CREATING LINKS:
Ambassador wants to develop foreign exchange program.

DAVE ARMSTRONG
DAILY EGYPTIAN REPORTER

Bolat Nurgaliyev, ambassador to the United States from Kazakhstan, said his country has been "hidden" from the United States by the former Soviet Union for more than 70 years, and his primary goal is to educate people about his newly emerging nation.

"It is a necessity to have these type of linkages, especially among institutions of higher learning," he said. "Not many people know about Kazakhstan, so this is important."

Nurgaliyev, who spoke before about 100 people at the University Museum Auditorium Thursday, talked about foreign investors who are interested in the Kazakhstani government and his country's problems of moving from a communist government to a democratic market economy since its establishment in 1991.

"We are the sixth largest producer of oil in the world," he said. "The United States ranks first in foreign investors in Kazakhstan with 66 percent of all investments. About 91 percent of that money comes from companies like Chevron, Shell and Philip Morris. We know that our future on an independent nation depends on investments like these."

Nurgaliyev also expressed his delight to be working with the United States closely to develop a peaceful emerging nation.

"Economic reforms, such as the transition to a market economy, are never popular, but we have yet to have armed conflicts in our land," he said. "This is a great achievement. We have worked in close collaboration with the United States to remove nuclear weaponry from our state. Kazakhstan is very willing to...

Bookstore may change hands

OPTIONS: Director says decision will be made within a few months.

JENNIFER CAMDEN
DEPUTY PUBLISHER

The Student Center's University Bookstore, a University-operated entity that is generating declining revenue, could be leased out to a private company, the center's director says.

Gregory Tahahn, Student Center director, said the bookstore is undergoing its routine evaluation, and all options for it are being considered.

"The two major options we're looking at is remaining self-operated (self-operational) and trying to maintain service internally, or seeing if contract companies can help us provide a higher level of service to students,"

ELECTIONS: Three SIUC students in the running for USG president.

TRAVIS HERALD
DAILY EGYPTIAN REPORTER

Student representation in city government and the unification of SIUC students is the focus of this year's Undergraduate Student Government presidential race, candidates say.

The USG president discusses student goals with SIUC administrators and city officials. In addition, the president can make executive appointments, determine

There is little or no involvement of USG with the majority of the student body.

JOSEPH CERVANTEZ
Sophomore from Chicago

biological sciences from Chicago and Revolution Party candidate, says reforming student government is the first step in creating a unified student body.

There is little or no involvement of USG with the majority of the student body.

Cervantez said he is willing to lead students who want to get involved in city issues.

If we work to integrate the student body with the city, we will have that much more power.

Alexandra Goodson
Goodson, a junior in foreign language and international trade from Chicago and the Students' Voice candidate, says improved communication between students, USG and the administration is the key to unifying students and gaining a voice in city government.

Grid repairs await final design

MOVING AHEAD: University will seek bids for repairing power grid next month after governor releases funds.

JASON K. FREUND
DAILY EAGLE/SMALLTOWNER

Design plans for the repair of SIUC's ailing power grid are scheduled to be finished by the close of April, and about the same time that Gov. Jim Edgar is expected to release the repair funds.

Allen Haake, the University's supervising architect, said repairs to power feeders 10, 11 and 12, which service University Park, Southern Hills, the Recreation Center and the Blue barracks, could begin July 12. Repairs to main-line feeders 1 and 2, which supply power to the steam plant, are scheduled to begin about two months later. The $3.5 million repairs should be finished by July 1998.

The repair plans, which are being designed by Champaign firm Hennesman-Raufheisen, will be put out for bids May 15, and the Capital Development Board will receive the bids June 10.

"We also review the bids from area contractors after the design is completed and oversee the construction," Haake said.

The Illinois Assembly General Electric fund, receiving the funds in February 1998, Gov. Jim Edgar has released the funds for the project to the Capital Development Board, which oversees all state projects.

"Sometimes he'll delay that, for reasons unknown to us," Haake said. "But he has indicated that, on this particular project, he will sign a release sometime in late April."

David Hanshub, a Hennesman-Raufheisen's electrical engineer on the project, said the firm is finishing the design.

"We're working as fast as we can to finish the plans so we can be ready to go when the funds are released," Hanshub said.

A power outage Feb. 4 left Trueblood, Wright and Grinnell halls without power for about six hours. An outage last September left Brush Towers, the Recreation Center, the Blue barracks, and Neely and Grinnell halls without power for about 12 hours.

A melted cable head and failed sections of feeder cable allowed too much moisture inside, and there was a flashover between two conductors resulting in the power outage.

Haake said the plans for repairs to the feeders vary because of how the feeders are constructed.

Feeders 10, 11 and 12 consist of three conductor cables each, and $1.84 million has been appropriated to repair them.

Main-line feeders 1 and 2 consist of 12 cables each, and $1.5 million has been appropriated to repair them.

Feeder 10, which serves Southern Hills, is an overhead line on electrical poles. "They are susceptible to ice and limbs falling onto the line," Haake said.

The repairs will put the line underground and run a parallel feed to allow a switch if there is an outage.

Haake said the extra line will keep the length of outages to a minimum, probably a few hours. Right now, an outage could last a few days.

Feeders 11 and 12 will require running underground feeder lines through existing conduits of how the feeders are constructed.

Center to feature academic achievements by women

Informational sessions sponsored by University Women's Professional Advancement titled "Celebrating Scholarship By and About Women," are to be featured today at the Student Center. A paper session is scheduled for 12:30 to 2 p.m. in Ballroom A, and a poster session is scheduled for noon to 3 p.m. in Ballroom A. A reception will follow from 3 p.m. to 5 p.m. in Ballroom B.

- From Daily Egyptian news services
Help! I've been robbed!

Just when I'd figured out how to tie laces, the companies had made them, rearranged the wheels and changed roller skates to "blades," effectively shutting my most cherished dream.

When I was a child, I was so profoundly uninformed that my mother feared for my life every time I uttered the words "skate skates," so the local rink was strictly off limits for me.

Secondly, however, I longed for a pair of white leather go-go boots adorned with bright珠形 wheels, sparkling shoe clips and fluffy pom-poms that would be the pride of my life.

While I am grateful that I was spared the misery of seeing my summertime covered with the degree of road rash my more mobile friends endured, I always looked forward to reaching adulthood, when I would be free to purchase my own set of wheels.

Deep down, I was certain that my inability to walk without tripping was just God's little way of telling me I was born to glide on wheels, not clomp around in leather sandals. I did not doubt for an instant that a new pair of roller skates with the degree of road rash my more mobile friends endured, I always looked forward to reaching adulthood, when I would be free to purchase my own set of wheels.

Deep down, I was certain that my inability to walk without tripping was just God's little way of telling me I was born to glide on wheels, not clomp around in leather sandals. I did not doubt for an instant that a new pair of roller skates would keep me from falling. Laces would keep me from falling.

I really need to get out more.

Some day, I vowed, when the bruises healed and my friends' laughter died down, I would have my own blades. Then I would practice and practice, and some day, when I was truly awesome, I would return to that rink and show the world that Emily Priody is not ungraceful.

I spent my childhood in a busy neighborhood where skates were dangerous. The boys were dangerous. The girls were dangerous. But skating doesn't need to be Mate-of-All for the same reason that running doesn't need to be Mate-of-All. It can be fun. Fun docs not need a team of physicists to work night and day cross-breeding skate keys with Nordic Tracks in search of ergonomically correct heel stops.

"... Skating doesn't need to be state-of-the-art. It needs to be fun. Fun does not need a team of physicists to work night and day cross-breeding skate keys with Nordic Tracks in search of ergonomically correct heel stops."

As with football, the key is competition. Most people think of the end zone as the be-all and end-all of the game. But I think of the shot clock. My dream is to be a woman who can hit a 3-pointer off the dribble and waltz the half-court shot into the basket. Of course, this is my fantasy, but it's a fantasy with an attitude. It's a fantasy with a degree of road rash that makes it impossible to ignore. It's a fantasy that I will not abandon. I will continue to dream, to scheme, to plan, to work. And I will continue to practice, to compete, to win."

But skating doesn't need to be Mate-of-All. It can be fun. Fun docs not need a team of physicists to work night and day cross-breeding skate keys with Nordic Tracks in search of ergonomically correct heel stops. It can be fun. Fun docs not need a team of physicists to work night and day cross-breeding skate keys with Nordic Tracks in search of ergonomically correct heel stops. It can be fun. Fun docs not need a team of physicists to work night and day cross-breeding skate keys with Nordic Tracks in search of ergonomically correct heel stops. It can be fun.

"If you haven't got anything nice to say about anybody, come sit next to me." — Alice Roosevelt Longworth

Our Word

**Contribution**

Glenn 'Abe' Martin left legacy of perseverance, achievement

SUI LOST ONE OF ITS HEROES LAST WEEK with the passing of Glenn "Abe" Martin, former Intercollegiate Athletics director and Intramural Sports chair.

Martin, 91, was known for his role in revitalizing baseball and basketball at SIUC in 1947 and his outstanding achievement on and off the field.

Martin, also a SIUC graduate in 1932, not only captained the only undefeated football team in the school's history and was a sport start himself, but led the fight to turn the University into a home for both intercollegiate and intramural athletic teams.

Without Martin, there may not have been intramural sports at SIUC.

**MARTIN CONTRIBUTED TO MAKING**

baseball, basketball and football some of SIUC's strongest sports. Under his direction as coach, Martin led the basketball and football teams into national championship appearances in 1946 and 1947.

He coached basketball from 1943 to 1946 — the year SIU won the National Association of Intercollegiate Athletics Championship — and was named Athletics Director in 1946.

He held that position until 1953.

With Martin's leadership, the baseball team had 275 wins, 118 losses and six conference titles, five of which were consecutive. He was coach until 1965, but was able to stay with the program until his retirement in 1971.

In 1972, the baseball field at SIUC was named after him and still bears his name today.

**MARTIN'S LEGACY EXTENDS TO OUTSIDE** SIU. In 1959, the U.S. State Department sent him to Israel and the Netherlands as a goodwill instructor in baseball, and in 1960, he coached the U.S. All-Star baseball team. The team played 11 games in Hawaii.

His enthusiasm and love for athletics were illustrated with something he said in 1963, during his 25th year as a coach: "I still get a thrill putting on the uniform for each game."

That enthusiasm was part of the reason Martin was named to the National Association of Intercollegiate Athletics Basketball Hall of Fame in 1958 and was named baseball coach of the year in 1964 for this NCAA district.

**MARTIN WAS KNOWN AS A FRIEND,** coach and mentor by SIU and the rest of the athletic community. His life lessons taught many about the value of individualism, hard work and perseverance.

But most of all, Martin left a legacy for his predecessors and for the many student-athletes who aspire to achieve as much greatness as he did.

"Our Word" represents a committee of the Daily Egyptian Editorial Board.

**Overheard**

"It was strange to me being in Oklahoma after the bombing. It was a different perspective because I was too close to it to realize the impact it had. Even more so when you go to work, you don't think there is a chance you may never come home. That uncertainty is scary. It's hard to think about."

Joe Foote, dean of the SIUC College of Mass Communication and Media Arts, who was in Oklahoma City shortly after the 1995 bombing of the Alfred P. Murrah Federal Building.
Dear Editor:
The Graduate and Professional Student Council of Southern Illinois University at Carbondale is very pleased to join the American College Health Association in its support of H.B. 1281, "Student Health Insurance Portability Protection Bill of 1997." If enacted, the bill would create portability provisions for college-sponsored health plans for college students.

Secondly, it would ensure portability of coverage provisions, thus avoiding unnecessary waiting periods related to pre-existing conditions. And finally, it would benefit college-sponsored health students under the protective umbrella of a group plan.

This bill would amend Title XXIV of the Public Health Insurance Portability Act of 1996, otherwise known as the Kennedy-Kassebaum bill. The very language of the bill, proposed by Rep. Jerry Costello, D-III., would "...to cover under college-sponsored health plans for students matriculating or enrolling for periods beginning on or after August 1, 1997." We believe that the enactment of this legislation would serve as a vehicle to assure quality health insurance coverage for college and university students.

We agree with the American College Health Association in its statement that such legislation is needed due to the fact that "4.2 million college students are covered by health insurance plans sponsored by the college or university they attend."

If enacted, this bill will affect millions of students. After they graduate, they will provide many of them with the health insurance coverage they need as they go to the world to work. And for the world to work. And for the world to work.

Accordingly, we support the passage of this legislation by the Congress and its approval by the President. We urge our colleagues in the Senate and the House of Representatives to vote for this bill. We look forward to working with you in the future.

Brian Clancy
GPSC Political Affairs Coordinator

PS: How can I get away with using "we" and having a non-collegial source speak for all students? After all, non-collegial students employed in the university are not included in the bill's provisions. It is a dangerous precedent for non-collegial students to begin to assume a speech that belongs to the college and its students. There are several things I wish you to voice your support for the measure. As a Christian myself, I understand students' wanting to be able to have a prayer at graduation.

Graduation is a lengthy ceremony, where most of the time students are required to sit and be bored. Why not use that time for prayer if they want to? Is there a special moment when there are hours' worth of free time where students aren't busy with their own lives? What I believe is that we all attend a university where students don't need to go to class when they pray. Or if they choose, reflect. I pray that Chancellor Don Beegh and the administration listen to their hearts and not mobilize mentally when they make their decision on whether or not this supposed "moment of silence" will be permitted at graduation.

Patrick Garner
Sophomore, English
Goodson says her experience as USG vice president this semester has given her a first-hand understanding of what the president does. "I see and know everything the USG president accomplishes, and how those goals are accomplished," she said.

David Vingren, a junior in political science and finance from Bolingbrook and Action Party candidate, says the follow-up of this year's progress is essential. "Troy (Alim) and I got the administration to keep Big Muddy Room open and a.m. so students can study." Vingren, who serves as USG vice president this year, "If elected, I will make sure it remains open that long, and maybe see if it can remain open 24 hours a day," he said.

Vingren, who is running with Megan Vingren, said his City Council experience is more extensive than his opponents' experience. Vingren got 473 votes in his losing bid in February's City Council primary. "I feel that my work in the City Council elections and my work after the primary gives me an edge when it comes to dealing with city politics," he said.

Vingren said before City Council elections, he and Moore led a voter registration drive that registered more than 1,000 student voters. The student voter turnout April 1 helped elect Banducci and Briggs.

Vingren says a unified student body will enhance the reputation of SIUC and improve students' relationship with the city. "I am looking into a Carbondale/SIU Strip-business owner-sponsored block party," he said. "We can avoid any kind of violent conflict and make sure students who might riot are aware of the consequence."
"We just don't know when they (the feeders) are going to go.

The funding for feeders 10, 11 and 12 was approved by the Illinois Board of Higher Education for fiscal 1997, which began July 1, 1996. Because the University has been trying to get funding for the repairs for several years, mainline feeders 1 and 2 now are designed to help each other. If there is a problem in one feeder, the power could be rerouted to the other feeder until it is repaired.

Main-line feeders 1 and 2 run from the Central Illinois Public Service (CIPS) substation near the south pedestrian overpass to the steam plant, where they branch off and provide power to nine other feeders and power campus buildings. Repairs to the main-line feeders could happen one of two ways, Haake said.

"We have some spare ducts, but we don't know if we can get through them," he said.

"If we can get through them, we'll pull cable through the spare because they go under the tracks and Route 51."

Though Haake would prefer to use the underground ductwork, if it cannot be used, the south pedestrian overpass has ductwork that could be used for the new lines.

James Tweedy, vice chancellor for Administration, said the University is working with CIPS to plan installing temporary overhead power lines if there is a serious underground failure before the repairs are completed.

"That installation" would take seven to 10 days, he said.

"We need to do everything we can because of such a critical nature. That is why we began working before the funds were appropriated.

JAMES TWEEDY

Baseball continued from page 16

in six innings. Shocked reliever Greg
Drumright streaked out three while giv­
ing up one hit in three innings.

"That's a typical Wichita State team," Callahan said. "I thought Robertson did a good job, and Drumright just picked up where Robertson left off."

SIUU also got the fair share of good pitching. Sunday. Schwerman battled back from a slow start while tossing six innings for the Salukis. After allowing three hits and a run in the first, Schwerman set down the next 10 Shockers batters.

But Schwerman ran into trouble in the sixth inning as Wichita State scored three singles, a walk and two doubles to push across the two runs.

Peacora relieved Schwerman in the seventh inning and closed out for two innings, striking out three while allowing one hit. But the Shockers' touched Peacora for two runs in the ninth on two singles and an error by shortstop Jerry Hairston.

"I thought we did a good job on the mound today," Callahan said. "You would like to think in college baseball if you can limit a team to five runs, then you've got a chance to win."

The Salukis' pitching and defense kept the teams in all four games. Aside from giving three, the Salukis' pitch­
ing staff allowed just 14 runs in the series, while the defense committed just three errors in the four games.

Saluki first baseman Jon Jones said the Salukis' pitching and defense showed drastic improvements.

"You've got to commend our pitching performance because everybody out there did a good job, and our defense was good, too," Jones said. "Usually our pitching and defense is what hurts us, but maybe this weekend was a swing in the opposite direction."

However, it was the Shockers' pitching that impressed Callahan. The Shockers held Jones to 6-for-14 in the series, while Benson went 2-for-13.

"They did a great job," Callahan said. "I thought they did a better job on Jones than they did on Benson. Benson hit several balls hard right at them, but with the exception of maybe two at-bats, he (Benson) didn't do anything all weekend." Jones said the Salukis, who left 29 runners on base during the series, were unable to produce when the team needed it the most.

"That was the toughest series of pitching we've seen. But it doesn't matter how tough it is, we've got to get the job done, and we really didn't do it."
SELECT SUNSHINE: Half of the first 18 picks came out of Florida universities.

BAMALFIRE SUN

Let's make a deal was the theme of the NFL's annual collegiate draft Saturday. The league's wheeling-dealing dealt with the first three rounds. The first 13 picks wound up changing hands and four teams had the pick sixth in the draft. The Seattle Seahawks selected offensive lineman Walter Jones with the choice.

The Cowboys, who had earlier traded up to select cornerback Shawn Springs, two of the first six picks. But the best wheel-dealer in the draft may have been the Tampa Bay Buccaneers, who gave the New York Jets a fourth-round choice to move from the sixth to the eighth spot so the Jets could get the pick Jones with the choice.

The University of Michigan, where he received two years probation for setting off a homemade bomb in 1992, was charged with retail fraud a year later.

"I think he is patient; he will be successful." He has the range, he has the leg.

"It's a great day," Jones said. "It's a great day."

"I am ticked to death for him," he said. "I think the world of him." Jones is a very humble guy, with his words coming from the heart.

"He has a great work ethic," he said. "Mark Gagliano is a fine American at SIUC since 1983 when he was named Athlete of the Year and set GU records."

The greatness of Gagliano continued from page 16

The Cowboys traded up for LaFlour, opting to take him as the No. 22 pick in the first round, while the Chiefs snatched Gonzalez at No. 13. Like Jones, both Gonzalez and LaFlour had worked out with the Cowboys.

"I told people I didn't want to put my eggs in one basket," Jones said, "I had more than one route. I can't worry about that."

Jacksonville passed Jones up in the first round and selected defensive lineman Ronnie Wynn, the Jaguars look West Virginia defensive back Mike Logan in round No. 2, North Carolina Line-Backer in round No. 3 and defensive lineman Seth Payne out of Cornell in round No. 5. Jones seized his chance to move from the sixth to the eighth position.

"I just want to go to mini-camp and play and earn myself a spot," he said. "We'll see what happens."

"I just hope we can come together as a team and have a good year," he said.

"I just want to go to camp and play and earn myself a spot." He has the range, he has the leg.

Jaguars draft SIUC’s Jones

FIFTH ROUND: SIUC tight end picked by Jacksonville much later than expected.

Michael DeFord

Damon Jones figured he was the best tight end available in this weekend’s NFL draft. Apparently the NFL teams thought differently.

After watching eight other tight ends picked before him, Jones was forced to sweat through four rounds of the draft before the Jacksonville Jaguars finally selected him as the 77th pick in the fifth round Sunday, making him the 147th pick overall.

“I’m definitely disappointed,” Jones said. “I think I was the best tight end available. I’m happy about the team that drafted me.”

Bears seeking Gagliano

Waiting on Cowboys: Chicago offers position to Saluki punter, but he holds out for Dallas.

Donna Caster

Daily Egyptian Staff Writer

Former SIUC punter and All-American Mark Gagliano is waiting on the call that will decide his NFL future. Gagliano, who was named the Daily Egyptian Athlete of the Year Sunday and the Senior Letter Award Winner banquet, has received an offer from the Chicago Bears.

“I’m still waiting for a call,” Gagliano said. “I really don’t know where I stand.”

Senior Mark Gagliano, a punter, was selected in the 14th round by the Chicago Bears, thereby ending his SIUC career. The punter is the third SIUC athlete in the last four years to be drafted by the Bears, joining defensive back Robert Houston and offensive lineman Ryan O’Dell.

Gagliano, who was named the Daily Egyptian Athlete of the Year Sunday and the Senior Letter Award Winner banquet, is waiting for a call from the Chicago Bears.

“I’m still waiting for a call,” Gagliano said. “I really don’t know where I stand.”

The 6-foot-5-inch, 278-pound Gagliano said he can’t wait to hear from the Bears.

“I need to start working out, just waiting for a call from the Bears,” Gagliano said. “I want to go out and play.”

Salukis in three of four

Wichita shocks Salukis in three of four-game series.

With the three wins, the Shockers improved to 34-9 overall and 13-3 in the Missouri Valley Conference. The Salukis dropped to 13-24 overall and 6-10 in conference play.

“They had guys come up with men on base in run-scoring opportunities and delivered in the clutch,” Callahan said. “It was our inability to get the two-out hit to stay closer than we did or even take the lead a couple of times late.”

The Salukis bats could not get anything going against Shockers starter Steve Robertson.

The 6-foot-5-inch, 278-pound Gagliano had an offer from the Jacksonville Jaguars, but he held out for a chance to play for Dallas.

“I’m still waiting for a call,” Gagliano said. “I really don’t know where I stand.”

The 6-foot-5-inch, 278-pound Gagliano is waiting for a call from the Bears.

“I need to start working out, just waiting for a call from the Bears,” Gagliano said. “I want to go out and play.”

Iowa State coach Craig Bohl said he was pleased with his team’s efforts.

“I thought our guys played hard today,” Bohl said. “We had a couple of errors, but overall I thought we played well.”
