Student elections draw 3,500 voters

By Stan Benjamin
Associated Press Writer

WASHINGTON, AP—President Carter asked Congress Wednesday night to approve a national energy policy that raises prices and taxes for energy and automobiles to encourage conservation of vanishing resources.

Carter told the senators and congressmen already divided by allegiance to different regions and interests, that he has learned why a comprehensive energy policy has not already been developed.

"It is a thankless job," Carter said, but it is our job, and I believe we have a fair, well-balanced and effective plan to present to you."

He endorsed enactment of legislation that would tax gas guzzling autos anywhere from $449 for 1978 low-mileage models up to $2,488 for 1982.

And he asked the lawmakers to approve a plan that would add about 5 cents a gallon to the cost of gasoline, fuel oil and other petroleum products by 1980 through a series of taxes on crude oil.

Carter's program threatened further gasoline taxes starting at 5 cents a gallon in 1979 and rising as high as 50 cents a gallon if U.S. gasoline consumption is not held down.

U.S. gasoline prices are now about 60 cents a gallon for regular, including 4 cents of federal tax. By comparison, the price in Great Britain is around $1.60 a gallon.

Carter emphasized that fairness was one of his chief aims and that "the energy industry should not reap large unearned profits." from the nation's energy crisis.

"Each of our people must make an unfair sacrifice. None should reap an unfair benefit," Carter said.

He urged that "individual accounting be required from energy companies for production, refining, distribution and marketing—separately for domestic and foreign operations."

"Strict enforcement of the antitrust laws can be based on this data, and may prevent the need for divestiture," Carter said, referring to proposals to break up the major energy companies.

Carter said his program also would seek to soften its own impact on para- and sub-par economic public.

For example, he proposed using part of the Highway Trust Fund to compensate states for the revenues they would lose as declining gasoline consumption cuts into state gasoline tax income.

Carter's policies were aimed primarily at saving energy and developing the use of coal, nuclear power and solar energy.

"We can never increase our production of oil and natural gas by enough to meet our demand," he said, in effect announcing the death notice of a century of petroleum-fueled growth.

Earlier, a top-ranking Carter aide said the average American's standard of living would not be lowered by the President's energy package.

The aide, who asked that he not be identified, told a standing room audience of reporters that householders who heat with fuel oil would receive direct rebates of their extra fuel costs.
Incumbents dethroned in mayoral tests

By The Associated Press

Voters in suburbs of Chicago have tossed out their mayors and replaced them with fresh faces.
At Mount Vernon, voters rejected two-term incumbent Mayor Roland Lewis in favor of Kenneth Martin, who resigned abruptly Saturday from the City Council in a pay dispute and launched a three-day write-in campaign against Lewis.
At Edwardsville, incumbent Clyde Hartung was defeated 2,169-1,739 by insurance man Steven Ellsworth after 18 years at City Hall, the last four as the city's first black councilman.
At Cahokia, Michael King won in a landslide for the second straight year.
He replaces Robert Jackson, who resigned last month after being convicted on federal extortion and mail fraud charges.

Twenty-year incumbent Robert Sabonjian of Waukegan was the biggest name to go in voting Tuesday, losing to state Rep. William McCallin in Waukegan, where voters their city was "lucky and gray."
Democratic Morris edged out the fiery and controversial Sabonjian by 64 votes of 19,186 cast with all but two precincts reported.
Sabonjian had campaigned on his honesty and reputation as a job creator, while Morris had told voters that the city had gone downhill.

News Roundup

Agriculture office supports Alton locks, dams

SPRINGFIELD (AP) — The Illinois Department of Agriculture went on the record Wednesday in favor of construction of a new Locks and Dam 28 at Alton, department officials said.
"The locks and dam at Alton have a long history as a bottleneck in normal times and in times such as when the guide cell fell apart last year, some times, said Illinois Agriculture Director John Block in a statement.
A spokesman for Gov. James R. Thompson said the governor also favors construction of a new lock and dam at Alton, and that he and Block had talked about the issue.

Child and Family Services head named

SPRINGFIELD (AP) — Margaret M. Kennedy, 60, a veteran of social service work from Rockford, was named Wednesday by Gov. James R. Thompson to head the state Department of Children and Family Services.
Miss Kennedy began her career as a social worker in 1939, and is currently the Rockford area administrator of the department.
Thompson said he hopes to name shortly a director of the Department of Labor, conceding the longer he waits the less chance that director will have to influence labor legislation now facing the General Assembly.

Revisions of state's air fleet recommended

SPRINGFIELD (AP) — Major revisions aimed at eliminating the controversy surrounding operation of the state's airplane fleet were recommended Wednesday.
The task force, appointed in February by Gov. James R. Thompson, also recommended that the state sell four of its five executive aircraft and purchase one new one. Three other aircraft could be leased to help replace those sold, the task force said.

Drivers allowed to cover up ideological auto plate mottos

WASHINGTON (AP) — The Supreme Court ruled Wednesday that you are not required to display ideological messages such as "Live Free or Die" that states put on auto license plates.
Using one family's objection to a motto on New Hampshire license plates, the Supreme Court said an individual can refuse to display the messages on auto plates or other personal property.
"We faced the question of whether a state may constitutionally require an individual to participate in the dissemination of an ideological message; the 7-2 majority of the court said, "We hold that the state may not do so."

The decision opens the door for citizens to challenge slogans of other states such as North Carolina, which displays "First in Freedom" on its license plates. Whether it would apply to Illinois which stamps "Land of Lincoln" on its plates, or other states with seemingly innocuous mottoes on license plates is not clear.

The requirement invades rights of individuals to disagree with official beliefs, the court said.

Beg your pardon

It was incorrectly reported in Wednesday's Daily Egyptian that David Kenney, SIU political science professor, will move to Springfield Friday with his wife and two daughters. The Kenney's have no children. Mrs. Kenney said Thursday that they do have two dogs who will be moving with them.

A story in Wednesday's Daily Egyptian reported to order two batches of "The Baby" from the SIU Action Center.
Jeff Mills was a candidate for student body vice president.

Casino goers win big in Waukegan

Casino players won $1.2 million in a single night at Waukegan's new casino, which opened Wednesday.

Got a problem? Feel you're being hassled, ignored, or cheated by the system? Don't know where to turn for answers?
If you've run up against a wall, write or call HELP! Presented as a public service by the Daily Egyptian in cooperation with the Illinois Public Interest Research Group and its Consumer Action Center, HELP! will try to help you and readers with problems like yours — find a solution, stop the red tape, get some answers.

We can't give legal or medical advice of course, but we might be able to tell you where and how to get it. Call HELP! at 536-2140 or write to the Consumer Action Center, 823 S. Sixth St. or write to HELP! at the above address.

Sweet news for dieters

Latest word on the FDA ban of saccharin is that the nonnutritive sweetener may be sold over the counter in the form of tablets. However, 90 cent of saccharin consumed by Americans is in the form of diet soft drinks, other low-calorie foods and toothpaste.

Congressional hearings on the FDA ban of saccharin are continuing, as are FDA hearings. U.S. Rep. James Martin, R-North Carolina, and others are sponsoring legislation to allow saccharin use in foods.

Buyers beware

Consumers should be wary of buying items just because they're stamped with a Good Housekeeping Limited Warranty, formerly the Seal of Approval.
John McCarron of the Chicago Tribune discovered that executives at Good Housekeeping and at Parents' Magazine are reluctant to discuss the bases on which they select products.

Terms of the seal are defined on Page 6 of each Good Housekeeping issue: "If any product which bears the Seal or which is advertised in this issue of the magazine except for the products listed below proves to be defective in any time of the purchase period, the publisher, Good Housekeeping, will replace the product or refund the price paid for it. Products advertised in Good Housekeeping that are ineligible for the seal are automobiles, mail-order items and schools.

Good Housekeeping also advertises from such products as contraceptives, hard liquor, antibiotics and tobacco.

Parents' Magazine seal specifications are similar, although a 30-day time period is allowed to report defects, instead of Good Housekeeping's four years.
McCarron said the magazines are "careful to call their seals limited warranties under the federal Magnuson-Moss Warranty Act" a distance from the guarantee under which lets magazines avoid product liability mandated by state laws. For instance, a smoke alarm which bears the seal fails and the house burns, the magazine may replace the alarm but not the house.

Both magazines have had their share of investigations by the Federal Trade Commission over methods of screening products before awarding the seals.

The Journal of Consumer Affairs said consumers tend to overestimate the meaning of the seals. So, the next time you're selecting a product, don't necessarily go for the one boasting a seal. That product may not be much better than most competitors.
Baseball team on hot streak

Salukis take ninth in row

Coach Itchy Jones' baseball Salukis have shaken an early season slump and are in the midst of a nine-game winning streak that has improved their season record to 22-7.

Their latest victims were the Evansville Purple Aces, whom the Salukis whopped twice at Abe Martin Field Wednesday.

The Salukis have been getting solid pitching, hitting and defense during the winning spree and they will be looking for more of the same when Kentucky State comes to Abe Martin for a 1:30 p.m. doubleheader Friday.

"Our pitchers have been doing a great job," said Jones. "It seems like the better they get, the better our hitting and defense gets."

Outfielder Kevin House (above left) takes a swing. House is a freshman from St. Louis. Chuck Curry (above) clamps onto a throw to barehly nab an Evansville runner. Curry is a sophomore from St. Ann, Mo.

The Hill Gang was out again for the Evansville doubleheader, including one of the Saluki Diamond Darlings (left). Jim Reeves (above), a senior from Murphysboro, dives safely into first on a pickoff attempt.
Normalise relations with Vietnam: don't use MIA's as political pawns

By Ken Offerman
Senior, Journalism

Editor's note: This is the final part in a two-part series examining United States involvement with Vietnam. Part Two will appear in Friday's Daily Egyptian.

The United States should move without delay to normalise relations with Vietnam. The bases of this reconciliation should be a firm commitment to aid in the reconstruction of the country we helped devastate through losing the Vietnam war and its continuing destruction.

President Carter has said he doesn't feel the U.S. has an obligation to help in the reconstruction of Vietnam. A recent Harris poll showed 70 per cent of the American people opposed the normalization of relations with our erstwhile adversaries. Those who would oppose any form of economic aid to Hanoi as well.

Few Americans were left untouched by the war in Vietnam. My oldest brother loaded bombs on B-52's which dropped on North Vietnam. A second brother served as a chaplain's assistant at an air base which was nearly overrun during the 1968 Tet Offensive. I served aboard an aircraft carrier, repairing electrical systems on fighter planes.

The question of U.S. servicemen still missing in Indochina remains an emotional and painful issue for many Americans. But the time has come for the U.S. government to do its share to help the families of the missing servicemen.

The U.S. government is as much at fault in this as the Vietnamese. These men were combatants in what I believe was a vicious, unjust, immoral war, and while 2,339 are still unaccounted, many thousands more came home in plastic bags. I wore a M.I.A. bracelet for more than four years saying, "Lt. Col. I.D. Terrell, Jr. was shot down January 14, 1968." Lt. Col. Terrell, to this day remains missing in action.

M.I.A.'s unfortunately are a harsh reality of war. According to official U.S. casualty figures, there were 44,886 missing in action during the war in Vietnam. There is little reason to believe that the Vietnamese know the fate of more than a handful of the M.I.A.'s.

En route to Hanoi recently, the Woodcock delegation stopped in at the Joint Casualty Resolution Center, where experts work with medical records of missing servicemen to identify remains from the hundreds of bones, odds of hair or even single teeth. One delegation member remarked afterward, "Any country that goes to this much trouble to account for every soldier it loses probably ought to fight a war.

The American people and their leaders have consistently been wrong about Vietnam for the past 30 years. After World War II, Ho Chi Minh sought the aid of the American government in freeing the Vietnamese people from French colonial domination. He was a great admirer of the American Revolution and hoped Washington would support the Vietnamese people in their struggle against the French.

The Pentagon records show that Ho sent at least three messages to Truman asking for support after World War II, asking for American support and friendship in bringing a just peace to a war in Indochina. Truman ignored these messages and never responded.

With Vietnamese Premier Pham Von Dong asked Leonard Woodcock, head of the U.S. delegation to Vietnam, about Ho's correspondence. Woodcock responded simply, "We blew it.

Ho Chi Minh was a dedicated nationalist who fought alongside Americans against the Japanese in World War II. "Father Ho," as he was referred to by his people, is one of the most significant figures in the history of the Vietnamese people.

China and Russia filled the gap when the United States turned their backs on the Vietnamese people struggling, instead aiding the French colonialists and their allies, who are still fighting and dying in Saigon. All this was done in the name of anticommunism and in fear of the dreaded "Domino Theory.

TV news: stop, look, listen and sweat to show your favorite newscaster

By Gabriela Ludwiczak
Senior, Journalism

Do's Barbara Walters turn you on? Does Walter Cronkite make your palms sweat? Market research shows you are saying yes. TV market research isn't something that some hundred "typical viewers" were hooked up to a machine while the network tracked their reactions (GSR) as they watched video tapes of newscasters. As you become emotionally aroused, your sweat glands open up, increasing the electrical current, and to an electrical current is lowered. Researchers claim the "typical viewers" were emotionally aroused.

After three months, ERA Research delivered the test results to ABC. In the next three days, Patrick Emory, anchorman, and co-anchor, Sandy Hill were fired. The next dozen or so newscasters would be let go.

ERA Research, the only group running audience tests for the networks. Audience Studies, Inc. recently did some work for ABC. The networks also use news consultants.

The fact that market research firms are doing quite a respectable job of assisting the network news stations in their race for rating points goes without question. They practiced and perfected the tricks of their trade in the battles fought between toothpastes, cereals and cold tablets. Now, they are at it again. Everyone is saying yes. But is anyone listening, or is it just "spin" to avoid a product recall? No, the networks who may be bringing you the news tomorrow. The "Fans" may make more than just your palms sweat, but should be anchoring the evening report.

It seems that the network programmers are using advertising methodology to introduce a show business atmosphere into a news and information arena. Was the movie "Network" totally artificial?
"IT WAS A PRODIGAL CIVILIZATION, DEPENIING ALL ITS FUEL RESOURCES WORSHIPPING THIS STRANGE MACHINE..."

‘So-called conservatives’ aren’t’

By Garry Wills

James Schlesinger was a tough cold warrior in Nixon’s regime, and as such got the praise of our toughest right-wingers. But now, as the energy crisis, he sends out prescientary signals that fuel shortage is a threat to life. So right-wingers are turning on him.

In logic, there is no reason why they should. A finite time can be expected; put limits on our expectations, just as much as Russia ever did. But ideology holds little converse with logic. Schlesinger’s sin is to say there is a possible limit to our explosive civilization. That is a sin in the unfallen world of capitalists, who think reality is infinitely winnable by effort. If success is the guaranteed reward for enterprise, then there must be an endless supply of prizes for the effortful. The corollary, of course, is that the poor are only poor because they do not reach out for such prizes energetically enough. The trouble with America’s so-called conservatives is that they have never heard of original sin, of a fallen world, a garden in rebellion against the over-eager plucking of Eden’s tree.

It is interesting that one area where Mr. Schlesinger has signalled concern is the car that consumes voraciously. I just had occasion to debate two so-called conservatives in the space of two weeks—William Buckley and William Rusher—who seem to think assaults on the big car rank with darsrespect for motherhood and the flag.

The car obviously replaced the railroad as a symbol of capitalist expansion. In the nineteenth century, trains both hailed and railed at the symbols of business and progress (the two obviously not the same thing). Turner and Ruskin denounced what was canonised by Andrew Carnegie.

Now, of course, trains are used by right-wingers to prove that government regulation kills free enterprise. But freedom did not build the railroads in America. Government did—by land grants, by repressive labor policy, by giving away the nation’s territory and selling the nation’s senators to hustlers of the Gilded Age.

And the downfall of the railroad was as much the act of government as their growth had been. Trains ran into insuperable competition when the government subsidized, with the interstate highway program, 13 truckers, 4 automobile manufacturers, and 3 gas distributors.

That is what causes The fall-off in both passenger and freight traffic, even before the airlines came along to deliver the last blow. Government ‘regulation’ and ‘take-over’ are really an effort to keep an ailing industry alive after government action, favoring other businesses, made it fail.

The interstate highway system blessed business with all kinds of ‘defensive’ and ‘public service’ justifications—just as government had built the railways and subsidized our aircraft and space technologies. Private enterprise has always been a parasite on public money.

Now the public subsidizing of the oil and automobile industries is running up against a new kind of limit, and the right-wing claims that ideology, not fact, has cut off part of its welfare dole. Even a Schlesinger is treated as a turncoat by the right. Mr. Buckley says any questioning of the past rake-off from the public pile amounts to ‘narcissism’.

In England, small cars have been the norm because the country has small country lanes and town streets. To adjust to that reality was no inhibition of freedom. It was simply recognition of human limits—a very conservative kind of knowledge. We must face up to limiting realities even more exigent, though less obvious, than small and winding country roads. Mr. Schlesinger is trying to take a first step in that direction. The enemies he has already attacked stand for the sanity of his undertaking.

People gave Council no mandate

By Steve Hahn

Assistant Editorial Page Editor

Several years ago while I was attending Western Illinois University in Macomb, a political science class conducted a county-wide voter survey concerning Sen. Adlai E. Stevenson III. One of the questions was: "Will you vote for Stevenson in the upcoming (1974) election?"

One of the responses we got from a rural McDonough county resident was, "I voted for him in ’56 and I intend to do so again."

I am not sure of this incident because of Tuesday’s City Council election. It kind of says it all about the low interest of many voters.

Dennis Adamczyk, the student candidate, and James B. Hewette, a retired Army colonel, were soundly defeated by two incumbents. Archie Jones and Hans Fischer, for one basic reason: a lack of voter interest.

Wednesday morning, Jones said, "I was out going door-to-door and one fellow said, ‘I just voted for you last week.’ People get confused."

Jones, as well as Fischer, also commented that incumbent victories and a low voter turnout mean people are basically satisfied with the current system. Carbondale has a fairly conservative council and the people who care—and vote—like it that way.

Adamczyk and Hewette said just the opposite.

"I started late and went door-to-door," Hewette said. "I went to most of the houses in the city and around my neighborhood. There was generally universal agreement with the issues I expressed."

He feels people are dissatisfied with the status quo, particularly with the current city manager form of government, and intends to run again in two years. Hewette got around 15 per cent of the vote with 306 votes. Fischer, 39 per cent with 1,186. Jones, 31 per cent with 928, and Adamczyk, 19 per cent with 584.

Adamczyk feels his third place finish, mostly with other than student voter help, shows that he has hit a number of issues quite well. People get confused. He has hit a number of issues voters feel are important. He polled fairly heavy in Precinct 13, 14 and 15, all on the southwestern part of town where environmental issues such as the SI bypass seem to be important, so he appears to be at least partially right. He lost because of an extremely low turnout in student populated Precincts 21, 22 and 23.

During the 1975 city election, about 220 voters turned out in the Towers, but this time only about 50 voted. About 220 voted in the area south of the Towers in ’75, yet only around 40 voted this time. The same low turn was also a factor in the area east of the Towers populated mostly by students living in trailers.

Adamczyk also lost because he didn’t hustle. Campaigning for two offices, city council and SIU student body president, he got a rather substantial amount of name recognition, yet he didn’t really go door-to-door, or have the funds to place ads in the local media.

Jones, on the other hand, probably conducted the most vigorous campaign of the candidates. Last winter he mailed out over 1,000 letters to acquaintances along with a flyer asking for their support. He walked over half the city going door-to-door, passed out 400 flyers in the Towers Monday and had a friend help older voters to the polls. Several of Fischer’s volunteers even lent Jones some help.

Fischer relied on his overwhelming name recognition, using a city-wide flyer campaign. Hewette used flyers and did some door-to-door canvassing.

Why don’t students vote? "Who knows."

Adamczyk said. Perhaps it is because they are still psychologically attached to their so-called hometown, have failed to register or simply don’t care who sits at the council table.

I suppose all three are good reasons. But what should the new council take as the "sentiment of the people"? Should it expend a greater amount of energy in those areas where more voters turned out?

Well first, it need not worry about student pressure. And second, it should feel no mandate to take any particular action advocated by the losing candidates, yet in the end, council members are going to have to try even harder to tap student opinion. Once again, city voters have proved it is the representatives which lead the people, not the other way around.

Nelmatilda Woodard
Music director to lecture here

Nelmatilda Woodard, director of the music division for the Chicago Board of Education, will present a workshop for prospective music teachers on Friday from 2 to 5 p.m. at Algeda Hall.

Woodard is coordinator for all the music programs in Chicago city schools. She has experience in teaching, organizing and observing the process of music education.

Woodard, whose major musical instrument is violin, holds a master of music degree from Northwestern University.

She has received numerous awards and distinctions related to music, including the Steinway award and the National Association of Negro Musicians' trophy in 1974.

Her experiences as an instructor extend from the Northwestern University Orchestra to the Detroit Youth Symphony Orchestra.

Bloodworth’s ‘fast shuffle’ win verified by recount

By Forrest Claypool

An unofficial recount of ballots cast for Highway Commissioner in the April 5 Carbondale Township Election gave three additional votes to Democrat Virgil Bloodworth, breaking a tie with his Republican opponent, Harold Hayes.

The unofficial tally of present ballots, called a discovery, took place last weekend before a commission composed of the incumbent city assessor, clerk and supervisor. All Republicans Representatives of the township, several and a member of the state Board of Elections were also present.

The recount was initiated by Chew, who filed a petition of discovery with the township clerk. Chew had earlier lost a drawing of the lot, a chance determination of tied elections permitted by Illinois law. According to Jackson County Clerk Bob Harrell, a drawing of the lot was anything from hopeless to drawing from a deck of cards. The candidate chosen the latter and Bloodworth drew the trump card to win the road commissioner's post.

A discovery is not binding on the election results, according to Harrell, but merely allows candidates involved in the election to assure themselves the results were valid.

The purpose of the discovery is to allow all those concerned a chance to see if any glaring discrepancies exist between the results of the initial canvass and the discovery. Harrell said, "If there are candidates may initiate legal proceedings."

In Michael Kimmel, a Carbondale attorney representing Chew and the Republicans, said a petition contesting the election won with the Jackson County clerk. However, he said a decision to withdraw the petition or continue litigation has not yet been made. Kimmel said he has not seen the results of the discovery.

"The discovery will have a bearing on our decision of course," Kimmel said. "We’re not going to press a complaint we have no chance of winning.

In addition to the three ballots declared for Bloodworth in the discovery, about nine additional ballots were disputed by the commission. Democratic and Republican representatives were unable to agree on the status of the ballots. However, the commission was able to agree on a number of ballots. When the final tally was recorded, Bloodworth was a three vote winner.

Six ballots in Precinct 6 (East Eureka) were voided in the discovery, because the judges had failed to seal the ballots. Four of those voided ballots belonged to Bloodworth. Several single ballots were without initials in other precincts and these too were thrown out.

Bloodworth’s biggest gain came in Precinct 4 in Northeast Carbondale. Three straight Democratic ballots were found inserted in the stack of straight Republican ballots. Candidates for all township offices will be sworn in Thursday, according to outgoing Township Clerk Virginia Price. However, the added, "I think the commissioner’s race is still in the courts.

Reading council conference set

The spring conference of the Southern Illinois Reading Council will be April 20 at the Student Center.

The featured speaker will be Walter MacGinnis, professor of psychology and education at Teachers College, Columbia University.

MacGinnis has done research on measuring reading achievement. He will give two speeches.

$6,500 raised in walk-a-thon

Approximately $6,500 was raised by 250 walkers at the third annual Archway Walk-a-thon Saturday. Gordon Richey, director of the Archway program, said the walk-a-thon was very successful.

Richey added that MOEE Mobilization of Volunteer Effort, was active in support of the walk-a-thon.

All proceeds collected for the walk-a-thon will go to providing services for handicapped children in Jackson County.

Archway located in Carbondale next to the Stoney Creek Nursing Home, is in its third year of working with handicapped children.

Student alcoholism up, survey shows

By Char Wilk

Staff Writer

Thirty eight percent of 300 SIU students who returned health service questionnaires meet conditions for a "probable alcoholism" and 32 per cent met those for a "definite alcoholism" based on their replies to a list of signs and symptoms of alcohol abuse developed by researchers at Washington University in St. Louis.

Recent general population studies by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) indicate that about 10 per cent of all Americans who drink have alcohol-related problems involving loss of self-control in an inability to maintain a socially acceptable life.

One SIU official said the student survey results point to the need for University action on the problem of alcoholism. An SIU professor of higher education, who said he recognized alcohol abuse as a problem for students, said, "As an experience as an instructor, has organized a training program in alcohol awareness for college counselors and administrators.

The Health Service survey included questions on four different categories to identify physical symptoms of alcohol abuse, psychological and behavioral signs of alcohol abuse, personal and family problems due to drinking and legal problems or troubles at work or school as a result of drinking.

Students who gave positive responses in at least two of the four areas meet the conditions for "probable alcoholism" and "definite alcoholism" applied to the survey who gave positive answers to three or all four of the areas, Spall said.

College students are more likely to drink (10 to 30 per cent of the 11 million college students in the United States), according to NIAAA, figures than members of the general population. NIAAA figures indicate that the number of 21 in the U.S. who drink at least occasionally has greatly increased in recent years, but heavy drinking is more common among 18 to 20-year-olds.

Spall, a psychiatrist, said he undertook the study to try to determine how widespread various psychiatric disorders among SIU students and to compare the results for the general student population with results he already had for 350 students he had seen for psychiatric problems during a two year period at SIU.

Spall's student patient population 29 per cent met the conditions for probable or definite alcoholism based on the criteria used for his recent survey.

Spall prepared and mailed 2,200 questionnaires during fall semester, 1976, to students selected randomly by computer from a list of all students registered.

The 581 questionnaires returned could possibly be a biased sampling, Spall said. The question, he said, was, "which kind of people filled them out and sent them in?"

Spall said the results he has now are preliminary and that he will continue to analyze the data for more specific information and for various correlations.

Some organizations and researchers consider alcohol abuse to be a major problem for college campuses.

One SIU researcher, in response to what he sees as a lack of recognition and reporting by colleges and universities to alcohol abuse as a major problem, has organized a week long training program in alcohol awareness to begin May 10 at SIU.

Arthur Casebeer, SIU associate professor of higher education, who said the conference is aimed at giving participants from colleges and universities in 10 midwestern states enough information to start programs in alcohol information, counseling and referral at their own schools.

Many students can't function properly in class, can't maintain their academic program and are experiencing discipline problems due to overuse of alcohol.

Casebeer said, "We want to make people more sensitive and aware and we want to work effectively with people who have problems.

Sam McVay, administrative director of the Health Services, said he thinks the survey results "point to the crying need to get someone dealing with the problem of the ground. We've been false starting for the past two years. We're going to move on it now.

McVay is a member of an informal committee under the direction of the office of vice president for student affairs studying alcohol abuse at SIU.

According to Thomas Busch, assistant to the vice president for student affairs, some of the committee members have been studying alcohol abuse individually for three or four years Busch said the committee's first meeting would be later this month.

"Historic action hasn't been taken until now," Busch said, "because of other priorities. We've been in a real money crunch. There have been just so many times we've been involved in." Busch said.

Busch said he expects to see a "concentrated effort on the next few months to prepare a position paper on student alcohol abuse for Bruce Swinburne, vice president for student affairs. The paper will include suggested programs to be undertaken by the University,

FOLK ART PAINTINGS

NEW YORK (AP) - The Museum of Folk Art is presenting a display of paintings and watercolors, "Selected Masterpieces of New York State Folk Painting." The exhibition is the last of a series on New York State folk arts, and will be shown through May 22.

Thompson names committee to oust outdated local government programs

SPRINGFIELD (AP)—A 23-member commission was appointed Wednesday to conduct hearings aimed at doing away with outdated or underfunded programs which the state has ordered local governments and school districts to provide.

State Sen. Kenneth Busbee, D-Carbondale, has been selected to serve on the education committee.

The commission appointed by Gov. James Redford Thompson includes nine public members and 14 legislators and other state government officials.

Thompson designated a 24th person, Lt. Gov. Dave O'Neal, to serve as chairman of the so-called Commission on State Mandated Programs, which is due to report to the governor by Nov. 1, 1977.

Thompson said it was fitting that "at a time of fiscal austerity we ought to sunset ourselves."

"We must not continue to place undue burdens on local governments if the burden is unwarranted," Thompson said.

"It will be the assigned task of the commission to ferret out programs that fire excess baggage and start the ball rolling to end them," he said.

Thompson said the commission has been divided into two subcommittees, one on education headed by his top education aide, James Neulan, and the other on local government headed by the director of the Department of Local Government Affairs, John W. Cleveland.

The subcommittees were told to bear testimony on state mandated programs during a series of meetings at 19 locations.

The meeting sites are Chicago, suburban Cook County, Peoria, Rockford, Quincy, Moline, Champaign, Carbondale, Urbana and the Metro-East counties.

Asked to give examples of the type of state mandated programs he was concerned with, Thompson said there are a "wide range" of them, but cited only one—state standards at local jails.

Members of the commission who will be unsalaried but reimbursed for expenses are:

Education: Sandra Aderer, Marion, a teacher; Martin Geraghty, Chicago, corporate vice president; Mary Margaret Landman, Chicago, vice president of the National Association of Boards of Education; Milton McGuire, Beardstown, a lawyer; and Shirley Rauchester, Elgin, newspaper editor.

Group offers food stamp aid

By Gertha Coffie
Student Writer

The Illinois Department of Public Aid, in conjunction with the Black Labor Area Coalition, Inc. (BLACK), has formulated a food stamp outreach program.

Cleveland Kimbrough, food stamp coordinator of BLACK, said, "We are trying to reach people who are not familiar with the food stamp program, as well as those who, for lack of transportation are unable to visit their local Public Aid Office.

Kimbrough said outreach workers have been making some door-to-door contact to inform some persons on how and when to apply for food stamps.

The program offers prescreening to determine eligibility, application for those who are eligible, information on nutrition and the food stamp program, home-visit appointments and free transportation to the food stamp office for applicants who need it.

A list of students are eligible for food stamp aid. Kimbrough said, "And we are trying to reach everyone in the community who needs them."

Outreach workers will be in Franklin, Williamson, Perry and Jefferson counties, Kimbrough said. Persons living in those counties may call 460-711 ext. 48 or 54 between 8 a.m. and 5 p.m. for further information.

The offices of BLACK are located in the Kornia Hayes Center at 1111 Division St. in Carbondale.

Kimbrough said senior citizens may contact their local senior citizens program. Persons not in need of the services of the outreach program may contact their Public Aid Office.

‘Scoundrel Time’ painful, frank

By Mary Beth Maclean
American Writer

The period of the 1960's was opening for many Americans in the television show, "Patton: Knees Bent." Happy families, concerned only about the small problems that crop up in everyday life, were untroubled and secure.

But for other Americans, especially those associated with the government or with the Hollywood movie industry, the 1960's was a time of insecurity and much fear.

"Scoundrel Time," by Lillian Hellman, is an account of her life during this period, which is conveniently covered by the House Un-American Activities Committee. In May of 1963, Hellman was summoned to testify before the House Committee on Un-American Activities.

The committee was interested in finding out what her association with the Communist Party or with any of its members meant to her. Hellman responded that she would tell the committee anything they wanted to know about herself, but refused to answer questions about anyone else.

Lillian Hellman is a truly accomplished playwright and author, "The Children's Hour," "Watch on the Rhine," and "The Unfinished Woman." She is just a few of her works.

"Scoundrel Time," published in 1976 is painful to read. One expects something different when beginning something that is more polished. Although it is an intelligent and sophisticated account, it is often confusing and choppy in some instances, too long in others. It reads as if the author is trying to piece it all together in her own mind. The reader is instantly drawn in, almost reliving the ordeal with her.

The book is only 113 pages long in the paperback edition, and it focuses more on Hellman's evaluation of the sociological and political atmosphere of the time rather than on her personal involvement.

We can understand her situation and her confusion as she tried to comprehend it all. As if she was a small child who first encountered that painful realization all at once, in black and white, and more important, that integrity of some people reaches only as far as their own security and wellbeing.

There are some problems with the book, particularly with the timing of the publication. It borders on being a bit too topical. We have, except for fratic behavior toward her birthday. Along comes Anthony Hopkins, whose 8-year-old daughter, Lillian, was killed in a flaming auto crash the same day Lillian was born. He is convinced that Ivy is the continuation of his Anthony Hopkins. What I liked about this script says Mason, was that it did not seek its thrills by having people's heads fall off. There are no nagging elements of surprise.

The script is, at least, for this reviewer Non-believers in reincarnation may find the premise difficult to accept. A strong con- vincer may be the very real anguish expressed by Mason. The idea that some of our performances will surprise those who know her only from her previously filmed, "Blume in Love" and "Cinderella Liberty." Also she has appeared in three of Simon's comedies, "The Good Doctor," "Bogart Slept Here," with Robert Mitchum and "The Goodbye Girl."

13th Century play opens

The "Play of Robin and Marion" will be presented by the New World Center on Friday, April 22 at 8 p.m. in the Marson Civic Center.

The "Garde de la Halle," a "splendidly musical comedy plot from the 13th Century," will be presented by the New York troop at a full grown imprint into the everyday life in the middle ages.

The "Play of Robin and Marion" will be in music, song and drama. It is the tale of a young shephers and her lover. Robin Hood, and Maid Marion. The two characters, named lecherous and gain permission to marry. All the main action of the play is accompanied by authentic musical instruments from the middle ages.

Tickets may be purchased at the Marson Civic Center. Admission is $4 for balcony seats and $6 for orchestra seats.

Beg Your Pardon

Vector Brady, "King of the Street" and "Chinatown," will be featured in concert by University of Tennessee will play Thursday, April 21. The date was regrettably omitted from Tuesday's story.
Student jobs now available; ACT forms on file required

The following jobs for student workers have been listed by the Office of Student Work and Financial Assistance. To be eligible, a student must be enrolled full time and must have a current ACT Family Financial Statement on file with the Office of Student Work and Financial Assistance and must have completed an application which may be picked up at the Student Work Office, Wardy Hall, third floor. Forms are available as of April 18.

Clerical—Nine openings, morning hours, 8-11 a.m.; afternoon hours, 12:30-7 p.m.; 8-11 a.m. and 1-5 p.m.; 2-5 p.m.; 8-11 a.m. and 1-4 p.m. Microfilm/limits—Involves heavy lifting, with some typing ability, 9 a.m. to 5 p.m. Animal caretaker—one opening, morning hours.

Jobs available during summer:

Clerical—11 openings, morning work block, four openings; afternoon block, seven openings, hours to be arranged, one opening, work break, May 15-June 11, 40 hours per week.

Miscellaneous summer—Library work, four or five openings, shelving; Closing dorms as Touch of Nature at Little Grass, two openings. Phone answering, one opening, 8-11 a.m. or 10 a.m. 2 p.m. Mail service meter operators, two openings, 1 a.m. 1 p.m. Transit drivers, seven or eight openings, morning and afternoon work blocks, driving test to be given first week in May. Parking lot attendants, eight openings, 8 a.m.—noon, 1-5 p.m. and evenings.

Student Work Statement on file with the Student Work Office. Applications may be arranged; one opening, 8-11 a.m. and 1-5 p.m. Microfilm/limits—Involves heavy

Less than two per cent of all stolen property in Carbondale is ever returned to the owner according to the Carbondale police department's crime prevention bureau.

Emblems marked "Help Stop Crime" available in local businesses contain pamphlets giving information on how to prevent crime and how to get stolen property back through Operation Identification.

Operation Identification is simply engraving belongings with the driver's license number of the owner. Carbondale police provide an electric engraving pen at no charge to residents. One pamphlet in the envelope is a check list on which owners can place the serial numbers of their belongings for reference.

"In making your property readily identifiable to the police, you help other crime in two ways," says a pamphlet. "First, a thief is discouraged from stealing marked property, because it is much more difficult to sell. Second, if he steals your property, it is much easier to catch and prosecute him if he is discovered with the goods in his possession that are identifiable with atoms."

To make a home safer from burglars, it is suggested that deadlocks, pet phrholers and chastelocks be installed on doors and windows that cannot be inaccessible from the outside. The pamphlets stress that using these defenses is just as important as having them.

The second most important point of entry is the windows. The police suggest that grillwork is installed on out-of-the-way windows in such places as the garage or basement that is also suggested that patio, automobile, or window in windows must be left unattended.

Keys should be watched carefully. Home keys should be kept separate from car keys when given to anyone who would use the car. No keys should have identification that could indicate to what home or car they belong.

Lochs should be changed if keys are lost, the pamphlets say.

The pamphlets advise how not to "invite" burglars when the house is vacant for a long period of time. The house should appear to be occupied by keeping doors of milk, newspapers or mail, or tending lawn care, leaving lights on and leaving drapes open. Before leaving, friends and police should be told that the house will be vacant.

The pamphlets deal with safety on the streets and self-defense. People are advised to park in well-lighted areas, check the back seat of a car before entering and have the key ready. Caution should be taken in displaying valuables in public. A person's whereabouts should be known by friends.

"If attacked—hit where it counts," in the caption of a drawing which indicates the most vulnerable points of a person. It advises women to use only their first and middle initials for listings on doors, mailboxes or telephone directories.

The pamphlets stress that belongings should be identifiable and opportunity should be denied the burglar.

For information call the crime prevention bureau of the police department at 546-3321.

DEAR PLAYS.

NEW YORK (AP)—A design firm here advertises a cocktail table five feet by two-and-half feet by 14 inches, made of solid acrylic. The piece weighs 357 pounds. It is sold for $40,000 each.

A breach of the "First, proper entry back for the operations of crime prevention booklets to give" number of stolen property. According to the chief of police, they are supposed to be delivered to the police station at the time of loss. They are supposed to be delivered to the police station at the time of loss.

In some cases, criminals have stolen property ready to sell in local sales and garage sales. The police have found that much of the stolen property is sold to local businesses and garage sales.

The police recommend that garage sales be advertised in newspapers and local business directories. They also recommend that the police be notified of garage sales.

"We are asking people to be cautious when selling property," said Chief Of Police. "We want to make sure that the property is sold to the legitimate owner."

$500 SEOG money available to students for summer term
A limited amount of Supplementary Educational Opportunity Grant money (SEOG) has become available for SIU students for the summer semester.
Applicants for summer must have received financial assistance during the 1977-78 fall and/or spring semester at SIU-C. Preference for awards will be given to seniors who plan to attend a four-year college. Next preference will be in order of receipt of applications.
Completed applications for SEOG for summer 1977 must be turned into the Student Work and Financial Assistance Office by Friday, May 6, along with a summer 1977 financial statement. Applications are available in Woody Hall Room 303.

Collective Bargaining Election: When Will It Come?

PLAIN TALK by Herbert S. Donow
President, Carbondale Federation of University Teachers

Last week, April 14, the SIU Board of Trustees spent over three hours learning about the collective bargaining situation. Having earlier received reports from their consultants—David Feldman, Dean of the School of Business and Management of United States International University in San Diego, J. David Kerr, legal counsel for Central Michigan University, and R. Theodore Clark, partner in a Chicago law firm—they listened to the consultants' presentations and asked questions. Each of the consultants who addressed the Board has represented other universities in collective bargaining and, in fact, derives a significant amount of income from that activity. None of them advised the Board against bargaining. Although one or another sometimes took a narrow view of the bargaining process, the consultants in the Daily Egyptian's opinion may have perhaps given some people a mistaken notion of what happened at the Board meeting and what it meant. Let me first say that I was encouraged. There is no question in my mind that the Board will authorize a collective bargaining election to be held probably sometime next fall. This view is based on my irrepresentable optimism but on the observation of the Board proceedings. Of the four Board members who voted not to reverse the Board's earlier position (i.e., no collective bargaining election until the Illinois General Assembly passes a Collective Bargaining Law), two publicly declared that their present positions were "not definitive." I take that to mean that a) they want to digest what they heard—none of which was calculated to persuade against collective bargaining; b) they want to wait a few months to see if the legislature will pass a law thus relieving the Board of the onus of developing rules and guidelines.

Indeed, one of the others who voted no probably made it clear to me afterwards that he would agree to this rather than try to establish guidelines by themselves.

Would the Board not want to be in the favor of proceeding without the law. In other words, there is at least one vote more in favor and probably three, if not four. As the Board saw it, April simply was not the right month for action. Since we could not have gotten an election before the end of the term, we have probably lost little. In our presentation to the Board last November, we urged them to establish a committee made up of representatives from the various collective bargaining organizations on both campuses and from the Board to discuss such things as the scope of bargaining and ground rules for the election. It is our hope that they will agree to this rather than try to establish guidelines by themselves.

It has been a long time—six years—since we organized the CFUT and began to push for collective bargaining at SIU. But at long last, it appears that we will be having a collective bargaining election, which means that the time has come for faculty and staff members to commit themselves to the support of CFUT. The adherents of collective bargaining can do their cause a disservice if they do not now join the CFUT—the largest, strongest, most representative collective bargaining organization and in so doing make it larger, stronger and more representative.
Off-campus students pay on-campus fees

By Lisa Harrison

Lisa Harrison, a senior in the physical therapy program at SIU, will pay $190 in fees, in addition to tuition, for 12 hours of credit this summer, but she will not be in Carbondale. She will be serving an internship at a Chicago-area hospital.

Lisa is one of a number of students taking courses in Chicago this summer to ensure a practical training experience from Southern Illinois University, Carbondale, but she is not unique. The university has a number of students enrolled at SIU, with the exception of students taking courses in out-of-state centers and students participating in the travel-study program.

Four fees—the Student Center fee, the athletic fee, the student activity fee, and the student recreation fee (SRRF)—are nonrefundable. Student health insurance, which covers students living away from the campus, is also nonrefundable.

Trend toward large-acre farms creating new class of millionaires

By William Proctor

Associated Press Writer

PEORIA (AP)—Booming farmland prices are helping all students create a new class of millionaire—the central Illinois farmer.

But to spend that money he'd have to find out how to use the acres.

Just by holding land he bought for $2,600 an acre, a typical farmer in Illinois' most fertile area may have increased his net worth by 600 percent.

Agricultural economists say the desire of farmers with large landholdings to add even more acreage to their spreads is at least partly responsible for the soaring prices.

In addition, they say, the demand is causing a steady decline in the number of total farms in the state.

A preliminary report by the latest U.S. Census of Agriculture in Illinois shows that from 1972 to 1985, the number of state farms larger than 1,000 acres increased by 60 percent, from 1,400 to 2,262.

During the same period, the number of small farms (0 to 440 acres) dropped from 58,000 to 40,000.

In 1989 there were only 145 farms in the state larger than 2,000 acres. By 1972, there were 1,330.

Prime farmland in the central and southern parts of the state now brings at least $4,000 an acre at auction, says Brad Johnson, McLean County farm extension advisor.

"Mostly it is big farmers buying up 30 or 40 acres at a time, filling in corners," he said.

It's good for the man who is established, and bad for the young fellow who like to get into farming," Johnson said. "It is the survival of the fittest in agriculture, and it is the better operators who can make these land purchases."

Financial data in the Census Bureau's agriculture report was out of date before it was issued. The final, more complete census will not be available for several months.

Among other things, the report indicates the average Illinois farm land had increased 3.3 acres since 1972 and a recent study shows an increase of 13 acres per farm, to an average of 120 acres, between November 1975 and November 1979.

A 40-acre tract in Livingston County sold last November for $6,975 an acre, which is the highest price ever paid in the Midwest west for land intended for agriculture.

Similar sales in recent months have brought $4,000 or more in central Illinois and $2,500 to $4,000 farther west in counties like Warren and Henry.

The value of farmland for tax purposes is being determined by farm sales, which is the reason farm groups are pushing hard for laws to base their property taxes on productivity.

One bill supported by Rep. Marilyn Ridgley, R-Hicksboro, would use the value per acre of agricultural products sold in the county where land is located as the basis for taxes, relying on statistics in the latest agricultural census.

The average Illinois farm sold $4,132 worth of goods in 1974, up from $3,325 in 1969. Pratt County led all counties in sale of goods with $6,350 per farm, up 120 percent from 1969.

AUTO PRODUCERS USE FIBER GLASS TO BURN SOUTHERN MALL

TOLEDO, Ohio (AP)—Detroit's auto industry is using fiber glass reinforced plastics (FRP) in over 150 different applications, reports a fiber glass industry executive.

The use range from front-end to rear-end panels and include instrument consoles, brake pedals, baths, valves, ducts and brackets," said Bert D. Elliott, vice president of Owens-Corning Fiberglas Equipment and Transportation, Reinforcements Division.

Twenty out of 36 physical therapy assistant students will be the summer internships away from Southern Illinois, according to Ted O'okta, head of the physical therapy assistant program.

Elaine Aiden, coordinator of the Office of Professional Experiences, said 83 student teachers are in the Belleville, Quincy, Springfield and the Chicago areas this semester.

Other programs, such as mortuary science and administration of justice, require internships that can take students away from the Carbondale area.

There is a need to find out who these students are," Aiden said.
Language experts plan meeting here to discuss controversial ability test

By Ed Smith
Student Writer

Language testing experts from several universities will come to SIU this month to discuss the controversial and not fully understood area of language tests.

Among the speakers will be Paul Angel, who heads the committee which designs the test used by many universities to decide on the admission and placement of foreign students.

The "First International Conference on Frontiers in Language Proiciency and Dominance Testing" will be hosted by the SIU Linguistics Department from Thursday through Saturday.

John Redden, co-chairman of the conference, explained that while the conference is organized around scholarly research on the relationship between language and learning or thinking, these areas are the center of social and political controversy.

Many minority and non-English speaking students feel that tests used to measure intelligence and language proficiency are biased in favor of English-speaking, middle-class students, Redden said.

Redden noted that the state of Illinois was once cited by the U.S. Supreme Court and the Department of Health, Education and Welfare for violating the civil rights of Spanish-speaking pupils by not giving them an effective education. The questions are: "What are we testing?" and "How do we evaluate the results?"

At the conference on the second floor of the conference center, SIU, Redden said:

because SIU probably does more testing on English as a second language than any other university in the country.

Redden estimated that 200 to 300 people will attend the conference.

Meetings will be in ballroom B of the Student Center on Thursday, in the Student Center Auditorium on Friday, and in Brower Auditorium on Saturday.

---

StonE AGe FIND

PRAGUE, Czechoslovakia (AP) — An early Stone Age settlement believed to be about 5,000 years old, was discovered in Brezi near Mikulov, on the Czech-Austrian border.

A wise cattle herder stumbled upon the find when he noticed fragments of ancient vessels protruding from the ground in a newly planted forest.
Energy plans will promote stability, Carter's economic adviser claims

CHICAGO (AP) — President Carter's chief economic adviser said Wednesday Carter's energy proposals may initially have an adverse psychological impact on the economy but will ultimately provide the stability for future growth.

"I would think that ultimately the impact would be favorable," said Lewis, vice president of the Office of Management and Budget. "It would be hard for me to pinpoint a specific date.

"You may have some psychological impact because of the proposal but there may not be an actual impact until 1979," Lewis said at a news conference.

With the establishment of an energy policy, "I think that overall what we're talking about is being able to have a viable economy once again in this country," he said. Lewis said the "vast uncertainty" in the economy due to an absence of a clear energy policy "impacts much more adversely on the GNP" than do Carter's proposals.

Lewis, who later spoke at a businessmen's luncheon, said the administration tried at first to formulate an "easy, simple and painless" proposal but found "we can't deal with the critical effects we're talking about on that basis.

He said the energy question will be "the most critical aspect" of Carter's four years as president and warned against Congress expecting Carter to compromise.

"I think he will fight extremely hard for passage of his policy," Lewis said. "And this is no time to talk about compromise or fallback positions.

Robert E. Lewis, vice president of Citibank, also addressed the day-long assembly sponsored by The Conference Board, an economic research group.

Lewis said that a survey of 4,300 firms showed an increase of 20 percent in after-tax earnings in 1976 from 1975. He said, however, that when the figures are adjusted for inflation, "it turns out that 1976 earnings were just about the same as 1975 before the recession.

"Profits in dollars of constant purchasing power have barely regained pre-recession levels and have not shared in the growth of sales and in the economy generally.

He said the future outlook is for real profits to grow about 3 percent a year in 1977 and 1978 — a movement Lewis characterized as "good but not exuberant.

Wrecked truck causes traffic tie-up

A cement mixer truck blocked traffic at the University Mall and Rte. 13 intersection for about two hours on Tuesday when it overturned and spilled concrete onto the road, Carbondale police said Wednesday.

The driver of the truck, Bobby Prater, 38, of Rural Carbondale, was attempting to avoid an auto driven by Bernice Welsh when the accident occurred, police said.

Prater veered to avoid the Welsh auto and overturned the truck. Traffic was blocked for about two hours while the truck was righted and the concrete spill was removed from the pavement, police said.

The accident occurred at 3:10 p.m. Police said no one was injured. No tickets were issued.

Stolen boat, motor recovered

A 16-foot boat and a 9 1/2 horsepower outboard motor were recovered from Little Grassy Lake after the two items were taken from the SIU Touch of Nature last week.

SIU police said that Jim Lipp, groundskeeper at Touch of Nature, discovered that the boat was missing last week. The motor and a 6-gallon gas tank were taken from a boathouse near the center at the same time.

All three items were found Tuesday in a camping area on the lake. They were returned to the Touch of Nature center.

SIU police have no suspects and are continuing an investigation into the disappearance.

Fire causes minor damage

Smoke from trash burning near the door of an SIU student's apartment Wednesday caused an estimated $75 in damages.

The front door, carpet and walls immediately outside of the 316 S. Graham St. apartment of Susan Raylby, a junior in education and home economics, were damaged.
Author does his homework to see if life after high school does exist

By Vicky Levitas

The world of cheerleading, proms and football games can make a junior smile or break out in a cold sweat. If it’s the latter, you may have a case of high school loser, the disease that haunts the minds of high school graduates.

Ralph Keyes takes a peek at those "pleasurability, perishable memories of high school. He probes into the lives of high school "insiders" Phinade-hair排名 cheerleaders and -be-mass jock but not forgetting the underprivileged, un-popular "outs"

Success and failure in high school. Which area do you fall into? Keyes interviews musicians, entertainers, movie stars and others about their high school experiences. He visits high school cheerleaders, bookworms, student body presidents and jocks - tracing their current lifestyles and comparing it to their pasts.

The high school "insides", according to Keyes, face a dilemma when they graduate. What do they do for an encore? Many get married, settle for mediocre jobs and lose a life dwelling on high school memories. Keyes adds that "the nation's future is in there," and he insists that fanoned education must be continued during high school. Sometimes success and failure in high school is the same. Sometimes it's different.

The author scours books, websites and magazine articles to become familiar with the ways of high school now and in the past. Keyes agrees with Kurt Vonnegut who said high school "is closer to the core of the American experience than anything else I can think of. People can't seem to forget high school memories, good or bad."

The pains of being an "outs." Wallflowers (soberly by Charles Strouse, Laurent Hutton and Al MacGraw) This pain of not being popular often is the revenge. Betty Friedan said, "If my daughter were some day to say, "Mom, I’m a failure at cheerleading," I’d think, 'For God's sake, have you seen her cheer?"

A Review

learn to respect me. Dustin Hoffman claims he had acne, braces and was way too short. Many movie stars and noted personalities vowed to get back at the students, coaches or teachers who ridiculed them in high school. If revenge is your game, Keyes lists 10 ways to get high school off your back. Regardless of whether they will work or not, disrupting a homecoming parade, making an obscene phone call to an enemy classmate and sending your Ph.D thesis to your college counselor who said you weren't a college material - all may relieve bottled up frustration.

Keyes stops at nothing. He interviews Robert Logue, the man who beat Nixon for senior class president in 1960 and talks to Vincent Dunnigan, who failed to make cheerleading. How do these people react when talking about high school? Many have a chip on their shoulder, while others are trying to forget these glamorous years.

No matter how hard we try to forget those haunting memories - not being asked to prom or falling down in cheerleading tryouts, we can't. Those years, according to Keyes, are painful and we still may tremble when thinking about them.

The book has many human parts but it is definitely geared to the native generation. Parking back at my high school years, cheerleading, football and pom-pom girls were the "insides" like they once were. This generation seems to be stepping away from the pressures of being popular. High school students are more free to do what they want and not be classified as an "insider" or "outsider."

Keyes does highlight the book with old school pictures of noted writers, stars, musicians and politicians. It's amusing to read about their high school interests, problems and experiences. Keyes even attends class reunions and reports on what type of people show up and who stayed away. He didn't falter short in research - he did his homework adequately.

Is there life after high school? Who knows. The big question is; in my mind, is there life after college? Army awards for pumping station

CENTRALIA, (AP) - The U.S. Army Corps of Engineers announced that it will award a $9 million contract for construction of two Mississippi River pumping stations near Carbondale, Ill., officials said.

The contract went to the Noble-Redman Construction Co., Maryland Heights, Mo.

UNIVERSITY STUDY

Interested in earning university credits while exploring a new land in all its aspects? Why, not consider a summer semester, year or degree program at one of Israel's seven leading universities. Religious studies, humanities, the social sciences and a host of other courses are offered in either English or Hebrew with special emphasis on helping you to get a grasp of Israel. Whether it be in Jerusalem, Haifa, Tel Aviv, the Negev, a study program at an beach university, will give you a new feeling of depth and wholesomeness as well. Write for a brochure giving information on all the universities and the program this year's offer.

Publisher to discuss religious journalism

Donald J. Thomason, publisher of the National Catholic Reporter, will speak at 2 p.m. Sunday at the Newman Catholic Student Center on "Religious Journalism: Wave of the Past"

According to Pat Sims, program coordinator for the Newman Center, Thomason speaks frequently to lay and professional marketing and fund raising clergy groups in the United States and Canada. He has appeared on national and local radio and television programs, discussing such topics as theology, religious journalism, church and world affairs and marriage.

Thomason is the author of "The Emerging Layman," and is a frequent contributor to such magazines as Crisis, Sign and Our Sunday Visitor.

Thomason's lecture is being sponsored by the Catholic Knights and Ladies of Illinois-Newman Lecture Series. Previous lectures were by Fr. Andrew Greeley, Fr. John Powell, Fr. Frank Cleary, Buckminster Fuller and Dr. Elizabeth Kubler-Ross.

Free tickets for the lecture are available at the Newman Center.

Adjustment to American life easy for Filipino tennis player Ampon

By Jim Macman
DAILY EGYPTIAN SPORTS WRITER

Most foreign student athletes who attend SIU have trouble adjusting to American ways. But that was not the case for Mel Ampon, who had no trouble at all.

Ampon, a 20-year-old Filipino, had been playing tennis competitively almost his entire life.

"He's one of the hardest workers I've ever had," Auld said. "He always gives 100 percent on the tennis court. Mel plays tennis with passion. He has great control and a great head wind.

Ampon said adjusting to the climate in Carbondale and asphalt tennis surfaces was his hardest transition. He said in the Philippines, the weather was usually sunny and hot with only slower clay tennis surfaces available for play.

"It was really hard getting used to the asphalt surfaces," Ampon said. "My legs and thighs used to hurt all the time because running on asphalt is harder and you can't slide on it."

"I used to play more baseline tennis," Ampon said, "but on asphalt you have to come up to the net more often. It's more of a serve and volley game."

Off the court, Ampon said adjusting to the American way of life was a struggle, but he is glad that he chose to attend SIU in the spring of 1974.

Ampon's father, Feliciano, wrote to SIU requesting that he send his son abroad, giving his son a scholarship. Feliciano also wrote that his son had good success in the past with Filipino tennis players like Armando Villarete, Macky Dominguez and Johnny Yance.

"Tennis legend in the Philippines. He played for 30 years on the Philippine National Davis Cup team and played in the Olympic Games in singles just a few years ago. In his 30-year span, he played games at Manila, Bangkok, Tokyo and Hawaii," Auld said.

Ampon said that he played tennis against players like Pasche Gonzalez, Jack Kramer and Rod Laver.

Ampon said he began playing tennis with his father when he was 5 years old. He said he always played singles tennis, but he could also play doubles.

"We have three matches against teams from Middle Tennessee State University and West Virginia University," Auld said.

At least 12 Salukis in NCAA track

By Rick Karch
Daily Egyptian Sports Writer

With the outdoor track season only halfway completed, the SIU track team is almost assured of qualifying more members for the NCAA championships than any other IU track team.

After Saturday's dual meet win over Illinois, the number of salukis who have met the NCAA standard stood at 12. In 1972, 13 individuals qualified for the NCAs, which leaves this year's team one behind. But several members of the team are also close to NCAA qualifying mark in their events, that track coach Lew Hartzog is sure they will make it. Hartzog also remarked that the standards in 1972 were much easier than they are today.

Hartzog sees six trackmen as sure bets to qualify. They are Mike Kee in the 200-meter dash, which he ran 21.31 time is only two-tenths off the mark. Earl Bigelow and Steve Lowery in the 440. Bigelow is two-tenths off the mark, while Lively is three-tenths off. The other runner is Mike Sawyer in the 5,000-meter run. Believe it or not, in a race more than 14 minutes long, Sawyer is two-tenths of a second off the NCAA qualifying mark.

In the field events, Stan Podolskis's school record of 172-4 in the discus leaves him only 4/2 feet off the mark, and in the triple jump, Ken Lorraway is a measer 1/4 inch off the 52-foot mark.

There are also a few other members of the team who stand a chance to make the NCAA's.

In the 880, Hartzog thinks Pat Cook has a chance to make it, while two members, Mike Russan and Sawyer, could qualify in the 1,500-meter run. Sawyer is still more than eight seconds off the mark, but Hartzog is fairly confident he can cut that time off. In the case of Russan, Hartzog said the Ugandan could make the mark, but since Russan has already qualified for the 880 and 1,600-meter relay, he may not run on much in the 1,500-meter race.

Andy Roberts, SIU's top hurdler, looked as if he would qualify, but strained a groan muscle a month ago, and his chances aren't as good as they were before. 'He still has plenty of time to get his legs in shape, and he doesn't waste it, he can qualify,' Hartzog said. Hartzog mentioned that Mark Cooard has a chance to hit the 14.4 mark in the pole vault. Conrad's personal best is 15 feet. Other Salukis, who have already qualified for the NCAA championship are Ken 100-meter dash, which he ran 10.56 last year, Eric Darsey 400, Russan 880; Bob Rogers javelin, Rick Corke and Lorzaway (long jump); Tim Simmons, Gary Hoots and Clay Delmatt (pole vault); John Marks (shot put) and the 400-meter and 1,600-meter relay teams.

So with the team just now getting into shape according to Hartzog, the chances for more Salukis in the NCAs than ever before seems only a month and a half away—that's when the NCAA championships are. And when there's more Salukis in the national championships, the chances for a higher finish than ever before are better.

Cardi's beat Mets, 4-2;

take over first

ST. LOUIS (AP) - Tom Simmons drove in four runs with a homer and a single in the final inning to lead the LSU Cardinals to a 4-3 triumph over the New York Mets Wednesday.

The hit of Simmons' assault was Mets' left-hander Jon Matlack, 1-2.

Don Jessinger led off the Cards sixth inning with a single to left and raced to third base on Hector Cour, single up the middle. Simmons then drilled a three-run home run, his third of the year, off the top of the left field wall.

Prior to the outburst, Matlack had restricted the Cards to three hits, working past a bases-loaded jam created by a single and two walks in the second inning.

Simmons drove in his fourth run with a single in the eighth.

Rainman 1-2, who had scattered four hits through eight innings, but his shortest hit in the ninth when Lee Marrilli singled and Bruce Boisclair hammered a two-out home run, his first of the year.

When a baseball team plays a lot of doubleheaders, it's one pitch
that can hurt complete games. SIU baseball Coach Itchy Jones
was a little concerned yesterday as Bob Knezevich and Kevin
Waltrip pitched complete games and the Salukis swept a doubleheader
from Evansville at Abe Martin Field.
And so it built up seven hits enroute to winning the opener, 9-3, while
Waltrip fired a four-hitter in the night-
cap to earn an 8-0 win. The victories
boosted SIU's record to 22-7, and
gave them nine straight going into Friday's
road trip with Kentucky State.
"Our pitchers have been doing a real
good job," said Jones. "It just seems
better they get, the better our
hitting and defense gets."
Knezevich, who boosted his mark to
3-1, had control trouble in the early
goal as he walked six batters in the
first two innings. Luckily for
Knezevich, the Purple Aces could only
put two runs across the plate.

NBA playoffs enter round two

HOUSTON (AP) - Washington
Bullets forward Elvin Hayes says
loss of the National Basketball
Association's Central Division title to
the Houston Rockets actually has
hurt the Bullets.
Hayes benefitted the Bullets' cause
Tuesday night with 22 points, two
rebounds and a .15 in the turnaround second, to lead
Washington to a 111-101 victory and
gave the Bullets a 1-0 lead in their best of
seven NBA quarter-final playoff series with
the Rockets.
Game No. 2 in the series is set for
Thursday night in The Summit before
acting out the to the Bullets' home court
and the Capital Centre, on Sunday.
The Bullets sliced out the 101-98
games Wednesday. Boston, leading Phila-
delphia 4-1, visited the Bullets while in a
pair of American Legion Championship
sparks, Los Angeles and Portland was at Den-
ver, the only former American Basket-
ball Association team still in the
playoffs.

Saluki leftfielder Jim Reeves gets the signal to keep on chuggin' in the
first game of SIU's doubleheader over Evansville Wed-
nesday. Reeves rapped three hits and was on base five times for the
day. (Staff photo by James Emsign)

Something's rotten in men's intramural softball

This season, if you played on an independent men's
intramural softball team, your squad better had
ten off to a fast start. Because you played a round-
total of four games. And as if that isn't bad enough,
the fraternity teams, which are all lumped in one
competition, played eight games during the regular
season.
The independents are getting the raw end of the stick. There are 125 teams entered in the 1M softball
this spring. That leaves 118 teams, or about 1,500
kids, who have a short schedule and little
preparation for the playoffs. But the nine fratty
teams get to play eight games — official contests
with paid umpires — and have twice the amount of
competition to tune up for the playoffs. What is going on here?

According to Larry Schaeke, coordinator
of recreation and intramurals for men, the short
schedule is because there is not enough time, fields,
or umpires. Schaeke said the schedule must allow for
rain days, is set up before the season begins, and
can't be changed. This season the program only uses
five fields, instead of six. Schaeke said there is one
problem with getting enough qualified umpires. He
won't get any complaints there. Having just five
fields enables the program to utilize the better umpires
more efficiently, he said, and also allows the
graduate assistant in charge to supervise the area
better, because two of the old fields used to be on the
hill by the Arena.

And about the frats getting more show time? Schaeke
didn't go into detail, but the season was already
over two weeks ago. The frats better have a good plan
if they want to win more than one game from
the Canadians in a seven game series. But the odds are
they won't.

Way to go, AI

I'd like to take this opportunity, on behalf of all the
fraternity members, to thank AI League, a 12-5-1
intra.,mural softball tournament at Williams Field, to thank AI Lery for inviting us
and working hard to make it a real success.
Even though we lost, this was a chance
for us. And even though they broke a couple of
fingers

As long as I am talking about the tourney, let me mention the Wonder Boys. There were more
meat and potatoes on my mind all weekend, not even saying "Hello," but "How about some skittles?" Well for all the pestering
boys.

Never again

Off the post

With Lee Flanraag
The women's intramural program has a better
idea. And it seems to work. Jean Paratore, coor-
dinator of women's intramurals, has a program for
the women which uses more than one type of com-
petitive division. They have an "A" for the best
teams and a "B" for those that aren't as good or as
legitimately a chance for a university
building.

The idea would help the problem inevitably have to turn to the
same idea. Teams with tough reputations could
perhaps be invited to part be three of leagues of eight teams each, which would be able to
compete for the league champions, the 11 champions, and the league
for the league and division titles.

Another division could be set up for the frats and
no one would be left out. And set up yet another for
the new teams, or the teams that played three goals
for getting beaten 30-2 by a powerhouse. The whole idea
would be to provide that the smaller
experienced umpires could call the advanced division,
while the other division could be used as a sort of
teaching league.

The hope is that the new Recreation Building, with its
new fields, will help get around that problem. And maybe they'll pay the umpires a little
more, which would encourage a larger turnout.
And maybe they'll spend more time discussing the rules with the umpires telling them the rules before the season
and instead hold a clinic with game-like situations. And maybe they'll build a dome stadium
so we won't have to worry about rains.

NBA outlook

Remembering that I was the guy who made picks
for the NCAA college playoffs and never even men-
tioned Marquette, it's now time to butcher the NBA.

I like to take this opportunity, on behalf of all the
fraternity members, to thank AI League, a 12-5-1
intra.,mural softball tournament at Williams Field, to thank AI Lery for inviting us
and working hard to make it a real success.
Even though we lost, this was a chance
for us. And even though they broke a couple of
fingers

As long as I am talking about the tourney, let me mention the Wonder Boys. There were more
meat and potatoes on my mind all weekend, not even saying "Hello," but "How about some skittles?" Well for all the pestering
boys.

Never again
