Troops withdraw as fighting continues

BEIRUT (AP) — U.S. Navy helicopters took Marines from their base at Beirut's airport to withdraw from Lebanon on Tuesday as the Marines withdrew from the city, Beirut officials said.

Israeli jets, meanwhile, bombarded Beirut, and the Syrian-controlled mountains outside the city.

"Today the support people have gone and we're working on the evacuation," said Marine spokesman Maj. Dennis Hovland. "Today is the first day of the relocation of the 1,300 combat troops standing by since President Reagan announced on Feb. 7 his plan to withdraw them.

Brooks said he was not sure how many Marines would be withdrawn Tuesday. He estimated it would take a week or two to evacuate the base at Beirut's airport. Since the base was established in September 1982, 265 U.S. servicemen have died there.

The airport has been virtually circled by anti-government militiamen since last Wednesday, when druze fighters drove to the coast south of the base, linking up with their Shiite allies and further undermining the government of President Amin Gemayel.

"I'm ready to go. I've got women to meet and beers to drink," said Lance Cpl. Samuel Lee, 20, of Miami, Fla., as he moved out. Asked about the Marines' mission, he said, "We were just trying to restore the look it happened."

Brooks said the Marines will leave their bunkers and foxholes intact. He added: "I haven't been going over these positions, but they're welcome to them.

Akef Haidar, a former Lebanese army colonel now chief of military of Ama'il, the largest Shiite militia, said his forces would not take over the airport. "If we did that, we would hold better posts in the area."

The Israeli command said its troops at four buildings were "cribbed as guerrilla bases against the Radical Shiite group after an highway in the central mountains and returned safely after the remaining night."

Radio stations said the large base was occupied by Syrian-backed Palestinian guerrillas and some were killed.

Since the Druze offensive a week ago, the Israeli army has been sending patrols north of the guerrillas, which occupy the Awali River to the outskirts of Damascus, 12 miles south of Beirut.

Pristine Minister Yitzhak Shamir, in Brussels, Israel, said Israel does not "intend at this stage" to move forces into permanent positions north of the Avel.

Meanwhile, Lebanese radio stations said Saudi mediators were working in Beirut and Damascus, Syria, on a new plan calling for a cease-fire throughout Lebanon.

New post at SIU-C to be filled locally

By Jay Small
Staff Writer

A search for an associate vice president for academic affairs in the academic affairs office could be completed by May, a University administrator announced Monday.

Guyon Jewell Friend left that position last month, and the search for a new associate vice president for academic affairs, also known as academic affairs, will remain.

Robert R. Marks, director of the Academic Skills Center, will be reassigned to academic affairs to serve as the liquor control commissioner of the School of Hotel and Resort Management.

Transfer of bar's license OK'd by city

By Bruce Kirkham
Staff Writer

Carbondale's Liquor Control Commission has approved the transfer of the Class A liquor license for Gatsby's bar on 611 S. Illinois Ave., to be used for a liquor package store in the former Gatsby's doughnut shop.

John W. Dunning, of Gatsby's bar on South Illinois Avenue, recently purchased the building housing John Dough's doughnut shop.

Mayor Charles R. Vaught announced it would have an option to purchase the building on South Illinois Ave containing John Dough's.

The City Council, which serves as the liquor control commission, limited the number of liquor licenses available for use on South Illinois Avenue in a 1980 ordinance, eliminating the possibility of a separate license being issued.

The commission approved the license transfer by a 4-0 vote and said they would have a final vote next month.

Commissioner Patricia Kelley said she would not vote against the transfer because the board had approved the plan "canalizing" a bar in the building.

However, Kelley said, that she voted to approve the transfer because she would allow a liquor license business to replace the recently closed Great Escape.

Winfree was granted permission by the commission last week to increase the number of liquor licenses on that bar, an expected to be completed by June, Wards said.

John Mills, chairman of Carbondale's Liquor Advisory Board, last week requested that the board conduct a special meeting to consider changing the ordinance on the number of liquor licenses on that bar.

However, Wards could not attend the meeting and arranged to postpone consideration of the ordinance, according to City Clerk Janet Vaught.

Mind games

By Jeff Wilkisson

That figure has remained constant since 1980. Police say that number is too.

"I've lived in three different neighborhoods in Carbondale," said Margot Kirkham, a resident of Carbondale. "They're going to school here," said Matt Hildreth, 21, of Carbondale.

"People used to sit on their front porches in the evenings. They saw and knew everyone living in the neighborhood. The communication was better.

"Now," he said, "people come home from work, turn on their television and are cut off from their neighbors. We're working to increase awareness.

One problem the program is facing in Carbondale, police said, is the number of transient students living among longtime residents.

"In the past it was all families in this neighborhood," said Olia Heeans, a resident of Carbondale's north side for 28 years. "Everyone knew each other. Now you see new faces every day."

This week has gotten worse since Amal, the largest Shiite militia, said his forces would not take over the airport. "If we did that, we would hold better posts in the area."

The Israeli command said its troops at four buildings were "cribbed as guerrilla bases against the Radical Shiite group after an highway in the central mountains and returned safely after the remaining night."

Radio stations said the large base was occupied by Syrian-backed Palestinian guerrillas and some were killed.

Democrats to hone appeals for New Hampshire primary

WASHINGTON (AP) — Taking no time out to celebrate their Iowa victories, Walter F. Mondale and Sen. Gary Hart turned their attention on Tuesday to New Hampshire and the next big event on the Democratic presidential circuit.

Hart, who surged to a second-place finish in Iowa, was out early in New Hampshire the morning after, telling a crowd in Bedford that Mondale’s support is “very soft” and that the Hart campaign planned to nibble away at Mondale’s big lead and well-financed organizations.

But Mondale’s chief polster insisted that the former vice president is seen as the candidate with the most experience and that negative attacks on him backfired on his rivals.

All eight Democratic candidates were making their way to New Hampshire for a League of Women Voters debate on Thursday where they will hone their appeals for New Hampshire’s first-in-the-nation primary next week.

The Iowa results boosted Mondale’s delegate total to 118. Sen. John Glenn was in second place with 17. The total includes House Democrats who were selected as delegates by their colleagues last month.

On Monday, Hart’s crowded 15 percent of Iowa Democrats compared to Mondale’s 45 percent. Glenn had 5 percent for a fifth-place finish.

Hart described his second-place showing in Iowa as “a big boost” and predicted that he will emerge as Mondale’s chief rival after New Hampshire’s primary on Tuesday.

The Iowa results boosted Mondale’s delegate total to 118. Glenn was considered the biggest loser in Iowa.

The American Tap

WILLINGHAM (AP) — A starving escaped murderer went on a 20-minute rampage while he was on the run in New Hampshire, attacking old people and killing a 73-year-old grandmother who fixed him a big breakfast, authorities said Tuesday.

Grandmother disarms murderer

BRADEN, Tenn. (AP) — A starving escaped murderer who was shot by a woman in Tennessee was found dead early in New Hampshire on Tuesday, police said.

A grandson of the 73-year-old woman who was killed by the 27-year-old man said he had no solid evidence that the man had killed fewer people in Cambodia and Laos than in 1982.

But Mondale’s chief polster insisted that the former vice president is seen as the candidate with the most experience and that negative attacks on him backfired on his rivals.

City to join other communities to intervene in ICC hearings

By Bruce Kirkham
Staff Writer

Carbondale will enter into an alliance with several Southern Illinois communities and agencies to intervene in the Illinois Council of Local Government Officials' hearings on comprehensive energy conservation plans of Illinois utility companies.

The City Council approved a 5-2 ordinance allowing the city to enter into an agreement with the communities and agencies to take part in joint intervention in the proceedings.

The city sent more than 200 letters to potential participants throughout Illinois asking for assistance with the intervention process. Positive responses have been received from 19 local governments and public agencies, some of which have donated funds to the effort totaling almost $5,000.

Carbondale's ordinance was approved by 3-2 vote. Councilmen Archie Jones and Patrick Kelley voted against the ordinance.

"I'm just a little shaky about what our obligations are going to be," Jones says.

The ICC ordered regulated utility companies to prepare comprehensive energy plans to be implemented in two phases. The first, or interim phase, consisted of short-term programs, most of which have received ICC approval and began in 1983.

The second phase, which calls for the implementation of long-term conservation programs, is awaiting approval by the ICC. The ICC invited concerned local governments to intervene in the approval process.

Carbondale withdrew its objection to the interim phase of the program so that it could focus attention on the long-term programs.

The council also approved an ordinance that would give Carbondale's non-union employees a 4 percent pay increase in FY 84-85.

City Manager Bill Dixon said negotiations on the proposal with representatives of the employees are pending. The council approved the proposal after an hour-long executive session Monday.

The council also approved an ordinance raising the speed limit on parts of Wall Street and Pleasant Hill Road from 30 mph to 40 mph.

The increased speed limit will be in effect on South Wall Street from the Wall Street Quadrangles south to the Pleasant Hill Road junction, and on Pleasant Hill Road from the Wall Street junction west to the Route 51 intersection.

The change was recommended by the Carbondale Police Department and the Public Works Department. Police Chief Ed Hogan called the increase "reasonable and within the parameters of safety."

Nicaraguan government seeks democracy through election

By Juan Maites
Of the Associated Press

MANAGUA, Nicaragua, (AP)-The leftist Sandinista government said Tuesday it will hold nationwide elections Nov. 4, three months earlier than expected. But it insisted that Marxism will remain a part of Sandinista democracy.

"We do not accent democracy that is ordered by the U.S. government," said Daniel Ortega, coordinator of the governing junta's apparent reference to U.S. pressure for free elections.

November 4 is two days before the U.S. general election. Ortega spoke to an estimated 130,000 people in the Plaza of the Revolution to mark the 30th anniversary of the death of guerrilla hero Augusto Cesar Sandino, the Sandinistas' namesake.

Ortega also announced:—The president, vice president and legislators will take office Jan. 10, 1985, for six-year terms.
—The voting age will be lowered from 18 to 16.
—An amnesty for rebels, to expire Tuesday, will extend to May 4. The amnesty does not extend to rebel leaders.

He did not mention the state of emergency, in effect since March 1982, which has restricted political activity because of what the government said was the threat of a U.S. or U.S.-supported invasion.

The international education and continuing education units are among those to be placed under the new associate vice president for services. That administrator will also be responsible for the master's degree program in community development and the Office of Regional Research and Service, according to the plan.

Iowa caucus gave surprises, insights

WHILE THE NEWS crews head to New Hampshire, political puns are busy trying to make sense of the results of the Iowa Democratic caucus.

A look at the predictions and a few solid conclusions can be drawn from the caucus tallies and a few observations made about the evening.

Walter Mondale, for example, captured about 45 percent of the caucus vote and is reported to be the early front-runner. But it is not over until Mondale and, in doing so, a failure of the Bursar's office, will escape. The president of the Bursar's office is one such position that will have to be filled by Mondale himself.

One of the most surprising developments was the poor showing of the former astronaut, who was expected to draw a crowd of his own. Mondale's lead is insurmountable. Kodak's lead is insurmountable. Kodak's lead is insurmountable.

As for the Iowa caucus, Mondale and his supporters would be more likely to back Hart than Mondale, some analysts see the race getting closer as the campaign marches on. Others, however, say Mondale's lead is insurmountable.

But perhaps more important than serving as a predictor of the eventual outcome of the Iowa caucuses is the role that the popular press will play in the electoral process used to nominate presidential candidates. Mondale's support has waned in recent weeks, in part because the Iowa caucuses aren't representative of the general public, they say that giving his name to those who would speak could mean Russian at the time, served as an aid and interpreter for Ambassador William C. Bullitt.

THIEVERY has no merit

Observers point out that the Democratic candidates spent $4 million on advertising in Iowa to attract the attention of the Iowa electorate, but the important thing is that Mondale's campaign is going to continue. He has surprised everyone with his surprising success has brought a lot of speculation about what will happen as candidates drop out of the race. On the other hand, McGovern and Cranston would be more likely to back Hart than Mondale, some analysts see the race getting closer as the campaign marches on. Others, however, say Mondale's lead is insurmountable.

Perhaps Mondale's birthday декабрь в Москве was in the first place to travel to the Soviet Union a year ago opened there in 1983. As one of the few diplomats who could speak Russian at the time, served as an aid and interpreter for Ambassador William C. Bullitt.

The Iowa Democratic State Department duties during World War II before returning to his desk. I don't care who you are. Reagan certainly can laugh off the attacks of the system. He is a great communicator and has not broken stride since.

But in light of these considerations, the readiness of the Iowa system is vital to its continued existence. But by the time November 4, Daily Egyptian, February 22, 1984

From the condition of my backpack, I am sure that it is to be observed to you that I cannot afford to replace any of those items (I took too much for the trip! I hope to buy those books). Should you feel so inclined, please return any of those things that are certainly replaceable, such as my keys, glasses, or any of my treasures (my boots!), please do at the Recreation Center desk. I don't care who you are. These are the faiths in humanity resulting by these things.

I found the Associated Press article, printed in a recent edition of the Daily Egyptian, covering Ronald Reagan's success, and a few years ago, and it's no wonder. The Great Communicator must probably only putting an end to the freeze on weapons. This is a challenge to which we must respond — before it's too late.

Student leaders praised for maturity

I would like to compliment the leadership of the Graduate and Professional Students Association and the Undergraduate Student Organization. Ann Grewell and Joe P. Smith have a long way to go in order to receive a short-term loan you had to have an excess of funds. This is because funds have run out of the Bursar's office. Correct me if I'm wrong, but it would seem to me that a student with excess money in the Bursar's office would simply take his money instead of applying for a loan. Applying for a loan would only be a waste of his time and money than one needs to spend.

My only question is why do we encourage our students to have an excess of funds? It seems to me that only putting an end to the excess of money in the Bursar's office works hard and deserves your function. It is not for us to establish — and, in doing so, to further the public's understanding of the nature and consequences of a particular event. This is not the least amount of naive, uninformed Soviet "dupes."

Guyon, GPSC to discuss effect of course cuts on assistantships

By John Stewart
Staff Writer

John Guyon, vice president for academic affairs, will up-
date the Graduate and Professional Student Council on the possible effects of graduate student course cuts proposed by the General Education Council Committee at 7 p.m. Wednesday in the Student Center.

The GPSC will also consider a resolution in support of the National Areas Committee.

--- Health and Fitness Guide ---

AQUA DANCECIBE: Bend, and stretch to music in the Recreation Center Pool. Session II meets 7:30 p.m. to 8:30 p.m. Tuesdays and Thursdays, Feb. 2 to March 1. No registration required.

ROCCI BALL TOURNEY: Indoor lawn bowling. Teams of three players play on Tuesdays and Thursdays, Feb. 5-March 1. For information, call Rick Creem or Marilyn Baumgartner, 536-5597.

TOWN IS 'NICE AND QUIET'

Berner, a retired carpenter, still haunt residents of the town in December 1982, shortly after the federal buyout.

"Nice and quiet," said John Guyon, GPSC president, "but they are doing what they can to keep alive."

Since then, there are many families that have sold their homes and moved away, anxious to regain some sense of normality. But Times Beach was ravaged by the discovery of dioxin and heavy flooding. All time record floods devastated the town in December 1982, Shortly after dioxin was found there.

Only six families of an original 2,800 people remain, living amid rutted deserted streets, rusting cars and little orange flags that mark the spots where dioxin samples were taken.

"Things around here are a lot like they were back in the early 1950s," said Walter Adams, who still lives in the city located 400 miles southwest of St. Louis. "Nice and quiet."

Carolyn McCabe, who also lives in Times Beach with her husband, said she has lived there for all of her 34 years.

"We'd like to stay, but they're not going to let us," she said.
Ignorance spaws computer phobia

by Phil Milano

People who fear advancing and changing technology would be less fearful of it if they understood it more, according to Larry Hengehold, director of the education and training division for Afton, a computer store.

"Technophobia," a term coined by Richard J. Beck, is the fear of all types of technology by people of all backgrounds. 

"One of the biggest fears is that 'I might break something,'" Hengehold said. "People sit down at a terminal and think, 'What if I make the whole computer crash? What if it's my fault that the whole campus computer goes down?'"

Hengehold noted that although computers have been around for about 30 years, they have only been around in a 'working sense' now that they are finding their way into people's living rooms as a part of modern life.

The adults who didn't have an education opportunity for education and training in computers have a tendency to be a little afraid," Hengehold said. "As the automobile and typewriter were introduced in previous generations, the introduction of the home computer means people must understand 'new' learning, and many people fear being uninformed, he said.

"The kids in the classrooms are in an educational environment and take up computers very easily," Hengehold said. "That's because they are learning other subjects at the same time, which they make mistakes in, he said.

"Susceptibility to technophobia doesn't depend on a person's educational level, but on the degree to which someone has been exposed to technology. Hengehold said.

"I know professors who say 'You're going to put one of those terminals on my desk.'"

Professors aren't afraid of learning, Hengehold said, for they perform research at various times. But this is an accepted form of learning because professors are discovering things that others may not know about, he said. It is the thought that someone may discover that professors don't know something that may trouble them.

"They may fear people thinking they aren't experts," Hengehold said.

Several steps can be taken to alleviate the fear of computers, according to Hengehold. The first is to discuss computers and their relationship to people with someone on a compatible level, preferably a peer.

"Getting acquainted with computers before working on them will help to overcome fear and will increase confidence," he said.

After instruction, which could come from a friend, a person in the office down the hall or a salesperson at a local computer store, hands-on experience is necessary, Hengehold said.

Computing Affairs offers instructional workshops throughout the semester. These are beginning-level workshops consisting of two to three sessions of introductory material and practice.

"If you want a more professional, in-depth understanding of computers then you may want to take a course in continuing education at the University or at a community college, or you could take credit classes at SIU-C," Hengehold said.

"People attribute more intelligence to computers than computers have. In fact, computers really don't have any intelligence; they only do what someone has told them to do," he said. "Sure, you will make mistakes on a personal computer or on a terminal, but you'll soon find out that you made a mistake, not the whole world didn't come to an end."

Sidewalk plan for disabled up for award

By Paula J Finlay
Staff Writer

Making Carbondale's sidewalks more accessible for the disabled is one of 12 goals community projects being considered for 13 National Awards. The National Organization on Disability will notify winners in about a week of its $10,000 community partnership competition, Jane Fitzgerald of NOI said Tuesday.

In observance of the Decade of Disabled Persons which began in 1983, NOI will give one $5,000 award to the committee's seventh annual Black Community Partnership Competition. The committee's project, said Tuesday.

A 50-voice gospel choir will be sponsored by the Spiritual Travelers, accorded

Gospel choir to sing at conference

A 50-voice gospel choir will sing at the Ministerial Conference of Carbondale and Vicinity's seventh annual Black History Musical at 7 p.m. Friday in the Greater Gillespie Church, 810 N. Wall St. The choir will sing two original compositions by Corinne Ruggles of Carbondale. A cappella selections will be sung by the Spiritual Travelers of Cape Girardeau and the Ware Sisters of Cape Girardeau.

Community puts halt on McDonald's

NEW ORLEANS (AP) — A quiet New Orleans neighborhood Tuesday declared victory in its battle to keep McDonald's from selling sandwiches on land now home to an old-fashioned soda fountain.

City Councilman Bryan Aigner announced that McDonald's Corp. has decided to drop plans to build a franchise in the Carrollton sector, on property now occupied by Schweickhardt's Drugs, a post office and a sandwich shop.

"We appreciate McDonald's realizing that the community has strong feelings for its heritage," said Jay Furrini, a merchant who was one of the most vocal opponents of the franchise.

A moratorium on fast-food outlets brought on by the neighborhood uprising remains in effect, and a Planning Commission zoning study of the area will continue, Wagner said. It is my opinion that we will probably need to do some "zoning in the area," he said. Furrini said the neighborhood group will continue efforts to revise zoning requirements to prohibit bars and fast-food outlets in the area.

Residents, who have complained of creeping commercialization in their neighborhood, reacted with petitions and loud protest at council meetings to halt McDonald's plans to buy property along the tree-lined street as tracks.

Last Thursday, the council banned permits for fast-food outlets in the area until Dec. 31.

Schweickhardt's, an old neighborhood store, operates what is called the city's last "real" soda fountain.

"Only......." Community puts halt on McDonald's

Stephanie Willoughby, professor of Mathematics at the New York University and president of the National Council of Teachers of Mathematics, will give the keynote address, "Striving for Excellence in Mathematics Education," at 9 a.m. Saturday in Necker's C14.

Other events include the following:

— A "Meet the Experts" session in which participants can talk to teachers who use microcomputers in their teaching.

— Workshop concerned with making and using teaching aids. Presentations by classroom teachers, on microcomputers: problem solving and Chisanhop Classroom teachers will also speak on stimulating the courage to learn mathematics, on conquering the fear of fractions and on teaching decimals, percentages and ratios.

— A Quiz Bowl competition and math contests.

The conference is sponsored by the Illinois Council of Teachers of Mathematics, the SIUE Division of Continuing Education, the Curriculum, Instruction and Media Department and the Department of Mathematics.

Mathematics teachers at all levels, in addition to others interested in mathematics teaching, are invited to attend. Registration for the conference is $13 and should be sent to Joe Lynch, Continuing Education, SIUE, Carbondale (629-775). Interested people may also register at the conference at 8 a.m. Saturday.

An increased need for mathematics in society and the importance of microcomputers in the classroom will be two of the topics discussed at a mathematics conference from 8 a.m. to 5 p.m. Saturday in the Whittemore Center.

Stephanie Willoughby, a professor of Mathematics at the New York University and president of the National Council of Teachers of Mathematics, will give the keynote address, "Striving for Excellence in Mathematics Education," at 9 a.m. Saturday in Necker's C14.

Other events include the following:

— A "Meet the Experts" session in which participants can talk to teachers who use microcomputers in their teaching.

— Workshop concerned with making and using teaching aids. Presentations by classroom teachers, on microcomputers: problem solving and Chisanhop Classroom teachers will also speak on stimulating the courage to learn mathematics, on conquering the fear of fractions and on teaching decimals, percentages and ratios.

— A Quiz Bowl competition and math contests.

The conference is sponsored by the Illinois Council of Teachers of Mathematics, the SIUE Division of Continuing Education, the Curriculum, Instruction and Media Department and the Department of Mathematics.

National, low prices you can believe in...
Jackson denies making slur, says innuendo, heresay reign

By Ana Blackman

WASHINGTON (AP) — The Rev. Jesse Jackson denied Tuesday that he made an ethnic slur against Jews and accused Democratic presidential rival Walter F. Mondale of leaking a letter he said he wrote Mondale and it is considered offensive by many Jews.

Jackson, in private conversations, has referred to Jews as 'Hymie' and to New Yorkers as 'Hymies,' which a shortened version of Hyman, a surname, and is considered offensive by many Jews.

At a press conference in his downtown headquarters, Jackson said, "My use of such a term as attributed to me is inconsistent with my long record on human rights — the rights to have people live with personal dignity."

Jackson later released a letter he said he wrote Mondale on Monday. "Each time you and I have not privately, there was a leak from your campaign to the press of the substance of our discussion," Jackson wrote.

"It was no accident that during my recent appearance on 'Face the Nation,' CBS moderator Lesley Stahl's lead question to me was from what she described as one of our confidential meetings. The question allegedly stated my own position concerning the PLO Palestine Liberation Organization. This latest incident raises a fundamental question of trust."

Mondale and his campaign staff were in an airplane and could not be reached for comment immediately.

At his news conference — where there was no mention of the Mondale letter — Jackson said he was picketed by some Jews when he made his presidential announcement last November, that an organization has been formed called "Jews Against Jackson" and that a phrase, "Run Jesse Run," has been used against him. The motto of Jackson supporters is "Run Jesse Run."

"It is clear my campaign has been hounded by certain members of the Jewish community," Jackson said. "We're being pursued. We're being persecuted. It is dangerous for two minority groups as blazed as blacks and Jews have been historically to get locked into a confrontation."

Asked whether he thinks Jewish leaders have tried to stop any harrassment of his campaign, Jackson said, "I'm convinced they have not. There has been too much silence. If a group of blacks in this country who were disrupted by a major campaign by a Jewish leader running for president, we would stand boldly against that because it would not be right."

Jackson's comments come at a time when his relations with the Jewish community have been strained because he supports creation of an independent Palestinian state and has called for recognition of the PLO. He also says security needs of Israel must be met.

Illinois cats may triple population by end of century

CHAMPAIGN (AP) - Illinois' cat population will double or triple by the end of this century, and that will mean trouble for wildlife in the state, a University of Illinois professor says.

Richard Warner, a wildlife ecologist, estimates that the cat population in Illinois will increase from its present 3.5 million to between 15 million and 1 million by the year 2000.

More people have cats now, and many of those people live outside cities, he said.

Three-quarters of the cats are in rural areas, so there will be "clearly a dramatic impact" on wildlife such as rabbits, birds - often the targets of cats, he said.

"The problem is that we have several species that are barely existing out there and this will introduce a severe pressure on them," said Warner, who also works with the Illinois Natural History Survey.

Warner, who studies the number and habits of Illinois cats, said they will hunt and kill wildlife even though their owners feed them regularly.

In addition, he said the natural habitats for wildlife are being destroyed as more farmland is created.

THE SOCIETY for the Advancement of Management will meet at 7 p.m. Wednesday in the Student Center Mackinaw Room. Accountant Rusty Thompson of the Holt, Peterson and Thompson accounting firm will be the guest speaker.

SUSAN DILLERSHORST, senior student from Thompson Point, will hold a meeting at 8 p.m. Wednesday in Lents Hall. For more information, call the Undergraduate Student Organization at 536-3381.

SALUKI FLYING Club will show a McDonnell-Douglas Corp. film on the F-15 Eagle and the AV-8 Harrier at 7:30 p.m. Wednesday in the Student Center Margaret.sa Room. For further information call 436-3831.

ROAD RUNNERS Club will meet at 4 p.m. Wednesday in the Student Center Satellite Room. Meetings are going to St. Louis are encouraged to attend.

CANOE & KAYAK Club will hold a new member meeting from 8 to 9 p.m. Wednesday in the Recreation Center Conference Room. White water movies will be shown. Applications will be made for trips. For more information call Brad Jacobson at 536-5031.

KANGAROO (AP) - A monster fish dines on ducks; northern pike may be culprit

KANGAROO (AP) - A monster fish dines on ducks; northern pike may be culprit

A monster fish dines on ducks; northern pike may be culprit.

Many fishermen think the big fish might be a cousin of an upstream northern, dubbed the 'Mill Race Monster,' which lurked in Kanakakee River holes near Wilmington last spring. The fish was credited with puckering several ducks off the surface of the Mill Race pond on April 2. Chicagoan Jim Pecoraro may have caught the monster on April 23, when he said he hauled a giant, 21-pound, 2-foot-long northern pike there, using a 6-inch fish for bait. At the dock, the monster was being lazered upstream and some fishermen think the monster isn't a relative - not a relative - may be the culprit.

City can't afford to restock facilities

Campus fallout shelters called obsolete

By Phil Milano
Staff Writer

SIU-C students and faculty may dangers if those yellow "fallout shelter" signs on campus buildings still have any relevance, according to Steve Piltz, coordinator of the Carbondale Emergency Services and Disaster Agency, the shelters are considered pretty well obsolete and fairly useless now.

Piltz said action on the shelter program at SIU-C and in the city of Carbondale is needed now because the Cuban Missile Crisis of 1962 faded in memory. The supplies that had been in the shelters until recently deteriorated or were vandalized, he said. Although most of these supplies were discarded, some still remain in the basements of campus buildings.

The shelters contained food supplies such as crackers and lemon drops, a water supply, medical kits and a sanitary facility. The shelters consisted of a metal barrel and rollof toilet paper. The fuel was wood.

According to Piltz, national civil defense plans call for about 40,000 fallout shelters in the St. Louis area to come to Carbondale in the case of a nuclear attack.

"Basically, during the days prior to the Cuban Missile Crisis, we would try to advise people to head for the nearest shelter in their homes," he said. "We would advice them to pile dirt over basement windows and making cubicles in basements by using broken furniture covered with books or blankets. DOE had some standards for shelters outlined in a Department of Defense emergency pamphlet indicating the necessary variances of four inches for concrete, five inches for wood gravel and 18 inches for wood."

The improvised protection provided by the above action would probably be pretty good," Piltz said.

Piltz said the Carbondale Emergency Services and Disaster Agency has a 60-page pamphlet prepared by the Civil Defense Preparedness Agency, which leaves in holies of city buildings for people to take, or which can be obtained from the agency. The pamphlet offers information on shelter lining, warning methods, fallout protection and emergency care of the sick and injured.

Because the federal government has taken little action since the 1960s, fallout shelters in recent years, the city, which is now primarily responsible for the shelter program, cannot afford to restock the shelters for the approximately 75,000 people who might use them. Some church basements function as shelters, as well as the basements of some businesses.

Total fallout shelter space for the city and the campus can hold 27,000 people. Piltz said the 45,000 people from the East St. Louis area would pose a space problem, according to Piltz, but those shelters could alleviate it. "Obviously we'd have some problems," he said.

"If something happened today, the shelters wouldn't be in a condition to house people for an extended length of time if the radiation was such that you couldn't leave the shelter. There are really no supplies down there, and the human body can't go much longer than five or six days without food or water," according to Piltz, the federal government conducted shelter upgrade studies in the 1960s and early 1970s. He said the space provided for each individual in the shelters is "just barely enough to be comfortable sitting, lying down, maybe a foot or so on each side."

SIU-C controlled its own civil defense and natural disaster program until the mid-’70s. When the city decided to incorporate the campus program into its emergency services program, The University provided radio equipment for the city program after the city program was established.

Piltz said local schools and radio stations have a special warning receiver with which to monitor information from Carbondale's underground warning facility in City Hall. Carbondale has a separate warning facility for its Public Safety and Physical Plant, as well as Clarence Dougherty, president for campus services, also have the special receiver.

"The system is used mainly for severe weather warnings and power outages, which security or physical plant employees handle. The community is usually alerted to danger by city and campus sirens."

"The security office has an emergency procedures manual, which it is updating," he said.

The University handles emergencies on campus, but the city has the coordination responsibility for emergencies affecting both the city and SIU-C, Dougherty said.

Piltz said civil defense services program deals more with civil defense and natural hazard warnings, such as tornadoes, than with civil defense, according to Piltz. "We, dealing with Southern Illinois' earthquake vulnerability because of tremors and small quakes in the New Madrid fault zone has led to federal scrutiny of the area. Carbondale's disaster agency has participated in the study by gathering structural data on critical buildings in the city, schools and hospitals.

"We've gotten very objective data," said Piltz. "We have engineers from the federal emergency management agency, but we have not received a report yet," Piltz said.

U.S. lowering prices to pry into uranium market

By Patricia A. Paquette
The Associated Press

OAK RIDGE, Tenn. (AP) — The United States has extended the moratorium on uranium enrichment operations, a declining influence in the world uranium market. The move could mean the United States is going all out to woo back customers lured away by cheaper foreign supplies.

An increase in the nation's domestic uranium production, which is under foreign enrichment, which is used as fuel for nuclear power plants, would help the U.S. economy and slow the proliferation of nuclear weapons, Department of Energy officials say.

Like any merchant trying to improve business, the United States is trying to make its product more attractive. "The key to that is technology," said, new in research and construction stages.

Mined uranium "enriched" by centrifuge is a small portion of material that can undergo nuclear fission, but the Department of Energy says new technology using centrifuges to separate uranium will cut prices to less than the present level by the mid-1980s.

In addition to slashing prices, the DOE is negotiating new contracts that say foreign customers may get 30 percent of their enriched uranium from the United States. The new contracts will allow the United States to beat its competition.

The Energy Department, which collected $2 billion last year on uranium enrichment plants throughout the country, is seeking 25 percent of the U.S. uranium enrichment market, said Ewen Holm, DOE's energy manager for enrichment.

But DOE's foreign customers, who 10 years ago got virtually all of their enriched uranium from the United States, now rely on European producers for nearly 70 percent.

Besides losing the foreign market, DOE is enriching less uranium because the nuclear power industry has not grown as quickly as projected in the 1970s.

DOE's gaseous diffusion plants in Oak Ridge, Fortsmyth, Ohio, and Paducah, Ky., are operating at roughly 65 percent capacity, said John Longenecker, director of DOE's nuclear energy agency for enrichment.

New business would help create jobs in the country. But more importantly, it would slow the spread of nuclear technology, Longenecker said.

"We don't have the capability and the supply of enrichment uranium to meet foreign demand, insufficient to less likely to build their own enrichment plants and transfer their raw materials to building nuclear weapons," he said.

Electra uranium gas was used to make bombs.

Energy Department officials said the new ideas went over well at a two day conference held in June in Oak Ridge.

Some 250 representatives from U.S. and foreign utilities, fuel fabricating companies and enrichment plants, have bought enrichment plants for the Spanish government, said foreign buyers may be drawn to the new contract because "some countries are hesitant to be involved in a country as a supplier."

The official spoke in a condition that he not be named.

That new provision, which says DOE customers may get 30 percent of their enriched uranium from the United States, now, or the department, could also result in the loss of some domestic business for DOE.

DOE's two European competitors are closely watching the situation. More than a dozen representatives from foreign companies have met with DOE officials about the new provision, which says DOE customers may get 30 percent of their enriched uranium from the United States, now, or the department, could also result in the loss of some domestic business for DOE.

Some customers haven sunk more into the new process for enrichment.

H警示教育 programs, a representative for a nuclear fuel company in southern Sweden, said most of his country's 12 nuclear power plants are DOE customers, and his company would most likely switch to the new contract.

A representative from another company, which buys enriched uranium for the Spanish government, said foreign buyers may be drawn to the new contract because "some countries are hesitant to be involved in a country as a supplier."

The official spoke in a condition that he not be named.

That new provision, which says DOE customers may get 30 percent of their enriched uranium from the United States, now, or the department, could also result in the loss of some domestic business for DOE.

DOE's two European competitors are closely watching the situation. More than a dozen representatives from foreign companies have met with DOE officials about the new provision, which says DOE customers may get 30 percent of their enriched uranium from the United States, now, or the department, could also result in the loss of some domestic business for DOE.

Coughman holds the controlling interest in a French gaseous diffusion plant that provides enriched uranium to France, Italy, Spain and Belgium, which form the consortium, EURODI.

The utility executives listened to Coughman's sales pitch, which included the phrase "intermediate price" and more flexible terms than even those offered by DOE, said the official.

Coughman had not signed contracts with Franklin Electric Co. and Wisconsin Public Service.

Officials from URENCO, a consortium of Great Britain, West Germany and the Netherlands, refused to comment on their future strategy.

DOE's advanced centrifuge and laser separation technologies will be cheaper chiefly because they are much more difficult to develop and their simpler diffusion, now used in all plants, would be more difficult to repurpose.

City of Carbondale's underground warning facility will be built underground near the Oak Ridge plant. City officials are planning to build a new flight of warning stations in the area.

Government takes over property

Businessman fights for land

By Monte Hayes
Of the Associated Press

TRUJILLO, Honduras (AP) — American businessman
Temi Arellano won his battle against jujagars, deadly snakes and the
jungle that began at the edge of this isolated Caribbean coastal
town.

But he's losing his fight against the U.S. Army and the
Honduran government.

Ramirez, a native of Puerto Rico who attended high school and college in St. Louis, came
there nearly a quarter of a century ago looking for ad-

venture and a place where he could be his own man.

He carved a 14,000-acre ranch from the jungle and built the
largest meat and shrimp packing business in this part of the
country.

Then, in June 1983, the U.S. Army moved onto a section of
his ranch and began con-
struction of a camp to train Salvadoran troops to fight leftist guerrillas.

U.S. Army officers later told the Honduran military they had told them it was
government land.

In November, as part of joint U.S.-Honduran maneuvers, U.S. warships anchored near
his wharf and 2,000 Marines
made an amphibious landing. The judge refused to hear the case because it involved "national
defense and national security."

In December, the U.S. Circuit Court of Appeals in Washington,
in a 2-1 decision, also ruled
against him. In a dissenting
opinion, Judge Malcolm Wilkey said the ruling "ignores the
nation's historic tradition of protecting private citizens' rights against military ex-

cesses."

His lawyers are considering
filing for review, but Ramirez
knows his chances are fading
fast.

"You see, we did something you're not supposed to do. We talked back to the Honduran
government," Ramirez said.

A few days before he lost his
case, Honduras' military-dominated civilian
government issued a decree
announcing the beginning of expropriation of his whole
property.

That includes his 14,000 acres,
the dock for his seven shrimp
boats, a large building con-
taining his slaughtering and
packing plant, bunkhouses for 50 cowhands, housing for 14 company executives, his home
and other buildings.

The Honduran military has plans for building a large air,

naval and army base on
Ramirez's property. U.S. Ambassador John D. Negroponte said recently the United States was discussing
providing aid for the project.

"I'm no military strategist. But I can see why they chose
my land," Ramirez said. "It's cleared. It has electricity, water and good roads. It's near
an airport and the deepest and
best harbor in Central America."
Car racing now a major sport

By Hugh A. Milligan
AP Special Correspondent
DAYTONA BEACH, Fla. (AP)—The American scene is changing subtly and spectacularly.

The Super Bowl generates more media hoopla and hype than the World Series. A number of professional soccer franchises now outdraw the resident pro basketball team. An America almost as breathlessly as ABC-TV color commentator Dick Butkus waits up until midnight to learn whether Alabama.All-East Germany or Rosalynn Sumners of Edwards, Wash. has ice danced better in a sequined costume to canned music in an Olympic event that is more vaudeville act than sport.

And now, closing fast on the outside of the stock car racing, the goring of the blood sports, the pole and the hunting of the good' ol' boys and the blue-collar workers who used to attend baseball games. As last Sunday's Daytona 500 so excitingly demonstrated, stock car racing has hit the big time. It lacks none of the needed ingredients to qualify as a burgeoning national pastime.

The proceedings began with a telephone call from the White House, and the president throwing out the first backfire with the order, "Gentlemen, start your engines." Media hype was carried to TV's highest heights. While winning the Daytona Classic, it already has been cannoned, drivers Cale Yarborough and Bobby Allison became an instant TV star throughout the 100 laps. His Chevrole Monte Carlo SS was connected by in-car microphone and remote control cameras to the CBS studio on the speedway roof.

As he roared across the finish line, he could be seen and heard pounding the wheel and yelling "Thank you, Lord." And immediately the pundits were employing a special vocabulary, necessary for primary success in an sport, to describe the "slingshot maneuver" that enabled him to take the lead two hours from the finish. The word was he took advantage of the vacuum created in the wake of the lead car, and then swung out into the slipstream while flooring the accelerator. CBS, which has won six Emmys for its coverage of the Daytona 500, rates this car burner classic among its big five sports events of the year, right up there with the Super Bowl, the NBA pro basketball championship, the NCAA collegiate basketball championship and the Masters golf tournament at Augusta, Ga.

Certainly, stock car racing is the newest thing in the day and age to the gladiator contests staged by the Roman emperors to satisfy the blood lust of the citizenry.

Almost every day in "Speed Weeks," as the events leading up to the 500-mile race are called, the Daytona Beach Morning Journal and Evening News carried vivid, harrowing front-page color photos of stock cars exploding in fireballs and being folded up into metal claws. Most of the photos show orbits, piles of hardware that aren’t going to be around to answer the final flag.

One of the wonders of stock car racing’s increasing popularity is that the carnage on the track has so far escaped the hue and cry for banning the sport that goes up every time a prizefighter slips into a coma.

Former Coach happy as assistant

By Chuck Melving
AP Sports Writer
RICHFIELD, Ohio (AP) — After his five-year run as head coach of the Chicago Bulls and at the University of Cincinnati, Bill Badger says he prefers the anonymity of assisting one of the National Basketball Association.

"I hope an assistant with a pro team might be the best job in the world," Badger says. "This is my dream job. I was an assistant to Cleveland Cavaliers’ Coach Tom Nissalke. "You get to coach almost exclusively, and you don’t have to deal with the media, which is so time consuming."

Bill Badger will be paid the same as the pay for assistants is also going up. "I would hope the salary and everything here would be that way in another year or two. That would make yes three hard if someone came around with a head coaching job," Badger was hired this season after being fired after five years at Cincinnati, where he posted a 68-71 record. He was head coach of the Buckeyes from 1976 to 1978.

His tenure with the Buckeyes was marked by two years’ NCAA probation, brought on by recruiting violations Badger was hired. He believes his mediocre record in part on losing a recruiting battle for LaSalle Thompson, a local high school star who is now a member of the NBA’s Kansas City Kings.

He also notes the dramatic improvement of other basketball teams in the Metro Conference. Badger’s home remains in Fairfiled, just north of Cincin­nati. He’s living in a hotel because "in this business, you wait to see what happens before settling down. He’s sure he’ll never return to college because he’s tired of recruiting.

In Cleveland, Badger is helping with a major reclamation project. The Cavaliers had home one of the worst franchises in the league before Nissalke was hired and Harry Westman came in to run the front office last season.

"Tom was looking for an assistant, and we’d been a guy who coaches the floor," Badger says. "There are guys in college who don’t coach at all, who just recruit."

"My basic job is to be with the team all the time, to work with the big men, to be more of a player development man. We have four or five real rookies on our team and some

Creighton plays at West Texas and at Bradley, and at home against Wichita State. The Salukis play the top two teams in the Valley — Illinois State and Tulsa — this week, before closing at Drake March 1. The only home game is with ISU Thursday.

Two wins and an 8-8 record would probably assure SIU-C at least a fourth place tie. Bradley splits its four games, then a 7-9 mark could earn a tie.

He cited the teams in the Valley as "a" defense, a skill he developed at Iowa in the 1950s. Van Winkle said, "Every team seems to be running so much more unusual offensive stuff at you now than they did five years ago; because the defenses have become more sophisticated."

Vance Badger doesn’t know if he’ll be around to see the Cavaliers become contenders. But he’s certain to remain in the game. "I’ll be in basketball," he says. "I was fired on a Monday and on Tuesday I had job offers already, so I don’t have any worries about that."

Badger From Page 18

second-year players. We only have one guy who’s 30 ... World B. Free.

Badger’s specialties in defense: a skill he developed as a 6-foot guard at Iowa in the 1950s. He has helped turn the Cavaliers into one of the league’s better defensive teams, despite the lack of an experienced, intimidating center.

"People say there’s no defense in the pros, but it’s not true," he says. "Every team seems to be running so much more unusual offensive stuff at you now than they did five years ago because the defenses have become more sophisticated."

The only home game is with ISU Thursday.

"The Salukis' defense is more experienced, more sophisticated," Van Winkle said. "(Bradley’s Pat) Rivens and Chris George.

"Our defense is somewhat less without Pie. Van Winkle said, "and it hurts us defensively. It means that we have to play more zone to avoid foul trouble, it means people are playing 40 minutes instead of 25, and it gives us less flexibility with our press, since Pie was a good front man on it."

Track team preparing for MVC championships

By David Wilhelm
Staff Writer

The men’s track team, after a two-week layoff from competition, is looking forward to the Missouri Valley Conference championships to be held at Normal, Feb. 24 and 25.

The Salukis have been enjoying the deep winter weather conditions recently to conduct some of the better workouts of the season, according to Coach Lew Hartzog.

"We trained hard all last week," Hartzog said. "We’ve had some good weather, better than the last few weeks. Hopefully, that will help us toward this week."

The Salukis won the MVC championships last season. Illinois State finished second. Hartzog said that there have been no injuries that will affect his squad in defending their MVC crown. He expects that the good training conditions will bring about better performances, but it is too early to tell for sure.

With a few good workouts this week with help from cooperating weather, Hartzog said the Salukis should be prepared for the MVC championships.

"I think everyone’s healthy and ready to go," Hartzog said.

**Women swimmers to defend NIC title**

By Scott Rich
Staff Writer

The National Independent Swimming and Diving Championships should prove to be a battle between three nationally ranked Division I NCAA women’s swimming teams.

The teams, No. 7 SIU, No. 15 South Carolina and No. 17 Florida State, are the elite squads in the 21-team field.

The NIC is held at Columbia, S.C., Wednesday through Friday, and Saluki women’s swimming Coach Tim Hill said South Carolina should have a slight edge because of the home pool advantage.

"South Carolina is going to be tough to beat at home," Hill said.

"But I think we can win the meet by nearly 100 points. If we lose, it won’t be by more than 20 points.

The Saluki women are the defending NIC titlists, and are seeking to extend their reign. Saluki camped out-distance South Carolina in last season’s NIC 767 to 672. Florida State finished fourth in the NIC.

Both South Carolina and Florida State finished ahead of SIU in this year’s Saluki Invitational, but Hill shrugged off the loss.

"The Saluki Invitational wasn’t one of the meets that we were concentrating on," Hill said. "But we added a solid team in the pool and are currently ranked sixth in the nation and will be a different story."
