieves his ultimate goal.

For a person who has been through countless painful operations, his bright disposition and his eagerness to achieve are extraordinary! It is a special moment in my life to have met such a special person who commands such a courageous spirit, despite all he has been through.

Thank you, Bruce MacAbee, for one of the many memorable interviews we did for the paper. You are an inspiration for all who meet you. Keep fighting! — Ellie Van Scyoc, Senior, Business Administration.
Proposed class changes cause concern

By Phillip Florenz
Staff Writer

BEFORE THE General Studies Advisory Council recommended in September to eliminate 9% of the 120 courses in General Studies, it had already been decided that the name of the program would be changed to General Education.

Some departmental voices are saying that they don’t care if the name is changed, so long as the courses stay the same.

If the recommendations are implemented as planned, the English department would lose 11 courses, the philosophy and political science departments would each lose four, and the French, German, and history departments would each lose one. The council’s final recommendations are due in the spring.

AS THE PROGRAM stands now, students are required to complete five hours of English composition, including a course in basic composition, and one among expository, technical, and creative writing.

In areas of the sciences, social studies and the humanities, students must complete nine hours in three different disciplines. They must also take four hours of math.

The council has recommended that the second semester of composition be made an elective instead of a requirement and that mathematics create a new three-hour course. Both composition and math are in the GS category of "Organization of Communication and Ideas."

OVER 1,000 students regularly enroll in 90 sections of both GSE 101, English Composition, and GSE 102, Intermediate Algebra, making them the largest classes at SIU.

Al Baartman, chairman of mathematics, said he agrees with the council should restrict the course offerings in the program, but says that "math is a language we have to attack."

Bruce Appleby, director of the English department’s general studies program, said that if the recommendations are implemented, the University would have the lowest English composition requirement in the state, even lower than most community colleges.

The council’s final recommendations are due in the spring. Whether they’re under a general studies heading or not, Appleby said he feels confident that if there is a cutback in the second semester composition class, especially technical writing, many units that rely on that course will still ask the English Department to teach it.

GENERAL STUDIES courses have been recommended by the council, Appleby said these recommendations apply to the concept of general studies, of which he said literature is an important part.

Appleby said the department has been asking for a long time that the University has never required an English course in General Studies.

"The liberally educated student doesn’t need philosophy courses,” he said.

Appleby said that because the University is pushing for a change in the concept of general studies, the department is advocating for a change in the composition classes.

The council’s final recommendations are due in the spring. Whether they’re under a general studies heading or not, Appleby said he feels confident that if there is a cutback in the second semester composition class, especially technical writing, many units that rely on that course will still ask the English Department to teach it.
JULIE FILIPPO, a sophomore in marketing, said Great American Smokeout honored on airline's flights

CHICAGO (AP) — Midway Airlines left the no-smoking light on for its 90 domestic flights Thursday in recognition of the Great American Smokeout and response was good, the airline said.

"It seems to have gone quite well," said airline spokeswoman Jill D'Angelo.

There were no complaints from passengers that she knew of, she said.

Ticket counter cards reminded passengers of the no-smoking request and onboard announcements were made.

"We are leaving the no-smoking light on for the entire flight," said Midway President Neal Meehan. "If smokers can't resist the urge to light up, we ask them to contact one of the flight attendants to help them through — give them some fruit, candy, or something to drink even try to talk them out of it."

PETTERS SAID SOME of the general studies courses she took were "interesting," and that she was able to take many courses that she normally wouldn't have with her major. "It's really if you have an awful lot of courses to choose from," she said.

Susan Stefan, a sophomore in administration of justice presently taking GSD 112, said she is not "learning nor comprehending anything." The course, which is Concepts of Statistics, is scheduled to be eliminated.

"I go to lectures, I try to understand but I can't," she said. "They definitely should do something about the class." Stefan said she takes some general studies courses seriously, but not like the courses in her major.

Page 6, Daily Egyptian, November 18, 1983
CHANGES from Page 5

"new definition" in general department has also asked studies, the English & part-to create a three-hour, follow-up ment is now pushing fur a course to the algebra course. The Baartmans said that it has proposed two become difficult to teach the algebra course effectively. "World algebra course "Masterpieces" and "Literature addressing all the needs of the Modern World," students, even as a four-hour course. He said it's difficult to department bas already been assess what a student's skills should be taught in filling staff positions in mathematics skills should be taught in filling staff positions in mathematics too after he graduates.

"We haven't added to the list, but a lot of other units have added like crazy," he said. The department has marked several courses in social studies (GBS) for elimination by the council: "Contemporary Ideologies," "Comparative Politics," "International Relations," and "Introduction to American Foreign Policy."
Coal museum dream to come true

By John Schrag
Staff Writer

After four years of waiting, the promoters of the National Coal Museum will see their dreams materialize next week, although on a smaller scale than previously envisioned.

Construction of the museum will begin Monday in West Frankfort as the result of a unanimous decision made by the museum’s board of directors.

The Coal Museum Board voted unanimously Wednesday to erect a huge "museum theater," despite failure to obtain federal or state funds that would make the project much bigger.

The museum will be built inside a structure that contained the Coal Administration Theater at the 1982 World’s Fair in Knoxville, Tenn. John Whitlock, board chairman, said that when the building is finished, it will house exhibits showing the history of coal, modern technologies, coal production and future uses.

Planning for the museum began more than four years ago, when former U.S. Rep. Kenny Gray donated $300,000 for the project.

That money, which was given to the SIU Foundation, and its interest will be used for construction of the facility said Whitlock, who is director of the University Museum.

Whitlock said the Illinois Department of Commerce and Community Affairs denied the board’s request for a grant, adding that no board members had hoped to use for the construction of a second building.

The board also was unsuccessful in getting funds from the U.S. Economic Development Administration.

But even though they are getting only half of what they wanted, Whitlock said the board members are glad to see the project under way.

"We feel pretty happy about it," he said. "We’ve been able to maintain our enthusiasm over the years and we feel good about the decision.

Construction of the foundation is expected to be completed by Christmas, with the building itself to be erected early in spring.

INMATES from Page 1

have been denied many privileges, including the use of telephones.

Their ability to communicate with others is very limited," said Marion for the murder of two FBI agents. He has recently been found guilty of the 1975 murder of Peltier's co-conspirator, Juanita Stacey, and has been denied many privileges, including the use of telephones.

"Their ability to communicate with others is very limited," said Marion. "We feel pretty happy about it," he said. "We’ve been able to maintain our enthusiasm over the years and we feel good about the decision.

Citizens committee vote-delays favor housing code violators

By Paula J. Fislak
Staff Writer

Recommendations asking the city to crack down on housing code violators won't reach the City Council for at least another month and might not go into effect until next fall.

The Citizens Advisory Committee was scheduled to vote for approval of the recommendations, which would then be forwarded to the Council, at its Tuesday meeting, but a quorum was not present and the vote was postponed.

The Landlord Tenant Core committee of a group set up to study housing problems in Carbondale, gave the CAC a three-part recommendation in September to "promote better public awareness and improve those conditions that have caused deterioration of the city's housing stock."

Core committee chairman John Stone explained the recommendation at that time, but the CAC took no action on them. Action on revised recommendations was set for the CAC's October meeting, but no vote was taken.

"What the CAC does with it now is out of our hands," Stone said.

Although it might not happen for another month or two, Stone said that he thinks the CAC will approve the recommendations. He said he had anticipated the changes to be in effect by next summer but new projects they will be in effect by next fall.

After approval by the CAC and the council it will take more time to get the changes into place, he said.

CAC chairman John Foster said the recommendations are "virtually ready to pass" and probably would have Tuesday if there had been a quorum. A CAC meeting will probably be set for Dec. 15, he said, at which time a vote on the recommendations will be taken.

The CAC recommendations call for: "Careful systematic code enforcement," inspection of rental units every two years, a certificate of compliance to be posted in properties that pass inspection and distribution of a list of approved housing.

Improved enforcement of building ordinances, noise, public consumption of alcohol and parking.

Assembly of consumer education by the city and citizen's reviews of the city code on a routine basis.

More rigorous enforcement of the single-family zoning ordinances.

Consideration of a licensing ordinance after the recommendations have been in place several years.

A model lease that would be available to landlords and tenants but not compulsory.

---

Hazardous waste tax recommended

SPRINGFIELD (AP) - A new state tax should be levied on producers of hazardous waste to encourage industry to cut down on the amount of toxic substances they generate, a state panel recommends.

The tax would be part of a broad effort to shift emphasis from disposal or recycling of hazardous waste to reducing the amount created in manufacturing processes.

A state panel should develop a clear, coherent, comprehensive, long-range policy for hazardous waste management which emphasizes reduction of hazardous waste generated," said a draft report issued by an 11-member panel of the Illinois Hazardous Waste Task Force.

The recommendations are to be reviewed Monday in Chicago by a public hearing of the task force commission.

**U2 releases an inept effort**

By Mike Nelson

Ireland's U2 is arguably the most successful band of all time, known for its innovative approach to music, and has released a series of three studio albums, "Boy," "October," and "War," reflecting their career in both performance and production. Led by the charismatic Bono, the band is known for its eclectic sound that is unique in the world of pop music.

The mix is muddy, which is surprising because top notch engineers were involved, including Shelly Yakus, who mixed Springsteen's magnificent "The River." As a result, the Edge's driving electric guitar, an integral part of U2's sound, is nearly lost in the audience-dominated mix.

Despite the technical problems, U2 did manage to turn in some respectable, if unexciting, performances, especially on "1 O'Clock Tick Tock," one of "Under A Blood Red Sky's" two non-LPs ("Party Girl" being the other).

This was a hastily compiled, erratically produced live recording. For die-hards only. GRADE C.

**Mayan artifacts give history clues**

By Lisa Nichols

Artifacts left behind by the Maya, an American Indian group who lived in Central Mexico and the Yucatan Peninsula, have provided archaeologists with insights into the beliefs and practices of this ancient civilization. The objects are on display in the University Museum.

The objects are part of the research collection of Robert Rands, adjunct curator of New American anthropology in the University Museum. Rands, who is also a professor in the Anthropology Department, is currently writing about the artifacts to an audience gathered in the Museum Auditorium Wednesday afternoon.

Rands explained that most of the objects, which date back to A.D. 600, have to do with the religious practices of the group and serve to reinforce the contacts between man and the supernatural and man and other men. The Maya are noted for building monumental pyramid temple complexes for the worship of the supernatural. It was at these temples, located mainly in the ceremonial center of Palenque, that remnants of human and animal carvings, incense burners, thrones, drawings and ceramic and jade figurines were found.

Rands said that the Maya believed their mythological heroes could be reborn like the sun each day at dawn. So they built elaborate temples and pyramids on raised platforms to worship these deities.

Rands said the temples were generally arranged in groups of three and placed according to the positions of the summer and winter solstices and equinoxes. As time went by, they often added other structures around the temples, forming inner courts.

Some of the objects were found in the burial catacombs beneath the temples, Rands said. They were buried with the sacrificial victims and heroes who would need the items in the underworld. Many of the figurines, which have been associated with household cults and shrines, were found in domestic dwelling places as well as in the temples.

Rands showed a series of slides depicting several objects that archaeologists have found in Maya settlements. The Maya artwork often depicts scenes of war, with warriors dressed in elaborate masks and headgear. Other carvings show representations of supernatural beings and sacrificial offerings to the gods.

One scene depicts a Maya sacrifice of a human heart, mushroom. Rands explained that the Maya ate hallucinogenic mushrooms to see supernatural visions. Some of the objects from Rands' collection will be on display through Jan. 6.

Harmony groups are still popular in Southern Illinois

Barbershop quartets - a once popular type of singing group which consisted of four men harmonizing without the benefit of music - are not extinct. They are alive and well in Southern Illinois and continue to entertain audiences of all ages.

The Carbondale chapter of the Barbershop Harmony Society will hold its 16th annual show at 7:30 p.m. Saturday at the Marion Civic Center. Three barbershop quartets will perform numbers pertaining to this year's theme, "The Songs of Old."

The Kentucky Transfer, the reigning champions of Kentucky and Indiana's Cardinal District of the Barbershop Society, will headline the show with their repertoire of melodies from the Gay '90s and early 1900s. Every generation has its music, whether it is ragtime, swing, rock or jazz.

Mulkin further explained that during the turn of the century people had no television, radio or movies, so the best way to have music is, their lives was to sing together.

Tickets for the performance are $4 and can be purchased at the Marion Civic Center.

SIU Debate Team gets second place in national event

The Speech and Debate Team received a second place national ranking from the Cross-Examination Debate Association.

More than 160 schools from 42 states competed in CEDA debate events. At five CEDA-sanctioned tournaments, the SIU-C team earned 17 debate awards.

The top ten schools in speech and debate competition in rank order are Central State University from Oklahoma, SIU-C, U.S. Air Force Academy, Towson State University from Oklahoma, UCLA, University of Tennessee, University of Florida, Southwest Missouri State University and University of Nevada.

**Harassment policy stronger**

**Students protected under new rules**

By John Stewart

SMC's new sexual harassment policy provides better protection for students against harassment and sexual advances than the previous policy, Mary Helen Gasser, associate director of institutional research, said yesterday.

The previous policy was developed by SIU-C President Hiram Levi, allowed students to "tall between the cracks" in filing grievances against those who violated the policy. The policies were employment-oriented, based on the Illinois Civil Rights Act, and did not consider student situations, Gasser said.

SOlbergcr said.

**Local families give home away from home**

Thanksgiving and Christmas are traditionally thought of as times to be with family members, yet over 1,000 students may not see their families during either of these holidays.

The Host Family Program is designed to give international students a chance to experience the American way of life, according to Inga Solbergcr, community volunteer.

About 350 host families host students for a regular basis and see students about once a month and others are involved for special occasions.

"We think it is important to the students to get the education to get to know the American way of life," Solbergcr said.

**Host families give the chance to learn about different countries and their traditions. Often families don't develop a relationship long after the student has gone home," Solbergcr said.

"International understanding of each other's culture and customs through individual friendships may perhaps lead to peace in the world," Solbergcr said.

The program began when international students first went to the university in the mid-50's, according to Solbergcr. Other universities have similar programs, she said.

"It is harder for us in Carbondale to get enough homes because we don't have many industries in the area. Our need is high since we have over 2,000 international students on the campus," she said.

The program consists of students from the university, according to Solbergcr.

**Thanksgiving 'Far East style' to have international flavor**

Thanksgiving with a twist. This Thanksgiving, the Students Association has in mind for the Saturday of Thanksgiving.

The CSA has organized a Thanksgiving dinner and dance for students who cannot go home for the break. The dinner and dance will be scheduled for 7 p.m. Nov. 25 at the International Hall on Southern Illinois campus.

"Sometimes we feel homesick, our classmates happily making arrangements to go home and we feel the enrichment of their culture," said Chong Kwee Mooi, a Malaysian student and committee member of the CSA. "It's something new for the break ourselves. We must said the dinner is planned to present Thanksgiving 'Far East Style' although Thanksgiving is not celebrated in the Far East. We wanted to get into a traditional American thing and give it a little Eastern twist," she said.

According to Mooi the association has been selling tickets for the dinner and dance at $1 each and expect about 100 people to attend. Mooi said, "We want to get international students to mix and make the CSA more visible on campus. I think this is the first time a group is doing something like this."

The menu includes the traditional turkey and dressing but that is where tradition parts company. The rest of the menu is expected to reflect traditional Asian delicacies and Chinese dishes.

Mooi said students are still available and she hopes more American students will be involved. She said, "This will be a good chance for all to mix," she said.

**Disabled man concentrates on being alive**

SPRINGFIELD (AP) -- Jim Winch doesn't dwell on what he's lost -- an arm and eye. Instead, he says he feels lucky to be able to take care of his family and ride his horses.

Winch, 36, was a linesman for the Central Illinois Light Co. In June 1981, he was severely injured when he was electrocuted. He recently returned home to Carbondale, and was sent to replace a piece of equipment destroyed in a electrical storm.

"I went up to replace it, took the wires off the bottom part. I didn't pay too much attention, I guess, and the top side was still energized, and I took for granted it wasn't," Winch said.

The 7,300 volts of electricity that surged through his body left Winch dangling by his safety gear.

Tripp: Ballots, political reform are too slow to end oppression

By Karen Towsy
Staff Writer

Luke Tripp put it bluntly: "We're talking about a class that rules this country being replaced by another class.

I see no way to end oppression within the present system," said Tripp, a Black American Studies professor, who talked with students yesterday about revolution and reform, and which is the road to social and economic equality for black Americans.

Reform, Tripp said, is "lightweight" compared to black poverty. But reform does not address what Tripp calls the fundamental question: Why is the gap between the wealthy and the poor so great?

"On one hand, you have the millionaires. On the other, you have people who can't pay the rent," Tripp said.

"On one hand, you have people who fly down their resort homes when it's too cold. On the other, you have people burning their hands over the coals to stay warm."

And a large number of those

**Eagleton to support Simon at banquet**

U.S. Sen. Thomas Eagleton will be the speaker at a fund-raising banquet for Rep. Paul Simon at 6:30 p.m. Sunday.

The three-term Missouri Democrat will conduct a press conference at 5 p.m. and then move to the banquet in the Student Center ballroom. Simon is seeking Democratic nomination in the March primary to run for the Senate seat now held by Republican Charles Percy.

Eagleton will discuss issues including the economy and foreign relations and will speak in behalf of Simon's qualifications for the Senate, according to Joe Dunn, a spokesman for Simon.

After the banquet, at 9 p.m. there will be a showing of "The Athlete," a documentary film dealing with the effects of racism on sports.

Also expected to attend the event are State Sen. Kenneth Murray, former U.S. Rep. Kenneth Gray, both are seeking the nomination; Rep. Charles Tripp, and about 700 to 800 Democrats are expected to attend.

**Tripp: Ballots, political reform are too slow to end oppression**

"There are always going to be the powerlessness and the powerful," he said. "And the powerful are not about to share their wealth."

Political successes for blacks, such as major wins for Harold Washington and Tom Bradley in Los Angeles, are important gains, said Tripp, but blacks should recognize their limitations.

"A black mayor can make a difference in terms of blanket blaxtlist racism," Tripp said. "But he can't address all of the problems."

Only a revolution, he said, would address itself to the system as a whole and eliminate what he called "a racist, classed society."

Members of the audience agreed with Tripp, but differed over how they think revolutionary change can occur.

"Before you can affect change within the people, first you have to educate people to the idea of change," one student said. "Blacks have no sense of themselves as a people other than the slave mentality."

Tripp asked if blacks were unified they could create a revolutionary movement, which is possible, he said. Tripp contended that only those who get to the barricade in the mile in 50 years, "Breakfast of Champions" for 50 years, Wheaties boxes have featured the photographs of sports figures, but never a handicapped athlete.

Murray, a native of Maine, is studying for a degree in therapeutic recreation at U. His accomplishments as a wheelchair athlete include:

- Winning the Boston Marathon in 1978. Though wheelchair athletes always are given a head start, it was the first time one of them got to the finish line ahead of all the able-bodied athletes.
- Winning the World Wheelchair Marathon in 1981 in the Orange Bowl in Miami. 
- Being the first black athlete to break the 5-minute barrier in the mile in 1979 in Tampa, Fla.
- Winning the 200-, 400-, 800- and 1500-meter events at the National Wheelchair Games in Hawaii, this year, establishing records in each event.

Murray was in New York on Wednesday for interviews and a photo session for a feature in Sports Illustrated.
‘Tinyburg Tales’ has message, meaning for small-town people

Debra Colban
Staff Writer

Although his stories don’t begin with once upon a time, Robert Hastings’ story telling style evokes memories of childhood bedtimes and the comforting presence of a parent.

Hastings, who grew up in Marion during the 1950s and has lived in small towns in Southern Illinois, Western Kentucky and Tennessee, is a former pastor of the University Baptist Church. Most of his stories revolve around church life.

“I find very warm acceptance of me as a Southern Illinois author. That’s encouraging. I feel my most avid readers are in this area,” Hastings said.

He recently published a collection of 24 original stories, “Tinyburg Tales.”

“In case you want to visit, the town is very easy to find,” Hastings said with a smile. “It’s just seven miles south of Pretense.”

Hastings, who was the first in his family to go to college, graduated from SIU-C with honors. His wife and three children are also SIU-C graduates. They now live in Springfield.

He went on to the South West Robert Hastings, author of “Tinyburg Tales,” tells stories.

WASHINGTON (AP) - The House ethics committee, concluding a 16-month investigation, said Thursday there is insufficient evidence to show that any current House member used illegal drugs or that a drug ring ever operated on Capitol Hill.

But the committee’s special counsel, Joseph A. Califano Jr., named three former congressmen who had used illicit drugs during their tenure in Congress.

Califano told a news conference that former Reps. Frederick Richmond, D-N.Y., and John Burton, D-Calif., admitted to the panel under oath that they used drugs.

He said former Rep. Barry Goldwater, R-Calif., made no admission, but, “There was substantial evidence of such activity.”

Land subsidence risks outlined in new maps, public hearings

By John Racine

Maps recently revised by the Illinois State Geological Survey should make it easier to pinpoint areas of potential subsidence and determine the cost of becoming subsided, according to comments made by several members of a panel that has been appearing around the state the past week.

According to the panel, held at the Holiday Inn in Carbondale Nov. 21, there is a need to conduct more work on locating mine subsidence.

Dave Massie, executive director of the Illinois Abandoned Mine Lands Reclamation Council, said that in the past year the 75 counties in Illinois included most affected by the problem of subsidence were remapped and a new map of the area was created to inform the public.

Also, public hearings were conducted around the state. The one held at the Holiday Inn in Matt is the second of three.

A geologist and subsidence supervisor with the Abandoned Mine Lands Reclamation Council, who has been updated mine subsidence areas that have been undermined, said, "We believe that all the land will eventually subside."

Using slides of damaged properties and graphs showing what he called the mechanics of subsidence damage, he said early indicators of subsidence include popping, cracking and creasing of the area, which has many visible signs of damage, by his study.

Cracks will begin to appear in a foundation and exterior walls.

Computerized gift suggestion lists available at Mall

The University Mall Merchants Association and Southern Data Systems will have a computerized gift suggestion service available to customers of the mall from Nov. 25 to Dec. 24.

Customers may have a suggestion list printed out by telling the computer operator the name of the gift, if the gift is for a male or female, what the age is of that person and what that person's interests are. The computer service will be free.

THE NIGHT Safety Van and the Women's Transit will not run Monday through Nov. 28. Regular hours will resume after Thanksgiving Break.

REQUESTS FOR rooms and solicitation tables in the Student Center dining room will be made by Recognized Student Organizations from 9 a.m. to 4:30 p.m. Monday through Thursday beginning Nov. 26 at the Student Center Charging Catering Office.

A SERIES of five prenatal classes will be held at the Women's Transit from 9 a.m. to 1 p.m. on three Wednesdays and two Thursdays.

THE WESLEY Foundation will be open at 4 p.m. on Thursday for viewing of the movie "The Day After" at 7 p.m. A discussion meeting will be held after the film.

SOUTHERN ILLINOIS Friends Meeting, 6 to 6:45 p.m. Sunday, 214 S. Glenview. Meeting for worship, 7 to 9:15 p.m. Nov. 22. View the movie "The Day After," 9:15 p.m. on, commentary from Channel 3 plus discussion. You are invited to any part of the evening. Please do not bring children under 15.

THE LUCAS Foundation will be open at 4 p.m. on Wednesday for viewing of the movie "The Day After" at 7 p.m. A discussion meeting will be held after the film.

Fred Piskats checks commodities futures on a computer terminal.

Class learns trading by doing; playing pork bellies for grades

By Deborah Sauerhage Student Writer

Kevin Eames, an agribusiness economics senior from Mendota, has made more than $87,000 this semester trading in the silver futures market.

Too bad the profit is only play money in Agribusiness Economics 363, a course titled "Commodity Futures Market." Taught by Lyle Solverson, assistant professor, the course deals with financial speculation on everything from farm products to money, based on anticipated future value.

The idea is to buy future rights to a commodity today at a low price and sell it at a set future date when the price has risen — you hope. Making a profit depends on a rare combination of luck and the ability to predict the future.

According to Solverson, more than three-quarters of all real life commodity traders are "losers." In the classroom trading game, most students also lost money, but it is a good teaching tool for learning through hands-on experience, Solverson said.

realize the potential risks and work involved in trading futures contracts.

Students start with $15,000 credit in four commodity groups including corn, soybeans, cattle, pork bellies, lumber, foreign currencies, silver, gold and U.S. Treasury bills and bonds. To make a trade, students punch computer cards with information on the commodity group, the price they want to trade at and the action — buy, sell or stop — if the market touches a certain point.

For each $1,000 profit, a student receives one extra credit point up to 25 points. No points are deducted for losses.

Solverson runs the cards and hands out financial statements every Monday morning listing students' transactions, profits and losses.

Daily price quotations are available through the Wall Street Journal and the American Quotation System terminal in the School of Agriculture. The AQS computer automatically lists prices as they move on all the major commodity exchanges.

When the bottom recently fell out of the soybean market, Skip Stitt, a senior in general agriculture from Herrin, lost $87,000.

Joe Prusacki, Solverson's teaching assistant, believes the trading game makes students aware of how complicated futures work and what they're doing.

"Watch your trade," he tells others.

"Watch the market," advises Eames, "And don't listen to anyone.'
Head Start fueled by federal grant

By Debra Cathburn
Staff Writer

The SIU-C Head Start Agency has been awarded a $614,000 federal grant for operating costs and training from the Department of Health and Human Services. Barbara Grace, Head Start director, said Head Start was one of the few social agencies that was spared costs and training from the Reagan budget cuts.

"I think Head Start wasn't cut because research has shown it is a successful program," Grace said.

Grace said the grant will be used for educational materials, office supplies, food and transportation for children and parent activity costs.

Children are involved in the Head Start program Tuesday through Friday. Those in the morning session attend from 9 to 11:30 and are served a light breakfast and lunch. Children in the afternoon session, which lasts from 12:30 to 4, receive lunch and an afternoon snack.

Research shows, according to Grace, that low-income children who aren't exposed to early learning may suffer a deficit when they begin school. The program is designed to give children from low-income families a "head start" in their education and to ensure that all of their basic needs such as food and health needs are met.

The program helps children become accustomed to the school system by exposing them to books, crayons, paper and group interaction with other children.

"Head Start focuses on the total child and family by making sure the family's needs are met," Grace said.

About 242 children and their families are involved in the program. Most of those children are from 3 to 5 years of age with a high concentration of 4-year-olds.

Parents are an important part of the program Grace said. They serve in all groups and organizations is viewed as the primary educators of their children.

The program has lasting effects, according to Grace.

"Children exposed to Head Start, as compared to children without exposure, have a tendency to not drop out of school and have better attendance records," she said. "I do think Head Start has a very positive impact on children and families."

Children in the program go on community field trips, visiting such places as the library, University, bakery and fire station. They also learn table manners and how to brush and floss their teeth.

The paid staff consists of 15 members. Ten SIU-C students as well as about 100 volunteers also work with the program.

"Involvement for students in Head Start is a really good experience for the Head Start program and the students. Our classrooms give a realistic view of what it's going to be like in the real world," Grace said.

Hill's swimmers are favorites in weekend dual, relay meets

By Scott Rich
Staff Writer

Being one of the nation's top-ranked teams is something the Saluki women's swimming team really should have. With a little caution, they think we can win the Big Eight meet this year. They have a powerhouse lineup which led them to a first-place finish in the Big Eight two weeks ago.

"We're really strong," said Coach Hill Meade of the Nebraska women's swimming team. "We're the team to beat.

The challenge will be bigger than ever. The Saluki women will be shooting for their fourth straight title. They are the best team in the nation at the time.

The team made it into the Windy City Invitational last weekend. They placed second in the Big Eight team meet, but the team is rated as the team to beat. Hill Meade believes the squad should have more than what Minnesota has to offer.

"We have the talent to win every dual meet the women's team plays," Hill Meade said. "For now, they're working on things one at a time."

Saturday the team will swim in the University of Illinois-Chicago Relay Meet. The eight-team meet will feature four of the top teams in the nation, with SIU-C again rated as the team to beat.

"Our ninth-place finish in last year's nationals ranks us higher than any team in the meet," Hill Meade said. "Every team will be trying to beat us."

Hill Meade said that there won't be individual events at the Chicago Relay Meet, but there will be more number of new relay events. Included in these events are 200-yard butterfly, breaststroke and backstroke relays, a 3 x 500-yard freestyle relay, a 3 x 100-yard medley relay, and the 100-yard individual medley relay. The Salukis will be looking for a win here.

For the rest of this weekend's meet, theSaluki women will have a tough competition. Hill Meade believes that they have a good chance to win, but they won't have an easy time. The team will be facing tough competitors.

The Salukis will also travel to Chicago this weekend. They have a chance to win, but they won't have an easy time. The team will be facing tough competitors.

Hill's team is rated as the best team in the nation at the time. They have a powerhouse lineup which led them to a first-place finish in the Big Eight two weeks ago. But the Salukis are talented, too. They don't have one star, but 13. They can bring only nine to invitationals, though. So Meade has to practice meets once a week in the Arena to keep them in peak condition.

The nine gymnasts traveling to Chicago consist of two all-arounders in John Levy and David Lutterman. Both are tough competitors. Levy finished fourth in all-around in Nebraska with a 10.8 and tied for third in the high bar with a 9.55.

Mareika competes in all events except the rings because of her bad shoulder. The pommel horse specialist, who finished fourth in the Big Eight two weeks ago, is another familiar face. She has the talent to average a 9.4 to 9.9 on the horse this year. She tied for first in Nebraska with a 9.5 mark.

Laurence Williamson is strong in floor exercise, as well as vault. With the height he gets and his grace in floor exercise and vault, he is the team's top scorer. He has scored and tied Knauf works three. Knauf is the third national-level competitor in breaststroke. Windy City Invitational had only six of last year's top 11 schools. They have a slight chance to rank high. If they average 273.50 in Nebraska, they take part in the Windy City Invitational.
Swimmers to face No. 2 SMU

By David Wilhelm
Staff Writer

Following an opening dual meet victory over Illinois, the men's swimming team and Coach Bob Steele move on to the next leg in their schedule when they play host to Southern Methodist University at 7 p.m. Saturday at the Recreation Center. SMU is the No. 2 ranked team in the country.

SMU is led by Ricardo Prado, the world's third ranked backstroke swimmer. Individually, and as a dual meet, Steele said that the order of events will be changed so that Prado will participate at his specialty.

"We have a local people a chance to see him swim," said Steele. "He's the man to beat in the 1984 Olympics."

Besides Prado, Steele said that SMU has several other good athletes, namely Monroe Rohdenbaugh, Bobby Patten and Rich Sager. Rohdenbaugh was the 1982 champion in the 100 back. Patten competed on the World Champions team in the 200 fly and Sager finished second in the 200 freestyle at last year's NCAA meet.

"Along with those," Steele said, "they've got a solid team. In spite of their credentials, they're a team that swims hard and that surges through dual meets. Because of that, we've changed the distances on some events, so it should be an interesting race for the public."

Steele also said that some events have been shortened for the meet so that the swimmers will have a chance to compete in events they normally wouldn't have a chance to win. Also, the 200 medley will be used instead of the 200 free, the 200 back, breast and fly will be substituted with the 100 back, breast and fly.

One event that promises to be an exciting one is the 100 back. After last week with a Knox last November 12 and 13, proved a success with the rotating quartet of athletes, namely Mook Vaughn, Michelle Barry, second; Randy Osborne, first; Laura Hermans, third.

The SIU-C Equestrian team after last year's NCAA meet at High Point and traveled to its annual show a week before the season opener at Champaign and it showed in the first big meet of the year. The Hunt team traveled to Iowa State and has several other good athletes, namely Mook Vaughn, Michelle Barry, second; Randy Osborne, first; Laura Hermans, third.

"After that there are so many things happening personell-wise it's almost impossible to predict who'll finish ahead of whom," Van Winkle said.

"Our divers were a pleasant surprise," said Van Winkle. "Doug Novak, a freshman from Lawrenceville, though trice said he was prepared for the the media and coach to score. The SIU-C team is looking forward to the NCAA meet this year after finishing fourth in the NCAA meet last year.

The SIU-C Equestrian team opened its season successfully last weekend with three show theme schedule. The team played host to its annual show Nov. 5 at the SIU-C Horse Center and traveled to Halloweese College for the beginning of its division by hosting the University of Tennessee-Knoxville Nov. 12 and 13.

The season opener at SIU-C proved a success with the SIU-C Stock Seat team earning High Point Stock Seat team, narrowly edging Murray State for Pete Ness, first; Lisa Pleskun, first; Lisa Pleskun, first; Darci Vaugn, third; Jeff Eberle, first; Michelle Rudolph, second; Randy McMahan, second; Kris Odes, first; Laura Kruger, sixth, and Beth Crawshaw, third.

The Hunt Seat team put up stiff resistance, with Novice Divisions for the Week end. Placing for SIU-C were Pete Ness, first; Lisa Pleskun, first; Darci Vaugn, third; Jeff Eberle, first; Michelle Rudolph, second; Randy McMahan, second; Kris Odes, first; Laura Kruger, sixth, and Beth Crawshaw, third.

Harrier taking aim at top 10 in NCAA

By David Wilhelm
Staff Writer

Harrier men's cross-country team, which suffered last week at the NCAA Punger, areiebering a very competitive enthusiasm a No. 1 runner Chris Bunyan.

Bunyan's fourth place finish at his district was the second of his career for a trip to the NCAA National Championships, Nov. 21 in Bethlehem, Pa.

That performance capped what has been a "very good" season, according to Bunyan. He was second overall in five meets over his qualification for the nationals.

"I was relieved a little because I was worried about it the whole time," Bunyan said. "There's always the danger of being one place behind."

He said that had he finished fifth or sixth, there would have been a chance that he would not have qualified for the nationals.

"I was going to make it as an individual if it killed me," Bunyan said. "I was out to make it for myself, but I told the team that if everyone went out with a good attitude, the team would do it. But sometimes if you rely on the team, it's a dangerous thing to do.

"There was a lot of pressure because we knew we weren't run well. It just wasn't our day."

But it turned out, there was a reason why the Salukis could not run well, or at least up to their potential, due to freezing temperatures along with ice, snow, and mud, which made it hazardous for each runner, including Bunyan.

"There were lots of people falling over," he said. "It could have been more than just the race. After you slip a few times, you're not running relaxed. Hopefully the weather won't be so bad at the nationals."

Bunyan said that he is anticipating a very competitive race at the nationals, but believes he can do well. A top-25 finish would gain him All-America status, but he said he is aiming higher than that.

"I'm ready to go for the top 10," he said. "You can't tone down from one year to the next who is new kid, nobody I've been around, so I'm going in not knowing any of it. I've been looking at results, but it's still scary.

Bunyan last competed in the nationals in Nov., 1981. He said he's never run a race that was so intense. At that race, he was leading a third place with less than 100 meters to go, but quickly watched three runners breezy, by sending him to a 15th-place finish.

They're disappointed that the entire squad will not be competing at the nationals, Bunyan, expressed satisfaction from his personal season.

"It's been a pretty good season," Bunyan said. "There were lots of times that I thought I could have run better. I was fortunate to have been No. 1 on the team. At the beginning of the season I was worried I'd have to go No. 25.

The failure of the team to qualify for the nationals hides the fact that the team did make great progress over the season.

"We had three potential All-Americans among the team this year," Bunyan said. "I know they (Welderborn and Keane) wanted to make All-American, but after the team didn't do as well, I thought they were disappointed.

Bunyan believes there is a flaw in the way that teams are determined to qualify for nationals. As it is now, each team is divided into a district where they compete against other district teams. This season the Salukis defeated Illinois twice, yet the Illini will be competing in the nationals while a couple stays home.

The main reason for this is that the Salukis were in a much less competitive district than the Salukis.

Fall intramural sports conclude

By Steve Kooley
Staff Writer

Two special events were held in the past week, with the winners awarded 15-pound turkeys and three fall sport leagues concluded their seasons at the Recreation Center.

Eric Drevutive claimed the men's division of the Turkey Shoot Foul Shooting Contest Wednesday night by converting 42 of 25 free throws. Dave Shurts finished second on 23-of-25.

Peggy Kusturin claimed the women's division on 22 of 25 free throws and Lacy Poprawski placed second on 18 of 25.

There were 23 participants in the Turkey Trot, a 3.1-mile run on campus. William Moran finished first in 16:16 and rounding out the top five were Joseph Banks (17:11), Craig Horn (17:35), Tom Plunkett (18:18), and Bryan Miessler (18:27).

The top female finisher was Terri Schneider in 21:48 and the closest to her predicted time for males was a tie between Craig Horn and William Rochee. Their prediction came within five seconds of the actual time.

The closet to their predicted time for females was Jenny Shupry, who came within one second.

Four teams claimed titles in football, two in the men's division and two in the women's division. The Senators defeated Nighthawks 13-6, to claim the men's A division, a highly-skilled league. Black Label upset previously undefeated Sigma Pi 34-19 in the men's B division, which is intermediate. Black Label was 3-2 in the regular season but captured five first place finishes including those stated.

In intramural flag football, the Guardians captured the titles in men's and co-rec. In men's, the Guardians edged PA Navy 16-10 to finish 7-1. In co-rec they defeated the Crabs 15-4 to finish 6-1.

A wrist wrestling tournament with weight classes ranging from 115 pounds to heavyweight will be held Dec. 7 at 7 p.m.
Herons disappearing in drugs, salaries

Whatever happened to the days when you could pick up a newspaper and read about your favorite heron? I remember reading about players such as Hank Aaron, Willie Mays, and Frank Robinson. Sure, these guys were at the ends of their careers when they became an avid sports reader, but they were playing with and building young ballplayers could idolize.

Now that the season has ended, Jim Rice, Freddie Lynn and Jim Garvey took over. Rice and Lynn came up in 1975 with the Boston Red Sox and Garvey was with the Los Angeles Dodgers. They seemed every day that I scanned the box scores one of the two had become an opening inning hero to win the game. To watch the Red Sox fall just short of the World Series that year was gut-wrenching.

Garvey led the Dodgers through the 1970s, always playing and never complaining. He was “Mr. Consistency” to me back then. When the Dodgers needed a clutch hit, he got it.

When a little kid needed his autograph, Garvey gave it, unlike other players who thought it was better to be too much, too proud, to make some punk kid happy. Garvey was one of my favorite players of all-time - until he broke my heart by coming back from the desert, leaving the Dodgers and signing with the San Diego Padres.

Now that Garvey’s playing are breaking little kids hearts in half, but on a more serious tone. Willie Garvey broke mine by leaving for money, some players are hurting kids with their actions.

No, I’m not writing that the ballplayers are shaving dope to kids on the street. I’m writing that by becoming addicted to drugs, getting caught and given a fine and prison sentence, ballplayers are the ones who are the real villains in some little kids lives and hearts.

According to the Associated Press, Kansas City Royals Willie Wilson and Willie Mays hit .300 each, while Martin got off with just a $2,500 fine. The one-year prison sentence imposed on each one was reduced to just three months after a nine-month suspension. The trio also will be on two-year’s probation after being released from prison.

You may be hearing and reading that these guys said they were “sorry” and “we did not realize what a serious offense we were doing.”

What the heck - they can get lost as far as I’m concerned. Are they going to try to convince me they did not know it is illegal to buy drugs such as cocaine?

Hey, that’s breaks Life’s rough. I know about illegalities such as that, and I don’t even have an agent to tell me what to endorse, when to hold out for more money and when to go on strike. If I make one-tenth of the money that they do when I get out of college, I’ll be pretty happy.

I remember back in 1969 when Wilson was shifting everything in sight and set an American League record with 298 base hits. He sparked countless Royal rallies that took his team to the World Series. When Aikens came up with California, all the writers made sure they called him ‘Willie Aikes’ instead of just Aikens. Willie Aikens is, in order to live up the sports pages. People were making a big deal out of Aikens - now Aikens has been caught in a big deal.

And Martin, well money was something he never was paid too much for. While playing for the Cubs and it probably went to his head like it has to a lot of players.

Maybe money is the problem. Players salaries are skyrocketing all over the place. They have a lot of money, and I’m sure it’s a tough task to figure out what to do with it! I know I have that problem, but then I don’t have any money. With this trend getting cooker in cocaine possession, it is becoming harder and harder to acquire a hero.

When these heroes happen to be “drugies,” it is going to be a lot harder for kids to pretend they’re Willie Wilson at the plate, when Wilson just got thrown out - cut into the real world.

Salukis shaking loss; playoff work continues

By Jim Lesa Staff Writer

While many students are thinking about Thanksgiving vacation, basketball Head Coach Jim Dempsey said: “Our team is beginning to look like a team. We have many games left and we have to play in the San Diego Classic. We had a great season before the playoffs start are not too well. Dempsey said.

Now, Cross College, the Saluki basketball team before the playoffs start are not too well. Dempsey said.

In order for SIU to move forward, Dempsey said, Holy Cross would have to lose in a poor game and score in part of the Preseason rankings, the Saluki’s chances in conference games to 0-0, will do so for the first time. Coach Van Winkle will rely on eight transfers in hopes of bringing SIU-C its first winning season since 1976-77. Seniors Harry Hunter and Pie Walker are the only players with Missouri Valley Conference experience. Neither started against Turkey in Saturday’s 26-69 exhibition loss. Hunter scored 12 points in every game. They have a lot of money and they probably went to his head like it has to a lot of players.

For the Salukis, Van Winkle is in charge of bringing SIU-C its first winning season since 1976-77. They have a lot of money and they probably went to his head like it has to a lot of players.

The Bayou Classic in Lafayette, La., and the Rebel Classic in Las Vegas, Nev., are SIU-C’s other stops on the road for next season opener.

Series of obstacles sets spikers back

By Sherry Chisnall Staff Writer

Debbie Hunter is not one to make excuses. The Saluki volleyball coach is the first to admit that her team has made more than its share of mistakes, leading to a 2-5 season and a finish near the cellar of the Gateway Collegiate Athletic Conference.

But Hunter is also one to analyze her team’s performance and through her theories as to why her team fell short of most of its season goals.

Hunter brought in one of her strongest recruiting classes ever and set some lofty pre-season goals for her young squad. All built on the opening that the team could sidestep a rebuilding season after losing All-American Sonya Locke and All-State selection Barb Clark.

In the early season, the team looked like it was going to do just that. The Salukis defeated Evansville and Illinois, against losses to Wisconsin, Louisville and Western Michigan. There was no frustration in the losses, though, since Louisville and Westerners were well out of the top 20 polls.

That strong start was followed by SIU-C’s first championship in the Saluki vs. Missouri State. Saluki won 2-1 in the tournament, dowing a tough and underdog defending champion Missouri before dropping a heartbreaker to Texas.

Next was a return trip to the Missouri Valley Conference Preview, which turned the entire season around for the spikers. The squad climbed to 5-4 with an opening victory over Missouri State. The season fell apart later that evening in Utah.

Saluki was decided favorite when it took the court to play in the U. S. Open over the season. Hunter ad- mitted her team’s loss to drugstore was probably the pivotal factor in starting SU- C’s decline.

The Salukis went on to win only four of their next 17 matches, finishing with the worst record in the MVC.

See SPIKERS, Page 20
