Committeewoman takes Trustee post

By Mike Anton

Crete Harvey, Republican national committeewoman for Illinois, was appointed by Gov. the Board of Trustees, replacing Wayne Heberer, whose six-year term expired last month.

The appointment of Harvey, of Sterling, is subject to Senate confirmation. However, Jim Skillbeck, Thompson's press secretary, said Harvey will take her seat as a voting member immediately.

"She will provide insight and diversity that is welcome," Gus Bode said.

Gus says Jim and Ron wouldn't do anything bad to a normal committeewoman's university, would they?

Refreshing and helpful," Skillbeck said. "She will be a refreshing change."

A longtime garnet supporter of the administration, Harvey has been an active member of the Board of Trustees for the past 17 years. She is presently serving her second term as the Republican national committeewoman for Illinois.

Harvey said her political ties would act as "a definite plus" when dealing with state legislators. A graduate of Madonna School in Fairfax County, Va., Harvey said that while she isn't "that familiar with the ups and downs of the University."

Chancellor Kenneth Shaw said, "My feeling is that she is a very strong appointment. She has a proven record in public service, and in doing her homework and also being very involved in everything she makes a commitment to."

Committeewoman takes Trustee post

Spanish parliament attacked

MADRID, Spain (AP) Members of a right-wing military faction opened fire Monday in the lower house of parliament, sealing off the building to take over the government. They seized the Cabinet and more than 5,000 parliamentary seats as hostages.

King Juan Carlos, who is commander in chief of the armed forces, told the nation in a broadcast speech Monday night that he had ordered the military to take all necessary measures to put down the revolt.

Standing in his military uniform, the king declared, "The crown cannot tolerate in any form actions or attitudes of persons who try to interrupt the democratic order of the constitution." In his two-minute speech, he called on Spaniards in the face of "happenings taking place in the Parliament."

As the speech ended, army units joined elements of the national police, a new type of police, the armed forces in the parliament building, and legislators throughout the building were ordered to take all necessary measures to protect the parliament building.

Rafael Abascal, a spokesman for the military, said they had entered the cordoned-off area carrying officers with riot gear.

Juan Carlos ordered a council of state into emergency session in the Interior Ministry to take emergency measures.

The leader of the coup was identified as Lt. Col. Antonio Tejero Molina, a member of the Republican Party. He was convicted two years ago of plotting to seize power, but was not discharged from the guard.

There were no reports of injuries.

Ft. Apache' called unfair, distorted

By Bill Crowe

Staff Writer

Such minor entertainment diversions as "Samford and Son" and "Good Times" and action filled cop stories such as "Fort Apache, the Bronx" may serve as a lighthearted timekiller to some viewers, but to others they appear as racial insults which feature inaccurate, outrageous and racially degrading views of ghetto life.

Daniel Georges-Abeyle, associate professor in administration of justice, and Mark Washington, a freshman in cinema and photography, may be categorized as having the philosophy of the latter—they're insulted and disenchanted with the portrayal of blacks and Hispanics popularized on TV sitcoms and dramas as well as feature films.

In fact, the Fort Apache film, which has drawn the protests of several civic groups in the police precinct where Cesar Doc was shot, convinced Georges-Abeyle and Washington to comment on their personal experiences in poverty-stricken areas and how it's wrongly depicted by the mass media.

They feel that the general public has been constantly presented with distorted and unflattering views of black life, especially in ghetto areas. In order to provide big profits and Nielsen ratings while disregarding realism and compassion for their subjects, Georges-Abeyle, who said he has fought unarmed for his life against men with knives and guns, said that the movie is a "Caribbean-American story," specifically lived in the South Bronx for 25 years before rising from the ghetto to gain a Ph.D. degree. Since then he has taught courses in social geography, criminological theories and "criminal violence at such universities as Johns Hopkins and Amherst before coming to SIU in 1978 as an instructor in criminology.

Washington, 18, lived in or near the South Bronx for his entire life until entering SIU in 1979. He saw violence on the streets and was a member of two gangs, the Reapers and the Black Spades. However, he also says he saw a lot of good there.

Both feel that "Fort Apache" (the movie) depicts their background as an "urban hell hole where only car-stripping, drug-dealing, thieving criminals live."

"Fort Apache" was totally unrealistic in the portrayal of black or Hispanic life," Georges-Abeyle said. He notes that St. Joseph's Hospital, a tuberculosis treatment center, is misappropriated in the movie. Georges-Abeyle said. He notes that St. Joseph's Hospital, a tuberculosis treatment center, is misappropriated in the movie.

The movie was shot in Los Angeles, as was the setting for the movie. He also contends that there is no decent human being in the entire movie.

State employees’ angry over treatment of handicapped

SPRINGFIELD, Ill. (AP) — State mental health officials have ordered the “illegal dumping” of 13 retarded persons from the center in Lincoln into a Chicago nursing home where they will “sit and rot,” the state employees’ union charged Monday.

Steve Cullen, Illinois director of the American Federation of State, County and Municipal Employees, said the 13 handicapped people get better, less restrictive care and better professional care in the Lincoln institution.

He said the 13 people would be moved into the “locked” Beachview Nursing Center, which he said has no adequate programs for the retarded.

But the allegations were denied by state mental health officials and Beachview owner David F. Budde.

“There certainly isn’t a dumping process,” added Richard Blanton, Illinois Mental Health Department associate director. He said moves are made only to give the handicapped “a better quality of life.”

The American Civil Liberties Union charged state officials last November with a class-action suit claiming widespread abuse, neglect and other problems at the Lincoln center.

The suit charged that residents have been excessively drugged, often left nude, and their families are not provided with even minimal education programs.

“Residents are allowed to sit and rot,” the lawsuit said.

“The institutions are full of life,” state government lawyers said.

Thompson-Stevenson feud heats up

WASHINGTON (AP) — Illinois Governor James R. Thompson described Monday as “silly” remarks made by former Sen. Adlai E. Stevenson III, that the governor cannot exercise executive powers over the now-defunct White House in a new cabinet role.

“A lot of the White House in a new cabinet role,” said Stevenson, “is a basic lack of understanding of how government functions.”

Thompson, here for the annual meeting of the National Governors Conference, joined other governors at the White House last week as former President Reagan.

Stevenson said in an interview published Sunday in the Chicago Sun-Times that the governor could not escape responsibility for unemploymen.t and other Illinois problems.

Stevenson said Thompson had provided “unimaginative and uninspired leadership” and was “more interested in pursuing power than in its exercise.”

As Thomson thought this amounted to the “opening volley” in a Stevenson campaign for governor, Thompson snapped: “No, it’s about his past volley.”

"Every time he gets restless or bored, he takes another look at it. Is it’s a slow news day, you guys are on the front page,” Thompson said.

"It’s a news day when the back pages is the edition goes on. It’s all great fun.”

Thompson said that it was “wrong” for Stevenson to say that the governor who has served for four years has responsibility for the economic condition of his state and then rely on unemployment and losses figures that are a decade in past.”

High court reviews 600 cases

WASHINGTON (AP) — The Supreme Court returned from a four-week recess to deliver orders in some 600 cases Monday, including its decision to take on the question of whether students can use state campuses for religious worship and study.

The case involving student worship on campus was brought to the court by officials at the University of Missouri at Kansas City, who were forced as a protest by student organization to hold religious meetings in a student center.

University lawyers told the court its decision “will affect every university, college and university student...and all tax-paying citizens of this country, whether or not they attend or send their children to a public college or university for an education.”

43rd ANNUAL MEETING of the SIU EMPLOYEES CREDIT UNION

Wednesday, March 4, 1981
at the
SIU STUDENT CENTER
BALLROOM B

Luncheon*
Business Meeting
11:30 a.m.
12:15 p.m.

*RSVP - ADVANCE TICKETS REQUIRED for those desiring lunch.
Tickets will be available at the Credit Union office and various on-campus locations for $2.00 per person.

CALL 457-3595 FOR ADDITIONAL TICKET INFORMATION.

Following the Business Meeting and Election of Officers, DOOR PRIZES WILL BE AWARDED. Prizes include:

CLOCK
COFFEEMAKER
MISCELLANEOUS PRIZES

THIS IS YOUR CREDIT UNION

IBHE staff officials endorse proposed education allocation

By Randy Rogowski
Staff Writer

Gov. James R. Thompson's $1.23 billion recommended allocation for higher education will be approved by the Illinois Board of Higher Education next month if the board follows IBHE staff recommendations released Monday.

The staff's list of higher-education priorities encourages the board to accept Thompson's proposed allocation and to approve the 8 percent faculty and staff pay hike and 2 percent salary catch-up plan which it includes.

The IBHE staff recommendations also include an increase from $1.85 to $1.95 in the maximum Illinois State Scholarship and an average 15 percent increase in funds for utility costs at state schools.

The Illinois Federation of Teachers opposes the staff recommendations and is urging the IBHE to reject the governor's proposed allocation.

The group says the pay raise will not be enough and adds that it thinks the General Assembly may cut Thompson's proposed funding below the 8 percent general revenue increase which the governor has said he will propose to legislators.

Margaret Blackshear, assistant to the IFT president, said Monday that the IFT will urge to tell Thompson that it will accept nothing less than the December request.

The IBHE has asked the governor for $1.28 billion for fiscal 1982. That request included a 2 percent salary increase and a 1.5 percent catch-up plan.

In a letter to IBHE chairman William Browder on Feb. 13, Thompson said the IBHE request could not be met because of dwindling state revenues and a sluggish economy.

Thompson also said that, unlike in the past, he could not promise IBHE members that they would receive his recommendations because "fiscal uncertainties make such a commitment at this time."

Blackshear said the IFT will tell Thompson that it will recommend only a 6 percent pay raise.

"We think this is very much a question of higher education in Illinois," Blackshear said. "It's going to mean tuition increases and cutbacks in programs."

SUI-C Chancellor Kenneth Shaw said Monday that he still isn't sure what the University will do to make up for low state funding of higher education.

Hill House gets cable TV approval

By Melody Cook
Staff Writer

After almost a year of waiting, it seems that Hill House residents will finally get the chance to use cable television.

Beg your pardon

In Monday's Daily Egyptian the fourth precinct in Carbondale was left out of an article dealing with polling places for the primary election. A spokesman for the fourth precinct may cast their ballots at the Carbondale Community Center, 207 N. Market.

Nine months to the date of Hill House's complaint to the Cablevision Televsion Commission, Cablevision and Carbon Cable agreed to install Hill House's pay television in the gathering room in the two graduate residential buildings, saying that the channels are provided as private residences.

Hill House describes itself as a "residential community," saying that people with behavioral, personal and drug problems are not eligible to live in the house.

"They want people to go to movies, too," Schwartz said.

See CABLE page 15

Support the USO Men's Athletic Boycott

As a result of our lack of substantial impact thus far in the decision making process and in the hope that our input can be increased, we feel that we must take the following measures.

First, we are promoting an active boycott of the men's athletic events while simultaneously endorsing mass attendance at the women's athletic events. It is appropriate to note that we are not denouncing the efforts of the student athletes and coaches in the Men's Athletic Department rather, we are denouncing the lack of true fiscal restraint on the part of the dominating Men's program while praising the high efficiency/low cost emphasis place in the Women's program.

Second, we are circulating petitions to gather widespread student support in favor of the Undergraduate Student Organizations' position.

Third, we plan to attend the March meeting of the Board of Trustees and assure that the students' position receives proper attention.

When any policy decision is made by the University, the constituency groups should have input into the decision-making process. However, when decisions are made that directly affect one group much more than any other, the particular group's decision should carry considerable weight in making the final decision. Since the issue of student fees and athletic programs will obviously be examined, we hope that strong consideration will be given to student opinion on this issue.
Editorial

Bars should be closed to 18-20 year olds

THE STATE LEGISLATURE made the first mistake by raising the minimum drinking age to 21 over a year ago. The Carbondale City Council compounded the mistake by allowing it to go into effect when bars in it against the law for them to buy or drink alcohol.

Though the City Council was trying to make the best of a bad law, they failed to comprehend that this ordinance has proven to be costly to the city and bothersome for Carbondale police. By allowing 18-year-olds into the bars, the City Council is saying it's OK for underage people to try and obtain alcohol. Thus it's OK to break the law. One doesn't let a hungry person into a 5 cent store and then holds true when admitting people into bars and not letting them to drink doesn't happen.

The City Council was aware that bar owners would have trouble controlling the number of underage people they served but to make things worse, they moved into a crowded barroom. It's hard to believe the City Council couldn't foresee the trouble there would be with underage persons allowed in bars.

THE PRIMARY SERVICE of a bar is to promote the sale of alcohol. When a person not old enough to purchase alcohol is allowed into the bar, the temptation to break the law is too great. Police and county arrest statistics of those charged with under-age consumption reinforce this premise. The ordinance affects underage people into the bars. Too many people see it as a challenge to try get away with purchasing alcohol. By not exposing them to an atmosphere that is conducive to drinking, their chances of breaking the law are greatly reduced.

This ordinance is unfair to the home owners and taxpayers of this community. The number of man-hours and city monies used by the Carbondale police for patrolling the bars is too costly when compared to the social wrong that's being committed. Surely the police have better things to do than to look for teenagers passing out are for a good time.

IF OR UNTIL THE ORDINANCE is changed, bar owners must act more responsibly. It is easy for underage people to purchase alcohol in Carbondale bars. Self-policing of bars is not enough to keep the young people from buying and drinking alcohol. By making alcohol so available to people, the owners fail to obtain it, owners are showing a disregard for the state law.

Also, these owners offer no alternatives to alcohol. A glass of water or a non-alcoholic beverage is not always the desired purchase. These owners are designated to discourage people from buying them. Bar owners and patrons must work together to take in booze.

There is nothing wrong with 18-year-olds drinking alcohol but there is something wrong with an ordinance that encourages people to break the law. The ultimate solution to the problem lies with the General Assembly in Springfield. For it is there we must fight to get this stupid law reversed.

The Legislature must consider its need to come to its senses and change the ordinance to keep 18-year-olds out of the barsrooms.

Letters

Another K-Mart a bad idea

The underlying features of what might appear to be a small issue are very distressing to me. Charles Watkins spoke about a K-Mart on a recent development and more jobs in a front chair situation. If that is the case, we work eight week. He was proud to announce that this new K-Mart is opening in Carbondale. This will cause problems.

The K-Mart proposed will get some new taxpayers through locally backed low interest bonds. The government is becoming an investor in private business. The local K-Mart chain store are the business' original investors that would get the money and not the community to be invested elsewhere. We are losing the financial help of the future investors.

We taxpayers will pay for these low interest bonds. The local small businesses will pay for this mortgage. It's a small business the city government. The new proposed K-Mart doesn't even meet industrial standards of efficiency energy. Carbondale already has three retail businesses in the University Mall. Why should we destroy the downtown business community by forcing us to use a retail business to move out by the mall. With all the Guaranteed Development area we had better not move it there. The business community is relying on their own investments to make it in an already depressed downtown Carbondale.

The seeking of another air bag delay might be a temporary expedient. But it won't help the industry to gain long-term stability. That's what we need in Detroit is commitment to act like entrepreneurs using competitive, not regulatory technology in the marketplace.

The prevailing fear of the industry is that safety costs too much and the public, at some point, will balk. Detroit is according to the Center for Auto Safety, air bags have a 4 to 1 cost-effective ratio. For every dollar spent for them, four dollars will be saved in accident costs. If the Reagan administration is to genuinely anti-inflation, why isn't it setting the chance to lower the massive expenses of highway crashes? Researchers at the Harvard School of Public Health report in the current Sociocrome Newsletter that in 1975 after cancer the deaths and injuries in motor vehicle accidents created the nation's heaviest economic costs: $14.5 billion. Safety officials estimate that the original air bag rule had been enforced, as former Secretary of Transportation John Volpe ordered in 1969, as many as 9,000 lives a year would have been saved. During all these years of death and injury, countless citizens have been denied their right to safety. The choice is either avoid using cars or be subjected to the risks imposed by the industry on motorists and passengers every time they go out on the road.

As for getting American cars to market safety the citizens can't persuade them and now the Reagan administration won't force them. With highway death on the rise again, the lonesome continue to be staggering. —c.e. 1981, The Washington Post Company

Short shots

Everyone is saying Joe Gottfried is a first class guy. So why didn't get him a first class ticket out of here. —Jeff Smyth

DOONESBURY

by Gary Trudeau

In the debate on air bags and other automatic crash protection in cars, two facts are unavailable. First, technology for crash protection has been more tested, proven more reliable or promised to save more lives than the air bag. Second, nothing in the 1966 highway safety law says that the Department of Transportation can back away from a rule because GM, Ford or Chrysler aren't selling as many cars as they'd like. Despite this, the Reaganes administration, through Transportation Secretary Drew Lewis, is proposing a change in the current rule that requires air bags in large cars in 1983, medium-sized cars in 1982 and small cars in 1984. In the history of passive restraint, which goes back to a 1969 Nixon administration decision requiring air bags, some five delay dates have been won by the industry. Every delay has been used for one purpose: to delay the only true solution: air bags.

In the latest proposal, Lewis echoed the often-echoed industry arguments, ones that safety officials have been rejecting for 12 years: Detroit has enough woe without more regulations, and air bags in big cars mean that smaller foreign cars would gain a competitive edge. In other words, as Ralph Nader points out, "The sales curve for the industry is deciding the death curve on the highway. With the Reagan budget, the auto industry is not going to be pressed to bring "the truly needy" it's no doubt a comfort for some that this bad law has reduced the need for new safety. Detroit Car and at a stroke of a pen, make safe. But a common theme runs through past efforts to "help" Detroit. After political promises to "get tough on automakers into producing fuel-efficient, low-polluting and so-called "safety" cars, the pressures have eased or even disappeared. It is now understood, though, that these relaxations in getting the industry to make safer cars have been made at the expense of favor at all.

It has been a reinforcement of backwardness, coming when many foreign competitors have been energetically moving forward. Mercedes has an air bag in many of its cars sold in Germany and reportedly is soon to offer them in the United States. Other European firms have areas cars with an extra-safe windshield which does much to eliminate decapitations and facial lacerations in frontal crashes. Instead of pushing past this competition and gaining the right to sell their cars in America, and advertising this safety with the passion that automobile salesmen and buckets-seat comfort have been advertised—auto leaders like Ford II, Thomas Murphy and Lee Iacocca have condemned the regulation to death.

The seeking of another air bag delay might be...
Experiments with animals may give insights to arthritis

By Colleen Moore
Staff Writer

A DIFFERENT TYPE OF research animal may become a hero in the eyes of America’s arthritis sufferers if research currently underway at SIU-C proves successful.

Preliminary arthritis experiments involving pigs, along with rabbits and mice, may provide some insight into the causes, and possibly future cures, of the disease, according to University researcher Conrad Hinckley, professor of chemistry and biochemistry.

The research involves studying a new class of chemical compounds called omarins. Researchers are attempting to discover how useful the compound is in treating rheumatoid arthritis.

The most serious form of the disease, rheumatoid arthritis causes constant inflammation in more than one joint and can cripple its victim.

Omarins are believed to protect joints against the disease, which are thought to be responsible for destruction of the joint lubricant, hyaluronic acid.

HINCKLEY SAID, "SUPEROXIDE has recently been connected with inflammation of all sorts."

"If lesions treated with omarins look different, but we’re not sure why they look different," Hinckley said. The joints look like they’re healing, he said.

Hinckley said omarins seemed to have cured a Sao Paulo, Brazil, case of arthritis two years ago.

He said that in preliminary experiments with the pigs, omarins have been found to adhere to joints for long term.

The pigs, the main animals used for the study, are killed so that their tissues can be studied.

Hinckley said.

MICE ARE USED TO CHECK the level of the toxicity of omarins, which are relatively non-toxic, Hinckley said.

In order to enlarge the study, which began a few years ago, the researchers need more funds.

Hinckley said they are seeking over $200,000 for a three-year study from the National Institutes of Health.

He said previous funds, amounting to about $10,000 have come from the Chemistry and Biochemistry Department and the SIU-C Office of Research Development.

In other parts of the nation, researchers are searching for cures, treatments and cures for arthritis.

Claims have been made by researchers that Dimeethyl sulfoxide (DMSO) helps arthritis patients.

DMSO is used extensively in treating arthritis in over a dozen countries, but there is still some question about its effectiveness in the United States.

Many patients report marked improvement with DMSO, a drug made from snake venom. The drug is legal in Florida, however, further research is needed before it can be used nationally.

Some researchers believe that cocaine helps arthritis. Although cocaine is known to lessen pain, the Arthritis Foundation reports there is no scientific evidence that cocaine improves or cures arthritis.

Inflx of women into law field prompts formation of union

By Matt McCann Student Writer

With more and more women entering the law profession, the need for a women's organization within the School of Law at SIUC-C was seen—and the result was the Women's Law Union, formed in the spring of 1980.

"We discuss issues affecting women," said Pat Hopson, president.

Although the Women's Law Union is not affiliated with any other women's organization, Hopson compares her group with other women's organizations around the country like the National Organization for Women.

"We are advocates for change and pro ERA," Hopson said.

The Women's Law Union now has 50 members. Hopson said that about 20% of the enrollment of the Law School is women.

"SII was one of the few law schools in the nation that did not have an organization for women," Hopson said.

Hopson said her organization plans to have a speaker series this year. The women have the speaker series in the past and it was very successful.

"We get women in the profession to come to Carbondale and speak. They talk about the problems women face after they get out of school and get into the profession," Hopson said.

She said the speaker series is open to any woman who may be interested. They do not have to be in the law program. Plans are being arranged now for the first speaker to come to Carbondale sometime in March.

More and more women are entering the law field, and Hopson said more women are going into law today than are going into medical school.

"It may be because women feel they can help create more change in the law profession," Hopson said.

The problem women face today is different than it was ten years ago.

"The problem women faced ten years ago was employment. This has diminished. Now in the law profession the problem is not getting the job. They can get the job. The problem is advancement. Women tend to be promoted less than men in the same position," Hopson said.

She said that very few women are partners in a major law firm in the United States.

Hopson added that women must realize that they are not the only people who have been in the profession for a number of years and who can change their beliefs in a month or a few years.

"It's going to take years of more women entering the profession and proving that traditional attitude is common," Hopson said.

"The Women's Law Union is a favorable addition to the law school," Hopson said.

Festival has flowers of world cultures

This week provides a chance for students of all nationalities to "come together" at the annual International Festival to be held Tuesday through Sunday in the Student Center.

With the exception of a buffet and feature film on Sunday, all events are free.

International film festivals will be held from 7 to 11:30 p.m. Thursday and Wednesday in the Illinois and Ohio Rooms.

A full Malaysian wedding ceremony will take place at 7 p.m. Thursday in Ballroom B.

An exhibition of international artifacts will be shown from 8 to 9 p.m. Saturday in the Ballrooms with a reception for new students from various countries starting at 7 p.m.

International coffees will be served.

An "International disco" is scheduled from 9 p.m. to 1 a.m. Saturday in the Big Muddy Room.

Exhibits will be shown from 10:30 a.m. to 2:30 p.m. Sunday in the ballrooms and an international buffet from 10:45 a.m. to 2 p.m.

Renaissance Room will climax the festival.

The buffet will feature all sorts of meats, vegetables, breads and desserts from Europe, the Middle and Far East, Asia and Mexico. The food will be served paperboard style and in "all you can eat." Advance tickets for the buffet, priced at $4.95 for students and $6.50 for the public, are available at the Student Center Central Ticket Office. Tickets will also be on sale at the door for $6 extra per ticket.

A cultural talent show will be held from 8 to 11 p.m. Sunday in Ballrooms C and D.

The festival will conclude with Frenchman Luis Bunuel's film, "Phantom of Liberty," a fragmented, episodic work that challenges conventional attitudes about sex, politics and religion, at 7 p.m. in the Auditorium.

Tickets are $1 for students and $1.50 for others and will be available at the door.

Classic Rock & Roll with

and the Perils

Page 6, Daily Egyptian, February 21, 1981
The best drama, whether on stage or film, is that which rises above creating mere dramatic tension and presents a simple, yet significant message which has universal meaning and appeal. "The Elephant Man," presented in matinee and evening performances Sunday at Shryock Auditorium, is an example of drama at its most meaningful and provocative.

Review

In his presentation of the story of John Merrick, a real-life 19th Century freak who became a celebrity among the highest levels of London society, writer Bernard Pomerance creates a character that has many sides—witty, caring, introspective, and socially perceptive, to name a few. But it also confronts the audience with a classic irony in life.

Merrick is a man who has risen way above his stigmatized status in society (that of a sideshow freak). He gains respect, kindness and love of many by desperately trying to be the same as others; however, he still must face the ironic twist which eventually leads to his death.

Even though he has improved himself immensely, he must accept the fact that he, like everyone, is inhuman and must live within certain personally defined boundaries. This feeling is best captured in his statement, "If your mercy is sorely, what must your justice be like?"

In London from 1884 to 1888, "The Elephant Man" questions which life is better—that of an outcast who possesses a frail, natural beauty or someone who lives in a personable world that, to some, is modern.

Reading by poet set for museum

A reading by poet William Matthews will be held at 8 p.m. Thursday at the Auditorium of Faner Hall. Admission to the reading is free.

Matthews, director of the creative writing program at the University of Washington in Seattle, recently had his fourth book, "Rising and Falling," published. He is known as one of the most important and influential younger poets in America. Matthews' reading is part of the Southern Poetry Series.
'Little people' cope with world of giants

DALLAS (AP) — When sheep buyer Clay Kitchens and his wife took their 16-month-old son to Minnesota's Mayo Clinic in 1932, they expected doctors to repair the boy's club foot. They were not expecting a new diagnosis: young Lee was a dwarf.

"Take him home and treat him like you would any other child," doctors advised the Fort Worth couple.

"That's the best advice you could give anybody, for anybody who is handicapped," Kitchens, now 89, said. "Don't assume he can't do something until he's tried it several times.

Kitchens, engineering manager for Texas Instruments, and his wife moved to Lubbock, Texas, in 1932, they expected doctors to make of him a three-foot-tall man.

"My mother said she would give her right arm to have had something like that when I was growing up, to help her," he said.

The world of little people is made up of dwarfs, who have normal chests and trunks, but are short and have shorter legs, and midgets, who are small, but physically well-proportioned.

"The medical profession says any person under 5 feet is technically a dwarf, but most little people will top out at 4 1/2 feet," Kitchens said. "We've got some that are quite a bit smaller than that. There are some who are only about 33 inches tall, and the smallest, I believe, is 29 inches."

Most little people are sensitive about the terms used to describe them.

"There are certain terms that blacks don't want to be called. And you don't refer to people with bear man's shoulders any more as deaf and dumb," Kitchens said. "I've never dealt with little people. That's just what we are."

Kitchens said his biggest problem was buying clothing — his chest is as big as an average man's but his arms and legs are short. "I have my own clothes," he said. "I see him once a year, and he's developed businesses that now he comes to all our (LPA) conventions."

Kitchens also cited "artificial barriers" that still exist in American society, such as school requirements requiring all children to attend certain schools, like sports programs.

"There are some states, Louisiana for example, that have height requirements for teachers," he added, noting that Louisiana has lost many teachers of short stature to Texas, which has no such rule.

"Some little people furnish their homes with children's furniture, but that's impractical for me," Kitchens said. "I'm two feet shorter than you, but I can handle a chair with two feet less than a child.

"Take this to the manager," Kitchens told a reporter.

For an annoying remark or slight, Kitchens said: "I don't get upset when somebody does something stupid or does because of a lack of awareness. It's an opportunity to educate that person... and sometimes you can make a good friend that way."

He and his wife met on a blind date while he was an electrical engineering student at Southern Methodist University and she an art student at Texas Woman's University. Last summer they celebrated their 25th wedding anniversary.

"Many little people marry, and have children."

"Whether their children will also be little depends."

Kitchens said: "Some are short by heredity and some are not. The first time it happens, it's genetic, and it can be hereditary after that. The chance for any of them born to parents of normal height is 1 in 200 or 1 in 400, and it usually is a factor of the child's mother."

"Sometimes a handicap at birth is more than parents can handle, and the children are put up for adoption. In the past, they were considered unadoptable and were made wards of the state. Now, officials have to realize that these children's age is an up and in an environment where the parents understand what they're going to go through," Kitchens said.

The Kitchens' children are Sandy, 21, and Alan, 25. Sandy is 4-foot-2, an inch taller than her father and three inches taller than her mother. But Alan was a surprise. He kept growing and is now 5-foot-7.

ELEPHANT from Page 7

disfiguring spongy tissue and a foot and more of the strongest of nurses. These features are pictured and commented upon, beginning at the beginning of the perforation of who suffers.

However, he is also an emotionally saturated human being, who is trapped in a world of pinhead-sized foods and deformities. As he deals with them, he learns to understand others.

"...I'm a great humanitarian of the era, and I can't see going my wing, gives him a home forever at the hospital and develops his dormant insensitivity and intelligence to the society."

Merrick bears his soul for the master tactician (Joan Grant) and grows as a living, functioning human being.

He decides that the beauty of his inner self can be a threat to the world in artistic and especially a scale model of St. Philip's Church that can still be seen in London today. The structures and materials of the "Elephant Man" serve effectively as a metaphor for human acceptance and integration into society.

However, just as Merrick's progression hits its peak, he is hit with an emotional crisis—the actress is found dead because of his company after being caught progressing and dismissed by him. From then on, he confronts the ironic fact of his character and the prison of being an outcast, but may be confused within the restrictions of a normal society. The play ends leaving the audience with the question of which life is better for him.

Production values, from the space, but effective stage design of the Revised, were quite competent and Larry Rawdon's atmospheric cello playing served as a useful device between scenes of both tone and effect.

Many audience members complained at the intermission of not being able to hear the actors during some scenes. Although it didn't bother the audience in the first few rows, it may have been a valid point for people sitting further back in the balcony.

Of course, the universal meaning which "The Elephant Man" not only draws us into its dramatic world, but also intelligentlly confronts the audience with a timeless problem which may be the audience's answer. At any rate, it's great, not merely good.

**Wear Glasses and Want to Fly?**

If you're a top-notch, well-to-do, professional, you owe it to yourself not to overlook any opportunity to demonstrate that you're a true connoisseur. Flight Officer is the quarterback of the Naval Aviation Team with wide ranging expertise, from computer and weapon systems operation to master tactician.

If you are at a college senior in good academic standing and in good health and want to get your feet off the ground, earn over $16,000 to start and attend the world's most prestigious flight school:

Contact the Naval Aviation Recruiter, Lt. Don Spazulli, Jr. at:

Survey says leaders’ opinions represent Party differences

By Pam Petrow
Staff Writer

Survey results of the political views of more than 2,200 Republican and Democratic Party “elites” provide some conflicting conclusions for voters who passed up November’s election because they couldn’t see a difference between the main candidates. The survey says there’s not a big difference between Republican and Democratic Party leaders: just don’t know what he’s talking about,” said John S. Jackson, professor in political science.

Jackson, who is acting dean of the Graduate School, and Barbara Leavitt, graduate student in political science, recently tabulated the results of the survey, composed of 58 questions on subjects ranging from inflation to the Equal Rights Amendment.

The survey was mailed about four months ago to delegates to the national conventions, members of the Democratic and Republican National Committees and state chairpersons.

Jackson said the questionnaire was answered by 1,162 Republicans and 1,100 Democratic Party leaders.

Among the survey’s findings were:

- 64 percent of the sampled Republicans consider themselves conservative, while only nine percent of Democratic elites label themselves as such.
- 52 percent of Republican leaders oppose ERA, while 96 percent of Democratic elites favor ERA.
- 91 percent of Republican elites favor in government spending for welfare programs, while only 58 percent of Democratic elites favor such cuts.
- Over half of the Republican leaders would go along with government spending cuts in education. Only 20 percent of the Democrats approve the cuts.
- 60 percent of Republican leaders said they oppose a president for windfall profits tax on oil companies. Only seven percent of the Democrats are against the tax.
- Only four percent of the Republican leaders polled think the government should “see to it that every person has a job and a good standard of living.” Nearly two-thirds of the Democrats approve of the principle.
- “Republicans are definitely in step with Americans on military spending,” relations with Russia and other foreign affairs issues,” Jackson said.

Jackson, as head of the Vanderbilt University, has been with SIU-C for 15 years. He was named assistant dean of the Graduate School in 1979, and then replaced John Gwynne as acting dean of the Graduate School in November. Gwynne is presently the acting vice president for Academic Affairs.

Communications plan aids paramedics

CHICAGO (UPI)—A pilot communications program began Monday to aid paramedics responding to calls in high-risk residential areas.

The program, operated by the police and fire departments, was prompted last month by Mayor Jane Byrne after two residents of Chicago Housing Authority projects died as paramedics waited outside for police escorts before entering the buildings.

The plan will include nine ambulances and will use portable radios and revamped communication procedures. The portable radios will enable paramedics and police on alternate frequencies if a problem arises.
Cold Comfort Center created
By Colleen Moore
Staff Writer
An influx of respiratory infections on campus has resulted in the creation of a Cold Comfort Center to serve students at the Health Service Center.

Janice Kulp, coordinator of the Health Activation Program, said between 40 and 50 percent of the visits to the Health Service are respiratory-related. If patients come in with cold symptoms, they are sent to visit the Cold Comfort Center first.

The center is located next to the waiting room on the first floor of the Health Service. Patients will start with the first booth by listing their symptoms on a check list.

At the second booth, patients will find an electronic thermometer. A device connected to the thermometer reveals a person’s temperature in red numbers after the thermometer is placed in one’s mouth.

Next patients examine their throats in a mirror at the third booth. Patients can compare their throats to pictures of normal throats. Patients should look for inflammation of tonsils and enlarged tonsils in the throat, Kulp said.

The last booth provides information on treatments for a cold. For instance, if patients have sore throats, they are instructed to gargle with warm salt water.

A patient who is congested should take a hot steamy shower, or one’s head should be draped in a towel and held over a sink of hot running water, the information says.

Other common advice given is to get more rest and to drink plenty of water.

After finishing the steps, patients decide if they should go home, see a Health Service staff member or visit the pharmacy.

Kulp said between 10 and 15 percent of the patients decide to care for themselves at home.

### Documentory

**on life, death to be shown**

A video documentary, entitled “On pain and perfection: Causes of suffering; survival of consciousness,” will be shown at 7 p.m. Tuesday in the Video Lounge at the Student Center.

The program is the second in a three-part series, sponsored by the Student Wellness Resource Center, dealing with death.

The series, entitled “Consciousness: Living, Consciousness Dying,” shows portions of two nine-day retreats at Yucca Valley, Calif., which dealt with confronting death.

---

**Birth control program established**
By Colleen Moore
Staff Writer
The Health Service has initiated a Birth Control Orientation Program to help familiarize students with contraceptive methods.

Classes are held on Mondays from 11 a.m. to noon at the Mackinaw Room at the Student Center and on Thursdays from 4 to 6 p.m. in the Room on the second floor at Kentucky Hall. Students can register for the classes online.

Janice Kulp, coordinator of the Health Activation Program, said that to be contraceptive practitioners who teach the course who will explain how birth control methods work and how to use them. The disadvantages and advantages of contraceptive methods will be discussed, and samples of the methods will be shown, Kulp said.

The program was created so that people can be able to understand contraceptive methods before obtaining a prescription for them. At the Health Service, Kulp said, appointments are scheduled once every 15 minutes and that just isn’t enough time for a nurse to explain everything.

So far the program has been unsuccessful because no one is signing up for the classes, Kulp said.

A lot of new prescriptions for contraceptives have been issued at the Health Service.

Bill Herrick, a data specialist at the Health Service, said 270 new prescriptions for oral contraceptives and 175 new prescriptions for diazepam were given out at the Health Service last semester.

### Pipeline sought to transport gas between Canada and U.S.

**DETROIT (UPI) — The Michigan Wisconsin Pipeline Co. has asked the federal Energy Regulatory Commission for permission to build a $10 million pipeline to transport Canadian gas to 12.5 miles of 4-inch pipeline to be built in northwest Indiana. **

The project would permit 10,000 cubic feet of gas to be transported daily from the Michigan Wisconsin pipeline system to Farwell, Mich. The project is the first in a series of projects that will increase gas production in the area.

A 26-mile loop would be constructed in Porter County, Ind., and gas facilities will be added at West Joliet, Ill., and at Farwell, Mich.

Under a transportation agreement, the ProGas Ltd. gas company will transport gas through Michigan by the Great Lakes Gas Transmission Co. and transferred to the Michigan Wisconsin pipeline system at Farwell.

Pope uses fluent Japanese to praise country, its people

TOKYO (AP) — Pope John Paul II, speaking fluent Japanese, lavished praise upon Japan’s people and culture Monday at the start of his historic four-day visit to this land of devout Buddhists and Shintoists.

Speaking his newly acquired language for the first time in public, the pontiff extended his “respectful greetings” to Emperor Hirohito, who invoked God’s “choicest blessings” on the pope and his people. He said they are a tiny minority and the public has shown little interest in his visit — an example, he said, set by a 60-year-old priest, who, the Japanese call a religious emperor or king of the laws, scheduled a Tuesday morning meeting with Hirohito, who led Japan through World War II as the “Sun God.”

The pope said he drew cheering millions during a triumphal six-day tour of the Philippines last week, arrived to a low-key welcome under a driving rain at Haneda Airport. Fewer than 200 people, mostly government and church officials, met him in a brief, formal reception. In a solemn, moving ceremony at St. Mary’s Cathedral, a modern structure of reinforced concrete, John Paul said he came to Japan “as a pilgrim of peace, bearing a message of friendship and respect for all of you.”

Hundreds of plainclothes security agents checked passes and surrounded the cathedral — part of a 10,000-man force assigned to guard the pope. Police blocked nearly all of the pope’s motorcade route.

The pope, in white cassock and skullcap, told an audience of 3,000 bishops, missionaries and nurses that it is “indeed an hour of great rejoicing to come to this hospitable land, where mother nature has brought forth prodigies of incomparable beauty.”

“Above all, it gives me immense pleasure to be in the midst of the Japanese themselves, in their own country, which has generated a venerable culture that spans many centuries,” John Paul said in a message clearly aimed at 2½-size Japanese nation.

The fluency of the pope’s Japanese caught listeners by surprise. Many in the audience looked at one another in amazement as the pope delivered his seven-minute speech without fumbling. The Polish priest pontiff, the first non-Italian pope in more than 400 years, has a fluent if not completely native-like command of the language, a considerable linguistic asset on his many foreign travels.

The last leg of his 12-day Asian journey takes him to Anchorage, Alaska. Thursday’s stopover is on the way home to Rome.

John Paul, who looked tired and drawn during his overnight stop on the U.S. Pacific island of Guam, was in good spirits Monday.

ARTHRITIS from Page 5

Research indicates that low doses of irradiation may relieve arthritis, but it is not yet considered proven therapy.

Arthritis has been known for a long time as disease affecting mostly the elderly, but it is just as much disease of all age groups.

Arthritis, a disease causing inflammation of the joints, occurs close to 100 different conditions. Symptoms of arthritis usually begin in the hands, wrists, ankles, knees, and ankles and become swelling, warmth and stiffness of the joints.

Osteoarthritis, the most common form of arthritis, affects the elderly. It is often caused by a person or person who lives long enough. Osteoarthritis can start for no apparent reason or result from wear and tear on or injury to the joints.

RHEUMATOID ARTHRITIS, the second most common type of arthritis, can lead to crippling. It usually strikes people between the ages of 30 and 50 years old.

Rheumatoid arthritis mainly attacks joints, but it can also cause disease throughout the body.

Ed Dirks, coordinator of SIU-C Physical Therapy Services, said anyone involved in activity has experienced some degree of arthritis. He reported that 1 in 3 people are suffering from it. Dirks said those seeking help at the online Foundation, twice as many women as men have arthritis. In its worst form, three times as many women as men suffer from arthritis.

A CURE FOR OSTEARTHRITIS or rheumatoid arthritis is not yet known. However, various other forms of arthritis, such as juvenile rheumatoid arthritis, have shown complete remission.

Aspirin, the most common drug used to relieve arthritis pain. Many patients take up to 1 aspirin tablets a day. However, not all arthritis sufferers should take aspirin, as it can cause side effects to the disease.

Heat or cold packs may sooth arthritis, Dirks said.

"Some doctors say to use heat. There are other doctors that say that if you add heat that’s not possible.

Exercises is very important in preventing stiffness. If arthritis joints stay in a position too long, they may become "frozen" and muscles around the joints may become weak.

Surgery on joints has remarkably prevented deformities, relieved pain and improved function. When diseased tissue from a joint is removed, new tissue grows back in its place. The joint may remain healthy for a long time.

IF A MAJOR JOINT cannot be moved, a bone graft and a new artificial joint may be used to replace it.

There are several "quack" cures and remedies available on the market to arthritis sufferers. These include copper bracelets, filtered sea water, a "cap" of "immune milk," "torney" and apple vinegar mixtures, alfalfa tablets and "glorified" aspirin. Most of these are useless and costly, and some are harmful.

When the air is damp and cold, some people with arthritis claim they can predict rain or snow because the disease seems to flare up. Denise Didier, senior in university studies, a gymnast, said, "I can predict the weather before the weatherman can.

Football player James Woodward, senior in physical education, said he feels his arthritis more when cold and damp and improves. Like Didier, Woodward developed osteoarthritis in his ankles because of injuries.

Aspirin and Woodward prove that even though one is hampered somewhat by arthritis, vigorous activity is still possible.

EDWARDSVILLE (AP) — Charges were pending Monday against three men accused of abducting and stabbing two others and leaving the victims for dead in a makeshift grave dug in a wooded area.

The stabbing victims, Robert K. Becker, 25, of Baraboo, and Billy Whitaker, 22, of Albers, were both hospitalized. Whitaker was in serious condition with five stab wounds to the chest, Madison County sheriff’s department authorities said.

Sheriff’s Sgt. Charles Zuzak said a bizarre sequence of events which began late Saturday night was described by Becker and Whitaker from their hospital beds.

The two men had driven over to the residence in Perrion of a Whitaker co-worker at an Albers co-continent, Zuzak said. There, a dispute ensued over a stereo system allegedly stolen from one of the three assailants. Overpowered by the three, Becker and Whitaker were bound by their assailants and driven to an area off Illinois Route 4 near St. Jacob in southeastern Madison County.

A grave 4 feet long, 2½ feet wide and 2½ feet deep was dug by the assailants. After the two were covered by about a foot of muddy dirt, with links in its place, the joint may remain healthy for a long time.

To Your Health

Editor’s Note: To Your Health appears twice monthly in the Daily Egyptian. If you have questions you’d like to answer here, send them to: To Your Health, Student Wellness Resource Center, Kesner Hall. Questions will be printed anonymously.

QUESTION—Does the way you cook influence the amount of calories in food?

ANSWER—Yes, a great deal. The poor potato contains only a 100 calories if baked or boiled. If you add one tablespoon of butter, you’ve doubled the count. French fry the potato or mash it with butter and milk and you’ve pushed the total to 250. If you’re partial to hash brown potatoes, keep in mind you’re absorbing at least 470 calories per cup. That’s a lot of grease!

By adding just a couple of tablespoons of milk, cream, or a little butter to a triple the calorie content of your 80 calorie egg by frying it in a generous amount of butter, and a piece of bacon, your egg is doubled by loading it up with both fat and salt.

So, next time you order those hash-browns and greasy scrambled eggs, think about those extra calories. If you’re watching your weight, stick with baked or steamed foods and bypass the fried foods.

QUESTION—Have I time for only one exercise and want to start running. Is it really the best exercise?

ANSWER—Running is a great activity, but it is only good for your cardiovascular system. That is, heart and lungs and blood vessels. Running will not improve your flexibility nor will it make you any stronger.

To have excellent physical fitness, it is important to do three types of exercises: stretching to maintain and improve your range of motion in joints; strength exercises to increase overall muscle strength, such as pushups; and aerobic exercises to strengthen the cardiovascular system.

So, while running is an excellent aerobic exercise, it should only be part of your overall exercise program. You should do stretching exercises and strengthening techniques to your program if you want to be truly “physically fit.”

Foreign student discovers slang can’t be taken literally

By Anita Jackson

Kazumi Hiramatsu, graduate student in English as a foreign language, said when people say that English is one of the most difficult languages to learn:

"I didn’t know American people speak so fast," Hiramatsu said. Hiramatsu is one of the many foreign students studying English at SIU-C. She came to the campus last May after graduating from Kobe University in Japan. She received a bachelor’s degree in English literature and a teaching certificate of English. Although Hiramatsu knew how to speak English, she said that she could not speak the language very well when she first arrived at SIU-C.

"I have a difficult time un-derstanding slang. I always take the meaning literally," Hiramatsu said.

When Hiramatsu stayed with one of her American friends during Christmas break, she learned that most slang can’t be taken literally. Hiramatsu said that her friend’s brother had gone to bed early one night and her friend said that he had "hit the sack." Her friend had to explain what "hit the sack" meant because Hiramatsu did not understand. It is also difficult to un-derstand American television programs, according to Hiramatsu. She said it is especially difficult to un-derstand the jokes, but she laughs even when she doesn’t understand them.

Hiramatsu said that English was difficult for her to learn because of different sentence structures between English and Japanese.

"In Japanese the verb comes at the end of the sentence. Japanese puts stress on each syllable but English doesn’t," Hiramatsu said.

Students are required to study English in Japan, according to Hiramatsu. She has studied English since the age of 12, but she didn’t have native speakers of English as her teachers in Japan.

Language difficulty was not the only thing that Hiramatsu had to face when she came to the United States for the first time last May. She also had to adjust to some of the cultural differences.

American people are more open than Japanese people, Hiramatsu said. She was surprised to see Americans kissing in public and hugging people that they had just met.

"We (the Japanese) don’t hug when we meet people. We bow," Hiramatsu said.

Hiramatsu’s first impression of American people was positive. "I thought American people were very friendly," she said. American food is greasy and sweet, according to Hiramatsu. She says that Americans eat a lot of "sweets." She likes American cheese and ice cream.

Hiramatsu misses the fresh fish of her country. She said that Japanese eat a lot of raw fish. Hiramatsu plans to graduate this December. She wants to return to Japan and teach English to high school students.

Norma Strickland, a doctoral degree candidate in educational leadership, has been selected to attend the National Graduate Student Research Seminar in Educational Administration on April 19 through 21 in Los Angeles. Strickland, from Memphis, is one of 32 students from universities across the nation chosen to attend the seminar, which is sponsored by the National Institute of Education and the American Educational Research Association. The seminar is aimed at providing outstanding students with research training.

Informal Recreation will offer an introductory workshop in women's weight training from 9:30 a.m. to noon Saturday at the Recreation Building. The workshop, conducted by Bob "Doc" Spackman of the Student Wellness Resource Center, is open to paid Recreation Center users. Guests must pay a $1.00 daily use fee. More information may be obtained by contacting Recreational Sports at 538-5531.

Synergy training in crisis intervention and communications skills for volunteers will begin March 23 and continue through May 11. Interviews will be conducted Tuesday through Friday and Saturday, March 3 through 6. Additional information and specific times of interviews may be obtained at the geodesic dome, 905 S. Illinois Ave., or by calling 546-3333.

The Appletree Alliance for Safe Energy will meet at 7:30 p.m. Tuesday in Activity Room D. An open discussion on nuclear energy will follow the meeting.

Police identify couple found in burned auto

PINCKNEYVILLE (UPI) - Laura Lee Chapman, 17, Pinckneyville, Monday was identified by Perry County authorities as one of two victims whose bodies were found in a burned car.

The 12th Circuit tentatively was identified as William H. Woodheads, 18, Coulerville. The car was registered to him.

Authorities said there were no signs of foul play in the deaths. The car was found Saturday southwest of Pinckneyville.

The fire which destroyed the car apparently started from a short in wiring as the auto was parked in a remote area near an abandoned railroad spur south of the Perry County Fairground, authorities said.

Autopsies were performed Sunday and the identification of Chapman was made with the help of a dental expert from the St. Louis Medical Examiner's Office, authorities said.

Coroner Frank Maxton said the couple had been seen together as late as 11:30 p.m. Friday and the fire apparently occurred between 1 a.m. and 4 a.m. Saturday, about seven hours before the car was noticed.

Bigger farms, fewer owners seen as trend

URBANA (AP) - At the beginning of this decade, one-fourth of Illinois' 2.6 million acres of farmland was held by five percent of the owners.

Current economic conditions will lead to even more concentration of ownership, according to Ray Sims, a University of Illinois farm management specialist.

"As the prices increase, it becomes harder to stay in farming," he said. "The farm owner must make a commitment to keep farming and then they can find the land they want to farm."

In 1980, there were 105,000 farms in Illinois, and Illinois ranked 26th in the nation in farm size and in number of farms.

Sims said traditionally young farmers would start out as tenants, renting the land they farmed. Then, they would begin to buy land and become a part-owner, an owner and finally a landlord, he said.

But expensive land and high interest rates now are breaking the chain and keeping many young people from getting into farming as owners, Sims said.

"It is just not possible to buy a tract of land and pay the interest and the principal and have some profit left," Sims said.

Farmers who own their own land are able to buy additional land, be aied.

"If you own the equity in land you already own, then it is possible," he said. "But, the best way to inherit it is to marry it." Farmers can pass the land on to heirs, if they do business operations. Sims said.

Farmers are forming corporations because it is easier to transfer land to their relatives that way, and because there are tax breaks.

Despite the barriers to buying land, a substantial portion of Illinois farms are owned by farmers — 43 percent in the most recent U.S. Department of Agriculture study in 1978.

Retired persons owned another 21 percent of the farmland in the state, and white and blue collar workers owned 22 percent, the survey indicated.

Federal scholarships offered to mining engineering students

By John Schrag
Real Worker

In the midst of student scholarship discussions, at least one department on campus is looking to give away some money to its students—$27,000 over the next year. Fifteen students from the Mining Engineering Department will be eligible for federal scholarships, said James Gulliford, assistant director of the Illinois Mining and Resources Research Institute. The Research Institute, a part of the SIU-C Coal Research Center, is trying to attract high-quality students to the mining engineering field, Gulliford said.

“The need for trained people in these areas is so great that the program was established at the national level through the Department of Interior,” he said.

Kenneth Tempelmeyer, dean of the College of Engineering and Technology, said he hopes the scholarship program, now in its second year, will help draw students to SIU-C’s Mining Engineering Department.

“The state of Illinois there was really no opportunity for students to study in the field,” he said. “Now we have Southern Illinois students interested in an interest in mining were driven to out-of-state schools.”

“We’re really pleased that the Illinois Board of Higher Education decided to set up this program where it belongs—in Southern Illinois,” said Tempelmeyer.

Both Tempelmeyer and Gulliford agreed that demand for mining engineering looks very good.

Springfield (UP)—Gov. Jim R. Thompson has interviewed several candidates for state agriculture director, but has not yet selected a successor. A block, Thompson press aide said.

Jim Skillbeck said the Springfield scene, at least three or four of the more than 11 candidates would not reveal their names.

Block resigned in January to become U.S. Agricultural Secretary. He had been Illinois Agriculture commissioner. The appointment Feb. 13 that he would become a successor within a week, but Skillbeck said that timetable had been pushed aside. No new deadline had been set.

“We have a number of people for state agriculture director to choose from,” Skillbeck said. “We have a large number of people waiting to interview.”

Thompson said he wants a new agriculture commissioner in place by April. A major reason for the delay in selecting a candidate, Thompson said Feb. 13 that he would become a successor within a week, but Skillbeck said that timetable had been pushed aside. No new deadline had been set.

Workshops turn outdoors into classroom

By the University News Service

The wilderness of Southern Illinois and Missouri will be the classroom for 12 workshops to be offered in the next three months by SIU-C's Touch of Nature Environmental Center.

The workshops—described as "an untraditional way of learning about the environment"—are open to the public. The schedule includes overnight campouts for children, nature hikes on wild edibles and backpacking and canoeing trips. The workshops are worth academic credit.

The cost of short workshops (2 nights, demonstrations and half-day or day-long hikes) is $25 per participant. Fee for long workshops are figured on costs of canoe rental, instruction and transportation to and from the Touch of Nature Center at the Grassy Lake southeast of Carbondale. Campers may rent backpacks and sleeping bags at a nominal charge.

Because of limited space, registration will be required at least two weeks in advance for trips.

The schedule of lectures and field trips includes:

Feb. 22—Discussion of maple syrup making. The fee is $2.
March 12—Hiking and canoeing at Pope County's Lake Creek from the town of Oak to the Ohio River. The fee is $5.
April 11—A canoe trip from the Damay of La Rue Swamp. The fee is $18 for adults and $15 for children under 15 years old.
April 25—A hike in the Indian Kitchen Woods, a pioneer farmstead. Fee, $140.

The workshops described above are open to children under 15 years of age, and $45 for adults.

Would You Like To Clean Up?

Could you use $1,500? Would you like to keep C'dale clean?

If you answered yes to both of these questions then the Miller Brewing Co. Great Pick-up can reclamation program is just what you’re looking for.

If you would like more information on this program, come to the kick-off on TUE, FEB. 24 7:30 p.m. at the Pinch Penny Pub. Or call your campus reps.

West Frankfort gridder becomes Saluki recruit

A lineman from West Frankfort became the Saluki football team’s eighth signee Monday.

Joe Eader, a 6-3, 215-pound offensive and defensive lineman, has signed with SIU-C.
Coach Roy Dempsey announced Monday, Eader, a three-year starter for the Redbirds, was a two-time selection to the Southern Illinois Coaches’ Association All-Star team.

Individuals overshadow team in tracksters’ meet at Eastern

By Scott Stahmer
Sports Editor

Understandably, individual performances overshadowed SIU-C’s performance as a team Saturday when the Salukis’ women’s track team competed in an indoor triangular against Eastern Illinois and Illinois State at Charleston.

The Lady Salukines finished first in the meet with 180 points, EIU was second, 143 points, and the Salukis were third, 72, both teams have competed in several more indoor meets than SIU-C has.

Coach Claudia Blackman was happy with the performances of several individuals, pointing out that SIU-C broke four school records.

"Individually, we had the kind of performances I thought we’d have," Blackman said. "I don’t think you can ask for too much more. We’re doing the things I expected we would do.

Salukis who set school records were Marla Harrison in the 60-yard dash with a time of 10.18; Joan Meehan in the 1,500-yard run, 2:49.23; freshman Joan Williams in the 50-yard dash, 7.06; and SIU-C’s 4 x 200-yard relay team of Williams, Harrison, Devra Davis and Cheryl Strood, 1:46.06.

Salukis who came back from a poor showing in the meet, to get back on the track were: Christiana Smith, Lausha Tingle, and Monica Jarvis.

"Just as I thought, the Salukis stepped up and ran a beautiful race in the 1,000," Blackman said. "Even though she ran the mile first and didn’t do well, she came back and established the record."

Monica Jarviss’ toss of 36-feet in the shot put, good for second place, and Julie Leeper’s jump of 5-5 in the high jump also drew praise from Blackman.

"Julie Leeper’s personal best in high school was 5-1/4," Blackman said. "She had an inch improvement over her first meet. She’s learning an awful lot about her shot, but it makes me feel good."

Blackman said the Salukis haven’t developed enough depth yet to be able to compete with schools of Eastern Illinois University or EIU.

"I think the upbeateness under what happened, I don’t think the freshmen understand it, yet," she said.

Irish stage basketball soap opera

CHICAGO (UPI)—College basketball’s answer to terrain opera is Notre Dame, which again faces the Indiana Hoosiers when life is after upset.

You see, after the Fighting Irish missed the chance of a dramatic upset over either a defending national champion, a 35-1-ranked team or a team with a long tradition, Notre Dame and the Indiana State Sycamores met in the eighth game of the season.

Year after year, Notre Dame
FRATS from Page 20

the winning loop.

The Gold team missed several opportunities to take control in the final minutes. The Black team went into the stall from the Gold team to come out and commit fouls. But the Black team missed the front ends of several one-and-one free-throw chances.

But as soon as the Gold got
NETTERS from Page 20

earlier this season.

At the same time, Salukis, Ginny Morris and Cathy Skiera won their first-round matches before bowing out, while Fay Chen, Dinah Devers, and Helen Malina lost their first-round matches.

In doubles, the ‘Little-Skiers’ team made it to the semifinals, but the other SIU-C team had little success. Malina-Devers lost their first-round match, as well as a second-round first-round consolation match.

The teams of Morris and Nancy Macenas and Cheryl Devers met in the consolation bracket after their first championship bracket matches. Morris-Macenas defeated Chen-Devers, but lost their next match.

The players who competed in the state championships will take part next week in the Illinois State, but he isn’t sure how many, if any, of them will compete in the Midwest Regional championship, which will be held at the High Point and Saturday.

Entries of the tournament aren’t determined by qualification, and are decided upon by the respective coaches of the Midwest teams.
The lack of Saluki intensity was most acute in the rebounding department. In improving to 15-13, WKU outrebounded SIUC, 46-44, and really dominated the boards in the first half, 36-25. Bednarek, a combination of the Lady Toppers’ size plus the Salukis’ failure to gain a rebound under the basket was the key.

"It was just atrocious," Bednarek said. "We were in a 3-3 zone for awhile, and they (WKU) would get a shot and miss, get the rebound and miss again, and we’d get going like that. We finally went to a man-to-man and pulled within one point a couple of times.

"Our offense was fine, but our defense left something to be desired. I just didn’t get the job done. Our defense was always a step or two behind." 

Without effective rebounding, however, the Salukis’ running offense is bound to suffer, and Saturday’s game proved the SIU-C kept the game in the second half after trailing 46-41 at halftime but the lack of rebounding coupled with a host of high-scoring Lady Toppers was too much to overcome.

WKU’s Lori Helbig, hitting from close range throughout the game, led all scorers with 30 points. Teammate and sophomore Jane Lockin added 23, Sharon Darby scored 17, and Alice McPhee had 16. WKU’s 103 points were the most given up by SIU-C since last season when Central Missouri beat the Salukis, 103-65.

The absence of 6-foot freshman Connie Price didn’t help the Salukis’ inside game as she was sidelined with a torn muscle in her right shoulder and probably won’t play the rest of the season.

"We would’ve made a difference," Bednarek said of Price, a graduate of Peoria’s Richwood (Ill.) High School. "She’s a 17-point-a-game player. WKU is really big, and we didn’t try to take advantage of their aggressiveness by trying to draw fouls, either."

Senior Leda Greer again led the SIU-C offense with 16 points, adding Roslyn Bartley and D.D. Plab who had 18 and 12 points, respectively. Alexander Rogers had 12 rebounds and Char Warring blocked 11, but they didn’t get much support. Plab also had 12 assists.

Bednarek seemed hopeful that the combination of her team’s loss plus a week of practice will help motivate the Salukis before the Illinois State-Missouri State Tournament March 5-7 in Chicago.

"In a way, Saturday may have been a good game for us," Bednarek said. "We had a whole week of practice and I think we should beat St. Louis."

Babcock wins but gym team loses

By Michelle Schwetz

Stadium writer

Brian Babcock lengthened his all-around unbeaten streak to nine and the men’s gymnastics team lengthened its impressive record to three Friday at Peen State.

Penn State tallied 275.15 points while the Salukis recorded 253.80. The loss drops the Salukis’ record to 4-5. While no coach likes to lose a meet, Coach Bill Meade said the loss last night did a disservice because the score at Penn State will be averaged in.

Babcock won all-around competition with 55.75 points.

Freshman Kevin Mazurek scored his career best in the all-around by scoring 61.75 in the all-around for sixth place.

Senior John Lery scored 58.15 in the floor exercise, tying his personal record.

Sophomore David Feresman Kevin Mazurek scored his career best in the all-around by scoring 61.75 in the all-around for sixth place.
