Security Police Halt Nazi Leader's Talk

By John Epperheimer

Security Police stopped a speech by the head of the American Nazi party Monday night and whisked him away under guard as a crowd of 750 testified on the edge of violence.

Matt Koehl, National Nazi Leader, was steered out a rear door of the University Center ballrooms after speaking for a little more than an hour.

Wilbur Moulton, dean of students, interrupted Koehl and heard scuffle develop at the entrance to the Center's ballrooms and lounge.

Thomas Leffler, SIU Security Chief, said the speech was stopped because "we couldn't control it and we were afraid of violence." Approximately 100 students, mostly Negroes, had marched out of the ballrooms where Koehl was speaking. As Security Police opened the doors to the balcony area so that group out, a group of students outside started to shout their way in.

In the ensuing scuffle, one policeman was shoved and another officer moved in to restrain the student who did the shoving. (Picture, page 8.)

Leffler said that no arrests were made. It was not announced where Koehl was taken after the speech.

During the speech, Koehl was harrassed constantly. The most vocal criticism came from groups of Negro students on each side of the ballrooms.

There were strong indications that the walkout was planned. All of the last leaving filed past the stage where Koehl was speaking and heckled him, halting his speech.

Before the walkout, Negro students had moved through the audience giving instructions. One Egyptian photographer was warned not to take pictures of a specific segment of the audience.

In a press conference earlier, Koehl said the American Nazi party's goal is "to send the blacks back to Africa" and to try the Jewish people for treason.

In the speech, he linked Jews to the power structure of international Communism and said they control the U.S. news media, especially television.

There were some who voiced their backing for Koehl's policies during the speech, but larger numbers of white students shouted back at Koehl as he outlined the Party's beliefs about Jews.

He repeatedly said he would outline his policies on Negroes later in the speech, but never reached the topic.

In a talk just before his speech was halted, Koehl told an Egyptian reporter that the heckling was the worst he had encountered since he assumed Party leadership in late August, 1967.

Koehl replaced Commander George Lincoln Rockwell after Rockwell was assassinated Aug. 25, 1967. He said SIU was the third campus he has visited.

Saturday Class Exemptions

Registration Guideline Issued

Robert MacVicar, vice-president for academic affairs, has issued a guideline stating that students requesting exemption from Saturday classes for religious reasons must sign a statement indicating their religious belief and then have a supportive statement sent to the Registrar.

Although it is not stated in the guideline, MacVicar said that the rules governing exemption for Saturday classes also applies to night classes as well.

The guideline states that the student "have the supportive statement sent to the registrar center by the time he registers next." The supportive statement is expected to come from an "appropriate" official with the student's religious faith.

Although the "appropriate" official will usually come from the student's home religious institution, the guideline states that "if this is impossible or difficult to obtain the statement may come from an appropriate local official."

Following the signing of the statement and assuming the propriety of the student's religion for class exemption, the student is permitted to register for classes on an exempt basis.

According to the guideline, the signed statement is required in the registration center awaiting receipt of the supportive statement.

The guideline states that a student will not be required to obtain a supportive statement for subsequent registrations after the initial one is received. The statement will be kept on file in the registration center.

It is stated in the guideline that "should the supportive statement not be received by the next registration period, the student will be subject to Saturday classes."

Students unable or unwilling to sign the statement will be referred to the supervisor of the registration center for further consideration.

If further referral is necessary, it will go through the regular administrative channels—the Assistant Registrar, Registrar, and if necessary, the Vice President for Academic Affairs or his designated representative.

Gus Bode

Gus says he's never taken Saturday classes, he doesn't believe in them.
Art Class Members

Students Stage ‘Happening’

It was probably one of the most atypical “happenings” SIU has ever seen. For the first time, there weren’t flower children, but members of an SIU class. No leader was a Hindu guru, but tall, bearded instructor Gerald McCarty.

McCarty and his 20 Art 101 students gathered outside the north entrance of the University Center Monday morning to test a new idea. The purpose was to let the students be the fare for a cold weather “happening” in a long, army surplus overcoat and a knitted cap which was pulled low over his ears.

“I told my class about a recent ‘happening’ I went to in St. Louis that was conducted by Allen Kaprow, the New York University art professor,” McCarty said. “It cost $2,000 to put on. My students liked the idea and wanted to hold their own ‘happening’ but not at $2,000.”

Did this particular “happening” have any significance? “Just what you get out of it,” was the reply from one of McCarty’s students. “If someone thinks it’s a protest against prosperity, then that’s what it is. If they think it represents something else, then it’s that, too,” he explained.

This good “happening” weather, McCarty was asked if he would like to perform. “Definitely,” he said as another flake landed in his beard.

Fraternity Selects Sherry Brame as Kappa Sweetheart

Sherry Brame, a sophomore from Carbondale, majoring in sociology, was named “Kappa Sweetheart” at the annual Kappa Alpha Psi social fraternity Sweetheart Ball Saturday night at the Travel Lodge Motel in Marion.

Mary Clifton, a sophomore from Chicago, majoring in sociology, was selected as “Scollers Sweetheart” by the Scoller pledge group also Saturday.

SIU Freshman Fined $200

An SIU freshman was ordered to pay a fine of $200 plus $25 costs and to serve 20 days in the county jail for driving a car while his driver’s license was revoked.

Talmon Hegwood, 19, from Chicago, entered a plea of guilty to the charge Monday in Jackson County Circuit Court.

States Attorney Richard Zoology Lecture Set

Harold Borchers, instructor in the Department of Zoology and Entomology at Iowa State University, will lecture in a modulate class at 4 p.m., Thursday in Room 101, Lawonn Hall.

No Evidence of Foul Play

Cause of Student’s Death Not Known

Cause of death has not been determined of the 21-year-old former SIU student whose body was found in a creek here Saturday, according to the Jackson County Coroner, Harry Flynn.

The body of Eldon Maurice Harris was discovered by a group of Pyles Fork Creek about 100 yards from the 600 block of East College Street at 11 a.m., by four boys.

Burial is scheduled for Thursday at Burroe Cemetery at Worth, Flynn said. Laboratory tests were conducted in East St. Louis but the results were not available Monday, the coroner said.

Police Chief Jack Hazel said there is no evidence to indicate foul play.

A relative in Chicago told Carbondale Police that Harris was visiting in Carbondale the weekend before he died. Several students questioned by police said Harris had gone to bed about 4 a.m., Saturday at a house trailer on East College Street, but was not in the trailer at 10 a.m. that morning.

Flynn said Harris is believed to have been dead about 10 to 12 hours at the time he was found.

Soprano to Present Music Recital March 7

Mary Jane Organ, a soprano, will present a music recital at 4 p.m., March 7 in Davis Auditorium.

An entertainment by Nancy Reese, Miss Organ will sing selections by Henry Purcell, Joseph Haydn, Robert Schumann and Franz Schubert.

Narcotics Usage Discussion
Aired Tonight on WSIU(FM)

A discussion of drug usage will be presented at 8 p.m. tonight by Rich Styles, WSIU(FM) program developer, in a program entitled "A Look at Narcotics and Drugs."

Other programs:
8 a.m. News Report
10 a.m. Pop Concert
2:05 p.m. Search for Mental Health—Dr. Ian Algire speaks on "The Importance of Human Behavior."

Tryouts for Musical
Scheduled This Week

Southern Players have announced tryouts for their spring musical, "Of Thee I Sing," by George and Ira Gershwin, W. Grant Gray, director, needs singers, dancers, actors and stage hands for the production to be presented in May.

Auditions are being held Tuesday and Wednesday, Feb. 27 and 28. Tryouts Wednesday are in Furr Auditorium. Auditions are held Tuesday in 171 of Lawson Hall. Singers should bring their own music. An accompanist will be furnished. Time of auditions is 7 to 10 p.m.

WSIU-TV Airs Commentary
Screaming Eagles in Vietnam

The big picture will present the documentary, "The Screaming Eagles in Vietnam," at 8 p.m. on WSIU-TV, Channel 8.

Other programs:
8:40 a.m. Growth of a Nation
11:25 a.m. We The People
12 noon. NET Journal
1:25 p.m. Time For Art
4:30 p.m. What's New—American II—Paul Revere
6:30 p.m. Book Beat—Vance Bourjaily
8 p.m. Passport 8: Treasure
9 p.m. NET Festival—Glyndebourne Journal 1967
10 p.m. The David Susskind Show

Dye Lecture Scheduled
A chemistry seminar will be held at 4 p.m. Thursday, in Room 205 of Parkinson Laboratory. Phillip E, Sokol of the Tonny Company, will speak on "Chemistry of Autooxidizable Dyes."

Attention Candidates for Teaching Positions in Chicago Public Schools

National Teacher Examinations
for Elementary (K-8)
and Selected High School Areas

The National Teacher Examinations will be administered April 6, 1968 on 400 college campuses

Chicago Public Schools will use the scores as part of their 1968 certificate examinations for:

- High School Mathematics
  - N.T.E. Early Childhood Education
  - N.T.E. Math Education
- N.T.E. Education in the Elementary School
- N.T.E. Industrial Arts-Grades 7-12

High School English
- N.T.E. English Language and Literature
- N.T.E. Industrial Arts Education

All Candidates Must Take the Common Examination and the Teaching Area Examination Relevant to the Certificate Sought

Applicants for teaching positions in the Chicago Public Schools should:

1. Register with the Educational Testing Service, Princeton, New Jersey to take the common examination and the relevant teaching area examination.

2. Indicate on the N.T.E. form, line 11, that scores should be submitted to the Chicago Board of Examiners, Chicago Public Schools.

3. File application for certification examination (form Ex-S) with the Board of Examiners. The following credentials should accompany the application (Ex-S), if not already on file, official copy of birth certificate, official transcript of all college work attempted.

Credentia Assembly Deadline Date: Tuesday, April 2, 1968, Noon C.S.T.

For additional information: Board of Examiners, Room 624

Chicago Public Schools
228 N. LaSalle Street, Chicago, Illinois, 60601
or the Office of Teacher Recruitment, Room 1839
or details in the Teacher Placement Office
Women's Hours
Poll Significant

The large response of women students to a Student Senate questionnaire on women's hours should be considered as significant.

A total of 72 per cent of the women affected by the hours regulation responded to the questionnaire, and approximately 96 per cent of those responding favored liberalization of the rules.

The questionnaire isn't worded as well as it should be, and the final and official figures aren't available, but it should be apparent that a good representation of opinion has been obtained.

It is heartening that the Senate has obtained hard evidence to back up its role as representative of the student body. There can now be no question that the Senate is reflecting student opinion in seeking changes in the regulation.

For these reasons, the administration should give serious consideration to changing those regulations. More important the questionnaire represents a valid base from which to challenge the whole concept of in loco parentis, and is a serious justifying question posing its place in the University of today.

John Epperson

To The Daily Egyptian:

An article was written in the Egyptian on Jan. 31 which mentioned why, and for what, a student was tired of in our present society.

The article was entitled "I'm a Tired Bricklayer."

George Wallace's formal and official announcement that he is running for President, which rivalled Mr. Nixon's announcement as a work of superstition, has prompted the comment that the nation is in for a campaign of "red-hots.

We are not sure of that, but at least it's easy to be a "red-hots."

(To quality, one need only: 1) Ignore facts, 2) See red spots everywhere, and 3) Well loud and long.

Of course, "red-hots" have a way of being 100 per cent wrong. Yet in these days of bungling, compromising, fence-sitting and second-guessing, where else is there a chance for such totalty? And how can 100 per cent Americans settle for less than 100 per cent, right or wrong?

From the St. Louis Post Dispatch

R. J. Emde

Letters Welcome

It is the policy of the Daily Egyptian to encourage free discussion of current problems and issues. Members of the University Community are invited to participate with members of the news staff in contributing items for this page with the understanding that acceptance for publication will depend upon the limitations of space and the apparent timeliness and relevance of the material. Letters must be signed, preferably typed, and should be no longer than 250 words. Contributors should respect the generally accepted standards of good taste and the rights of others and be urged to make their points in terms of issues rather than personalities. It is the responsibility of the Egyptian to select the material to be used. Contributors who also should include address and phone number with a letter. The identity of the author can be verified.

Letters to the Editor:

'TI'm a Tired Bricklayer'

To The Daily Egyptian:

An article was written in the Egyptian on Jan. 31 which mentioned why, and for what, a student was tired of in our present society.

The article was entitled "I'm a Tired Bricklayer."

I sent this article to my parents in one of my letters, and my father answered with this article:

"I am a tired Bricklayer--tired of trying to please our contractors. I am tired of the pressures of employers who insist on more production when building University to send tired students.

I am tired of seeing my fellow workers go down the road because they couldn't brown nose.

I am tired of the cold, the snow, the rain on my back, and the hot summer sun on my neck. I am tired of having my fellow workers go down the road because they couldn't brown nose.

I am tired of seeing my fellow workers go down the road because they couldn't brown nose.

I am tired of trying to listen to the "older bricklayers" scorn some oddnick or young bricklayer who in many cases is trying to change things to be different than when the pyramids of Egypt were built.

I am tired of business agents, and union officials who try to discourage me from questioning union dues, assessments, etc.

I am a tired bricklayer--so tired that if I had any time of my own I would be too tired to do anything with that time.

I am tired of cold sandwiches for lunch and driving 50 or 60 miles one way to a job.

Many years ago, before this, I was tired of Panama, Italy, Portugal, North Africa, Southern France, Galapagos Islands, Coral Sea, Elba, Sicily and the other places I remember during W.W.II. Tired of the destruction which is now going on in Vietnam.

I am a concerned Bricklayer. I am concerned that the real reason for my being here is to make a decent living for my family."

Lastly it seems I'm tired of getting haircuts, shaving, wearing clothes, etc.

In other words, what I have said should convince some students that being a student isn't so rough as many say. Getting out and really living isn't a picnic and is worse than most students realize.

David Austin

Letters to the Editor:

Student Wage
Raise Fiasco

To The Daily Egyptian:

I've been more or less following the Fiasco throughout. I think it is a beautiful example of why the student body, being self-sufficient, has only little power, but deserves leadership.

The persons griping were not the ones receiving the wages. When the minimum wage was set at $1, sure, those of us making a dollar beeped. But we accepted it, because without our jobs, a number of us (referring to the "gang" at Lott's Hall, which I regret) wouldn't have been likely to stay in school.

In fact, the ones who griped the loudest need it the least. It looks the same way this time--the student senators who don't need it at all gripe the loudest, and due to their short-sighted actions a lot of student workers who need the jobs to stay in school are going to be hurt.

I'm glad I'm not at SIU to be a part of it.

Lynn Kohner

On Birth Control

To The Daily Egyptian:

Since Mr. Lentz and the Student Senate have resolved that the Health Service publish a list of those doctors who either prescribe birth control pills for unmarried SIU coeds, it would also be very useful for SIU Health Service to publish a list of the names (and addresses) of those coeds for whom the pills are prescribed.

After all, is it good for the goose to be fun for the gander.

William O. Dwyer

Letters to the Editor:

'My Opinion: Senator: Don't waste your time on students who are not interested in their own political welfare and fate.'

You must realize by now that there are two areas of Senate thought: to do what your constituents want by trying to beat your head against the wall of mass apathy and act accordingly; or to accept the mandate that the few have given you and make decisions with your own intellect and vote using your own conscience. (After all isn't this just what the more vocal of our student leaders demand?)

As a constituent, I don't want to try and gain some superiority in the vague and imaginary pulse of the student body in this University.

Travel Ban: Encourages Dishonesty

By Jenkin Lloyd Jones General Features Corp.

In all too many cases the for-in-the-bucket legislation, President Johnson's proposed taxes on travel and on foreign exchange, in the Western Hemisphere should win at least a red card.

It is, in the first place, an effort to blame on tourists what is clearly the fault of the economic philosophy of the Great Society. The gold-drain schema, essentially from fear by foreigners of the future of the dollar in its large-scale deficits continue.

Secondly, the Administration has apparently given up attempting to persuade major labor unions to know what their goods for wage increases in line with increased productivity per worker. Frankly inflationary wage settlements have been hailed with apparent satisfaction from the White House.

This raises the cost of goods we've been exporting. The loss of customers abroad diminishes our earnings of foreign currencies. And when we buy commodities from abroad because they are cheaper we lose dollars. Brave talk about further reductions of tariffs in accordance with the Kennedy round will be utter nonsense when you order the U.S. Bureau of Internal Revenue could get hold of the passenger manifests. Imagine the Canadians agreeing to that!

This escape hatch would also require you to take a foreign air line, which would intensify the balance-of-payments problem. Where's the friend-in-France dodge. You could travel openly to Europe and be the "guests of your friend in France" in truth not be able to accompany you on your foreign travels, but he could supply you with thousands of francs for the trip. Later you could entertain him with his visit to the States or just send him a letter or wiring.

You don't even need a friend. There are no tariffs on genuine antiques. So you could order from Amsterdam an old chest worth $100, but pay $1,000 for it. The dealer could be so overcome by your claim that when you go to Holland he'd give you $500 worth of guilders for your further travels. Our customs men, looking at the invoice and the chest, could only conclude that you'd been cheated.

Such a law as has been proposed is either less than cheesecloth. If we mean business the State Department should issue passports only for valid business reasons and close all borders to junketing Americans. How can you trick every man, woman and child at the Niagara bridge, and how would you handle the problem of boosters made in advance in foreign banks?

This would, of course, bring some repercussions. How, for example, would we expect to sell more Boeing and Douglas airplanes to foreign airlines that our government would be busy blocking? If we can no longer send tourists dollars, let's not do it in idioits and unworkable ways that will turn thousands of our normally honest citizens into con men and corner-cuters.

Let's just stop out-of-country tourism, even to Tijuana, Nassau or Windsor.

Improving Through Warfare

By Arthur Hoppe

Here with is another unwritten wonder in that small group of all but famous reference work "A History of the West 1900-1940." The little of this unwritten chapter is, "The Perfect Draft Law."

The President during the late winter of 1968 to draft drafted college students proved widely unpopular, the universities were most unhappy at the prospect of losing their most intelligent, most eager, most questioning young minds. And the Army was equally unhappy at the prospect of getting them.

"A soldier who demonstrates an intelligent eagerness, questioning mind," said General Zip K, Zapp glibly, "is asking for a court martial."

But most unhappy of all were the geneticists.

"Our wise policy of drafting only those poor to go to college or too stupid to stay there was working wonders. By sending these poor, stupid young men off to kill each other, they could breed, we were well on our way to becoming a nation of rich, clever Americans.

Eco nomists were equally appalled. "It makes no sense," they said irritably, "to defer any college students and pay all bills of shipwrecking the draft, since we have been relieving the United States of taxpayers more than twice the United States of taxpayers more than twice.

As far as need to earn tourist dollars, the poor uneducated, unstimulated, foreign hungry India with oil-rich Venezuela.

The proposal that Americans traveling in transatlantic or the Caribbean countries can spend seven whole dollars a day tax-free is ludicrous. The overseas expense accounts of our government officials should be passed up on walls facing Pennsylvania Ave.

The only way to get around Europe on $7 a day is to hitch-hike, design blindness and carry a tin cup. Even then you"d better stay out of Scotland.

The travel restrictions now proposed would encourage more dishonesty than any law since Prohibition. Think of the doices:

There"d be the big Canadian goose-hunt doices. You could carry thousands of dollars into Canada without question. Then you"d simply take a plane for Europe. If the best countries co-operated by stamping your passport, there"d be no evidence of your journey unless the U.S. Bureau of Internal Revenue could get hold of the passenger manifests.

Imagine the Canadians agreeing to that!

This escape hatch would also require you to take a foreign airplane, which would intensify the balance-of-payments problem.

Where's the friend-in-France dodge. You could travel openly to Europe and be the "guests of your friend in France." So in truth not be able to accompany you on your foreign travels, but he could supply you with thousands of francs for the trip. Later you could entertain him with his visit to the States or just send him a letter or wiring.

You don't even need a friend. There are no tariffs on genuine antiques. So you could order from Amsterdam an old chest worth $100, but pay $1,000 for it. The dealer could be so overcome by your claim that when you go to Holland he'd give you $500 worth of guilders for your further travels. Our customs men, looking at the invoice and the chest, could only conclude that you'd been cheated.

Such a law as has been proposed is either less than cheesecloth. If we mean business the State Department should issue passports only for valid business reasons and close all borders to junketing Americans. How can you trick every man, woman and child at the Niagara bridge, and how would you handle the problem of boosters made in advance in foreign banks?

This would, of course, bring some repercussions. How, for example, would we expect to sell more Boeing and Douglas airplanes to foreign airlines that our government would be busy blocking? If we can no longer send tourists dollars, let's not do it in idioits and unworkable ways that will turn thousands of our normally honest citizens into con men and corner-cuters.

Let's just stop out-of-country tourism, even to Tijuana, Nassau or Windsor.

To appease economists, the draft age was lowered to 14, thus saving war going for another generation, but a high school education. And at the behest of sociologists, young who choose off the university or normal inclinations—sexual, the liberal or political—were automatically reclassified I-A.

Everybody was happy with the draft. The Educators were happy not to have to deal with the stupid. The taxpayers were happy not to have to deal with the poor. The Army was delighted with its new recruits "who display the great est quality of any soldier," as General Zapp put it, "unquestioning obedience."

And it was widely held that the poor, stupid, undereducated criminal and the rich, educated young men would be killed for foreign cliques at great waste of public funds, and as for the clever...Well, the U.S. was in grave danger of becoming a nation of homosexual, drug-wearing bank robbers.

"We are fighting this war, like any war, for the good of the country," said the President thoughtfully, "So maybe we ought to change the draft law."

The Congress, after long study and debate, unanimously passed what became known as "The Perfect Draft Law."

The same mental and physical tests were given younger men. Why? "By induction, But to satisfy the geneticists only those were drafted who flunked, and close all borders to junketing Americans. How can you trick every man, woman and child at the Niagara bridge, and how would you handle the problem of boosters made in advance in foreign banks?"
Inmate Tapes Books for Blind Students

Taping a textbook for blind students at SIU and other universities and schools is not a unique occupation, but for Robert Wise, a 42-year-old inmate at the Menard branch of the Illinois State Penitentiary at G Rein, it is an unusual and rewarding experience.

Wise has just completed four textbooks for a total of 492,000 feet of tape. This comes to more than 93 miles and in that performance by inmate-teacher Wise, is an 810-page physiology book, his latest achievement.

"It's a mighty good way to get a liberal education," Wise says. He spends about four hours a day as a full-time recorder.

Wise is one of three Menard inmates who does this type of work to supply the needs of blind students at the university on a project which was inaugurated several years ago by then Warden Rosco V. Randall as one of the major educational projects in his prison for the penitentiary. Since becoming director of public safety and in charge of all the penitentiaries in Illinois, Randolph has extended the program considerably.

"This project not only gives inmates a worthwhile project on which to spend their time in prison, but provides a most needed tool in the education of our handicapped," Randolph said.

Part-time "tapers" are Eugene Epperson and Ronald Cox. Both Epperson and Cox read and tape and do some part-time teaching in other subjects with machine donated to the Carbondale Lions Club and the Chatham Lions Club of Chicago.

The inmate taping work is part of a program sponsored by the Carbondale Beth Jacob Synagogue Sisterhood. The program was begun in 1966, following up experimental work inaugurated in 1957 by Warden Handy. The Sisterhood supervises the work of the three inmates as well as that of several housewives and students who are taping books for blind students.

Mrs. Harriet Simon, wife of an SIU professor, directs the Menard activities as the Sisterhood's co-ordinator. She clears all reading materials and arranges for the convicts to receive the 12,000-foot tape issued through the audio-visual-department.

Warden Max Frye of Menard has invited Randolph to a dinner in honor of the three prison inmates and he has invited others to attend a taping problems discussion session. New equipment has been received at Menard to extend the program and space has been provided for additional taping work. Mrs. Simon said plenty of materials for taping will be provided as the surface of needs has hardly been scratched.

"The need for recorded books is constantly increasing," she said, "not only because more handicapped blind students are going to college but because we want to extend this type of service to other handicapped, such as cerebral palsy victims." All three inmates enjoy the work, which is exacting and often tedious. Wise, in particular, enjoys the science book taping.

"He is doing an outstanding job, as are the others," says Leslie L. Hines, Menard superintendent of education and taping co-ordinator.

Two new tape recorders are available at the prison, Hines said, and at least two more men will be recruited for taping assignments.
"I wanted to work for a small company. It may sound crazy, but that's why I went with IBM."

"When I was in school, I dreaded the thought of working for some huge company where I'd be just another number," says IBM's Jim Hamilton. (Jim, who has a B.S. in Electrical Engineering, is a Systems Engineering Manager in Marketing.)

"At the same time, I knew there were definite advantages in working for a large firm. So as I interviewed each company, I checked into the degree of individuality I could expect there.

"One of the main reasons I picked IBM was their decentralization. They've got over 300 locations throughout the country. Which to me means a big company with a small-company atmosphere."

IBM's small team concept

"Actually, there's plenty of decentralization even within each location. For instance, in science and engineering, they use a small team concept. It means, no matter how large the project, you work individually or as part of a small team—about four or five people.

"In marketing, I was pretty much my own boss even before I became a manager. As a systems engineer, it's up to you to find the solution to a customer's problem, and then see it's carried out in the optimum way. You work with the customer every step of the way.

"There's a lot more to the IBM story than Jim has mentioned. For more information, visit your campus placement office or send an outline of your interests and educational background to I.C. Pfeiffer, IBM Corporation, Dept. C, 100 South Wacker Drive, Chicago, Illinois 60606. We're an equal opportunity employer."
Dean Talley had a mixed feeling about the new policy. "In terms of fairness to the individual, you have to buy it," he said. "But with a higher proportion of students wanting to go to college, someone is going to have to do the teaching. I can't argue that a graduate student shouldn't be drafted, but in terms of society, he may be more valuable as a teacher."

"The snake's diet consists of baby chickens, mice, rats and almost any living warm-blooded animal," he said. Turk pointed out, however, that the snake is as "gentle as a rabbit around human beings." He carried it in his lap all the way back from New Orleans.

He said that boa constrictors squeeze their prey before swallowing them whole.

The snake will serve Turk as more than a pet. "I plan on using it as a demonstration when I teach high school biology next year," he said.

At first, Turk was bewildered as to where he would keep the snake during his stay in New Orleans. Finally, he was able to coax a fireman into keeping it in his locker at the fire station.

"The police pulled their guns and acted like I was some kind of crazy man," Turk said. "When I explained my predicament, they put their guns away."

Turk said boa constrictors sometimes reach lengths of 15 or 20 feet.

Deans Comment on Draft Policy

(Continued from Page 1) much is going to depend on the draft boards and local conditions.

The potential effect of the new regulations on graduate teaching assistants and full-time instructors was predicted to be a serious one. Dean Simone pointed out that the new regulations exclude occupational determiners for teachers as well as educational determiners for graduate students.

"Teaching assistants are almost exclusively grad students, and there are classes which we'll have difficulty staffing," Simone said. "We went on to predict a long-run effect of the new ruling on the inflow of permanent career people to the university and industry as well. Hindersman predicted the new policy will affect the supply of teachers four or five years from now. 'They will not be available,' he said.

Dean Talley said the School of Communications depends heavily on graduate assistants to do important teaching. "We did discuss in several ways that we get a good job of teaching from them," he said.

Concerning the future problems with graduate assistants, Talley said there are a number of good women graduate students, and Ph.D. candidates who have already served, who will likely be doing much of the assistant teaching.

"Freshman enrollment is declining, so there may be a decline in the need for teaching assistants," Talley said hopefully, "but we had hoped to use the extras for graduate research."

Opinions on the new draft policy were varied.

"The policy seems to be based on the need for manpower, but I don't have sufficient information to comment on it," said Willis E. Malone, assistant to Robert Madison, vice president of academic affairs.

Dean Simone of the Federal governemt seems to be reordering priorities because of Vietnam. "I pointed to the need for aid to graduate schools via fellowship, research and training grants."

"The draft has caused an inequality," Simone admitted, "I think everyone should take his chances equally, one sort of lottery system."

"I have no quarrel with the policy. It seems to me a brand new idea and I also said that if some people were given to the Vietnam war," Simone continued.

WASHINGTON (AP)—President Johnson's answer to con-
gressionional demands for con-
sultation on prospective troop increases in an open invitation to
senators to discuss Viet-
nam policies with him.
Democratic Leader Mike
Mansfield of Montana told the
Senate Monday that Johnson
is "anxious to meet with
members of the Senate For-
eign Relations Committee.''
His statement came after

Sen. J.W. Fulbright, D-Ark.,
chairman of the Foreign Re-
lations Committee, had de-
manded the Congress be con-
sulted on any major escala-
tion of the war.
In a wide-ranging debate:
—Mansfield proposed an oral
suspension of the bombing of
North Vietnam targets beyond
the 17th parallel.
—Sen. Russell B. Long,
D-La., assistant leader, said
this would be a bad mistake,
adding that "the American
people are getting disgusted
of this talk of a pause, or
pulling your punches when the
enemy is slugging you."
—Sen. Stephen M. Young,
D-Ohio, said he had been
told on a recent visit to
Vietnam by Gen. William C.
Westmoreland, the area
commander, that he wants
125,000 additional men.
—Sen. George D. Aiken,
R-Vt., another war critic,
said an additional 100,000
troops would be "only a drop
in the bucket if we are deter-
minded to win a military
victory there."

Mansfield said the United
States ought to act on the
suggestion of Secretary-
General U Thant of the United
Nations that halting of the
bombing would bring nego-
tiations.
Fulbright said that if
Johnson has not discussed the
sending of additional troops
with Mansfield—which the
Democratic Leader said the
President has not—"he has not
discussed it with anyone in
this body."

Mansfield replied that the
President is ready to talk with
the senators.
The Montana senator said in
an interview later the Pres-
ident set no date for such a
conference in making the
offer to him more than two
weeks ago.

Senate Race

State Democrats Face Tough Choice

CHICAGO (AP) — Ranking
Illinois Democrats met Mon-
day to choose their candidate
for governor and U.S. senator
in what may be the state-
makes' toughest task in 20
years.
The slate makers' job be-
came more difficult Friday
when Adlai E. Stevenson III
said he might agree with
President Johnson's stand on
Vietnam if they were slated to
run against Sen. Everett M.
Dirksen, the Senate minority
leader.
"I want you to know that if I
were chosen to run for the
Senate, I might take a stand
opposite to that of President
Johnson on that issue," said
Stevenson, 37, a son of the
late ambassador to the United
Nations and twice Democratic
nominee for president.
Stevenson refused to state
his precise stand on Vietnam,
but he told the slatemakers
that "the situation is so fluid
now, in any event, it is en-
tirely likely it would not be
that of President Johnson."
Stevenson had been men-
tioned prominently as a pos-
sible candidate for senator,
but he told slatemakers he
would be the strongest can-
didate for governor.
Gov. Otto Kerner, who de-
cided not to seek a third term,
had boosted Lt. Gov. Samuel
Shapiro for the gubernatorial
race.
Mayor Richard J. Daley of
Chicago and other Democratic
leaders postponed the final
decision to Monday night or
early Tuesday. They attended
the funeral Monday in Havana,
III., of former Sen. Scott
Lucas, who died Thursday.
Stevenson reportedly also
told the slatemakers that he
was the best candidate for
governor. Monday, he said
he used the word "strongest"
candidate and cited his re-
cord.

In 1964, Stevenson led 177
legislators in a statewide at-
large election to the General
Assembly. In 1966, he led the
Democratic ticket in winning
the state treasurer's post
while Republicans won all
other state offices.
Other possible candidates
under consideration by the
slating committee include:
Atty. Gen. William Clark,
State Sen. Paul Simon and
Sargent Shriver, director of the
war on poverty.
Shriver has not appeared
before the committee but he
is being pushed for a spot
Dan Rostenkowski, D-Ill., who
is close to Daley.
Simon has campaigned for
months for the chance to op-
pose Dirksen but he, like Clark
and Shapiro, told slatemakers
he would serve the party in
any capacity.
The last time Illinois Demo-
crats faced such perplexing
slating problems was 1948,
when Douglas was scheduled
to run for the Senate, but
Paul Douglas was considered
by many Democrats too in-
dependent to sit in the gover-
nor's chair and their roles were
switched at the last minute.
The ticket won and Steven-
sen served one term before he
was tapped to run for presi-
dent. Douglas served 12 years
in the Senate before he was
ousted in 1966 by Sen. Charles
Percy, R-Ill.
James-Ames Show Presents Oldies, New Sounds Too

Harry James . . . a Few Recollections

Ed Ames . . . a Standing Ovation

Photos by Dave Luman

Synthesi is Music's Future

SIU Audience Gives Group Ovation

By Nancy Baker

A do-you-want-to-dance-atmosphere created by Harry James and his Swingin' Band set the stage Friday night for recording star Ed Ames at the SIU Arena.

James remembered the songs of the good old days and the audience apparently had a few recollections, too, when he began with "Tuxedo Junction."

A soft and tender mood was created when Miss Joan O'Brien sang a melody of hers including "I Had the Craziest Dream Last Night," "I Crossed for You," and "You Made Me Love You."

But the romantic mood soon exploded when drummer Sonny Payne moved out with the popular "Out of My Head," only to be featured in a well-done rendition of "Caravan."

Vocals Ernie Andrews added to the program with his presentation of Frank Sinatra's recent hit "That's Life," and "Can't Take My Eyes Off You."

James' ability to coordinate the soft touch of the old style with the sound of today emerged when the group played the Beatles song "Michelle."

Ames presented a combination of show tunes, folk sound and "Top 40" sounds.

Ames said he plans to do more collegiate concerts and perhaps a little more Broadway work while continuing to record.

"Synthesi is the future of music," Ames added, pointing to the combination of part easy listening and part contemporary sounds for "very interesting lyrics coupled with a softer sound."

Acting and singing are reverse sides of the same coin since both express creatively through the spoken word, he said, and Ames seemed to be presenting the singing side quite adequately Friday.

BRAINS IN PAIRS—Winter book favorites to finish tops in next June's graduating class at SIU are the Murphy twins of Granite City, seated—Ed. left and Tom. Only a computer can quickly tell them apart. Mark is av- eraging 4.556 (on SIU's 5.0 scale) and Merrill, 4.546. They are the sons of Mr. and Mrs. Harry Allen of Reynolds. Such tight competition is old stuff for the Murphys. At the end of the fall quarter, with both scoring perfect 5.0's, Tom was listed as 4.967 overall, with brother Ed only a split fraction off at 4.962. If they continue at that pace they will be graduated with highest honors (4.5 overall required) and there's a better than even chance that they will be the two top scholars in the class of 1968.

The Allen twins of Reynolds, Ill., both of whom started off this school year with straight A's for the fall term.

Merrill and Mark Allen, sophomores, are carrying grade averages so close that only a computer can quickly tell them apart. Mark is averaging 4.556 (on SIU's 5.0 scale) and Merrill, 4.546. Morris Library, ranked as the 38th largest major university library in the United States and Canada, circulates between 60,000 and 65,000 items each month and manages a total circulation of 3,000 items a day.

The sorting and circulation of items throughout the library is a time-consuming process which requires each item to pass through several hands before it reaches its assigned position on the library shelves.

Morris Library subscribes to 200 newspapers from all over the world, and their circulation in the library is handled by a student staff who works with the newspapers only. Upon their arrival at the library, newspapers are opened, checked in and then brought to the newspaper and magazine room on the first floor. The papers will remain in this room for a period of a week, during which time they are catalogued and numbered. After that period, they are placed in a specific basket indicating the floor to which they are assigned. Once they reach the assigned floor they are again divided, and the date is stamped on each one.

The library's circulation of books varies according to the number of orders sent out and the time of year. As many as 15 or 16 people are involved with the various steps taken in the operation of their circulation. Once received, the books are checked in, processed, catalogued and marked.

According to Sidney E. Matthews, assistant director of Morris Library, the total circulation is governed by the number of orders sent out and the time of year. Fall and Winter are the heaviest seasons for books, Matthews said, because these are generally the heaviest publishing seasons. The great number of new faculty members on campus in these seasons also has an effect upon the number of books, he added, since at each new semester, new faculty members are busy suggesting new titles.

However, there are certain items which cannot be obtained through the official channels. This is one problem which is being addressed by the Morris Library staff. They are working on a system that will allow students to order books directly from the library without having to go through the usual channels.

**Student Chosen for Program, To Attend German University**

Nancy McGuire, a senior from Polo, III., who is majoring in German, has been chosen by the German faculty as this year's exchange student to the University of Hamburg in Germany.

The announcement was made by Heiltum A. Harrwig, chairman of the Department of Foreign Languages at SIU.

The exchange program began in 1957. The students who are chosen on the basis of written and formal applications and personal interviews with the German faculty, the students who are accepted are given a fellowship. Preference is given to students who are majoring in German, but about half of those who go are not German majors.

**League Selects Sisk as Director**

Carlton Sisk, former treasurer-manager of S.I.L. Employees Credit Union and past-president of the Egyptian Journal of Credit Unions, has been elected to serve a three-year term as a member of the 40-man board of directors of the Illinois Credit Union League.

Sisk will be seated on the board at the 1968 annual meeting to be held in Chicago April 26-27.

Sisk is presently employed by the bursar's office at SIU.

**Chemistry Seminar Set**

A chemistry seminar is scheduled for 4 p.m., Wednesday, in Room 204 of Patterson Laboratory. Alfred Cook will speak on "Interpretation of Mass Spectra, Part IV."
A showing of luxury textile fabrics by designer Jack Lenor Larsen of New York City will open at SIU Wednesday evening for a two-week run through March 13. The event is sponsored by the Department of Clothing and Students Invited To Speech Meet

Students who display talent or interest in the phase of oral interpretation are invited to attend a meeting at 6:15 p.m. Thursday in the Lounge of the Communications Building.

Mrs. Marion Kleinau, director of the oral interpretation sequence in the Department of Speech, and other faculty members will lead a discussion concerning the arts of advanced and intermediate oral interpretation.

Miss Jan Larsen, instructor of speech, will read from Lonesco's play "Rhinoceros."

Economist Will Speak

P. Markov, second secretary and chief economist in the Soviet Embassy in Washington, D.C., will give a public lecture on the economic achievements of Russia since 1917 at 7:30 p.m. Tuesday in Morris Library Auditorium.

Dean of Students to Review Senate Proposals on Hours

Dean of Students Wilbur Monson said his office will conduct a review, as it does all materials arriving from the Student Senate, for any proposals for changing women's hours rules.

"We always consider such things," Monson said.

He added that a revision of the student guildbook is currently in progress, and said women's hours and other such rules are always examined for possible change at such times.

Student Body President Ray Lenzi has said that a bill on women's hours will be presented to the Student Senate on Wednesday.

Lenzi has announced results of a questionnaire which showed that a majority of women students who are affected by women's hours favor a liberalization of them.

False Fire Alarms Due to Pranksters

An unusual amount of false alarms from both on-campus and off-campus dormitories within the last month have been reported to the Security Office, according to Sgt. Robert Drake.

Sgt. Drake said that the majority of these false alarms have been due to pranks or malfunctions in the system.

Single? Like to Travel? Why not make the whole USA your "office"?

PROCTOR & GAMBLE Will Interview for Field Advertising Management THURS. FEB. 29. Any degree is acceptable

As the company's direct representative you would travel from city to city planning and supervising the distribution of free samples of our products. You would hire your own crews, be responsible for your own payroll, product inventory, and vehicles, and would behave as much as you would if you were running your own business making decisions and solving problems on the spot.

After about a year and a half of travel you would be placed in a permanent position in one of our Marketing Departments and would thereafter be increasingly involved in promotion and merchandising projects carried on by P&G.

When you sign for your interview at the Placement Office, see out 4-page brochure.

I'll look forward to seeing you!

Salukis Victorious
In Showdown With Aces' Reserve Unit

By Dave Palermo

SIU Basketball Coach Jack Hartman wasn’t putting himself out on a limb when he doubted the stability of Evansville’s Arad McCutchan’s two-platoon system preceeding the SIU-ELI game Saturday night. Southern outscored the “Vampire Five” 20-7 in downsizing the Aces, 61-52.

McCutchan, who had stated that his second unit was as talented as the regulars, the- orized that while the starters made the taller and stronger on the boards, the second five is faster and can run the option “ragged.” He had also said that the insertion of a psychological effect on the opposing team and hinder its concentration.

McBride Ties Frosh Record

Tom McBride tied a freshman scoring record Saturday night, but his 37 points were not enough as the SIU freshman team was blasted by Evansville, 95-78.

McBride’s total tied a freshman record set by Walt Frazier during the 1963-64 season. He is also one of 30 of his points in the second half.

McBride hit on 13 of 22 field goal attempts, and 11 of the bench six minutes later after the Aces had trimmed the margin to five, 49-44. He then rebounded the Aces by a decisive 50-32 margin, and outshot them from the floor hitting on 19 of 49 attempts from the field for a .386 percentage. Evansville made good on only 18 of 57 for a lowly .316 percentage.

Hartman attributed the low shooting percentage to the defensive work, “Both teams played a good defensive game,” he said, “The defenses held the offenses down the entire game.”

McBride’s own lesser effort in the second half of the game was one of the reasons the Aces held the advantage. He hit only six of 11 shots from the field for a 54.5 percentage.

The rest of the SIU scorers were balanced with Howard Keene scoring 14, Willie Gibson, 12, and Chuck Benson, 11.

Howard Pratt, Tom Nie- meier and Layne Holmes got 12 for a total of 61 for the Salukis.

In Keene’s last two games as a starter he has hit on 13 of 16 shots from the floor for a .81 percentage.

FRESHMAN CAGER

Reverses Quickly

Roger Wehrenberg, injured in Saturday’s freshman game with Evansville, should be ready for the SIU frosh’s encounter with Kentucky Wesleyan Wednesday night.

Westbrook, a guard, was taken to the SIU Health Serv- ice after sustaining the injury, a possible concussion. He has proved negative, and Freshman Coach Jim Smelser says he thinks Westbrook will be able to play Wednesday.

Westbrook was injured when he fell while attempting to block a layup by the opposing team.

On the contrary, Hartman felt the “Vampire Five” would cause no team that is expecting the second platoon. He also said that the cause of the first loss to the Purple Aces at Evansville earlier in the season was due to “a bad game by the boys” and not the “vampire five.”

Hartman proved the better of the two prophets as the Salukis beat Evansville at the expense of McCutchan’s highly.publicized second unit.

The “vampire five” made its first appearance in the game with 12:29 left to go in the first half and Evansville holding a secure 19-9 lead.

Reserve Roger Guth was promptly foiled by the Garretts. The free throw was good, but the Salukis scored 10 straight points to pull within one point, 20-19, before the Vampire Five made a hasty exit after 4:12 on the court.

The reserves made a second appearance with 2:20 to go in the half and the Purple Aces by two points after the half losing by the same margin, 32-30.

A third appearance came with 13:18 left and Southern leading, 41-40. Again they were ineffective and returned to the bench six minutes later after the Aces had trimmed the margin to five, 49-44.

Hartman rebounded the Aces by a decisive 50-32 margin, and outshot them from the floor hitting on 19 of 49 attempts from the field for a .386 percentage. Evansville made good on only 18 of 57 for a lowly .316 percentage.

Hartman attributed the low shooting percentage to the defensive work, “Both teams played a good defensive game,” he said, “The defenses held the offenses down the entire game.”

McBride’s own lesser effort in the second half of the game was one of the reasons the Aces held the advantage. He hit only six of 11 shots from the field for a 54.5 percentage.

The rest of the SIU scorers were balanced with Howard Keene scoring 14, Willie Gibson, 12, and Chuck Benson, 11.

Howard Pratt, Tom Nie- meier and Layne Holmes got 12 for a total of 61 for the Salukis.

In Keene’s last two games as a starter he has hit on 13 of 16 shots from the floor for a .81 percentage.

Keeper of Requests Return

The Green Carpet used before SIU cage games is missing, and the owners were unclear as to whether or not it returned.

The Carpet, rolled out at all Saluki home basketball games as the team comes from the dressing room, was last seen on Tuesday morning.

It was discovered missing prior to the Evansville game, and a green floor mat was used in its place.

Gymnastics Prep for NCAA
With Weekend Victories

SIU’s Male Gymnastics team continued preparations for the NCAA championships in April with two easy weekend victories.

The Salukis defeated University of Colorado Friday, 190.00 to 182.40, and then out-classed the Air Force Academy Saturday, 190.35 to 167.30.

Two wins marked the first time this season that Saluki gymnasts have reached victory. Paul Mayer won the all-around competition in both meets, scoring totals of 52.65 and 53.00 in the Colorado and Air Force meets.

Mayer was especially effective on the long horse, scoring 49.5 and 50.0 during the meets. He also scored an average of 9.25 in floor exercise and parallel bars.

SIU’s next meet is Friday against Indiana State at Terre Haute. The final meet of the regular season is March 8, at home, against the University of Illinois.

SU’s Male Gymnastics team improved to 6-5 on the season. They are looking to advance to the NCAA championships in April after their wins in the Colorado and Air Force meets.
African Nations Withdraw from Olympics

LONDON (AP) — While Avery Brundage insisted in London Monday that no one country or group of countries can prevent the Summer Olympics from taking place, 32 African nations vowed in the Congo to withdraw from the Mexico Games.

And as Brundage, president of the International Olympic Committee, said he did not expect to call a special general meeting of the IOC to discuss the South Africa controversy, the Italian Olympic Committee called a special meeting on this question.

The IOC had readmitted South Africa to the 1968 Games after barring the country from the 1964 Olympics.

A number of African nations already had announced their intention to boycott the Games, which start Oct. 12, but the Supreme Council for Sports, meeting in Braunschweig, decided that the 32 affiliated countries should take such action.

Russia has not announced any intention it intends to take but has indicated it will support any boycott by the African nations. A Russian boycott could result in other Iron Curtain countries pulling out.

None of these moves and possibilities, however, bother Brundage, the 80-year-old Olympic chief from Chicago.

"No matter what countries withdraw, the Games in Mexico will go on," he told Associated Press after hearing about the African council on Tuesday. "We're not going to be dictated to by politics. The Olympics want the youth of the world to get together. You can be sure the Mexico Olympics will go on as planned."

South Africa was barred in 1962 because of the country's apartheid policies. The Games were reinstated by the IOC after promising to select an integrated team, traveling and living together, similar uniforms and marching under the same flag.

She declined however, to permit competition between whites and nonwhites within South Africa.

"ONE OF SOUTHERN'S MOST UNIQUE AND SELECT ORGANIZATIONS!"
Two Girls to Enter Canadian Competition

By George Knemeyer

SUU will have two women gymnasts participating in the North American Games to be held as Vancouver, British Columbia, Thursday through Saturday.

Donna Schaeffer and Joanne Hashimoto will be the representatives from SUU on the U.S. team. Rounding out the six-member squad will be Linda Mchenry from the Chishampa Gymnastics Club, Kathy Gleason from Buffalo, N.Y., Joyce Taeeck from the Seattle Club, and Debbie Bally of Centenary.

SUU Coach Herb Vogel said Miss Schaeffer and Miss Hashimoto should be physically ready for the Games.

Miss Schaeffer had been suffering from a respiratory infection, but should be close to full strength. Miss Hashimoto still has injured hands from performing on the uneven parallel bars, but Vogel said this should not affect her performance in the Games.

The other teams competing in the Games will be from Canada, Mexico, and Cuba. Both Mexico and Cuba are coached by men from communist block countries.

There will be a total of eight events in the Games, one compulsory routine and one optional routine in each of the four events: floor exercise, vaulting, balance beam and uneven bars.

The U.S. team was picked on the basis of the top six performers in the last year's AAU championships.

Vogel also said that much of the judging will be guided by the recent Madame Villancher Clinic conducted at SUU.

Vogel also pointed out that members of the U.S. team will not be assured of an Olympic berth because of their participation in the Games.

Last year's Games were the first to show that any of the teams' coaches were communist. Just prior to the meet last year, the Mexican coaches were fired and replaced by coaches from Bulgaria and Rumania.

The Games were marred last year by Mexico's extended process for removal of several judges. The English speaking members of the team also stopped from communicating with English speaking members of other teams.

Vogel said that one member of the Cuban team has been involved in an intensive three-year training program.

"This is along the same line that Russia takes relative to the serious impact of sports supremacy on international political affairs," Vogel pointed out.

Trackmen Net Third
In Conference Meet

The first time Dallas Thornton pigeon-toed his way to midcourt at the Owseshore Sportscenter to jump for Kentucky Wesleyan College was on Dec. 4, 1964. Last Saturday night Thornton played his last game at the Sportscenter and responded with 21 points and 10 rebounds in the Panthers' 102-73 victory over Southeast Missouri.

The victory made KWC's record 20-3 going into Wednesday's game with SUU at the Arena.

His point totals have ranged from a low of three against Guelph to a high of 35 against Centre in his freshman year. He has hit in double figures 90 of Wesleyan's 104 games and has played against 57 different teams.

Thornton's present totals are the best of his career. He has hit 49.8 percent from the field and owns a 19.7 scoring average. In the last 12 games his point totals have ranged from 16 to 28.

Coach Bob Daniels, commenting on Thornton's ability on the court, said, "I've never seen a boy that works harder in practice than Thornton does. Practice becomes hard work sometimes, but Dallas always seems to enjoy practice. In fact, he will practice at guard a while, and then while some of the other players are resting, he will practice at forward."

Thornton hopes to continue his basketball career, and several pro teams have indicated an interest in the high-jumping athlete.

Figure ‘Typing’ Aids Clothing Selection

By Cynthia Shaw
Whether you are fat, tall, or short, there can be flair in your wardrobe this spring. For the girl who doesn’t have the “all-American figure” there can still be variety in your closet. Scan the following figures, and find the one which fits you best.

If you are short and thin, or average and thin, you have four of the most exciting dress styles to choose from for spring ‘68. You can change from the flattering empire and smocked-top styles to the very “in” yoked dresses and A-line skimmers. In the area of separates, you should concentrate on one color. You may wish to choose the flared skirts, short jackets, slim, ankle-length pants or cardigan sweater. Your accessories should include the mini bag and small jewelry. Medium heeled shoes and textured over-the-knee stockings are for you this spring. To give your dresses an added dash of color, add a brilliant neck-line scarf or a loose sash belt. So if you are an average junior size, you can wear any style while avoiding extremes (the exaggerated bold, tall girl styles). Remember dark colors create an illusion of slenderness and light bright colors create an illusion of weight.

If you are short and heavy or overweight and a junior size, your wardrobe should include strong vertical lines and medium color values. V-necks, whether in sweaters or in dresses, are avoided to eliminate the “cute” effect. Because you are tall and thin, you can wear the heavy fabrics and bright colors that are bad for other types. Your accessories may include large bags and enormous hats for sunny days on the beach. Your summer cannot be complete without a pair of bell-bottom pants or a snappy double-breasted jacket for sailing. The fashion world is a fascinating adventure in good taste and selections, but taste, and good taste, do not happen overnight. Experimenting in what looks best on you is just a beginning. Not all of today’s fashions are for everyone. Only the fortunate few (Audrey Hepburn, Suzy Parker, Jean Shrimpton and Julie Christie) can wear from the extreme to the conservative styles. There is a right look for you so swing into spring with your fashion type and look great in ‘68.

Let Spring bring out the
capezio in you!

Variety of Influences Determines Carbondale Stores' Stock

Decisions by Carbondale merchants about clothing styles featured in their stores and the result of a variety of influences.

Warren Casey, assistant manager of Zwick Men's Store, said the two greatest influences in his store's style decisions include trips to the Men's Annual Clothing Show held in St. Louis, and salesmen.

Casey said that salesmen who visit various areas of the country inform merchants of the upcoming styles and fashions.

Consumer demand, Casey added, also influences the style of clothing carried. Both men's magazines and manufacturer's pamphlets enter the decision making process of the store, Casey added.

Julius Kay, owner of Kay's Men's Campus Shop, said that he gets an overwhelming number of influences that enter into the decision making process. Once the influences are analyzed, consumer demand is the greatest concern for Kay.

Kay stressed that his personal judgment of what are the best styles entered into the decision making process. He tries to keep a flexible wardrobe for different occasions.

New clothing arrivals that have appeared on campus this year have been brought by those who love clothes.

The person who is best dressed on campus is the one who never stops shopping. He is the one whose tastes run in several different directions to provide a flexible wardrobe for different occasions.

This year's styles on campus featured twills, window pane checks, bold plaids, military-look outerwear, patterned slacks and turtleneck sweaters.

Turtlenecks are in style for themselves this year. Men's fashions generally run in cycles and the turtleneck sweater and dixie have proven that this year.

The flair of fashion is not in the hands of any one group. Styles are set by those spirited individuals who make dressing a hobby.

We're living proof it really works!

Double-Breasted Jackets Revived This Spring

Men's formal fashions this season have made room for individuality with emphasis on colors, stripes and the revival of double-breasted jackets.

Dinner jackets this season are featuring vertical, light-grounded stripes worn with coordinated slacks. The conventional black, white and standard solid colored jackets are also still popular.

Back this season are dinner jackets featuring the popular classic Batik prints. After Six offers Batik primed jackets in combinations of blues, red and black, blue and black and blue and green.

Also new this season are white slacks, made to be worn with the colorful dinner jackets. After Six offers them made of 55 per cent Dacron polyester and 45 per cent wool, trimmed with compatible cording.

Baggy Surfer Style Swim Trunks
To Make Style Scene This Spring

Loud colored-boxer-styled swimming trunks will be the going thing this spring, according to the Carbondale clothing merchants. Loose-fitting trunks with quick dry material is also a part of the coming styles.

The "brief" style trunks will give over to what is called the "baggy surfer" style. The swimming trunks in style for this summer will come with belts and will be loose fitting, with more leg-ventilation single-breasted and the newly revived double-breasted dinner jackets. Most popular in jacket styling this season are shawl collars with natural shoulders and trim lines. The new jackets have straight flap pockets and center vents. For the less conservative taste, styling may include peaked lapels, traced waists and deep side vents. Fabrics used in the new formal fashions this season include pure cotton (some imported), Rayon and silk mixtures and blends of Mohair and cotton-Arnel.

They're "Clear Sailing" into Spring

We take the initiative. That's part of the difference. An insatiable quest for the fine work of art among hundreds of clothing producers is the "name of the game" to us. Our recent addition, to further our scope, has enabled us to do what we've long wanted to do. Now in our international search for fashion, we can bring home to women (as well as to men) the quality, just right creations of the small, specialized establishments that tailor fine clothing for men and women. We enjoy a unique access to these people. "Tight ship" that we are, we'll go anywhere for something that you would prefer. (Just to please the "Captain" and the "Fairest people in town")

Goldsmith's

(both in the same store)
"Classic" Describes Men’s Jackets

Men's jackets for spring will feature the classic look, that is, good clean lines, with a lot of style done in good taste, according to Steve Goldsmith, of Goldsmith's Men's Store. Jerry Wicker, of Sohn's Men's Store, said that lightweight dacron and cotton fabric golf style jackets will be in this spring. The golf jacket is unlined, and the styling features include a pleated back, double button tab collar, and elasticized waist.

Based on sales estimates, the London Fog jacket will be the most popular style on the college campus. It features a full-length zipper front, tab collar, and is unlined, Goldsmith said.

Baseball warm-ups, with front closing snaps and blast jackets, a type of pull-over windbreaker with a three quarter length zipper and knit collar and cuffs are also predicted to be big sellers this spring.

Many of the new raincoats will be styled after the trenchcoat, but will be single-breasted, with full belts, epaulets, and slash pockets. The colors will be vicuna, ivory, sand, oyster, and white, Goldsmith said that the best selling fabrics in men's jackets will be nylon and a mixture of dacron and cotton, with the most popular colors being british tan, navy, and yellow. He added that none of the leading spring styles will be reversible, however.
Color to Dominate Men's Sportcoats Fashion

What will the fashion-conscious man be looking for when purchasing sportcoats for the spring and summer? If the answer had to be summed up in one word, that word would be color.

From subdued plaids to neon solids, color in men's sportcoats will span the spectrum. Definitely keyed to a man's weekend and leisure moods, the colors will include "hot" oranges, reds, and lemons as well as toned-down coordinated patterns.

Jerry Wicker, a salesman for Zwick's, puts it another way, "Sportcoats are definitely going to start looking like sportcoats," Wicker asserts. "They're breaking away from the traditional trend they'd been in."

"The bold plaids first introduced last year should be very big again in '68, with even more colors and patterns to choose from. Solid-colored coats and blazers will have a wider and wilder range of colors, too," Wicker said.

Wicker also noted the style changes which will accompany this color "revolution," "The fitted sportcoat and blazer will be the most noticeable change. Suppressed waists and natural shoulders will reach new heights of popularity during the spring and summer," he predicted.

Dave Moore, a salesman for Zwick's, also forecasts a "bright breakaway from tradition," in both colors and styles. He does not feel that double-breasted sportcoats will reach their maximum popularity until the fall, but is optimistic about other trends.

"For one thing, you'll be seeing many more turtleneck shirts being worn with sportcoats," Moore said. "This will be a natural result of the more casual look in sportcoats."

Don Haage, of the Squire Shop Ltd., feels the pace in sportcoats will be set in three definite areas. "Bold glens, new solids, and stripes will lead the way," Haage said. "Above all," he feels, "the emphasis will be on color coordination (with pants, shirts, etc.), to achieve a smarter total turnout."

Haage feels that the most popular response will be for both "high fashion" rather than "high style" in sportcoats. "The difference between the two," he explains, "is that high style refers to the extreme end of the line, like the mandarins or really bright-colored jackets. "High fashion, on the other hand, combines a little of both style trend and tradition. You can get much better coordination of compatible colors when you strive for high fashion," Haage feels.

Male Topcoats Lean Toward Way of 'Dodo'

Men's topcoats are going the way of the Dodo. A check of clothing stores in the Carbondale area reveals that the trend is toward all-weather coats in the three-quarter length style. The reason for the decline in popularity of topcoats is that they are too conservative in colors, and all-weather coats are just as warm and less expensive.

There have been a few modifications in the topcoat. Labels are moving from the traditional military style to a more rounded lapel. Lengths have been shortened, striking the top of the knee.

Topcoats are moving toward one and two button models and away from the traditional three button.

Some models come with cuffed sleeves while others have just a notch at the sleeve. The square and slant pockets have been retained.

Colors remain dark with some plaids making an appearance, but this change hasn't fully increased sales.

Men prefer the brighter colors of the all-weather coat which can be purchased in Sta-Prest and double breasted models. Unlined designs can come up with a revitalized version, the battle of the coats will go to the all-weather ones, and topcoats will be a thing of the past.

For Men's Fashions

**Bright Colors, Varied Patterns Predicted**

Brighter colors and a variety of new patterns will characterize men's fashions in summer '68, according to Steve Goldsmith of Zwick & Goldsmith's.

"Knit shirts will be the leader," said Goldsmith. He named crew-necks, turtle-necks and mock turtle-necks as the styles likely to be popular this summer. Besides new patterns and brighter colors, the shirts will be characterized by stripes of varying widths.

Perma-shirts for men will display lighter and brighter colors, new patterns and more variety of texture, said Goldsmith.

Texture will be more prominent in trousers this summer, with twills and houndstooth being the fashion. There will be a variety of plaids in trousers as well, according to Goldsmith.

Moving from sport to dress clothes for summer, Goldsmith emphasized that there would be a lot of new patterns and color in dress shirts as well as sport shirts. The button-down collar will dominate, with the tuxedo collar, which is the same length without buttons, also being popular.

Goldsmith said the single stripe is out, with frame stripings of various color combinations and widths taking the lead. The backgrounds will be of brighter and more intense colors.

Following the general trend, sport coats and suits will display a variety of textures and brighter colors, said Goldsmith. Many natural-shouldered models in sport and suit coats will be available. Both two and three-buttoned models, with single and double vents, will be fashionable.

Synthetics at Their Height

Men’s Wear Takes Wrinkle-Free Twist

Men’s wear fabrics have taken on a new twist for the year—a twist that will not leave a wrinkle.

Synthetics appear to be at their height this year, with the accent on easy, wrinkle-free living. A man can completely outfit himself in clothes with a permanent press—everything from formal outer wear to “easy care underwear.”

Most local Carbondale clothiers carry a complete line of these new easy care clothes for men in a variety of patterns and styles. And like all other perma-press stuff it’s great.

It appears that men can now be dressed head to toe in wrinkle-free comfort. Hats will survive the blow of a karate champ and spring back into shape, and men can rest assured that they will never again have to iron their underwear.

Steve Goldsmith said that permanent press underwear may be “just a gimmick, but most men now have gone on to these new easy care fabrics.”

Shirts and pants both for dress or casual wear have taken to “easy-care” fabrics. “The majority of shirtmakers have gone to perma-press,” says David Moore, of Zwick’s, “but some people are dissatisfied since perma-press fabrics can’t be starched.”

Many of the makers of casual wear have added more to the “easy-care” factor in clothing. According to Roy Renfro, “engineer” of the Care-free, “not only have some people come out with stea-perst materials, but they have also included some materials that have a resistance to some stains, or allow a stain to be easily washed from a fabric.

The only new material, not under patent by any other corporation, is Trivera fiber, which has been nationally advertised in the leading fashion retailing magazine. Men’s Wear, a clothier’s trade publication, said that polyester fabrics will capture 55 per cent of the market, making “fashion without fuss.”

Coats Becoming Ensembles Pieces
Sporting Bright Color for Spring

Coats this spring will be worn as parts of ensembles rather than as separate articles of clothing, according to Samantha S. Ridley, instructor in the Department of Clothing and Textiles.

Both Mrs. Ridley and Thelma H. Berry, associate professor in the same department, predicted a return to the waistline in spring coats.

"Waistlines are very experimental now," Mrs. Ridley said, "but most coats will have a natural break at the waistline while retaining the A line skirt already popular."

"Coats worn in the United States this spring," Mrs. Ridley said, "will follow simple lines and emphasize patterns and stripes. The so-called pastel colors will be brightened, and we will see a lot of bright horizontal awning-type stripes."

Mrs. Berry sees an overall trend toward "monochromatic and played-down colors, a lot of subtle colors put together. While we have fashion leadership in New York," she said, "American designers attend showings in Paris and Italy. Styles shown in Europe take some time to appear in America."

Trend Moves
To Wide Ties, Turtlenecks

The most current trend in men's neckwear has been the switch from "skinny" ties to wide ties. The wide tie has come into the fashion trend with the production of the "mod" look.

Three years ago the "skinny" tie was in. Now wider ties are predominant. The wider ties come in a variety of colors, which adds to their popularity.

With the entrance of wide ties the use of tie clasps has been lessened considerably.

The popularity of the wide tie is credited to the new "mod look" prevailing in the country, due to the clothes being worn by the rock and roll groups. The rock and roll groups affect the fashion trends much more than any other basic group in today's society.

The other major change has been the popularity of the turtleneck. This has been around for a number of years but has had highs and lows. Last year the turtleneck was very popular but then subsided. Use is limited to V-neck sweaters. The boys buy the turtleneck to match the color of their sweaters. This has become a popular trend.

Hair Pieces Gain in Popularity

Powdered wigs were once an important complement to the fashionable man or woman in early England. Today wigs are once again fashionable. A devotee of the wig, the fall, has become popular among young women all over the country, including several SIU coeds.

There are three types of falls: human hair, animal hair, and synthetic hair. The manager of Model Beauty Supply Company, Inc., Neil Stein, said the human hair fall is the best a woman can buy. "The purpose of any hair piece," he said, "is its cosmetic value to any lady who_ buys it." Stein feels the human hair piece is more becoming because it is the most natural of the three types and because it is very fine in texture. His company carries nothing but human hair falls.

Several factors influence the quality of a fall, Stein said. The quality of the foundation or the manner in which the fall is constructed is important. Egyptian cotton, a fine grade of cotton, is a good foundation base. Also important is how the fall is put together. Some are machine made, others are hand made, and some are root turned where the hair is placed on the foundation with the cuticle on the hair facing the same direction in which the hair grows.

Sandy Curtis, a sophomore from Springfield whose major is social studies, has a synthetic hair fall. She said, "I like it. They are fun to wear—it kind of changes your personality and makes you feel good."

Lynne Kornak, a freshman from Chicago, chose a human hair fall because "I thought it was the best quality and it would give me better service. It was the best quality I could get for the price."

On Campus the "in" look for spring continues more bold, chunky, and even squarer. This look being accented by brighter colors.

For casual wear, both men and women will be seen in new and more different looking sandals being decorated with hardware such as buckles, studs, and chains.

HASPEL PRESENTS TWILLRAY—A GREAT NEW LIGHT WEIGHT LOOK FOR '68

A' College Avenue RR Crossing
Little Girls Imitate Mothers’ Garments

It may come as a shock to many, but girls under 10 are just as concerned about the fashions as their mothers. These future “Miss Teen-agers” are wearing garter belts to hold up their color-coordinated stockings and panty girdles to hold in their mini-skirt figures.

“It is really surprising how style conscious these little girls are that come in here,” Pat Koscher, manager of The Young In Shop at 606 S. Illinois St., said.

“Since this is a college town, the little toots want to dress just like the college kids, especially the girls,” she added.

“The order really amazed me when it came in,” Mrs. Koscher admitted as she displayed the garter belt and panty girdle which are miniature replicas of women’s garter and panty apparel.

“The garter belt or the girdle, which has garters on the ends, holds up the knee socks which are very common among the girls’ fashions. Tights are also still in,” she added.

“Boys’ fashions stay basically the same,” Mrs. Koscher said. “Boys, as well as girls, are wearing a lot of sweat shirts. However, the styles are ‘louder’ than usual,” she added, displaying a boy’s multi-colored vertical striped sport jacket.

The spring fashions, which have just arrived at The Young In Shop, seem to follow the trend of the changing length in adult women’s styles.

“Girls’ dresses, which are longer, are going back to the ‘belted look’, ” Mrs. Koscher explained. “Actually, everything is play clothes this year. Coordinates and slim fitted pant sets are what they’ll be wearing a lot of,” she added. Baby fashions tend to remain the same, Mrs. Koscher said, “Infants are still wearing ‘jamakins’ which are the one-piece stretched outfits for sleep and street wear.”

“Well, these babies will only have to wait about seven years before they’ll become as style conscious as we adults are,” Mrs. Koscher added.

Soft Colors Reflect Trend
In Women’s Spring Coats

Tortoise-shell trim wide belts, bands and sashes, and soft colors reflect the trend toward femininity in spring coats, according to Betty Miller, of B. Miller’s in Carbondale.

Modified A-line skirts and definite waistlines characterize the new coats. Many have high waistlines; others the waists are dropped.

“The San Francisco market is flooded,” Mrs. Miller said, “with blues, black, brown, gray, bone and a wide variety of pastels ranging from yellow to raspberry.” Although she saw a few stripes and plaids, she feels solid colors are more complimentary to intricately trimmed outfits.

Mary Hall, manager of the House of Millhunst, said that many of the spring coats shown in Chicago and St. Louis have large plaids or checks, most in navy and white or brown and white.

She cites the growing use of trameasonal materials, such as bonded knit, as an example of the practicality of the new coats. Dirndl, wool and cotton treated fabrics with a stain-repellent finish are popular for coats this year.

Audrey Gasaway, a salesclerk at Bleyer’s, pointed out the trend toward wearing a coat as part of an ensemble. Many coats have matching dresses, slacks and skirts. Umbrellas and boots are being made in colors to match the new raincoats.

Color Spotlights Hunt Styles

The affluent American outdoor sportsman is becoming increasingly better and more fashionably dressed, according to Art Reid, area sportsman and outdoor writer.

The days of blue jeans and a red hat are gone, Reid said. The well dressed sportsman today wears vests and jackets of fluorescent red, orange or yellow.

"They are required by Illinois law for any hunter that would be using high power rifles," he said.

The fluorescent colors provide increased visibility, he explained. "Sometimes you can see the colors at a distance of two or three miles."

One of the trends today is toward increasing use of camouflage. Complete outfits including hats and helmets are commonly used, he said.

"They use camouflage in hunting sports that require being hidden from the game in which it can be done safely," he explained.

But camouflage suits are not restricted to greens and browns. Fluorescent red, orange, yellow and brown patterns are also used, he said.

"Most game, especially deer, are color blind," Reid explained. "The fluorescent colors make the hunter stand out only slightly. Other men can see the hunter but the game cannot."

Sportswear is also becoming more practical, Reid continued.

"There is a definite trend toward down-filled clothing," he said. "These are worn by semi-dormant people such as duck and goose hunters who have to sit in blinds."

The one drawback to the down-filled clothing is cost, Reid said. But they are "difiinitely worth the cost," he concluded.

These same hunters are now using socks and gloves heated electrically by batteries, he added. This is a recent innovation of the last couple years that is now starting to catch on, he said.

Other innovations include leather or flexible plastic pants for hunters to fight the brush, boots designed for long walking, and special jackets for fishermen, and duck and goose hunters.

Reid feels there is more variety in sportswear today. "They cater to every type."

Comfort, Color, Keynote Trend
In Shoe Styles

Color, comfort, and construction keynote the trend in women's shoe fashion, according to the merchants in the Carbondale shoe salons.

The word for spring is color, said Gary McClintock, assistant manager of Brown's shoe store. The citrus colors, that is yellow, orange, and green on plain shoes with snap on ornaments are the style this spring. The snap on ornaments provide versatility, he added. Any semblance of a pointed toe is out, and the small sturdy heels are in, McClintock picked Park Avenue brown, trimmed in white, as another potential big seller.

Jim Chambers and Bob Beach, salesmen for Lude's, confirmed the prediction of bright colors and blockier heels. They pointed out the appearance of the wall toe, described as a raised toe like a wall at the tip of the shoe. Bows and buckles attached to the shoes characterized their stock.

In addition, Jim Moore, manager of Zwick's, and his brother Dave Moore, a student salesman, stressed the importance of color combinations, peppermint stripes being one of the biggest. A consensus held that sandals will be the place of tennis shoes and soft colored loafers this spring. They are more comfortable and cooler, McClintock predicted more sandals than ever this year. Some of the "barefoot jobs" are only $4 to $6, he said. The Moores emphasized the big, heavy look in sandals. Some of the sandals will have a sole and heel as heavy as a sturdy pair of loafers, they said. Very simple strap colored sandals are popular and the buffalo sandal is back, they added.

McClintock called the squaw moccasin "the biggest thing in the store right now." The Moccasins characterized them, however, as a passing fad.

**Color to Dominate Men’s Sportcoat Fashions**

Designers set the trend in fashions. Fashion in sportswear for women this year will see the introduction of the pant skirt, the return of the pant dress, the over-popular shorts and slacks, and the gradual comeback of one-piece swimming suits.

The pant-skirt is something new for the year. They are of bermuda length and are made in the same manner as the pant dress. The pant dress will also be back this year and is expected to be as popular as last.

The idea of the pant dress this year comes because of the fact that the dress is actually made like a pair of pants or shorts. Different styles and variations may be seen. Some have jumpers beneath the dress; the buyer may want to wear each piece separately. Others are ruffled around the bottom portion of the dress. A slight variation of the pant dress is the knit scooter dress which resembles a child’s play suit. The culotte is comparable to the pant dress and is usually made out of cotton or gabardine. Mrs. Hazel Hodge, one of the owners of The Famous, believes the culotte will be popular once again this year.

Mrs. Hodge and Mrs. Mae Tucker, a buyer-merchant diser for Bleyers Department Store, both agree that red, white and blue are primary colors for sportswear this year. The pastel shades of pink, aqua and yellow will also be seen. Mrs. Kay, of Kay’s Campus Shop, commented that gray is a surprise color for spring. Gray, she said, is usually a fall color, but this year it will be worn in spring also. Brown is also another surprise color.

The nautilus look will come into popularity once again. The emphasis seems to be on plaids and stripes, but the dependable solid color follows closely.

Co-ordinated short, slack, shirt and jacket sets will be prevalent. Koratron treated materials are becoming increasingly popular, according to Mrs. Hodge and Mrs. Tucker. Mrs. Tucker mentioned the existence of terrycloth short sets which have already sold well. Another new material which has been introduced by one clothing house is shantung stretch, which gives the appearance of being expensive material.

Short sets are always popular during the summer months. They come in three lengths: bermuda, which is almost knee length; Jamaica, which is mid-length; and short shorts. Matching tops come in a variety of styles, including stand necks, v-necks, mock-turtle necks and the regular round neck. Something new will be a lighter version of the fisherman knit which was popular this winter. It comes in short or long sleeves and will be seen in neutral colors.

The style in swimwear is going to change somewhat, Mrs. Hodge said the one-piece suit is coming back very strong, with a tendency to be more covered. Mrs. Tucker agreed, adding two-piece suits won’t be as brief. She pointed out the trend toward two-piece suits made to look like one. Mrs. Kay noted the importance of the two-piece suits, however; she believes bikinis are still number one with college girls.

The suits will come in a wide variety of colors and patterns as has been the case in past years. The swim suit is made out of cotton and knits, Mrs. Tucker said a number of high school and college girls buy the cotton suit because it is less expensive.

**Still Best Sellers**

**In Men’s Shoes**

True or false—It is difficult to find a good pair of men’s shoes in Carbondale, False. Carbondale has three stores specializing in men’s shoes. A check of these stores reveals a range of styles and brands comparable to that of most large metropolitan areas.

The best selling styles in Carbondale are the penny loafer, wingtip and square toe. Coming back into style is the saddle oxford. This spring the sandal will be the “in” shoe, according to Carbondale merchants.

Prices for men’s shoes in Carbondale range from $8 to $38. Most of the popular shoes cost from $13 to $20.

According to Mr. Jack Ridley, an instructor in the Department of Clothing and Textiles, there is really nothing new in shoe styles. The sandals, moccasins, boots and loafers have all been around for thousands of years. There have been only slight changes in shape.

While the design of the shoe remains much the same, the material it is made from is starting to change. Mrs. Ridley said that new materials, such as Cortem, are beginning to challenge leather’s dominant position in the shoe industry. While some of these new materials are successful, Mrs. Ridley said, leather is still the best for shoes.

One way of checking the quality of shoes is by checking the welt—the place where the top of the shoe is stapled and glued to the sole. Sometimes in a cheaper shoe, Mrs. Ridley said, this connection is pulled apart or cut.
