Lightle not seeking trustee re-election

By Ray Urchel
Daily Egyptian Staff Writer

SIU-C Student Trustee Rusty Lightle said Monday that he will not run for re-election to the position in April.

"With some point a person has to start being concerned about some of the realities of life having more than a dime in your pocket two days after you get your pay check," Lightle said, indicating financial reasons as one of the factors determining his decision.

He said he was able to keep up with his courses but added that his responsibilities as a student trustee caused his grades to suffer.

Lightle was a part-time student fall semester suffering from ineligibility for re-election according to the Student Trustee Election Laws. Last spring he was not even in the running because he did not believe that the student trustee could adequately serve as a full-time student, and the law posed a disadvantage for the incumbent.

He said Monday that the necessity to fight the ruling because he did not believe that the student trustee could adequately serve as a full-time student, and the law posed a disadvantage for the incumbent. He said Monday that the necessity to fight the ruling because he did not believe that the student trustee could adequately serve as a full-time student, and the law posed a disadvantage for the incumbent. He explained: "If I have to..." but live times a day.

He said that the board's recent postponement of the collective bargaining issue until it can gain more time to fight the ruling because he did not believe that the student trustee could adequately serve as a full-time student, and the law posed a disadvantage for the incumbent. Lightle explained: "If I have to..." but live times a day.

He added that the board cannot take any action on the collective bargaining issue until we know whether the monogies (or collective bargaining) are coming from. And that can only be made by state legislation. Lightle explained.

Lightle said that if supplemental appropriations were not made to pay for the costs which he maintains the University might have to pay if collective bargaining were approved, an easy way for the University to get the funds would be to raise tuition.

Money is needed to support the provision and maintenance of equipment, supplies, materials and personnel, he said, and any realization of such might jeopardize there are as an obligation on our part to sit back and watch what happens.

He added that the board cannot take any action on the collective bargaining issue until we know whether the monogies (or collective bargaining) are coming from. And that can only be made by state legislation. Lightle explained.

Lightle explained: "If I have to..." but live times a day.

Tenure plan limits faculty termination

By Kathleen Takemoto
Daily Egyptian Staff Writer

Under the provisions of a proposed tenure document, tenure members must meet certain conditions. In cases of bona fide financial exigency, the board will have discretion to modify or terminate a position for adequate cause related to professional behavior and performance.

The proposed new document, released Monday by the Senate Faculty Rights and Tenure Committee, will be presented to senate members for action at a special meeting March 2.

If approved by the senate and then adopted by the SIU administration and the SIU Board of Trustees, the document would replace the Academic Freedom and Tenure section of the Board of Trustees statutes.

The most extensive provision of the new document is Article XII, which would establish a due process procedure for faculty members who receive notice of termination of their appointment. One of the safeguards and procedures listed is a hearing before a seven-member panel consisting of six faculty members designated by the Faculty Senate and three persons appointed by the President. Following the hearing, the panel would make a recommendation to the President, who then would make a recommendation to the Board of Trustees.

Tenured or continuing faculty members or term appointees who receive notice of termination must be given due process. A faculty member would get a hearing and a termination notice because of financial exigency must be given a hearing before the board of trustees. The board will be on the administration to prove the existence and extent of such a financial condition.

The decision to formally discontinue a unit of instruction or a program would be made primarily by a faculty body appropriate to the issue under discussion.

Before issuing a notice of termination to faculty members (Continued on Page 2)
because of discontinuance of a program or unit of instruction, the University must make "every effort" to place those members in another position, according to the new document.  

A faculty member may appeal a proposed relocation or termination resulting from a discontinuance and has a right to a full hearing before the panel.  

In cases of termination, the president would send his recommendation to the Board of Trustees for action. The board and the aggrieved faculty member may jointly agree to submit the matter to an arbitrator selected by both parties. The cost of the arbitration process would be paid by the University.  

In all procedures, the faculty member would be entitled to representation of his or her own choosing. 

The proposed tenure document also outlines procedures for reviewing the academic qualifications of candidates for tenure. Under the Board of Trustees statutes, the only procedure mentioned for such reviews is the requirement that unit heads each year review the status of those who have not yet tenure.  

The new document calls for review of candidates by both their respective departments or academic unit and by their respective school or college.  

If tenure is denied to the candidate, he or she would have the right to appeal the decision and be entitled to a written explanation of the denial. 

Under the provisions of the proposed document, the granting of tenure must first be recommended by the basic academic unit. The basic academic unit is also primarily responsible for starting procedures which may lead to the repeal of tenure in cases other than financial exigency or program cutback.  

In the new document, tenure is defined as the "continuous" holding of rank and position until retirement rather than a "permanent" holding of rank and position.  

The document would also delete a provision in the board's statutes which allows the board to give tenure to persons of the University who are not professors, associate professors, assistant professors, instructors, or "professionally trained persons" who serve in capacities that may be broadly interpreted as involving teaching and research.  

Under the new document, notices of non-reappointment or of intention not to recommend reappointment must be given in writing three months in advance for one-year appointees and six months in advance for those whose appointments expire at the end of the second year. At least 12 months notice would be required for others.  

Under the new document, newly hired full professors would continue to be given tenure after one year unless given notice. Maximum probationary periods for associate professors would be lengthened from two to four years, while probationary periods for assistant professors would be lengthened from four to six years. No minimum probationary periods are specified in the document.  

### Committee tenure plan limits faculty termination

Gasser: Sex bias more evident in high posts

By Judy Vanderwende
Daily Egyptian Staff Writer

Power is the ability to make or influence decisions, said Mary Helen Gasser, SIU's affirmative action officer. Policy-making positions in universities have traditionally been held by white male and Gasser has performed research to find out why.

In her dissertation, "Career Patterns of Women Administrators in Higher Education," she points out that "While sex stereotypes are apparent throughout academia, it is more obvious at policy-making levels of academic administration."

Gasser found that available research stressed two trends on the status of women administrators. The higher the position, the fewer the women, and administrative units are headed by men and staffed by women.

Women are less likely to be employed in "positions which involve sex stereotypes, such as department head of women's athletics, home economics or nursing."

At SIU six departments are chaired by women. The Clothing and Textile Department, Allied Health and Public Relations Department, Linguistics Department, Physiology Department and the Department of Physical Education for Women have women chairpersons.

"Women are apt to be found as assistant administrators and associate professors," Gasser said. "This is true all over the country." Her research showed that "women tend to remain in administrative positions, which are beginning posts for men."

"Don't know how much of this is self-selective," Gasser said. Women consistently underrate their abilities and tend to fear success, she said.

"I don't think you have to be a superwoman to make it. You have to be good and you have to be qualified." Gasser said that top administrators at SIU are generally men.

"Maybe women are opting out of that kind of lifestyle," Gasser said. "I was surprised that women didn't seek advancement as aggressively as I suspect men do."

"A lot of men think nothing of saying 'Someday I'm going to be a college president.' She added those men tend to orient their entire careers toward this goal. Women don't tend to do that," she said.

In her dissertation, Gasser points out that women face career obstacles that are unique to their sex roles. Women must overcome "a combination of complex institutional, cultural and personal barriers" to their career development.

Gasser found "cultural expectations that force women into traditional female roles, institutional practices which are oriented toward male students and faculty, and uncertainty regarding their own abilities were barriers to career development."

The socialization process begins when the book bag is wrapped in a pink or blue blanket, and it continues throughout life, Gasser said. The traditional female roles pictured in grade school texts are housewives, nurses or social workers.

"One of the most important things about getting women into faculty positions is to serve as role models," Gasser said.

Females do not receive the same degree of support for their professional goals. Parents of women who seek professional careers tend to say, "Okay daughter, we are pleased you went to college, but it is time you settled down and had babies."

Gasser surveyed women in administrative positions in universities. The women claimed to have encountered widespread sexual discrimination in higher education.

"Discriminatory hiring and promotion practices were perceived to affect initial-appointments and opportunities for promotion."

Part of Gasser's job as affirmative action officer at SIU is to make faculty and administrative screening committees aware of "how traditional ways of recruiting have kept women back," she said.

The first step in screening applicants is to go over vita sheets, Gasser said. On the whole, women tend to get their advanced degrees late in life, she said. A woman's job history is commonly "choppy" and evidences periods of unemployment. "This is not a result of low commitment or interest," Gasser explained. "Many women's careers have been interrupted by pregnancy or when they moved with their husbands."

Gasser's research showed on women get their doctoral degrees they are steadily employed and it is the same degree of career commitment as males.

End of era, midst of revolution, says Fuller

By Mark Raeber
Daily Egyptian Staff Writer

In a manner which he termed "thinking out loud," R. Buckminster Fuller, distinguished university professor and renowned author, revealed some of his more recent observations and insights Monday afternoon.

In a news conference attended by members of the local media and University community including SIU President Warren Brandt, the 80-year-old Fuller said, "We're at the end of an era and in the midst of an incredible revolution."

He began his observations by saying he had noticed "great changes" during his extensive world travels. He has just completed his 40th circuit of the earth. Fuller, who now lives in Philadelphia and works through the University of Pennsylvania, said he has noticed increased "business building" all over the world.

"I went on to explain how the banks have underwritten this building and how the government has in turn underwritten the banks."

"According to Fuller, this is now coming to an end. "We are at the point where the government is bust and building has stopped," he said.

He observed, "We now have enormous buildings filled with plumbing and nobody sleeping there. In most cases, people are sleeping in slums. We should stop trying to increase these and move into these beautiful buildings."

Fuller then went on to say that although the true wealth of the earth is great we are not doing anything with it. He said, "We need a new accounting system concerned with patterns around the world."

He explained, "If you analyse the task performed by all who are employed, you would find that only 10 per cent are producing wealth."

He pointed to the "cosmic accounting system" as an example of what is needed. "Nature does everything on an energy exchange basis," he said. He views this sort of system for the wealth of the earth.

Fuller said, "It costs nature $1 million to produce all the oil, all the gold, all the petroleum. We don't think of the real value. We are tapping the savings accounts of nature. We all spend $2 million to $3 million a day to get to work and are not producing any wealth."

R. Buckminster Fuller lectures during a news conference Monday in the Home Economics Building. (Staff photo by Linda Henson)

Races too close to call on eve of N.H. primary

CONCORD, N.H. (AP) - Campaigning Democrats reached out for final handshakes while rival Republican camps mapped their get-out-the-vote drives Monday on the eve of New Hampshire's Tuesday contest, the first state test of the presidential primary elections.

In the tight race between President Ford and former California Gov. Ronald Reagan, Tuesday's outcome could be crucial in determining the ability of getting supporters to the polls.

For the Ford camp, there was a worrisome question raised by Richard M. Nixon, whose journey to Pekin brought back to public attention the waning days of the New Hampshire campaign.

"In a close election, this sure Is an imponderable," said Peter Kaye, chief spokesperson for the Ford camp. "The good news for us is that the undecideds seem to be coming around, and the bad news is the imponderable effect of the Nixon thing."

President Warren Brandt, the 80-year-old Fuller said. "We're at the end of an era and in the midst of an incredible revolution."

He began his observations by saying he had noticed "great changes" during his extensive world travels. He has just completed his 40th circuit of the earth. Fuller, who now lives in Philadelphia and works through the University of Pennsylvania, said he has noticed increased "business building" all over the world.

"I went on to explain how the banks have underwritten this building and how the government has in turn underwritten the banks."

"According to Fuller, this is now coming to an end. "We are at the point where the government is bust and building has stopped," he said.

He observed, "We now have enormous buildings filled with plumbing and nobody sleeping there. In most cases, people are sleeping in slums. We should stop trying to increase these and move into these beautiful buildings."

Fuller then went on to say that although the true wealth of the earth is great we are not doing anything with it. He said, "We need a new accounting system concerned with patterns around the world."

He explained, "If you analyse the task performed by all who are employed, you would find that only 10 per cent are producing wealth."

He pointed to the "cosmic accounting system" as an example of what is needed. "Nature does everything on an energy exchange basis," he said. He views this sort of system for the wealth of the earth.

Fuller said, "It costs nature $1 million to produce all the oil, all the gold, all the petroleum. We don't think of the real value. We are tapping the savings accounts of nature. We all spend $2 million to $3 million a day to get to work and are not producing any wealth."

While Ford-and Reagan meet headon in New Hampshire, five Democratic contenders will be carving up the primary vote. That race is rated close too, with former Georgia Gov. Jimmy Carter and Arianna Hep. Morris K. Udall expected to be the top finishers.

On Monday, Udall, Bayh and Harris were out early Monday, shaking hands at plant gates, in factories and on the streets in northern New Hampshire cities like Nashua and Manchester.

The focus of attention is on the presidential-preference primary, but the stakes are psychological since it is not part of the nomination process. Delegates are elected separately, pledged to the candidates they support. Republicans will choose 21 nominating delegates, Democrats 17.

About 56 persons have been nominated or applied for the positions. SIU Legal Counsel, Hollis Merritt, special assistant to President, Warren Brandt, said Monday.

John W. Huffman, SIU legal counsel, announced last May that he wanted to limit his term so he could concentrate on his private law practice.

"We had a pretty good day today, we got our first five we got our named."

"I said 'we are having a pretty good day,' " he said. "We have our first five we got our named."

SIU placed applications in two law journals and a higher education newspaper.

Legal counsel position gets about 50 applicants

A member of the SIU faculty who sits on the board of SIU is the deadline for applications to be submitted for the position. A 10-member committee, chaired by Brandt, will review the applications after the deadline. Merritt said qualifications for the position include the ability to practice law in Illinois. Some experience with higher education is desired. Salary for the position depends on the amount of experience received.

Huffman, who has been University legal counsel since 1972, has been working part-time for SIU's legal department since last summer.

Daily Egyptian, February 24, 1979, Page 3
“Doonesbury” hits our pages

Dear Readers,

And now—because you asked for it—we are elated to announce the debut on the pages of the Daily Egyptian of America’s most often censored comic strip. Or, as Uncle Gil puts it today, we’re “ticked pinko” to present “Doonesbury.”

Garry Trudeau, “Doonesbury’s” 27-year-old, lean and fairly reclusive creator, won the Pulitzer Prize for editorial cartooning in 1975. The first time a comic strip has won a Pulitzer, the editor of comic sections stepped boldly into a controversy that has raged around Trudeau since “Doonesbury” went into national syndication in 1970.

The problem is, what the heck is “Doonesbury” and where is it going? “Doonesbury” is the creation of consistory of outraged readers and satirically devoted readers have swirled around the recognizable characters of the “Doonesbury” strip for the past five years. And our newspapers that carry his work have again and again faced the question—what is it? Editorial? Comic strip? Political satire?

To begin with, it’s funny. Also pertinent, incisive, daring and inspired. “Doonesbury” started as “Bulltails” in the Yale Daily News, Garry Trudeau’s political cartoon in the Ivy League, at times scathing. This has not prevented the strip’s popularity from growing to the point where it now boasts 30 million readers. But it has repeatedly prevented individual strips from being published, especially when the barbs hit too close to home.

Examples are the republication of strips on Kent State, Vietnam, Watergate, a visit to Watts by former President Nixon and most recently, homosexuality.

At the same time, “Doonesbury” is nothing new—at least in bringing political statement to the comic pages. Trudeau acknowledges the influence of Walt Kelly’s “Pogo,” Al Capp’s “Li’l Abner” and Charles Shultz’s “Peanuts.” But instead of using his points in a whimsical swamp, Pop著patch or adventure, Trudeau uses today’s topological.

A long list of Trudeau targets have expressed admiration for their torturer. John Erlichman, Press Secretary to Richard Milhous Nixon, tells Trudeau, “the ‘Energy Czar’ in the strip, have requested originals of strips he did in 1974.”

Trudeau, who lives in New Haven, Conn., is remarkably quiet about his work and himself. He turns down all requests for interviews, saying “I’d rather have anything that says, ‘I have to say it in the Daily Egyptian’.”

So join the unpredictable adventures at the Walden, Communique, with Michael J. Doonesbury, a mild-mannered, middle-class college football player in the tradition of Pinnochio; Megaphone Mark, a wild-eyed, shaggy comedian radical who wears a black beret and B.D., a football star never without his helmet. By knowing Joanne Capuccio, it’d defenestrate your life: Zonker Harris, the strip’s irreverent freak; and Uncle Duke, a close semblance of pop journalist Hunter Thompson.

“Be you a magnanimous liberal or recalcitrant reactionary, we’re sure you’ll be able to identify daily with at least one of the ‘Doonesbury’ people. —By the Daily Egyptian

Counsel breaks fee contracts

By Bob Springer

Daily Egyptian Staff Writer

One certain pleasure that SIU students and faculty can always count on is the dogmatic trite which so often heralds from the well-paid mouth of Anthony Hall scoundrels is unfailingly consistent.

It should come as no surprise, then, when the University’s legal counsel declares fee statements are not contracts and students previously promised grants from the Illinois State Scholarship Commission are not contracts. It is to be expected that between what they were promised and what they’ll get.

Counsel states it “respects” the argument by students that fee statements constitute a legal contract and when the Bursars marks the statement paid, it means PAID. Well, counsel now admits after long judicious inquiry with his law (this is a major, major piece) one of the only pieces of informative paper which mean nothing.

Apparently, SIU’s top-notch legal beagle must also mean that the Bursar can no longer withhold student paychecks based on breaks, since the fee statement is not a contract and whether fees are paid by students is of little consequence since students don’t need the pesky piece of paper anymore anyway.

Apparently, also, counsel is instructing to local merchants that presentation of fee statement is no longer legitimate criterion to cash checks, or to check-cashing cards at area grocery stores, since the rainy little letter don’t mean nuthin’ nuthin’.

What a surprise that what we’ve always suspected: fee statements aren’t worth the paper they’re computer-runoff on.

The University has an “obligation to collect those fees that are owed to it,” stated another Anthony Hall hang-on, a vice president. Students may also have an obligation “certainly not a right, if we are to follow our Counsel’s sound advice” of thumbing their noses at the whole screwy thing.

Not much money is involved—maybe $60 at most to some students. Even if more dough were involved, however, we can be reasonably sure the University would still come out obligating itself to the preservation of its own obligations to its own obligations...

Another legal-type fellow stated, “In our system, state-operated schools may not be schools of totalitarianism. School officials do not possess absolute authority over their students. Students in school as well as out of school are ‘persons’ under our Constitution.”

Seems that other legal voice was a U.S. Supreme Court Justice. But then, what’s to count a guy who is working for the great academic womb of abstracted ideas? The University has an obligation to make up the rules of its own game as it goes along. It’s easier that way.

Contracts are a contract as good as the party breaking them, and only students and faculty own break a contract with this University because rule No. 1 (unwritten) of Unfair to force agreements the University is not obligated to anything but its own obligations...

Very cozy complex.

If your office number happens to be in Anthony Hall, anyway.

Rubin’s nut and bolts: study ignores women, brain, mature sexual response

By Pete Gonigam

Daily Egyptian Student Writer

With all the hurdles cleared now save one, it appears that the 40-plus people have failed in their attempts to abort Harris Rubin’s ‘sex-pot’ study. They may have slowed things down a bit, but HEN and Justice Department approval is to be expected shortly.

That’s a shame because the fire and brimestone people are right, albeit for the wrong reasons. The good professor’s study isn’t wrong because it employs a method of measuring brain activity because he had science—or at least not good enough science to merit a quarter million dollar price tag.

Adult male volunteers will view pornographic flicks both in the absence and under influence of marijuana. In both cases the level of sexual arousal of the volunteers will be measured by the degree of genital reaction and the blood levels of various sex hormones. There’s some science, all right. And some marijuana. And some human beings, too. But there’s an awful lot that’s missing for the study to live up to its promise.

Fifty one per cent of the population is missing for one thing. Human beings come in two varieties, male and female, differing at least in optional equipment. But only one variety, male, is to be used as test subject. females and all of the above, when the plumb line and a plastic protector will suffice for the men. Rubin says: there’s no practical in- strumental method available to measure the degree of female arousal. One wonders whatever became of the apparatus affectionately known as Ulysses which pioneer sex researchers Masters and Johnson developed at their Center for Human Sexuality in St. Louis, Mo. If Ulysses had a similar device might be more expensive than pulp and full length of recreational prohibitive.

Remember the quarter million price tag. At any rate, scratch half the human race from the benefits, if any, of Rubin’s study.

The researchers of Masters and Johnson point up another shortcoming in Rubin’s study. That research found human sexual response may be resolved into four distinct states. In order of normal occurrence those states are excitement, plateau (high ex- citement), orgasm and resolution (calming back down again). Rubin’s study makes use of only visual stimulus. Such stimulus, while unvarying and easily duplicated, is something less than desirable in being probably more likely to allow respondents only to the first two levels of arousal. A man who attains orgasm merely by watching a movie is abnormal. Such a response is at best adolescent. So while the experimental stimulus will effect a reaction, that response does not encompass adult male sexual response by any stretch.

The work of Rubin’s study appears on a further area. One of the major criticisms of their initial studies was that they were measured and described for the male in human sexual reaction. While noting that was the whole point of the study, some of the critics, before the doctors conceded that there was a whole lot more to human sexuality than the nuts and bolts they had described.

Rubin says his study will seek to determine if marijuana does indeed hold the aphrodisiacs qualities ascribed to it by popular lore. But Rubin has failed to make provision for studying the drug’s effects on what has been called the largest human sex-organ—the brain. The one indisputable effect of marijuana is that it alters the person’s perception of reality. What if the effect of marijuana in a sexual context were to make the user perceive himself on the brink of a number 18 on the Richter (organ) scale when in point of fact he was barely turning on the switch? What if the visual pot was a good sex turn while Rubin’s instruction mediated that situation seems not altogether unlikely. Marijuana, like alcohol, is a depressant, but it might also be called an anesthetic. If the user’s perception of realisation seems not altogether unlikely. Marijuana, like alcohol, is a depressant, but it might also be called an anesthetic. If the user’s perception of reality is impaired, he might be more likely to allow respondents only to the first two levels of sexual response. For Rubin’s study is aimed at making a maybe not a mightier argument than his previous studies.

On the basis of benefit versus expenditure there might have been a case for stopping the study. But the line of benefit versus expenditure, however, has never been one that véhiclizes the answer “Let’s just do it, anyway.” Rubin’s study was designed from the outset to be a part of the (unwritten) rule of the University’s staff.

Rubin’s study and the rest of the ‘doones’ hits our pages of the Daily Egyptian, February 24, 1976.
To the Daily Egyptian:

This message concerns all rational men and women having an ability to sense what is right and wrong. I have spoken with all SIU administrators, teachers, and especially students. It concerns every right side of the doors the numbers “1778–1978” scrawled in big, red letters. Underneath it, there was some writing, so I went up to read it more closely and found that it was the same sick impression. It wasn’t the words “year of collapse and rebirth” that struck me, but the ones directly above—“30 years of American bullshit.”

I would grant anyone that our country is not perfect, but not for long. I know we have started killing people, corrupted politicians, pollution, inflation, but shows in a country that doesn’t have some of these things!

Some rant and rave about the virtues of socialism, communism, things! To the Daily Egyptian: I don’t claim to be an expert on the history of the world problems and I’m sure that someone could ramble off hundreds and hundreds of facts about this system or that system is better than the one we have it. I know it is important to have some idea that America is my home and I respect it. So, all I can say to whoever wrote those words on Morris Library is that your other “red-eyed, capitalist pigs” like myself have been saying for years: Love it or leave it!

Increase requirements

To the Daily Egyptian:

I would like to congratulate President Brandt on his decision to increase the minimum American College Testing Program (ACT) admission requirements.

Michael Carr’s letter of Feb. 18 stated that such a move could mean discrimination. I strongly disagree. The only discrimination in this case would be that of academic ability. The University is obligated to provide high quality education to its students. This cannot be done if the faculty is forced to provide remedial classes academically incapable.

This Act is an admirable choice for admission requirements. It is the most reliable indicator of education and college preparedness. High school seniors do not have to go through a battery of facts about why students from different high schools.

Ranking in the United States, Southern’s academic ranking. It already has the solid reputation of a “party school.” Employers are aware of the lax atmosphere there. For many parents, in many programs, graduating from Southern will mean facing more difficult hurdles and a “true diploma” or equivalency.

Hopefully, President Brandt will stiffen the entrance requirements in order that Southern Illinois University will once again become a reputable academic institution.

Pornographic films tell people how to think

To the Daily Egyptian:

Earlier, this issue was said to be especially important to students. The reason is that they are helping to pay for these films. As stated in the Feb. 10 issue of the Daily Egyptian, “The Expanded Cinema Group (ECG) was funded by the SCAC...” The ECG is part of the 50/50 Committee. The purpose of the 50/50 Committee is to raise the money to help support the films.

To the students opposing these films, the allocation of their money in this manner is, at least, frustrating.

Finally, I consider pornography degrading to women and men because it reduces the beauty of sex to lust and perversion. This is especially true of women because it shatters any stereotype of a virtuous female. Next, pornography is a big problem because of its monetary exploitation. Let’s face it, pornography is big business, and every dollar goes for it is spent foolishly.

Thanks for helping

To the Daily Egyptian:

I had the opportunity to work for the Guatemalan earthquake victims. I spent two hours in the National grocery store talking to people and the contributions that I received staggered me.

If there is anything that makes me wonder, I think that it would be the kindness of people that can show for fellow human beings. Thanks for making me wonder again. The people of Carbondale sure can come together.

If anyone would like to help out, the people at the National grocery store will be more than happy to accept your contributions. These are good people and the money will go straight to the people that need it the most.

PR credibility

By Lee Chadil
Daily Egyptian Staff Writer

Politicians seem to be finally making a slow credibility recovery from the effects of Watergate. Another group of people who had a hand in the cover-up, the PR men, have not been able to get even the little credibility they had before the incident.

From the days of P. T. Barnum’s highly sensationalized press agentery up through the Watergate fiasco, PR has been labeled a “shady profession.” Public relations has done much to create an image of its own. Now, that image is changing.

Public relations “boners” over the past 70 odd years have earned the occupation by public definitions of both for a front for any kind of shoddy practice that people want to disguise.

Charges against PR run the gamut from smearing the names of politicians to promoting shabby products and causes. Newspapers complain that PR has flooded their offices with news releases reporting the exaggerated company achievements while the bad news is kept under lock and key. The public seems to hold a healthy skepticism for what it reads and hears, figuring that the news could be nothing but propaganda drawn up by some PR man.

Tacky practices like these go on all the time. The problem with them for the public relations field is that they’re done under the guise of PR. Propaganda, smear tactics and deceit are not part of PR if it is practiced professionally.

Professionally practiced public relations includes one important element that these unethical practices neglect. This element is an empathetic understanding and love of people.

Professional PR practitioners do not spend their time trying to deceive the public. They are being paid to develop good will and understanding between the public and the organization which employs them. To do this they persuade on the basis of fact, not propaganda. It’s the unethical fakes who try to persuade with exaggerations and half-truths. The fakes take the same tactics that politicians, newsreel reporters, press conferences and the like—but they’re interested only in results and not the means they use to get them...

It is also public relations’ job to convince management that the public relations field is an ethical and social demand. Professional PR people do not guess at what the public wants either. They get their facts through research to find out what the public thinks.

A good example of professional PR was a program conducted by General Motors. GM granted nearly 300 scholarships spread across 240 colleges and universities in the United States. This is the kind of thing professional practitioners do and it’s a far cry from bribery and deceit.

All of this should indicate that all ethical PR people are to gain the credibility they deserve, they must do two things. One is to be honest and ethical (and it is a minority) out of the field. The other is to convince the public that professional public relations is not on the way.

Since there will always be unethical people and critics of unethical people, the whole situation seems futile. But the PR field can do itself an attempt. It may actually help and then we could all breathe a little easier. After all, who needs another Watergate?

Documenters discuss future of video at conference

By Constance Karasalis
Daily Egyptian Staff Writer

Sophistication in cable television systems, which can produce a show as good as 48 channels into a person's home, now dramatically change the face of that medium, according to Hudson Marquez, a member of the nine-person team of video-documentary makers at TVTV (TVTV), said that future television

receivers will be more like special-interest magazines.

I want to write an article or start a magazine on record collecting, but I can do it, even though there are only 300 to 400 people who would be interested," said the 28-year-old Marquez.

"You can't make that kind of television now, but I think you'll be able to in the future. Audiences will demand it." Marquez and fellow TVTV member Shamberg came to SIU last weekend as part of the Contemporary Concepts Conference held in the Student Center by the Student Government Activities Council (SGAC).

During the conference, Marquez and Shamberg accompanied their kind of video they are doing to what is being done by commercial networks. They showed clips from their work, which includes most of the video documentaries "Four More Years: 1972 Republican Convention." In their video-documentaries, the TVTV crew become a part of the event it is filming. In some instances, crew members have gotten into arguments with the subjects.

"We believe that a crew should get involved in what's happening because it honestly is involved," said Marquez.

"A network film crew is part of the event, but they never admit it," said Shamberg. "They never interact, they never honestly admit they're there."

"But there aren't that many practitioners of video journalism like us right now," Shamberg broke in. "We've been fortunate enough to be virtually the only video-group to receive any funding at all to do journalism."

TVTV was formed in 1970 by Shamberg and Marquez, along with a few others. In 1971, they tried selling shares to get off the ground financially. While they were selling the stock a PBS station in New York offered them a $300,000-plus grant to do five short films.

Shamberg, who worked as a producer for three years before becoming interested in video-journalism stressed his belief that the real future of video belongs to the next generation.

"That generation will bring forth the real video-communications pioneers," he said.

"As younger people are exposed to video books naturally, say at the grade-school level, they'll automatically assume them as a normal tool of communication."

"They won't need to be educated, they'll just be educated. Most people today need to be re-educated."

As for their own future, both men agreed they expect to get into commercial television.

"Public television has got a lot of people with the right ideas and no money," said Marquez.

"Commercial television has got all the money and bad ideas. They need the people with ideas and the ideas need their money."

Dancers' show blends acting, dancing, music

By Kathy Dew
Daily Egyptian Staff Writer

The Southern Illinois Repertory Dance Theatre (SIRD) combined dance, singing and theater to produce a skillfully executed and at times hysterically funny hour of entertainment.

The presentation, entitled De-Kah Dance, was choreographed and performed entirely by students. The show was presented Friday, Saturday and Sunday nights at the Auditorium to appreciative crowds.

Several pieces in the presentation were4 studies involving objects or ideas and followed a silly pattern. Ernest Bruce, a graduate in music, was a musical surprise in the show. He sang a super blusty number for "Blues People," a piece choreographed by Belinda Engram, a graduate in physical education for women, and danced by Engram and Paula Murphy, a senior in childhood education. Vivacious and interpretive movements made the hard lives of black slave women empathetic.

The gaudy, summertime '50s' romp was apropos for "Two weeks in a Chevrolet or Eat Your Heart Out Dinah Shore," choreographed by Jo Novak, a sophomore in theater and danced by eight members of the company. The dancers did some fine pantomime to make anyone dread the thought of getting stuck in a car with these sunburned, sunglass wearing tourists. In the middle of the lively routine, a junior in physical education for women, "Women's Fashion," took her place and shouted over the floor in an exaggerated take-off on the present. Dinah didn't have time to eat her heart out too long.

Rosser was bored by the lenses of an aggressive camerawoman. "Dinah Dances," choreographed by Rosser, was a humorous commentary on singles, the bar scene and the disco craze. Ten "Disco babies" danced until they could dance no more. As they lay on the floor the energy from the boring disco music was too much to resist as arms and legs sporadically responded from the tired bodies.

Rosser, as "queen disco," stole the dance floor and did a solo combining the latest dance craze with modern dance. Rosser's interpretation made disco dancing a part of aesthetics before she faded to the same mood in which it began.

Absurdity came as well in "Skin 13 Oozes Across the Rooftop," as it does in a Vonnegut novel, which is where choreographer Diana Cuthwax, a senior in psychology, got the idea for the piece. Cylinders of sponge, surrounded the "knotheads" as they bounced around moving and making sounds all for the sake of absurdity and the pleasure of their audience.

GRAY FLANNEL RETURNS

NEW YORK (AP) — Gray flannel suits are back in vogue as an establishment business uniform, notes men's fashion expert Bill Gale.

"Gray flannel," Gale said, "is back as a piece of history, as a piece of fashion."

Gray flannel was first introduced in the 1950s when the "dreadlocks" look was popular. It was worn by the middle class and people who were trying to get into the middle class.

"It was a way of dressing that was a lot more comfortable than suit and tie," Gale said. "It was a way of dressing that was more casual."
Fire officials suspect arson in house fire

A vacant house at 310 N. Washington St. was destroyed by fire early Sunday morning, Carbondale fire officials said.

The fire was reported at 5:50 a.m. Sunday. The cause of the fire is not known, but fire officials said Monday that arson is suspected. A spokesperson for the Carbondale Fire Department and the Illinois Fire Marshall's Office would assist with further investigations.

David P. Brater, 2010 N. Cedar Lane Trailer Court, reported Saturday that someone had set fire to his car about 2 a.m. Saturday while it was parked at his home. His vehicle was a 1984 tan Chevrolet with a Illinois license plate. The car was worth about $150 and $200.

Glacier Park announces jobs

The Office of Student Work and Financial Assistance has announced that Glacier Park, Inc. is accepting applications for 900 summer applications. Positions are available for cashiers, bus boys, bartenders, clerks, drivers, mechanics, and bus drivers.

Applications are available from the Office of Student Work and Financial Assistance, Woody Hall, third floor.

Local airport business soars, industrial park is considered

By Daily Egyptian Staff Writer

An airport isn’t just a place for airplanes to land and takeoff. An airport is also a major business complex as demonstrated by Southern Illinois Airport, located just off I-270 between Carbondale and Murphysboro.

Fifteen businesses are located at the airport and negotiations are underway for two more, according to Gene Seibert, airport manager.

"Long range plans for the airport include an industrial park," Seibert said. "Right now around 250 people work here full or part-time."

Presently under construction at the airport is a sewage collection system.

"The annual budget for the airport is presently around $277,000. Of that figure only $70,000 comes from taxes," Seibert stated.

Southern Illinois Airport is also the fifth busiest in Illinois not counting those around Chicago, according to the Federal Aviation Administration (FAA), Seibert said.

"Only Peoria, Springfield, Champaign and Moline are ahead of us in operations (aircraft and landings)," Seibert said.

Seibert expects air travel at the airport to increase 15 percent by year's end. To help handle the present traffic, the FAA recently took over operation of the airport control tower. Five air traffic controllers, a secretary and a tower chief are presently employed by the FAA to run the tower.

The tower is manned from 7 a.m. to 7 p.m., he said.

A proposed project Seibert hopes to begin soon is the resurfacing of the 3,000 foot north-south runway. "This will make it safe to land planes as large as the DC-10 on a regular basis," Seibert said. The DC-10 is used by many of the large airlines.

Of the major instruction facilities and businesses located at the airport are the Air Institute and Aviation Technology which are operated by SIU Airgo Inc., an aircraft dealer, and in the charter flight and instruction business and Illinois Airline.

Air Illinois is a short haul airline whose main location is in the Midwest. The airline carried

Facility Chief Robert Shipp talks with an aircraft pilot as he taxis after landing at the Southern Illinois Airport. (Staff photo by Carl Wagner)

36,000 passengers in and out of the airport last year, Seibert said. Seibert is a graduate of Park's Air College in Cahokia, Ill., and has been airport manager since its opening in 1950.

"One thing airport people don’t like to talk about are crashes. Seibert is no exception. When asked if there had ever been a mid-air collision or crash by planes under Southern Illinois Airport tower supervision, he smiled and proudly said no. He then immediately ran his fingers through his hair. "It’s not that I’m superstitious, but..."

Area agricultural conference will involve soybean issues

Soybean production and marketing will get special attention at the eighth annual Southern Illinois Fertilizer and Herbicide Conference Wednesday at Rend Lake College campus near Inland. The conference, to be sponsored jointly by Southern Illinois farmer supply and equipment dealers, the ISU Division of Continuing Education, and the ISU Department of Plant and Soil Science, will be held in Balloon B from 1 to 3 p.m. each day. The conference is designed to provide information on the development of the soybean, and Raymond Hale, Grand-Chain farm equipment dealer, will talk about the soybean marketing dilemma and Hale on "Birth of the Soybean."
Dog's best friend not always his owner, manager explains

By Jean Paulman
Student Writer

Man's best friend is his dog, but does not always treat them that way, says Suzanne Stevenson, manager of Jackson County Humane Shelter.

The shelter, an adoption agency for animals located on Rt. 13, does not receive enough use or support from the community, Stevenson said.

Stevenson, who received her M.A. in animal husbandry from SIU, said that owning a pet is a responsibility.

"People should realize that if they are unable to care for their pets or simply don't want them, it is their duty to try and find them a home."

Too many people dump their unwanted pets in the country and assume that someone will care for them," Stevenson said.

An average of 500 stray animals are picked up in the Jackson County area each month. Half of these are picked up by their owners, she said. Fifty per cent of those left are put to sleep because the shelter does not have enough room to keep them until a home can be found.

Stevenson said that because of lack of funds the shelter has facilities to keep 600 dogs and 300 cats.

Abandoned animals that are in heat or pregnant must be destroyed immediately because the shelter does not have the room to isolate them, Stevenson said.

It is the shelter's policy to keep animals for 10 days before putting them to sleep. If stray animals are not claimed in seven days they are put up for adoption.

Stevenson said animals that are placed for adoption by their owners are given priority over strays.

"People prefer to adopt pets that they know something about," Stevenson said.

Forensics team takes second at Murray State

The SIU Individual Events Forensics Team placed second out of 12 schools in sweepstakes points at the annual Murray State University speech tournament held earlier this month.

Individual winners for SIU were Tom Eichelberger, who placed first in oral interpretation of poetry and third in oral interpretation of drama.

The team travels to Southeast Missouri State on Feb. 26 to compete in another tournament.

Could you be a nuclear expert?

(If so, you could earn more than $500 a month your Senior year.)

Even if you're a Junior engineering or physical science major it's not too early to start thinking about your career. And if you think you've got what it takes to become an expert in nuclear power, The Navy has a special program you should look into right away.

"Why right away? Because if you're selected, well you pay more than $500 a month during your senior year if you are presently a Senior you can still join the program."

What then? After graduation you'll get nuclear training from the men who run more than 70% of the nuclear reactors in the country - Navy men. And an opportunity to apply that training in the Navy's nuclear powered fleet.

Only about 200 men will be chosen for this program this year.

Be someone special in the Nuclear Navy.

See Lt. Chris Hauser at the Placement Office February 26 & 27
unhappily employed people today as unemployed.

The three professions that most students at Lincoln would like to know more about are teachers, workers with air travel, coaching, and truck driving. Jacober attributes the popularity of trucking to the popular cartoon strip, "Hogan's Heroes," which "brought a folk hero of the trick driver," he said.

The Lincoln Junior High experiment will be funded by a $5,000 "grant-in-aid" from money made available for experiments in innovative education under the Elementary and Secondary Education Act. Last year 42 schools throughout the state competed for funds appropriated by the Illinois Office of Education (IOE). The IOE ranked the Lincoln Junior High experiment third out of the 42 schools that did receive funding for projects this year, Jacober said.

The experiment will also give students a chance to discover leisure time activities they may never have tried. Students will be able to go swimming and horseback riding, Jacober said. They will also have an opportunity to learn about new hobbies such as astrology, cooking, Southern Illinois history and handwriting analysis.

Another aspect of the Lincoln Junior High experiment will be effective education. This will give the students a chance to learn more about new careers, Jacober said. Professors from SIU will be available to lead discussion groups on such varied topics as feelings, death and dying, dating and sex.

Jacober said the experiment will be funded by a 

"Convoy."

"I think this is something the students will be excited about," he said.

Jacober said he would like to see the community get involved with the experiment and said it would be a satisfying experience for both adults and adolescents.

**Junior high students given chance to study professions**

By Dan Hoffman

Daily Egyptian Staff Writer

Students at Lincoln Junior High School, 508 S. Washington, will find their classrooms looking through the community next month as part of a federally funded experiment in education.

Classes will be suspended from March 1 to 12 and students will visit the professions that interest them as possible career choices, said Larry Jacober, principal of Lincoln Junior High.

Jacober said the visits are meant to be "a real world" look at the students. "We’re hoping that in the process the students will get a better understanding just than what just the profession is also the job responsibilities, the commitments and lifestyles of the people involved in a profession, not just how much money they’ll make.

Student exposure to different professions will be as broad as possible, said Jacober. "We have the law enforcement profession as an example. They’ll not only go to see the inside of a police station. They’ll talk to a state trooper, an FBI agent, and go to the courthouse to see what the legal process is," he said.

During the two-week period students will visit 10 professions that most interest them. They will visit in groups of 4 to 8 and will travel by bus, in the cars of parents volunteering the time or if their chosen professions are close enough.

Jacober said he feels detailed exposure to career choices is important for adolescents and a duty of the junior high school. "The junior high helps students make their career decisions. We ought to be talking to our junior high kids. There are probably as many

**Attention students pre-registering for Fall ’76**

Three new interdisciplinary courses will be offered in Fall ’76. Each course will deal with value problems that arise in the practice of the professions. These careers that become themselves upon 1) biological sciences, e.g., nursing, forestry; 2) communication arts, e.g., TV, journalism; and 3) the social sciences, e.g., corrections, rehabilitation.

They are:

**LAC 310 Values in the living world.**

Coordinators: Benton and Hutch.

**LAC 311 Values in the communication arts.**

Coordinator: Lawson.

**LAC 312 Applied values in society.**

Coordinator: Schäfer.

The courses have been developed by teams of people from the humanities, the relevant disciplines, and practitioners of these disciplines. The courses will proceed by study of actual cases chosen to illustrate the kinds of value decisions workers have to make, beginning with personal choices, and moving on to decisions that involve wider and wider circles of people: communities, the professions, or the nation.

Heavy use of cinema, slides, case-presentation by workers in the fields, and site-visits will help insure the relevance of the subjects treated to the real decisions students will confront in their futures. Term projects will be the chief work asked of students.

Each course will meet twice a week, Tues.-Thurs., and one evening a week for films, site-visits, etc.

The courses are intended for the non-humanities student, do not presuppose prior work in the humanities, and are not designed to lead to a major in the humanities.

For more information call Liberal Arts Adviser: 453-3388.

Four tankers conclude SIU home careers

(Continued from page 16)

Yes, that's the wrong anchor man. It was the wrong accumulation of times. Delgado was a double winner in the 200-yard freestyle. Friday he broke his own pool record of 1:41 with a time of 1:40.8. Saturday he was all alone on his way to the first place with a time of 1:42.5.

Roberts was twice in the 50-yard freestyle for SIU. Fox was second in both races.

Fox captured first in the 100-yard freestyle Friday, and Boyd took third. Saturday Boyd took second and Fox was third. Salerno took second place in the 200-yard backstroke Friday but came back to win the event Saturday.

Delgado also met a formidable foe in Wisconsin's Brad Horner in the butterfly. Horner broke Delgado's pool record (1:52.1) with a time of 1:50.6. Delgado finished at 1:50.7. Horner is listed second nationally behind Delgado in times competed in the 200-yard butterfly.

Salerno delivered again with ease in the butterfly with a time of 1:52.1. Four SIU swimmers competed in their final home meet Saturday. They are Delgado, Schultz, Sergio Gonzales and Brian Kirmse.

Schultz wound out his career with a second place in the backstroke. He finished third Friday.

Gonzalez, another breaststroke winner an exhibition swim Saturday in a time of 2:12.3.

Brian Kirmse, who's leaving school after trials the following day, scored a lifetime-best total of 400 points in the diving competition.

SIU's next competition will be the National Independent Championshions at Columbia, S.C. March 4 through 6.

Saluki diver Brian Kirmse made his last appearance as a Saluki Saturday. Kirmse, SIU's only diver this season, is leaving school. He was one of four Salukis to make their last home appearance Saturday. (Staff photo by Jim Cook)

Women cagers win; Jerry tallied 19 in the Eastern contest; SIU Eastern whipping Chicago State

Water polo champs crowned

The Knothole Gang defeated the Ben Wa's in the final game 16-3 on Saturday afternoon. The Ben Wa's came out fast but their defense held Feinswog to only four goals in the first half, but he was able to score nine in the final quarter when he went down the pool because, "I've never seen anything like it," one spectator said.

"It was never meant to score," said Feinswog. After his spectacular shot, Feinswog left the pool because, "There's no possible chance."

Schoeller said that the first year of the league was a "real success which introduced a new sport that nobody had ever heard of."

The only major problem that the league encountered was the amount of forfeits. "I hope that next year people realize how hard it was for us to get into time early Saturday morning," Schoeller said. "But I think that we should have a much stronger league next year."

"And a much stronger Knothole Gang," Feinswog said. "We will be back."

Mr. Natural's is now carrying Pepperidge Farm Breads

Saturday. They only made 14 of 58 shots for 24 per cent. Southern's shooting percentage wasn't too much better 34 per cent as the Salukis dropped 75-74.

Next weekend SIU finishes its sweep of the Illinois teams. They will play both Illinois State and the University of Illinois in Champaign. After these two games the Salukis know how they stand before the state tournament March 4 through Saturday.

Can't say enough about the goal job Shawn Kenny, Wally Knezeck, Jeff Young and Jim Adams did, passing the ball to me," he said. "It was a good team effort all year." Feinswog provided the crowd with a thrill in the final quarter when he converted a long pass into a goal, by kicking it into the upper left-hand corner of the net.

"It's a much easier job to watch, but it was still the best game of the season," said Feinswog. This was the first year of the game for the season, said that his team's defense won it for them.

"No one can say anything about the goal job. From the get-go we took it to the lead," said Schoeller.

Guard Sue Schaeffer converted all her kicking chances.

A SAVANNAH-KNOThole Gang defeat the Ben Wa's in the final game 16-3. Feinswog said that the Ben Wa's defense held Feinswog to only four goals in the first half, but he was able to score nine in the final quarter when he went down the pool because. "I've never seen anything like it," one spectator said.

"It was never meant to score," said Feinswog. After his spectacular shot, Feinswog left the pool because. "There's no possible chance."

Schoeller said that the first year of the league was a "real success which introduced a new sport that nobody had ever heard of."

"And a much stronger Knothole Gang," Feinswog said. "We will be back."

double figures as closer to state tournament time.

SIU matmen pin two adversaries

(Continued from page 3a)

Goldsmith had a much easier time. He whipped Cincinnati's Rick Stahlecker 6-3, but couldn't gain a pin. Goldsmith made up in the 136-pound match against SIU's Ed Nelson. The Salukis pinned the out-class Nelson 14-3 on Saturday, winning the second period. Goldsmith's record is now 15-5.

In the locker room after the SIU match, Goldsmith said, "A lot of thoughts ran through my mind tonight, but I knew I wanted to win this. I've been game, I had a bad match this afternoon."

As for his NCAA chances, Goldsmith said, "I feel like I'm at my peak now. If ever I can do it, he said.

Women cagers win; Jerry tallied 19 in the Eastern contest; SIU Eastern whipping Chicago State

Water polo champs crowned

By Rick Korch Student Writer

Lee Feinswog's 31 goals in two games led the Knothole Gang to the man's intramural intercity water polo championship Saturday in Pulliam Pool. The Knothole Gang defeated the Ben Wa's in the final game 16-3 by smashing the Wonder Boys 27-2 in the semi-finals.

The Ben Wa's, who reached the championship game after beating the Aganians 16-3, were down only 6-4 at halftime. Ben Wa's halfback defense held Feinswog to only four goals in the first half, but he exploded for nine points in the second stanza as the Knothole Gang pulled away.

Jim Adams of the Knothole Gang said that the Ben Wa's came out fast at the beginning but "they died out by the second half." Feinswog commented that the Ben Wa's played a smart defense by stalling. Keith Stoeper, graduate assistant in charge of the league, said, "If the Ben Wa's had a strong bench, they would have made it a closer game. But it was still the best game of the season."

This was the first year of the game for the season, said that his team's defense won it for them.

"I can't say enough about the goal job. Shawn Kenny, Wally Knezeck, Jeff Young and Jim Adams did, passing the ball to me," he said. "It was a good team effort all year."

Feinswog provided the crowd with a thrill in the final quarter when he converted a long pass into a goal, by kicking it into the upper left-hand corner of the net.

"I've never seen anything like it," one spectator said. "It was never meant to score," said Feinswog. After his spectacular shot, Feinswog left the pool because. "There's no possible chance."

Schoeller said that the first year of the league was a "real success which introduced a new sport that nobody had ever heard of."

The only major problem that the league encountered was the amount of forfeits. "I hope that next year people realize how hard it was for us to get into time early Saturday morning," Schoeller said. "But I think that we should have a much stronger league next year."

"And a much stronger Knothole Gang," Feinswog said. "We will be back."

Women cagers win; Jerry tallied 19 in the Eastern contest; SIU Eastern whipping Chicago State

Water polo champs crowned

Three weekend victories pushed the women's basketball team's record to 6-4 as the Salukis drew closer to state tournament time.

Friday four players were in double figures in the Salukis' 75-74 win over Western Illinois University, 69-66. Forward Jan Winkler led the process with 16 points and eight rebounds. Center Jeff Hoffmann and forward Bonnie Foley scored 12 and 10 points respectively. Guard Sue Schaeffer accounted for 10.

As usual the Salukis dominated the boards, as the Salukis totaled 55 rebounds to Western's 34. Saturday the Salukis won a pair of victories. Saturday morning they defeated Eastern Illinois University, 72-32. In the afternoon, the Salukis whipped Chicago State, 79-70.

Hoffmann and Winkler led the team in both games. Hoffmann tallied 19 in the Eastern contest; Winkler scored 24 in the day's finale.

Eastern had an atrocious game.
Men gymnasts split on road

By Jerry Tucker
Daily Egyptian Sports Writer

After 19% season of SIU, a 195-0 record, six undefeated seasons and four NCAA titles, SIU head gymnastics coach Bill McNeil would feel pretty secure.

Until Saturday, perhaps. The Salukis beat Michigan State, minus new coach Steve Shephard, 93.25-104.25, snapping a three-meet losing streak in the process.

The unfortunate clincher was that the match was held in the poorest meet of the season, losing 9.06, 9.08 and 9.09, while the highest score was 9.15.

Denise Didier won the vaulting, m the losing 9.09, not winning. Grayson showed no improvement with respect to her performance, losing 9.06 with a three meet losing streak.

Denise Didier won the vaulting, the two events Didier did win, with 9.15. With that, she won the all-around title at Michigan, Mo., with blood Salukis Coach.

A...soo aggravated Lee pretty secure 194.25. The Diane Grayson, The rematch will be done 9.06. Klhy Kincer

Weaver gave the pilot (Terry Wending) the bad ticket, they took off and I went to find out about Scott," Meade recalled.

Meade had to wait until 10 a.m. Saturday to get the doctor's verdict (McNeil either pulled or slightly hurt a muscle), missing an early flight he had intended to take to get there to coach in time for the meet. Instead he spent the day watching a high priced district meet in Jersey, over the Michigan State coach-later for the results.

"Wending told me he's 1-0 and ready to apply for the job now," Meade laughed.

The Salukis won every individual event and fave of the six team events to up-end the Spartans.

Steve Shephard again won the floor ex, this time with a superior 9.2. SIU won the team event 34.55-33.40.

Troy Hanson made up for Friday night performance with a 9.2 win on the side horse. The Salukis won this team lead by taking the horse 30.05-28.00.

After staying close on the rings and the vaulting, SIU put the meet away by burying Michigan State on the parallel bars 35.25-30.75. Rick Adams won the bars with an 8.9 but teammate Kevin Muzer and Kim Wall were right behind with 8.8's. Lance Garrett won the vaulting with a 9.0.

Kim Wall, who had been in a brief slump, botched out of it in Michigan by winning the rings with an 8.8, the high bar with a 9.2 and the all-around with a 9.4 total.

The gymnasts next, and last, dual meet is Saturday following the SU-Louisville basketball game, when they meet the University of Iowa.

Can you shoulder it?

A Lieutenant of Marines. Command a Marine platoon or pilot a multi-million dollar Phantom jet. At your age that's more responsibility than most men will ever know. Can you shoulder it?

You begin leadership training to earn your lieutenant's bars next summer. No training of any kind is required during the school year.

If you can handle the job, the Corps will make you a Lieutenant of Marines the day you graduate.

Introduce yourself to the Marine Officer who visits your high school.

The Marines are looking for a few good men to lead.

The Marine Officer Selection Team will be at the Aviation school on February 24. They will be set up in the lobby. The team will be on the train cars, in the Saline and Inquis Room on February 25 and 26. Come by and see us.
Saluki blizzard ices win over Drake
By Dave Wieczorek
Daily Egyptian Sports Writer

An eight-inch snowfall on Des Moines, Iowa, and Drake's University early Saturday morning, nearly paralyzed the city and campus.

A second storm later is the evening almost buried the Drake Bulldogs basketball team alive. The storm blew in from Southern Illinois and took the Saluki wind completely devastated the Drake squad.

The SIU storm took a few minutes to build. Half ball when it did. Drake had lost another game 83-70. It was SIU's ninth conference win against two losses. The Salukis are now 11-4 in the season.

Drake dropped to 2-8 in conference and 7-16 overall.

Surprisingly, Drake led the Salukis until a lay by Mel Hughlett at the 18:28 mark of the first half put SIU in front for the first time. The second half was a Saluki attack.

In the last six minutes of the half, freshman Al Williams and Mike Glenn hit four and three baskets respectively to give SIU a 13-point lead at halftime. SIU's biggest lead of the half was 17.

The team's first half was the result of several baskets off the fast break, an uninspired 1st half and the rejuvenation of Williams.

Williams, who played his first offensive game in a long time, scoring 18 points. All scoring seven percent of 13, 34 percent from the field. Several of Williams' baskets came on close in shots. He also hit for three 10 to 15-footers off the fastbreak.

The second half was the last couple of games... Coach Paul Lambert said following the victory. "He just played real well.

"The victory was only SIU's third of the road this year, but a very important one.

The Salukis needed the victory to stay in the race for the Missouri Valley title.

"It's been tough playing on the road, although I think we've played well on the road. We did a better job of getting the ball up the floor tonight and getting into the offense quicker," Lambert said.

Salukis' defense was solid as the points started piling up faster than drifting snow. By the time six minutes had ticked away in the second half, the Salukis were up by 21. They held several leads of 10 points, the largest, 22, coming with 8:39 left in the game. Drake played a solid game in the second half.

Salukis' Mike Glenn scored 23 points to give SIU an 11-15 field goal attempts for 36 points. As for the 26-point (11 of 15 field goals) performance by Glenn, Ortgeal said, "That's a good one. Glenn's an excellent passer. He's like above and beyond anything else is his temperament."

"Paul's done a good job at SIU," Ortgeal remarked. "You have to think they have a good shot at our league. It's coming down to the last day, let's face it."

It would seem like many Drake fans were disappointed with the result. Although the official crowd count claimed 4,527 fans watched the SIU-Drake game Saturday it was more like 3,500. Few weather on and off the court probably had something to do with attendance.

Seniors' skills wills wrestling wins
By Scott Burnsle
Daily Egyptian Sports Writer

Three Saluki seniors received wrestling "degrees in excellence" Saturday at the Valley Conference. It's regular season with two impressive victories.

Saturday afternoon the Salukis threw a 33-6 stranglehold on the University of Cincinnati in the Valley Conference. The Salukis won Illinois State 28-22. These wins, which lifted SIU's season record to 15-7 were the last home matches for seniors Joe Goldsmith, Jim Horvath and Mark Brown.

Altogether the trio has posted a 69-4 record this year for Coach Linn Long's record 15-7 squad, a team calls the "best all-around team I've had."

Illinois State

drops Valley bid

NORMAL, Ill. (AP) - Citing "significant uncertainties" over the future of the Missouri Valley Conference, Illinois State University withdrew its application Monday to join the conference.

The official application was not available on file since early 1975, and an official visitation of the university by conference officials will be forthcoming in the months ahead.

Swimmers dunk last two home foes
By Mark Kaziwsky
Daily Egyptian Sports Editor

SIU swimming Coach Bob Steele may not have achieved his goals this season. Saturday, while Horvath only wrestled in the Illinois State tussle.

The SIU wrestling team was perhaps the closest of the day. Pitted as the captain, with both Williams and Horvath won the 187-pound match on a second place in the last few seconds of the third period.

Williams had taken the lead, 65 with 55 seconds left in the match, on a one point escape. However, Horvath had built up a substantial margin on riding time, which tied the match. One second before the final buzzer, Williams was penalized one point for stalling, which enabled Horvath to win.

After the match Williams said he thought the call was justified. Williams won a similar decision earlier this year.

Both wrestlers may meet at the NCAA regionals this weekend. Williams thinks Horvath should be seeded the No. 1 for the tournament.

"I have a tough time riding him. To beat him in regionals I'm just going to have to take him down better than I have ever before," Williams explained.

As for the possible top rating at regionals, Horvath said, "I would like to be No. 1 strictly in terms of psyching them (NCAA opponents) out with it." Horvath said.

As for the match, Horvath said, "I got beat by a stalling point against Williams earlier. I didn't expect to get it, but I'm glad it happened." Horvath won 25-13 for the season.
