**Faculty Senate approves plan for faculty cuts**

By Philip Fiorian

The Faculty Senate approved a plan Tuesday that would require the Board of Trustees to decide if financial exigency is present before it can impose faculty cuts, rather than fiscal necessity, if it wishes to call for short-term salary reductions.

At the last senate meeting, President Jerry Cook suggested a proposal which would give the University the power to suspend faculty and administrative-professional staff contracts if the board declared such an action a "fiscal necessity." The proposal is scheduled to be addressed by the board in the near future.

The senate’s plan, approved at a special meeting in the Student Senate Center, urges the administration to stay with the present financial exigency policy, but also to amend University statutes to define "inflation" and "salary increases." The senate has also asked the administration to take in the event of a declared vote, but the University’s ability to solve a short-term fiscal crisis.

The Committee on Financial Matters, although no Senate meeting, presented a report and the alternative plan in response to the University’s proposal.

**Faculty asks for voice in administrators’ pay**

By Phillip Fiorian

The Faculty Senate unanimously approved a resolution calling for faculty in decisions involving salary adjustments for administrators.

Marvin Kleina, chairman of the Faculty Status and Welfare Committee, said the Faculty had expressed concern about the fact that faculty in the past had played no role in decisions to increase the salaries of administrators.

The intention is not to limit negotiations, but rather to stress the importance of moving negotiations of these kinds "out of "smoke-filled rooms" into the light of day," the resolution states.

Presently, no ceiling exists in terms of salary increases or restrictions in terms of assignment changes. Also, a change in salary might be provided when an employee is given a new position of the same contract period as the old one. If the new assignment changes the person from one to ten months, no salary increase is allowed, according to the resolution.

Under these circumstances, a mid-year salary increase is negotiable, but only during the time of assignment changes. See VOIC, Page 3

**House committee rules against Lavelle**

WASHINGTON (AP) - The House Agriculture and Commerce Committee voted unanimously Tuesday in a former Environmental Protection Agency official Rita M. Lavelle for contempt of Congress for defying subpoenas to testify before the panel about alleged EPA wrongdoing.

The vote sends the contempt citation to the House floor. A vote to cite Ms. Lavelle could result in criminal action against her in U.S. District Court. Contempt is a misdemeanor punishable by $1,000 fine and up to one year in jail.

Rep. John Dingell, D-Mich., the committee's chairman, said he would be willing to drop the action if Ms. Lavelle appears and cooperates with congressional investigators. He urged her to "speak promptly," saying the House would vote on the resolution "in the very near future".

Ms. Lavelle's attorney, James J. Burfower, said after the committee vote that his client wants to cooperate, but has been hampered because she has been in California job-hunting.

She has written a letter to the committee Monday urging the panel to "recodify" the planned vote, but Dingell said there had been no real effort to make Ms. Lavelle available.

The committee vote came after the former EPA assistant administrator twice defied subpoenas to appear before the subcommittee. Ms. Lavelle was in charge of the $1.8 billion "superfund" toxic waste cleanup program. She was fired by President Reagan on Feb. 7 after she refused a request by then-EPA Administrator Anne McGill Burford that she resign.
City officials have recommended that the Carbondale City Council deny a request to remove a median at 800 W. Mill St. and install a pedestrian signal at Mill and Rawlings streets.

The requests, made in early January by the Carbondale site manager of Carbodale Towers and Mill Street Apartments, were discussed by the City Council at its informal meeting Monday night.

A vehicle traveling east on Mill Street must turn left on Rawlings Street onto Freeman Street to enter the Carbodale Towers parking lot. Hopkins said in a letter to the city administration, removal of the median would provide direct access to the parking lot.

In a memorandum to City Manager Carroll Fry, Ed Reeder, public works director, stated the city and Police Lt. William Rykpema believe removal of the median would create a traffic hazard on Mill Street. Rykpema in another memorandum said that a median removal in the proposed location would result in a slope in the road — could cause accident and limited visibility. There have been four accidents in the past three years near that section of Mill Street, said Rykpema.

Section of Forest and Mill streets, creating another location for vehicles to turn would create another potential accident location, Rykpema added.

"Basically, we would be trading traffic safety for the convenience of residents and visitors," said L. Louis Turner, "so I said no.

The council will act formally on its request next Monday night when recently-elected council members Keith Tuxhorn and Patrick Kellogg were sworn in along with Westberries.

News Roundup

Two development plans announced

SPRINGFIELD (AP) — Small businesses would get government help with low-cost loans under separate, but similar, economic development plans announced Tuesday by Governor Thum and House Speaker Michael Madigan.

The economic development programs unveiled largely are geared toward creating job opportunities for new companies or smaller businesses seeking to expand.

Madigan's proposal requires General Assembly approval. Thompson said his fledgling plan would need the cost to the state treasury from their proposals as minor.

State House rejects ICC plan

SPRINGFIELD (AP) — Plans to make Illinois' utility regulating commission elected rather than appointed got a frisky reception Tuesday from a state House panel.

Lawmakers on the Public Utilities Committee voted 6-3 to reject one measure calling for the creation of an elected state Commerce Commission.

After voting the sponsors, several improvements in smaller measures quickly withdrew their bills from committee consideration.

House panel cuts Reagan request

WASHINGTON (AP) — President Reagan's request for $80 million in military aid to El Salvador was cut in half by a House panel Tuesday as he reached a special plea to Congress and the nation to rally behind his Central America policy.

The 7-5 decision by the Appropriations subcommittee on foreign operations to slash the Salvador aid to $30 million followed a tie vote, 6-6, that would have barred any decision at all for 90 days. The compromise was engineered by Chairman Clarence D. Long, D-Md., who just returned from El Salvador.

Shultz gets Egyptian club's support

CAIRO, Egypt (AP) — Secretary of State George P. Shultz received Egyptian President Hani Mubarak's full support Tuesday for his proposal that a cease fire be called to get an agreement for the withdrawal of Israeli and other foreign troops from Lebanon.

The effort begins Wednesday when Shultz goes to Israel to meet Prime Minster Menachem Begin, who has set up a separate, but parallel, talks for a troop withdrawal that Lebanon is unwilling to meet.

Officials move to block off suburb

TIMES BEACH, Mo. (AP) — Times Beach officials, concerned that their homes contaminated with dioxin are dangerous, moved Tuesday to bar a group of dioxin—-rubber-necking tourists and looters.

The Environmental Protection Agency has put up more than $32 million and the state government has put up more than $3.6 million to buy the homes and businesses in the town where residents have been driven out by dioxin contamination. About 65 families remain in the near-ghost town.

Daily Egyptian (USPS 662822)

Published daily in the Journalism and Egyptian Laboratory Building Monday through Friday during regular semesters and Tuesday through Friday during summer term by Southern Illinois University, Carbondale, Ill., a student newspaper. Nonresident subscriptions are $5.00 per quarter or $15.00 per year.

Subscription rates are $30.00 per year or $17.50 for six months within the United States and $45.00 per year or $25.00 for six months for all foreign countries.

Repairs planned near new overpass

By Karen Terry
Staff Writer

A portion of the Springer Ridge Road approach to the new Pleasant Hill Road overpass will be closed during construction as soil failures in the road caused by subsidence conditions.

About 200 feet of the west side of Springer Ridge Road recently collapsed "classic example" of an engineering failure brought on by unknown soil conditions, Mayor Hans Fischer said at the Carbondale City Council meeting Monday night.

"What you've ended up doing here is essentially not doing that kind of extensive testing, which is not standard in the trade," Fischer said. "and taking the chance that you're going to have a failure."

Tests which might have detected the subsidence conditions that caused the collapse were not conducted prior to construction of the $2 million Pleasant Hill Road overpass because such tests usually are not required. Railroad Relocation Project Director Eldon Jones told the council.

"and Jones said that drills which estimate soil quality are normally made only at the overpass site."

The council considered an $86,513.90 cost estimate by J.T. Smends Construction, which built the overpass, to repair the road damage and upgrade the slope. Replacement of 5,000 cubic yards of earth and 4,160 tons of stone is included in the cost.

No city money will be spent for the repairs. The Federal Highway Administration will foot 95 percent of the bill and the Illinois Commerce Commission will fund 5 percent.

Although engineers design roads and bridges for the worst possible conditions, such problems cannot always be avoided, according to Dale Bailey, an Illinois Department of Transportation expert who prepared a report on the slope failure.

"There's really no way to guarantee it won't happen again," Bailey said.

Work may start this week to relocate a water main which must be moved before road repairs can begin. One lane of Springer Ridge Road will remain open to traffic during the construction.

Survey raps new GTE billing system

By Terry Levecke
Staff Writer

General Telephone Co. says its new billing system is resulting in lower bills for its customers and is running as predicted after one month of comparison billing in Murphysboro and eight other communities.

The billing system, Usage Sensitive Service, bases charges on the number of outgoing calls, the calls' duration and distance, and the time of day and day of the week they are made.

March 1, General Telephone began mailing billings of two bills to its customers in nine communities, including Murphysboro, where it wants to institute the new billing system state-wide.

Although the company says that the new system will allocate charges more fairly, many users paying more than lighter users, some Murphysboro customers don't like it, according to an informal survey.

"Frankly, the company is very pleased — but not surprised — that our current data is supporting our findings," he said.

Both the company and Paul said problems exist with customers' interpretation of bills. Charges like $.0650 per call confuse customers, Paul said. Customers are interpreting that charge to be 45 cents, when in reality it is 4½ cents. GTE received about 300 inquiries, most of which were for help in the format, according to a press release.

But billing format and convenience are not the only problems with the system, Paul said. Local businesses' bills were not only higher, but companies, he said, "don't like the coffee in business relations with their friends and neighbors in Carbondale."

GTE says the new system will enable customers to structure their calling patterns so they can save money if they so desire. Customers have received information on discount periods, zones and access charges, Pierce said.

Customers, according to GTE, will begin to like the system as they get used to it. Paul said she plans to conduct a survey in six months to see if Murphysboro residents' sentiments change.

The Illinois Commerce Commission ordered implementation of the comparison billing period, and the commission is supposed to be monitoring customers' reactions. GTE is not supposed to implement the new system if consumer reaction is overwhelmingly negative, Paul said.

Correction

It was incorrectly reported in Tuesday's Daily Egypt that William E. Brower, professor of engineering mechanics and mathematics, said that the good McAndrew Stadium could "baple" the stress created by a capacity crowd stomping their feet.

Brower said his most pessimistic estimate of the stadium collapsing is one-in-a-thousand.
Politics plagued priorities report

THE UNDERGRADUATE Student Organization is over and the losers may have been the students.

For politics may have killed the credibility of the Student Evaluation Task Force.

USO President Jerry Cook organized the task force early last semester and charged it with comprehensively evaluating and ranking the seven services funded by student fees.

By those criteria, the task force report is only half a report. The background is there; the useful information is not. The task force's overwhelming recommendations is one of further study.

The report was supposed to rank the services in a way similar to the rankings made in the faculty and staff committee's reports on non-academic and academic priorities. Such information could help determine where to cut state funding for these services or whether to cut student fee funding to offset large tuition increases — moves that may be necessary if state appropriation levels for higher education are less than desired.

But priorities are nowhere to be found. While the report does include some general suggestions, the only specifics included are for the Student Activity Fee and the Student Organizations. And, the specifics seem to be specific charges, not the necessary specific priorities.

The trouble probably began when the task force began to investigate a highly politicized area — student government politics.

Cook told the task force not to investigate the USO, according to task force chairman John Kelly. "The task force experienced turbulence since the Student Activity Fee Committee chose to include the USO in its evaluation," an introduction to the report states.

Cook has said that the task force was designed to investigate areas where students had little control over spending and programs. In contrast with the other six programs, allocation of a large portion of student Activity Fee is controlled by the Student Senate.

Regardless of the logic of either argument, the task force plunged full steam ahead into that service area, and Kelly focused on the operating budget of the USO.

SOME RECOMMENDATIONS may be worthy of consideration. Kelly recommended, for example, that Priority I and II Recognized Student Organizations be funded on a flat-percentage basis, instead of going through the fee allocation process as they do now.

Kelly has suggested that the student government could remove much of the politics from a very political fee allocation process, a belief apparently shared by the recently elected Trojan Party, which perhaps coincidentally included this recommendation in its platform.

However, there is the concern that once the flat percentage is established it would be, in effect, carved in stone. This could have a detrimental effect on keeping the ESAO's faculty and administratively responsible. So, too, could a problem arise when a particular ESAO grew in membership and importance and then found itself locked into a low percentage bracket.

To give credit where credit is due, Kelly tried to avoid giving the report a political aura by delaying its release until after the USO election. The task force postponed releasing the report to Cook and SIU-C President Albert Semit to avoid a very political time.

But what the task force could not remove most of the politics from the report itself — the political charges and recommendations that pervade the report.

What the University needed is direction on where to cut student services when it becomes necessary.

What the University got was a political tool for one party or another in the USO.

Silent students deserve what they get

By Charles Victor

Staff Writer

W E T H E R T H E PROPOSED tuition increases for fall are "outrageous" or "necessary" one thing is certain — they are well deserved by the students.

Andrew Herrmann's column on the Chicago White Sox excited so much heated discussion that it took one full page of letters to an editor to accommodate it all. I don't know how many more will be the reaction to the announced increase of constraints on newspaper space. Yet the numbers of student reports of increased tuition to $500, almost doubling tuition, has brought nary a letter from students.

Response to Herrmann's "sterilizing" of the UI of I and poking fun at the Cardinals or Cubs, by virtue of both its valance and their relevance, has outstripped by miles any response to these letters. Herrmann appears the student body is more interested and aroused by Chicago as an alma mater or to their favorite sports club than to higher education. It seems to me that there is a certain desire to see the welfare of the nation itself.

Students bodies like the USO and GPSC must be highly commended for planning away Hawaii and Missouri as the face of almost total apathy, or, at the very least, private and personal concerns of individual students. If student government were to focus on students' interests or "needs," the hottest issue on their agenda should be the wisest to discuss.

GOVERNMENT OF the people, by the people, for the people at SIU-C means a concern over the Cardinals, not fee increases. It means a fight for more than a little money spent on a few hours. It means a devastating Halloween than concern over the retention by the University of the use of its buses by the Mid-America Conference of Wrestling.

The "right" to swell beer to the beat of rock music at the Days of '39 and to work all week while working to prevent nuclear annihilation of the whole world.

The question of student government is not so much a question of which students may be elected to its platform. A people always deserve their leaders and for better or worse we deserve what we've got. It is so wonderful, and particularly in this event, that student government has largely been unable to prevent tuition increases. Any protest to make the University administration stop and think must come from the grass roots level, likely in the form of anguished voices of every single student, organizations and faculty on campus.

Even our great advocates of the future at the Law School raised hardly a whimper at the threat to close the Law School.

It is understandable in these times of pedagogical and economic distress, students can be out of their depth and in the situation don't have to have all the answers to raise their voices. They can at least ask questions.

THE CHIEF LOBBYIST of our cash-strapped University is one of the highest paid officials in the state. We managed to get us only as far as the 13th floor. It is a short list by priorities. The University and the state with so little money must come up with a plan for an out-of-the-way and safe place to maintain library storage called the Brady Building.

The question may only reveal my ignorance but I think that the knees of many students have been dispelled by some clear answers.

The case of foreign and out-of-state students needs special attention.

We came here in the fall of '81, tuition and fees were $1,106. Per semester. By the fall of '82 tuition has increased $400. Even a 10 percent increase is not fine. To make it take to more than $1,500. Every percentage increase, while only adding a few dollars for instate students, means hundreds more for out-of-state students. The percentage at which higher education must pay more attention to this matter at this time is a great advocate for foreign students and some high spending foreign students who spend more in one day than many students do in a week.

THE INCREASES in tuition are going to make it difficult for even the foreign governments and agencies that support many of the foreign students. One of the reasons for the increase in foreign students in the United States is the fee increases in the past. In 1981, my Malaysian, won the $3.4 million contract with Malaysia, but Third World countries hit by world economic recession are going to find the $20 million in the student budget too heavy and will begin to cut back especially as they develop their own systems back home.

Students who are privately funded cope with these increases in painless and intelligent. Students who live on $1,500, work 20 hours a week, to pay their way, while carrying overloads every semester to finish his computer science degree, is not alone. He is still maintaining a 4.0 GPA.

And the melting pot of Carbondale. That's almost a $6,000 saving in Malaysian dollars.

Apart from these monetary benefits are, of course, the social and political benefits of having students from all over the world on every campus.

The melting pot continues to boil and the increase in out-of-state students from different parts of the United States shouldn't be a surprise.

So, I have made my case for the student protest. What makes you think that they will make their own. For me and many other foreign students petitioning of a fee increase sends tremors down my spine.

For many here it seems to be "what the heck, the price of gas at Gatsby's is still the same."
Programs director enjoys job working with special campers

By Jackie Douillet

What started as a summer job for a 16-year-old boy has become a career for a 31-year-old man. George Davis, better known as Butch, is assistant director of the programs for the handicapped at Touch of Nature Environment Center.

When he started as a summer counselor at the camp in 1972, Davis said he had the same fears most people have when they come in contact with something they aren't familiar with. Those fears soon vanished and he spent more of the summer with the kids than with another counselor.

Davis was born and raised in Carbondale. He graduated with a degree in zoology in 1974. Davis' many and often changing interests and hobbies, he said, he wasn't sure what he wanted to do, so he continued on to graduate school and worked at Touch of Nature in the summer.

About a mile into Touch of Nature down a dirt road is Davis' office, with pictures of orchids decorating the walls, and live orchids covering the filing cabinet and table tops. Davis, an orchid enthusiast, has his so-called "banging orchids" flowering in his Davis' many and often changing interests and hobbies, he said, he wasn't sure what he wanted to do, so he continued on to graduate school and worked at Touch of Nature in the summer.

The camps serve approximately 400 campers mainly from Illinois and Kentucky.

The program provides eight two-week camps for special populations — the deaf and blind, cerebral palsied, severely retarded, multiple handicapped, and the mild and moderately retarded. The camps serve approximately 400 campers mainly from Illinois and Kentucky.

Davis said the emphasis of the camps is to provide a service that goes beyond two weeks. Davis said he hopes the experience here will build the camper's self-confidence to try new things in the "real world." "We try to show the children their limits are not what they've been told — they can do more than they thought," Davis said.

Davis said he does not believe in spending too much time discussing how to do things, but urges the campers to go ahead and try.

"I believe to build anyone's self-confidence — handicapped or normal — you have to continually try new things," he said.

Davis said he has practiced what he preaches and is always ready to try innovative ideas with the boys. Davis said he has hired eight former campers as summer counselors and two former campers as fund-raisers for the camp. Davis said he felt they filled the position extremely well.

"Some strong handicapped leaders are needed for society to accept the handicapped," Davis said.

He said a perfect way for this to happen is to have them function as "normally" in jobs and society as possible.

With the new discovery of high technology, Davis said, "it's going to be a whole new game if the handicapped are allowed to be a part of it and aren't shut out."

The Touch of Nature staff is working on developing programs directly related to high technology and its applications to the special populations.

"Our goal is to give them another marketable skill and perhaps someday show how the computer could make living easier, no limitations, no limitation," he said.

Morris Library combating nagging problem of book theft

By Greg Stewart Student Writer

Book theft has become a big business. Millions of dollars worth of books are stolen from both public and school libraries every year.

Morris Library isn't immune, said Sidney Matthews, assistant director. "We have the problem of students stealing books because they don't want to be handed a circulation,” he said, "or they want 'to kill' an assignment. By stealing or hiding a book, some students hope that a professor will cancel a homework assignment, he said.

Matthews said the library does not keep a comprehensive list of missing books. Instead, division heads spot check their areas.

James Fox, division head of the third-floor Social Sciences Department, said librarians discover a book is missing only when it is reported missing or if it can't be found during a shelf reading.

But shelf readings, in which one worker reads a book's card catalog number while another looks for the book on the shelf, are no longer done, Fox said, because of staff reductions.

If a book is reported missing, a search is conducted for 16 weeks, Fox said. Then a decision is made on whether to try to replace it. Many books can't be replaced because they are out of print, Fox said.

Saundra Benjamin, a civil service worker in the Education and Psychology Department on the fourth floor of the library, said workers keep a list of books reported missing by students. They search for the books for eight weeks before trying to reorder them.

Benjamin said sports books, especially those on judo and karate, are most frequently stolen. Books on astrology and parapsychology also are often reported missing, she said.

In 1982, 117 books were officially reported missing from the fourth floor. Of those, 84 were replaced and 33 were withdrawn permanently from the collection.

George Black, division head of the Science Department on the fifth and sixth floors, uses a tag system to mark missing books.

When a book is discovered missing during a shelf reading, a tag is placed in the card catalog showing the book is gone. Although an accurate count missing books is not kept, Black estimated that between 2,000 and 3,000 books in his division are not accounted for. Of those, only about 10 percent will reappear, he said.

"A major problem is people hiding books on us," Black said. Students deliberately misplace books so they can use them without checking them out, he said.

The library is finally receiving some funds to replace books, Black said.

In the past, money from overdue book fines went into the state general treasury. It has only been within the past six months that that money has been returned to the library, Black said.

Black said the library can now retain up to $36,000 a year in fines to be split between the divisions. Fiscal year 1984 will be the first full year that the library will benefit from this program.

University Daily Egyptian, April 27, 1983
Campus Briefs

Jackson County Health Department Women and Children program members have a last chance to pick up applications from 1:30 to 4:15 p.m. and 12:30 to 3:30 p.m. Thursday or from 8 to 11 a.m. Friday at the Carbondale and Murphysboro offices.

The LAST free motorcycle riding class for spring semester will be offered by the Safety Center beginning May 2. Course 2 will meet from 9 p.m. Monday through Friday, May 2 through 5. Interested persons may call 526-7751 for more information.

Computing Affairs will offer a session on microcomputing from 3 to 5 p.m. Wednesday in Morris Auditorium. Michael Payne of STC electronic data processing will present a lecture on Data Base Management Systems. Interested persons may call 526-3242 to register.

Job Search in Jou alism in the '80s will be featured 3 p.m. Thursday in McLeod Theater. The program, sponsored by WCI and ISDN in cooperation with Journalism Days, May 2, will feature a discussion by Gordon Billingsley, Ag Communications. Harlan Mendenhall, features magazine, Mike Murray, career planning, Irene Weidt, Radio and TV; and Andy Zimmer, job search.

Applications close at 5 p.m. Wednesday for Intramural Sports student assistant positions for Fall Semester, 1983. Applications may be picked up at the Intramural Sports office.

Black American Studies will sponsor its final Brown Bag Luncheon Lecture from noon to 2 p.m. Wednesday in Quigley Lounge. The schedule will consist of "Social and Community Services, the Arts," "Social Services and the Black Community," and "The Impact and Challenge of Bureaucracy." Rock Against Reagan, a national tour of hard core bands, will perform from noon till dusk Wednesday in the Free Forum area.

The College of Education and the Career Planning and Placement Center will co-sponsor an Education Career Day from 9:30 a.m. until 2 p.m. Wednesday in the Student Center Ballrooms. Representatives from 16 school districts in Illinois and other states will be interviewing candidates for teaching positions.

The Center for Basic Skills is offering a free workshop, "Now All I Have Left is the Dissertation: Suggestions for Preparing the Dissertation, and How to Make Sure You Get Done," at 1 p.m. Wednesday in Factor 102B.

The Members of Delta Chi will sponsor their Greek Week event, "The Tricycle Relay," 6:30 p.m. Wednesday on the Greek Row. The members of Alpha Epilon Phi will sponsor their Coed "Ice Cream Eating Race" at 6 p.m. on Greek Row.

Cans will be passed today through the Departments to raise money for the fund. Cans will be distributed by the USO Student Welfare Commission to all faculty.

If 19,000 undergrads donated 50¢ a piece, we could raise $10,000. Please give.

T.V. news needs to emphasize better writing, producer says

By Alan Cockrell
Staff Writer

Robert Ferrante, the executive producer of the "CBS Morning News," said he believes television news relies too heavily on visual elements and needs a stronger emphasis on good journalism.

Ferrante, the first producer of the widely-acclaimed "CBS News Nightwatch," addressed the Radio-Television Department's annual awards banquet last week. He gave his philosophy and advice on breaking into broadcasting.

"We didn't know if we were in bistive with pictures or newspapers with moving parts," he said. "The best television is the best written," he said. "The two most important elements are a good story and good writing, and those are reinforced by the visual."

Ferrante advised those going into broadcasting not to worry about a lack of jobs, noting that new ideas and new forms are being developed every year. "Look at Nightwatch." he said. "They tell you that you get a lot of strange people up at that time. Well, we were up, and we're not strange."

He also acknowledged the problems of doing a live television show at night, such as hushing a sweating 300-pound cabdriver down a half mile before airtime and having to put him on camera without benefit of rest or makeup. However, he said that live is the best way to do television.

"If I were graduating today, and I was interested in broadcast journalism, I would search for a small TV or radio station — the smaller the better. Try to reach around and do all the jobs," Ferrante said. "A good journalist is a good storyteller. We need to seek out what we are and what we are to become. To me, the Lincoln Center, the Grand Ole Opry and Devo are America."

Published authors honored

Twenty authors who have recently had books published by Southern Illinois University Press will be honored at a reception at 3 p.m. Thursday in the Student Center Gallery Lounge.

Those honored will be: L. Erwin Atwood, Steven Barwick, Jo Ann Boydstun, John A. Broyer, Stuart J. Bullone, Alan M. Cohn, Lawrence Dennis, C. Staff Photo by David McChesney
Robert Ferrante of the CBS Morning News speaks at the annual Radio and Television Department banquet at the Student Center.

Piano music will be provided by Anita Hutton.
The collective talent and artistic vision of the SIUC Dance Department will be featured in a spring dance concert Saturday at Shryock Auditorium.

This year's concert is called "Crescendo" because "we wanted to convey in the title the constant, expansive movement inherent in the dances," said concert director Jolie Ideone.

The spring dance concerts have been a tradition at SIUC for the last 10 years. However, they were temporarily discontinued four years ago when the dance program was moved from the Theater Department to the Physical Education Department.

"We lost the use of McLeod Theater," Ideone said, "so money wasn't there to rent another space."

That problem was solved last year when the College of Education, the Office of Research and Development and the Physical Education Department provided the funds to rent Shryock.

Ideone said, "The spring dance concert is an important cultural contribution to the community, and several local businesses agree. They have decided to help defray the costs of the production."

The dances featured in the concert will include:

"F-Inds" — Choreographed by G. vegie Pinney, with music by Chuck Corea and Al DiMeola, this work revolves around the relationship of three men who like to dance.

"Love Affair" — Choreographer Lorraine described the music for this piece as "a collage of natural and man-made sounds." Its two sections include "In a Garden," a loose portrayal of the story of Adam and Eve, and "In a Hospital," which Ideone calls "a take-off on a soap opera love triangle."

"Unwilling Passages" — The piece is choreographed by Cornell Williams to Leroy Anderson's "Big Science" album. Williams describes it as "a dream about bodies travelling through a particular space at an indefinite time."

"Sea Change" — Choreographed by Linda Kostalik and danced to selections from "Music For a Large Ensemble," the piece is based on images of the Pacific Ocean.

"Seylo" — Choreographer Linda Kostalik said the idea for this dance came from watching a demonstration of Oriental self-defense movements. Zen Joanna, a SIUC student from Japan, will perform in this work.

"Even East, Odd West!" — Choreographed by Jeff Gurley and danced to Aaron Copland's "Piano Concerto, 1927." The piece derives its name from the street organization in Manhattan. Gurley said the theme of the work is "very simply, finding one's way in the city, both figuratively and literally."

"Kite Flight" — Performed to music by Scott Cossu, this work is, according to Ideone, "a dance in three parts about the movement of flight."

"Eastern Exposure" — This dance was conceived and choreographed by Wimfried Haus. She combined Eastern and Western motifs in a pas de deux featuring Jennifer Hyman and Frank Thomas.

Curtain time for the Saturday performance is 8 p.m. Tickets are $4.50, $3.50 and $2.50 and are available at the Student Center Ticket Office.

The musical arrangements for the concert are under the direction of Linda Kostalik, with accompaniment by David Ross. Mary J. flowers, Rodney Stiles and Joanne Thomas are studio assistants.

"The emphasis has been on presentation rather than production," Ideone stated. "This is an important art form and we want to be able to communicate this through the performance as much as possible."

A spiral seamstress to create costumes for each dance, with the construction and maintenance performed by the department.

The dance concert is sponsored by the Student Activities Committee. The department is grateful to the Student Center for allowing the use of Shryock Auditorium.

MEMORANDUM

TO: SIUC STUDENTS

FROM: STUDENT WORK AND FINANCIAL ASSISTANCE

WOODY HALL, B WING, THIRD FLOOR

It's true that It is after April 1 and students who mailed their 1983-84 ACT/Family Financial Statement (ACT/FFS) before April 1 will be given priority consideration for the Campus-Based Aid Programs. Campus-Based Aid funds are limited and therefore are distributed to eligible students on a first-come, first-serve basis.

Although April 1 was the priority date for Campus-Based Aid consideration, It is not too late to apply for the other financial aid programs. Students should mail their ACT as soon as possible to apply for Pell grant, ISSC Monetary Award, and Student Work. Early application to these programs will allow for early notification of eligibility status and awarding of monies. COMPLETE THE FORM CORRECTLY THE FIRST TIME. Having to make corrections will delay the processing of your financial aid.

To apply for Pell Grant, mark "yes" to questions 74 and 75b. To apply for ISSC, mark "yes" to questions 74, 75a and 75b. For student work consideration, mark "yes" to 74 and 75b. Be certain to list SIUC's school code $1144 in question 76 and include the ACT processing fee.

Students interested in applying for a Guaranteed Student Loan should contact their bank for the loan application. Student Work and Financial Assistance will begin accepting 1983-84 loan applications May 2.
Secretaries Week promotes awareness and performance

By M.N. Abdul Student Writer

This is the week to honor those efficient but often unseen people who type the letters, keep the papers straight, and do many other things to keep the wheels of business and institutions turning.

This is National Secretaries Week.

Secretaries Week was inaugurated in 1922 to recognize the American secretary upon whose skills, loyalty, and efficiency depend the functions of business and government offices.

The Carbondale chapter, under the direction of Barbara Peterson, Carbondale Chapter President, is being held at the University Museums from April 29 to May 1. Miss Peterson, secretary to Dean Majno, a master of the art, said the week's activities were initiated by the executive assistant, who possesses a mastery of office skills, demonstrates the ability to assume responsibility without direct supervision, exercises initiative and judgment and makes decisions within the scope of assigned authority, she said.

There are 18 members in the Carbondale chapter and a membership-drive is being conducted.

"The membership fee is $15 for the regular member and $14 for retired secretaries," Simmons said.

The PSI Carbondale chapter meets to discuss problems related to secretaries in general, and its purpose is to upgrade the image of secretaries as a profession in Carbondale, according to Simmons.

"The PSI Carbondale chapter tries to allow secretaries to know more about the field. This provides a professional, educational aspect, the PSI Carbondale chapter is a good organization," said Simmons.

The PSI Carbondale chapter is trying to present a better image of secretaries, she said.

Photo collection on display

By Mahdi Noor Abdul Student Writer

An exhibit of photographs by Giorgio Majno, first year fine arts candidate, is being held at the University Museum until May 4.

Ever Johnson, curator of art, said the exhibit is a result of Majno's collection of works of art, since he was at SIU C. Majno is a native of Milan, Italy. He specializes in the visual arts and his work is known in most of the portraits he tried to combine their quality of light with the expressive quality of line.

"I am concerned with creating a confrontation between the viewer and the subject of the photograph," Majno said.

Every portrait is as much about him as it is about the person in front of the camera, according to Majno.

Johnson said the collection was influenced by a mixed media sculptures exhibit by Sonya Baysinger, candidate for a master of fine arts degree, taken in the studio because there is more control and he can create the environment. Majno said the projects in most of the portraits he tried to combine the quality of light with the expressive quality of line.

"I am concerned with creating a confrontation between the viewer and the subject of the photograph," Majno said.

Every portrait is as much about him as it is about the person in front of the camera, according to Majno.

Johnson said the exhibit is entitled "Roommates." Baysinger uses room as familiar images.

Majno said most of his photographs are large, black and white prints, and he is interested in the connotative and absorbing, "said Johnson.

Most of the photographs, according to Johnson, were taken in the studio, with the studio environment.

Johnson said Majno's works are personal, intimate and revealing.

The exhibit is open to the public until May 4. Hours are from Monday to Friday, 9 a.m. to 3 p.m. from Monday to Friday. Johnson said admission is free.
Professor teaches music awareness

By Donald Beattie
Student Writer

"Music can be a very intimate experience," says Donald Beattie, professor of piano at SIU-C. "People can learn a great deal about themselves and one another through playing music," he says.

Beattie, 33, has been playing the piano since he was four. He always had a love for music and the piano, but it wasn't until attending the University of Colorado in Boulder in 1973 that he became interested in piano pedagogy, or teaching piano. "My devotion, starting in a grassroots way, is in a classroom and using the educational experience as a way to foster communication, understanding, fellowship, personal growth and self-attainment," Beattie says.

Beattie has succeeded in developing a piano teaching degree program at SIU-C for undergraduate and graduate students. Enrollment in the piano program has increased since Beattie came to SIU-C in 1979.

Exceptional piano playing is not a requirement for the piano classes Beattie teaches. "We assume nothing, and from there, we just build," he says.

The piano class is designed mainly for music majors who are required to take a second instrument, but as space allows, more sections will be opened to give access to non-music majors.

Beattie gives seminars and workshops in various parts of the country on his methods of teaching. He composes his own music for his classes and uses this music for materials at his seminars.

He also teaches students to become aware of their music.

"Not just knowing what you play, but why you are playing it is important," Beattie says. He wants the students to know why they enjoy playing the music they play. Beattie believes one of the biggest problems teachers face is how to motivate students.

"The common ground of any teaching is to be a very keen observer," Beattie says. "We can understand ourselves and our students as people, the better we are going to progress toward something better in that teaching," he observes.

Beattie plans on building a future with SIU-C. He thinks the piano teaching program will go hand-in-hand with the future of the University.

"If we can get through this economic crisis and stabilize and grow again, I intend to make this one of the best programs in the country," Beattie says.

College students more prone to mononucleosis, expert says

By Greg Stewart  Student Writer

Mononucleosis, commonly known as the "kissing disease," is a relatively common occurrence among college students.

According to Muriel Narve, supervisor of the clinical laboratory at the Health Service, about 10 to 12 mono tests came back positive.

Narve said that mono is usually transmitted orally, hence the name "kissing disease."

College students are affected most often, Narve said, because they do not get enough rest, eat properly or take care of themselves physically. Symptoms of mono are easily distinguishable, but many people may mistake them as a cold. These symptoms include swollen glands, usually in the throat, a severe sore throat and weakness. The weakness can be so bad, however, that a person will feel totally exhausted, Narve said.

Unlike a cold, mono can develop into something much worse if left untreated. Mono can damage the liver, she said, and in some cases, develop into infectious hepatitis. She said a person usually feels bad enough that they want to see a physician.

Narve said that college students seem to contract mono more readily at certain periods during the spring and fall, when they are attending school. A person's resistance is lowered because they're in a stressful situation. This is only a theory, though, she said.

The American College Health Association says a person can recover from mono without the use of medicines. Narve says rest, relaxation and a well-balanced diet with plenty of fluids are some of the best cures available.

Staff Writer

What a performance! Portraying tormented actress Frances Farmer in 'Frances,' Jessica Lange fills the screen with rage and passion. She engulfs us in the tragic story of Farmer because of her gift for playing diverse scenes as well.

Slowly descending from a flight of stairs, for example, Lange's eyes grew wide as she tells her mother, played by Kim Stanley, that she loves her. It is a powerful scene because Lange makes us feel Farmer's bitterness and pain. In the same scene, Lange is also able to emit the gentleness and tension of a woman whose life has been scarred.

Lange's performance is comparable to Meryl Streep's Oscar-winning performance in 'Sophie's Choice.' The film begins when Farmer is 16, an unpretentious and honest girl who shocks her hometown with an essay about her disbelief in God. That hate grows even stronger when she decides to go to Russia. She is labeled an atheist and a communist.

But she isn't. She's just a strong-willed individual who longs to be a stage actress. However, her love for the stage is interrupted when she goes to Hollywood to try and make a name for herself.

Hollywood attempts to sell her as a glamour girl instead of the natural actress she is. After a series of mediocre films, Farmer made 'Come and Get It,' a film which brought her to the attention of playwright Clifford Odets. He eventually cast her in the lead of his play 'Golden Boy.'

Odets and Farmer begin a relationship, difficulties set in, and Farmer becomes frustrated in her goal to be a great actress. Her frustration turns to alcohol, excess smoking, and fits of rage.

This self-abuse leads to a series of jail sentences and confinement to mental institutions during this period of her life. Farmer is raped, given a lobotomy and strapped of her creativity and individuality. It is a horrifying miscarriage done to a woman who only wanted to be a great actress. But because she was different and because of her brilliant mind, she was labeled an insane radical and suffered the consequences because of it.

Through the turmoil, Farmer's dominating mother and Sam Shepard as Harry, a man she met when she was 14, remain supportive of her. However, they are unsuccessful at making Farmer happy. As it states in the film, 'Frances Farmer died as she had lived...alone.'

Lange conveys that sense ofaloneness well. The viewer sees that Lange — unlike Farmer — has been able to mature into a great actress.

This film also is quite unlike most others. Directors try to show each scene as well as possible, but this film is one of the few where film, story, and acting all work together in the telling of the story.

Baha'is persecuted, spokesman says

By Jim Lena
Student Writer

There is a problem in this world not many are aware of. In Iran, members of the Baha'i faith are being persecuted.

"We the Baha'is believe the only thing we can do is to make others aware of the situation and to try to rely on prayer to relieve the situation," she said.

She said that people become more aware of the problem, other countries might be more aware of the situation.

"We're the only thing we can do is to make others aware of the situation, and to try to rely on prayer to relieve the situation," she said.

She said that people are becoming more aware of the problem, other countries might be more aware of the situation.

It was a homecoming for SIU-C: Venetians without the price of a ticket home. A two-and-one-half-hour dance and music festival, "Viva Venezuela," held in Shryock Auditorium Monday night, was as much a nationalist celebration as a performance by Venezuela's two top touring groups, Un Solo Pueblo and Candela.

"Will all Venezuelans please stand up?" the announcer asked. They all did. The Venezuelan Stud. Assn. Association sponsored the events and it seemed its members comprised most of the fully crowded auditorium. The audience applauded them; they applauded themselves.

That beginning set the pace for Monday night's event — a celebration of Venezuela and its inhabitants. It was interesting to see the country's natives hugging the stage, arms raised or hands clapping, chanting their favorite folk songs. All the songs were performed in Spanish. That portion of the audience that didn't speak Spanish was alienated from understanding lyrics, and words were an important part of much of the evening's entertainment. Many of the folk songs relied on story, political commentary and humor as much or more than movement and symbol.

There were remedies to the language barrier. One was an English-speaking announcer who prefaced most of the songs with an explanation of their cultural context. This was extremely helpful, making the evening an educational experience for foreigners to Venezuelan culture. The announcer also thanked every single establishment which helped bring the artists to SIU-C. He broke in a couple times during the show with the words "Time for a commercial break."

Many times during the show one might have felt like a visitor to the country, looking in on actual happenings. Many of the songs were ribald yet earthy with spontaneity. The groups were thrilled to be playing in an auditorium.

Another remedy to the language barrier was the ability to understand some of the performance on a symbolic level. Luckily, both music and movement, although they sometimes lack the exactness of language as communicative tools, can move beyond words in their emotional immediacy. And especially during the second half, there was plenty of movement.

There was no mistaking the clarity of bongo drums, hip gyrations, guiatas and chants during some of Un Solo Pueblo's numbers. Of the two Venezuelan groups which performed, this large group was the more dramatic and colorful. Candela has a more minimalistic approach, remaining stationary throughout their songs and using little costuming. Their music, played in several traditional Venezuelan styles, was generally pretty, although none of the singers sounded too pretty all evening.

The groups desperately needed a professional sound man to reduce feedback. Granted, some of the singers in Un Solo Pueblo were so off-key a good soundman wouldn't have helped much, and often their style of chanting made excellent voices.

The evening ended in a spurge of nationalism when the theme song "Viva Venezuela" was sung.

Performers and many audience members marched out of Shryock still chanting.

WORKSHOPS TO HELP combat procrastination

The 195,000-member National Education Association, the nation's largest organization of public school teachers, reports that 85 percent of its members say they suffer from procrastination. Here are some suggestions from psychology experts to help motivate you:

1. Write down all your projects. Review them weekly to appraise your progress.
2. Divide tasks into small, manageable chunks.
3. Break tasks into steps. For example, writing a research paper can be broken down into: Brainstorm, Gather information, Draft paper, Revise paper, Edit paper, Typing.
4. Set specific deadlines and rewards for meeting them.
5. Establish a routine. Set aside a specific time and place to work.
6. Use positive self-talk. Remind yourself of your ability to complete tasks.
7. Use a calendar or planner to keep track of deadlines.
8. Use a timer or automated system to set time limits for tasks.
9. Avoid distractions. Turn off the phone and close the door when working.
10. Reward yourself for completing tasks.
Elway's dilemma highlights NFL draft

By Dan Deivee
Associate Sports Editor

The SIU-C baseball team will take a revived hitting attack and a struggling pitching staff to Eastern Illinois Wednesday for the first doubleheader.

Along with a single game Thursday at home against St. Louis, the games will give the Salukis chances to add pitching for a crucial weekend series against conference rival Indiana State.

SIU-C is 17-14 and 5-2 in the Missouri Valley Conference, while the Panthers have 15-9 record.

Tom Caulfield will start his first game in a long time, and Dick Wysocki will probably start the second game, according to Coach Itchy Jones.

Jones also plans on trying out former shortstop Rich Koch on the mound, and Jay Bellissimo and Richard Ellis may get some throwing in before the weekend.

They'll face an Eastern Illinois team that has used a .338 team batting average and decent pitching to carry it to a 15-9 record. The Panthers have scored 104 runs in 30 games against 106 for the Salukis.

The Salukis have some solid hitting numbers as well. They are .293 as a team batting average and have scored 104 runs in 30 games against 106 for the Panthers.

The doubleheader will begin at 1 p.m. and will be broadcast on WCIL-M radio.

Cyclists finish one second back

The SUU-C Phoenix Cycling team took second through fourth place in the 42-mile Dardennes Road Race. Mick Letourneau, John Sargent and Dave Brown all finished in the top five with the second of the winners. Joe Kegley and Mick Letourneau came within inches of winning the close sprint.

In the Women's division, Linda Sargent took second behind Audrey Thornton of St. Joe.

The team's field of 40 riders broke up at the 25-mile mark when nine riders escaped from the pack, staying together until the finish line. The "wind made it impossible for solo riders to get away," Sargent said. "We tried to get Letourneau off by himself about half-way through the race, but the field ate him up. After that everyone seemed to want to sit in."

"One of us should have won," added Sargent, "but we just weren't aggressive enough at the right time. But second, third and fourth was a pretty good finish."

Especially noteworthy was the ride of Dave Brown in his first top-category race. After being dropped early in the race, Brown caught the pack with a five-mile chase. In the sprint he finished fourth. "I thought about giving up several times," Brown said, "but you never know how a race will turn out. As it was I beat most of those people I was chasing."

In the Men's B race, SUU-C Phoenix riders Curt Martel and Cyril Friend placed ninth and 12th.

In other cycling events, Lynn Irwin finished 17th in the road race of the Pan-American Trials in Tohoma, Okla. This was Irwin's first national class race and he described it as a "learning experience."

The race was held in a driving rainstorm and included a number of 2,000-foot descents on twisting roads.

DIVER from Page 24

Practice his tower dives from the three-meter. Versatility in that respect began his freshman year, when he trained at Pulliam Pool, where there was no three-meter board. He learned a valuable lesson then from his first coach, Julian King, he said.

"Out of everything that appears to be a detriment or drag you down, the biggest thing is versatility. We learned that the old-fashioned way. With one hand three-meter divers dive on trampoline, so in a competition we had to dive under water. I didn't think about that world on fire, but I won a lot of meets. We were pretty tough and we thought of ourselves that way. We were ready to compete."

He feels now that he'll be ready to compete at the Olympics. Upon arriving in Texas May 20 with Barb, his wife since December, he'll begin hard training until June. The Pan Am Games Trials, a trip to Austria and Italy, and the outdoor nationals come in quick succession during the summer. "I'm not going to have time to relax, and that's where experience comes in. You have to work hard if you want to make it. I enjoy diving so much, though, I'm so excited about this trip I'm sure I'll be able to keep my perspective."

The Olympics are always in the back of his mind, he said. "If that's what you're training for, if it's your goal, it's got to be. But it's a long term goal. It's not all I ever thought about, I'd have a hard time getting up for meets that I have to go to in the future."

The meets this summer are important ones to get up for, because making a name for himself is just as much of the mental as the physical and mental preparation.

"It's the sociological aspect," he said. "In the trials, the judges have to know that you're a competitor. That you're capable of doing this more than once.

And if he gets to do it at the Olympics, the grown-up diver with the childhood dream will have reached his goal.

Editor’s note — This is the fifth in a series on former and present NFL draft picks with Olympic aspirations.

By JoAnna Marchewski
Sports Editor

Flying through the air, it’s the dream of many small children. When Theobald was seven years old, he discovered that diving was about the closest thing to flying that he could imagine.

A Saluki diver from 1975 through 1981, Theobald, now 24, is still diving. Since failing to dive in Chicago Heights, Theobald has come a long way.

He has established himself as one of the top divers in the country, and is a serious contender for one of the spots on the U.S. Olympic team.

He made the commitment for the spot in 1979, although the desire to make it goes back much further.

"I started diving when I was seven and I really liked it," he said. "After diving for two summers, I decided I wanted to make the Olympics. Originally I thought it would be in 1980 because I would be 21 and after that I thought I’d be too old, over the hill.

"But it started coming up on 1980 and my training wasn’t anywhere near the level it had to be in 1979, so I decided that ’84 would be the year to push for it."

Theobald will spend the last year before the Olympic trials pushing for his dream in Texas. He has trained in Carbondale since entering SIU-C during the fall of 1979, but the lack of a 10-meter platform makes the move necessary.

Theobald will take with him a wealth of knowledge and experience that he has built up in that span. It is during the last year that he really established himself, says Coach Denny Golden, as he reached finals in all events — one-, three- and 10-meter — during the 1982 indoor national championships, and fifth on 10-meter this year. He is also a member of the national team.

"He has really established himself," Golden said. "When people start assessing finals, they have to include his name for good entries.

"I’m throwing the hardest list of springboard divers in the United States at this time. Nick Stucki, Stifler and myself are neck and neck. Nick’s with the ‘tried and true’ until he gets into a contest. The springboard divers are at the top of their game every day, but they need to be polished," Theobald said.

"Just missing having a little extra sharpness," Golden said. "I mean, he didn’t have that sharpness on springboard that he should have been showing.

"A few platform diver- added difficulty, but others who

Harper selected by Atlanta in fourth round of NFL draft

By Ken Perkins
Staff Writer

John Harper’s dream of playing in the National Football League became a reality Tuesday when the Atlanta Falcons selected him in the fourth round of an NFL draft.

The news came a little later than expected for the Missouri Valley Conference defensive player of the year, being the 122nd player chosen, but something that took a distant back seat to what he’s yearned since rising to prominence as a Saluki lineman. An opportunity to play with the best is something Harper only hours after hearing the news.

"Coach (Roy) Dempsey and I were sweating it out all morning long," Harper said. "It’s positively about, but we kept thinking if it was going to happen.

"When Coach called, I got a call from my roommate and found out they had picked me.

The fact that Harper was the 122nd player chosen in the draft was surprising news to Dempsey, who was one man who felt Harper would be chosen somewhere in the first three rounds.

"I’m surprised, but I’m very happy," he added. "I had based what I knew on what the professionals were telling me. But every time someone said he would go higher than two rounds, I’d laugh at him. I’m happy with him, he never criticized any of the players who were selected before him. And he had to be a little down, just drafted in the fourth round, you’re in a select group.

Being selected in the fourth round could prove to be a diorama of sorts for Harper, who was also drafted by the Denver Gold of the United States Football League a few months ago. With the Gold’s offer could be used as a negotiating tool for his NFL draft. And that Harper passed up the offer to stick with the Falcons took interest.

Now being selected by Atlanta with a strong, rambunctious defense team, Harper says he couldn’t have been picked by a more compatible team.

"I think I’ll fit in because of the type of player I am and the type of defense they play," said Harper.

"With Atlanta, I won’t lose any confidence in the game. They’re the kind of team I’d like to play for. Now do know anything about the young linebackers. And it may be hard to break in because of their depth, but I’m willing to work hard. I’m just fired up about the whole thing.

According to a public relations man for the Atlanta franchise, the Falcons have a strong and steady set of starting linebackers, but need back-up help. After picking up Alabama defensive end Mike Jenkins in their third round, the Falcons nabbed Harper.

"The linebackers are the strength of our defense," the front office went on. "Since we’ve fulfilled our needs in other areas, we looked for a linebacker. We felt he was a capable back-up for those players we signed during the previous off-season. He was the best available one at the time.

Harper said he’s aware of the young linebacker core and of his new role he may have to play, but said that makes it easier.

"I figure I’ve got to learn the system from somebody," said Harper, "As long as I’m playing behind the best, I’m satisfied. If there’s something I can do for Atlanta this season, I’ll do it. I’m not going to be afraid of anyone anyway, I’ll be satisfied. I just want the opportunity.

Reality of getting drafted and chosen by a team is more than quite hit the 6-2, 234 pounder.

"I’m really just getting over the experience," Harper said, "I’m fired up for the draft," he said, "and I think this time last about a month.

"I’m just happy I got picked."
