Energy policy steers toward GOP collision

By Nan Benjamin
Associated Press Writer
WASHINGTON (AP) — President Carpenter is steering his energy policy toward a head-on collision with congressional Republicans, pleading to fight to the last vote for a standby gasoline tax.

But Carpenter emphasized in a Friday news conference that gasoline and other fuel taxes would be refunded to the public through income tax credits or direct payments.

The President's session with reporters was his third nationally televised appearance this week on behalf of his energy package.

"As far as the consumers are concerned, those who conserve a substantial amount of energy will derive a substantial financial benefit," he said, explaining that the energy savers' profit would come out of the pockets of energy wasters.

Asked whether his proposed standby gasoline tax would be traded away for constitutional approval of other energy policies, Carpenter said, "I am deeply dedicated to the gasoline tax and will fight for it until the last vote in Congress." Senate Republicans, however, were preparing a "Republican alternative" energy package — reportedly without Carpenter's gasoline, oil and natural gas taxes and relying instead on "free market" pricing to discourage energy use.

They sought nation-wide television, perhaps even a joint appearance with Carpenter's proposals with their own.

Carpenter's last conference concentrated on energy, but the President also touched on other issues.

Carpenter's last news conference has been made about sending tanks to Zaire, an African nation fighting insurgents.

Lacy Benson, deputy undersecretary of state, told a Senate subcommittee on Thursday that U.S. weapons shipments to Zaire, but Carter said "it is highly unlikely I would advocate such a sale." He said he might veto a tax.

On retirement eve, Leighty reflects on years with city

By Sue Green
Daily Egyptian Staff Writer
Carbondale has doubled in size and a small model of SIU "in the future" has become a reality since Elisabeth Leighty went to work for the city in August, 1953.

A coffee pot gurgled in her office as she remembered several changes during the last 24 years.

"When I began working for the city, I was assistant city clerk," she said. "In 1955 I became city clerk," she said, and her eyes crinkled as she smiled. "Next Saturday, she will retire.

She lit a cigarette and looked around her office. Several papers were stacked on a filing cabinet. A small Smoky the Bear cigarette extinguisher sat on a shelf beside her desk. "It was given to me by one of the firemen," she said.

Originally from Sparta, Ill., Leighty first came to Carbondale in the early 1950s to work on a master's degree in English. She received her bachelor's degree in the same field from Linden Wood College in St. Charles, Mo.

At that time, the only new building on campus was the Agriculture Building, she said. "It was a standing joke to say we had to go to Matkanda when we went there. The growth of the University is amazing. We used to think it would never materialize."

Leighty said a city clerk helps provide continuity for city government. Mayors, council members and workers change, she said. But a city clerk stays, past, present and future, and where things can be found.

Last year, there were only four city office people at the old City Hall building located at the corner of Marion and Main Streets when Leighty first arrived. Payrolls, bookkeeping, purchasing, insurance policies and building permits were all handled through that office.

In the early 60s, the police department didn't have a radio dispatch system. If someone at the City Hall wanted to contact the lone city police car, they would call the General Telephone Company. The company would turn on a light on top of one of the buildings near Main Street and Illinois Avenue, she said. When the officers saw the light, they would stop at a phone and call the department.

The city expanded and the council-manager form of government was adopted in 1968. "Today over 250 people are hired for my original duties," she said.

"I liked it better when we were in the old building," she said. "Then I had more contact with the general public."

The original facets of her job have continued to be a benefit. Most procedures in the other department she can relate to first hand.

"A job gives you an identity," Leighty said. "When someone asks you what you have to start out again."

Working the minutes for the council is her favorite duty. Several years ago, before the city used tape recorders, she would employ people who knew the minute hand. She had to attend several meetings and hearings each week so a record could be kept.

Today her duties include going to City Council meetings, registering voters, filing death certificates and keeping track of the city's archives.

Liliana Weiss, who will become city clerk on May 1, has been working with Leighty since June. "It takes some time to become familiar with all the things here," Leighty said.

Leighty has nothing in particular planned when she retires. "I'm going to relax and try and catch up on some of my hobbies," she said. These include reading, historical novels, stamp collecting and tracing her family's genealogy.

"There's really nothing glamorous about the job," she said. "But I have enjoyed it.

Posting error forces change in TP results

The discovery of an error in the polling station results has changed the outcome of the senatorial race at Thompson Point, where one and one-half percent of the votes were open.

As a consequence, Sue Cairns, who was thought to have won with 178 votes, actually placed second, giving her the half term seat. Kelly Hughes won the full term seat.

Jon Denn, election commissioner, said Friday Hughes had tallied 199 votes, not the 119 which had apparently locked her in a tie with Irma Villarreal, who had also won 119 votes.

Denn said that when the final results were tabulated, both Hughes and Villarreal were reported to have 119 each. A recount on Friday, however, showed Hughes had actually won.

Therefore, the official results from Thompson Point show Kelly H. goes, with 199 votes. Sue Cairns, 178, Irma Villarreal, 119. and Kelly Carls, 115.

Write-in among seven elected to IPIRG board

The new IPIRG board members chosen in Wednesday's election are Jeffrey Corcoran, Alain Tillal, Steve Rouxhandel, Marilyn Septon-Thomas, Jodee Weasel and Mike Hanson.

Hanson was a write-in candidate. Six candidates were on the ballot for the seven-member board.

After an orientation session, tentatively scheduled for next Thursday, the board members will begin work at the end of spring semester.

Board members should contact the IPIRG office as soon as possible.

Daylight Savings Time begins Sunday morning

Daylight Savings Time begins at 2 a.m. Sunday for the Southern Illinois area.

Residents are to remember to set their clocks ahead one hour.

Gus Bode

Gus says people will make up the hour of sleep they lose Saturday night on Monday morning.
Pakistan political violence results in 34 dead

ISLAMABAD, Pakistan (AP) — As many as 34 persons were reported killed Friday in the highest death toll in Pakistan's tribal areas this year when soldiers fired on antigovernment marchers in the army-rulled city of Karachi.

The new clash came after the government of Prime Minister Zulfikar Ali Bhutto imposed martial law on Pakistan's four largest cities — Karachi and Hyderabad in the southeast and Lahore and Lyallpur in the north — in an effort to quell anti-Bhutto protests.

The Pakistan National Alliance (PNA), a coalition of nine opposition parties, had called for the May 17 elections to be boycotted in the March 7 national elections, charging that Bhutto's ruling Pakistan People's Party (PPP) retained its parliamentary majority through massive vote fraud.

Soviet bomber evades U.S. air defense radar

WASHINGTON (AP) — A Soviet reconnaissance bomber evaded U.S. air defense radar in penetrating closer than ever before to the East Coast.

Pentagon sources said Friday. The sources said the TUS Bear flew below the radar of a U.S. Navy patrol frigate in Saratoga, conducting training between 60 and 75 miles from the coast.

The U.S. Air Force sent two F-4 Phantom jet fighters from the Johnson Air Force Base, N.S., but there was no contact and the Soviet bomber went on its way without incident, sources said.

Carter may send diplomat to Cuba

WASHINGTON (AP) — The Carter administration is considering the assignment of an American diplomat in Cuba for the first time since the 1961 break in relations.

At that same time, sources here said Thursday that U.S.-Cuban mutual visits will be resumed shortly in Havana with Terence Todman, the assistant secretary of state for economic affairs, and John Carlin, the U.S. ambassador to Cuba. These developments suggest acceleration toward the restoration of relations with Cuba after a break of more than 18 years.

Panel to recommend water project spending

WASHINGTON (AP) — A key House subcommittee chairman said Friday that panel would hold hearings on the federal water projects. Congress will then be asked to determine whether the projects will be continued.

Rep. Tom Bevill, D-Ala., chairman of the House appropriations subcommittee on public works, attached only minor reservations to his view after listening to arguments in the water projects hearings Thursday and Friday. Even prior to the hearings, the nation's concern in Congress was that most of the Carter budget cut back would be ignored.

Thompson backs off from leasing large auto

TALL THOMPSON backs off from leasing large auto

CHICAGO (AP) — Chided by reporters for his gas-guzzling taste in luxury automobiles, President Jimmy Carter backed down Friday from his intention to lease a Lincoln Continental.

Earlier this week, Thompson said he planned to get rid of four Chevrolets and a Lincoln Continental in favor of a leased Continental.

He defended his position before reporters, saying he can lease the Continental and have the tires and maintenance and the Continental will be his personal car.

During his campaign, Thompson had said he needed a bigger car to be an effective governor.

"I'm a big man. I need the room," said Thompson.

"How am I going to be an effective governor if I have to ride around in the back seat of some sedan with my knees up to my chin?"

Thompson then explained to reporters Friday that the auto companies offer a cut-rate deal to lease them. He said that the cut rate is less than the purchase price of new, smaller cars.

"Furthermore, Thompson said, "I'm certain that the gas mileage on these cars is better than on the other cars I like and I'm almost sure it will be cheaper to lease them than to buy them out right now."

GOP prepares alternative to Carter standby gas tax

GOP prepares alternative to Carter standby gas tax

Thompson thought he ended the discussions, but the Chrysler and the Lincoln "don't have enough money and the tax would be two cents per gallon."

Reporters kept badgering him.

"Why should he, as a governor, get a break on a leased vehicle that is not available to the ordinary citizen?"

"I don't know," Thompson replied.

"Motor companies believe it is a prestigious thing to have a governor riding around in their car. I don't know if the benefit is. Look, I have to deal with the mentality of the motor companies."

Then Thompson was asked if he had changed his mind and bought a smaller Chevrolet or other General Motors car instead of the Continental.

"My understanding is that GM does not offer a truck, but if there is such one, I will get it," Thompson said.

(Continued from Page 1)

Carter will also call Congress a special meeting Tuesday.

Panel to recommend water project spending

WASHINGTON (AP) — A key House subcommittee chairman said Friday that panel would hold hearings on the federal water projects. Congress will then be asked to determine whether the projects will be continued.

Rep. Tom Bevill, D-Ala., chairman of the House appropriations subcommittee on public works, attached only minor reservations to his view after listening to arguments in the water projects hearings Thursday and Friday. Even prior to the hearings, the nation's concern in Congress was that most of the Carter budget cut back would be ignored.

"Larger hike in consumer costs forecasted"

WASHINGTON (AP) — The Carter administration sharply revised upward Friday its forecasts of price increases for the year, estimating that prices will be up 5.7 percent by the end of the year, blaming the change mostly on bad weather in January and February.

Figures released by Budget Director Bert Lance now forecast a 5.7 percent hike in consumer prices for the January, March 1 to December 31 period, which is 1.4 percent higher than the 4.3 percent increase the administration had forecast just two months ago.

At the same time, the administration reduced its estimate in the growth of the Gross National Product. The budget office said it now estimated GNP growth of 4.9 percent for the year, compared to 5.4 percent forecasted two months ago.

AMA accused of underpaying postal bills

WASHINGTON (AP) — The Postal Service has accused the American Medical Association of underpaying its postal bills by more than a million dollars and has asked for a judicial review of 1972 agreement to settle the dispute.

The Postal Service previously had turned over to the Justice Department what it called evidence of a "schematic" of payments that the health professions group had agreed to pay the government.

The Department announced a criminal investigation. The Postal Service contended the AMA admitted false repayments on its mailings, allowing it to underpay its postal bills. The back payment enters the Postal Service's Treasury, a matter of concern to the American Medical Association, the organization's weekly magazine.

Two local firms found innocent of bid-rigging

PEORIA (AP) — Two Southern Illinois road construction firms were found innocent Friday of bid-rigging. A U.S. District Court jury acquitted the E.T. Simonos Co. of Carbondale, and J.D. Barter Construction Co. of Harrisburg, and their respective presidents.

The two firms were indicted in 1970 by a joint federal grand jury on a new trial was ordered. The firms were accused of rigging bids on state highway construction projects in 1971 in an attempt to allocate the jobs between themselves.
Roots

Descendant of Carbondale founder visits city

By Ann Schottman
Daily Egyptian Staff Writer

The great-grandson of one of the four founders of Carbondale, Daniel Brush IV, attended a dedication of the new Danville High School on Friday.

Daniel Brush IV said, "You can't live without what's happened in the past. It's important to hold the family together." He visited the Burn-out Hall of Remembrance, for which the first Daniel Brush donated land. The school was built in 1912 at a time when property was determined too expensive in a fire Dec. 1976 by an arsonist. A 13-year-old boy has been delinquent in connection with the incident.

Brush was brought out and walked the charred halls, still filled with the remains hung from room to room, rubble crunching under his feet. "It shouldn't happen. Something should have been done. It's a matter of fact, you follow them when you move," he said.

One woman from the Parent-Teacher Association (PTA) laughed and remarked, "As a matter of fact, you have your eyes. Bald-headed, with a distinguished, gentle face, Brush bore little resemblance to the grizz, old patriarch in the photo, with his flowing Rip Van Winkle beard.

"The first Daniel Brush was killed on the site of the school when a tree fell on him as he was clearing trees. At that time, the school that was situated there was wooden, not brick as the newer building was.

Brush was one of three promoters who came to Carbondale to build the town. Now other men invested money in the venture and delegated Brush and the two other principle promoters to buy the land.

"Brush donated land to another school besides Brush School and also donated land to four churches and a cemetery. The first Daniel Brush wrote an autobiography titled, "Growing Up with Southern Illinois," in which he described the area around the early site of Carbondale as a "dense mass of vines, briars and tangled underbrush."

Brush Daniel IV first got the idea of coming to Carbondale when he read the recent book "History of Carbondale - 1853-1965," in which Brush's great-great-grandfather played a prominent part. The book was published by the Jackson County Historical Society in conjunction with the SIU Press.

Brush said he wanted to meet the architect, John W. D. Wright, and came to Carbondale primarily to meet this man, "Brung has bought copies of Wright's book to give to his aunt, his sister's children and his own children. Brush has a 12-year-old son, Daniel Brush V. Brush spent his day in Carbondale with Wright, who gave him a tour.

"Mr. Wright and his friend have been extremely nice and generous," Brush said. "People are proud of their own background and I enjoy his Wright's pride in what he's done so well, it will do the community good in the long run."

Brush met some of his second cousin for the first time and said he is planning to bring his whole family to visit Carbondale later.

"It's Roots all over again," remarked one of the PTA women.

Board approves calendar for CCHS

By Gerda Uzner
Student Writer

Despite the dissatisfaction of Carbondale Community High School (CCHS) District 185 teachers, the CCHS board of education approved the 1977-78 school calendar with Aug. 22 as the first day of school.

Members of the CCHS Education Association (CCHSEA), District 185 teachers, the CCHS board of education approved the 1977-78 school calendar with Aug. 22 as the first day of school.

The board has yet to respond to the grievance that the board violated or misapplied the contract by eliminating the position of school psychologist and administrative vice president. said.

Brush was appointed to assist the June 7 graduation ceremony was board member Carol McDermott. Weshinsky will receive the graduating class. At the April 7 board meeting, the board decided to have the ceremony at 7:30 p.m. on the football field. The graduation will be held in Bowen Gym.

A contract with Upchurch Insurance Agency was approved for the 1977-78 school year. The multiperit insurance will provide general protection for fire, auto workman's compensation, boiler and legal liability. The present total insurance costs $33,586 per year. The proposed insurance rate is $37,151.

Don Yost, CCHS business manager, said the increase was due to inflation, appreciation of the value of the buildings and student enrollment. The board also renewed the contract with SIU for computer services for the next year with an option for the following year.

In other action, the board approved the borrowing of $45,720 at 5 per cent rate from the Bank of Carbondale to pay bills charged against the educational fund. Yost said the outstanding borrowed money is $326,416.

For building fund expenses, $11,277 at five per cent was borrowed. Outstanding borrowed money in the building fund is $77,224.

District 185 will meet with Carbondale Elementary School District 95 for a dinner meeting at 7:30 Thursday.

Beg your pardon

WASHINGTON (AP) - The Associated Press erroneously reported Thursday that the Carter administration plans to create a $100 million contingency fund to help Namibia switch to independence once it is freed by South Africa.

State Department spokesman Hodding Carter said Friday that The AP report was incorrect and the source who supplied the account also acknowledged he was in error.

Both Hodding Carter and the source said the $100 million contingency fund is for Rhodesia in anticipation of transition to black rule.

John Gilligan, new administrator of the Agency for International Development, announced the fund Friday in testimony before a congressional committee.

The fund is to provide training, education and economic opportunities for Rhodesians while aiding whites who remain.

Daily Egyptian, April 23, 1977, Page 3
Legislation on science not like '1984'

By Gail Wagner

The proposed legislation is anything but a model for regulating recombinant DNA research. The bills regulating DNA research which are being readied for the House and are already in the Senate, and in fact in the hands of President Reagan, have been drafted legislation similar to the other legislation of a separate committee of one member of Congress which has been set up to deal with recombinant DNA research. The bills are being drafted legislation similar to the other legislation which has been set up to deal with recombinant DNA research. This is typical of the legislation being drafted legislation similar to the other legislation which has been set up to deal with recombinant DNA research.

The bills are hot popular. They assembled to deal with the question of how to handle the situation is the fact that both critics and supporters of the research want government regulation is being considered, and that the legislation is necessary to avoid the growth of diverse city and state regulations. Another positive factor is that, at a time when faith in the government has ebbed to an all-time low, a usually independent and autonomous faction of society—scientists—have turned to Congress and the executive branch for the establishment of guidelines for their research. Is the willingness to extend both guidance and continued support a Big Brother attitude? 1984 may not be so intimidating after all.

FBI arrests, doesn't get arrested

By Garry Willis

It is typical of the FBI that its agents held an illegal demonstration for their indicted brother, John J. Kearney. They assembled, 300 strong, on the steps of the New York court house where lesser breeds like you and me have to get a permit for demonstrations. To reporters, they said, 'No comment' about their actions. Police said they would not enforce the permit provision.

The FBI arrests, it does not get arrested.

The FBI is the first indictment against one of its members in all of its history—and about time, too. It used to be as unthinkable to prosecute an FBI man as to charge a Gestapo agent with illegality. That is why it is important to indict and prosecute in this case—to make a long-delayed distinction between the FBI and the Gestapo.

Some argue that Mr. Kearney is just a flunky obeying orders. But if the FBI did not know, then we should punish the higher-ups, or none at all. But it is hard to get the word if the higher-ups without convicting the perpetrators of actual deeds. Why indict for My Lai orders, if the orders did not result in actual crimes? One of America's moments of glory was when it took the Nuremberg principle out of the arena of actual crimes and applied it to the existence of war crimes of the category prosecutable by ourselves. Before that time, it could be said we were hypocrites imposing on the vanquished a code we would not hold ourselves to.

—The extent to which the federal guidelines will override state and local controls. Can the government implement uniform regulations for the entire country?

—The nature of registration and licensing schemes. Will researchers be licensed? Will researchers be allowed to proceed with the kind of research they want to do? Or will another arrangement of licensing and registration be set up?

—The extent to which proprietary information can be protected from public disclosure. What amount of public disclosure is necessary? What amount is exempt?

—The nature of sanctions if violations are discovered. How could projects deemed dangerous be halted? How would violations of regulations be handled?

An encouraging aspect of the situation is the fact that both critics and supporters of the research want government regulation is being considered, and that the legislation is necessary to avoid the growth of diverse city and state regulations. Another positive factor is that, at a time when faith in the government has ebbed to an all-time low, a usually independent and autonomous faction of society—scientists—have turned to Congress and the executive branch for the establishment of guidelines for their research. Is the willingness to extend both guidance and continued support a Big Brother attitude? 1984 may not be so intimidating after all.

Editorial group elects officers, cites papers

The Southern Illinois Editorial Association (SIEA), elected officers during its annual spring meeting Friday. Those elected were James Roberts of the Fairbury Blade as president, Frank Dooling of the Effingham Daily News and John Rie of the Arcola Record-Herald as vice president, and Jerry Reppert, publisher of the Anna Gazette-Democrat as secretary-treasurer.

The two directors are Jeff Holmes of the Villa Grove News, Sweet Aires of the Virden Recorder and Gary Stricker of the Osborn News.

Also chosen at the meeting were the Batter Newspaper Content Winners. The Collinsville Herald led with four first place citations. The semi-weekly Herald, published and edited by Karl Monroe of the Carbondale Citizen, won for general excellence, overall makeup and best editorial pages in the large and weekly category. Other general excellence winners were the Alton Telegraph in the daily category and the Auburn Citizen in the small weekly contest. The Telegraph also won a first place award for advertising excellence while the Citizen also won for sports coverage.

Another multiple first place winner was Mr. Carnell Daily Republican Register which won for photography, makeup and sports coverage in the daily category. The Columbia Star won top awards for its editorial content and local news coverage and the Atwood Herald for its original column and advertising excellence. Both were in the small weekly category.

Other first place winners in the daily newspaper divisions were the Prairie Beacon-News for local news, the West Frankfort Daily American for an original column and the State Journal Register of Springfield for editorial page.

Large weekly winners claiming first place awards were the Madison County News of Sullivan for local news, the Toulon Journal for original column, the Staunton Star-Times for advertising excellence and the Tazwell News for sports coverage.

Winners in the small weekly category were the Palmyra Weekly Transcript for makeup, and the Fairview Heights Tribune for photography.

Winners in the two "all-comers" categories were the Metro-East Journal of East St. Louis for the best feature story and the Barkholt American for the best locally written editorial. Entries in these categories were submitted by contestants and were judged as a group regardless of circulation. The biggest winner in terms of total number of awards was the Auburn Citizen with seven. The Southern Illinoisan of Carbondale won the most citations for a daily. It won six awards including four second place citations.

Master Editors honored at Journalism Banquet

Three newspaper men named Master Editors by the School of Journalism among those honored at the Journalism Banquet Friday night in the Student Center. The Master Editor citations awarded for long and meritorious service and leadership in the Southern Illinois newspaper business were to be awarded to Roy P. Conrad of the Columbia Star and Monroe County Clarion, John Shelly of the Pleasant Hill Observer and Allen Yoelt of the Oberly Daily Mail.

Conrad, 69, began in the newspaper business when he was 14 years old at the Waterloo Republican. He then became editor of the Columbia Star and Monroe County Clarion and retired as editor in 1975 when his son became editor. The newspaper has now won 13 state and area awards since 1970.

Shelly, 56, became editor of the Democrat when he purchased the near-bankrupt newspaper from his father and brother. The newspaper is now free of debt. In addition to operating the Democrat, Shelly is active in drug counseling.

Beg Your Pardon

An article in Friday's Daily Egyptian incorrectly reported that Jack Chen, an artist from Mainland China, would present a lecture Saturday night. Chen will lecture at 8 p.m. Tuesday in Morris Library Auditorium.

Yoelt, 70, began his career in journalism in 1919 when he joined his father in operating the Oberly Daily Mail. He retired last year when his son took over the paper's management.

Master Rice and Harry Stonecipher, associate professors of journalism, were scheduled to make the presentation of the golden emblems to the editors. An issue in a printing press was produced.

The Arthur Dawson Jenkins award for service to journalism was presented to W. Marion Rice and Mr. and Mrs. Tom Lee of Marissa.
A meeting of the CB radio enthusiasts' group, Citizen Operated Assistance Radio, will be held from 10 a.m. to 3 p.m. Saturday at Giant City State Park. Discussion will include establishing a Carbondale REACT unit. The public is invited. For more information call 433-4196.

A reader's theater performance of Darrell Eubank's "A Man from Monticello," celebrating Jefferson's anniversary, will be given at 10:30 a.m. Sunday at the Carbondale Unitarian Fellowship House, corner of South University and West Elm Streets. Refreshments will be served, and the public is invited.

The Jackson County Historical Society will meet at 2 p.m. Sunday at the Doc Gale Museum on Gum Ridge Road near Kindaid Lake. A car caravan to the meeting will start from the corner of Tenth and Mulberry Streets in Murphysboro at 1 p.m. Guests are welcome to the meeting.

All persons interested in being clowns for the Special Olympics should meet at 7 p.m. Monday in Lawson Room 151. Those interested who can not attend the meeting should call either 457-7144 or 687-3894.

Anyone interested in modeling for the Kenney Garrison benefit fashion show to be held May 8 p.m. Tuesday in the Student Center Mackinaw Room. Proceeds from the show will go to the Kenneth Garrison Scholarship Fund.

David R. Storer, executive director of the Illinois Association of Rehabilitation, will speak on "Politics and Rehabilitation" at 7:30 p.m. Tuesday in the Student Center River Rooms. A question-and-answer period and a reception will follow in the Ohio Room.

Volunteers are urgently needed for the Bug Brother program sponsored by Aeon in the New Life Center, 913 S. Illinois Ave. Volunteers are asked to give four hours of their time a week for six months to provide support for and gain trust with a little brother. Interested persons should call 589-5514.

George Brown, director of the School of Journalism, was recently a member of a screening committee for nominations to choose the Illinois Press Association's Editor of the Year Award.

Nader claims gas reserves enough to last for 1,000 years

LIBERTY, Mo. (AP)—The government is lying to American citizens about the supply of oil and gas, consumer advocate Ralph Nader contends.

Nader said Thursday there is plenty of both fuels. "We are not running out in 30 or 40 years. We have hundreds of years left of oil and gas, except the oil companies have a definitional ability to remove most of our supplies from the category approved as reserve and the government up to now has taken their data without examining it or getting their own independent data," Nader said.

Nader said President Jimmy Carter's proposed energy package was too heavily influenced by energy advisors and said it was unlikely to solve the country's energy problem. Nader said the U.S. Geological Survey has confirmed that there is over one trillion barrels of natural gas available in the Gulf of Mexico, at least a three-year supply of oil in existing fields and 2 trillion barrels of shale oil in Colorado, Wyoming and Utah.

Nader also said that most persons killed in the crash of two Boeing 707s in the Canary Islands last month could have lived if the government had acted on proposed standards.

Most of those who died in the March 27 crash of the Pan American and KLM airlines either burned to death or died of asphyxiation, Nader said an audience at William Jewett College here.

Free films next Monday

Starring

THE GREAT BLACK SINGER & ACTOR

Paul Robeson

in 'the best film he ever made'

The Proud Valley

By Herbert Marshall & Freda Brillant

(with 2 of their other films) at

Morris Library Auditorium

8 p.m., Monday April 25th

Introduced by THE BLACK ACTOR Mr. Fred O'Neal, Chairman of American Actors Equity, Mr. Jack Chen of Cornell University, Dr. Walter Robinson and Professor Herbert Marshall.

Sponsored by Center for Soviet Studies and Black American Studies.

INTRAMURAL CANOE RACE

2-Man Competition

2-Woman Competition

Mixed Competition

WHERE: Saturday, April 30, 10:00 a.m.
WHERE: Campus Lake Boat Dock

ELIGIBILITY: All SIU-C Students

REGISTRATION: All Participants (teams) MUST REGISTER in the office of recreation and intramurals (SIU Arena—Room 128) by 5:00 p.m. Friday, April 29.

GENERAL INFORMATION:

1. All necessary equipment will be provided by the office of recreation and intramurals.

2. All participants (teams) should report to the boat dock 15 minutes prior to the race (9:45 a.m.).

3. All participants must use the kneeling position and wear swimming trunks or suits, shorts, cut-offs, etc.

4. NO HEAVY CLOTHING MAY BE WORN.

Additional information may be obtained in the office of recreation and intramurals (SIU Arena—Room 128) or phone: 536-5521.

Public hearing set for relocation plan

By Bob Greene
Daily Egyptian Staff Writer

Public hearings on a city application for $400,772 in federal funds will be held next two City Council meetings, said Don Monty, assistant director of Community Development.

The hearings will be Monday and May 3 at 7 p.m. in the City Council Chambers at 807 E. College Street.

Honest Man

KNOXVILLE, Tenn. (AP) - When Roger Oglesby, a city service department employee here, began sifting through a bank of mail recently, he found the timepiece and also uncovered a billfold containing $1,700 in cash and a $20 gold certificate.

The wallet belonged to Oglesby's boss, foreman L.C. Davenport. Oglesby returned it and received a $100 reward from Davenport, who said "I think a man that honest deserves a reward."
Energy conservation workshop will consider future fuel sources

By Rick Kliehl
Student Writer

A three-week study of present energy problems and future energy promises will be at SIU June 13 to July 1. The program, Summer Institute on Energy, hopes to inform high school junior college teachers and school environmental coordinators about area energy problems and the feasibility of future energy sources. The program will also include arguments for and against different types of energy, including the political implications of energy development.

The 26 sessions in the study are for high school teachers, junior college teachers and environmental coordinators from Illinois, Indiana, Kentucky, Tennessee and Missouri. Part of the costs for the study will be covered by funding from the federal Energy Research and Development Administration (ERDA). The University has agreed to waive all tuition and fees. Participants will receive six hours of graduate credit.

The study is one of 26 studies out of 350 proposals to be funded by the ERDA. ERDA actually funds projects of this kind, but the Summer Institute on Energy is the first project of this type to be funded by ERDA at SIU.

Most of the study will involve instruction in the design, development and utilization of mineral and non-mineral energy sources. Examples of such energy sources like coal, natural gas and petroleum, will be taught by Stanley F. Harris, SIU professor of geology.

David L. Jones, professor of geography and director of the institute, will teach the non-mineral seminars, such as solar, ocean tidal and nuclear energy segments.

Harold R. Hungerford and Audrey N. Tongra, associate professors, will teach techniques of communicating findings to students.

Two field trips are planned for the weekends during the study. The first one will be to an area strip mining operation to study the methods, and problems of strip mining. The second trip will be to inspect area homes that are powered by solar energy. They will also inspect area companies that make solar energy home heating equipment. Some guest lecturers from the Division of Physics and the Institute of Civil Research will also speak at the study.

Several topics that will be covered in the three-week period. One of the main topics will be the feasibility of new power sources. According to Jones, at the present rate of consumption our mineral fuels will be exhausted in the next few centuries. An example of the use of present fuel is the miner's captain coal mine at Percy. Its entire daily output is used to run one electrical power plant. New energy forms for the Southern Illinois area would include solar, wind and nuclear power.

Certain forms of new energy are under development today. The most advanced is nuclear energy. However, the expanded use of nuclear energy has come under much controversy over the safety of power plant operation and the problems of atomic waste disposal.

Where safeguarding has been a problem with nuclear power development, there has been a problem with other forms of new energy. Certain parts of the world, such as Iceland, Italy, and the northern coast of California have been able to successfully harness geothermal energy, or energy tapped from escaping hot gases from underground sources. Unfortunately, geothermal energy, is confined only to areas where underground springs can be tapped.

Coastal areas could benefit from energy supplied from ocean tides, according to Jones. Only one coastal town near Doctors Unlimited in France has a tidal energy plant. The plant provides a large section of the French coast with electrical power.

There hasn't been a feasibility study done on our coasts yet, Jones said. "Tidal power could be easily used in coastal cities."

My judgment is that tidal power development should be pursued," Jones added. Furthermore, the potential from wind power and solar power must be vigorously developed.

SIU police officer outlines bike licensing, safety rules

By Jeff Powell

Because of the large number of bicycles on the SIU campus, certain regulations have to be enforced, said Michael Narrington of University Police. Bicycle operation is governed by the University Code as well as by the Motor Vehicle and Bicycle Regulations that SIU has worked on. Usually we stick to our regulations, but if the police get an incident in a accidents involving bicycles. The SIU regulations deal with licensing, parking and operation. In order to license a bicycle, the bike must have working brakes, a reflector visible from the rear, while reflector visible from the front and a bell. Bicycles can be licensed from 8 a.m. to 5 p.m. on weekdays through the Security Police.

Rent seminar set

Friday at the parking division in Washington Hall is the rent seminar charged for licensing and registration. Parking bicycles in hallways, lounges and common areas of dorms is not allowed. All bicycles must be chained to bike racks on campus and must not block entrances and exits to buildings. Operating a bike at night without a light is against regulations as well as riding the wrong way on one way streets. Most of the traffic laws applying to cars apply to bikes.

Riding on the sidewalks is against regulations but is not strictly enforced due to the inadequacy of bike paths. Violation of SIU regulations can result in a ticket or a $3 imposition charge. A fine of up to $50 can be given to a violation. More about the seminar will be given next week.

Robeson, Aldridge archives to be donated to University

By Donna Nelson

Student Writer

The archives of two great black actors and singers, Ira Aldridge and Paul Robeson, will be presented to the University of Illinois by Herbert Marshall, the son of Herbert Marshall, who now resides in London. According to Robert C. Aldridge, D.Min., Dean of Students, the archives are a product of the special collection. Anyone wishing to see the archives may do so at any time, Robeson said.

Among those expected to attend the reception are veteran black actors, Fred O'Neal, chairman of the Actors Equity Association of the USA, and Jack Chen, a distinguished Chinese actor. Both are familiar with Aldridge and were personal friends of Robeson.

While in England in the 1800's, Marshall founded the now-famous Unity Theatre. While at Unity Theatre, Marshalls and his wife, Frieda Brilliant, wrote an original story for Robeson entitled "The Proud Valley", the first feature film to deal openly with race problems. Marshall also produced "Plant in the Sun", in which Robeson also starred.

**$39.5 million prison reform proposed by Gov. Thompson**

By Joseph R. Tyler

Associated Press Writer

CHICAGO, April 1 (AP) - Gov. James R. Thompson announced Friday ten days before the end of Illinois' special session that a new state prison system will be in an attempt to relieve chronic overcrowding.

As a news conference, Thompson announced proposals that he said would lead to the termination of overcrowding. The proposals would have been met with a new prison system which would be able to hold the growing population.

Other Thompson proposals aimed at solving the overcrowding problem include:

- Building 50 million to immediately convert the Lincoln Development Center Annex in Logan County to a medium security prison.
- Proposing a law that will allow for the release of seven madam offenders to state Commissioner's race

Judge to decide if decision valid

A May 3 hearing before Circuit Judge Robert Winters will determine whether the current Carbondale Township High School bond issue was properly decided.

A petition contesting the election of District 145 Supervisor Doug Breden was filed with the court by his Republican opponent, Harold Chew. Chew and Breden each received 1200 votes in the April 5 election. However, Breden was declared the winner after a drawing of the lot, a chance determination of tied elections permitted by Illinois law. Chew and Chew agreed to draw from a ballroom before a town meeting.

The site or site of a new medium security prison has not been determined but Thompson directed a report to be prepared as soon as possible.

- The Illinois Department of Corrections, Daniel R. P. Carman, chairman of the Illinois Law Enforcement Commission and Prison Liaison Gayle Franzen will prepare the report. It is my hope that at least one of the new prisons will be needed and we ought to begin now," he said. Thompson said construction of the new facility may cost between $20 million and $25 million.

About 10,000 persons crowd the state's penal facilities with a projection of 10,000 to 13,000 in 10 years ahead, Thompson said.

The review of cases of non-violent offenders will be undertaken by the corrections department and the Parole and Pardon Board. Thompson said the number of such cases in Illinois is not known.

She was only fifteen and a junkie; now no one will ever miss her

By Richard T. Pfeilah
200 W. Wirt St.

NEW YORK.—Her body was found on the rooftop of a seedy building in the Times Square area. She was about 15 years old, a drug addict without a name. Her parents may never learn her name. But drug dealer will never miss her. He still has the other kids in a white shirt. He won't be around the seedy 42nd Street area, and the police don't seem to care about her any more.

The nude body of the young black girl was found on a rooftop landing in the middle of the city's red-light district.

It was the latest in a string of prostitutes who have been found dead in the area. The bodies of other girls have been found in the past, often in the same area.

The girl was described as having long dark hair and wearing a black dress. She was found with her hands tied behind her back.

The police are investigating the case, but they have not yet released any information about the victim or the circumstances of her death.

Lifestyle in Soviet Russia explored in newspaper correspondent's book

By Pat Maclellan

What struck me as fresh and new was the book's convey of the human quotient, the texture and fabric of life for average Russians as people. Richard Smith, a correspondent for the New York Times, spent about a year in Moscow in 1975. For four years, Smith talked to hundreds of Russians, compiled his information into The Russians. Smith stated in the preface of the book that it would be impossible to capture the essence and spirit of the Soviet Union because of the diversity and complexity of the country. He did try to present the people as he found them, and they were leaving out their own Western biases in the book. Smith separated the ethnic Russians from the other hundreds of Soviet minorities, and used the term Russian to describe the people unless the nationality was very different.

Smith did his best to cover many aspects of life in the Soviet Union. He interviewed the upper class all the way down to the down and out. He talked to a lot of people and found that all social classes had very distinct lifestyles, perspectives on things and problems particularly in the lower and middle class. In one account, Smith visited an isolation hospital, which is a house persons lived in and described the long working hours and the poverty they must tolerate.

One thing Smith brought out that might be surprising to Westerners is that the Russians know very little about the United States. As Smith referred to it, they were critical of the government officials. Many passages in the book describe the dissatisfaction and disillusionment the people have toward Leonid Brezhnev and the Communist Party as a whole. In order to protect the outspoken citizens from military harassment, Smith changed their names and general things about their mode of life.

Anti-Semitism in the Soviet Union is less by the Soviet Jews today than in the Stalin era. Many Jews, Smith pointed out, have good jobs that pay well. More Jews are now able to enter college and universities than in the past. Smith also got the other side of this issue from his talks to dissident Jews. Many are denied passports to Israel and other places, some are denied or lose special assignments because of something members of their family have done. The last go in. Probably the most distressing thing about the book is the title, which is a little misleading. 'Russians' are only one of many 139 nationalities grouped by language in the Soviet Union. Even though Smith pointed out this in the preface, it seems that as us to get the breadth of perspective of the Soviet Union. Smith's objective, one would take the time to explore some of the lesser-known areas of the country and try to describe the diverse cultures and lifestyles found there. Smith did mention several minorities, but their way of life is less completely than that of the ethnic Russian, not showing the contract among the ethnic minorities.

The strongest point of the book is that the people didn't change or put on any cover to hide anything from Smith when he talked to them.

The GREAT TRAIN ROBBERY

By Charles Roberts

ATTENTION CLEARING

The Feds are looking into a heist in Chicago, and it seems that the Great Train Robbery of London hasn't made much of a dent in American crime. The FBI has been working overtime to unravel the mystery of the missing millions.

Wandering Christian troupe adopts theater for ministry

I was a member of a Christian group that toured the country, performing plays and distributing literature. We would set up our booth and invite people to view our exhibits and talks. One day, the group was asked to perform a play in a local church as a part of their ministry. The audience was moved by the message and the performance, and many people came forward to accept Christ. This was a turning point in the group's ministry, and we continued to perform plays at churches and other venues.

Don't Be Blue

By Seth Mydans

The Soviet Union is making progress in developing automobiles that run on electricity, propane, and water. This is a significant step in reducing pollution and improving the environment.

Terrorist group keeps FBI in tizzy

The FBI has been investigating a terrorist group for the past few years, but they have been unable to pinpoint their location or activities. The group is believed to be operating in the United States and has been involved in a number of bombings and attacks.

Student jobs now available; ACT form on file required

The job market for students is currently very competitive, and many employers are looking for qualified candidates. We encourage students to apply for available positions and to submit their ACT forms on file.

EUROPE

The economy of Europe is still struggling, but there are signs of improvement. The European Union is working to create a single market and to reduce barriers to trade.

Rainbow’s End Preschool in trouble; ‘struggling to stay alive’ says director

By John Redshaw
Daily Egyptian Staff Writer
The Rainbow’s End Preschool “is struggling to stay alive,” says Jane S. Morpurgo, faculty director at the student-supported day care center at 815 N. Washington.

The preschool, which serves 28 children ranging from two to five years old, needs at least $600 to meet expenses for the rest of the semester. Morpurgo, assistant professor in curriculum, instruction and media, said $620 is back pay for the school’s full-time teachers. Terry Baskey, a 1974 graduate in elementary education, and Chris Carlson, a 1975 Drake University graduate in secondary education, are currently working without pay. Their salary is $500 a week but they have not been paid for two weeks.

“The problem, Morpurgo said, “is that the school serves many students who are living on an extremely limited budget.”

She said that the school could just “break even” financially if all of the 36 SIU families which support the preschool paid their tuition. Tuition is $15 a week for the 10 families that send their children to the school full-time and $8.36 a week for the 16 families that send their children to the school for half of the day.

Campus bike thefts rise

SIU police are asking the public to help discourage bicycle thefts on campus. Since the beginning of April, 20 bicycles have been reported stolen. Twenty-six of the bikes were reported to SIU police in the past nine days.

In the first three months of this year, only 18 bicycles were reported stolen.

SIU Police Officer Mike Noll said the rash of thefts seems to be organized. Police are currently patrolling high-theft areas, but Noll said that is not enough.

Nollington said anyone who observes suspicious persons around bicycle racks should call the SIU police at 452-6881.

Most bicycle thefts occurred on east campus. High theft areas also include Thompson Point, the Baptist Student Center and Davies Gym.

In all but one case, the stolen bicycles were reported locked. The lock and cables were taken in every instance except three.

The total value of bicycles stolen this month is $2,410. The value of individual bicycles ranges from $40 to $590.

Nollington cautioned persons to lock their bicycles whenever left alone, even if only for short time.

Ivan Greene and Brandy Dilly join Lisa Williams and her father, a helper at the Rainbow’s End Preschool. The school may close soon if enough funds aren’t raised. (Staff photo by Marc Galassini)
Missouri-St. teams we shouldn't win, Illinois Wesleyan. nament Saturday which Pete University.

Saluki season record because University tennis courts was moved in doors because of rain. SIU will have a chance to salvage a win this weekend when it plays Eastern Kentucky at 2 p.m. Saturday at the University tennis courts, weather permitting. If rain forces play indoors, matches again will be held at the Racquet Club, located south of the University Mall on Old Route 13.

Things just didn't go right for the SIU tennis player Boaz Nikrinit returns a shot to his foe on SIU-Edwardsville. Nikrinit was defeated by SIU-E's Bruce Miller 4-6, 1-6 as SIU-E rolled to an easy dual meet victory at the Racquet Club. (Staff photo by Mark Galassini)

Linksmen eye win at Western

By Jim Mimsma
Daily Egyptian Sports Writer

By winning five singles and all three doubles, matches SIU-Edwardsville rolled an 8-1 dual meet victory Friday over SIU at the Southern Illinois Racquet Club. The loss dropped the Saluki season record to 8-10. SIU-E is 11-3.

The meet which was originally scheduled to be played outdoors at the University tennis courts was moved indoors because of rain. SIU will have a chance to salvage a win this weekend when it plays Eastern Kentucky at 2 p.m. Saturday at the University tennis courts, weather permitting. If rain forces play indoors, matches again will be held at the Racquet Club, located south of the University Mall on Old Route 13.

Things just didn't go right for the Saluki tennis player Boaz Nikrinit returns a shot to his foe on SIU-Edwardsville. Nikrinit was defeated by SIU-E's Bruce Miller 4-6, 1-6 as SIU-E rolled to an easy dual meet victory at the Racquet Club. (Staff photo by Mark Galassini)

The tournament is one of the final tune-ups for the Varsity tournament in Wichita May 16.

Next weekend the Salukis will golf at the Drake Relays Friday and the Iowa State Invitational Saturday.

Salukis canceled

Friday's SIU-Kennucky State doubleheader at Abe Martin Field was canceled because of the inclement weather.

The Salukis will be in action again Monday at Abe Martin Field when they face the University of Missouri-St. Louis in a 1:30 p.m. doubleheader. Rob Simond and Jim Kessler will probably pitch against Missouri-St. Louis as the Salukis will be looking to extend their nine-game winning streak.

Robinson first brother act at SIU since late 1940's

By Jim Lacascio
Student Writer

Dewey and Craig Robinson, brothers on the Saluki tennis team, are only the second brother act to put on a Southern Illinois University baseball uniform since the late 1940's. In the late 1940's, the McClanahan twins from Galesburg, Illinois played for the Southern Illinois University baseball team. But since then there has been no brother combination until this year with the Robinson's.

Dewey, who will be 23 this month, and Craig, 20, come from Chicago. Dewey said, "my dad was very athletic but he never had the time to ever make it professionally. They nick-named him "Fred." because he was only five feet tall when he went into the Navy at the age of 17. The brothers' parents always backed them well in sports, but never pushed them into it.

Surprisingly, Dewey and Craig never played on the same team. Dewey said, "everytime Dewey would pitch against me in little league he would laugh because what the people in the stands would say." Finally they got together on the same team in high school playing for the Sullivan High School baseball team. The brothers success with their high school team as they came in second for the Chicago Public League schools in a tournament held at Comiskey Park in Chicago. In the semi-final game there.

Women at NIU for track meet

The SIU women's track team will be in action Saturday at Northern Illinois University and will compete in its fourth meet of the season against Northern Illinois University, Chicago State, Loyola and Wheaton.

Western is the only team that will be at the meet that SIU has faced this year. Last weekend, at the SIU Invitational, Western finished second, nineteen points behind the winning team.

Western is led by Bev Roland, who won the one-, two- and three-mile runs last weekend. She could certainly help SIU's run for first place.

Blackman said Chicago State was supposed to be at the SIU Invitational, but went to a meet at the University of Northern Illinois instead. Chicago State scored no points that day. Blackman said Loyola has a good half miler, but that is all the real competition about any of the other teams. Northern Illinois is a very weak team that is part of a building program.

In track, teams will be competing for SIU all-male and all female last meet due to a knee injury. She had been competing in the shot put, the discus, the hammer and the javelin. She had put her events in that won't be too strenuous on her knee.

In the meets the team has been in this season, SIU has two first places and one second.
