Teaching peace called answer to war

By Phillip Flaviol
Staff Writer

Milton Mapes is waging a war for peace.

Mapes, executive director of the National Peace Academy, said Saturday that the United States and Libya have absolutely no common ground.

"We're waging a war to protect our security," Mapes said.

The academy, which is based in Wheaton, is waging a war to protect the security of our diplomats.

Change in code would expand liquor commission's powers

By Bruce Kirkham
Staff Writer

The Carbondale Liquor Control Commission may soon be empowered to issue fines for violations of the city's liquor code.

The City Council will consider an amendment to the city's liquor code on Monday that would expand the commission's power, which now allows only for suspension or revocation of licenses for violations of the code.

A memo to the council from Mary Ann Middien, assistant city attorney, states that state liquor control laws do not specify the rights of municipalities of less than 500,000 people in imposing fines.

However, Carbondale's status as a home rule municipality should authorize the city to amend the local liquor code, the memo states.

The amendment would specify that fines could not exceed $1,000 for each violation or $10,000 against licensees during the period of a license.

The ordinance would also clarify the liquor code by stating that the city is responsible for code violations by employees of a business.

The council will review a proposal by Fischer-Stein Associates, of Mount Vernon, to implement the Downtown Redevelopment project.

Fischer-Stein Associates and Carbondale were selected by city staff from eight architecture firms that submitted proposals. Funds for design of the buildings have been allocated in the federal highway administration.

The buildings, which will be owned and maintained by ICGR, will replace several railroad buildings located along the railroad tracks between Main and College streets. The building will be constructed near the ICGR yard north of Carbondale.

The city requested proposals from seven Carbondale firms and FGM Inc. of Mount Vernon, designer of the rail and bus passenger station on South Illinois Avenue.

An Administrative Selection Committee selected three firms to be interviewed on the basis of the proposals. Fischer-Stein Associates was selected over Harrison, Jones Architects and FGM Inc.

The council will also consider three items concerning downtown redevelopment.

The home secretary said that investigation into the shooting, which killed Constable Yvonne Fletcher, 25, would continue.

Libya had rejected Britain's demand that police be allowed to search the building for arms and evidence in the shooting.

Once the embassy was evacuated, Brittan said, 'police would be entitled, if they have justification for doing so,' to enter it.

Khudai has warned he could not prevent 'retaliatory action' should British police or troops enter the embassy.
Pope, Christians worldwide celebrate Jesus' resurrection

By the Associated Press

Millions of Christians around the world celebrated the resurrection of Jesus Christ on Easter Sunday, praying in the splendor of the Vatican, among the ancient stones of Jerusalem and before altars in the small churches and great cathedrals of many lands.

Russians baked holy cakes. Hungarians feasted according to traditions centuries old. Poles filled their churches for Mass. And in Paris, church bells pealed across the city, sending flights of pigeons into the shimmering spring skies.

More than 550,000 people attended a Mass celebrated by Pope John Paul II at the Vatican, and he greeted them in 45 languages. Hundreds of thousands more gathered at the foot of a mountain in remote Moira, South Africa, for outdoor Protestant services.

At Canterbury Cathedral, 50 miles east of London, the Rev. Robert Buncie, archbishop of Canterbury, told crowds of thousands that this year's Easter Sunday was special because it followed the Christian belief in the healing energy that followed the destruction of his crucifixion.

Many celebrations used the day to make strong statements.

In the streets of Rio de Janeiro, youngsters clubbed effigies labeled "Mr. Incomplete" and "Mr. Inflation," references to demands for direct presidential elections and protests over economic woes.

In the pope's native Poland, Cardinal Józef Glemp said Mass and praised the determination of high school students who rebelled against attempts by Communist authorities to remove crucifixes from school walls.

Brasilian tradition and the effigy of Judas, the betrayer of Jesus, at Easter time. In the streets of Rio de Janeiro, youngsters clubbed effigies labeled "Mr. Incomplete" and "Mr. Inflation," references to demands for direct presidential elections and protests over economic woes.

PEACE from Page 1

He has said that he avoids public services because of the security requirements, including the use of metal detectors, are an inconvenience to others.

The last Sunday church service he attended was at the demilitarized zone separating South and North Korea, where he talked to U.S. soldiers and an Air Force 14th Air Commando net as reporters and cameramen recorded the scene.

The stop in Hawaii is one of three arranged for the president as he takes the jet-age version of the slow boat to China. He left Washington on Thursday, spent three nights at his ranch northwest of Santa Barbara, Calif., and then headed for Honolulu, where he is spending two nights at a luxurious hotel on a spit of land between the Pacific Ocean and a golf course and mountains.

On Tuesday, the Reagan will fly aboard Air Force One to Guam, crossing the international dateline and arriving Wednesday afternoon. After an overnight stay on the small South Pacific island, they will reach Peking, their primary destination in China at midday Thursday.

The long journey is intended to give the 75-year-old president an opportunity to adjust to the 13-hour time difference between Washington and Peking.

Barbara
War: Tax Resisters should vote for change

CIVIL DISOBEDIENCE where it can have the most effect: in the government pocketbook. That's the tack of the Southern Illinois War Tax Resistance, a group dedicated to protesting the military use of their tax dollars.

A group of the resisters gathered at a letter to the editor. Perhaps Mrs. Nowacki is stating her belief that unmarried people should not indulge in sex, unless they are prepared to have and support a child. That is well and good for her belief, but I don't think we all have to use contraception.

I wish the good folks like Mrs. Nowacki would realize that God gave us all consciences and that we are each personally entitled to exercise our beliefs. Perhaps Mrs. Nowacki is stating her belief that unmarried people should not indulge in sex, unless they are prepared to have and support a child. That is well and good for her belief, but I don't think we all have to use contraception.

I wish the good folks like Mrs. Nowacki would realize that God gave us all consciences and that we are each personally entitled to exercise our beliefs.

Letters

U.S. violating founding principles

Sandiscott's letter to the editor of the Daily Egyptian was such an example. The Daily Egyptian is a national newspaper that prints articles and commentary on current events. It's a great way to keep up with what's going on in the world and to get a different perspective on issues.

Letters to the Editor

Right-to-lifers should let others pick their morals

Steve Kirk stated that people's consciences require them to make a difficult, and crucial decision about whether to have and support children. That is an understandable position, but it is not one that I agree with. I believe in a woman's right to choose, and I think that it is important for women to have the freedom to make choices about their own bodies.

This is a very important issue, and I think that it is important for women to have the freedom to make choices about their own bodies.
Workfare blasted in hearing testimony

By Phillip Fiorini
Staff Writer

Several public aid recipients testified at a public hearing that workfare programs lack real job training or upgrading of work skills, and a Jobs and Loan Project spokesman said the states shouldn't proceed with a program until they have failed miserably everywhere attempted.

Public aid spokesman Vickie Taul, of Pittsburgh, testified that she participated in a G.A. workfare program for five months in the Peoria area before her sister persuaded her to come live with her. "I didn't have any help. I was driven almost to committing crimes to get fed," she said.

Taul said she received $144 a month in benefits and a voucher to help her pay rent, which was $165 a month. She said she lived with her mother, who was a diabetic.

Bill Rader, who has worked in GA workfare for a year, said he has performed "meaningless, dehumanizing work" with no charge to the state and that there has been no effort by the Public Aid Department to place him in a permanent position.

"It doesn't take too much training to push a lawn mower through a ditch or rake leaves out of ditches," Rader said.

Rader, 28, has a wife and two children and said he has had a meaningful job "since Richard Nixon took office." He said he receives about $300 a month through public aid and worker's compensation.

He said there are seven or eight people on public aid in Pennsylvania who work in the program, which is implemented statewide. Usually two or three work at the same time. He said Rader said his work skills have not been evaluated since he entered workfare under the Work Incentive Demonstration program.

Nick Rion, who testified for the Jobless Project, said that a report released by the Legislative Committee on Public Aid in March 1982 shows that workfare has "never had demonstrable success" and recommended that the program not be expanded to AFDC clients.

"It becomes apparent that workfare has been around a long time and has failed miserably everywhere it has been attempted," Rion said.

Rer, who voted for the AFDC expansion, said that there is a difference between the intent of a program and its administration. Rea is on the state Human Services Committee.

U.S. begins charging with plastic

WASHINGTON (AP) — It took three decades to do it, but Uncle Sam finally has a credit card.

Within three years, there are likely to be 200,000,000 federal employees saying "charge it" — to the tune of more than $1 trillion in credit card purchases.

One of those employees, Vice President George Bush, appears to have signed the cover of "Management," the magazine published by the U.S. Office of Personnel Management, which includes an article explaining the use of the cards in its current edition.

With the federal government carrying a debt of $1.5 trillion, a new way to borrow money would appear to be the last thing needed. But this frenzy of credit card use is expected to soar — up to $200 million a year.

The General Services Administration, which is spearheading the credit card conversion, says it will bring procedures for the world's biggest group of travelers into the 20th century.

At any one time, the old Joke goes, there are 20,000 loan singles up in the sky. The tab for all of those airplane trips, restaurant meals and hotel rooms is running over $3.5 billion annually. And it goes up every year.

The GSA had been toying with the idea of a per-traveler benefit with credit cards since they first gained popularity in the 1970s. A test program in the late 1970s resulted in legal obstacles and local legal obstacles always thwarted a changeover.

All of the blame had a common approach — thousands of credit card purchases are of the type of equipment or services which can be done in the name of the government. "You can convince an accountant just how meaningless "value for money" is and you've got a changeover," said Mr. Rader.

In addition, a limited experiment using charge cards issued by travel agencies collapsed of own weight. Administrative costs skyrocketed as the government tried to sort out all the pieces of paper.

"The accretions just went out the window when you mentioned a centralized credit card system," said William F. McDade Jr., the GSA's deputy deputy director. He said Gerald Carmen, convinced that the government would have to pay out the money, would be managed. The government would be forced to pay for the transactions.

"He said, 'Don't tell me why we can do this,'" said McDade. GSA officials came up with a novel approach. Instead of issuing cards in the name of the government, issue each card to the employee, making him responsible for paying the bill. The employee would submit an expense voucher after the trip and get reimbursed.

Six state employees already had submitted the vouchers to account for cash advances, the government would be able to rely on a proven system to keep track of travel expenses.
Morris lauded by former chancellor

By John Stewart
Staff Writer

Former SIU President Delyte Morris, credited for taking SIU from a teachers' college to a major university, was a "humanist, a futurist, a venturist," his former chancellor and vice president for academic affairs at Oklahoma State University, said he was a "global perspective, a humanist, an internationalist, a futurist and a venturist," he said.

MACVICAR'S REMARKS were titled, "The Future to Share," and he praised Morris for his ability to see that the future would be like, and his capacity to create an institution the world would need in the future.

Morris came to SIUC in 1964 after being graduate school dean and vice president for academic affairs at Oklahoma State University. Morris learned of MacVicar from Jack Green, who had been SIUC's vice president for operations, and later introduced him to Delyte Morris at SIUC on a "scouting trip" of the university in the south and Midwest, he said.

Morris provided a private plane to take MacVicar to visit SIUC, and later took him to Kentucky Lake to convince him to join the SIU-C administration. He said Morris was a good salesman and had a way of getting things done.

"MORRIS HAD a way of convincing you that what he wanted you to do was what you really wanted to do. He was an all-pervasive person, and what he wanted was what you ought to get," MacVicar said.

MacVicar, who will retire this year as president of Oregon State University, said he was greatly influenced by Morris' ideas.

Morrin's concepts created a philosophy at SIU-C which continues to this day. Just as Morris the Methodist believed a relationship with deity could produce perfection, he believed that education could change people so they could lead higher, better and nobler lives, MacVicar said.

MORRIS THE HUMANIST "realized the need for a new system for the solution of economic and social problems," and he diversified substantial resources to create and maintain the Library of Living Philosophers, he said. MacVicar said that Morris believed students should have an understanding of philosophy, religion and literature before leaving SIU.

As a humanist Morris was committed to ensuring that SIU was accessible to anyone who wanted a college education, MacVicar said. A decade before it became popular, Morris was using affirmative action to bring a remarkable number of black students to the University, he said.

BY THE 1960s SIU had the largest number of black students of any integrated institution in the nation, perhaps the world. It was a remarkable contribution," MacVicar said.

Morris had an unwavering commitment to what he called "habilitation," or accepting educationally disadvantaged students from a ghetto or small rural school and providing courses to catch them up with their peers. Morris took steps to ensure that admissions standards were not culturally biased or arbitrary.

"It's impossible to talk about Delyte Morris without talking about the future — he was a futurist," MacVicar said. He said he and other SIU administrators in the '60s were sometimes reluctant to follow Morris' lead.

"We didn't have his vision of the future," MacVicar said. "He was always looking beyond the horizon, and some of the things he talked about were tough for us to understand.

He was not building for a decade, he was building for what we were going to need for the next century," he said. Morris also had a global perspective and realized that the earth had finite resources.

Robert MacVicar

Two services match 'em up

Roomie search help offered

By Phil Milano
Staff Writer

With the end of another school year fast approaching, SIU-C students may want a little help seeking roommates for summer and fall.

Two roommate-searching services have sprung up in Carbondale in the past six months, one computer-assisted and one emphasizing the personal touch.

RoomMates, located on West Mill, began service the first of April. Bill and Sal Stacey, who operate out of their home, got the idea for the roommate service after receiving a home computer and line printer as a gift last September.

After developing his computer knowledge and skills, Stacey worked up a roommate characteristics questionnaire along with a searching program to match roommates.

"We recognized the problems our students were having in college," Stacey said. "We really hope to be here today to find someone who's compatible, who they can trust."

The categories on the questionnaire include such items as age, sex, nationality, race, religion, smoker or non-smoker. About 20 of the survey are such categories as sexual preference, musical preference, allergies, pets, transportation and use or non-use of drugs.

"We have enough questions on there that we can be pretty sure of the type of people we're looking for," Stacey said.

Arms cutback called way to boost security

By Phillip Fiorini
Staff Writer

Two nuclear weapon researchers agreed Friday that the United States' national security could be improved by a reduction in its nuclear arsenal.

Alexander De Volpi, a researcher at Chicago's Argonne Laboratory, said that as the United States continues to increase its nuclear weapons, national security decreases "with the propensity to start a nuclear war" with the Soviet Union.

Joe Shapiro, a visiting physicist professor at SIPA from Fordham University in New York, said that people should recognize the distinction between what he called Reagan administration propaganda and reality.

Shapiro and De Volpi participated in a debate sponsored by the Post's Bulletin, titled "Where Do We Go From Here?" kicking off a two-day nuclear arms conference Friday in the Student Center. "The Future of Our Peace," a Nuclear Strategy Conference, was sponsored by the Mid-America Peace Center and other student and community groups.

Shapiro, who supports a united nations disarmament treaty, said that because the United States leads the Soviets in advanced nuclear weaponry, it could reduce its nuclear weapon capacity by about 25 percent without affecting national security.

"The Reagan administration has exploited the idea that in 'high-tech' weaponry, he said, because "it's useful for the defense to exaggerate its strengths and not publicize its weaknesses." Shapiro said the United States could reduce its nuclear weapons as a "tactic, or strategy, to see how the Soviets respond." He said the freeze movement is not based on "a good medium," because it treats both superpowers identically.

"Any-arms control tends to legitimize the arms race," said Shapiro, who said that he has been active in the disarmament movement for 20 years. "And it's being turned over to politicians, who call it a "first step" toward disarmament."

- De Volpi agrees that the United States is ahead of the Soviets in sophisticated nuclear weapons, and said 2nd arms control would decrease the potential for a nuclear war between the two countries. De Volpi is a supporter of a nuclear arms freeze.

"We've got to keep an eye on the objective to bring about peace and not by warfare," said De Volpi. "Arms control won't replace the military defense, but it will significantly reduce the burden on the general welfare and the danger of heading toward nuclear destruction."

Despite the closed nature of the Soviet society, De Volpi claims the United States can trust the Russians to keep their word on treaties promoting arms control. He said reports from the U.S. State Department and the Central Intelligence Agency show that the Soviets have adhered to past nuclear arms treaties with the United States.

"Past treaties represent a point of remarkable success," he said, referring to SALT I and II, which put limitations on single-warhead and submarine-launched missiles. But he added that the United States is moving toward violating the anti-ballistic treaty by considering placing nuclear weapons in outer space.

"The United States should embargo on serials of unilateral actions," De Volpi said, "by halting its anti-ballistic missile system or Star Wars."

WASHINGTON (AP) — Conscience both you and I, only a week after the income tax deadline? Can't forget about that little item you keep from the Army days! Want to help reduce that monster budget deficit? Or just grateful to be living in the United States? If so, the government has a special place for you and your money.

The Treasury Department's bureau of government financial operations handles four special accounts for Americans who want to contribute something extra to the government — or want to clear their conscience about something they should or shouldn't have done regarding the country or government very broadly.

One man confessed he had "manageappropriately" a $5 pal of basting trunks from the military. Two decades later, he sent in $5.80 to cover the cost of the swimming suit plus interest.

The fund to reduce the public debt may be better known because IRS Commissioner Dan Rostenkowski included a message inviting such contributions with this year's tax returns. He noted that all contributions are tax-deductible.

Through April 13, the IRS said, 1,760 of this year's returns included checks totaling $217,145 to erase some of the $1 trillion-plus deficit. The smallest contribution: one cent. The biggest: $40,000.

ROOMMATES from Page 6

putting together," Stacey said. Request cards for questions are posted on large orange bulletin boards in the Student Center, in residence halls and in the Student Center.

RoomMates charges $10. If a roommate is not found, the money is refunded, Stacey said.

Another roommate-finding service in Carbondale is Two's Company. Owner Pat Lingle began taking applications in her home in the early 1980s, before moving into the 300 E. Main St. building in January.

Although she plans to use a computer for assistance in the "bud" future, Lingle said that "solely computer-operated roommate services normally don't work." "I feel you have to have a personal interview in order to learn something about the person and to match roommates," she said, adding that the previous work as a high school teacher and as an intern coordinator for SIC's administration of justice students helped her make a good judge of character.

According to Mrs. Lingle, the business has had a recent surge in activity as students look for summer and fall roommates.

However, she estimated that about half of her clientele were roommates.

Two's Company offers several choices of rooms and locations. Clients fill out an application similar to the RoomMates application, and then Mrs. Lingle interviews them to better determine their preferences. After checking references given on the application and approving the applicant, she begins to match possible roommates.

There is a $10 non-refundable application and reference-checking charge. There is also a "special" roommate agreement which includes a $25 service charge for matching roommates, arranging meetings, and going over applications.

If customers decide before 60 days that they no longer want the service, Mrs. Lingle charges a pro-rated per day charge. The service gives an extra 30 days of free service if no roommate has been found in 60 days.

Visiting artist to give lecture

A lecture on contemporary art in Chicago will be given by William Conger, Chairman of the Department of Art at DePaul University, from 2 to 4 p.m. Tuesday in the University Museum Auditorium.

Conger is a Visiting Artist sponsored by the College of Communications and Fine Arts and is on campus from April 15 through April 30.

Recital scheduled

Steve r.niew, trumpet player, will present a recital at 7 p.m. Tuesday at the Old Baptist Foundation Recital Hall. The recital will be performed by Edward Hoffman, Haisley Stevens and G. Terelli.

High-tech media class to be offered

The College of Communications and Fine Arts will offer a new course this fall titled "Communication, The Arts, and High Technology." The course, to be taught by Keith Sanders, dean of the college, will explore the recent technologies used in the study and practice of communications and the arts. The positive and negative implications of such innovations as satellites, computer graphics, and computer-assisted musical composition will be assessed.

The course will meet from 6:30 to 9 p.m. Thursdays in Communications 180 and will include guest speakers, presentations, and demonstrations from academia and industry. Junior, senior, or graduate standing is required.

— Campus Briefs —

TODD LPVT, graduate student in forestry, will present a seminar titled "Effects of Fire Conversion of Acid Sensitive Soil" at 1 p.m. Tuesday in the Agriculture seminar room.

APPLICATIONS for fieldwork positions in forest research are available at the Recreation Center. Call 336-3011 for more information.

PHIL ROLEN, senior system engineer with IBM, will speak on IBM microcomputer applications from noon to 1 p.m. Tuesday in Fanner 130 and at the regular meeting of the IBM microcomputer Users Group.

CAREER COUNSELING will hold a "Test Anxiety" workshop from 3 to 4 p.m. Tuesday in Woody Hall B142. Test preparation and test taking techniques will be discussed.

JACKSON COUNTY Right to Life group will meet at 7:30 p.m. Monday at the Sallis Logan Public Library, 18th and Walnut streets, Murphysboro. The meeting is open to the public.

SCHEDULING of Student Center rooms, solicitation tables and campus rooms for summer assignments will begin Monday, April 23 in the Student Center Scheduling and Catering Office. For more information call 536-6033.

THE NINTH Annual Design Show will be presented April 23 through 28 in the O'Neil Hall lounge. Opening reception will be at 7 p.m. Monday.

Robots aid in fight against school truancy

CHICAGO (AP) — The days of getting away with classes are over for some Chicago students, as schools have begun keeping track of their truancies.

The robots are automatic telephone answering machines placed in the homes of students who are absent at school. A recorded voice message asks parents to call the school to explain why their child is absent.

Some schools are using the machines because truancy has become a major problem.

State aid is based in part on average daily attendance. When attendance goes up, so does state aid — about $7 per additional student.

And some schools have already paid for themselves.

Stone said the machines are effective in schools with high truancy rates.

For example, attendance at the City of Richmond High School, which has the largest truancy rate, went from 67 percent to 72.6 percent during the study period.

The tracking device, however, does not know who answers the robocall, Stone said. The calling device does not answer any questions, but it does get the message.

In downtown Chicago, the truancy rate doesn't have the power of persuasion.

Family violence totals 7 percent of violent crimes

WASHINGTON (AP) — A Justice Department study released Tuesday found that about 4 percent of all violent crimes committed in the United States are committed by family members.

The study, which was based on a national survey of violent crimes, found that about 4 percent of all violent crimes committed in the United States are committed by family members.

The department's Bureau of Justice Statistics estimated 4,000,000 instances of violence committed by family members, of which about 260,000 were committed by romantic partners.

The bureau said the total represents 7 percent of all violent crimes.

By comparison, strangers were responsible for 9.2 percent of all violent crimes.
Tokyo Ballet a solid group, but not a microchip of dance

By Linda Emmons

Staff Writer

Americans may well be asking themselves if the first American stop for the Tokyo Ballet Group heralds a new wave of the Japanese invasion. This time in lights and feet, instead of Sony's and Hondas.

Dance Review

Rest assured, patriots. The King Crimson and Roxy Music performing at Shryock Auditorium, where the group occupied the fourth floor, was not the most interesting movement in the cultural understanding rather than aesthetic sense. A near capacity audience braved wind, rain, tornado warnings and over-priced tickets for up to $13 to enjoy a night of solid, if not spectacular, dancing.

Choreographers Shigeru Yokoi and Akira Egawa gave the audience a hard task when they set out to blend the themes and movements of ancient Japanese culture with the rigid traditions of Western ballet. The result was a compromise. Of the four pieces performed, the content and character of the first two were Japanese, while the last two were more in the tradition of Western ballet.

The first piece, "Haku," made a rather amusing, at times joyless, counterpoint to the slow, moves of what appeared to be characters in a Kabuki drama, the dancers' body clacking as they moved in a variety of formations.

The difference between Eastern and Western dance traditions was also evident in the dancers' body movements. They violated the Western ballet tradition as they flexed feet, hands, knees and toes concurrently.

The most interesting feature of the dancers was their use of intensity with which it was performed. The dancers executed no flying leaps or spectacular spins, but instead rivetted the audience's attention by concentrating on the beauty and power of the quieter body movements, such as the slow turning of a palm.

The second piece, "Mahbota No Haha," was a satire on a stereotype of the Japanese mother. A stereotype, explained four manager Keith Arsenault, similar to the one of the smothering Italian mama. The piece featured some amusing, at times indiscernible, burlesque by dancer Marco Mikal.

The most traditional composition, "Bakyouka," was the only piece where the entire cast was present. A dance mimed danced to Romanian composer George Enescu's "Phaspe No. 1 in C Minor." The performance, though technically accomplished, was rather joyless, due mainly to the uncomfortable crowding of all but one of the male dancers throughout the entire dance.

By the break in the composition of the night was "Jeanne D'Arc," the portrayal of France's legendary saint through dance. The composition started with a dancer silhouetted against a sky-blue backdrop, and gradually climaxed to Jeanne's imprisonment and burning at the stake, complete with fiery lighting effects.

Saturday's recital was well worth seeing. Let's hope the Tokyo Ballet feels encouraged to visit again.

Crimson still 'king' of its own genre

By Larry Loeveke

King Crimson has created its own genre of music, and the four electronic music wizards that comprise the band proved on Friday night to a crowd of more than 1,000 at Shryock Auditorium that they are not afraid to change.

The chemistry between Robert Fripp, Adrian Belew, Tony Levin and Bill Bruford allows each musician to fully express his talent, as shown by Fripp's sound that no other band has come close to duplicating. The driving force of the group, but as each member got a chance to take off on his own improvisational ideas, it was clear that these musicians were being their life and talents together to create the King Crimson sound.

The group started with enough instruments for six or more musicians, the band ended on stage and it was only that this edition of King Crimson has produced to date who was "Three of a Perfect Pair." Fans who came to hear vintage Crimson were probably disappointed. The band also lost most of the fans wanting to hear more after their not-quite-two-hour performance.

Fripp stayed out of the center-stage spotlight, which Belov dominated with an affable, energetic stage presence that gave the impression that he was the one having the most fun.

Belew and Frippe seemed to be communicating on a telepathic level. The group never seemed to be at odds, it was a perfect rhythm in a feature that leads into "Sleepless" off "Three of a Perfect Pair.

Crimson's music is impressive and unique in its own right, and Belew's lyrics complement it perfectly. Belew's songs, such as "Indiscipline," are a humorous dramatization of his relationship with his guitar.

The group ended the show with its best-known song, "Elephant Talk," which is and most interesting than only listening to recorded versions. It was a long-awaited treat for the concert-starved music enthusiasts in the area.

Israelis, Smithsonian at odds over exhibition of 11 artifacts

WASHINGTON (AP) — The Smithsonian Institution, the world's largest museum complex, is embroiled in a Middle East political controversy over 11 artifacts housed in a museum in East Jerusalem.

The dispute has prompte d the cancellation of a touring exhibit, upset the Israeli government, drawn praise from pro-Arab group and angered a congressman.

At issue are 11 items from the John D. Rockefeller Museum in East Jerusalem, the Arab section of the city controlled by the Jordanians until Israel annexed it after the Six Day War in 1967.

The items were to be part of a larger, 320-piece traveling exhibit entitled the "Archaeology of Israel." The other pieces came from outside East Jerusalem.

The exhibit originally was to open at the Smithsonian's Museum of Natural History on May 4 and runs through July 13 before moving to other cities.

It was planned as a joint effort between the Smithsonian and the Israeli Museum, a private institution whose board chairman is Teddy Kollek, Jerusalem's mayor.

Before plans were completed for the exhibit, the Smithsonian's staff asked the last year that 11 objects from the Rockefeller Museum be omitted because "the ownership is in some dispute," said Smithsonian spokesperson Alvin Rosenfeld.

Rosenfeld said that under a policy established in 1975, the Smithsonian "cannot accept either for acquisition or for loan any item whose title is a matter of dispute."

The Israelis then canceled the entire show because "the exhibition would have been incomplete without these items," Israeli Embassy spokesman Victor Harel told a reporter last week.

"We are very upset with the Smithsonian's attitude," said Harel, calling it a "politicalization of a cultural function."
The Salukis got their run in the seventh when Cindi Molinar and DeCinces both hit singles, and DeCinces scored on a double by Grich. After Molinar was out, Sigler hit a sacrifice fly to score DeCinces and end the inning.

The Salukis tied the game in the first, scored in the fourth, and won the game in the fifth. They put up four runs in the fourth and won the game in the fifth.

Palestine dethrones Malaysia

By Chris Ogbonnah
Staff Writer

The Palestine team claimed the International Soccer Championship, beating three-time defending champion Malaysia Sunday at McAndrew Stadium.

Malaysia outscored Palestine 5-4 in the penalty-shootout that resulted when the game ended 0-0 after regulation and a sudden-death overtime period. The Palesitans won earned them the International Stufon Council soccer trophy.

The hero of the match was Palestinian substitute goalie, Anan, who did far to his right in order to block Malaysia's fifth penalty kick. The Malaysian miss was the difference.

The scorers for Palestine were Mohammed, Raid, Emahur, Mohammed, and Rusman Awang scored for Malaysia.

Mohammed Badash, the Palestinian captain, said the victory of his team in the championship was due to organization, teamwork and determination to win.

"We decided right from the beginning to play well and win," Badash said. "We practiced and we organized our best players to put out a fine team."

He said it was not easy to defeat the Malaysians.

"The Malaysian team is good," Badash said. "It is experienced and well organized, but we needed determination to beat them."

Relay teams win 2nd leg of triple crown

By David Wilhelm
Staff Writer

The SIU-C 1,600-meter relay team came one step closer to claiming the elusive intercollegiate track and field triple crown over the weekend in Kansas City, Mo.

The team of Perry Duncan, Tony Adams, Zivel forde and Mike Franks easily defeated runner-up Michigan at the Kansas Relays with a time of 3:07.90. Michigan ran the 3:10.12.

The triple crown consists of an individual or relay team capturing a first-place finish in the Texas Relays, Kansas Relays and Drake Relays. The Salukis won the 1,600-meter at the Texas Relays on April 7 and need to win next weekend at the Drake Relays to claim the triple crown.

No team scores were kept at the Relays. SIU-C has never won a triple crown, but the Drake Relays could be care of that. Saluki Coach Lew Hartung said a key factor in the Salukis' success in the Kansas Relays was weather, which was warm and sunny.

Hartung said the temperatures were in the upper 60s on Friday with rain and high winds.

"We had about as bad of weather as I've ever been in on a track meet on Friday," Hartung said.

The conditions were much the same on Saturday, with wind, rain and temperatures only in the low 50s.

Hartung said he also lost his team up and left after Friday's competition because of the bad weather. He said he was fearful that someone might get injured in the poor conditions.

Hartung was glad nothing had happened. Although the Salukis had their best performances were down from last week, Hartung said other things were more important.

"It's quite a feat to continue our streak in the mile relay and didn't get anyone hurt," he said.

The Salukis had first-place finishes in three other events, a victory in the high jump and the hammer.

The Saluk team of Adams, Mark Smith, Steve Smith and Mark Parry ran a 1:25.16. Oklahoma State the 1:25.08. The Salukis had the 1:25.08.

Adams, Hill, Forde and Franks won the men's 4x100 relay with a 40.58. Iowa State took first with a 40.42 and Oklahoma State second with 40.57.

The Salukis had first-place finishes in the triple crown relay, the 880-yard relay, the hammer throw and the javelin.

John Smith came back to finish third in the shot put with a 65-10.

Chris Bunyan placed third in the 5,000-meter with a 14:56.01.

Little's throw at second base on Tim Cobbett's single start of the fifth set up Lonnie Smith's run-scoring double and a 2-0 lead.

Smith's decision was his fourth in a row for SIU, including two shutouts in 1980.

The Salukis won three of five games for the Expos in the sixth by delivering a two-out, single, game-winning hit by Steve Smith and a game and coming home on Parson's single up the middle.

The Salukis had first-place finishes in the triple crown relay, the 880-yard relay, the hammer throw and the javelin.

St. Louis (AP) -- Unbeaten Bryon Smith won his fourth NCAA track and field meet help and Andrew Dawson drove in a run with a homer and two RBIs as SIU-C took a 2-1 triumph Sunday over the Northern Illinois Cardinals, 4-0.

Smith, 4-0, gave up eight hits, struck out three and walked one in six innings. He got the victory.

"She said she was confused in her legs and we didn't want any other players in the 400 relay," Smith said. "The highest I've scored was 1:44.56, but I kept on getting the races of the 400 relay at Eastern was 45 degrees.

But lady tracksters show big improvement

By Steve Koons
Staff Writer

The SIU-C women's track team showed Ohio State how much it has improved Saturday since the beginning of the season with a strong showing at the Challenge Invitational at Eastern Illinois.

Saluki women took eight of 17 events while the Buckeyes finished second with six first-place finishes.

Don DeNoon raid if the meet was not over when the Buckeyes finished first with 14 points and Ohio State would have been second in the Buckeyes.

But in the Salukis' first meet of the indoor season on Jan. 28, Behind second placed Clark, who pitched a four-hitter and was in command throughout. She was backed off of the hill by a 13th-inning home run in the ninth inning against the Iowa State defense.

Coached by Coach Kay Brechtholz, "I'm hoping that we can finish second."

The Salukis left Friday behind Clark, who pitched a four-hitter and was in command throughout. She was backed off of the hill by a 13th-inning home run in the ninth inning against the Iowa State defense.

Coached by Coach Kay Brechtholz, "I'm hoping that we can finish second."

The Salukis were edged 3-1 in the Gateway Conference.

The Salukis have won four of their last five games and might be putting some momentum as the Gateway tournament approached.

I'tchin' to play

SIU-C baseball Coach But Jones watched the action when his Saluki beat Bradley on April 7. Jones and the Salukis saw no action this past weekend at Wichita State, Erie doubleheaders and for Friday and Saturday were rained out, bringing the number of Saluki rains this season to 11.

Softballers blend hitting, pitching in two victories

Spring fling has something for everyone

By Phil Millan
Staff Writer

With a brand-new name comes many new activities for SIU-C's "Spring Celebration '86," formerly known as Springfest. To bring alumni back to the University to see the changes in their alma mater, and to bring students and the community together in a way to enjoy spring, various on-campus organizations have put together activities to this weekend that rival the entertainment offered during Homecoming festivities.

"This is the last big program of the school year, and there's something for everyone," said Tom Flodin, special events chairman for the Student Programming Council, one of the event's sponsors.

New activities at Springfest, to take place at Old Main Mall Saturday and which are part of the entire celebration, include free carnival rides, a Pee Wo Hotman Look-Alike Contest, break dancing by the Street Beat Crew, a coed-rally race (B. J.O.C.) and a Laugh Like Larry "Bud" Melman Contest sponsored by WIDR, complete with a huge tune-a-stick. A smaller version of the tune-a-stick will be passed out to the crowd.

The schedule for the entire weekend follows:

FRIDAY

10 a.m. to 3 p.m., M.F.A. design exhibit at Forestry Exhibition and Ulysses S. Grant exhibit, University Museum.

11:30 a.m. to 4 p.m., Open House at Coon-Cox Hall, S.I. Bowl in Carterville preceding Vegas Night. Casino entertainment from 7 p.m. to 11 p.m., roulette, blackjack, craps and other games. There will be a $10 donation charge, $5 for benefits for the Teacher's Union. Tickets available at the S.I. Bowl, Student Union Ticket Office, Athletics Department and the School of Music.

SATURDAY

3 p.m., First Springfest Rally Race (B.J.O.C.)

4 p.m., Springfest Spring Fling at the S.I. Bowl, Forestry Exhibition, Student Union Ticket Office, Athletics Department and the School of Music.

At Coach Ray Dorr's first official practice of the spring season, March 30, two changes were immediately noticeable in the way Saluki workouts would be conducted.

The first was a 15-foot tower, more resembling a scaffold, that stood on the sideline, where Dorr watched the drills and scrimmages. The second was an air horn that signaled the end of one drill and the beginning of another. In a way, it also signaled the end of one era and the beginning of a new one.

Ray Dempsey, who guided the Salukis to a 13-1 record and the national championship last year, left SIU after eight years to head coach at Memphis State. Dempsey didn't use a tower, but was down on the field among the players, up close and personal.

Dorr, for watching his turnover, his sideline vantage point, quickly for the most part, like a general in a command post. He is more interested in a later criticism, practice with his lieutenants - the assistants he's been with on the in the last eight years.

DORR SAYS he sees his job as to organize, teach and utilize the practice time. From time to time, he descends from the tower to take a direct role in the teaching.

Spit out Jane, Stevenson said there is definitely a difference between Dempsey's and Dorr's styles. Dempsey was more of a "crazy-type coach," while Dorr is more of a "firm type." Stevenson said.

"Ariel. Stevenson meant was that Dempsey's intensity and hands-on involvement in practice had a different effect on his players. Dempsey wasn't afraid to cuss at his players, showing and pushing them through their practices when things didn't satisfy him 100 percent.

"But Dorr's watching everybody," said Stevenson, who caught 23 passes for 68 yards and two touchdowns last season. Knowing that Coach Dorr is on the field, watching you, explained, "means you're busting your butt all the time."

Dorr and his lieutenants have been watching more than 120 players in spring practice including 60 walk-ons, non-scholarship players who were invited to try out. The coaches have been looking not only at football skills, but for players - veterans and newcomers alike - who demonstrate they will "hustle their butts" to win.

DORR CANDIDLY said that not all the players were going to like him, but he expects that all will respect him for being "fair, honest and truthful."

"I'm not worried about how they respond to me," Dorr said. "I'm more worried about how they respond to my coaching."

Place-kicker Ron Miller said that patience is one of Dorr's characteristics, being well organized is another.

"He doesn't make quick judgments," said Miller, who kicked an NCAA I-AA record 36 straight field goals last season on route to an SIU-C record 110 points. "Everybody felt intimidated by Dempsey. I don't feel intimidated around Coach Dorr."

"Under Dempsey, Miller said his practices consisted of stretching out, and working on his kicking at the end of practice. Under Dorr "every minute is useful," Miller said.

The first days of spring practice under Dorr showed the organization. Just so many minutes were allotted for each practice drill. Much had to be done on grading players and Dorr did not want one minute wasted. The air horn counted and few troops displayed to his assigned places.

THE NEW ERA was under way. Dorr, 42, was the assistant head coach at Washington under Don James, whom he had first worked under as the quarterback coach at Kent State in 1971-74. That same James became the head coach at Washington in 1975, Dorr went with him.

"I asked my wagon to that star," Dorr said at the Jan. 6 press conference that announced him as the new SIU-C coach. Dorr had been among more than 150 applicants for the job.

At Washington, Dorr helped develop quarterbacks Warren Moon and Steve Pelluer. Moon led Edmonton of the Canadian Football League to five straight Grey Cup titles after being named the 1978 Rose Bowl MVP. Moon is now with the Houston Oilers of the National Football League after signing as a free agent. Pelluer was the 1985 Pacific 10 Conference MVP.

Dorr's experience with quarterbacks (he started at quarterback for one year at West Virginia Wesleyan College) will be beneficial to the Salukis. Quarterback Dave Dush, for two years a backup to Rick Johnson (now with the Oklahoma Outlaws of the United States Football League), has been named No. 1 quarterback this spring.

Triathlon will honor 'Doc'

A spring triathlon, which the sponsors intended to make an annual event, will be held Saturday in honor of Robert "Doc" Spackman, former SIU-C athletic trainer.

The triathlon is being held in Spackman's honor with the idea of sponsoring an activity everyone can participate in and have fun, the kind of event he would have enjoyed. Fifty cents from each $5 entry fee will be donated to the "Doc" Spackman Scholarship fund. Spackman died of a heart attack on May 13, 1984.

The triathlon is open to the first 250 entrants aged 18 and older. The registration deadline is 5 p.m. Friday. Entry forms along with the $5 entry fee should be turned in to Rick Green, Room 141, Student Recreation Center. Prizes will be awarded to the top three finishers in the following age groups: 18-21, 22-25, 26-35, and masters.

Jim Bestivoglio will handle the coaching duties of the offensive backfield. Last year, he worked for the Seattle Seahawks' Department of Personnel.

A 1977 graduate of San Francisco State, Bestivoglio, 29, worked with his alma mater's football team as defensive and special teams coordinator while pursuing a master's degree. He left coaching briefly for a career in bookkeeping, but returned in 1982 when he joined the staff at the University of Washington.

Albert "Buzz" Preston, rounds out the staff as receivers coach. Preston, 27, served as an assistant with Dorr at Washington.

A graduate of the University of Hawaii where he was a wide receiver for the Rainbows, Preston began his coaching career there, as an academic tutor and later as receiver coach. After two seasons at Hawaii, he became defensive backfield coach at Washington.
SPRING FEAST!
April 28-29

FISA
SPRING from Page 1a

-7 p.m., Alumni Association Executive Committee dinner meeting, location TBA.
-7 to 9 p.m., SPC film, "Mr. Mom," in the Student Center Auditorium. Admission $1.50.

7 p.m., same on Saturday.
-7 and 5 p.m., SPC video, "Richard Pryor Live on the Sunset Strip," in the Student Center 4th-floor video lounge, admission $1.
-5 p.m., "Blithe Spirit," a Noel Coward comedy presented by the Department of Drama at McLeod Theater, admission $1. Same time on Saturday. Presented at 7:30 p.m. Sunday, admission $4.
-9 p.m., "Janescapes," faculty dance recital, in Shryock Auditorium. Admission $4.50 in advance and $5.50 at the door.

SATURDAY
-8 a.m. to 2 p.m., all you can eat pancake breakfast in the Free Forum Area, $5 for children under 13 and $2.50 for adults. Proceeds go to the Carbondale Lions Club. Have breakfast and gain free admission to the Sokol Maroon and White football game.
-6 a.m. to 2 p.m., community yard sale, Municipal Parking Lot 4 across from Davies Gym, sponsored by Carbondale Jaycees.
-9 a.m. to noon, Robert Speckman Memorial Triathlon, at Campus Beech area. Participants will test their endurance in a quarter-mile swim, five-mile bike race, and two-mile run.
-10 a.m., Sokol Maroon and White intrasquad football game in McAndrew Stadium, admission $1.
-10 a.m. to 4 p.m., University Museum exhibits continue.
-10 a.m. to midnight, Springfest '84 at Old Main Mall, sponsored by SPC and the Student Center, with participation from various off-campus organizations.

The following are some of this year's highlights for Springfest:
-Free carnival rides throughout the day, including a ferris wheel, the oceangoer, and moonwalks.
-Live music on the steps of Shryock Auditorium, sponsored by SPC. At 2 p.m., the Bad Boys, a band from Chicago, play pop-rock covers and originals. At 4:30 p.m., Debutary from Chicago play rhythm and blues. At 7 p.m., the Fuzztones from New York play rockabilly rock and at 8:30 p.m., C-TAL plays reggae.
-A Texas Barbecue, sponsored by the Student Center with help from Sapo, Levi's and French's, and burgers and other food for sale. Besides the barbecue and fries, the Country Fare will play country music on the Texas BBQ stage near Anthony Hall during intermissions between acts on the steps of Shryock. There will also be quickies and sandwhiches, and haywagon rides.
-A multitude of games, crafts booths, contests and promotions throughout the day. In addition to activities already mentioned, some other events include a martial arts demonstration by the Tuskegee Airmen -- Hip-Hop club starting at noon, a Family Feud game sponsored by the inter-Greek Council starting at 9 p.m. and "punk portraits" by the Art Students League beginning at 2 p.m.

Some will float, some won’t, but everybody will have fun

By Dave Eiseles
Staff Writer

Ahoy, landlubbers! Man the pumps and hoist the sails! SIU’s 11th Annual Great Cardboard Boat Regatta is preparing to set sail.

As the highlight of a weekend-long schedule of activities dubbed “Spring Celebration ’84,” scores of would-be shipbuilders will try their hand Saturday at navigating homemade, cardboard “seaworthy” vessels around an 800-yard course on Campus Lake. The yearly competition, which began as a problem-solving challenge for students in the “Design Fundamentals” course, has made such a splash that more than 100 would-be mariners are expected to enter the competition this year, according to Richard Archer, assistant professor of comprehensive planning and design.

“We’ve already got a dozen or more high schools in Southern Illinois planning to compete,” he said. “Some entering as many as five boats.”

He said students in past races went to area businesses looking for sponsors, but the popularity of the race has increased so much that this year, business owners have been calling Archer about sponsoring boats.

“And we got a boat for every business that called us,” he said.

The regatta will contain three classes of boat races. The first includes boats powered by sails or kayaks and oars paddles. The second category, known as the “experimental class,” contains just nine boats of every other type of hand-operated propulsion boat imaginable. “Boats in this class include everything from plunger to paddle wheels to giant screws,” he said.

The third category, includes boats built “on the spot.” Participants in this class are given construction materials, including cardboard and duct tape, and have two hours to build a boat. Archer said so many people wanted to enter this category that a lottery has to be held, and only 36 applicants will be allowed to compete.

Rules for the entire regatta require that all boats be “person-powered.” Boats are made from corrugated cardboard and capable of negotiating a triangular 200-yard course four times.

Archer said 30 to 40 boats will be held for each category, with four boats competing in each heat. The winners of those boats will then compete in quarterfinal, semifinal and final races, with winners of first, second and third place craft receiving trophies.

Other regatta awards include the Voyage Award, given to the best-dressed crew; the Pride of the Regiment Award, based on the best-looking boat, and the Titanic Award, given each year to the boat that sinks most gracefully.

Archer said that prior to last year’s race, College of Engineering and Technology students boasted they were going to teach the Comprehensive Planning and Design Department a lesson in boat-building.

“They entered as many as five boats,” he said. “And we got a boat for every business that called us.”

Rules for the entire regatta require that all boats be “person-powered.” Boats are made from corrugated cardboard and capable of negotiating a triangular 200-yard course four times. This year, the competition has expanded to include a new category for “design fun,” which will allow participants to enter projects that are not built on the spot. "Boats in this category will be judged based on creativity, originality, and functionality," Archer said. "The winners will receive awards for best design, most unique, and best engineering." The regatta will also feature a special award for the boat that "sinks" the most gracefully. "The recipient of this award will be determined by a panel of judges who will rate boats based on factors such as the speed at which they sink, the sound they make, and the way they disintegrate," Archer said. "This award is open to all participants, regardless of their category." The regatta will take place on Saturday, April 28th, at 2:00 PM, and is open to the public. Spectators are encouraged to bring chairs and blankets to enjoy the event. Food and beverage stands will be available, and there will be a raffle with prizes donated by local businesses. "This year's regatta promises to be bigger and better than ever," Archer said. "We're excited to see how creative our participants can be, and we're looking forward to a day filled with fun and friendly competition." The regatta is organized by the College of Engineering and Technology at SIU, and is sponsored by the university's Student Activities Board. It is free to the public and no reservations are required. Tickets are not needed, and there is no dress code. Participants are encouraged to wear comfortable clothing and shoes, and to bring sunscreen and water bottles. The event will conclude with a fireworks display and an awards ceremony. Participants will be honored for their hard work and dedication, and winners will be presented with trophies and certificates of achievement. Everyone is welcome to join in the festivities, and to experience the excitement of building and racing their own cardboard boats.

Dorr expects immediate help from key freshman recruits

By Jim Leda
Sports Editor

Recruiting started seven weeks late for new Saluki Coach Ray Dorr and his staff, but they still managed to sign 23 to national letters of intent.

Ten of the recruits are defensive players, 12 are offensive players and one can play both. All will get a chance in practice and a chance to play. Dorr said the incoming freshmen will be redshirted only if they want to be, unlike former Coach Roy Dempsey's strategy of redshirting almost every freshman who joined the team, to save a year of eligibility while they learned his system.

On offense, Dorr signed two quarterbacks, two fullbacks, a tailback, three tight ends, two linemen and two receivers. Three defensive backs, two tackles, five linebackers and a defensive back-wid receiver will join the team in the fall.

Dorr said one of the two quarterbacks will be at least No. 2, third and make the traveling team. Quarterbacks Kevin Brown and Jeff Grandgenett, who doubles as a punter, will battle it out in the fall. Dorr said whoever gets beat will probably move to wide receiver.

Dorr likes Brown's statistics and he will probably have an edge on Grandgenett. Brown, 6-4, 205 pounds, of Galveston, Ind., had the second-best all-time prep passing history last fall. He completed 179 of 301 passes for 2,679 yards and 22 touchdowns in 10 games.

One of those, 6-1, 185 pounds, threw for 1,200 yards and 11 touchdowns while completing 31 percent of his passes for Bridgeport (Missouri) High School last fall. He averaged 6.9 yards as a passer.

Senior letterman Darren Dixon has been tabbed probable starting quarterback.

Dorr said S'am has a good chance to help the team because of his speed, which McGhee will give the Salukis a "clutch receiver." Patterson also has speed, Dorr says, and he thinks all three could make the traveling team.

Dorr's biggest challenge, however, will be finding capable offensive linemen, he said.

"We must get help from our young offensive linemen," Dorr said. "I have to count on the freshmen to give us that help."

The demands that are put on a lineman make it tough for a freshman to break into the lineup. Last year the offensive line was decimated by injuries, and although experience was gained by the line men who look over for the casualities, Dorr has seen mental mistakes and inconsistent play from the line so far, he said.

Pete Janssens, a 6-7, 275-pound lineman from Lane Tech High School, was the last recruit signed by SRI-C and could get the first shot at making the team from among the recruits.

Tailback Byron Mitchell could make "a real impact," Dorr said. Last fall at St. Louis' Bishop DuBourg High School, Mitchell rushed for 1,388 yards and 25 touchdowns while averaging 6.4 yards per carry.

"He has a chance to be a starter," Dorr said.

On defense, Dorr said of linebackers Jim Hood, 6-3, 230, Yorktown, Ind.; Eric Hurley, 6-3, 230, Urbana; Freddie Jones, 6-5, 210, Washington Park; and Eric Robinson, 6-3, 250, Youngstown, Ohio, "One of those four kids has to come through."

The Salukis lost all-Missouri Valley Conference senior linebacker Graville Butler and Dorr said he has not been impressed with returning junior linebacker Fabray Collins' play this spring.

"Fabray has a chance to be a potential National Football League player," Dorr said. "He's not playing as tough as he should be. Hopefully, Fabray will play up to his ability. There is no better player on the team if Fabray plays up to his potential."

Nobody has job sewn up as Dorr assesses squad

By Dan Devine
Staff Writer

Most of the players on SIU-C's NCAA Division I-AA championship football team are back.

Forty-two of 55 lettermen return, including 24 offensive players, 16 defensive players and both kickers.

New Coach Ray Dorr has taken time to plug the gaps opened by graduation. He will have 23 freshmen recruits join the team in the fall, and he had more than 65 walk-ons participating on the first day of spring practice. More than 120 players were competing for spots when practice began March 30.

None of them had a place on the team assured.

"Our goals this spring are to identify the top 40 players on our football team -- 22 on offense and 22 on defense," Dorr said as practices began, "and then to identify the 10 or 11 or 12 most aggressive players who will make up the rest of our team.

"No one has a job sewn up. We will post a depth chart every day and it may change just that often. I don't necessarily want to stack positions so I may move people around to get the best personnel on the field."

Already, Dorr has shifted defensive end Mike Hrasia to defensive tackle and linebacker. Last year's starting tackle Kenny Foster may be eligible for one more year. Dorr will find out May 16 if Foster will be able to play. Foster is allowed to practice with the team and Dorr said that is a good sign.

Rick Spielman, who started last year as a backup quarterback before former Coach Rey Dempsey moved him to linebacker, has been given a shot at linebacker Fabray Collins' job.

Dorr said he has not been happy with Collins' effort thus far.

On paper, SIU-C's strength is still its defense, although the loss of cornerbacks Terry Taylor and Donnell Daniel and safety Greg Shipp weakened its strongest component.

Offensively, the Salukis have almost everybody back, but they don't have record-breaking quarterback Rick Johnson. Johnson now plays for the Oklahoma Outlaws of the United States Football League.

Dorr will bring in two freshmen quarterbacks in the fall, but the competition for the job will probably be between returnees Darren Dixon and Joe Graves.

Dixon filled in ably for Johnson last season and led the team to an important early-season victory over Eastern Illinois, which established the Salukis' strength as a genuine playoff team.

Despite modest statistics (28 of 66 passing for 471 yards) last season, Dixon led SUC-C to victory over Southeast Missouri State (56-7) and Northern Iowa (52-9).

Dixon has been raised No. 1 on the team's depth charts despite four interceptions in a recent scrimmage game.

"We're very happy with what he's done," said Dorr. "He's improved on his reading defenses. He definitely took a step forward. The question is -- can he do it again?"

Graves has been bothered by injuries. He also has not had the opportunity to work behind the first-string offensive line, but Dorr said that Graves will get his chance with the first string.

"Joe Dixon and Graves, the quarterback prospects are slim. Dorr said one of the freshman quarterbacks probably will become the No. 3 man. Whoever wins the starting job will have the luxury of operating behind a solid running game."

See VETERANS, Page 11b
Most of the linemen had playing time last season, and only tackle Brad Pilgard won't be back. Starting guards Dave Bock and John Cook will return, although Cook is recovering from a knee injury and won't be ready until August. Dorr thought Cook probably would not make the team because of his knee injury, but that prognosis has changed. Dorr said he is impressed with the way Cook has been working back into shape.

Center Tom Baugh, a two-year starter, will be back, as will guard-tackle Tim Redmond, who stepped into a starting role for eight games when injuries struck the line. David Smith has moved past mammoth tackle Andy Wilson (6-7 and 300 pounds) at right tackle.

The receiving corps returns almost perfectly intact. Only part-timer Cecil Ratliff has been lost. Returning will be James Stevenson (35 catches for 616 yards), and track team members JaveD Heggs and Tony Adams. Todd Rotz and Tony Anderson are fighting for the flanker job while Heggs and Adams compete in track. Stevenson, however, remains the team's main aerial threat, Dorr said. "He's a good receiver coming out of the backfield. He can hurt you if he gets the ball out on the perimeter. If we can pop him through the line he can go all the way."

Drake says: "He's a good receiver coming out of the backfield. He can hurt you if he gets the ball out on the perimeter. If we can pop him through the line he can go all the way."
