The sun was shining brightly and the snow was being cleared from the roads, but the sun was shining in Carbondale Tuesday bringing more voters to the polls than expected.

As of late Tuesday afternoon, the number of people who voted in the Carbondale city election primary ranged from 105 in precinct 1 at the Eastern C. Hayes Center to nine in the 22 polling places at the Newman Center.

Just before 2 p.m., deputy city clerk said, "We expected a low turnout." But she added that she expected the weather to have increased the number of voters visiting the polls.

The residents who braved the elements to vote knew they had to make a choice for mayor and three aldermen. The candidates included incumbent Blankenship's partner at the Newman Center, 22 p.m. in the polls located at the Newman Center, Grinnell Hall and Wilson Hall.

Blankenship, an election judge at the precinct 21 poll located in Grinnell Hall, said latte Tuesday that a steady snowfall, heavy snow and wind that made it difficult to park were reasons that people were not voting.

State and University officials are praying for rain to wash away much of the snowfall and the weather forecast for Wednesday indicates that their prayers may be answered.

But while the weather bureau at Southern Illinois University Carbondale reports a 50 percent chance of rain for Wednesday, it says it is just as likely that snow will fall again. The forecast is generally the same the next few days, but the temperatures will be different. The University officials are hoping for rain, but they are not confident on it to cure their case of the blues.

"We've got everything we can beg, borrow or steal to prepare for this, but there's nothing we can do now," said Building and Ground Superintendent Ralph Carter, referring to the down trucks, tractors and other pieces of snow removal equipment being used to clear the roads and parking lots on campus.

See related stories and photos on Pages 2, 3 and 5.

Carter said that as of Tuesday afternoon, all roads on campus had been cleared and maintenance crews, many of whom had worked double shifts, were concentrating on cleaning campus parking lots, most of which are expected to be cleared by Wednesday.

Meanwhile, special crews from Centralia were called in to repair a broken power cable which caused a loss of electricity Sunday evening at Thompson Point and Small Group Housing, according to Clarence Dougherty, vice president of campus services.

Dougherty said power should be restored to those areas by midnight or 2 a.m. Wednesday. The Student Center remained open all night Sunday on Tuesday to provide the residents a warm place to sleep.

The snowfall may have caused permanent damage to some campus buildings, Dougherty said. Water seeped into basements causing flooding and high humidity that damaged books. Hiram Lee, dean of the School of Law, said many books in the Law Library have already been damaged by water. Lee said because that it was still too early to estimate the extent of the damage.

Meanwhile, as of Tuesday afternoon, the Carbondale Police were still warning drivers to stay off the roads whenever possible. Cars stuck anywhere in the city will be towed at the owner's expense. While the major roads in the city are passable, many sideroads are still blocked.

Westside residents suffer third day without power

By Ray Robison and Donna Knekel
Staff Writers

A second night without heat or electricity for thousands of people in the westside of Carbondale left many residents with a feeling of frustration and anger.

A series of "we're getting punchy," said Kurt Gugler, of Alpha Tau Omega fraternity, Thursday. "For the first two days, we were taking everything in stride but now everyone is tired and concerned and we just can't take it any more."

But it appeared Tuesday that residents of the area would have to take a great deal more before getting any relief. Clarence G. Dougherty, vice president for campus services, said power would probably not be returned to the area until midnight or later.

The power at Thompson Point, Small Group Housing and the Agriculture Building went out at 5:30 Sunday morning when lightning punctured an electric cable. The heavy snow has hampered efforts to repair the cable. A second power outage, which occurred later Sunday morning, cut power to Evergreen Terrace and University House, where President Warren Brandt lives, for 24 hours.

"It's getting very cold here at night," said Debbie Kaiser, of Sigma Kappa sorority. "You can even see your breath in the kitchen. It's getting kind of ridiculous."

Lora Dooley of Sigma Kappa said people were together at night "just to keep each other laughing."

Many residents said they were upset that classes were held Wednesday when there was still no power in several residential areas.

"It's cold as hell in here and I can't take any more of this shit," said James Johnston, a freshman in business economics and a resident of the hall.

The third floor of the building, an intensive study area, was much cleaner.

The first and second floors of Smith Hall in Thompson Point were littered with broken beer bottles, dirty socks and cigarette butts. A chores of "100 bottles of Beer on the Wall" rang out from Room 108.

"It's cold as hell in here and I can't take any more of this shit," said James Johnston, a freshman in business economics and a resident of the hall. Several of his pet fish had died because of the cold.

The third floor of the building, an intensive study area, was much cleaner.
Illinois Ave. parking may be barred

By Ed Lempkins Staff Writer

Acting on a recommendation from the Illinois Avenue Parking Authority, the Carbondale City Council decided Monday night to vote next week on the elimination of parking on Illinois Avenue.

The proposal was not approved by the IDOT, but the Illinois Avenue Parking Authority is convinced the IDOT will support it.

The IDOT proposal would eliminate approximately 40 parking spaces, 24 of which are between Elm Street and Main Street. Zedler's calls that area nearly 90 percent full because of the heavy traffic there.

Roeder, an employee in the city's public works department, told the council that IDOT may agree to the resurfacing project if the city agrees to eliminate only the spaces on Main Street.

Council member Helen Westberg noted, however, that the Carbondale Parking Authority and other businesses on Illinois Avenue had been assured that no parking spaces in front of their shops would be eliminated.

The IDOT proposal from the Chamber of Commerce and businesses affected by traffic problems was made to the city's Parking Authority about eight weeks ago.

An IDOT report lists three reasons for eliminating the parking, and they wererolley.

First, removal of parking along Illinois Avenue will be "permanently" an area with high accident rates.

The report cited an average of roughly 84 accidents per mile between 1975 and 1977, with an average of 17 injuries incurred during those accidents.

Second, the parking would be eliminated because of the heavy traffic on the street.

Finally, the report said the parking is required only because the city's parking garage is full.

The report said the IDOT proposal would eliminate the parking spaces.

The city is the only state-owned road-U.S. Route 46 where the city would save money because the state will be forced to pay the entire resurfacing of the stretch of Illinois Avenue from Elm Street north to Hickory Street as well as its future maintenance—if parking is eliminated.

Because the street is part of a state-owned road, the city could not handle the resurfacing and future maintenance of the parking lane if the council votes to kill it.

"This is one time the city is going to have to do its own project," said City Manager Carroll Fry. "The state is tired of paying for it."

The IDOT proposal would eliminate parking along Illinois Avenue from Main Street north to Second Street.

Parking along Illinois Avenue would be eliminated in April, the report said, if the city council agrees to the IDOT proposal.

The council has 10 days from receipt of the report to consider it. If the council votes to eliminate parking, the city would have 90 days to do the work.

In other council action, a second hearing on the ordinances for construction of a new police station on next Elm Street was scheduled for Monday night.

Plan to free convicts draws objection

SPRINGFIELD, Ill. (AP) - The president of the Illinois State's Attorneys Association and some of his colleagues strongly oppose a proposal that would help relieve prison overcrowding in the simplest and fastest way -- by turning some convicts loose.

Under the program, first proposed by Gov. James Thompson nearly two years ago, more than 700 convicted felons, including burglars and thieves, will be considered this spring for early release from state prisons.

"They're saying, 'We're going to free people because we ran out of room in jail.'" said James Stone, Madison County state's attorney.

American, 3 Britons arrested by Islamic revolutionaries

Nasih notified, oil workers in Abadan of the resumption of exports and said a new supply of 100,000 tons of crude is due to be based entirely on Iran's national interests and we shall never accept colonialism or neocolonialism of any kind.

At present, Iran is producing about 700,000 barrels of oil a day to meet domestic requirements.

The English-language Tehran daily, Kayhan International quoted high-powered Iranian officials as saying that exports probably would start next Sunday or Monday after negotiations have been completed. At present, Iran is producing about 700,000 barrels of oil a day to meet domestic requirements.

Bank workers learning how to behave in holdups

By Bill Thedford
Staff Writer

A comprehensive security training program for local banks will help in the apprehension of robbery suspects and make prevent bank holdups, according to Officer Bob Ledbetter of the Carbondale Police Department.

The Police and Citizen Services Bureau of the Carbondale Police Department has developed a security training program which is designed to help every individual bank and savings and loan institution in Cabledole.

Ledbetter said the training program will help standardize police procedures by acquainting everyone with the details that will help police in their investigations. Bank employees will learn what to do when confronted by a bank robber as well as things they should not do.

The one-hour training program is designed to familiarize the possible offenders, proper use of security devices and the way to behave during and after a robbery, how to get a good description of the robber and many other tips needed for security reasons.

"Parts of the training program are kept confidential to protect employees and to facilitate in the apprehension of any bank robber of the institution," said Ledbetter.

There is a 100 percent enrollment in the training program, according to Ledbetter.

Bond retirement fee report to be given to Student Senate

By Susan Fernandez
Staff Writer

A wrap-up of the recommendations of the Facilities Planning and Equipment Committee is to be presented to the Student Senate Wednesday.

Executive Assistant Tom Head said he was not sure what the committee's final position on the fee is before Wednesday's meeting.

The Bond retirement fee has been proposed to make up for the loss of $1.5 million in the bond and tuition, which had been used to pay for campus dormitories and student center. The proposed fee is for a semester fee of $36.40.

The committee has made several recommendations, stating that he has no present intention of putting them into effect.

The recommendations include cutting some student and civil service jobs at the dormitories.

However, Sam Riniella, housing director said that job cuts affect the level of service to dormitory residents.

"I think the present state of service is advantageous to the residents," he said.

The committee also suggested that non-student groups be charged for the Student Center. The fee to non-affiliated groups is charged.

To raise alternate sources of funds, the committee suggested that the guard who was confronted by one of the robbers take off a sawed-off rifle inside the mall. Witnesses were able to describe the get-away car to police who arrested the suspects a short time later.

Ledbetter said the training program will teach bank employees how to look and remember people as well as identify the robbers gun, which will be helpful in the investigation.

Steady gasoline rationing planned as last resort

WASHINGTON (AP) - President Carter disclosed a standby gasoline rationing plan Tuesday as a last-resort emergency measure and other fuel-saving plans moved on.

Carter said at a news conference he does not want to impose stringent restraints on fuel use which could impose economic hardships and higher unemployment unless the situation is wise to have the plans ready just in case they are ever needed.

The president alluded formally to Thursday to Congress, which then has to act on a bill to impose price controls that would not take effect unless the president declared a national energy emergency. The prices could be blocked by the negative vote of either house of Congress.

Under the proposed standby plan, gasoline would, if necessary, be rationed by means of gasoline allotment "checks" issued to owners of registered vehicles, to be "cached in" for ration coupons at banks or other institutions.

"Every bank and savings and loan association in Carbondale is participating in the training program," Ledbetter said. "The two recent bank robberies and the bank's robberies in the past taught us some very valuable lessons which we wish to present to the bank employees."

A lone robber took an undisclosed amount of money from the First National Bank and Trust Co. of Nantucket Oct. 16, 1978. Police were able to create two composite descriptions of the suspect who was arrested later by FBI agents.

Two former SIU students were arrested in connection with an armed robbery at the First National Bank in the Murfale Shopping Center on Nov. 1, 1978. A total of about $5,000 was reportedly taken from the savings and loan.

Six SIU students were arrested for the robbery of a Bank of America on Oct. 10, 1978. The robbers took an estimated $23,000 from the guard with a sawed-off rifle inside the mall. Witnesses were able to describe the get-away car to police who arrested the suspects a short time later.

Ledbetter said the training program will teach bank employees how to look and remember people as well as identify the robbers gun, which will be helpful in the investigation.

News Briefs

Peking force reported 15 miles into Vietnam

BANGKOK (AP) - Vietnam's military from its bases in the Chinese border into Vietnam along the northern banks of the Red River. The Vietnamese also said Tuesday their special forces put out of action in a four-day period.

"This success will be turned into a border-doubling front to assure that the money's will be used to retire the bonds."

"There is no guarantee that the fee will be used to retire the bonds. It could be used to pay for utility bills," Head said.

Feb. 17. China has not given casualty figures. In Tokyo, the Kyodo News Service reported classified Chinese reports list about 17,000 Vietnamese were "wiped out" in the first week of fighting.

"Begin to meet Carter for frank discussion"

WASHINGTON (AP) - President Carter said Tuesday Israeli Prime Minister Menachem Begin will arrive in Washington Thursday for a "frank discussion" at the White House of the issues involved in breakdown of Middle East peace talks.

Calling conclusion of an Israeli-Egyptian peace "an urgent necessity," Carter told a nationally broadcast news conference that progress was made at ministerial talks at Camp David, and that he had hoped to convene top-level negotiations without delay.

"I regret that such direct negotiations are not possible at this time."

To the rescue

It wasn't quite like the cavalry riding to the rescue, but it involved a lot of horsepower and was as welcome as the cavalry, said Mrs. McCullough. It occurred at a student parking lot during the students' wrap-up demonstration on the campus.

STILL no power for campus residents

(Continued from Page 1)
"It's not so much the cold as the dark that gets to you," said Clarke. "People are really getting edgy.

Sam Riniella, director of University Housing, said the blackout was the longest ever to occur during his 18-year association with University Housing.

Trash pickup to resume Wednesday

A "trashy" story came out of City Hall Tuesday.

Assistant City Manager Scott Ratter announced that the city garbage crews will be back at work Wednesday, operating on an altered schedule to take up for time lost during the weekend's snowstorm.

Ratter said the Monday garbage route will be completed Wednesday, with the Tuesday and part of the Wednesday routines driven Thursday.

On Friday, Ratter said, the remaining portions of the Wednesday route and Thursday's route will be done Wednesday and will be the regular crews and will put no additional trucks on the garbage collection routes.

ER4 forces may quit on Illinois House fight

SPRINGFIELD (AP) - Proponents of the federal Equal Rights Amendment Tuesday were considering backing out of a floor fight in the Illinois House over a requirement that ERA pass by a supermajority.

"We may decide it's better strategy not to put people through the rules test," Rep. Giddy Dyer, R-Hinckdale, told the Associated Press late Tuesday, acknowledging that ERA forces are not sure they have enough votes to change the rule.

The fight is over a House rule that requires a three-fifths majority - or 107 votes - to approve proposed amendments to the U.S. Constitution, including ERA. ERA proponents want that reduced to a majority, or 89 votes. The powerful House Rules Committee already has decided it wants to stick with the three-fifths majority, but the committee decision can be challenged on the House floor.

Traveling through black history

By James Patterson

Staff Writer

With February being black history month, here's a short story to relate a subject.

Since black history cannot be covered comprehensively in the space provided here, what follows is a summary of important facts directly related to the history of Afro-Americans.

During the American slave experience there were field blacks and there were house blacks. They were technically all the same boat.

There were blacks at Concord and the first man to die in the Boston Massacre—a pre-American Revolutionary skirmish which sparked the colonial break with England—was reported to have had dark skin. He was Crispus Attucks, a drifting seaman.

But first there were free blacks—even in the South. Jamestown, Va., had free blacks who owned land two years before the Mayflower landed. And there were blacks who actually owned other blacks.

In 1789, in King George County S.C., two black men owned 84 slaves each. The same year in Virginia, Benjamin O. Taylor's property included 71 blacks and he was said to be one himself.

Some Afro-Americans carry royalty in their blood and they probably are unaware of it. Within the Ethiopian Empire in the eighth century B.C. blacks were reported to have been pharaohs, kings, and princes.

In America, Revolutionary leaders such as James Otis, Tom Paine, William Lloyd Garrison and Abagail Adams, the wife of the first president, are examples of Afro-Americans who have as good a right to carry royalty in their blood as any people.

These blacks were of all sorts. Some were short and brown-skinned. Some were tall with straight hair and thin lips. And they were of all colors. There were skin tones of chocolate, bronze, tan, coffee and cream. Some were so light-colored that they passed for white people.

They came from several racial stocks and tribes. From the lively Hausas, the gentle Mandingos (author Alex Haley's clan), the creative Yorubas, the Ibo, Fanti and Kuwa, to the proud Fantins, the warlike Ashasnts, the shrewed Dahomans, the Binis and Tseleks.

Africa lost an estimated 40 million of these people to slavery, but not all of them went to America. It has been said that only half made the journey to the New World. The others perished in one way or another.

Large numbers of blacks were delivered to the slave trading blocks in Caribbean and Central and South America.

Ironically, Central America and the Caribbean islands have produced some of the most effective leaders blacks have ever had.

Marcus Mosiah Garvey, (1887-1940), a native of Jamaica, is credited with creating the first mass movement among blacks in the Americas.

Through Garvey's Universal Negro Improvement Association, the participation of up to six million people was garnered. The main objective of Garvey's organization was to focus public concern on the plight of blacks to promote the idea of black nationalism in the western world.

Garvey published two newspapers. They were the Negro World and the Harlem-based Negro Times.

His work dealt specifically with the problems of Afro-Americans. His work chiefly promoted the idea of self-reliance among black people.

So it appears that blacks have contributed considerably to humanity. What is not so clear is what they will do next. Black people, like others, are unpredictable.

Balloons when he discovered the Pacific Ocean.

Einstein's spirit ignored at fete

The writer is president of the I.S. Israel Student Union.

By Gilead Freund

Albert Einstein was a Jewish physicist and a Jewish humanitarian. To ignore the fact of his Jewishness is to ignore an essential part of the man himself. Had Einstein been born into a different religion, his entire life would have been very different. And so might have been the history of world events he affected.

As a Jew, Einstein had to flee Nazi Germany in 1933 and his new nation, the United States, was his haven. He returned to Europe again. Had he stayed in Europe, Einstein would probably have been gassed to death in the Auschwitz extermination camp. His genius would have been burned up along with the bodies of six million other men, women and children.

The Albert Einstein Centennial Week celebration at Scientist Hall was one celebration of the fact of Einstein being Jewish.

The planning committee has invited two Soviet physicists to I.S. as guest professors and by doing so has managed to pervert the ideas of justice and conscience that Einstein never seemed to forget.

A Klaimyok and I.B. Smirnov are the two Soviet guest professors from Kiev and Moscow respectively. Do they believe in justice and conscience? Do they believe in the spirit of Einstein?

Surely as scientists, they, too, have a moral conscience. If so, let them prove it by taking a message back to Moscow.

Dr. Vladimir Riski of Kiev and Dr. Yuri Gelfand of Moscow are two Soviet Jews. Like Einstein, they, too, are physicists. Like Einstein, they are being persecuted for being Jews. Both have been thrown out of their university positions for wanting to live in Israel. Both have been arrested and beaten by the Soviet police. Their wives and children are already in Israel and they have been separated for over three years. By Soviet standards, they are hardcore criminals. After all, they are Jews.

It may very well be that Klaimyok and Smirnov may have the two Jewish physicists.

If so, let the entire I.S. Community of Scientists, I.B. Smirnov and Einstein, and their voices and ask Moscow to free the Jewish physicists, to free Klaimyok and Smirnov, to free the two Jewish physicists. Let them be heard. It would be the hour of triumph for I.S.

The Albert Einstein Centennial Week celebration should be an unforgettable event. It is not easy to talk glibly about science and politics and justice in the year 1979. It is not easy to talk glibly about science and politics and justice in the year 1979 and in the present day realities. Yet it has done just that.

Albert Einstein was never capable of ignoring reality. That part of what made him Albert Einstein.

He was not walled into the "ivory tower" of academia in the same way that Henry Ford of Detroit viewed the world of which he was so great a part. He spoke out freely, even when the words he said were dangerous, even when the words he said might be used as a tool of destruction.

It may well be that Einstein's popular image is based on stereotypes. Perhaps Einstein's image is based on the fact of his Jewishness.

If we truly want to learn from his wisdom, then we must do the same. If we want to honor his spirit, then we must do the same. It is a man's right.

Is Einstein knew that two fellow physicists, fellow Jews, from the human beings needed his help. And, yes, his help would not be silent. That is the true spirit of Albert Einstein.

A centennial celebration must do more than explain a familiar name, a famous face. It should honor the man by being true to his spirit. In this case, that means working to free the Jewish scientists. In the spirit of Einstein, can we do anything less?
While Carbondale and SIU were busy digging out of the blizzard that struck the city Sunday, some students were stranded about 30 miles northeast of Carbondale in West Frankfort.

Motorists traveling Sunday on Interstate 57 were forced off the road after it was closed from Benton to Cairo due to hazardous weather conditions. More than 400 people, some of whom were going as far as Louisiana, were housed and fed at two emergency centers set up in town. Thirty-two SIU students were among the 212 travelers who were sheltered at the Youth Center. Another 200 people were housed at the National Guard Armory in West Frankfort. The motorists spent the time reading comics, talking, listening to police scanners and waiting for word that the interstate was open again.

Most of the travelers were able to continue on their way when the interstate opened from time to time Monday. But there were still 50 people sheltered at the Youth Center Tuesday afternoon.

"Spirits were really great," said Barbara Henson, chairman of the Franklin County chapter of the Red Cross disaster unit. "People worked together." Aircraft was sent out Monday to locate any motorists stranded on I-57 and bring people to the shelters.

The West Frankfort Youth Center became the temporary home for more than 212 travelers, 32 of whom were SIU students, when Interstate 57 was closed for snow removal.

Einstein would’ve liked concert

By Judith McLean
Journalism Graduate Student

Albert Einstein would have been honored had he heard the St. Louis Symphony, conducted by Gerhardt Zimmermann and featuring violinist Daniel Heifetz, perform in celebration of the 100th anniversary of his birth Friday in Shreveport Auditorium.

A large, appreciative and enthusiastic audience was treated to a slice of the Romantic with music from that era—all three works were composed in the 19th century—performed by Weber, Brahms and Tchaikovsky.

The distinguished orchestra America's oldest and oldest major orchestra, did justice to the music with an inspired and brilliant performance.

Einstein was a respectable violinist and great lover of music. Daniel Heifetz was an exceptional choice of guest soloist to pay tribute to the centennial occasion. Heifetz performed the Concerto in D major for Violin and Orchestra and Violin No. 1 in G minor, which was the composer's final work, in elegantly orchestrated, and stylistically varied. The familiar theme of the Adagio movement was treated with tenderness by the orchestra and the third movement, which is strikingly

Einstein schedule

Although some activities for the first two days of the celebration of the 100th anniversary of Albert Einstein’s birth were rescheduled, all activities from Wednesday through Saturday will continue as scheduled.

“Einstein Remembered,” a special Paul S. Schopp, professor of philosophy, was canceled Monday. However, the speech will be given at 8 p.m. Saturday in Davis Auditorium.

A humanities symposia will be held in the Student Center Ballroom Wednesday afternoon included in the symposia are lectures on Einstein's feelings about war and social activities.

Supreme Court lets airlines continue to search baggage

By Richard Carroll
Associated Press Writer

WASHINGTON (AP) - Signals from the Supreme Court tell airline passengers who object to physical searches of their carry-on baggage to steer clear of airport screening areas.

The justices left intact a decision prohibiting prospective passengers from leaving airport security posts once a decision has been made to search their baggage.

Even if a person decides after entering a security area not to fly, a federal appeals court has ruled, security officials may search the baggage.

Monday's action - a denial of a petition to review without comment - does not set up the appeals ruling as a national precedent.

But it is now the law in five states - Maryland, North Carolina, South Carolina, Virginia and West Virginia - and may be relied on by other courts in future rulings.

The losing lawyer in Monday's test case said the 4th U.S. Circuit Court of Appeals ruling could serve to enlarge the search power of all law enforcement officials.

"Now it appears police not only may frisk you but also force you to open suitcases, briefcases and handbags - then search them if you refuse," said lawyer Marvin Miller of Alexandria, Va.

Miller's client, Stephen R. DeAngelo, was arrested at Washington's National Airport in 1976 after a search of his briefcase turned up small amounts of drugs.

DeAngelo had objected to the intended search and tried to leave the airport security area to find another means of transportation. He was detained and arrested after a Federal Aviation Administration officer searched the briefcase.

Donations sought for library sale

The Friends of Morris Library seeks unwanted books, recorded albums, cassette tapes and magazines for its annual spring book sale.

People can contribute books and other materials from 9:30 a.m. to 2 p.m. Saturday at the Blue Barracks, located just west of the railroad tracks at Grand Avenue Library. Librarians will appraise materials.

Items not needed for Morris Library's collection will be sold at prices ranging from 10 cents to $2. with special sale on rare and out-of-print books, according to Bill Moore, book sale coordinator.

Proceeds are used to fund acquisitions vital to Morris Library and the public at large. It's a compilation of scholarly writing, the library said, will net the sale more than $2,000.

Both hardcover and paperback books are wanted. Jane Lackrey, executive secretary of the Friends and cookbooks, music and art books, biographies, children's and popular fiction books of all kinds, are acceptable.

The Friends will also accept magazines such as National Geographic, Popular Mechanics and automobile periodicals. The added time permits anyone unable to make the collection day to get in touch with the following members of the Friends of Morris Library in their communities: Anna Ceuden-Jones, R.r. 3, Windridge Farms; 821-3331, Carbondale; Bill Moore, 726 N. Lake, 542-1325, Herrin; Steve Brewer, 962-0066.

Food project gets staffing grant

By Barbara Maddox Staff Writer

Part of a $54,000 federal grant is helping the Shawnee Food Network continue efforts to establish a regional system of food production and distribution in Southern Illinois.

The Comprehensive Employment Training Act grant, part of a national program to provide employment and training for unemployed individuals, is funding three projects in Southern Illinois. The federal moneys are being divided among the Shawnee Prince Project, Shawnee Solar Project and the food network.

The Shawnee Food Network is receiving funds to staff its program for one year. By December 1979, the staff members hired, they hope, the program will be financially self-sufficient.

"The goal is to gradually direct all responsibilities to the general membership," according to Chris Hessen, network coordinator. "We aim to provide a high-quality, low-cost food to local residents through a system of food buying clubs."

There are now 14 clubs, which have six to 12 members each. A manager, who receives a 10 percent discount on farm items, coordinates orders and is responsible for food distribution.

"We are trying to expand to create a system that deals with all levels of federal funding," said Ezra Zem-fiddall, warehouse manager. "We wish local residents, we hope to encourage local food distribution, as well as get people involved, in growing their own food."

The network staff includes a farm market researcher, said Deborah Hall, who coordinates efforts between farmers and individual consumer demands. Donna Kon-schanke, a technologist who encourages solar projects and helps farmers with technology problems, is also on the staff.

A community garden is being sponsored by the network. For a $5 fee, gardemnsmen will be provided with a 20 by 30 foot plot, water, seed and water. The money from the garden will go to the park district.

The 16 annual membership dues collected by the network cover some of the administrative costs. The network has incurred some debts since moving into its new office at 217 W. Main, which has forced the group to use a pre-paid system for food items.

"The network is limited financially at this point," Hessen said. "EFTA funding pays for staff and some bills, but there are many items we need. Right now we need the pre-paid system in order to generate some capital."

The prepaid system allows members to order food on Monday and pick it up at the distribution point Thursday. Bulk orders are broken down at the warehouse which is temporarily located in the office on Main Street. Each member is required to work two, hours monthly to help in the breakdown of food.

The network is the only food cooperative in the area that sells meat and fish. Membership meetings are held the third Wednesday of each month.

AN EQUAl OPPORTUNITY EMPLOYER M/F

IN THE SPIRIT OF EINSTEIN

Take A Message Back To Moscow:
"FREE THE JEWISH SCIENTISTS!"

Einstein was a Jew and a humanitarian. As a Jew, he had to flee from Nazi Germany in 1933 and find refuge in the U.S. As a humanitarian, he never ceased to speak out for justice and human rights. The spirit of Einstein united science and conscience as one goal.

The Einstein Celebration at SIU has gathered an international group of scientists. A. Klimyk and Yu. Smirnov are two Soviet guest professors from Kiev and Moscow.

Do they believe in human rights? Do they believe in the spirit of Einstein? Surely as scientists, they too have a moral conscience. If so, let them take a message to Moscow...

Dr. Vladimir Kislit K of Kiev and Dr. Yuri Golffand of Moscow are two Soviet Jews. Like Einstein, they are physicists. Like Einstein, they are being persecuted for being Jews. Both have been thrown out of their universities for wanting to live in Israel. Both have been arrested and beaten by the Soviet secret police. Their crime - wanting to live as Jews!

Let Klimyk and Smirnov take a message back to the Kremlin in Moscow. "Free the Jewish Scientists! Let them join their families in Israel! In the spirit of Einstein stop persecuting Jewish Scientists and all 3,000,000 Soviet Jews!"

Alumni serve as ambassadors for SIU in foreign countries
By Kate Wall

If you ever plan on visiting a foreign country, check with SIU's Area Services office to see if there is an SIU alumni ambassador located there.

"If there is not one you could be greeted at an unfamiliar airport by someone wearing an SIU sweater and waving an SIU pennant."

It's a wonderful, heart-warming feeling for someone traveling to a foreign country and seeing something familiar. Joseph A. Adams, director of Area Services said in addition to serving as a host or hostess for SIU students visiting their county, the ambassadors act as liaison for the University. "The SIU alumni ambassadors is to acquaint people with SIU and its resources. SIU is continually trying to share it resources," Chu said.

The ambassadors provide prospective students with admission information and assist them in application procedures. Although SIU has been actively involved in an ambassador program for years, the international ambassador program was initiated only a few years ago under the direction of Vice President of University Advancement George Mare. At this time there are 15 SIU alumni who are serving in various positions to voluntarily serve as ambassadors.

One of the goals of the program is to have ambassadors in those countries which have the largest number of foreign students enrolled at SIU, Mare said.

At this time Iran has the largest group of students at SIU; but Chu said that due to recent problems in the area, the ambassador could not be established communication with the three alumni who have been selected to serve as goodwill ambassadors.

Maintaining regular communication with the University is one of the obligations of being an ambassador. SIU sends the ambassadors updated University catalogs and pertinent news releases to distribute to those interested in SIU.

"Most of the alumni chosen to serve as ambassadors are those who were dedicated students at SIU. Chu explained. "When they came to SIU to begin with and when they were students who wanted the best and made that best a reality," Chu said.

There are currently 1,900 international students representing 85 different nationalities attending SIU, according to Chu.

Counselors served as ambassadors include the Republic of China, Hong Kong, England, Greece, Philippines, Japan, Brazil, Thailand, India, Korea and the Republic of Sierra Leone.

Once an alumni accepts the invitation to become an ambassador, he holds the position indefinitely, although he can be removed from active participation at his request.

In addition to the international ambassador program, Area Services is in charge of the ambassadors and alumni ambassador programs.

Alumni who are interested in their community and want to serve the University are selected to serve as community ambassadors. They acquaint their community with services at SIU and receive counselors. There are currently 28 alumni serving as community ambassadors.

"People from a community who need information usually don't know where to turn. If they have a question about the University, the only person they know to call is the University president and people are reluctant to do that," Karne said.

High school students throughout the state are selected to participate in the state ambassador program. Those chosen provide information to high school students.

Model U.N. holds discussions about worldwide issues
By University News Service

"The discussion turned to the turmoil in Iran. President Carter's human rights policies and the invasion of Cambodia. They admitted that decisions have largely been influenced by other countries, but according to the group's president, their main goal has been achieved.

The group is the SIU chapter of the Model United Nations Association. It has only 20 members, but manages to sponsor important political forums such as a recent speech by Barbara Bowman of the U.S. Department of State, who discussed the human rights policies of the Carter administration.

Robert Boucha, a senior in liberal arts from Morocco, is the group's president. He said MUNA is a nationwide, non-political association whose major goal is to promote better understanding of the United Nations, Boucha, who believes that very few Americans understand the daily activities and accomplishments of the United Nations, said he would be happy if his group could influence SIU students to take an interest in U.N. affairs. But he has heard, "it's a kids club" from the public forums. Last year the group sponsored a forum attended by two U.N. officials—the German ambassador and Donald McIlvory, a former SIU graduate who is now deputy U.S. ambassador.

A MUNA forum set for March 28 and 29 will be attended by three U.S. ambassadors from Japan, the Netherlands and Kenya. "They will be on video," Boucha added. "All will present formal speeches."

Model U.N. will continue to meet on Wednesdays at 5 p.m. in room 111 of the Arts building. Meetings are open to the public.

Burleigh Murry, an accountant for the General Accounting Department, looks over the 15,000 baseball cards he keeps in a wooden filing drawer. Murry takes these cards, which date from 1952 through 1976, to collectors' conventions to sell and trade. (Photo by Joe Wacholski)

Accountant collects ball cards

By Joel Wacholski

The warm weather starts to replace the cold, many Carbondale residents catch "spring fever" and turn their attention to sports such as baseball. However, Burleigh Murry has baseball on his mind every day of the year.

Murry, an accountant for the General Accounting Department at SIU, uses his spare time to collect, trade, and sell sports baseball cards.

The 32-year-old St. Louis Cardinal baseball fan uses one of the bedrooms in his modest home in the Cedar Lane trailer court in Carbondale to store approximately 40,000 cards he has collected since he was 7 years old. He says he owns another 30,000 cards that are stored in his parents' house in nearby Newkirk, Ill.

"I try to put all my extra cash into baseball cards, rather than anything else, at this point in my life," Murry said as he peered through a thick black binder stuffed with pages that project various cards of his favorite players. Murry said that only 15,000 of the cards in his own are for sale. These are neatly indexed in a wide wooden filing drawer which he has lined up 10 selected baseball card con-

"I also own the first 52 issues of Uncle Scrooge comics," Murry said proudly.

At SIU, wrestling is a sport that draws attention from both fans and players. The SIU-C Wrestling Meet, scheduled for March 7, 1979, is one of the many events that both SIU-C and SIU-D fans look forward to. The meet will be held at 3:15 p.m.

Tickets On Sale At Shryock and Student Center Central Ticket Office

The Salukis tracksters found out last Sunday just what the word "sprints" meant. Having the writing and biting white stuff, the tracksters changed how they put on their version of "Nauset of the North," by attempting to get to Columbia. N. S. to seek their four straight Missouri Valley indoor title. As you can guess, they never made it.

The team got only as far as University Mall inoperative but sliding vans. Once they reached that halft. they never figured they would make it to their third-place finish, and biting white stuff.

However, the Salukis' biggest test is the four straight indoor title SIU has won every indoor title since joining the Valley three years ago. Last year, the Salukis won close over West Texas State, 160-111, as Mike Lee and Andy Roberts led three conference records.

This year, however, the meet figured to be a close one between SIU and West Texas State. Going into the meet, both teams had indoor bests in most of the events with the hurdlers particularly strong in the sprints and hurdles.

Because of an early press deadline, made necessary by weather conditions hammering down, the Daily Egyptian was not able to provide day-after coverage of the SIU-Central Missouri Valley Conference game at Omaha, Neb., Tuesday night. A complete game story will be in Thursday's issue.

By Grocery Bin

While it rains, it pours, as a well-
known slogan for a particular brand of take-out. For the SIU men's track team, however, that saying can be appropriately changed to "When it rains, it SNOWS!"

The Salukis tracksters found out last Sunday just what the word "sprints" meant. Having the writing and biting white stuff, the tracksters changed how they put on their version of "Nauset of the North," by attempting to get to Columbia. N. S. to seek their four straight Missouri Valley indoor title. As you can guess, they never made it.

Tankers roll for high stakes in Vegas

By David Gafneick
Staff Writer

The Saluki men's swimming team gathered, as usual, in the Recreation Building Tuesday morning. It is usually a tired group that stumbles into the locker room, suits up and begins the day with a two-hour workout.

The routine was the same but the mood which surrounded it was different. The team would not go home after practice, but would begin an odyssey to Las Vegas. Not the trip is both pleasure and business, depending on how one views it.

The Salukis, fully rested from the previous week's labor, will be trying to capture their second straight National Independent Conference swimming title during the weekend stint in "Dollar-vegas."

The Saluki team, which finished third last Thursday, is the final chance Saluki swimmer will have to make national-qualifying times.

The Salukis have qualified swimmers in four events and have qualified Feb. 3 at Indiana. Consuelo Poma has made the time standards in the 100 and 200 breaststroke. David Parker has qualified in the 1,600 free.

Garry Masty, Bill Cashmore and Farizo Greenleaf have made the national point standards in the one-meter diving, while Masty has made the standards in the three meters.

Many, especially senior Greg Porter and junior Pat Looey, are close to the standards. It is understandable that Coach Bob Steele hopes the Salukis flash as much brilliance as in the meet at Vegas. omnipresent neon signs give off light.

The Salukis hope to qualify swimmers in the 50 and 100 free, 200 and 400 individual medley, 100 and 200 butterfly, and 200 and 400 breaststroke and 800 and 1600 free relay teams.

Saluki looey Looey have each been close to the national time standards since the Indiana meet. Porter is still just under the time standards in the 200 butterfly, where he is just 3 seconds away from the national best, for the 200 butterfly and the 200 individual medley.

Looey, too, is less than a second away from establishing in the 50 and 100 free and Steele has been training him for a possible American record at 200 free time.

Parker will try to qualify in the 500 free. Hal Rosario has been chasing after the time mark: in the 300 free and the 200 individual medley. Once a freshman, will try to make the nationals in the 400 individual medley. He has an outside shot at making it in the butterfly, too.

The Salukis, who tried to reach a goal of 136 points in the meet, failed to gain a position in the vault, the strongest event, and gradually went downhill in the next three events.

"We were overpowered by some of our performances," said Coach Herb Vogel. "I don't think anyone would touch us in this meet. We had our best team warm-up all year. But we just didn't perform as well as expected.

Val Painton, the Salukis' most consistent performer, scored 8.45 in the vault, followed by Cindy Moran with 8.75. Mary Carpenter, UI's C, tied, and teammate Gayle Fleischman tied with Painton and Moran respectively for first and third places.

In the uneven bars, Vogel became concerned when the Salukis gained only 5.60 from the three in the event. But he was just not comfortable. Most strange reasoning, whose scores remained in the eight-point range in every event, gave one of SIU's few good performances all evening for a score of 6.45 for first place in that event. Painton scored 6.45, Moran 7.85 and Painton, 7.65 for SIU.

The Illini, led by Gaye Johnson's score of 8.45 in the vault were given a team reduction for continuing warming up after the official call. The penalty gave the team a 3.10 score in the bars, just behind SIU.

"In the balance beam, Painton, scored a 8.75 for first place. That was followed by Fleischman's mark of 8.30 for second place. Painton won the all-around competition with 33.70.

Hennemann also received a penalty in that event, losing three-tenths of a point for a 8.30 score. She ignored the warning bell and the final bell five seconds later for staying on the beam too long. Vogel said the Illini's 'error in my opinion was made an error with the stop watch, but added that errors in all the events were responsible for the Illini's loss.

The floor exercise accounted for the team's final loss. Moran, an All-American who beat out Fleischman for second place in the all-around at the state meet last year, scored 8.40 for third in that event. Circle's Nola Palmer, the top contender in floor exercise, took first place with a score of 8.60. Fleischman scored 8.30 for second.

Nancy Quaritsch from Western Illinois gained second place honors in all-around competition with a 33.40 composite score. Palmer scored 33.35 for third place.

Western Illinois finished fourth in the meet with a score of 126.35. The Westerners placed second at the state meet last year. Illinois State tallied 120.55 points for its second fifth place in a row, while Northern Illinois trailed with a score of 98.50.

"Perhaps we were more worried about some of our girls possibly losing," said Vogel, who has lost only a handful of meets in 25 years of coaching. "We simply beat ourselves.

Vogel said that Painton and Moran may have a chance to qualify for individual all-around competition in the Midwest Regional championship.

SIU's Cindy Moran attempts a back flip from the floor wide balance beam. Moran scored a 7.75 on her routine at Saturday's Illinois state meet at the Arena. (Staff photo by George Burns)

Women gymnasts drop first state title in nine years

By Tim Brodd
Staff Writer

The Illini women's gymnastics state title defending for the past eight years, surrendered this year's IAIAW championship to the University of Illinois-Champaign. Friday night at the arena, a deficit that also handed the Salukis their first loss to another state opponent.

Before a small crowd, the Fighting Illini, who finished in fourth place last year, slipped past SIU 130.95-130.70. The Salukis, who tied Illinois-Chicago with 129.25 points, placed third for the second year in a row.

"The Salukis, who tried to reach a goal of 136 points in the meet, failed to gain a position in the vault, their strongest event, and gradually went downhill in the next three events. The meet lost its sparkle for some of our performances," said Coach Herb Vogel. "I don't think anyone would touch us in this meet. We had our best team warm-up all year. But we just didn't perform as well as expected.

Val Painton, the Salukis' most consistent performer, scored 8.45 in the vault, followed by Cindy Moran with 8.75. Mary Carpenter, UI's C, tied, and teammate Gayle Fleischman tied with Painton and Moran respectively for first and third places.

The Illini, led by Gaye Johnson's score of 8.45 in the vault were given a team reduction for continuing warming up after the official call. The penalty gave the team a 3.10 score in the bars, just behind SIU.

"In the balance beam, Painton, scored a 8.75 for first place. That was followed by Fleischman's mark of 8.30 for second place. Painton won the all-around competition with 33.70.

Hennemann also received a penalty in that event, losing three-tenths of a point for a 8.30 score. She ignored the warning bell and the final bell five seconds later for staying on the beam too long. Vogel said the Illini's 'error in my opinion was made an error with the stop watch, but added that errors in all the events were responsible for the SIU's loss.

The floor exercise accounted for the team's final loss. Moran, an All-American who beat out Fleischman for second place in the all-around at the state meet last year, scored 8.40 for third in that event. Circle's Nola Palmer, the top contender in floor exercise, took first place with a score of 8.60. Fleischman scored 8.30 for second.

Nancy Quaritsch from Western Illinois gained second place honors in all-around competition with a 33.40 composite score. Palmer scored 33.35 for third place.

Western Illinois finished fourth in the meet with a score of 126.35. The Westerners placed second at the state meet last year. Illinois State tallied 120.55 points for its second fifth place in a row, while Northern Illinois trailed with a score of 98.50.

"Perhaps we were more worried about some of our girls possibly losing," said Vogel, who has lost only a handful of meets in 25 years of coaching. "We simply beat ourselves.

Vogel said that Painton and Moran may have a chance to qualify for individual all-around competition in the Midwest Regional championship.
