NTSB asked to reconsider crash evidence

By John Racine
Staff Writer

Air Illinois officials have petitioned the National Transportation Safety Board to consider evidence in three pre-hearing crash hearings on a flight that crashed near Pittsburgh.

"We have filed with the NTSB to reconsider the evidence, which we would like to have resubmitted for presentation at the hearings," said Robert Mitchell, Air Illinois vice president for operations.

In a document submitted to the NTSB, the company said, "Flight 710 crashed because the aircraft's left electrical generator was operating at flight and its right generator theretofore suffered a massive electrical failure."

Flight 710 pilot called overconfident.

Page 3.

The document continues: "Investigation, was precipitated by the in-flight failure of both electrical generators. The in-flight failure of both generators became evident as a result of the crash and as a result of the in-flight evidence in the NTSB pre-hearing conference on Flight 710."

Mitchell said, "The NTSB has said that they would reconsider the evidence if the generator at a later date. We don't know why they would do it at a later date, why they wouldn't bring it in now."

"The purpose of the public hearings is to bring out more facts," she said, "and we do not feel that is been done."

"At a Nov. 22 pre-hearing conference held in Washington, the NTSB said it would investigate by formal means, and incorporate its findings into its final written report."

"Neither that officials at Air Illinois -- a Carbondale-based commuter airline -- would have incurred in the weather conditions at the time the crash occurred by the NTSB put the time of the crash between 9:00 and 9:10 p.m. on that day."

"The reports that the pilots had in-flight evidence that was behind them was worse than that in front of them," she said."

"Mitchell said that information was provided by the Air Traffic Control Center at Chicago-Lower." According to Air Illinois President, Roger Street, the public has been in a public inquiry on all causes of the crash after the possibility that other aircraft which fly similar "airlines are operating with inherently unsafe generators."

Bob Backhurm, a spokesman for the NTSB, said Monday that the public hearings, which are scheduled to open this week, will cover the operations and maintenance procedures of the 14-year-old airline and the Federal Aviation Administration's surveillance of those procedures.

Mitchell indicated that there has been "selective information should be continued and reformation would appear to be damaging to Air Illinois."

"In cases like this," she said, "the NTSB never comes in three or more months before conducting a pre-hearing. But this time they are doing so after only six weeks."

Carbondale's new city manager, William Dixon, says in refusing to hear a petition to replace Kupcek is not what he expected.

"All the students said that they would introduce evidence in three hearings on the program," he said. "But the students said that they would introduce evidence in three hearings on the program." He added, "And it's time for a change."

"After 10 and a half years in Glen Ellyn I was eager to take on these challenges in a different setting," he said."

"And it's time for a change."

"The issues facing the city are difficult ones," he said. "And yet they are issues that I am looking forward to working with the people of Carbondale to find solutions to."

"Carbondale has a wide variety of people and different people have different interests," he said. "The people of Carbondale have to provide the best possible environment for our communities." Dixon said it is important for the city manager to address the concerns of people, such as members of the black community in Carbondale, who have been frustrated because they feel they are not being treated with the city."

"One of the most important things I can do in these situations is to be willing to listen," he said."

Students fight cuts in Russian program

By John Schrag
Staff Writer

Students of the Russian Languages and Literatures program at SIUC are not pleased with the program's elimination. One of the Russian language program's two faculty members, Professor Somit, has been teaching for 30 years and is known for his classes on the subject. The students say that they would like to have more classes offered to continue their studies.

"We have a program that is substandard in strength, and we have to figure out what to do with it," he said."

Guyon said Monday that he and the chairman of the Foreign Languages and Literature Department to discuss the future of the Russian language program.

Several students in the program who talked to Somit said the program should be continued. By John Schrag

Columbia blastoff successful; Spacelab experiments begun

SPACE CENTER, Houston (AP) - Columbia blasted into orbit Monday carrying six astronauts who qualified for the $1 billion Spacelab to work, beginning one of the most ambitious scientific expeditions ever undertaken - nine days of non-stop experiments that will study the heavens, the Earth and man himself.

Astronauts Owen K. Garriott and Byron Lichtenberg started experiments in the 25-foot-long Spacelab, in the cargo bay of Columbia, just three hours after they and four crewmates were launched from the Kennedy Space Center.

The launch was precisely on time, 11 a.m. EST, despite a booming weather front that threatened a two-day delay.

Columbia carried into space the largest crew ever - six astronauts -- and was the first U.S. launch to include a non-American, West German Ulf Merbold.

Mission commander John Young, 35-year-old veteran making his second flight, sounded like a rookie as Columbia orbited 155 miles above the Earth.

"It is so neat up here," he said. "It is really something." Earlier he noted: "Things don't change any.

"It's a beautiful flying machine."

Brewster H. Shaw Jr., 38, who was making his first flight. "It's really some ride. It's the smoothest way to go you ever saw."

The crew had a bit of trouble opening the hatch that covers the tunnel from Columbia's cabin to Spacelab. NASA beamed down TV pictures that showed the astronauts tugging and yanking to no avail for several minutes, until finally they freed a recalcitrant latch and the hatch swung free.

Then Garriott, Lichtenberg, and Merbold floated through the 19-foot tunnel and made a joint entry into Spacelab, smiling broadly and shaking hands all around.

They turned the lights and quickly set to work activating the experiments. Young also paid a brief visit before returning to the cabin.

"Welcome to Spacelab," a capsule communicator Franklin Chang told them.

News Roundup

U.S. sale to Guatemala delayed

WASHINGTON (AP) - The Reagan administration, upset over a resurgence of human rights violations in Guatemala, is delaying the sale of helicopter parts to the Central American nation's rightist military government, officials say.

State Department officials, who spoke on condition they not be identified, said the delay in the sale reflects U.S. concern over the upturn in political violence -- including attacks against employees of U.S.-funded educational programs.

Israel and U.S. discuss proposal

WASHINGTON (AP) - Prime Minister Yitzhak Shamir raised Israeli proposals with President Reagan on Monday to strengthen U.S.-Israel military ties and economic ties and to counter what both nations say is a Soviet-backed threat in Lebanon. U.S. and Israeli officials said they expected agreement on closer military cooperation, such as building a U.S. arms depot in Israel and joint military exercises, as a signal to Syria and its Soviet sponsors that they won't be given a free hand in Lebanon.

Suspected drug dealers arrested

BENTON (AP) - Thirteen of 17 people indicted by a federal grand jury on drug distribution charges were in custody Monday as officials continued a search for four more people, said U.S. Attorney Frederick Hess.

The indictments, issued last week in Benton, were the result of an investigation by local, state and federal authorities, Hess said.

Hess said the 17 people charged comprised three different groups working in Southern Illinois.

Council drafts social service budgets

By Paula J. Fliss

Carbondale's Comprehensive Health Care Program will get at least half the budget it had last year, and Child Care will get a minimum of 76 to 80 percent of the current funding levels set by the Carbondale City Council.

Councilman John Smith recommended the funding levels for the city's social services, which had been funded by a federal grant that expired last year. He voted against the city's $1.5 million social service budget, which would have funded the same budget levels as last year.

Air Illinois pilot criticized by peers

The pilot of an Air Illinois plane that crashed near Pinckneyville Oct. 11 and killed 10 people was described by fellow pilots in testimony to the National Transportation Safety Board as overconfident and unprepared to advice, a spokesman for that agency said Monday.

Despite the criticism of Capt. Lester R. Smith, 32, the pilot of the plane, NTSB spokesman Bob Buckhorn said there is no preliminary indication of pilot error in the accident.

"What has been said of the pilot and his abilities is the testimony of those who worked with him and not the opinion of this board," Buckhorn said. "We will not make any determination of probable cause for several months yet."

The NTSB will open three days of public hearings Tuesday in the Holiday Inn's Continental Room. The hearings will begin at 9 a.m. each day and will conclude at 5 p.m., he said.

Repeated at the hearings will be the testimony of 11 fellow pilots who said in earlier interviews that Smith sometimes flew too close to storms and took other chances to keep on schedule. The pilots were quoted in interviews from a report not yet released.

Buckhorn said.

Alice Mitchell, Air Illinois vice president for marketing, said that "all the records show that his performance was highly satisfactory." That information was from Federal Aviation Administration 'check ride' reports, she said.

"It is increasing and we have a knowledge of the future," said Lawrence, who spent his last summer studying and traveling in the Soviet Union, his wife. Marianne.

"We have a knowledge of the future," said Lawrence, who spent his last summer studying and traveling in the Soviet Union, his wife. Marianne.

The Gamma Beta Phi Society, a national honor and service organization, is pursuing chapter formation at your university, if you meet the following criteria, you are eligible for membership.

1. You must have completed at least 12 hours of college work, exclusive of CLEP, or similar tests.

2. Your cumulative grade point average must be at least 3.10 out of 4.00 for freshman
2.35 for sophomores
2.20 for juniors
2.35 for seniors

3. You must be committed to excellence in education, to good character, and to service.

Gamma Beta Phi was chartered in 1964 and grew out of the high school Beta Club organization. It has been granted complete tax-exempt status by the federal government as an educational, non-profit organization. The organization is led entirely by college students, professors and administrators.
West has wrong picture of Third World

**Jack Prasai**

Staff Writer

The 1983-'84 survey by the World Bank has a woefully distorted view of life in the Third World. Most observers believe that people there have a right to be close to the edge of starvation and waiting for outside aid or expecting money to come into their lives.

The Third World developing nations as being incompetent and totally dependent on outside help in the process of building a peaceful relationship to global cooperation. If one group of people has an unfavorable image of another, there is little chance of building a peaceful relationship. Since North-South issues are likely to be of critical importance in the face of an intensifying world situation, projecting the correct image is of no small importance to the Third World.

**PART OF THE DIFFICULTY in conveying the message is the world's some of the more prominent but biased media agencies project images of violence, sudden political changes and socio-economic elements in the developing world. The media thereby reinforce earlier colonial prejudices of Third World inferiority. Advertisements in the media appealing for funds following natural disasters or human tragedies also add to the year's existing image of a non-self-sufficient, non-self-sustaining basically violent Third World.

In fact, so minimal is the general American understanding of the Third World, that a 1977 survey by a prominent New York research firm discovered that of those interviewed, "as many thought that the Third World had something to do with UFO's and space travel as thought that it had do to with poverty." Yet, even fewer of those whom one would consider well-informed and concerned perceive their relationship with the Third World as unidirectional. These people believe they have something to offer, but are not aware that they can receive something valuable from the countries of the developing world.

For example, few people in the U.S. are aware that most of the raw materials currently in production come from the Third World. Even fewer know that their standard of living is a byproduct, a byproduct of the bottom line, a bottom line. They get the government they deserve. After all, this is the process in which we can see how accurate Adlai's prophetic statement is.

The policy directives of our government, which determine our quality of life and our attitudes toward the Third World, are put forth by us, the American people. That much the American people do not know, and that much the American public is not being privy to. We are being fed lies, outright lies. That's why we need to listen to people who live in the Third World. We need to listen to people who live in the Third World.

So the concepts of interdependence and of the Third World's desire for a more equitable partnership in exporting, and sharing the world's resources remain a secret to the average American.

**TPE MESSAGE** that the Third World is struggling to convey in American colleges and universities is that its people are striving, often against enormous odds, to get on top of their problems. They are trying to help the Western world to help them solve these problems and give financial help.

If the West can see more of the process of development, its part in the process, the West is more likely to respond. The response may be in the form of money or it may be an increased skepticism about the structure of commodity trade, international financial arrangements, or the profits of multinational companies which help to deprive these countries of a fair share of income.

1983 is World Communication Year. It should mark the start of a new era of communicating the correct Third World picture to the West. Only if an accurate message comes across will there be hope of developing a genuine global community.
Letters

Nuclear war: the debate, gamble

Don’t bury head in sand on war issue

In the ongoing debates between left- and right-thinking factions on campus, one point is severely understressed: the fact that to avoid nuclear war is a land of free expression, a place where its inhabitants can hold viewpoint regardless of who is in the driver’s seat. Criticism of a president’s policies is just that — a matter of policy and not criticism of America. With this thought in mind, I set forth my argument against the quasitaxive nuclear arms buildup advocated by Ronald Reagan.

First, these weapons cost our national economy a vast amount of wealth. These outgrowths of technology are simply not worth going so dangerously into debt when we already have the capability to annihilate our enemies several times over. Developing these weapons means that factory workers and generates no “ripple effect” when completed. Several other sectors of our economy need our support.

Second, I question the validity of the “Window of Vulnerability” theory. In this age of supercomputer-controlled monitoring stations and rapid telecommunications, I find it hard to believe that the Soviet Union could launch most of its land-based weapons at us without our knowing about it in enough time to launch a counterattack. Thus, the fear that all of our nuclear weapons would be destroyed on the ground by a surprise attack is totally unacceptable.

Third, President Reagan has shifted our nuclear priorities from defensive to offensive. With this offensive in limited nuclear war in Europe, many Europeans have been over this point. However, war creates an atmosphere of uncertainty for everyone, including military commanders, and after losing a large number of men in a few seconds, it would take a strongly moral person not to retaliate likewise. Escalation would then seem imminent, and either by accident or intent, targets could still be hit and purely military to include other civilian populations threatened by the enemy. This sort of scenario gives rise to a global conflict in which neither side would win.

Fourth, in all the debate on the size of nuclear arsenals, we rarely see any discussion that includes the stockpiles of our allies and enemies of the Soviet Union. Western Europe, China, India, and a host of Third World nations also possess nuclear weapons to counter the Soviet threat. America is the best country in the world and a place I love with all my heart. When wasteful policies are made that I feel are not necessary to my country’s survival, I feel that it is my right and my duty to speak out against those policies. I love my country. I hate nuclear weapons and the destruction they possess. On this issue we cannot bury our heads in the sand and let our children inherit a world of constant threat.

We’re risking the future of our children

We are gambling with the future of our children, who may be caught up in the routine of our lives. We go off to our assigned tasks without thinking for our best, and we send our kids off to school without expecting them to strive for their best. In our day and age, with friends, have good time and unwind from our grueling routines.

And into this everyday routine, an everyday fear has also crept — the fear of a nuclear holocaust. And in our apathy, we simply forget. We imagine we have learned to live with these weapons, that they are adaptable and we imagine we have adapted even to this. Yet we look around in bewilderment at the increase of School of War,3rd, 4th, and 5th graders and at the emotional response of the young that exists “out there.”

We teach our children not to play with matches, but we lock the door against the dangers of the world. We do this because we want to protect our children. We do the very best we can to shield them from the abominations that exists “out there.”

We remind ourselves that we can’t live in fear of the future, that we must live for today, and make decisions that our children won’t “fear of the future” that’s getting us down. It’s the “fear of the unknown” that makes the natural instinct is survival of the species. What we conjure up in our minds of nuclear war are terrifying and threatening, but great terror and the greater threat is that we know how to make this, something not of our making and not our children’s choice, where we did not stop it in time.

And the debate goes on as to whether or not we can survive a nuclear war. I don’t think any of us want to take that chance. The debate goes on as to whether or not either side would ever actually push the button. But humankind in all of history ever invented a better weapon for warfare that was not eventually used, and for what the all-out war arrived? There should be little doubt that if it came right down to it, neither side would surrender to the other without having first used everything available to overpower the other.

And I am a peace activist, the collective voice of a growing movement that is growing stronger and louder against this menace to our way of life. I am a university student. Only peace and quiet some will think it one too small. I am an individual and I can’t live in fear of the future. I can’t imagine what my children will have to face. And I am working hard to undo the harm that has already been done.

Break in Carbondale

‘Day After’ revisited

HI. BREAK TIME in Carbondale. You probably drove home some person, a crowded suburb, stuffed your face with turkey and dressing, and tried to relate to your old friends. If you made it to the best — but not the most exciting — weekend of the semester.

During the break, Carbondale becomes a party town with a skeleton crew. A graphic display of “The Day After” is without blanks. The campus is deserted and eerily quiet. Yellow and white billboards flutter on telephone poles with no longer buzz with calls. Townspeople wander onto the streets in small groups and try to see what all the fuss has been about. Strain employees lean on their elbows by big someone will come in and by a two story garage. Then there no jammed computer terminals in the computer lab. There are no bicyclists to dodge and no roving bands of beastrous paper hawks. Only quiet, and the ponderance of term papers to come.

IT IS A TIME for reflection on the meaning of life. As you drive through the suburbs, the streets that got shoved aside the rest of the semester: the bunny needs cleaning, I should find my library books, where did I put the dog?

And it is a time for action: return the library books, open this semester’s Univer­ mail, bury the dog, go through your own mess and not being repulsed by everyone’s is a time for sleeping as late as you want without ob­ with a term paper hanging Top 40 from WERQ. Time drifty by among thoughts of overdue book reports and worries over the Bills of Christmas Future.

The days are filled with cheap six-packs and endless Carbondale — those one-time students who forgot to leave town when the semester ended. They are up and out of school and now call this home. The library is open in the 80s, with fatigue­ jackets, long hair and distant eyes. The closest thing they have to a parent is Mary Lou.

THEY GATHER daily at Bubby’s or The Club to discuss Kennedy or The Crop or how nice it is without the students. There are haggard musicians trying to make it

Townspeople wander onto the Strip in groups of two or three to see what all the fuss has been about.

hours of betting yourself on football games (if I lose, I do them, so you win). And I got interested at the Club.

FORTUNATELY, I won — I bailed a good steak. So it was time for that most supre­ popcorn. A group of local residents who usually avoid the Strip like the plague. Last Friday, stranded for the week because of exams or another, occasionally wander into the Manor and the Re­ shops (catching up on homework, etc.), when they really spend all of their money for the semester, couldn’t afford a train ticket home and are afraid to tell their parents.

Through the slow tap-to-tap, hanging wingers with V.O. Wilkinson, Associate Editorial Page Editor

ONE PERSON who really can tell a different story is the international student. After being rudely kicked out of his dorm room, he is forced to throw his lot in with friends. International Hall is a beehive. It must be hell. But international students don’t celebrate Thanksgiving, do.

But now the break is behind us. The rooms have crashed and all the back and the house is more a disaster area. The book report is still due. Lunching that should have been achieved was achieved. The holidays have gone back into their holes. The lost people have been found. WERQ has blasted again. It is a time for the home stretch.

IF YOU WANT HOME, the best way to do it is to stay. The break here the break was too short. But no matter how you spend the time, the end is always the same.

"Just two more weeks and the tests," you say to yourself as you walk in the cold to your eight o’clock Monday morning. "Just three more weeks and it’s over."
University groups, solo artists to give Shryock performance

By Beth McDaniel

The music of Bach, Handel, and Scarlatti will fill Shryock Auditorium as the University Chorus, Orchestra, Brass Quartet and several solo artists perform for the first campus concert of the holiday season at 8 p.m. Thursday.

The concert, conducted by Robert R. Bergt, will feature Bach’s “Magnificat” as well as other Bach chorales and Handel’s “Hallelujah Chorus” performed by SDJC’s largest chorus group and the University’s Chamber Orchestra.

The chorus and orchestra members have worked hard and effectively to prepare what promises to be an exciting concert, Bergt said. "I find the music of the Baroque period to be some of the most exciting music in the world. It carries with it deep religious sentiment, faith and motive."

Also included in the concert will be chorales performed by the University Brass Quartet, who will present music by such leading composers as Christian Dior, Bill Tandy, and incorporates several Bach chorales and Handel’s “Hallelujah Chorus.”

Several designers as Christian Dior, Bill Tandy, and others have created works inspired by some of the world’s top fashion designers and models, including such legends as Robert R. Bergt, designer for the "Ebony" magazine.

The Ebony fashion fair is Thursday, December 9, at 8 p.m. in Shryock Auditorium as the University of Illinois at Springfield presents its 26th annual fashion show.

Nenmber of tickets are $15 to the public and will include those attending a "one-year subscription to Ebony or a six-month subscription to Jet magazine." Student tickets are $10 and will include a six-month subscription to Ebony magazine.

Exhibit by Southern Illinois artists to open

By Lit Myers

Ebony magazine will bring "Ebony Fashion Fair," its premier traveling fashion show, to the campus of the University of Illinois at Springfield Thursday. Joyce Johnson, wife of Ebony publisher John H. Johnson, will produce and direct the show, which features fashion, art and music.

This year's fashion show will take place in Shryock Auditorium from 8 to 10 p.m. Thursday, with tickets available at the door after 7 p.m.

The Ebony Fashion Fair will feature designers such as Givenchy, Yves Saint Laurent, and Oscar de la Renta, as well as local designers.

The show will feature a diverse range of fashion, from haute couture to streetwear, and will include music by such artists as The Isley Brothers, Marvin Gaye, and Stevie Wonder.

The Ebony Fashion Fair is a national event, and has been held in over 200 cities since its inception. It is the largest fashion show in the world, and features the latest in fashion and music from around the globe.

The exhibit, which is the first of its kind in the Midwest, will feature work by artists from all over the United States.

The exhibit will be held in the Shryock Auditorium from 8 to 10 p.m. Thursday, and is free and open to the public.

Republican Sen. Charles Percy, who says he stands in the middle of the political road, was attacked from the left as being too conservative and from the right as too liberal at the first meeting of Percy and the five men who want to take his job in 1984.

"There's nothing wrong with being a liberal," Corcoran said. "They're just wrong on the issues.

"We're standing in the middle of the political road, " as Eisenhower did in 1952," Corcoran said. "It isn't about exporting American policies, but believing a compromise can be reached if certain conditions are met, including establishing courts and finding a way to end the civil war in El Salvador.

The United States should be concerned about "exporting Communism via Castro" in Central America, said Percy, but should use military intervention only if diplomacy fails.

"Only if that fails and only if our own vital, national interests are threatened should we resort to a military solution," said the three-term senator. "We will not get ourselves into another Vietnam.

Corcoran, saying "We need the MX missile," argued that a "strong, credible defense" will deter threats to American interests.

"Central American policies have to be built on force," Corcoran said. "We have to anticipate problems and have a demonstration of strength. People respect strength.

The Democrats called for limited U.S. involvement in Central America, with Rock, Simon and Burris condemning covert aid to anti-Sandinista forces in Nicaragua.

"We have no business trying to overthrow any government without the consent of the people," said Simon, who criticized Reagan for viewing Central American problems as military, rather than social and economic ones.

Seith was noncommittal on the issue, saying, "You can't say generically that there is never a circumstance when we would try to overthrow a government."

All four Democratic candidates said they support a mutual, verifiable freeze on production and deployment of nuclear weapons by the United States and the Soviet Union. Corcoran called for a cancellation of deployment of cruise and Pershing II missiles in Europe, scheduled to begin next month. Simon and Rock said they would support a delay in deployment while the two countries try to reach an arms reduction agreement.
Professor: Word use may affect outcome of courtroom verdict

By John Stewart
Staff Writer

Successful defense attorneys use different words and descriptions than winning prosecuting attorneys, according to research done by Mike Parkinson, an SIU-C speech professor.

Parkinson, who has been researching courtroom communication since 1976, has found victorious prosecutors tend to use more concrete words and use pronouns in questioning witnesses and arguing. Conversely, successful defense attorneys, in attempting to create reasonable doubt, use abstract words and legal jargon, and use names rather than pronouns.

His research, funded by the Law Enforcement Assistance Administration and the National Science Foundation, further indicates that the way a defendant communicates while testifying is a strong predictor of a criminal trial's outcome. Parkinson found that defendants who use what he calls "definitional words" - behaving very courteously or referring to judge as "your honor" - are highly likely to be acquitted and defendants who make many "I" statements are often found guilty.

His research began with content analysis of trial transcripts and has since included experiments to determine which types of arguments are more effective for each type of participant.

Parkinson said he plans to continue research to determine if some of his findings might be causal. The research will concentrate on whether attorneys argue differently because of their confidence in a case's strength. He said he hopes that someday his findings can be taught to attorneys, so they can create certain arguments and coach witnesses on successful courtroom speech.

Parkinson said he has had to direct research to the NSF. He said that currently, successful communication rivals evidence in deciding trials outcomes. Yet, if all attorneys knew the speech rules which influence trial outcomes, then trial decisions would be based more on the actual evidence than its presentation, he said.

A graduate of the Air Force Academy, Parkinson has taught speech at SIU-C since 1980. He holds a doctorate in communication from the University of Oklahoma and is currently attending SIU Law School part-time.

Parkinson said he became interested in the performance aspect of legal argument while his wife, Marie, was attending law school. She is now a practicing attorney in Pinckneyville, and he is acting as her campaign manager in her race for Perry County state's attorney.

Parkinson's research has been published in Trial (an American Bar Association journal), the Journal of the American Forensic Association, Communication Educators and the Speech Communication Association.

Murder charges are dropped

Charges of attempted murder against Carbondale man, stemming from a stabbing on the northeast side of Carbondale Oct. 6, were dropped at a preliminary hearing in Jackson County Circuit Court. Roger J. Smith, 31, of Carbondale, was stabbed in the chest several times with a 10- to 15-inch-long hunting knife in front of 22 S. Washington St. and was taken to Carbondale Memorial Hospital in critical condition. He was released from the hospital Oct. 13.

Ivan Garcia, 26, was arrested by Carbondale police after witnesses identified him as the man who stabbed Smith, then fled the scene.

Charges against Garcia were dropped due to a lack of probable cause, according to the Jackson County State's Attorney's office.

4 more men arrested for theft

In a continuing investigation of a major burglary ring, the Jackson County Sheriff's Department has arrested four more men and recovered an additional $3,000 in stolen property, bringing the number of arrests to seven and the value of recovered property to about $28,000.

Sheriff Bill Kilquist said the seven suspects have been implicated in 63 burglaries which occurred in Jackson, Williamson, Union, Johnson, Saline, Randolph and Franklin Counties.

Arrested between Aug. 16 and Nov. 16 were Steven Qualls, 21, of Ava; Russell Davis, 29, of Gerbani; Nathan Holt, 20, of Murphysboro; Donnie Moore, 26, of Murphysboro.

The arrests were not announced until Nov. 16, Kilquist said, to avoid jeopardizing the department's investigation. The recovered property included stereo equipment, guns and jewelry. Moore was charged with theft by possession and released from Jackson County jail on $1,500 bond. Holt and Davis have not been formally charged with burglary. Both were released from jail after posting bond. Qualls is being held in Cook County jail charged with burglary.

Three men were arrested and charged with burglary in early August and as estimated $25,000 in stolen property was recovered, including a large number of firearms, appliances and household items. Tommy P. Stewart, 24, of Murphysboro, was released on $10,000 bond. His trial in Jackson County Circuit Court is set for Dec. 14, according to the state's attorney's office.

Keith A. Kimmel, 22, of Murphysboro, and Boyd R. Clover, 20, of DeSoto, pleaded guilty to charges of burglary and theft by possession. Kimmel was sentenced to 12 years imprisonment and Clover received a nine-year sentence.

"Investigation of the burglary ring is continuing," Kilquist said, "and the possibility of more burglaries being solved, arrests being made and property being recovered still exists."

Toy drive still taking donations

By Sheila Rogers
Staff Writer

Some parents may have trouble trying to provide food for their families at Christmas, let alone buying toys for their children. That's one reason that Sandy Hickle, Angel Flight representative for Murphysboro, said that donated toys should be distributed to the third annual Christmas For Kids Toy Drive, which started last week at the University Mall.

The drive, sponsored by the University Mall Merchants Association and the Southern Illinoisan, will run until Dec. 17.

The Arnold Air Society and Angel Flight are helping with the drive by collecting, cleaning and distributing the toys. A temporary toy store is located at the west corridor of the mall near the J.C. Penney store. Hickle said that donated toys should be in good condition.

"We're hoping that the people won't bring us broken toys because we just don't have the time to repair them," Hickle said.

The drive will serve children from infants to 14 years old. Once the toys are collected, they will be organized as gifts for appropriate ages. The names and ages of the needy children are given by churches and organizations in the area and families that have responded to ads in the Southern Illinoisan. No specific requirements have been established for needy families.

"The people involved are caring people and they are caring for the children who won't get anything for Christmas," Hickle said.

Last year, 2,659 children received about four toys each from the drive. Toward the end of the drive, not enough toys were donated and Hickle said that they panicked, until the Southern Illinoisan donated money for new toys.

Anyone who needs toys for their children or who would like to help with the drive may call 529-5682.

How 'bout them dogs!

Service scheduled for Siener

A memorial service will be held at 2 p.m. Sunday for Melvin Lawrence Siener, assistant to the director of the School of Music and director of bands, at the Student Center. "Mel" Siener, 62, of 1065 Cindy, Carbondale, died at 12:40 p.m. Friday, Nov. 25 at the Carbondale Clinic. He was ill for one week and had been hospitalized and released by the clinic prior to his death.

An employee at SIU-C since 1963, Mr. Siener previously was chairman of the Music School for eight months and before that was band director at Du Quoin Township High School from 1949-1963. He graduated from SIU-C in 1949 and later received his master's degree from the University of Illinois in Champaign Urbana. He was a member of the SIU-C Alumni Association.

During World War II, he served with the Army in Europe from 1942 to 1945. He was a member of Phi Mu Alpha (Symphonia), Phi Beta Mu, College Band Directors National Association, Music Educators National Conference, Illinois Music Educators Association, Sphinx Club, Theta Xi Fraternity, Phi Kappa Lambda (honorary music fraternity), and was also a member of the First Presbyterian Church in Carbondale.

Mr. Siener was born in Collinsville, Sept. 3, 1911 (in March 16, 1949, he married Leanne V. Waiver in Collinsville. She survives.

Other survivors include a daughter and a son, Steven Siener of Collinsville. The memorial service will be held following cremation at the Memorial Park in St. Louis. The cremated remains will be buried in Ceden Cemetery. There will be no visitation. Huffman Funeral Home is in charge of arrangements.

In lieu of flowers, the family requests that memorials be made to the SIU Foundation for a music scholarship in his name.

Mary Agnes Garbutt, a retired SIU-C employee, died at 10:15 Friday evening in Memorial Hospital in Carbondale of a massive heart attack.

Mrs. Garbutt, 74, was an SIU-C graduate. She worked for Dr. C. A. Lantzy and as an ad
viser at SIU-C. After her retirement, she volunteered to work at the Museum and Art Gallery Association of the SIU-C Museum.

Mrs. Garbutt was born Dec. 17, 1908 in Metro., Wash., to James and Ora Lantery Man-
ning. She married Cameron Willis Garbutt Aug. 14, 1933. Survivors include her husband; one son, Dr. James Cameron Garbutt of the University of North Carolina Medical School; one daughter, Susan Mary Elmer, of Idaho; two brothers, James Manning, of Idaho City, Idaho and Phi Manning, of Centralia, Wash. and three grandchildren.

Mrs. Garbutt was a member of the Unitarian Fellowship, Carbondale and the League of Women Voters. A memorial service will be held at 3 p.m. Wednesday at the Unitarian Fellowship. The Rev. Jack Hayward, Esther Eelman and W. C. McDaniel will officiate. Huffman Funeral Home is in charge of the arrangements.

Those who wish may contribute to the SIU Foundation for MAA, the SIU Museum in lieu of flowers. There will be no visitation.

Hearing set on teacher preparation

By Phillip Fiorini
Staff Writer

The Illinois Commission on the Improvement of Elementary Education has scheduled a public hearing on teacher preparation from 10 a.m. to 12:30 p.m. Wednesday in the Student Center's Ballroom C.

The third of 15 SIU-C professors and administrators and several representatives of area elementary and secondary schools are expected to testify at Wednesday's hearing which is the only one held on the campus of a state university.

One of the testifiers, Nancy Quisenberry, associate dean of the Department of Education, said that the commission is looking at new elementary and secondary education is managed and at the preparation of teachers for these schools.

She said she hopes legislation will stem from the commission's hearings to assist schools in preparing teachers for these roles.

Lauren Sue Charal
SIU student dies in auto accident

Lauren Sue Charal, 19, of Morton Grove and an SIU-C sophomore in pre-med, died Nov. 18 in a car accident near Chicago off I-290.

A funeral service was held Nov. 21 in Morton Grove.

Ms. Charal was in the back seat of the vehicle when it was struck on the passenger side at 1:30 p.m. Nov. 18, according to Illinois State Police. She died instantly.

She is survived by her parents, Leonard and Marilyn Charal; a brother, Robert; and a sister, Barbara.

turned in some impressive performances against the Sox, winning the 9th, 10th and 11th games. He pitched a no-hitter and struck out 16 Sox in the 10th. Grubbharn defeated the White Sox' top performer and probable Cy Young contender, White Sox' ace Jim Roy, in both games. Grubbharn pitched a complete game in the 10th, striking out 16 White Sox. He also pitched a complete game in the 11th, striking out 10 White Sox.

In the 10th, Grubbharn pitched a complete game, striking out 16 White Sox. He also pitched a complete game in the 11th, striking out 10 White Sox.

In the diving event, the Salukis dropped a close decision, 112-106, to defeated SMU in the 3-meter.

FOOTBALL from Page 20

We feel we have the edge with being at home and having the crowd backing us up. Dempsey said.

When Indiana State won, we just dropped the Eastern game plan. Dempsey said Indiana State's win didn't up set practice plans for this week.

We had game plans worked out for both Eastern Illinois and Indiana State. Dempsey said. When Indiana State won, we just dropped the Eastern game plan.

One part of his squad's game plan, Dempsey said, is for his defense to work on stopping the option attack because Indiana State has been running it quite often lately, and Wichita State used the option in handing the Salukis their only loss of the year.

Dempsey said he thinks that fan reaction could play a big role in the game for his squad. "We're going to try and get the fans involved. They can make a lot of difference," said Dempsey.

"Ditka seeking team identity"

LAKE FOREST, Ill. (AP) - Coach Mike Ditka refused to dwell on the playoff chances of his Chicago Bears. He was more interested Monday in establishing team identity.

"I don't like to go back into the past," said Ditka when asked if his team is becoming a Ditka team. "I just know our team had to establish an identity of being a tough, hard-nosed football team," said Ditka. "Give me no quarter, take no quarter. That's the way I want to play, no matter where we're playing.

The Bears have won three in a row and are tied for third in their division with the four behind them, Minnesota and Detroit. Had they not been off to such a slow start, they could very well be among the leaders." "We had a lot of disruptions early in the season," said Ditka.
Shula extends contract with Miami

MIAMI (AP) — Miami Dolphins Coach Don Shula signed a new contract with the National Football League team Monday, ending a flirtation with a rival league that could have cost him at least $1 million a year.

Shula, now in his 21st year as

Coaches oppose playoff system

PASADENA, Calif. (AP) -- Members of the major college football coaches associations were put on notice that they might have to fight for their playoff system against the NCAA voting this coming week in Indianapolis.

The National Association of Collegiate Tennis Coaches was among 15 groups yesterday that offered a joint letter to NCAA President Richard M. Slavin, objecting to a proposal that would set up a national playoff in all of college football.

"We think the current system is better for the players and the schools," said Tom ◆

Bunyan All-American after finishing 20th

By David Wilhelm
Staff Writer

The ultimate goal of a cross country runner is to be named an All American. That goal became a reality for Saluki runner Chris Bunyan, who finished 20th among 96 runners at the NCAA National Championships Nov. 21 in Bethlehem, Pa. Bunyan ran the 6.2-mile race in 20:14.

Bunyan said the race was "pleasing, yet not pleasing." "I was pleased I made All-American," he said, "but I wish I would have been faster up." One thing Bunyan did not have to face during the race was inclement weather. At the NCAA District V Championships Nov. 12 in Ames, Iowa, the Salukis' performance was hurt by cold, wet, snow and ice. The team was unable to run up to its capabilities and did not qualify for the nationals. But Bunyan's fourth-place finish qualified him to advance to the nationals as an individual runner.

Bunyan said the weather was better for the national meet. "It wasn't the day before the race," Bunyan said. "That didn't make the course heavy, but there were no muddy spots. That probably helped me - I'm not really a speedster. I had expected to be cold, but it really wasn't."

"For the first two miles I was up around fifth, but then the pace got hot." Texas-El Paso runner Zafar Khan was in the race in 29:29. Bunyan, who is from England, said he was so worn out at one time that he wouldn't have made All-American because of a foreigner to qualify, he was finish in the top 25. An American runner needs to be one of the top 25 to make the nationals. Bunyan said that was actually in competition against the top Americans and foreigners in what he called a "class field." The last Americans to qualify as an All-American in 62 years.

Bunyan said that while he appreciated the teams' presence at the race, he was happy that Coach Still Corneli, who he had said was "in trouble," managed to "get second on the last lap."

"I was happy that we were competitive throughout the race," Bunyan said. "I had hoped we would have qualified for the nationals, but we didn't." Bunyan said that he and his teammates "were考核ing for the next month and a half in preparation for the indoor track season." The indoor track season began on Jan. 14. "I'm just going to train and get ready for the season," he said. "I was going to run a marathon, but I don't have time to train for that." Bunyan said that training for the marathon would require three months of hard work. At that time, the Salukis will be well into the indoor track season.

Bunyan said that training for the marathon would require three months of hard work. At that time, the Salukis will be well into the indoor track season. "I was upset about Illinois going to the nationals," Bunyan said. "They finished ninth, but we had only qualified them twice. Mike Keane (Saluki runner) was only of the four "Old Man" runners who did such well at nationals, and he would have been All-American."
Salukis nearing playoff 'series'

By Jim Levy Staff Writer

Football teams do not usually play three-game series during the season, but for his No. 1-ranked Salukis, Coach Rey Dempsey said that this is how he is thinking of the NCAA I-AA playoffs.

"We're calling it a three-game series," Dempsey said. "Of course, we know we have to win the first game in order to play any more, but we're looking at it like it is three games.

SIU-C will need to win three games in order to claim the 1-AA title that would match No. 1 ranking. The Salukis regained the top spot in the poll after No. 1 Holy Cross lost to Boston College.

"It was a big lift for the players," Dempsey said. "It raised their spirits up. The ranking made them feel, Hey, we're No. 1. Now we have to defend that ranking."

Generating all four first-place votes in the poll, SIU-C also was seeded No. 1 in the 1-AA playoffs. Holy Cross is seeded No. 2. Furman is seeded No. 3 and North Texas State is seeded No. 4.

Missouri Valley Conference foe Indiana State will be the Salukis' opponent in this Saturday's quarterfinals at McAndrew Stadium in the conference finals of the I-AA playoffs.

Indiana State, ranked No. 3, beat No. 4 Eastern Illinois 16-13 Saturday. The Sycamores needed two overtime periods to knock off Eastern Illinois, winning on a 25-yard field goal by Todd Bridges. Dempsey said that he and his staff thought the game would be decided on a field goal.

"We didn't know who would win, but we felt it would be a three-point game," Dempsey said. "We felt it would be that tight of a game, real close."

Dempsey said that both teams moved the ball well between the 20-yard lines, but they had a hard time scoring.

"We have always felt good about playing them (Indiana State)," Dempsey said. "We look forward to playing Indiana State. We have always done real well when we played them."

Tickets to go on sale Tuesday for playoffs

By David Wilhelm Staff Writer

Saluki football playoff tickets for the Dec. 5 game with Indiana State are on sale from 3:30 to 4:30 p.m. Tuesday at the Arena Special Events Ticket Office.

Studentreserved admission tickets are $2, for students only. These tickets are required at the time of purchase. General admission tickets will be available for the general public on Saturday, Nov. 26, on the west side of McAndrew Stadium and in sections A, B, H and J in the west stands. Purchasers must specify which side is desired when buying these tickets.

Reserved seats are available on the west side of the arena for $5.

The men's athletics office has urged Saluki fans to purchase tickets before Saturday to avoid long lines. Because of NCAA playoff rules, a ticket will be required for entry during both halves of the game.

Swimmers pounded by SMU; Steele says progress showing

By Daryl Van Schoeuen Staff Writer

Bernard Campbell and Kenny Perry each scored 26 points to pace the Saluki basketball team to a 79-60 victory Monday over Missouri-Kansas City in SIU-C's season opener before a small crowd at the Arena.

On the game's first field goal attempt, Saluki guard Nate Bufford hit a 15-foot jumper that turned out to be an indication of things to come, as the 6-foot-2 guard converted seven of 10 field goal tries. Bufford added 17 points for SIU-C.

The Fighting Kangaroos were led by Paul Kendrick with 11 points. "Nate (Bufford) and Bernard (Campbell) both have good confidence in their jump shots," Saluki Coach Allen Van Winkle said. "They're not afraid to take it. And regardless of the size of the team we play, those type of shots are tough to stop."

Salukis Graveline Butler, middle, and Terry Taylor had down an Arkansas State player. They Saturday against Indiana State.

Cagers romp 79-60 to win season opener

By Daryl Van Schoeuen Staff Writer

Last year everyone played us tough inside because we didn't have that shot," said the Salukis, second worst in the Missouri Valley Conference in field goal percentage (44 percent) last season, shot 53 percent from the field. Bufford, Campbell and Perry clicked on 26 of 29 shots for a combined 67 percent.

UMKC was 2-2 going into the game, having defeated both Harris-Stowe and Central Methodist in overtime while losing to Missouri-St. Louis and Murray State.

Van Winkle started five junior transfers - Perry at center, Cleveland Bibbens and Campbell at forward, and Roy Birch and Bufford at guard.

Throughout the contest, a hustling full-court man-to-man Saluki defense prevented UMKC from getting the ball inside, forcing 16 turnovers, 11 of the first half. The Salukis parlayed the turnovers and good shooting into a 36-24 halftime lead.

A jump shot by UMKC's Joe Washington from left of the circle with 10:15 left in the second half cut the 26-point lead to 38-22. SIU-C, however, answered with a 10-2 run by reeling off 14 unanswered points within a two-minute period, increasing its lead to 48-24 with 13:30 remaining.

"That spell set the stage for the rest of the game," Van Winkle said.

From that point on, the Salukis led by no fewer than 15 points the rest of the way.

Perry, nine of 14 from the field, led all rebounders with nine. The Salukis outrebounded the Fighting Kangaroos 43-34.

The Salukis, who held two-a-day workouts over Thanksgiving break, looked sharper against UMKC than they did in their exhibition opener against the Turkish National team.
