Saluki sports network withdraws bid

Its Michael Monson
Monson is... Thursday.

The Saluki sports network had withdrawn its bid to broadcast Saluki sports games.

Follow... It's a major reason for SSAN's surprise withdrawal appears to be a fear that radio station WNTI in Murphysboro, the only other bidder, would take the appeal to court if it lost. Robert Jenkins, the University's chief business officer, was to have decided the appeal Tuesday. Murphysboro station owner Raymond Burroughs, a partner in SSAN, is reported to have said in his letter to Mace that he feared WNTI would continue to make the appeal. Their action could have very serious implications for the University. When Mace was asked about the exclusive broadcasting rights, she submitted a bid of $30,000 for two sports networks with rights to one and $2,000 in advertising credits. Controversy arose the next day when WNTI general manager Dale Adkins appealed the University's decision. A hearing on the appeal was held before committee chair Jackll Mace and Adkins concerning whether SSAN had violated the sealed-bid process specified in the University's exclusive broadcasting rights for the networks. President Mace was given a public hearing on Thursday, but the appeal was not heard.

In just 24 days, life will change drastically for Albert Somit. On Aug. 15, he moves nearly 900 miles from statehouse to Saluki campus... university administrator took time from a busy schedule of meetings and social functions to talk with Daily Egyptian reporter Jacqui Kuczynski. Here's what happened when he took place at the University House Thursday, touched on Somit's plans as the 15th president of SIU-C. Much of the discussion centered on questions about the school—its image, its administration, its faculty and student body, and even its method of searching for a president.

Somit revealed some aspects of his personal life as well. He's a tennis player who enjoys fishing, and who is the proud owner of the "ball of a cat" that was imported from Holland.

He described the change from political science professor to administrator as the result of two "misfortunes": being asked to do something, and then doing it "reasonably well." And he revealed some of the views on higher education governance that he's been developing since a young age.

What have you discussed so far with the president's staff? What have you revealed about types of things you have to put into place right away?

Somit: Everything from rehabilitation of the physical plant, out to police, registration and all. And that's only half the VP's so far.

Is there something you see already that you have to start working on?

Many things. The physical plant is stretched apparently to bursting. There aren't as many dormitories as there are students who would like dormitory accommodations. I'm just giving you a kind of shopping list. We're way behind in rehabilitation and repair of buildings. How do you treat minorities more effectively? Salaries. It just runs across the total gamut of university business.

President-elect Albert Somit says that really is not the case. We're providing more than ever. Well, how do you adjust to those two different conceptions? Maybe the University is providing more, but the region isn't aware of it. That's an image problem in part. What image do the very students have of us? When we go out to recruit students, what are their perceptions? The perception may be one thing in Southern Illinois and another in a different one elsewhere. The academic quality of the University is excellent, but perhaps not always fully appreciated by its students. The image problem turns out to be several and many kinds of image problems, and the question is how do you identify these, and how do you come up with solutions, and then implement them. It's just now in the early phases.

Some of the other candidates complimented that they thought the search process was too open. Were you comfortable with it, and how did it compare to others you've been involved in?

I think most people in administrative positions are not going to be comfortable with any search process where the process, by its very nature, makes it immediately known at their universities. They are considered, or are being considered, for something else—with very strong statistics they are not going to get it. But this is the very nature of search processes. There's a good deal of publicity. So to say one is completely comfortable with an open search process, I think would be inaccurate. It has a certain amount of discomfort and it's a source of some embarrassment to the unsuccessful candidates.

Now turn your question around and say: How does this search process compare with other search processes? Is it more or less open? Well, friends of mine have been involved in search processes where they have a little different kind of sunshine law. They publish the names of all candidates. The files are open and the hearings are open. The potential for discomfort there is far greater. But compared to something else, it's probably not as open and not as embarrassing.

Is it embarrassing or uncomfortable? Sure. Any time you are a candidate and it becomes known back home, it could be embarrassing.

IAC hears ideas to help out athletics

By Dave Powers
Staff Writer

Getting more people interested in Saluki sports could be the answer to the athletics dilemma of slumping attendance and tight money — so said speakers at a public meeting sponsored by the Intercollegiate Athletics Committee.

A small but vocal group turned out Tuesday afternoon in the Illinois Room of the Student Center to offer suggestions to increase attendance at athletic events, increase funding and improve the program's image.

These suggestions ranged from offering special package deals to events to having delayed broadcasts of games via WSIU-TV Channel 8.

The IAC, which is an advisory board, will submit its suggestions along with its recommendations to George F. Stewart, vice president for University Relations, for review and possible action.

"Our role is listening to suggestions and passing them on to the proper authorities," said IAC Chairperson Shirley Friend, associate professor of comprehensive planning and design.

Of the dozen or so persons who turned out for the meeting, only one outlined specifics that the athletics department could take to spur greater interest in Saluki sports.

Calvin Barnes, a team manager, provided the four IAC members on hand for the meeting with a two-page report, outlining four specific steps which might help increase attendance. Barnes said that in increasing attendance, interest in athletics would increase and boost funding while improving the program's image.

"The plan is to implement programs to turn empty seats into usable revenue by putting people in those seats," Barnes said. "Hopefully these new programs will turn final ticket sales to events — steps that would also significantly boost support for the athletics program," he said.

He also suggested sponsoring family nights where the entire family could get in for one price and halftime events that would attract spectators as other ways to increase attendance and improve the program's image.

O T Harper, a Murphysboro resident and SIU alumnus, suggested raising the visibility of Saluki sports throughout Southern Illinois by delayed broadcasts. However, William Crowell, WSUI sports director, said both radio and television broadcast rights for sports broadcasts were included in the broadcast contract now under negotiation.

Other suggestions included more publicity for minor sports, as well as more advertised publicity for important events.

— door prizes for holders of athletics event tickets, with prizes donated by local merchants;

— using student organizations such as marketing and statistic clubs, to test the feasibility of money-making projects; and

— seeking volunteers to help man administrative positions, should cutbacks occur due to lack of money.

Criswell, WSUI sports director, said both radio and television broadcast rights for sports broadcasts are included in the broadcast contract now under negotiation. Other suggestions included increased publicity for minor sports, as well as more advertised publicity for important events.

— door prizes for holders of athletics events tickets, with prizes donated by local merchants;

City digging deep to pay storm cost

By Mary Harmon
Staff Writer

Although a $25,000 budget adjustment for storm debris cleanup received official City Council approval, the future appears uncertain for the payment of further storm damage reimbursement.

The Carbondale City Council unanimously voted Monday night to approve reimbursement from their council contingency funds but were warned that the sum will cover costs only until July.31.

City Manager Carroll Fry told the council that "we should be getting down to the wire by the 30th." Fry said that he expects to have further funding sources lined up by the August 4 council meeting.

Fry said that he had checked with Public Works Director Bill Boyd and was told that the $25,000 would not be enough to cover the operational and in-house labor and equipment costs of the debris cleanup.

The R.B Stephens Co. of Carbondale has been contracted to the city for the lease of equipment and labor to help in the cleanup program.

Fry said that he hopes to "pull some money from somewhere, probably city projects that aren't moving" to fund the rest of the cleanup.

He mentioned the Railroad Relocation Project as a possible funding source or the raising of the city's budget ceiling, if necessary, to complete the funding.

Further adjustments from the council's general fund are impossible, Fry said. The balance of the council's fund after Monday night's adjustment is $9,719.

Fry remained hopeful, however, that funds will be found to complete the cleanup project. "It has to be done," he said. "And I think the city of Carbondale is in better shape than that of some of the surrounding cities. We can make it out of our budget.

The city's storm damage cleanup task was also reflected in another area of council concern.

Though the council voted to approve June's gasoline use report for the city, Fry pointed out that the city's situation due to storm debris and emergency conditions following the storm caused the total number of gallons used by the city to exceed the budgeted amount.

Luther Halliday, administrative assistant for public works, who compiled the report, said that the increased usage would continue.

Fry said, though, that his staff plans to work the report and to institute controls on the amount of fuel usage.

In other business, the City Council voted to approve energy audits for city buildings and to provide a 50 percent match to the $12,404 Department of Energy grant awarded to the city to perform the audits.

The council also approved giving the contract to carry out the work to the Carbondale architectural firm SRG Inc.
Decision due next week on validity of petitions calling for smaller House

By Diana Penner
Staff Writer

Next week, the Illinois State Board of Elections is scheduled to issue its decision on the validity of the petitions gathered by the Coalition for Political Honesty calling for a reduction in the size of the Illinois House of Representatives.

A number of state representatives requested that 127,000 signatures be checked by line after the validity of some of the petitions was questioned. Pat Quinn, coalition spokesman, said that the initial check amounts to delay tactics by representatives opposed to Springfield of registered the vote

Quinn said he is confident the signatures be placed

of petitions calling for smaller House

of the petitions. Dunn said the cutback would provide less effective representation. Currently, three representatives are elected from each of the 59 districts. State law requires that no more than two of the elected representatives be from the same political party.

If the question is placed on the ballot and at least 60 percent of the voters favor the measure, the 59 existing districts would each be divided in two districts. Rep. Bill Harris, D-Marion, said the cutback would curtail the chances of women and blacks being elected to the House.

But Quinn said voters will support the measure because they know the state government has worked well for the average citizen. He said the opposition from the legislators is "political retaliation." Rep. Vincent Birchler, D-Chester, said he is willing to let the voters decide the issue.

"If the signatures are valid, let it be put on the ballot. And if it passes, you won't find Southern Illinois sending one Republican to Congress," Birchler said.

Rep. Jones Rea D-Christopher, said the cutback would limit a diverse makeup of the House.

"The House should not only be composed of attorneys, but also farmers, educators, and business people," Rea said. Harris said the cutback would also affect SIU's requests for legislative actions.

"Right now, we (Southern Illinois representatives) work together as a team for the University, representatives from both sides of the aisle, Democrats and Republicans," Harris said. If the measure is approved, he said, "I don't see how we could get the kind of money we're getting now."

Repe. Bruce Richmond, D-Murphysboro, and Robert Werner, R-Roseville, could not be contacted for comments. However, both are listed as opposing the proposed cutback: "I think the courts would find the measure unconstitutional," Dunn said. He said the opposition from both sides of the aisle. "I don't see how we could get the kind of money we're getting now."

“Ralph Dunn said he supported a reduction in the size of the House when he was first elected to the legislature eight years ago. The issue was considered at the Illinois Constitutional Convention in 1970 but was deferred. Dunn said he introduced an amendment in 1973, proposing the same thing the coalition is pushing for now, but didn’t get it off the committee. However, Dunn said after he worked in the legislature for a while, he changed his mind about the cutback proposal.

"I think the size of the House is disproportionate,” Dunn said. "We need the kind of representation we have now.”

However, both are listed as opposing the proposed cutback. "I think the courts would find the measure unconstitutional," Dunn said. He said the opposition from both sides of the aisle. "I don’t see how we could get the kind of money we’re getting now."
Reagan's skill showed at convention

George F. Will

DETROIT: Hope a pessimist said is merely disappointment deferred. But pessimists were soon to be joined by Republicans with whom it had been a chore to disagree. The task was made more difficult by the fact that the great majority of Republicans were still hoping that the party's nomination would come to them. Even those who were not hoping for it were still hoping that it would come to them. And that was the source of the party's problems.

Ford was negotiating, and overreaching. Like Lyndon Johnson, another longtime legislator with the immediacy of power in the executive branch, Ford's approach was passy. The prospect of getting out of a jam on the ground of power evidently rekindled his passion but unhinged his judgment, inclining him toward options that would have a political and worse governance.

It was more than a century ago that Ford had told ABC news that he was interested in being a "meaningful" vice president, but "it would have to be a different structure" than any previous vice presidency. Reagan's credentials as a true conservative were not immediately clear. But they were drawn between a paradoxically moderate approach to marginal entitlements, a declaratory social security program, and a strong position on free and open markets.

Reagan himself was equally ambiguous. His record in California, his speeches, his television appearances, and his newspaper columns, while a great deal of them, were in the context of his own political career.

Reagan's approach to the 1980 campaign was a mix of moderation and a declaration of principles. The campaign itself was an exercise in the art of the possible. The candidates' understandings of the nature of the nation's problems were marked by rhetorical excesses. Reagan's tone was often more radical than that of his opponents.

But Reagan's skill showed at convention. The campaign was a testament to the candidate's ability to communicate with the public. Reagan's skill was in understanding the public's mood and translating that mood into a political strategy. Reagan's ability to speak to the public was a mark of his skill as a politician.

Reagan's skill showed at convention.
SOMETHING ABOUT SIU-C

from Page 4

Was there any trouble for you back home?

I think so. After all, I'm here now. But for those who were considered as finalists and who did not get it, it's a very tough life. No question about it.

The recommendation has been described as somewhat to top-heavy on many chief and re-

indians. What's your opinion?

Well, at this point SIU-C has just recommended a substantial number of vice presidents. If you go from presently to another this is pretty much a traditional model. The number of vice presidents doesn't significantly greater or less than other institutions, if too many chiefs and not enough Indians refers to the number of vice presidents. I don't think for an institution of our size

Now when I look at the number of administrators, the number of mid-level assistants—and Indian... I don't know. Yet certainly this is a change that will take time and one that we will be looking at.

Don't you come from a more complex system yourself?

Yes, we have them in one more vice president than you have here.

We also do not have a position comparable to yours at SIU.

We do have someone who's comparable to me. In fact, we do have someone who's comparable to me. But when you read it, you find that the position is not exactly similar.

At this point, I don't think I could answer that question. I would want to talk to the faculty and find out what they think you would do better under collective bargaining. It would be a much better direction.

You've been in a system which was not under collective bargaining.

Yes. But when I was in the university, I always had the faculty's support. We have—have—had to work hard to get the faculty's support.

I've been in a system which was not under collective bargaining. Now, believe it or not, but when it was under collective bargaining, we could do it better.

What's the difference? What's the difference between the two systems?

One thing is that in a system where collective bargaining exists, you have a mechanism that you can use to get the faculty's support.

You're really looking for a balance of qualities. Certainly there's no doubt that you have all of an academic who comes out of an environment where you understand academic values, high academic standards. An institution with a certain amount of skin, because you know there are few decisions that are going to be universally applied. You can get an individual who has some familiarity with the situation, but with the knowledge of what can or cannot be possible. And an individual who has a sense of what people are likely to react to administrative decisions and a sense of what people are likely to react to in making decisions. I think sometimes there are situations where there's a conflict.

I'll have trouble getting to administration.

I'm trying to remember. I can't get back quite awhile. I think at that time, the chairperson or the dean asked me to do something and I was unhappy enough to do two things. One. I agreed to do it, and I suspect I did it reasonably well. In any case, you can't start down that path. It's a slippery slope.

And you're hooked.

That's right. You get hooked. I think it was in June that you talked about this. I think you said that if I had to make a choice between the two, yes, I would have to take the administration. It's not all of one or the other, it's not a yes or no. You can't get some mix of the two.

Presumably, the basic administration would be somewhat rational. The original report on our athletics program being, well, you know, the old notion: a healthy mind in a healthy body. And until roughly the turn of the century, it was a very healthy thing. Some football began to emerge, that was our first interest in athletics program—phys ed.

Part of building up the body and personally strengthening the mind. At a university, it seems to be that it really remains your basic concern—to provide a wide variety of useful athletics program for your students. That means maybe recreational athletics. Maybe we should put a little more attention in intramurals. Maybe we mean that we should put a little more interest in intramurals. And I expect to be talking literally to dozens and dozens of students. However, if we come in and want to talk, then there may have already indicated that one feel for faculty to arm themselves.

Any faculty member can make an appointment with you.

Why sure.

How about students?

Yes, Faculty and students absolutely. You have someone in mind for vice president for academic affairs and research?

Would you say that you call it a loaded question? I was trying to look for a way through a search for an academic vice president. It's a very complex process. And I would assume perhaps, maybe, to set a search process in motion. This means putting together a committee, selecting the committee, and then the search in the expected way.

I think the faculty and the administration should have a real interest and I'm there to help the students.

Well, what's your opinion?

I think it's the appropriate amount of students. We have to be compatibility.

What's your opinion?

What's your opinion about the University's trustor policy?

Do you think an educator who makes an outstanding teaching contribution should be retained even if the research and publication standards are not so high?

I would hope that would not be the case. I would hope you would have situations in which extraordinary teaching ability, extraordinary performance in others. And you'd have no problem. An individual who is an extraordinary teacher and who also has research would not worry about the research part if you have the record you want—or service. I won't rule out service either.

What are you looking for?

It seems to me at least satisfactory performance in two or areas and outstanding performance in others. It is, I think, we hope we don't get into situations where you have one faculty member who is a teaching standing teacher, but absolutely outstanding performance in others that is going to happen. I think there is going to be a less satisfactory performance in others than you would normally expect teaching the nomads of the extra- terrestrial by extraordinary ability in teaching or exten-

So you would look at the other individual involved?

And the balance, the balance, the balance.
Somit’s oboe teacher became his wife

By Carrie Sweeney
Entertainment Editor

When Nora Post received her first teaching position in the Music Department at New York State University at Buffalo, in 1975, she found an unusual student had enrolled in her classes.

He was Albert Somit, the university’s executive vice president, who wanted to improve his skills at playing the oboe, an instrument he had learned to play as a child.

It became a case of student falling in love with teacher, and vice versa.

Today Nora Post, 30, who prefers to be called Nona, is the wife of Somit, 60, who was recently appointed SIU-C president. They were married in 1979 after a courtship in which differences in age, location, and professional careers did not interfere.

“By then we were married,” Somit Post said during an interview by telephone from her home in Brooklyn. “I wasn’t living in Buffalo anymore. I had left the university to pursue my professional career in New York.

“The geographic distance created a problem only in that it required each of us to do a lot of traveling, but it worked. Although I maintained a residence in Brooklyn, I was commuted to Buffalo whenever possible. It was only an hour’s flight away.

“Somit’s position becomes effective on Aug. 15, the distance between the couple barely exceeds the plane,” Somit Post said.

“Choosing to try and schedule as many concerts as possible near the same time so that between appearances I can be in Carbondale.

“SIU’s first lady to be added that she will undoubtedly find life in Carbondale quite different from that in New York or Long Island, where she began playing the oboe at the age of 10. Today, she has advanced a childhood ambition to the heights of professionalism.

“Although Somit Post has received music degrees from the University of California and New York State University and has taught music, her career will be only one more for an artist who prefers the companionship of the audience to the security of a full-time position with an orchestra. She said she is motivated by the challenge of what lies ahead in her career.

“Many people, not only a freelance, then my career will suffer. But I happen to like that life, and I always liked the challenge in what I do,” said he. That’s why I went for the position. I always liked playing the harpsichord.

“The awards for being a concert musician are not financial. Unless you just teach and play the oboe, money really isn’t a factor.

“She added that because the music industry is very competitive, dedication to the art is the key to success. There is certain stick-to-it-ness that prevails in the area.”

“Among her rehearsals and performances, the Somits often send their free time playing the instrument that brought her to Buffalo. Whenever possible, we’ll have to meet in the area who are associated with music. I’m sure there will be enough signals available at St. Louis and the University of Illinois nearby, she added; that she and her personal music tastes are in common.

“The Somits, who are married and have two sons, have both met their children. However, Mr. Somit has two sons, Jed and Scott, from a previous marriage that ended in divorce.

“Being the wife of SIU-C’s president-elect, Nona and Post has said, prompted a lot of thinking about her role at the University. Because her husband had been with the university for many years when they were married, she did not feel it was a must. But when Somit takes office at SIU-C, she added, we’ll have the great deal of entertaining just to get acquainted with people.”

“I’ve been thinking that I’d like to maybe get an ensemble together with some of the University’s music professors. My biggest interests lie in the arts, and I hear that SIU’s Theater and Music Departments are both very good. I think Nona Post, who is recovering from back surgery performed earlier this spring, said she is not sure when the move to Carbondale will be permanent.

“The trip to SIU in August will be my first since the operation, and all of my plans depend upon my health. I do, however, plan to recover and be a good public relations person with my husband in Carbondale.

“I really don’t think of the future as anything too different from the present; I have any long range goals I have in mind. I’m just doing. I didn’t like more as a

New president discusses his feelings about SIU-C

(Continued from Page 5)

Southern Illinois to face:

General feedback from all of its programs, its students, body and what they are seeing in the weather—laughter.

What are you going to miss about upstate New York?

“Not sure,” Post answered, “Lovely, cool summers but not long, cold winters. And of course, the magnificent fall foliage. We’ll miss. I’d been there for 15 years.

Why did you choose to continue your career in Illinois?

“Because that’s where I grew up and I’m familiar with it. I find it rather nice. I like small towns, if Carbondale can be called one. I believe I think that’s about as good an answer as any I could give. I remember summers in Iowa, and I think they’re any better or much worse than summers here. Where do you come from?”

“Chicago?”

“Chicago, we used to go down to the Midway when it really got hot at night. And we’d sleep right in the Midway and you ever get out there”

“Sure. I’m from Chicago.”

“You always come to the University of Chicago. I’m delighted by the change in Chicago. I’m kind of feeling in the last 10-15 years. When I look at where I’ve been, I can look at if was in a bad way I find it’s come back amazingly.

“Have you ever worked for a presidential candidate? Have I ever worked for a presidential campaign? I think that’s because I don’t remember being involved in. No, I don’t have any pets. I’ll be a dog girl. My sons have two dogs and a puppy. We’re trying to figure some way to get it here. And as I say, I picked up a half a cat. The cat emigrated with us and is now an American citizen. By half of a cat, I assume you mean a half a cat or a half a feline personality? Mrs. Somit and not that the cat is a missing tail or any appendages.

“Why do you say that?”

“Because there is no one who has any favorite novels. Favorite novels. You know how I’ve never thought of that question. If I had to pick one, I’m not really sure what the answer would be.

AMA's new code of ethics permits doctors to advertise

CHICAGO (AP) — The American Medical Association approved a new code of ethics Tuesday that removes the most restrictive language doctors' advertising or work for chiropractors.

But the new code, the first in 25 years, came partly in response to legal pressures on the 214,000-member doctors' organization.

Chiropractors in four states have filed lawsuits charging the AMA with treating them as quacks. The AMA feared it might try to deny physicians unfounded right to advertise.

But AMA officials said the new code goes far by making sweeping changes that reflect a growing public skepticism about society and discourage some of the paternalism of the old code.

Chiropractors are not to accommodate legal pressures but are to work at goals that are applicable to all physicians, Dr. James S. Tod, a Ridgefield, N.J., surgeon who headed the committee that wrote the new code.

Doctors attending the annual meeting of the AMA's House of Delegates, its policy-making body, applauded when the new code sailed through the 275-member House with 11 votes more than the two-thirds majority needed.

The passage came as a surprise to some observers because the ethics code was vigorously opposed in committee hearings Monday.

Dr. Lowell H. Steen of Hammond, Ind., chairman of the AMA's Board of Trustees, said he was "delighted" with the vote and believed the new code would help in both the chiropractic and FTC lawsuits.

The vote to "light as well as the next one," Steen told a news conference, "guaranteed that the AMA lost the chiropractic lawsuits now pending in Illinois, Iowa, New York and New Jersey, the combined damages could bankrupt the association.

On the chiropractic issue, the new code deletes a provision that a physician should not associate with anyone who uses an "unscientific method of healing.

Chiropractors have argued that the provision stopped doctors from working with them, although the AMA several years ago dropped its position that chiropractic was an "unscientific method.

The new code says: simply: "a doctor can work with whom- ever he chooses.

As a new issue of advertising, the new code drops a stipulation that doctors should not solicit the passage of legislation or advertising from any person not engaged in the healing arts.

Dr. Frank Rogers of Whitter, Calif., an opponent of the new code, said: "I was very disappointed. It's now become apparent that a government agency can dictate to a profession what it should do."

Dr. William Weil of Los Angeles, another opponent, said the move should have been delayed until pending court decisions were in.

Weil said he also worried about a provision of the new code that calls on doctors to strive to expose those physicians deficient in character or competence. He said it might lead to "foul laws" that require doctors "to expose their fellows.

The old code called for exposure only of "illega1 or unethical conduct."

In other words, the AMA's House of Delegates approved a resolution saying doctors "should not be a participant in executions by drug injection, a form of capital punishment now legal" in New Mexico. The New York Times.

Wears said the West Coast also will avoid any sharp increases in unemployment.

Economist says current recession will hit Midwest, Southeast hardest

WASHINGTON (AP) — The current recession will hit the Midwest and Southeast hardest while leaving the Sun Belt, the West Coast and, surprisingly, New England relatively unscathed, a leading economist said Tuesday.

Michael K. Evans of Evans Economics, Inc., told the Senate Budget Committee that although the nation as a whole is suffering, "the Sun Belt is relatively unscathed, a leading economist said Tuesday.

Campus safety bus to adopt new route for fall semester

By Scott Canon

Staff Writer

The Campus Safety Fee Board has decided to change the route of the Campus Safety Bus from a half-hour cycle to an hour cycle.

The bus, which operates a campus safety program from funds generated by the newly implemented campus safety fee, approved the new route beginning in the fall.

The bus, which Busch said is intended to provide safety for people on campus at night, will begin its route at the Student Center on the hour. The bus will leave the Student Center around the half hour and return to the Center every hour till midnight.

Busch said the board has appropriated money for the purchase and running of signs at each bus stop. He said the signs at each sign will cost about $100.

The bus will stop at each of the signs with the sign's respective order: The Student Center, Thompson Point, the northeast entrance to the Communications Building, the L. A. Library, Evergreen Terrace, Town and Country Market, Park and Park's Restaurant, the south and north lofts on Southern Hills, the West Street quadrangles, Wilson Hall, Park Place North, Lewis Park Place South, Busch Hall, and the Recreation Building, and back to the Student Center.

Foreign friendships increase although still suspect in China

CHENGDU, China (AP) — Comrade Wu, a bespectacled university professor, stopped a foreigner walking down a street one evening. "Now it's all right for us to contact foreign friends," he said. "Now we Chinese don't have to speak what's in our hearts.

He then added hastily, "Of course, we still need to have permission to talk to foreigners, or I couldn't possibly dream of doing it. My party leader said it was all right for us to practice English.

Comrade Wu—a pseudoform for the mild-mannered middle-aged man—and many other Chinese haunt the forests near a Chengdu hotel, waiting for foreigners. Wu is eager for fresh ideas and asks what foreigners think about China. He listens thoughtfully then speaks a caveat.

"Please," he said urgently, "don't try to make me a spy. If you want to see something is all right for me to do.

He carefully wrote his address in Chinese on an envelope. "Here you can mail this. That's what my foreign friends tell me.

Turn between the desire to talk and the fear of criticism.

State parks clearing storm debris; may sell downed trees for firewood

By James G. O'Connell

Foresters have reported hundreds of fallen and damaged trees in Southern Illinois as a result of the last 2 storms. Most roads and trails have been cleared, yet the extreme heat is causing cleanup delays. According to Don Coale, land manager for the Department of Conservation.

Gary Cole, district forest ranger in Murphysboro, said trees that have fallen near roads or trails will be cut into 12-foot logs and prepared for possible later use. Damaged trees would be available to the public as firewood.

All forest officials contacted said that although the mature trees were not bothered, except possibly for some small trees, the damage caused by the recent storms was still not fully assessed.

Camping areas were closed for a week following the storm which Catt said is due to the heavy rain followed by high winds.

Camping areas were closed for a week following the storm which Catt said is due to the heavy rain followed by high winds. The trees with the most foliage and disease-affected trees have suffered the most damage, Catt said.

Ken Keiser of the SILC forester science laboratory, said the wind damaged trees will probably mean an increase in Dutch elm disease next year. The bark beetle that invades damaged trees will carry on to the new beetle population.

Keiser said the drought and heat may affect the Christmas tree crop either this year or next. He also said that most mature trees could withstand about 3 weeks of drought.

Prime farmland to be protected by governor's order

SPRINGFIELD, Ill. (AP) -- The state joined in the effort Tuesday to reduce land development that each year is taking 100,000 acres in Illinois farmland out of production.

Gov. James Thompson issued an executive order telling state agencies to ensure their regulations and building plans are geared to protecting prime farmland.

Thompson was at his summer home in Wisconsin, but Lt. Gov. David O'Neal explained the order at the opening of a two-day conference on the preservation of farmland.

O'Neal said the equivalent of eight counties has been removed from food production in Illinois since World War II. That also means that the equivalent of five to six more Illinois counties will become subdivisions, airports and shopping centers by the end of the century, he told about 400 people at the conference.

The Agriculture Department will coordinate the effort to stop the loss of prime farmland and will monitor the policies of other state agencies.

The state also will help local governments that want to develop plans.

Warren Fitzgerald, state conservatist for the U.S. Soil Conservation Service, said maps identifying the types of soil found in 56 counties have been completed, and maps of 36 other counties will be prepared.

That will pinpoint the best farmland in each county and could be used by local agencies wishing to preserve it.

Three police officers indicted in fatal beating of Chicago man

CHICAGO (AP) — Three Chicago police officers were indicted Tuesday by a grand jury on murder charges in the fatal beating of a man they arrested for smoking on a rapid transit elevated train.

The indictment, returned before Circuit Court Judge Richard J. Fitzgerald, named officers Fred Christianso, 34; Fred Zamile, 31; and Louis Klass, 33, of the mass transit unit in connection with the July 6 death of Richard Ramey, 51.

The three are to surrender Aug. 4 for arraignment before Fitzgerald, who then will decide if a bond will be required.

The grand jury voted true bills — or bills of indictment — on Monday, charging each of the three officers with two counts of murder and two counts of official misconduct. The bills were signed by the judge Tuesday.

The policemen were suspended July 11 until completion of an investigation by the police department.

At a news conference announcing the indictments, Cook County State's Attorney Bernard Carey said Ramey was handcuffed while beaten and termed the case "one of the most blatant uses of excessive force that I have ever seen."

Robert J. Stein, Cook County medical examiner, ruled the death a homicide, saying massive external and internal injuries inflicted by a blunt object caused Ramey's death.

Injuries included a broken bone in his neck and two broken ankles, the medical examiner said.

Initially, investigators said Ramey may have died of a heart attack suffered during his arrest.

Carey said investigators have spoken to several witnesses to the beating.

Police Superintendent Richard Brzezcek said one of the three officers "has had more allegations about his personal conduct than the others," but refused to comment specifically on the past records of the three officers.

Brzezcek called the police investigation of the incident "routine," adding that the department has a "minimal number" of such incidents.

"We do move swiftly in cases such as this where the evidence is overwhelming," Brzezcek said. "For the most part, police officers exercise restraint and act judiciously in dealing with citizens."

The three officers filed an arrest report saying that Ramey had to be subdued forcibly after they approached him on a Jackson Park train. Ramey may have died of a heart attack suffered during his arrest.

Sunday

Does Your Bank Offer Saturday and Sunday Banking?

The University Bank of Carbondale Does: with TUBBY THE TELLER!

In Carbondale, only at the University Bank of Carbondale can you bank 24 hours a day, 7 days a week! That's right. Twenty-four hours a day, everyday, at the University Bank of Carbondale. Even holidays, with Tubby the 24 hour teller.

So, if your bank doesn't offer banking everyday, from sunup to sunup, come to the University Bank of Carbondale. Home of Tubby the Teller. And 24 hour banking, 7 days a week. Sunday through Sunday.

549-2116 1500 Main Carbondale

University Bank of Carbondale Bringing you new ideas in banking.

Brewers sign former Saluki

Former SIU baseball stand­
dout Bill Lyons is expected to sign a professional contract as a free agent with the Milwaukee Brewers Tuesday, said Saluki baseball coach Rich Jones.

"Bill is a sound ballplayer," Jones said. "He has kept himself in good shape waiting for this opportunity." Lyons will be the third Saluki to sign with the Brewers this year. Bob Schrockery and Jerry Miller have already signed with the Brewers as free agents. Lyons, who was being selected in the free agent draft in 1978 by the Milwaukee organization is former Saluki Rick Keeton who signed with the Brewers in 1978. Lyons has been assigned to the Double-A Wings of the Pioneer League. He is a native of Apple River, Ill., and a member of the Apple River High School baseball team.

Cubs lose delayed game, then win

CHICAGO (AP) — Mike Vail followed a run-scoring single by Steve Dillard a feature a third-inning run by Dennis Lamp and the Chicago Cubs a 2-1 victory over the San Francisco Giants Tuesday.

Early in the day, Larry Herndon's two-run homer in the top of the 12th inning powered the Giants to a 2-1 victory in the completion of a suspended game that was halted by darkness after the 12th inning on Monday.

Lenny Randle and Bill Buckner opened the fourth inning of the regularly scheduled game with singles and one out later, Barry Foote reached on Darrell Evans error.

Vail followed with a double off loser Bill Bordlev. 2-1. Larry Butti then bunted to second for a basemane Rennie Stennett, who threw Foote out at the plate but Dillard followed with a single to score Vail. "I've been disappointed. It's been a tough year," said Vail, who has been used as a spot starter and pinch hitter although he has managed to keep his average above .300 all season.

"I've been struggling and swinging at some bad pitches lately, but it's very difficult to determine the circumstances and very hard to prepare mentally," said Vail. "Even when I was third and fourth in the league in hitting, I was never up being in the lineup," said Vail. "It's all very hard to understand."

Lamp, 9-9, fell behind in the first inning when Jack Clark hammered his 18th homer. But Lamp checked the Giants on four hits the rest of the way and never allowed more than one baserunner in any inning.

The two teams played two more scoreless innings in the resumption of Wednesday's game but Bill North drew a walk to open the San Francisco 15th.

Top 10 motorcyclists to race

Sunday at DuQuoin fairground

This Sunday, the top 10 motorcycle racers in the country will be rearing around the DuQuoin State Fairgrounds mile oval. The R.J. Reynolds Tobacco Co., sponsor of the Winston Firecracker, will dispense $35,000 among the top 10 prior to the 25-lap national feature.

There will be 58 entries for the event, which begins at 2 p.m. It includes four 10-lap heat races, two 12-lap semifinals and another 12-lap trophy race before the finale.

At the halfway point in the season, Hank Scott of Findley, Ohio, leads the standings with 82 points. Behind him are Steve Morehead, also of Findley, with 77 points; and Randy Goes of Lansing, Mich., with 73. The defending Grand national champion, Steve Eklund, is in 13th with 56 points.

The American Motorcyclist Association will also include Mike Kidd, a 25-year-old veteran who is ranked 100th in the standings. He will be riding a 750 cc Harley-Davidson sponsored by the U.S. Army. Kidd won three national titles last year, placing fifth in the standings. It was the Hurst, Texas, native's best campaign on the professional circuit. Kidd has been racing professionally since 1974.

Also participating in this year's event is Ray Springsteen. Last year Springsteen missed an opportunity second place in the standings, but he has regained his form and is in third place. Springsteen racing to win four consecutive championships when he suffered stomach problems in 1974. A more recent problem, an arm injury, has been forced to drop out of the competition.

In the past, Springsteen has finished second and third, along with the impressive string of victories. Springsteen needs only three more victories in order to tie Bart Markel's all-time career win record of 28.

Soviet gymnastics team grabs easy gold medal

MOSCOW (AP) — The Soviet Union's awesome men's gymnastics team won the gold medal, and the East German and Soviet swimmers continued their domination of the pool today at the Moscow Olympics. The Soviet Union, led by world all-around champion Alexander Dityatin and Nikolai Andrianov, quadruple gold medalist four years ago, easily won the team gymnastics event.

The Soviets had 398.60 points. East Germany had 381.15 and Hungary won the bronze with 375.10.

Swimming Vladimir Salnikov of the Soviet Union smashed the world record in the 1500-meter freestyle, winning the gold medal in 14:58.27. He was the first person to swim the grueling distance in under 15 minutes, shattering American Brian Goodell's world record of 15:02.40, set at the 1976 Montreal Olympics.

Rina Reinsch of East Germany set a world record in the women's 100-meter backstroke during the preliminaries. Her time was 1:51.10. She broke the world record.

The business Monday was compulsory maneuvers on the balance beam, vault, uneven bars and the floor exercises — the first half of the two-day team competition that also serves as qualifying for the individuals' all-around titles this week at the 1980 Summer Olympics.

The U.S. absence, due to its boycott in response to the Soviet intervention in Afghanistan, has been felt the most at the swimming pool. At Montreal, American men won 12 of the 13 team events. In 1976, two Americans have held their own against the East Germans in the past two years.

Nadia Comaneci of Romania who grabbed the headlines at Montreal four years ago with her perfection, did it again Monday.

For an athlete whose sheer perfection has given so much joy, Comaneci sure doesn't seem to be having any fun. There she was again Monday, being told that nobody could do it better because how do you top perfection? "And what did Nadia do?" She didn't crack a smile after her flawless trip over the balance beam. She retained expressionless after the perfect 10.0 was flashed on the scoreboard.
