Delyte Morris to be honored with heroic-size bronze statue

By Vicki Ogletree
Staff Writer

A statue of Delyte W. Morris will be placed in the main hall of Morris Library and will be unveiled April 9 as part of day-long festivities commemorating the late SIU President.

The heroic-size bronze statue of Morris will rest on a pedestal constructed from bricks from the Old Main Building, which burned in 1960, according to Jack Dyar, executive director of University relations.

Morris, who died April 10, 1960, served as president from 1948 to 1970, a period of explosive growth for the University. During his tenure, enrollments expanded from 3,013 to 23,843, and SIU grew from a small teachers' college to the University it is now.

"The ceremony will be a serious activity which will honor the tremendous contributions Morris made not only to the University, but to the region," Dyar said.

The statue, which is one-and-a-quarter times lifesize, was sculpted by Fredda Brillant, a fellow of the Royal Society of Arts. She began sculpting the clay model in April, 1968. Brillant is the wife of retired SIU-C professor, Herbert Marshall, former director of the Center for Soviet and East European Studies.

"Perhaps as an independent artist, ruthlessly objective in my work," Brillant said in a news release in 1970, "I am able to appreciate the greatness of the president of SIU and what he has achieved."

Dyar said more than 275 people have donated money to the SIU Foundation, specifying that the funds be used for the statue. He said the University has a legal obligation to use the money for the statue as specified and that no state funds would be used for the purchase.

A contract between Brillant and the SIU Foundation calling for the completion and delivery of the statue by the date of the ceremony was made in November 1972. According to Jerry Mathias, special assistant to the vice president for University relations and development, Brillant will receive $100,000 for her work.

"Actually she is giving up a great deal of her time. She estimates the full value of the clay at $300,000 to $500,000." Morris posed for the sculptor at different times during the two years she worked on the clay model, according to John Dyer, a professor of high education who chaired a committee to raise money for the statue from 1971 to 1973.

"She sculpted it in a small room in her studio." Dyer said.

"I will never forget the image of that big statue in that little room."

Mathias said the bronze cast was made at the Noack Foundry in West Germany. He said he and Brillant picked up the cast from customs at Lambert-St. Louis International Airport, St. Louis, on Jan. 26.

Defeat of plan no surprise to its supporters

By Karen Terry
Staff Writer

The failure of voters to approve the Carbondale Community High School District 195 consolidation plan Tuesday was a disappointment, but not much of a surprise to the supporters.

"We all recognize that when you ask people to vote, you don't want to do it," said John Cherry, chairman of Citizens Committee for the Referendum, said Wednesday.

The proposed $8.75 million bond issue, for the construction of an addition at East Campus, was voted down.

"We have been very consistent in understanding that taxes will go up anyway and we may as well have it," Cherry said.

The consolidation plan received 3,601 "no" votes and 2,921 "yes" votes in the election Tuesday, according to the unofficial tally.

The failure of the plan mandates a million sale of bonds to finance improvements to bring Central Campus facilities in compliance with state health and safety laws.

This bond would be supported by the state and not subject to voter approval. Property tax increases it creates will show up on 1983 taxes payable in 1984.

A study of allocation of funds to be spent over three years will be discussed at Thursday's CCMS Board of Education meeting.

According to high school superintendent Red Martin, repairs to bring Central Campus up to code will cost $3.5 million. An additional $30 million will be spent for renovations in special and vocational school classrooms and areas. The remaining $2.2 million is earmarked for improvements to Central Campus for electrical, plumbing and roof repairs and renovations to meet state requirements for handicapped facilities and equipment conservation.

Although the consolidation plan was not approved, the Vocational School, 49 E. Main St., will be moved and its classes

What's good for SIU-C is good for Southern Illinois, President Albert Somit told the audience at a Southern Illinois University-sponsored banquet Tuesday night. Somit, speaking for Gov. James Thompson's proposed tax increases, said that if the tax package does not go through the Legislature, it will mean a $10 million loss for higher education, a $16 million loss for SIU-C and SIU School of Medicine, and an $8 million loss for the Carbondale campus from the current year.

"This will be a near-disaster for the University and it will have serious consequences for the state, Southern Illinois particularly," he said.

Somit said that between the 10,000 students who work for the University off and on during the year and the 5,500 staff members it employs, SIU-C has a payroll in excess of $100 million. Using a "modest multiplier" of 30 percent, he said, this means "we are losing $315 to $140 million into the economy of Southern Illinois every year."

In addition, he said, another $90 million comes from the 23,000 students who attend SIU-C, 30,000 of whom are residents. The average student spends $4,500 on such things as food, clothing and housing during the school year, he said.

Add to that $75 a day spent by the average visitor to the University, he said, and it represents 15 to 20 percent of the economy of Jackson and Williamson counties from SIU-C.

Budget reductions mean a loss of staff and fewer students, which adversely affects the economy of Southern Illinois, Somit said.

"This is why I say that when the University is cut, all of Southern Illinois bleeds."

Also, many professionals in Southern Illinois have been trained at SIU-C. More than 7,000 SIU-C graduates work in Jackson and Williamson counties, he said.

The cuts in the budget for higher education, which come on top of several less years, could not come at a worse time, Somit said.

"We have had no salary increases for this year and another 2 percent of our budget has been called back," he said. The past decade, he said, has seen faculty salaries fall 36 percent and the personal consumer Price Index. In fact, in terms of support for higher education in the last decade, Illinois ranks 50th among 50 states, he said.

Also, he said, the University is projecting an enrollment of about 22,500 for next fall, a considerable drop from last fall. He attributed this to a decline in high school enrollment and the increasing cost of going to college.

Byrne pledges support

CHICAGO (AP) - Defeated incumbent Jane M. Byrne pledged her support Wednesday for Harold Washington in his bid to become Chicago's first black mayor, asking Democrats who voted along racial lines in the primary to rally behind the South Side congressman.

Washington was too close to his own victory for a news conference after his surprise victory over Byrne in Tuesday's primary. His aides reporting that reporters racist tactics have no manager. AI Raby, told reporters "It's a victory for a two-year Carbondale City Council term. Byrne received 766 votes to Tuxhorn's 479. Loser Matthew Green got 256 votes.

"It's not really unexpected that he (Byrne) got as many votes as he did," due to advertising and the fact that his name was first on the ballot, Tuxhorn said Tuesday night. "It shows me what I have to do." to be elected in April.

Bevis said organization and planning by his campaign committee, as well as his experience in city government, contributed to his victory. Bevis 20 years member of the Zoning Board of Appeals, a position he said may be a conflict of interest if Bevis is elected to the council.

Bevis argued that anyone in elected office runs the risk of conflicts, but said that conflicts can be resolved by abstaining on certain issues when they arise.

With the primary behind him, Tuxhorn said, "I think I'm going to be in a better position now to direct my discussion of issues more toward my opponent, instead of worrying about getting on the ballot."

He added that he hoped "purposes and goals that make sense," such as his opposition to the proposed downtown conference center, "will win out over advertising dollars spent."

In his campaign for the general election, Bevis said he plans to stick to the issues of streamlined city government and support of the conference center. He called the center a "dead issue," though, until the Illinois Supreme Court rules on the city's "quick take" ordinance.

Swinburne chosen as job candidate

Bruce Swinburne, vice president for student affairs, has confirmed he is a candidate for president at Murray State University, Murray, Ky.

Swinburne, 56, has been at SIU-C since 1976 and has held his vice president's position at Murray since 1975. He had no comment on Byrne's candidacy.

Formal announcements of the candidates will be made when they return to the campus for interviews, Richard Frymeyer, chairman of the Murray State Board of Regents, said Tuesday.

Frymeyer said the Regents will name the new president before June 30, when the contract of current President Constantine Curris expires.
Tuition increases concern Hutcherson

By Vicki Olgeasy
Staff Writer

The main concern facing Student Trustee-elect Sharon Hutcherson will be the question of access to higher education. This was expressed by both Hutcherson and State Irvin, whom she will replace, at a news conference Wednesday Irvin resigned as a member of the Illinois Board of Trustees meeting Feb. 10 because he has taken a position in the Jackson County states attorney office.

Hutcherson, a second-year law student from Chicago, was elected Tuesday from among five other candidates. Hutcherson received 1,180 valid votes of the 1,418 valid votes cast.

Staff Writer

The statue of Morris is one of prime ministers, artists and congressmen, in cluding statues of Mahatma Gandhi, Prime Ministers Pandit Nehru and Indira Gandhi, and Lord Elwyn Jones, the Lord Chancellor of England.

"Of all my sitters, I can compare Morris in stature to Pandit Nehru, though many may not agree," Brilliant said in 1970.

The unveiling ceremony is just one of many activities being planned for the tribute to Morris. James L. Fisher, who has been president of the Council for Advancement and Support of Education in Washington, D.C. since 1979, is scheduled to deliver the convocation address.

Irvin and Hutcherson will work together during an "intense, short transition." Irvin said he will inform Hutcherson of the issues that will face the board at its next meeting March 10 and of the personalities of the board members and the University administration.

Hutcherson said she will organize committees, composed of student volunteers, to examine the issues that face the board. "Through the volunteer program, I believe we can raise participation from the student body," she said.

Hutcherson said she will also solicit ideas from each of the candidates she defeated in the election Tuesday.

The wide margin of her victory was the result of planning, she said. "I planned for some years to run for this position."

She said the relatively high voter turnout should show the administration that students do care about student representation on the board. "This was a special election," she said. "It's particularly exciting that so many students came out and voted."

Hutcherson's term will expire June 30, but she said she will run in the election for next year's term.

DEFEAT from Page 1

College:

"We may be in the process of pricing out even the state universities low and middle income families," he said.

And tuition is going to increase. The Illinois Board of Higher Education has recommended a 13 percent tuition increase for next year.

But Irvin said that higher education will not be able to survive on an increase of that size if the Legislature doesn't pass the proposed tax increases.

"Students are being asked to bear a greater and greater percentage of the cost of higher education," he said.

SOMIT from Page 1

SOMIT pointed out that several UIUC offices and research centers are available for use by Southern Illinois businesses and government agencies, such as the Office of Regional Research and Service and the Coal Extraction and Utilization Center.

SENIOR SAYS...
Opinion & Commentary

C'dale's rock 'n soul deserves rescuing

WIDB, "CARBONDALE'S ROCK AND SOUL," may be reduced to Carbondale's black hole if somebody doesn't come to its rescue soon.

With a debt fluctuating between $7,000 and $9,000, the student-operated cable radio station may fold by summer. However, Station Manager Jim Haggarly has suggested a plan to save the station from the impending bankruptcy and his ideas deserve consideration.

Haggarly wants to align WIDB with the Radio and Television Department by transferring its assets to the department. He would also like to relocate the station from Wright I to the Communications Building to cut down rent—one of the major expenses of WIDB—and to have more access to professional guidance from the Radio-TV faculty.

WIDB, as a Student Organization, annually receives one of the largest allocations of activity fees from the Undergraduate Student Organization. But it needs its money to hire students to bail the station out of its financial straits, but they should remember that the station also serves many of the students, either directly, with 130 people on its staff it's one of the largest RSO's or indirectly (campus-wide student listenership).

WE PROPOSE that the USO should find the money, perhaps by special assessment, to help pay off either all or a large portion of WIDB's debt, and the station should not be forced to relocate in the Communications Building. The station is still located on hard times, an important part of college life. For radio and television majors, the reduction of on-the-job experience opportunities at WSIU-FM and WSIU television has made WIDB's radio and television majors a vital part of their education. For the student body, particularly the black population, it's a vital voice.

But this should not be no-strings-attached help for the station. Past mismanagement, ego conflicts, and a "never say never" attitude have contributed greatly to its present problems. The station needs to make accountable decisions and begin to wean itself from relying on USO money. But with a shot of financial help from the USO and the guidance of professionals from WSIU-FM and Television Department, WIDB can get its station in order.

Virgil in doghouse after tree remark

In regard to the Virgil comic strip appearing in the DE, Feb. 11, I must say your cartoon is not exactly funny. Virgil's comment was: "If you cuddled about recycled paper when they can make trees out of it!" Virgil, are you referring to trees upon which you can lift your leg? Or are you just being ignorant about the importance of recycling? It sounds like a bit of both.

I'm not sure if you are a dog that walks on two legs with your paws in your pockets, and you speak English, or are you just being ignorant of the importance of recycling.

Forget SIU-C men's basketball;
print the NHL, NBA standings

Bravo! It's about time the DE provided students with the opportunity to read about other sporting events i.e., the NFL and NBA standings which appeared Feb. 22 besides how many points the SIU-C men's basketball team lost by.

Though we realize that the DE is a student newspaper, it is quite refreshing to read about professional sports. We would greatly appreciate it if the DE would print more articles concerning these events.

Anouncing the Co-Dean ticket platform

By Christopher Kade

"dumb things are less likely to get away with us, if we have to be fooled." These and other eminent-sounding arguments got Bytwerk's campaign off to a flyer. However, one thing was missing: A running mate. Specifically, someone from outside Speech Communication in order to 'balance the ticket' in Randy's words.

Everyone who's been on tenterhooks since then can relax now. In a recent newsletter-"The Journal of the Co-Dean Society" Bytwerk has announced that his running mate will be Darwin Payne, professor and chairman of the Theater Department. Bytwerk reasoned that since Darwin is a twice the salary of an average professor, why split the job between two professors?

So don't like one of us, you can always talk with the other. After all, isn't the editor of his newsletter, the Co-Dean Ticket News. And
THE STRENGTHENING CAMPUS COMMUNITY

- **Event:** A STRENGTHENING CAMPUS COMMUNITY WORKSHOP
  - **Time:** Will be held from 5 to 7 p.m. Thursday in Room 151, 01 The Student Center.
  - **Details:** The workshop is open to all GLMU students.

- **Event:** THE WORKSHOP
  - **Time:** Will be held from 7 to 9 p.m. Wednesday in Room 151, 01 The Student Center.
  - **Details:** The workshop will cover Sexuality, Safety, and Lesbian People's Union.

COALITION FOR CHANGE

- **Event:** COALITION FOR CHANGE: Change will happen, but we need to plan.
  - **Time:** Will be held on Thursday in Crowe Auditorium. The time is not specified.
  - **Details:** The meeting will discuss the role of the Coalition for Change.

THE SOUTHERN ILLINOIS STUDENT COUNCIL (SISC)

- **Event:** SISC General Body meet will be held at 5 p.m. Thursday in the Student Center. The meeting is mandatory unless otherwise notified.
  - **Details:** They will do a STEER budget and resolution workshop.

WHERE SPAGHETTI MEATS SAUCE

If you're looking for a delicious and rich Spaghetti Meat Sauce, look no further! This simple yet satisfying recipe will make your taste buds sing.

**Recipe:**

- **Ingredients:**
  - Ground beef
  - Italian sausage
  - Spaghetti
- **Instructions:**
  1. Cook ground beef and Italian sausage in a large pot over medium heat.
  2. Add the following vegetables:
     - Onions
     - Bell peppers
     - Garlic
  3. Add the following spices:
     - Italian seasoning
     - Basil
     - Oregano
     - Salt
     - Pepper
  4. Stir everything together and let it simmer for about 30 minutes.
  5. Serve over cooked spaghetti.

Enjoy your delicious Spaghetti Meat Sauce! It's the perfect comfort food for those chilly evenings.

BICYCLE SALE

- **Offer:** BUY TWO BICYCLES AND SAVE $20 - $100
- **Brands:** Fuji, Trek
- **Contact:** For more information, call 549-3412.

THE STUDENT COUNCIL (SIC)

- **Event:** A program of oncampus will be held at 7 p.m. Thursday at the Jackson County Community Mental Health Center. The event will be presented by staff members of the center. Invitations are extended.
  - **Details:** The SIC Student Council Meeting will be held at 7 p.m. Thursday in the Kellogg Hall on campus.

THE STUDENT WELFARE COMMITTEE

- **Event:** A Student Welfare Committee meeting of the Student Union will be held at 7 p.m. Monday in the Student Union. The meeting is mandatory unless otherwise notified.
  - **Details:** All students are invited.

JERROLD GOLD'S CASE GOES TO JURY

Chicago (AP) - Charges of song-stealing by the Bee Gees represent an attack on the artistic integrity of the group, said a defense attorney who asked a federal court jury Tuesday to question why the group would copy an amateur composer's song.

"Does it make sense to you that they would steal a song that was repeatedly rejected by publishers and radio stations by an amateur songwriter that the Bee Gees so easily have bought?" the group's attorney, Robert Osterberg, asked during a closing argument. Nevertheless, Robert Selle, a musician whose music is maintained in a U.S. District Court suit, said that the now widely popular song "How Deep Is Your Love?" performed by Bee Gees in France, had been created without the song's "birthright." The suit accuses the group of copyright infringement.

Federal Judge George Leighton was expected to provide oral instructions Tuesday before turning the case over to the four-man, four-woman jury.

"Evidence has shown that the two songs are strikingly similar," Selle's attorney, Jerrold Gold, said repeatedly during his final argument. God used a series of huge charts to show that two portions of each song have close similarities in both melody and rhythm. He then played portions of each song for the jury.

During the trial, Selle testified the song occurred to him while he was shaving one morning and, before leaving for work, he wrote down the notes. He said he wrote the lyrics about a week later.

The brothers Gibb testified they never saw or heard of Selle's song and that it was copied, "How Deep Is Your Love?" during an informal session - "an isolated chat in France.

"There is as much evidence of copying by Mr. Selle of composers ranging from Beethoven in the Bee Gees as there is that his song was copied," Osterberg said. "Either way, he should not be allowed to recover damages."
Hospice to assist terminally ill

By Mary Pries
Staff Writer

After a terminally ill person leaves the hospital, there is a gap that needs to be bridged, and someone to care for that person at home, according to Joseph Lynch, director of social work at Memorial Hospital.

"We are trying to bridge that gap that needs to be bridged, and someone to care for that person at home," Lynch said. "We have a lot of people that need to be cared for, and we are trying to fill that gap." Lynch says Hospice Care is worth putting time into.

"I also see it as a challenge to be giving and sensitive. We will all have to get in touch with each other and be aware of each other," she said.

Boyd said discovering how the volunteer feels concerning death is one of the aims of the training, so that the volunteer can take a good attitude toward his patients.

"We want the person to be able to live as normal a life as he realistically can," she said.

Boyd explained the work as performing the "nitty gritty" things of everyday living.

"Someone may be needed to go out and get medication for the person, to talk about the problems of facing death or to let the family get away for a while knowing that someone dependable is with the ill person," she said.

Boyd said he hopes people in the area will have a good reaction to the group and commented, "I think it will be rewarding work for us and helpful for many people."

"Right now, it is just a baby being born. But we hope to get more members in the group so that we can serve many people in the area," she said.

Engineering Week activities slated

By Robert Green
Staff Writer

The College of Engineering and Technology will put engineering week activities on test on Friday by hosting the 4th Annual Engineering Pentathlon.

CET will also host an open house from 9 a.m. to 4 p.m. Friday featuring guided tours of New Facilities and demonstrations of equipment, all in observance of National Engineering Week.

Kenneth Tempelmeyer, dean of CET, said the tours will begin in the student lounge of Tech A. He said high school, junior college and all SIU students are welcome to attend the open house.

Tempelmeyer said the tours will include films, slide shows and demonstrations including the applications of lasers, industrial robots and wind tunnels.

The pentathlon, open to all SIU students and faculty, will begin with a test of skills in "engineering package and shipment," in which contestants will build and test a simple package which can be dropped from the fourth floor of Tech A.

Accuracy will be a factor in the first event, and the event will occur from 11 a.m. to 4 p.m. Information on the event can be obtained at Tech A-108.

The "aircraft design" event will involve a plane, a distance and endurance test, and will be held from 1 to 4 p.m. in the student lounge of Tech A.

The "conpressive structure" event, contestants will attempt to build the strongest possible structure from a maximum of 10 computer cards. The cards may be folded, cut or torn, but no glue, tape, staples or other items may be used. The event will take place from 1 to 4 p.m. in Tech D-132.

In the "mouse trap marathon," contestants must build a better vehicle powered by a mouse trap spring, and the contestant with the longest distance will be the winner. The event will be held from noon to 3 p.m. in the courtyard in the center of the Tech B lobby.

Finally, "the maze" will involve a computer-generated video maze of 120 rooms and each contestant must find a way through the maze within five minutes. The event will be held from 11 a.m. to 4 p.m. in Tech D-114.

Contestants who wish to participate in all five events must register for the pentathlon in the student lounge of Tech A from 9 a.m. to 4 p.m.

Tempelmeyer said the engineering pentathlon has proved very popular in the past, with up to 50 or 60 contestants in each event.

To coincide with the open house and the pentathlon, the INTECH Engineering Club will host a banquet at 7 p.m. Friday at the Carbide & Carbon Inn. George Sloan, director of science and engineering for the St. Louis Regional Commerce and Growth Association, will be the keynote speaker.

Carrack album impressive showcase

By Jeff Wilkinson
Staff Writer

One of the finest English songwriters, U.S. has been their line of "Great British Vocalists". Regardless of the trend in American rock, we have always had a longing for the soulfulcrooner — someone like Joe Cocker, Rod Stewart or Van Morrison. Now and Paul Carrack could be the latter addition to that list. He delivers a powerful, soulful vocal with relentless energy and absolute control.

His new solo release on Epic Records, "Suburban VooDoo," is an excellent songwriting collaboration with Nick Lowe and Carlene Carter. It is also an impressive showcase for Carrack's soaring vocals.

Paul Carrack's break into the U.S. market came in the mid-'70s when his song "How Long," became No. 1 hit for the band Ace. After Carrack broke up with Ace — a divorce based on economics rather than emotion — he moved to Muscle Shoals and contributed to their "Hear 'N There" album. He has played among many of England's finest musicians such as Joe Cocker, Rod Stewart, and Carlene Carter.

"Lovesick," a new release from writer-director Marshall Moore plays Dr. Saul "Arthur," a young playwright and a politician. Moore is suffering from "Ordinary People," a drunk and a politician. He is playing some problems.

Now Moore is playing a young playwright and a politician. He is playing among many of England's finest musicians such as Joe Cocker, Rod Stewart, and Carlene Carter.

Willie Nelson
to play Arena

Country superstar Willie Nelson will bring his “Family” along when he arrives at the Arena for a concert at 8 p.m. March 24.

Nelson, whose career has spanned three decades, has recently had a resurgence of his career and is a perennial favorite wherever he plays.

Over the years Nelson has released numerous records, most of which have met with great success. Since 1979 Nelson has been presented with four Grammy Awards, including his latest award; “Best Country Song” for the single “On the Road Again,” from the “Honeysuckle Rose” soundtrack.

Nelson has also received four Country Music Association Awards, including the 1979 “Entertainer of the Year” award.

In 1986, he also won the Academy of Country Music’s “Entertainer of the Year” award.

Tickets for the March 24 show go on sale Saturday at the Arena South Lobby Box Office.

The Line Reservation Card System is no longer being used for this show. Ticket prices are $10.50 and $12.50.

Essay contest now taking entries

The Illinois Beta Association of Phi Beta Kappa is soliciting student essays for its first annual essay competition.

Essays will be written on the topic “Do You Have What It Takes to Be the Teacher of the Year?”

Spokesmen said part of the challenge is to define and award to the person who shows the greatest success.

Entries will be judged according to originality of thought, clarity of expression and logical development of the argument.

Essays must be in the range of 2,500 to 3,000 words—eight to ten pages—and must be typewritten and double spaced.

All entries become the property of the Illinois Beta Association.

A prize of $200 will be awarded to the person writing the top essay. It will be awarded at the annual Liberal Arts and Sciences Honor Society banquet on Honors Day March 27.

All SIU-C undergraduate students currently enrolled for at least six semester hours credit are eligible to submit entries. Deadline for entries is 4 p.m. March 10.

Persons desiring additional information may contact Cathy Walsh, secretary-treasurer of the Illinois Beta Association, at 452-4301.

Calipre to present journey of Noah

The Calipre Theatre group will take a fun-filled look at the journey of Noah’s ark Thursday, Friday and Saturday at 8 p.m. each night with the production of “Surviving the Flood: A Novel by Stephen Minoff.”

The production was adapted for interpreter’s theater by Frank Trimble and Susan Mace, graduate students in speech communication.

Trimble also is directing the play.

The Calipre Theatre is sponsored by the Department of Speech Communication.

Tickets to “Surviving the Flood” are $2.50 and are available in Room 2002 of the Communications Building from 1-4 p.m. daily and one hour before each scheduled show. The Calipre Theatre is located on the second floor of the Communications Building.
Folk entertainer Dave Parker will showcase his special brand of music and humor at 7:30 p.m. Thursday in the Old Main Room of the Student Center.

For several years, Parker has been, in his words, "caping, caring and confounding audiences across America, with his hybrid style of folk entertainment."

In 1981, Parker thrilled the audience at Florida's Cypress Gardens Winter Ski Show by skiing through the course at 30 miles per hour, clutching his guitar with his trademark straw hat duct-taped on his head.

Parker has been known to go to almost any length to amuse and please his audience, including ventriloquism where he talks with "Road Manager Ron."

The other side of the coin is Parker's musicianship. Parker plays 6 and 12-string guitars and double-reed harmonicas while performing a mixture of well-known songs by others as well as his own music. Included in his repertoire are works by Dan Fogelberg, Bob Dylan, Harry Chapin, James Taylor and Kenny Loggins.

In 1983, Parker released his debut album, "Maiden Flight." on Beacon Records with the single, "Grandpa's Jeep," receiving extensive radio play in the upper Midwest.

Free coffee will be served at the performance which is sponsored by the SPC Center Programming Committee.
Today's puzzle

Professor gets award for service

Robert Kingsbury, associate professor of music, has received the fourth annual Service to Student Affairs Award, given for outstanding contributions to student life at SIUC.

The award was presented Tuesday at a banquet in the Student Center Old Main Room. Margaret Barr, SIUC alumni and vice president for student affairs at Northern Illinois University, was the keynote speaker.

Kingsbury, who came to SIUC in 1960, has directed choral activities of the School of Music for more than 30 years. Before joining the SIUC faculty, he was director of choral activities at Wilson College in Chambersburg, Pa.

He also served as director of vocal music at Columbus High School, South Orange, N.J., and associate choral director at Evanston, Ill., Township High School.

Between 1955 and 1957, Kingsbury sang with the Robert Shaw Chorale and Fred Waring's Pennsylvanians. He also sang professionally in regular appearances on the Perry Como Show, Dinah Shore Show, Garvarway at Large, and the Arthur Godfrey Show. A native of Hattiesburg, Miss., he received a bachelor's degree in music from the University of Southern Mississippi. He earned his master's degree at Northwestern University and also took a bachelor of music education degree.

45th ANNUAL MEETING
of the
SIU EMPLOYEES CREDIT UNION
WEDNESDAY, MARCH 9, 1983
at the
SIU STUDENT CENTER
BALLROOM B

Luncheon*
Business Meeting

11:30 a.m.
12:15 p.m.

*RSVP-ADVANCE TICKETS REQUIRED for those desiring lunch. Tickets will be available at the Credit Union office and various on-campus locations for $2.00 per person.

CALL 457-3995 FOR ADDITIONAL TICKET INFORMATION.

Following the Business Meeting and Election of Officers, DOOR PRIZES WILL BE AWARDED.

THIS IS YOUR CREDIT UNION
MAKE PLANS TO ATTEND NOW!!!
Get into court.

As a Judge Advocate in the Marines you'll step right into a courtroom. You'll be a leader too. You'll have the opportunity to practice law in a variety of challenging ways, some seldom encountered by a lawyer in civilian practice. Also, you'll be given the opportunity to gain additional in-depth postgraduate education at government expense. If you're a man or woman in pre-law, law school or you've already passed the bar...we have a law program for you. To qualify, you'll have to be in top physical condition and measure up to our demanding standards of academic achievement. And if you measure up, we'll offer you challenge, travel, good benefits and a salary commensurate with most corporate starting salaries. We can even offer you full-time summer employment in the legal field while in school. So, if you're looking for more excitement and a life, drop by your college placement center and set up an appointment with your Marine Corps Officer Selection Officer. Or call this number, toll free. 800-423-2600. In California, 800-252-0241.

Maybe you can be one of us.
Hiker will return to face fear, conquer the Appalachian trail

By Ann Flaxen-
Student Writer

When Alan Strackeljahn began hiking the Appalachian Trail in May 1981, he knew it wasn't going to be a summer street.

But he didn't suspect he would be trapped by a rattlesnake and have his backpack ravaged by mice. And he had no idea that in the stillness of the night, he would fear for his life after hearing the brutal murders of two other hikers on the trail.

But now, almost two years later, Strackeljahn, a senior in mechanical engineering, hiked the first trip. he said. the mice came. Inside a paper. back unless it was open.

According to Strackeljahn, which stretches from Georgia to Maine, about 700 miles. "Perhaps I'll be able again. This time he'll be a lot of nature. he said.

During the walk, Strackeljahn learned that it might have been easy to do something I never thought I would do. I'd leave now if I could," he said.

"After I quit I was pretty depressed and angry with myself, but I knew I would do it again and finish it," Strackeljahn said.

"I'm going to finish it this year. I know I will. Otherwise I won't come back," he said.

"Two years ago, there was a time Strackeljahn thought he might not come back from the first trip. The hardships of the effort were wearing on him, and he realized three faults which contributed to his decision to stop.

During the darkness of the night, he said the mice came. They chewed holes in his back without it was open. Once inside, the mice ate anything from peanut butter to toilet paper.

But he said the mice were by no means the worst hazard on the trail.

Industrial technology courses taught to military in England

By Terry Levee-
Staff Writer

If you can't come to SIU-C, maybe SIU-C will come to you. It may even reach across the Atlantic, if you're in the military and interested in industrial technology.

The College of Engineering and Technology has expanded its borders all the way to England, where members of the U.S. Air Force are taking the same industrial technology courses by the same teachers that students in Carbondale too.

The bachelor degree program taught at four Royal Air Force Bases - Alconbury, Mildenhall, Bentwaters and Chickies - is the first overseas program for SIU-C, according to Military Program Director James F. Orr. The program is in its second semester and has 40 students enrolled, Orr said.

The program is based on existing military programs within the U.S. that began in 1975. Only 48 hours of the core industrial technology courses are offered and are taught in a weekend format. Remaining general studies and other requirements are taught by other colleges, Orr said.

Professors Robert O'Hagan and Paul Andrews are the first faculty members to teach in England, where they will stay at least one year. Orr said.

"It's very exciting what it's doing to enrich our program," Orr said. "I have quite a number of people waiting to go - I've become very popular.

Faculty who participate in the program receive the same pay plus a housing allowance, and if they stay for more than nine months, the Air Force will pick up the bill for instructors' dependents too, Orr said.

The program allows faculty to pick up the program in British industry and get responses on existing practices, he said.

Orr said the Air Force became interested in expanding the program after the success in the U.S. Students who were in
Hiker from Page 12

with five other hikers in a shelter near the site of a brutal double-murder which occurred only nights before. The police had no suspects and felt hung in the air like a thick fog.

During the blackness of a new-moon night the campers were awakened by the screams of someone in the shelter. With only a flashlight shining white trails of light on the three-sided structure the hikers' panic grew.

After the dust settled, the scene was more comical than frightening. A small raccoon had fallen from an overhead beam onto a hiker's face, causing the alarm.

"If we stop for even two days, I think we could finish," said Strackeljahn. "Mentally, it is very strenuous. Aside from the usual hiking scenery around, there isn't much to think about except your aching feet or the craving you have for ice cream. You just hope you can hold onto you get to the next town."

Strackeljahn has begun training for the effort.

His preparation includes sleeping on the floor, running and climbing stairs. Tripping, on the other hand, he'll wait until the weather warms up before starting his training.

Aside from getting yourself into physical shape, there really isn't much you can do to prepare. Everything falls into place in the first few days of the walk.

A typical day on the hike will begin at 5:30 a.m. with a bowl of oatmeal and the daily ritual of bandaging sore feet with moleskin. After walking up to four hours — anywhere from six to 10 miles — there's a half-hour lunch of Pop-Tarts or crackers. Then there's more walking.

According to Strackeljahn, the speed with which he can hike depends on the terrain he's crossing. On even, unobstructed ground, he said he can make over three miles an hour.

But getting through Mahoosic Notch can take hours. The path is mostly covered with boulders and often you have to push the backpack ahead on the rocks," he said.

"But it's time for conversation and sleep at nightfall."

The Appalachian Trail Conference recommends each hiker be prepared to spend about $200 for the entire hike. But Alan believes it can be done for much less if one is willing to go without certain luxuries such as cookies.

Dinner usually consists of dried foods or instant soup. Then it's time for conversation and sleep at nightfall.

And, of course, with nighttime comes dreams of the next day on the trail.

Hikers traveling south will write down terrain reports or problems that someone north might encounter. They also might include things to do in the area or cheap places to eat in nearby towns.

Restaurants offer "al相近 things" are a draw for hikers who burn thousands of calories per day," Strackeljahn commented.

The Appalachian Trail Conference recommends each hiker be prepared to spend about $200 for the entire hike. But Alan believes it can be done for much less if one is willing to go without certain luxuries such as cookies.

But getting through Mahoosic Notch can take hours. The path is mostly covered with boulders and often you have to push the backpack ahead on the rocks," he said.

Early afternoon signals the end of the day's walk, leaving the hiker to make camp and explore the surrounding countryside. He said there is a system of about 190 camp shelters — one every 10 miles — used by hikers.

After the last walk, he shared the shelters with other hikers he met along the way. Hiking the trail, Strackeljahn said, isn't as lonely as one might think. A hike from the beginning, I was in contact with other hikers. There wasn't much you could do but relax and read."

Strackeljahn said the shelters also have registers for hikers to write and messages. He considers these registers invaluable.

The financial status of the overseas program is now at a break-even point, Orr said, "but the prospects are good to enhance our financial status."

The program is accredited by the National Association of Industrial Technology.
Summer - Attractively furnished, centrally located, near campus. Gas heat, water included. $600 deposit. Pets considered. Call 549-3597.

SIU-C offers unique course
By Sheila Washington  Staff Writer

The only public mortuary sciences university program of its type in the state is at SIU-C, and some students have difficulty finding employment. Currently, certain classes are a potential career path for students with the ability to take two bachelor's degrees in another field such as psychology, or business. Some students fail to understand the emotions of people and have trouble adjusting to the situation that must be dealt with.

Professor sees link in coal, acid rain

By Ray Quintanilla

Student Writer

"Acid deposition," as it is technically called whether it be acid rain or other form of low pH atmospheric precipitation, has a direct link to high sulfur coal, says William Brower, associate professor of engineering.

He disagrees with those that say there is no link and rejects the use of the term "acid rain" to refer to all low pH precipitation.

Brower, a research scientist at SIU-C for seven years, takes exception with those who say high sulfur coal is not related to low pH conditions. "No one in the low pH precipitation research community claims that high sulfur coal doesn't cause high acidity somewhere," Brower said.

Brower said he believes that those who believe otherwise are "in general being paid to say that." He cited the coal companies as examples.

"The coal companies hire representatives to lobby against regulations," Brower said.

The term "pH" is used to express acidity on a scale from one to ten. The lower the number on the scale, the lower the acidity. Acidity increases as pH decreases on the scale.

According to Brower, burned high sulfur coal releases a sulfuric acid that is mixed with water or snow to form sulfuric acid. However, "the transport means for the sulfuric acid to get into lakes or rivers is open to question," he added.

Brower said he and Kenneth Tempelmeyer, dean of the College of Engineering, are conducting research that they believe "may confirm the hypothesis that fish are killed from low pH precipitation runoff from melting snow."

"There are other sources of low pH contaminants," of course, said Brower. "For example, decaying animal matter." "The total dying of lakes is not a question — it's caused by the burning of high sulfur coal," he contended.

"In some areas of Canada and in the Northeast United States."

Majority of rapes committed by acquaintance, says official

Jennifer Phillips
Staff Writer

When rape is mentioned, most people imagine an event happening out of the blue late at night and attacking some lone female walker. But acquaintance rape, in which the victim is acquainted with or has met the assailant in some way, accounts for about 55 percent of all rapes nationwide.

In college towns like Carbondale, it could be more prevalent, said Lara Price, a member of the Women's Center's Rape Action Committee. These rapes usually happen in the victim's home or when they are after drinking, she said. The acquaintance could be a close friend, close friend's neighbor, close friend's grocery boy.

Date rape is part of the acquaintance rape category.

In Carbondale, there are young, single people in dating situations. Price said, "They're away from their parents and a little bit more free. They go a little wild." Not only have date or acquaintance rape victims felt control of their sexuality, but their trust has been betrayed, and they are known, sometimes being raped being raped by a stranger.

Price said victims of date and acquaintance rapes are so traumatic for the victim that they reported to the Rape Action Committee and even more people in the community.

Two of 26 rapes reported to the Women's Center in 1981 were acquaintance rapes, as were four of the 30 rapes reported in the first 10 months of 1982.

For one thing, Price said, the women weren't afraid to report they were raped and are afraid they would report the attacks in some way, because they can be legally considered as rape, she said, because the forced use can be considered to be "rape in the presence of violence.

Women have experienced some form of coercion in their lifetime, Price said.

She gave the example of the high school boy swearing he will still do it if the girl doesn't get sex. Also, sexual stereotypes still exist and women think they are at risk because they are in large groups or with at least one other couple. Price said.

Cut reaction to a situation is important, if things don't seem right, a woman should get out, she stressed.

"If you think enough to be taken advantage of, and if you do, make sure a roommate or friend can take care of you, be careful and be aware, but not so that you can't do it," Price advised.

Price said victims can report rapes anonymously to the committee or police, so it will be a matter of keeping women safe.

Men imitate the problem, she said, and it is not enough to help the victim afterwards.

"We wouldn't be surprised" to find it on the way the SIU campus occasionally due to the variation and other nearby towns.

Furthermore, Brower said that low pH precipitation is not a major problem by most Americans. He blames overly simplistic representation of the low pH problem on the news media.

Brower added that the "low pH precipitation problem" starts to affect the farmer or when people's crops start to fail, the problem will get greater attention from the news media.

When oral substance in a plume last year, Brower noticed that a problem of low pH precipitation was in its advanced stages. He said that in memory of Verlooy, the soil had a whiff of natural, probably due to the plume's damage to the farmer's crops, by lowering their yield.

Golden selected to coach U.S. team

By JoAnn Marciszewski Special to the Egyptian

Diving Coach Dennis Golden has been chosen to coach six members of the United States national team in events in East Germany and the Soviet Union. The selection was based on points gained as divers he works with placed well in national competitions.

The team -- Lenny Leland of the University of Miami, Jim Gray and Dave Burgering of the Mission Viejo Diving Club, Debbie Smith of the University of Iowa, and Kim Engel of Miami -- will compete in the Diver Invitational in Rodluc, East Germany, March 10-13. The U.S. divers will view the trip with a developmental approach, according to Golden.

"We will compare favorably with our old teams, although this won't be our top team," he said. "This year, the divers are more mature and more individual in preparation. They are not as dependent on me, which is something I've been striving for. Also, I have a very capable assistant in Rick Theobald."

In Europe, about 26 divers will compete in each event. Three-meter springboard and 10-meter platform men's and women's events will be held, with one diver per event in both, and each of the others on one. All divers will perform an entire list of dives, on which platform is 10 for men and eight for women, and on springboard is 11 for men and 10 for women. The top 12 will perform the last list of dives for the finals.

The divers competing for the U.S. have a variety of international exposure, to tune them up for other meets.

The trip comes in the midst of a hectic month for Golden, who will be working with the SIUC women divers in the NIC meet Thursday, Friday and Saturday before leaving for Europe on Sunday.

Wilma Rudolph, mile and 200-meter hurdle winner as a member of the 1956 team, the 1960 Olympic track and field teams, will appear at the University Mall on Friday from 7 p.m. to 9 p.m. and Saturday from 11 a.m. to 2 p.m. Six Olympic gold medalists, including Rudolph, have been involved in the art program to help finance the U.S. Olympic Team's preparation for the 1984 games.

The exhibit consists of poster reproductions of canvases created by the athletes: Rudolph, basketball star Bill Russell, swimmer John Naber, discus thrower Al Oerter, hockey player Mike Eruzione and distance runner Frank Shorter.

At an Olympic, Rudy overcame the polio she had been born with to win a silver medal as a member of the one-meter relay team in 1960. She was the second gold medalist in 1960 Olympics in the 100 and 200-meter freestyles and in the 4x100-meter relay.
Swimmers ready for NIC challenge

By Sherry Chiarelli
Staff Writer

Editor's note — This is the second of two articles focusing on the swimmer's swimming and diving NIC meet, which SIUC is hosting this weekend. Preliminaries start at 11 a.m. Thursday, Friday and Saturday, with finals starting at 7 p.m. each day.

Team, team, team

Women's Swimming Coach Tim Hill said he probably recorded the word to avoid the trouble of constantly repeating it. Hill said nothing short of a total team effort will win the title at the National Intercollegiate Championships, an effort he said his squad is ready to make.

"Every girl on the team has a role in our winning the championship," Hill said. "I'm confident we have capable people who are capable of winning the meet. But it's up to the 'buds to go after their races."

Hill said he believes SIUC and South Carolina are the top contenders for the title, which Virginia Tech has never undergirded with a shot at first place. But Hill said Virginia Tech have talented swimmers, but both lack the depth necessary to win.

"I'm not saying none of the other teams can win the title," Hill said. "But if I had to be in any person's position, I'd choose ours."

Florida State coach Terry Maul classified the meet as "a measure of cohesiveness and desire," and Hill said the assessment is accurate.

"Probably the reason we've taken a few lumps along the way this season is that we're keying on this part of the season," Hill said.

The NIC meet is a celebration for the Shakuhai, Hill said.

"This weekend we're going to celebrate and have a good time," he said. "The girls have put forth a lot of physical and mental effort this season, and the meet is a time for them to let go and let things happen. It will be a fun situation for us. For any other team can leap as much fun as we, I'll be surprised."

Hill said if any team members are scared, they will realize they have the team behind them.

"The girls have been in fear and pressure situations before," he said. "No one has failed. This meet will be the first to let them down and take chances," Hill said. "You might fail to attain a goal, but you'll be better by taking on a tough challenge. And anyone who doesn't think they're going to have to push extra hard this weekend to place in state."

Diving coach Denny Golden said his group is prepared for a hard season. "If a team, only the top 12 divers will score."

"At a team, we want to get four girls into the top 12," he said. "We're well prepared, it's just a matter of maintaining our course and eliminating errors."

Pressure could be a major factor in the divers' performance, since Golden's squad is made up of one junior and three freshmen Golden said his team has worked on techniques to reduce anxiety and he expects the divers to contribute significantly to the swimming scores.

The girls have really been called upon to be at the front line this year," he said. "Given this task, I'm pleased with what they've done. We can't help but be up for a competitive meet like this, because we're going to have to perform well to make the cut to the top 12."

BARBADOS from Page 20

child and family development. She was offered a scholarship by SIUC while she was in high school. Her twin sister, Carlon, also got one from Drake. Blackman will square off against her sister in the conference meet in Charlotte. This will be the first time the two will meet in the same event.

"Carlon is a little faster than I am," Blackman said. "I'm still looking forward to racing her, though."

Lavine is 20, majoring in accounting. She spent two years after high school working as a clerk for Barbados Shipping and Trading. She was offered her scholarship through the track club.

Both Blackman and Lavine say they miss their homeland and their family. They get to go home only for Christmas and summer break.

"I'm not much of a difference between here and there," Lavine said. "Our nightlife is just as good as you want it to be and our weather, of course, is excellent."

Everyone speaks English in Barbados, a popular tourist spot, Blackman said.

"Our country really attracts all kinds of tourists," Blackman said.

Blackman and Lavine don't go out much in Carbondale, but go occasionally to see a movie. The last movie they saw was "40 hours.

"I thought that movie was great," Blackman said. "It was entertaining, and it was funny." Lavine said her next movie to see will be "Toy story." They have seen the previews and like what they saw. Both also agreed that they like all kinds of music except hard rock-n-roll.

Both Blackman and Lavine are enjoying being about the upcoming conference meet. But they have been practicing hard and know they're going to have to push extra hard this weekend to place in state.

"I think the girls believe they have the ability to win this meet," Hill continued. "I have confidence in them, but I'm not swimming the races. They can't expect to just get up on the blocks and everything happen. We have to hang tough and support each other, and I think they will."

Diving coach Denny Golden said his group is prepared for a hard season. "If a team, only the top 12 divers will score."

"At a team, we want to get four girls into the top 12," he said. "We're well prepared, it's just a matter of maintaining our course and eliminating errors."

Pressure could be a major factor in the divers' performance, since Golden's squad is made up of one junior and three freshmen Golden said his team has worked on techniques to reduce anxiety and he expects the divers to contribute significantly to the swimming scores.

The girls have really been called upon to be at the front line this year," he said. "Given this task, I'm pleased with what they've done. We can't help but be up for a competitive meet like this, because we're going to have to perform well to make the cut to the top 12."

Ple Walker's improvement lately bodes well for next season.

Salukis face Redbirds in first of two road tests

By Dan Devine
Associate Sports Editor

To make the Missouri Valley Conference playoffs the Salukis will probably have to win home games against Drake and West Texas State.

That isn't out of the realm of possibility. ISU also has road games against Illinois State and Wichita State where this season mercifully ends. Those games are another story altogether.

The Salukis will play the 24th of those two difficult road games Thursday, when they meet Illinois State at 7:35.

But despite the Redbirds' 9-4 record, and the Salukis' 7-16 mark, that game could be closer than it should be. The Salukis have a habit of playing their in-state rivals closely. They split last year and made Illinois State work hard for a 69-43 win on Jan. 27 in Carbondale.

That time the Redbirds were a team on a roll, a team that had used its muscle and defensive know-how to batter its way to an undefeated conference record. Since then, they've fallen on harder times.

First they lost their hold on first place to Wichita State. Then they lost the services of shooting guard Dwayne Tyus, out with a broken hand. Now they look hard pressed to withstand the charge of New Mexico State, which threatens to take away the Redbirds' second place shot in the MVC.

Vas Winkle, for one, thinks the Aggies can do just that, but he doesn't think Illinois State is a worse team than they were a month ago, despite a recent three-game losing streak.

"They lost Tyus," said Van Winkle. "That's hurt them some, but outside of that I'd say they're playing just as well. The schedule with Illinois State is tough, that's all, they've got to play some tough road games."

Every road game is a tough game for ISU-C. The Salukis are 9-7 on the road in conference games, and had to go into overtime at Morehouse State for their only road win of the year.

Van Winkle said the team was showing no signs of folding up after the relentless losing streak.

"We enjoy the wins, but I'm not unhappy with the way the loss had been handled, as long as they're working hard. We just want to play every game as hard as we can. We'd like to be in the playoffs."

Illinois State is another team imbued with the work ethic, but with less points. Illinois State has always been a conference dominated by quickness and speed, and have seven players 6-7 or taller. ISU-C has only one.

The Redbirds forward line is their main weapon, especially that Tyus is out of action. He had been averaging 11 points per game.

If and when he returns, will the Salukis be any more up to the challenge? A tough one to call.

Tracksters face Illinois St.
in showdown for MVC crown

By Ken Perkins
Staff Writer

Let's let Coach Lew Hartzog put this weekend's Missouri Valley Conference Indoor Track Championships in perspective: "This is the most bleak situation since being in the championships. We can't afford to be weak where we are supposed to be strong. What it comes down to is how well the older guys do. They all must run super. If they do, I'd say we're going to win it.

Is that really Lew Hartzog? You bet it. And he's worried about losing his first MVC title in seven years. Since 1975, Hartzog-led track teams have been nothing short of dominant. The Salukis have won 14 MVC championships, six indoors and eight outdoors. And we're not talking cheap wins here. During that seven-year span, no team has come closer to 29 points than going the defending champions.

But now there's a new kid on the block.

If there's a team in the Valley that poses a threat to ISU-C's supremacy, it's the Redbirds from Illinois State. They are hungry, at home, and most of all, a very good track team. "We're ready if they can run," said ISU-C coach John Couglan. "Our middle distance crew could honestly score two high points in each event and that's what we're going to have to do to win. And if we do, it doesn't mean that we can tuck away with it. As they say in political circles, 'it's too close to call.'"

Too close is enough for Hartzog. The Redbirds have faced ISU twice this season. In both, the state meet and Collegiates, the Redbirds finished right behind ISU-C. But close wasn't good enough for Hartzog.

The Salukis, who had lost seven games, are another story.

States to a team that had 7-16, the Redbirds will have to be as strong or stronger.

Hartzog is hoping Couglan is right. Ross and Keane will dual off. Hartzog is not so sure. "We're going to have to be well. Hartzog's willing to say. "They're probably have to be," said John Couglan. "It should be. That isn't out of the realm of possibility."

Every road game is a tough one. Hartzog is not as sure.

"I'll just say it will be close. Very close. But ISU-C has three things going for them. They are defending champions, have won over 80 percent of their team the last two years and haven't beaten us this year. So it's a toss-up."

Hartzog agreed. "It's going to be tough."

Runners adjust to U.S. in record time

By George Pappas
Staff Writer

Even though the women's indoor track team has performed exceptionally well, the team does have some outstanding performers.

Two of them, Denise Blackman and Ann Marie Lavine, are sprinters on scholarships from Barbados, West Indies. They are freshmen and roommates in University Residence Hall.

The two have definitely started on the right track for the Salukis so far this season. Blackman has broken three records and has shared in two more set by her teammate Barbados. West Indies. They have broken school records in seven years.

Valle.

Blackman said. "We really think we're going to do well this year. "And, typically of a Saluki team, when one gets going..." all do."

ISU will bomb the Salukis in the distances, said Couglan, but may get stumped on in the field events and sprints. But what he didn't say is that he's got three 9-foot jumpers, two top shot-putters and a deceleration sprinting crew that can pick up four or five points here and there.

"Yes, we're pretty strong, but no, I wouldn't say we are the favorites," Couglan said.

"I'm afraid it is," he said. "The 'I say I see it, it appears the schedule with Illinois State is tough, so can the opposition. And I don't see anyone cutting into Hartzog's track team."

"I'm afraid it is," he said. "The 'I say I see it, it appears the schedule with Illinois State is tough, so can the opposition. And I don't see anyone cutting into that really things very close. But ISU-C has three things going for them. They are defending champions, have won over 80 percent of their team the last two years and haven't beaten us this year. So it's a toss-up."

Hartzog agreed. "It's going to be tough."
