Harris bill seeks ouster of Trustees

By Steve Brown
Daily Egyptian Staff Writer

Legislation which would abolish the SIU Board of Trustees and assign governance of the Carbondale and Edwardsville campuses to other boards has been introduced in the Illinois General Assembly.

The bill, which was introduced Tuesday by State Sen. William C. Harris, R-Pontiac, recommends that the Carbondale campus be placed under the Board of Regents, while the Edwardsville campus would be governed by the Board of Governors. The University of Illinois board would be eliminated and the governance of that university assigned to the Board of Regents.

Harris, in a telephone interview in Springfield, said the bill is only a vehicle that will pass before the Senate Education Committee to discuss the question of university governance.

Harris said he ‘would not press for action’ on his particular bill, but added that some administrative decisions made by SIU have caused him ‘more personal despair than any other institution.

He said Tuesday was the last day for the introduction of legislation in the General Assembly.

Harris said he wants the committee to be concerned with the ‘systems of systems’ approach to higher education. The ‘systems of systems’ concept which has been adopted by the Illinois Board of Higher Education calls for new institutions to be assigned to already established governing boards.

Harris said there are many problems involved in many governing boards. He said that after consideration of the tapes it may be decided that the five existing boards are appropriate.

Harris said that he does not foresee any immediate action on the bill by the General Assembly.

City, SIU plan concerts, dances to alleviate weekend problems

By Steve Brown
Daily Egyptian Staff Writer

The first in what will probably be a series of weekend mini-rock concerts and dances was announced by Carbondale and SIU officials Wednesday.

John McCaffrey, student body vice president; Edward R. Hammond, assistant to the Chancellor for student relations; and Carbondale City Manager William Schmidt said that dances will be held from 8 p.m. until 2 a.m. Friday and Saturday at the Southgate and Campus Shopping Center parking lots. McCaffrey said that another dance will be held Friday at McKendree Stadium parking lot and Saturday at University Park.

All dances will be free and bands will perform at all.

Tom Kelley, chairman of the Student Government Activities Council, said that the dances will be named after the Egyptian god. Schmidt said that the parking lots will be closed and Freeman Street between University and South Illinois Avenues will be closed to traffic both nights.

Schmidt said that the program was planned to give students and young people a ‘meaningful alternative’ to the incidents of last weekend.

University and city officials met several times this week to solve the congestion and black-top problem on Southern Illinois Avenue last weekend. Officials said they want to schedule activities for the rest of spring quarters. They are looking into using other locations in the area for subsequent events.

Schmidt said that there will be ‘no covert police action’ at any of the dances. He indicated that there would be foot patrols along South Illinois Avenue during the weekend. He indicated that the officers assigned to the patrols would be Carbondale and SIU Security Police.

He said that if an attempt to block the street again, police will attempt to alleviate the congestion and move the street.

Hammond said that a community watch will be held at 8 p.m. Thursday at the Student Christian Foundation. Hammond said anyone interested in helping plan activities or helping set up equipment is invited. He added that any group interested in selling food or other items at the dance should attend.

McCaffrey said the Community Awareness Festival will be held from 2 until 5 p.m. in the area between Shivrock Auditorium and the Women’s Gym. He said various groups involved in community service programs will be on hand to explain their programs. McCaffrey said that bands will provide entertainment.

Schmidt stressed the need for the programs to attract a large number of young people in the downtown area.

Beach ready for summer

The Lake-on-the-Campus beach will be officially opened Saturday for the summer swimming season with all lake facilities available Monday through Sunday from 1 to 7 p.m. C.W. Thomas Jr., assistant to the coordinator of the Student Activities Center announced Thursday.

Thomas said there have been few changes made on the beach area since last year. However, he indicated that plans are being made to relocate the swim float on the lake.

A crew of student workers is cleaning last winter's leaves out of the lake as well as working on the bathhouse and putting up marker buoys. Thomas said.

Thomas listed some general beach area policies which will be enforced this year for safety precautions. Swimming or wading is not allowed until authorized lifeguards are on duty. 2

Assassin charges dropped

CHICAGO (AP) — Charges against four men accused of plotting to murder Mayor Richard J. Daley and the Rev. Jesse Jackson, director of Operation Breadbasket were dismissed in Court Judge West.

Minnesota choir

to perform here

By University News Service

The A Capella Choir from Golden Valley Lutheran College, Minneapolis, Minn. will present a concert at 8 p.m. Friday in the Home Economics Auditorium, the School of Music has announced.

Presented under the auspices of the S.U. Choirs, the visiting ensemble, under the direction of John Seagard, will perform sacred compositions representing various styles of music history. Selections will include works by J. Bach, Palestrina, N. Laudli, J. Harrison and others, demonstrating the excitement of spiritual values seen through the eyes of composers of all ages.

The public is invited without charge.

Candidate omitted from senate list

Ken Walk, Thompson, a senatorial candidate running as an independent, was mistakenly omitted from Wednesday's list of candidates.

Senatorial candidates Pat Scharrett, University City, and Randy McCarthy, Thompson Point, are Acting Party candidates.

David Kite was erroneously reported as a candidate for vice president. Kite is a candidate for president on the Aquity Party ticket.

Opinion

How significant is directory?

The flap over the $3,200 Evergreen Terrace resident directory that nobody seems to want points to the lack of communication in the bureaucracy that is called Southern Illinois University.

It seems that once a project gets started there is no way to stop it. Samuel L. Rionda, director of Housing Business Services, says he tried. He was unsuccessful. This seems strange in view of the fact that the Evergreen Terrace residents' council made its opposition known almost a year ago.

This is a small expenditure as University expenditures go, but it is symptomatic of what goes on within the University on a much larger scale. If University officials cannot communicate on a minor project such as this, can they be expected to handle the larger ones?

Maybe that's why we have cut an instructor here and there or boosted tuition when we should have made reductions elsewhere.

Money used for the directory could not have been used for an instructor, but it could have been applied to other improvements at Evergreen Terrace. The residents themselves want more sidewalks, fences and playground equipment.

One of the more moving movements is the "Earth Day Celebration," or the fight against environmental pollution.

It was created a year ago today by conscientious students concerned with the degrading conditions of our environment.

They were so concerned about the pollution problem that they organized a program called "Earth Day." It helped awaken millions of Americans to the fact that we were burying ourselves in a world of paper cups, tin cans and other garbage polluting our water, air and soil and stifling ourselves right out of existence with our labor-saving devices.

Now that "Earth Day" is here, what can we say we have accomplished in the last year? Besides being more conscious of the problem (you probably don't throw your chewing gum wrapper out your car window anymore), we have not even started to overcome the problem.

However, there are signs of greater things to come. The environmental movement this past year has united many people in the fight against all manner of pollution, from protest against the internal combustion engine and attempts to recycle old bottles, cans and magazines to creating an atmosphere among people that helped convince Congress that the passage of the "Safe Drinking Water Act" would have only added to the pollution of our environment.

If we have another year like the last, all the work, the studying, the research and everything thrown into the fight to save the environment is worth it.

Steve Brown
Staff Writer

Earth Day celebrates year

It is springtime again! Time for friends to gather out of doors to right the wrongs of the world. Time for nonconformists to clash with the socialized establishment. Time for nonexistent movements to come into existence and existing movements to shed water's inertia.

One of the more moving movements is the "Earth Day Celebration," or the fight against environmental pollution.

It was created a year ago today by conscientious students concerned with the degrading conditions of our environment.

They were so concerned about the pollution problem that they organized a program called "Earth Day." It helped awaken millions of Americans to the fact that we were burying ourselves in a world of paper cups, tin cans and other garbage polluting our water, air and soil and stifling ourselves right out of existence with our labor-saving devices.

Letters to the editor

Has Vietnamese editor resigned from journal?

To the Daily Egyptian:

The publicity release describing the journal of the Vietnamese Center, "Southeast Asia's twelve people on the board of editors. Five of these editors are from SIU, including the distinguished Vietnamese scholar, H.B. Jacobson, the distinguished man of integrity, Wesley Fishel, the distinguished anthropologist, Joel Martin. Only one of the seven editors from SIU in Vietnamese Phan Thanh Chau of Vider College in New Jersey."

Recently I heard that Prof. Phan Thanh Chau had resigned as an editor. Would Wesley Fishel, editor of the journal, or any of the other luminaries in the Vietnamese Center please confirm or deny this report? In Prof. Phan Thanh Chau the latest resignation in a long and growing list of men who wished to have nothing to do with the Vietnamese Center?"

Varied groups support march on Washington

To the Daily Egyptian:

This Saturday, April 30, may be the most important day in the history of the antiwar movement. The forces that have forged the alliance for April 30 represent the broadest and most diverse base of support that the peace movement has ever had. For the first time trade unions, students, men, women, black and brown peoples and all who love peace are combining their strength and numbers in opposition to the way. This action is endorsed by Senators Hartke, Hart, McGovern, Gravel, Tunney and Muskie and 17 members of Congress. Also leading support are H.A.E. West Coast CAP Conference of the UAW. The National Alliance of Postal and Federal Employees, as well as over 2,000 organizations and key individuals.

Nixon has shown, through his actions concerning Lt. Calley, that he is responsive to massive outrages from the American people. This weekend affords us an opportunity to make our voices heard. With the support of our student government, husans are leaving SIU today and tomorrow for Washington. All peace loving people from Carbondale should be on those buses. As Mrs. Martin Luther King Jr. said, "I still believe that the power to bring about positive, lasting change rests with the people. I will be with you on April 24 in Washington." You be with us, too. March on Washington April 30. Bring all the GI's home now.

For information call the Student Government Activities Council office at 433-2772 or call 349-6241 and ask for Bill.

Both sides suggest grand jury changes

Editor's Note: This is the last of a series of articles on the pros and cons of the nation's county grand jury system.

By Frank Macumber

Copley News Service

The former of a 1979 California county grand jury which handled 360 felony cases in addition to its government-watchdog duties says there is an urgent need for a two-jury system.

G. W. Todd, a retired San Diego sports goods dealer who headed the grand jury last year when it indicted eight public officials and a businessman on conspiracy and bribe charges and gained national attention, contends there are other procedural "bugs" in the system which need cleaning out. But he concedes the history of efforts to change the system in a major way is "one in a large city one grand jury simply can't do the job well."

Todd asserted in an interview, "What is needed is one jury of experts, or people who at least know something of local government, so that when they investigate the county assessor's or treasurer's office, for example, they will know what to look for."

The average layman just can't do the job, even if the records are readily opened to investigation.

Expertise helps jurors

Todd recalls that an ex-Federal Bureau of Investigation agent on the 1976 San Diego grand jury was able to do a creditable job of probing into jail and prison-home conditions because of his law enforcement background.

An earlier grand jury foreman, Frank W. Sefried, remembers his jury discovered that a concrete company was failing to bring its product up to state building code standards only because the jury member had a wide knowledge of the concrete business.

A second jury whose chief duty would be to handle crimes against children would have no more trouble with its backgrounds might be. But the jury has a legal adviser to guide it in criminal cases, he adds.

The typical county grand jury seems to draw more criticism from a practice it is bound by law to follow—the hearing the accused testify during secret hearings—according to Todd.

Civil liberties groups object

Civil liberties groups constantly attack the grand jury, and their refusal to allow an accused to testify is a violation of constitutional rights.

However, Todd explains, the law in California and in many other states rejects this contention.

"If the accused were allowed to testify along with prosecution witnesses," he says, "the secret hearing then would become a stanchmare or secret trial. The accused is protected by secrecy during the grand jury proceedings. If the jury votes not to indict, then the accused has suffered no damage through public disclosure of his charges."

"If there is sufficient cause to issue an indictment, it requires a majority of the grand jury, not a prima facie court hearing, prevents additional court congestion and saves the taxpayers money."

Moreover, if the district attorney issues a complaint against a person to all jury, the complaint becomes public property whether the accused later is found guilty or acquitted.

The New York University Law Review, discussing grand jury rules in New York that the State Supreme Court abandoned a rule requiring "compliant evidence in support an an accused...

"It cited the traditional independence of the old English system. A complaint is not sufficient to justify an arrest. However, the complaint is prima facie evidence that the accused had committed a crime..."

People should testify against code

To the Daily Egyptian

It is the belief of the Southern Illinois Peace Committee that society has a right to Write a Community Conduct Code represents a clear danger to the fundamental freedoms of students, faculty and community members. The committee has made many rules which are oppressive and not consistent with the Constitution. But, because some of the rules were vague or imprecisely worded, they have not always been able to make them stick.

The charge of the behavior code committee is to very precisely codify every aspect of the lives of students and some faculty. In so doing, it will be called to assess what is "normal" or "unnatural behavior and practice."

The committee's activities are that the code will apply to everyone, including the Board of Trustees and the staff. It is highly bizarre that a committee has evidenced no intention of making the police abide by the rules that forbids guns on campus or to force them to cease their harassment of students. And since the Board, by law, has final power in making and enforcing laws and determining sanctions for offenders, the one feeble clause in the tentative code that relates to conflict of interest means nothing in terms of taking actions against those Board members who have flagrant confiddisclosures.

Although the Board and the police (probably the two most disruptive groups on campus) will not be substantially affected, the student body and faculty—particularly those called dissenters—will be. With the conflict of interest member, who dare be a<br>criticize the University (Gardiner, Allen) can be fired easily. Non students who are not in good graces (Gardiner can easily be deserted. Students who demand change in the University (ISCU, SIPC) or be fired readily. In short, the code will not be stabilized by shifting freedom of speech and action and expelling unreasonable faculty and student membership. It is all that at least two of the committee members, Ed Hammond and Wilber Moshen, have been trying to do along.

The problem raised by the existence of the committee does not merely pertain to the individuals

Hom's remarks "abused," and said the indictment of Hom and the other eight accused was handled solely by the district attorney's office.

Hom, operator of a wholesale and trucking firm, believes the grand jury system should be changed. The grand jury should have its own legal adviser, independent of the district attorney, he says. "In our cases, the jury was guided by the district attorney, and it was his recommendations which guided the on the indictments."

Rendino also thinks that when a grand jury issues a majority report on which it bases its reasons for returning indictments or refusing to do so, a minority report should be included in the record. He says he never looks at any such report. "Sum up its own history," Hom says. "I have lost some people, but I have won some people, too. But the past majority, I believe, in the future will judge on how I stand on political issues rather than on what has gone on before."

San Diego mayor bit hit

San Diego Mayor Frank Curran, another indicted on the conspiracy and bribe charges but later acquitted on all counts, makes no secret of his bitterness toward the grand jury. While he emphasizes he is not a lawyer and his observations are those of a layman and a long time public official, Curran observes.

"The grand jury dealt a great disservice to the community in returning the indictments. The accused has misconduct opportunity to appear before the grand jury before he was returned a record. Their side (the accused) was not known until after they were arrested."

The procedure was adverse to the concept of justice in America that a man is considered innocent until proven guilty. The policy reveals the procedure.

The mayor's understanding of the California grand jury system is that it is to protect the innocent victim by hearing evidence in secret against the accused.

"In politics, however, it has worked just the opposite in this case."

Behavioral code is not what SIU needs

To the Daily Egyptian

I was disturbed to learn about the committee which is attempting to draw up behavioral codes. It seems to me that there are now too many, not too few, regulations telling students what they can and cannot do. We do not need new ways for the University to tell us how to live our lives.

It was claimed that the new codes will refer not only to students, but to faculty, administration, and even the Board of Trustees. Perhaps I am naive, but this seems like an obvious trick when the trustees have the ultimate power to hire and fire people. Isn't this the way the student government has no real power and can only ask Trustee Martin Van Brown to do for them then simply ignores? No, it seems to me that the new codes—like all University regulations—are meant to be used only against students and against a few dissenting faculty members.

I heard that the chairman of the conduct code committee is Prof. Washy of the government department, and to the benefit of the ALCU. The non-Presidential students in the SIPC feel that Prof. Washy was the main reason that it was decided to censure and discipline them. Fortunately, the ALCU did not seem to go along with his efforts to censure the students, possibly for a reason in bringing feelings about more codes and regulations.

I am not an expert in analyzing the rule which will affect everyone." by one member of the committee only verifies my feelings. That accumulation of regulations is not going to come from them on, you will only need a permit in

Agenda Item No. 1: Minutes of the meeting of March 8, 1971

The minutes of the March 8, 1971 meeting which had been distributed to all members of the University Senate were approved as written.

AGENDA ITEM 2: Reports of the Executive Committee

a. Governance Committee Proposal

Senator Nielssen presented a proposal for a Governance Committee to be composed of three members from the faculty sector. Two of the members will be named previously to all members of the University Senate were approved as written.

b. Agenda and Minutes

The President urged that agenda items be submitted to a member of the Agenda Committee (William Simone, Department of Economics and Dr. Frank Seikens, Department of Political Science and Administration, Clarence Dougherty, University Center, Donald Gladstone, Property Control Park Place South, Robert McGrath, Office of Admissions and Records, Weston National Business Research Bureau, Gila Waters, School of Business) no later than one week prior to the meeting of the University Senate.

Mr. Simeone also indicated that copies of the minutes will be prepared and circulated to the members of the Senate as soon as possible following the meeting. They will be presented to the membership for approval. The minutes will be published in the Daily Egyptian after approval so that the entire University can be informed.

c. Joint Standing Committee

Donald Gladston called attention to Page 6 of the Agenda Item Proposal, which dealt with makeup of the Joint Standing Committee. It was indicated that the Executive Committee is considering the makeup of these committees. They will be established as early as possible.

Agenda Item No. 3: Change in the date of summer commencement

Chancellor Robert G. Laver moved that the date of the summer commencement be changed from Saturday, September 4 to Friday, September 3 in response to a question concerning the request for change. Chancellor Laver indicated that since this was Labor Day weekend, it was the intent to give all persons involved a longer weekend vacation. The motion was seconded and carried unanimously.

Agenda Item No. 4: Report of ad hoc committee on bylaws

John Baker indicated that the committee had had no opportunity to meet and that they planned to get together after the meeting. They will report at the next meeting of the University Senate.

Agenda Item No. 5: Other Business

Chancellor Laver announced that the Screening Committee has met twice and that Don Eldred selected chairman of the committee or the occasion of its last meeting expressed interest in having the Governance Committee chosen soon. The Screening Committee believes that it should meet with the Governance Committee to discuss their respective roles.

The President announced that Paul G. Schoen and Harold Dysc have been chosen as representatives of the Alumni Association. He introduced Mr. Schoen, who was in attendance.

Agenda Item No. 6: Statement on the University Senate

David Kenney moved that the University Senate meet next on Monday, April 19, at 7:00 p.m. on the third Floor of the University Center. His motion was seconded by David Thomas. Mr. Simone asked that agenda items to be submitted to members of the Executive Committee by noon on Wednesday afternoon for the meeting on April 19.

The meeting adjourned at approximately 5:00 p.m.

Respectfully submitted,

William E. Simone, President
Billie J. Prince, Secretary
Weekend on a canoe
is fun for city folk

By Robert W. Smith
Student Writer

Swift, steadily and strong currents guided the way as the city dwellers
roared down the rapids of the spring-fed Missouri
Eleven Point River.

Sawing, snickering storks cried
out as the river banks. And nearby
are hungry canoes enjoying a weekend away from
the city.

For seven years, Tony McDaniell and Paul Tegmeyer, both Carbon

SIU zoologist
nets most news

By Pete Brown
University News Service

The annual called the salamander is a strange creature, seemingly
more myth than most flesh and
and blood.

Winter workmen warm their hands over salamanders. They must have a
perception to see salamanders, fireide
dreamers of the cold with salamanders.

The cool salamander's hatred of
newfangled things with scales
probably got associated with fire when some old-time European
caught a tail rag on the grates
and a create or two popped out of
the fire. They then had laberatizing,
and only wanted to get the blame
out of there. But the myth of a fire-
resistant beast began to permeate.

In fact, it is an amphibian that
has been with us since a laberatizing in
work for 100 years or more. The Salamander knows as well as you
are the salamander's way of
being in Southern Illinois and as they went in Mexico. Some
of the parents were bought from
fisherwmen to use in research. Depend-
ing on baggage unreligious. These
were owned by Brandon and com-
pastry.

Out of this, he has now produced
14 different hybrid combinations.

He is on the threshold of some
revealing insights into the spectac-
ular variety in species that occurs in a
small geographic check in Mexico.

Some of the salamanders trans-
formed themselves from water
creatures to terrestrial ones. They
live part of their lives underwater,
breathing through filamentous gills
that trail behind their heads, like
strands of water-weeds. Then
are active above the water's surface.

London designers utilize skin

By Julie Flint
Associated Press Writer

LONDON (AP) — Grin and bare it.

That's the message from eight of London's top ready-to-wear designers who recently gave a capsule showing of their autumn fantasies.

Prancing, dancing models with more hair than curves paraded through one of London's smartest boutiques which showed almost as much bottoms as leg, and in plunge-neck evening dresses which left precious little to the imagination.

Star of the show, the aperitif of London's fashion fare week, was Mary Quant—the granary of the King's Road Clan. The pioneer of the mini voted strongly for shorts, worn high on the bottoms with frilly braces and bright orange stockings, or creeping down the leg with sandy, smoker-type tops.

Most revealing was a green and purple outfit teaming with shimmering stripes, combining a boned mock mock neck with skinny shorts, and a院子 blouse-top whose arms holes but came to grips near the bust.

Equally sporty were the trousers and tops featured by Rosemist ema.

Her message: Get knitted.

Trousers were squarer and shorter than ever before, teamed with layers of sweaters splashed with color.

A new member of the group was Mr. Freedom, the fashion joker who put Chelsea's chocks in hot pants years ago.

Designer Tommy Roberts dazzled spectators with wildly contrasting satins and shorts, worn with mob caps, dotty blouses and sailor collars.

Oscar Clark, the King's Road designer who launched his first Paris collection Monday, cold-shouldered shorts for knee-length trousers. He concentrated on soft fabrics, sprinkled with fragile flower prints by his wife, Celia Bartwell, and gently ruffled into dark frills at the edges.

Buddhism seen as mediator

By Sue Ball
Daily Egyptian Staff Writer

National officials from China, economic welfare and social justice have characterized periods of Buddhist influence in Vietnam and may provide hope for settlement of the present Vietnamese conflict, suggested Van Van Mao, member of the Vietnamese Senate.

Having led the Buddhist opposition to the Dien Bien Phu, a key figure in the Senate, representing a nonviolent opposition stance toward the government. He spoke to nearly 40 persons Tuesday in the Whalen Education Building on "The Role of Buddhism in Vietnamese Law and Society.

Van Van Mao, who has dealt mainly with the ethical and philosophical principles of Buddhism, with little mention of the ramifications of Buddhism on the current political situation.

Buddhism differs essentially from most religions in that it is no such a philosophy as a religion. Man said.

The lack of study of the impact of Buddhism on law and society in regrettably. Man said, since a quarter of the world's population practices this religion.

"In Vietnam, as well as in other Buddhist countries, it is unavoidable that the ways of life, customs and social habits, and political, economic and legal institutions should be influenced by religion practiced by the majority of the population for centuries," he said.

If all people were to fully abide by the ideal of self-discipline and self-control, Man said, there would be no necessity for external controls through law and punishment.

Based on the Buddhist belief that human nature is inherently good and capable of perfection, Man said, Buddhism has proposed to its followers a new policy, based not on authority punishment and doxum, but inspired from charity, compassion and equal treatment.

The example the ruler presents to his people embodying Buddhist virtues is the best inspiration for their behavior, Man said.

The spirit of social justice in Buddhist teachings has led many politicians to wrongly believe that Buddhism is essentially socialistic,

Man said.

Buddhism has not engaged in any revolution, but he has revolutionary aspects manifested by transforming the hearts and minds of men," he explained.

Man said the persistance of this silent revolution reduces the characterization of Buddhism as preparing no attention to life in this world.

CHICAGO:-- Fear of the country's largest can manufacturing firms joined a nationwide advertising campaign to assure canned goods will soon return to store shelves and converting the field fight by recovering cans and converting them for reuse.

The American Can Company, and Keck's, Inc., companies said they will participate in the battle against the would-be canners and converting them for reuse.

The canned goods manufacturers said it produces 70 billion containers a year.

Approximate prices paid for returnable containers were based on $10 a ton for lead cans and $8 a ton for aluminum cans.

"Canning that litter is caused by persons and not products, an industry survey showed.

Soft drink and beer cans and hot dogs make up 15.2 per cent of litter on primary highways. Every month a highway mile is cleaned with 43 of these containers.

Four of six containers are disposed of by persons who consume 96 per cent of the beverages involved in private properties.

Environmentalists are preparing to use the same strategies against the growing problem of plastic waste, while some companies have been recycling plastic waste for years.

Material making up solid waste litter breaks down to 30 percent paper, 10 percent cans, 10 percent glass, 5 percent wood, rags, plastics, 4 percent metal and 2 percent glass.

With drinking moving from the soda fountain and the inna the bottom of a soft drink, the in the last 10 years.

The average residential battle since 40 trips before being last or destroyed since introduction of non-returnable containers, the average number of trips a ton.

Officials exchange election complaints

By David Mahas
Daily Egyptian Staff Writer

Bill Colp, publisher of the campaign slogan The Query, said Wednesday that he may file a complaint against City Councilmen- elect George Kamen and Clark Vineyard in Jackson County circuit court alleging that campaign literature supporting Kamen and Vineyard did not carry adequate identification as to its source.

A complaint was filed Tuesday in circuit court by John Baker, Mayors- elect Neal Ecker's campaign chairman, against Colp on the same grounds, alleging that The Query did not carry adequate identification.

A summons was to be served as Colp, returnable by April 21.

If Colp said Wednesday that he had not yet received the summons.

He said that "depending on what I'm served, I may have to do the same the other way.

Neither Kamen nor Vineyard could be reached Wednesday for comment.

Baker said Wednesday that he did not file the complaint against Colp for revenge. He said that is only trying to assure fair campaign practices in future elections.

The law ought to be followed so that the public can know the sources of their information, Baker said. He added that all of Ecker's campaign literature had the name of Dr, Allen Bennett, Ecker's treasurer, on it. Baker said he filed the complaint against Colp as a public citizen, but with Ecker's knowledge.

Baker said he has received no other complaints being filed at this time. He said that Ecker is only interested in winning the community, not revenge, so that he can be an effective mayor.

Mayor David Koon, who received Wednesday from a spoiling campaigner in Bushnell, said of the election outcome. "To say that I am pleased would be the understatement of the year. The people of Carbondale got a real bargain. They elected three of the finest men in Carbondale to lead city government for the next four years.

Chapter names

Boss of Year

An SIU administrator received the Boss of the Year Award of the Carbondale chapter of the National Secretaries' Association Wednesday night.

Barb L. DeWane, assistant dean of the college of education, received the award at a Boss of the Year banquet sponsored by the local chapter in conjunction with National Secretaries Association Week.

The banquet was held at the Carbondale Holiday Inn.

Shalom Society

to present film

The Shalom Society, an SIU Jewish student group, will present "Seven Days in June," a documentary film on the Israeli-Egyptian war, at 7:30 Thursday in Davis Auditorium.

Admission to the film is free.

At Lundstrom's, a member of the Shalom Society, said the film is being shown as a part of the film festival the group is sponsoring present different aspects of Israel.

Germany crime increase

BERLIN (AP) -- More than 175,000 crimes were reported in West Berlin last year, more than in 1988, according to a city government official.

"I am pleased would be the understatement of the year. The people of Carbondale got a real bargain. They elected three of the finest men in Carbondale to lead city government for the next four years.

President asks for aid revamp
WASHINGTON (AP) — President Nixon asked Congress for a $1.2-billion aid program to help countries in Asia, Africa and Latin America.

The aid request is part of a broader economic strategy that the White House says is aimed at promoting world trade and economic development.

The aid would be used to finance the construction of roads, bridges, schools and other projects in recipient countries.

The aid is expected to be approved by Congress and signed into law this week.

Economist argues workers' plight
WASHINGTON (AP) — The President has made a strong case for economic development, but the aid will not be enough to solve the problems of the developing world.

The President has been pushing for economic development for several years, but the aid will not be enough to solve the problems of the developing world.

This is because the developing world is not making enough progress on the economic development front.

Order ignored; Vets campout on Mall

WASHINGTON (AP) - A group of Vietnam veterans who occupied and barricaded a Supreme Court building have failed to get a federal judge to back down on a court order to evict the protesters and close the building.

The veterans, who call themselves the "Peaceful Vietnam Veterans Against the War," had set up camp in the building's rotunda to draw attention to their cause and protest the war in Vietnam. They had refused to leave even after the court issued an order to evict them.

The judge, deciding the veterans were not being restrained or denied a constitutional right, ordered them to vacate the building and pay $1 in damages for their actions.

Proposed bonds for anti-pollution called inflationary

SPRINGFIELD, Ill. (AP) - Illinois Senate Democratic leaders Wednesday said Gov. Richard J. Daley's proposal to issue $100 million in anti-pollution bonds next year is a "dangerous new contribution to the federal deficit.""It's a waste," said Senate President James W. Reynolds.

The bill, which was introduced in the Senate, is designed to reduce the state's reliance on federal grants to finance anti-pollution projects.

Physiologists to talk on gonads

WASHINGTON (AP) - A group of physiologists will hold a symposium on gonads in March, 1974, to discuss the role of the testes and ovaries in the reproductive process.

The symposium, which will be held in conjunction with the National Academy of Sciences, will feature a panel of experts from around the world.

The symposium is being funded by a $5,000 grant from the National Academy of Sciences and the International Biological Program.
Greening of campus explained

By Donna Earwood
Stidham Writer

Grass comes to 26 acres of SU

That's a square yard. Of course, the grass referred to is the sodded kind.

During spring quarter, 12 acres will be covered in the green stuff, according to Joe Waddows, superintendant of buildings and grounds. Included in the project areas are the grounds around Skyrack, the new museum and the communications wing.

The 4 to 4½ acre area where Old Main once stood is currently being made grassy by two methods sodding and seeding.

Sodding is the process by which instant grass appears on campus.

Waddows said and is grown year round at the University farms located south of Carbondale on McCaffrey Road.

Crows feet grass of grass with enough soil remaining to cover the roots. The sod then rolled up and transplanted to the needed area. After laying the sod, the crews wet down the grass as the roots can take hold. A contractor was called in to charge $80 a square yard for sodding, so the University saves 50 cents a square yard by growing its own.

Students in search of the shortest route to classes have added to the problem of ground maintenance. As students trudge across the lawn, "past tracks" form in the grass. In the past, sidewalks have been placed where the grass is thinner according to Waddows.

Now as many "past tracks" are appearing that a contractor in the past tried to prevent SU from becoming a concrete campus. Waddows said the problem becomes especially bad when a new building is completed.

To keep the grounds in top condition, the physical plant services 30 to 40 full-time employees. If the contractors are not up to date on the services received in a recent letter from the school, Waddows said the campus will have to help keep the grounds in good shape.

Doctors helped, harmed

Abortion ruling approved

WASHINGTON (AP) - The Supreme Court approved Wednesday an abortion law passed by the state of Arkansas which permits doctors who perform abortions, but who still hold religious objections for moral-health reasons.

The 5-2 ruling upheld the 1980 abortion law for the District of Columbia against challenges that its wording is so vague doctors do not know which operations are permissible and which are not. But by authorizing doctors to protect the "expectant mother's mental health" and by putting the burden on prisons to prove operation is illegal, the Justices gave physicians considerable latitude.

Pentagon defends buying time for ad campaigns

WASHINGTON (AP) - Under attack by congressmen seeking to bar the government from buying radio and television time, the Pentagon defended Wednesday its use of paid broadcast advertising.

As the Army's 15-week $50 million recruiting campaign is in progress, the military said in a lawsuit, the radio and TV ads "are not likely to change the minds of potential recruits." The suit was filed in federal court.

Woolard said the Army's test involves $4 million for TV time, $3 million for radio. $2 million for production. The $50 million for telephone-answering service to handle calls generated by the ads.

"We deeply hope that the stations will continue to make available time, without charge to much to the services to help in their recruiting which is so vital to our national defense," he added.

But he said the task of buying the greatest need to increase volunteer numbers, the Army is facing relatively less well than the other services in hitting public service time.

He estimated that during 1980 the Army got $8 million worth of free radio and TV time by the Air Force $11.5 million. the Navy $9.5 million and the Marine Corps $8 million.

Under questioning by Rep. Lowell Van Voorhis, D-Calif, prime sponsor of the past time aide, Woolard led off by suggesting the test results. But it is too early to tell the effect. The test began March 2.

SUI to get part of $75,000 estate

By University News Services

SUI students will be the beneficiaries of a bequest from the late Edna Cox Mores of Urbana.

Wife of Lloyd Mores, former comptroller and president of the Univer.

SIU president lan. Adams on Thursday.

Mrs. Mores bequested $100 of her estate to the SUI Foundation as a permanent endowment fund to provide scholarships worthy students, according to Kenneth Beardall, president of the SUI Foundation, estate planning director. Pending final sten.

The estate is estimated at approximately $75,000.

The fund is known as the Lloyd and Edna Mores Scholarship Fund.

Carbondale landlord charged with assault

Charges of aggravated assault and battery were filed against Paul Parrish, a Carbondale landlord, following an alleged fight involving himself and a man on the Coalition Against Landlord Abuse (CALA).

The charges were filed Wednesday in Jackson County Justice Attorney Michael R. Richard's office by CALA member Robert Car.

Parrish allegedly attacked following an argument Tueday afternoon in Parrish's office at 102 N.

The incident allegedly occurred when Parrish appeared before three other students met with Parrish to discuss damages they said were caused by.

Parrish allegedly attacked according to an argument Tueday afternoon in Parrish's office at 102 N.

The incident allegedly occurred when Parrish appeared before three other students met with Parrish to discuss damages they said were caused by.

Both Durham and Castle have had recent works accepted in regional competitions, including the Mid.

These bare spots are frequent on the campus landscape at heavily traveled hotspots. Pragmatically these "past tracks" were trails for whichausal souls poured over them. These are more practice has been discontinued. The interest, however, because it preserved a way to turn the green areas into a concrete plan. (photo by Fred Pleuler)

Japanese student talks of world experiences

by Jim Brown
Student Writer

For the first 15 years of his life, SI junior Yami Tars, has experienced more than most people will encounter in their lifetime. Tars, a foreign student from Israel, has already made excursions from the Soviet Union to Africa in 1965. And he has been to some places that he says he will never forget. Tars is an ambassador to those African nations, respectively.

Born in the Israeli city of Be'er Sheva, Tars' life has not been easy. His father, a Jewish, was killed in the 1967 war and his mother, a Arab, was killed in the 1968 war. Tars has been to the Soviet Union, the United States, and the Middle East.

Although Tars' youth were spent on a ship as a sailor Tars and his crew made excursions from the western coast of Africa to the Soviet Union. Tars has attended some of the world's finest schools and universities.

Tars is a student at Eckert's and has often been asked about his experiences in the Middle East. He has always been honest and forthcoming with his answers. Tars' answers are always insightful and thought-provoking. He has been a great inspiration to many people.

Tars has always been true to his word. He has always been a man of his word. He has always been a model student. He has always been a leader. He has always been a man of integrity. He has always been a man of honor. He has always been a man of excellence. He has always been a man of distinction.

Tars has always been a man of character. He has always been a man of courage. He has always been a man of conviction. He has always been a man of principle. He has always been a man of purpose. He has always been a man of passion. He has always been a man of dedication. He has always been a man of determination. He has always been a man of determination. He has always been a man of determination.

Tars has always been a man of excellence. He has always been a man of distinction. He has always been a man of honor. He has always been a man of integrity. He has always been a man of integrity. He has always been a man of integrity.

Tars has always been a man of character. He has always been a man of courage. He has always been a man of conviction. He has always been a man of principle. He has always been a man of purpose. Officials give reactions to Court's bus ruling

By Ron Kaye
Associated Press Writer

Politicians, school officials and civil rights lawyers reacted to the Supreme Court decision on school busing in much the same manner as they have to past desegregation orders in the past.

Supporters of school desegregation called the unanimous decision a landmark. Opponents said education would be harmed.

And Gov. Lurleen Wallace of Virginia, a moderate Republican, said, "Virginia will abide by the law of the land."

"I am optimistic about the future of our public schools because of the way the children will flourish, in closing my own, have responded to integration," he said. Three of Alabama's four children attend integrated schools where desegregation has been accomplished in part by busing.

The Supreme Court, in an opinion written by Chief Justice Warren Burger, said courts may order busing as one means of eliminating segregated schools.

The Nixon administration had opposed massive forced busing, but there was no immediate comment on the ruling from the White House. The President has said he favors assigning pupils to the schools nearest their homes.

The Supreme Court ruling directly affected Charlotte-Mecklenburg City, N.C., Clarke County, Ga., and Mobile County, Ala.

"The effect will likely be the destruction of many public school systems in our country," said Alabama Lt. Gov. Jere Beasley.

"The people of America will reject this latest attempt to destroy the system of education that many non-Germans believe is best in the world." -

Non-German births

in Germany

WIESBADEN, Germany (AP) - Almost 30,000 infants born in West Germany during 1987 had non-German parents, the Federal Statistics Office reports. In 1980 only 4,800 children were born to German and non-German parents. The increase has been marked since the time period covered by the schedule.

From the top

The view from the top—the tenth floor of Morris Library—is apparently conducive to studying. At least it seems that way to David McCann, a senior from Metamora, Ill., majoring in zoology.

Low grades result from pressure

By Hinda Sotzing
Capet News Service

Examinations are an important part of the education process. Repeated arguments for or against the merits of exams, students must take and should perform well on them. Some exams are used as a measure of achievement and success, the realistic student should make every effort to improve his scores. This involves more than just studying and knowing the material being tested. There are many good students who constantly score low on tests.

One cause of low test scores is related to emotional or physical factors. The student who is afraid of an exam becomes tense and sometimes panicked. At the exam be becomes confused, forgets information and may even develop physical symptoms such as stomach pains, nausea, headache, etc. The result is a poor score.

What can be done to prevent such extensive upset? The problem results from pressure to attain high grades. This pressure may be exerted by parents or teachers who overemphasize perfection. If this is the case, the cure is a dosage. The pressure may also be exerted by the student himself. In this situation, professional guidance is helpful.

Parents can help, in either ease, by using their influence to provide a relaxed atmosphere at home. Every effort should be used to show the child that he is loved and accepted as an individual regardless of school success. This doesn't mean encouraging bad or poor study habits. It does mean less stress upon grades and the Child upon the importance of non-school activities and the significance of a common belief. For good work can be a factor in producing perfection. Another major cause of low test scores is inefficient study methods. Studying should be well organized. Careful planning saves time and produces superior results. A study schedule should be written down, making sure that sufficient time is available for each subject. Some estimation may be made extra time should be included. A place should be planned for the study and entertainment. This will depend

This involves more than just studying and knowing the material being tested. There are many good students who constantly score low on tests.

One cause of low test scores is related to emotional or physical factors. The student who is afraid of an exam becomes tense and sometimes panicked. At the exam be becomes confused, forgets information and may even develop physical symptoms such as stomach pains, nausea, head_hal. etc. The result is a poor score.

What can be done to prevent such extensive upset? The problem results from pressure to attain high grades. This pressure may be exerted by parents or teachers who overemphasize perfection. If this is the case, the cure is a dosage. The pressure may also be exerted by the student himself. In this situation, professional guidance is helpful.

Parents can help, in either ease, by using their influence to provide a relaxed atmosphere at home. Every effort should be used to show the child that he is loved and accepted as an individual regardless of school success. This doesn't mean encouraging bad or poor study habits. It does mean less stress upon grades and the Child upon the importance of non-school activities and the significance of a common belief. For good work can be a factor in producing perfection. Another major cause of low test scores is inefficient study methods. Studying should be well organized. Careful planning saves time and produces superior results. A study schedule should be written down, making sure that sufficient time is available for each subject. Some estimation may be made extra time should be included. A place should be planned for the study and entertainment. This will depend

Examinations are an important part of the education process. Repeated arguments for or against the merits of exams, students must take and should perform well on them. Some exams are used as a measure of achievement and success, the realistic student should make every effort to improve his scores. This involves more than just studying and knowing the material being tested. There are many good students who constantly score low on tests.

State-wide program

SIU aid director proposes work-study plan

Frank C. Adams, director of the Student Financial Aid and Financial Assistance office, IRUE approved technology program change

The unit now becomes the School of Technology with four and five component departments. They include computer, information systems, chemical, civil, computer, mechanical, engineering science and materials, occupational health, and industrial technology.

IBHE approves technology program change

Frank C. Adams

By University News Services

Northern Illinois University's new School of Technology will be one of the first areas to be state colleges and universities tightened their belts due to budget cuts.

Under the program, a student would be allowed to work a maximum of 15 hours a week and would be paid the normal student wage of the institution or $2.88 per hour, whichever is lower.

A scholarship, or grant recipient who applied for work would be required to accept whatever student employment the school would offer or risk the opportunity to work.

Adams emphasized student employment as an opportunity, not an obligation, and the grant or scholarship recipients would not be required to work to retain their aid.

The plan, Adams said, would benefit the increasing number of middle-class families who are squeezed between heavy taxes and rising tuition costs. He said these families find themselves supporting educational programs for low-income families but have few financial aid opportunities themselves.

Private colleges and universities would be able to pay student workers from state funds and direct institutional funds now being used to other purposes.

In a letter to Gilbert, ISS Associate Director Lee Noel said Adams' proposal should become a priority item in the 1984 ISHE financial aid study planned for late this year. It is not clear if Adams was responding to the legislative session.

Chairman of the newly-formed departments have yet to be confirmed by the SIU Board.

Students to tour, learn in Europe

By University News Service

A class of students from 14 states will board a chartered jet in St. Louis, June 21 for a trip into the past—a eight-week sojourn through the history of chemistry.

Their destination will be seven European countries where the scientific discoveries of chemistry—and birthplace of Colorado statehood—is made. England, Scotland, France, Germany, Scandinavia, Belgium and Italy are on the agenda.

The 16 travelers, three chemistry students or chemistry teachers-professors, will try to provide firsthand glimpses of historic European laboratories and production, hours of history through credits from SUI.

It is a program called "Evolution of Modern Chemistry" and intervenes with the summer session at SUI. Chemistry professor John Wilson, who is codirector of the program, is being careful to include students concerned with chemistry.

Their destination will be seven European countries where the scientific discoveries of chemistry—and birthplace of Colorado statehood—is made. England, Scotland, France, Germany, Scandinavia, Belgium and Italy are on the agenda.

The 16 travelers, three chemistry students or chemistry teachers-professors, will try to provide firsthand glimpses of historic European laboratories and production, hours of history through credits from SUI.

It is a program called "Evolution of Modern Chemistry" and intervenes with the summer session at SUI. Chemistry professor John Wilson, who is codirector of the program, is being careful to include students concerned with chemistry.

North Dakota passed what its officials say is the nation's first noise pollution statute in the nation. The law covers noise from farm machinery to rock bands and provides a penalty of up to $1,000 for offenders.

Gov. Donald L. Guy, who proposed the law, closed hearing into farmers "Engine manufacturers have handicapped the public that a high noise level is equal to power," Guy said.

The Illinois General Assembly is considering enacting the attorney general to act against noise polluters.

South Dakota lowered from 100 to 75 the number of citizens needed to initiate an investigation of alleged air and water polluters. The lawmakers rejected, however, a ban on non-returnable beverage containers.

The ban-the-bottle fight is continuing in other states. Michigan may place a 1-cent deposit on all beer and pop containers and outline nonreturnables. Wisconsin is considering a five-cent deposit on beverage containers.

bill, forcing it would force business to spend a lot of money in legal fees and place businesses at the whim of "environmentalists." But few bills are gaining approval.

After a thorough state laws on the nation's growing pollution problems have been enacted to combat pollution, but few bills are gaining approval.

Some of the new laws have been enacted as a result of the environmental lobby. But others have been forced upon some industries from other industries and businesses which claim they'll be injured by the standards at the cost of meeting the new standards is too high.

Among the 40 legislatures meeting this year, antipollution laws already have been passed by Arizona, Colorado, Kansas, Maryland, Nevada, New Mexico, North Carolina, Pennsylvania, South Dakota, Utah and West Virginia.

The Department of Environmental Resources was created in Pennsylvania to combate the state's efforts. Eight other states—Alabama, Arkansas, Arizona, Illinois, Massachusetts, New Mexico, Rhode Island, and Wisconsin—are considering similar streamline rulemaking regulations.

Pennsylvania Rep John F. Landon, a leading proponent of environmental legislation, said he was satisfied that with the new state department.

"We're getting tougher enforcement," said Landon, executive director of the Rhode Island Audubon Society, agreed that "We need a lot of the information be added. Our laws need to be strengthened."

"I'm happy with the laws, however, they say enough already has been done legislatively by a number of states, especially the 75th anniversary of Earth Day this way there seems to be no letup in these efforts" said Landon.

Larry Kindt of the California State Department of Resources, "We're moving fast and fast without knowing what's been done. There's no tough problems have already been legislated. So you've got guys state legislators around the country for new bills to compete.

It is one of a dozen European travel-study courses being offered this summer by SUI's University Extension Services.

Members of the chemistry history class expect to spend $1,200 for the trip, but Watzi says it's a steal. Almost all of the countries on the itinerary have responded to Watzi's notices by promising free lectures, guided tours and even money.

New group studies criminal justice forms

By Larry Bailey
DailyEgyptian Staff Writer

The Administration of Justice Association, a newly formed group on campus, is designed to promote more communication between faculty, staff and students on the study of criminal justice systems.

Dave Daff, publicity chairman for the group, said Tuesday that the association works within SIU's Department of the Administration of Justice.

According to Daff, the association is composed of about 40 graduate and undergraduate students who have an interest in the criminal justice system. Daff said that the association will try to bring speakers on campus who are experts in some field of criminal justice.

There are about 15 undergraduates participating in the association at the present time. Daff said, "However, we would like to have more undergraduate participation in the two-month-old association.

Daff said participation in the group is not limited to students from the Administration of Justice Department or the Center for the Study of Crime Deterrence and Corrections.

Art professor speaks in Texas

By University News Services

Ron E. Abrahamson, assistant professor of art at SIU, spoke at the recent National Art Education Association Conference in Dallas, Texas.

Abrahamson and Leonore High, coordinator of the Southern Illinois Instructional Television Consortium, headquartered at SIU, participated in a National Instructional Television Consortium, which preceded the NAEA conference.

Abrahamson's paper dealt with the conference discussion title, "What the Higher Education Expect Art Supervisors in Community Schools?"

The television consortium was devoted to the development of a series of art education films for upper elementary and junior high school grade levels in schools lacking special art teachers and art programs.

Do we need to remind God to help us?

No. Because God, divine Love, is always ready to help. What we have to do is pray with an understanding of His love and guiding care.

You will hear some outstanding examples of practical, effective prayer in a talk by John Richard C. Kenyon of The Christian Science Board of Lectureship.

The subject of the talk is "Where Do We Look for Guidance?" It's a refreshing and entirely logical view of prayer.

English program attempts to improve communication

Winter quarter a program aimed at better student-teacher relations was started by members of the Department of English. According to Richard Lawson, director of undergraduate studies in English, the program consists of informal get-togethers between faculty members and students majoring in English.

They meet at individual faculty members' homes on Sunday evenings during the middle six weeks of the quarter.

"It is one way of trying to bridge communications between teachers and 700 students," Lawson said.

A single meeting consists of the host faculty member and his class plus other faculty members and students who wish to attend.

Lawson said the conversation is not limited to classroom subjects.

"We let the conversation go wherever it will," he said. "Members of the department are very approachable during office hours. But this heightens contact between students and teachers in a much more relaxing atmosphere.

Lawson said the informal get-togethers generate more open and frank discussion than is found in the average classroom.

The program allows one group to know why the other group feels the way they do about certain things," Lawson said.

Tennis team visits Murray State

The SIU tennis team begins the 1983 season with a match against Murray State University on Monday. The contest with the Racers will be played at the SIU tennis courts in Carbondale.

Boys bowling tries new
er

The Boys and Girls A bowling league has added something new to its season.

Instead of ranking teams by worst results and high-game totals, the eight-team division will give points to all members of a team after each series. The first place team will receive six points, second place team five points, third place team four points, and so on.

ABAT list with 16 points after the race opened Wednesday. The next team with 14 points followed by Pyramid Four at 13 points, Fighting Irish at 12 points, and the South Side nine at 10 points.

Boys bowling is in a tie with 13 Master and Saval with 12 points at the nine point.

Section B of the Boys and Girls league is following the original team standings.

T. T. was undefeated last week with a 46 roll followed by Oldnist Park with 43 and the Red Carpet with 40.

J-V baseball team
tops Logan J.C., 10-6

SIU's junior-varsity baseball team ran its record to 5-2 by defeating Logan Junior College, 10-6 in a rain-shortened six-inning game.

Things did not start out well for the Salukis as Logan jumped on starter Gary Wallerman for four runs in the first two innings.

The visiting Salukis came back to capture the victory using a seven-run third to take a 9-7 lead.

The big inning began with Vogel's two-out single and Good's hit which put the Salukis in the lead.

Mattings was tagged with two unearned runs and one earned before retiring the side.

Logan scored two runs on three hits in the top of the fourth, but SIU countered with two runs and were challenged by SIU's Ray Bost."
Salukis 20-4 on season, face Indiana State in loop opener

By Fred Weinberg
Daily Egyptian Sports Writer

It's going to be a long time until SIU's baseball team sees home--eight games long.

And the now 20-4 Salukis will have the somewhat dubious honor of leading off all this in one of the loop championship teams this year in the Midwestern Conference.

In the first game of the race against Indiana State in a weekend series at Terre Haute.

"It's always hard to win a series on the road," said SIU pitching coach Harry Gurley in head coach Bob "Hickey" Jones' absence. Jones is in Indianapolis doing some recruiting.

"We'll start Dick Langdon in the Friday game but we haven't really decided who we are going to go with on Saturday."

Julie and Steve Randall have been picking up most of the Saturday doubleheaders and, lately, it can be assumed, they'll make track this weekend.

Murray State just couldn't blow the Salukis off wet stadium track

By Ken Stewart
Daily Egyptian Sports Writer

Pole vaulter Doug Morris walked slowly and hopscotched through the pedestal of the Murray State track. "Check it out," he said.

"It drew Stadium uttering "Boo to 50, 60 to 50."

His team--Murray State--had just lost to the Salukis by that score Tuesday night. Many expected a closer track meet.

After all, the Racers had the fastest mile relay in the country and the third-ranked quarter miler in the world.

Murray State was also undefeated in dual competition as was Southern.

The Salukis took a big lead after taking advantage of Murray State's weak field competition. SIU grabbed every first place in the five events to build up a large enough point spread in case one or two runners were not off the track by a Racer surge.

That surge never took place. Murray State only mustered 10 of running events on the wet all-weather track.

"Sometimes the track is better when it's wet," said Terry Erickson. "When it rains the competition seems to get a feel for the course.

"Erickson came in the second of the Murray State's Tommy Turner in the 440-yard dash.

"Turner is the third-ranked quarter miler in the country and has the ranking in the 440 at the indoor NCAA's last winter."

"I'll bet he'd set a new meet and stadium record.

A wet track didn't cool off the hot in track.

Two stadium records fell and eight records were tied or broken in the Turner's 440 feat.

"Turner was tremendous all the way through the field on the course. Law Harting. the sprinter also won the 220- yard dash and long jump for Murray State's winning mile and 440-yard relay teams.

On the second leg of Dave Hill who was the mile and three mile runs. He 4:53.1 in the mile race.

They missed the guy up front will probably say 'Am I running too fast?' Hill added, "And I will say to myself maybe he's tired, now I can go.

The Salukis will head off to the classic track events, the Drake Relays, Friday and Saturday.

"He who runs the hardest wins in the longer distances," said Hill. "When I ran in the mile runner you off and with this new all-weather track, you won't slip."

"Turner is the third-ranked quarter miler in the country and has the ranking in the 440 at the indoor NCAA's last winter."

The Salukis head for Nashville Tennessee and Vanderbilt University in their only night game of the season April 27.

A series with the Ohio Valley Conference's Western Kentucky and a single game with Evansville dot the schedule before the Salukis come home to greet Illinois State for a three game series May 7-8 in the second conference meeting of the year.

SIU is riding an 11 game winning streak which began in the second game of a doubleheader last April 19 and has continued through critical series with Tulsa and the University of Illinois and a game with Mississippi. The Salukis have yet to lose a game at home this season.

Langdon is 4-1 going into Friday's game and Gurley thinks that it will put the Salukis at an advantage to throw the SIU ace in the first game.

"I think that we get a psychological advantage when we throw our best man in the first game of a series," said Gurley.

Ball State Cardinals after volleyball crown

Views of a national championship above in Midwestern Conference.

Ball State's Cardinals will seek the NCAA volleyball crown this weekend.

If victorious, they will reign over the other 24 schools which have an intercollegiate volleyball program.

Volleyball is an infant sport in the world of intercollegiate competition that is dominated by football and basketball. This weekend's tournament at UCLA will be the second sponsored by the NCAA.

But the infant sport has received a warm reception by the public.

"Football of course, draws our biggest gate and then probably basketball," said Don Shondell, head volleyball coach. "But volleyball is third without any question."

"We average about 2,000 spectators per match and had a high of about 3,000 when we played Ohio State." That's more than Southern draws for baseball.

The Cardinals defeated Ohio State, a fellow member of the Midwestern Intercollegiate Volleyball Conference to earn the NCAA tournament berth.

"Bright future ahead."

Shondell believes volleyball has a bright future as an intercollegiate sport.

"In the past 10 years, I've seen an interest in volleyball from maybe 10 schools in 1965 up to about 75 that were interested in 1970," he said.

"I think we'll be having a breakthrough off these days just from the interest that has been generated in volleyball through the Olympic games."

Shondell said 50,000 to 60,000 people were alive and dead watching the matches in Europe.

While the NCAA lists only 28 schools with intercollegiate volleyball programs, the other 40 to 45 that bring the total to 73 clubs.

The Cardinals run a very ambitious program, including a junior varsity team with its own coach. Including coaches' salaries, the entire program costs $3,000. Not a bad price for support of a potential championship team.

Shondell said he hopes the tournament will be added throughout the Midwestern Conference within five or six years.
