Official sees cutbacks if tax increase is denied

By Philip Florio
Staff Writer

SIU-C may face a budget cut of $13 to $18 million for the 1983-84 fiscal year if Gov. James Thompson's tax increase doesn't pass through the Legislature, a University official said Wednesday night.

If there is no tax increase and no increase in resources for the state, the governor will recommend a budget cut of $10 million for higher education, Vice Chancellor James Brown said at the Graduate Student Council meeting in the Student Center.

This would include a proposed cut somewhere around $13 million for SIU-C.

A tuition increase of 18 percent recommended by the Illinois Board of Higher Education would provide $6 million, and if the University cut operating expenses it could save $3.8 million, Brown said.

"But that's pretty far away," he said.

The task of dealing with this cut will be handled several ways, Brown said: The University could impose additional staff cutbacks, such as dismissing staff members, improving efficiency in the schools, or decreasing salaries, he said.

Tuition could also be raised more than 10 percent.

Brown said he was sure a furlough and a salary decrease would affect "everybody," including the faculty, staff and administration if the University increased tuition 25 percent as it did cut about $18 million.

"We would have to maintain the institution and would have to make a choice of what mix to use to solve the problem," Brown said.

"We'd examine the logical arguments -- the idea of a furlough or layoff -- to see if they are any results," Brown said. "I hope nothing more drastic than a furlough happens, but if it does, we will have to make that decision." Brown said that something more drastic than a furlough would involve a tuition increase.

"Suppose we have to increase tuition by $500 more or 60 percent a year. Two percent on two occasions could result," he said.

"First of all, the people new coming to school would not be able to afford to go to school. This would make us an elitist institution." Brown said.

The other consequence, Brown said, would be that the University "could go under."
By Terry Levecke Staff Writer

The "dangerous" winding road that leads to Lake Kinkaid and Lake Murphyrubush west of Murphysboro is an accident waiting to happen, according to a local school district. The most hazardous section of the road is around the curves and bridge at the bottom of the hill, where a turnoff to Lake Kinkaid spillway is located. The widening is in the interest of serving the public best, said Carl DeWitt, IDOT District Maintenance Engineer.

But the project will mean the loss of a historical marker and scenic overlook that has been on the Jackson County Historical Society's list of historic sites for many years. "We think it is a tourist attraction," said society president Cliff Swafford. "It is the only spot with a view of that valley."

IDOT decided to eliminate the overlook in order to spend the money on more useful projects, DeWitt said. The department is on a 12-hour budget for the project and had to decide "the best way to spend the money." The department is not satisfied with the level of upkeep it has been able to provide for the site. DeWitt said. In addition, there is no parking at the site, an item maintenance of the site takes away from other pothole-filling or grading work.

Swafford said the society had nothing to do with the decision, and is stuck with deciding where to put the historical marker. "We are trying to find a location to put the marker. We thought the highway gives them a good excuse to eliminate it," Swafford said.

If construction starts before a relocation site is found, the department will store the marker and erect it at a new site when it is determined.

Levecke reported a study on the use of the site in October 1982. During a 12-hour period on a Friday, 63 vehicles used the site, 22 of which were state vehicles turning around. Of the 40 remaining cars, 70 people observed the overlook or read the historical marker.

DeWitt said he hopes a location can be found for the historical marker where more people will see it.

"We would like to provide something safe and clean for the public, but we can't do that without spending a considerable amount of money," DeWitt said.

State voters squelch tax increase

Voters were stingy this week in rejecting property taxes for schools, defeating 75 percent of proposed local hikes statewide and officials blamed Gov. James R. Thompson's call for higher state taxes for the loss of much of their tax base.

"Any discussion of higher taxes at the state level, at a time local school districts are seeking more money from property taxes, is not helpful," one local tax proponent, said Cheryl Tucker, business manager for schools in Lake Zurich.

"A voter may be going to vote `yes,' and then, my golly, the governor comes out and says now they (voters) are going to pay less income, liquor and other tax," Tucker said. "That can easily turn that person into a `no' vote, because the property tax is the only tax they have control over."

Lake Zurich voters Tuesday rejected a 14-cent $19,500 school property tax increase proposal -- the largest of 99 school tax issues on ballots in 25 elementary districts across the state.

Ironically, Illinois' education community had most strenuously urged Thompson to support an income tax hike to bail out cash-starved schools. Thompson has cut elementary and secondary education financing by about $6 million this school year from last year's level. Virtually all the local school officials interviewed said they have slashed their budgets to the bones.
New name for GSC includes a ‘P’

by Phillip Fiorini

Staff Writer

The Graduate Student Council is no longer.

The council Wednesday night changed its name to the Graduate and Professional Student Council in its meeting in the Student Center.

President Ann Greesly said the new name reflects the solidarity of graduate and professional students on the council and their commitment to serve all the students in their constituency.

Councilmember Frank Lynch, a law student, said the new name is more practical and appropriate because the council responds to all on- and off-campus interests.

The GPSC announced that it will hold its election for officers April 6.

The election bylaws state the election will be held no later than April 15 of a given year and the council must decide the date no later than March 1. Wednesday night’s meeting was the last GPSC meeting before that date.

A resolution opposing any increases in the origination fee and any changes in the eligibility standard for the Guaranteed Student Loan Program was passed by the council.

The Reagan administration has proposed substantial changes in the Guaranteed Student Loan Program affecting changes in the Guaranteed Student Loan Program affecting graduate and professional students exclusively, according to the council.

Greesly said this proposal involves an increase of 5% to 10 percent for graduate and professional students only.

The council decided to have its Executive Committee look into the most appropriate means to express the GPSC’s opposition to Reagan’s proposal.

In other business, the GPSC passed a resolution supporting the efforts of the Halloween Core Committee, which consists of student, business and merchant representatives.

The HCC was formed with the primary goal of enhancing the health and safety of participants in the Halloween celebration through investigation of crowd control problems and emergency vehicle access to South Illinois Avenue.

SUI-C students are represented on the HCC by Greesly and Mike Stagner, a USO senator.

The council tabled a resolution supporting Gov. James Thompson’s proposed tax increase. The council, which was concerned that revenues generated from a tax increase might not be changed to higher education, decided to look into the proposal further before taking a stand on it.

The appeal for additional pledges and add members like John Jay Iselin, president of WNET-13, and a letter to members, “we may have to cut back on the variety and quality of our programming.”

And that would affect every station in the system. WNET and WGBH in Boston stations.

Producing station for 8 pm to 9 pm shows, Channel 13 and public TV cries, “Ouch!”

The appeal for additional pledges and add members like John Jay Iselin, president of WNET-13, and a letter to members, “we may have to cut back on the variety and quality of our programming.”

“We need to pay for that money to do the job,” Iselin says. “In the past, we could go into a project anticipating success.”

No longer, he says. “Clearly, in an economy that is not expanding,” Iselin says. “Civilization and the Jews,” a six-hour series, almost certainly will be completed. About $5 million of the project has been covered, and Iselin says he expects to have the rest—from foundation and corporate underwriters—before long.

**Forming black party for election would give blacks voice in USO**

Attention all black students: Remember, the new Undergraduate Student Organization is upcoming. The leadership positions will be held by black students only. Those who will control the USO. Control of the USO means the allocation of funds to projects sponsored by the Black Affairs Council (BAC). With talk of cutting budgets, black students should realize that their current organization will receive the first and largest of these cuts—better known as the black Caucus.

Newly elected black Caucus, however, will not be any better. The black Caucus will only be able to continue to control the black students, they should look into account the financial problems of Southern—It's the way it should be.

**C'dale bars should clean up their act**

Heaney Andrew Herrmann!

Young fella on campus is actually showed a good amount of wit and common sense, sorry-to-say truth about a few "tarn" issues at SIU-C.

One in particular that I would like to comment on—CLEANSEATS! Wake up Carbondale natives—the outcome is a pittance of a car owner. Black plumbing is the new invention of the 80's. Yes, you heard it correctly, black plumbing is necessary in order to save the black community. The BAC should act as any other black organization and look into the black community's interest. Cleanseats are a typical, bad idea.

And what about the feed-up owners of respectable neighboring barber shops?? They own the strongholds of the barbering of working against them. Their local black neighborhood, Peter. Peter's supporters say that he was convicted of murdering two FBI agents with no proper evidence. They accuse the FBI of meddling in his case because they wanted to get rid of Peter, who was known as an avid supporter of the American Indian Movement which has attempted to bring the industrialized tribal lands and properties.

**James Watt? He's a nice man**

By Belinda Edmiston

I REALLY admire Interior Secretary James Watt. He is not one of those dull administrators who utter drivel and drivel. Whenever he says something, it is true original (to say the least) and is really interesting, intellectual.

The Interior Secretary has done it again. He has done it with a lively commentary on the bad habits of American Indians. In this interview broadcast over an Oklahoma-based TV network, Watt calls Indian reservations an example of the failure of socialism because it is
determined by someone else. All like to be nice and my opinion of him is not the question.

Watt says he wants to see more Indians buying into the American way of life. Indians are not doing this because they are not interested in Indian movement. The government is helping the Indians too much. The recent governmental action is showing this to be true, with no federal funding in sight. Watt, in an attempt to help the Indians, suggests they would pay higher prices to support Indian industries.

Naturally Indians were up in arms. Watt is a nice man, but I cannot understand why. The government is helping the Indians to be true. After all, Watt is the chief protector of the Indians, has been the chief protector of the Bureau of Indian Affairs, an Indian sympathetic, he can only be looking out for the Indians' best interests. Right.

**Opinion & Commentary**

Signed articles, including letters, Viewpoints and other commentaries, reflect the opinions of their authors only. Unsigned editorials represent the consensus of the Daily Egyptian staff. The opinions expressed in Viewpoints are written by the views of the editor-in-chief, the managing editor and the senior editors. Undergraduates and other members of the USI community, as well as students, staff, faculty, alumni and others with a special interest in the University, are invited to submit unsigned editorials. Letters to the editor should be no more than 250 words. Letters of 250 words or fewer will be given preference for publication. Viewpoints and letters are edited for clarity and length by the Daily Egyptian’s Policy and Reviews Board and will only be 250 words or fewer in length.

**Winning nice, savings better**

THE FACT that the SIUC men’s basketball team loses more often than it wins is no news to any of the students, faculty, staff or sports fans here around town. Here are winners and losers in every game and, unfortunately, the Salukis appear to be the losers in this year’s Missouri Valley Conference basketball race.

But as SIUC’s “C” Conference basketball season stands on the verge of another win, because it fields a so-so men’s basketball team no better any better because it is an efficient team and the fact that it can win do not hold water. Though there’s no way that this season’s Salukis are as good as last year’s, they would probably never have even come close to competing with some of the players of the 1979 team. But, if in the well-known facts that higher education funding in Illinois is in sad shape, it is disturbing to read that athletics department funding has been cut and may be even cut more for recruiting basketball players. It is also troubling to read that Bruce Sterk, SIUC vice president for student affairs and athletics administration, says SIUC doesn’t want to be just competitive. I want us to dominate."

**Winning nice, savings better**

BY VIRGIL

IT’S hard to believe, but the Mendel Library is not that big, although it stands as the largest of its kind in the United States. While actual figures are difficult to get from other libraries in the MVC, it is widely accepted that the median of the 1979-80 academic year is about 50,000 books. The median is about 60,000 with the top schools spending nearly $100,000 for recruiting. The thought is that money spent is congruent with the number of books in the library.

But would money spent on sports be money well spent? With all of the units of the University being asked to cut budgets, faculty raises being delayed, with hiring freezes in the making, it has fundamentally right to even consider spending more on sports. No.

**Letters**

**Forming black party for election would give blacks voice in USO**

Griping and growing at House of Glass

By Christopher Kade
Staff Writer

The House of Glass, so called because it doesn't have the iron bars of a regular prison, has been in Carbondale since 1979. It is one of 10 "work-release" facilities in Illinois run by the Department of Corrections, which provides it a budget of $600,000 for a staff of 18, food, transportation and maintenance costs.

Its residents are mostly from nearby prisons, such as those in Vienna and Menard, are mostly young and, with a few exceptions, are serving short prison sentences for crimes like burglary and theft.

All of the residents applied for the opportunity to transfer to Carbondale - an opportunity that provides them restricted periods of leave from the center, dependent on good behavior, and possibilities for jobs and education.

Of its 42 residents, eight hold paying jobs. Seven are going to college full-time, six at SIU-C, one at John A Logan. Eight are studying for GED exams at the Evaluation and Developmental Training Center. Six hold non-paying public service jobs.

Residents are rewarded for $2.40 an hour with the Department of Conservation. Five are employed in jobs at the House of Glass.

During their stay at the House of Glass, the residents progress through a four-stage "level system."

Level 1 is an orientation level and can last from 30 days to six months. During this time, they are allowed one staff-supervised shopping trip, two staff-supervised recreational outings and, finally, one six-hour period of IRT, or in dependent release time.

Level 2 lasts at least an additional 60 days. In this level, they are allowed a total of three three-day leaves and six hours of IRT per week.

Level 3 cannot be attained until at least 90 days have gone by and provided the resident has had no major disciplinary infractions for 30 days. The resident is then allowed three three-day leave that month and 12 hours IRT per week.

Level 4, the final stage, requires that residents be involved for 60 days in employment, a training program or educational opportunity and that they have had no disciplinary infractions for 45 days.

Residents are prohibited from driving during their time on the outside. A late arrival from a trip out is considered a serious infraction. For the first offense, residents are also prohibited from using alcohol and drugs.

According to Supervisor Howard Saver's figures, 28 percent of the men who arrive at the center do not complete the four-stage process leading to release, and are sent back to the institutions from which they came.

Offenses that he said "almost automatically" lead to sending a resident back include escape, performing a new crime, assault or serious intent to assault a staff member or resident, and possession of large amounts of drugs or alcohol.

Although the House of Glass has no bars on the windows, two resident counselors check each of the rooms in a "shakedown." The searches are conducted routinely to eliminate any fears based on residents.

Freedom is a step-by-step process

By Christopher Kade
Staff Writer

The House of Glass, located in Carbondale, Illinois, is a unique facility for housing and rehabilitating inmates. The center's purpose is to reintegrate inmates back into society after they have successfully completed their sentences. The center offers various programs and opportunities for personal growth and development, aiming to reduce recidivism and help inmates become productive members of society.

Residents typically share a room with one or two others, and they are allowed three three-day leaves and six hours of independent release time per week. Level 4, the final stage, requires residents to be involved for 60 days in employment, training, or educational opportunities, with no disciplinary infractions for 45 days. Residents are prohibited from driving during their time on the outside and face serious infractions if they are late from trips out.

Victor Metzger, an inmate at the center's two correctional counselors, said that the residents have "incredible opportunities to play the staff." He also discussed the residents' rights and responsibilities, as well as their opportunities for personal growth and reintegration into society. Metzger mentioned that the center is open to all who complete their time there, and the residents are generally pleased with their experience.

Residents are rewarded for their good behavior and performance. The residents are allowed to have resumes and write applications, helping some because we have an employment and some local businesses who are interested in hiring. Residents can get a job in the community, which permits us to be operating in the community, according to another resident. Dennis Yates, complained that the staff practices favoritism. Yates is also from Menard, where he was serving a sentence for theft.

"We simply cannot afford to be lax." Another resident, Dennis Yates, complained of the staff practices favoritism. Yates is also from Menard, where he was serving a sentence for theft.

You see favoritism here every day," he said. "If someone from a certain block is there, they do what they want. But if there's no favoritism, they don't do what they want.

You see favoritism here every day," he said. "If someone from a certain block is there, they do what they want. But if there's no favoritism, they don't do what they want."

Saver's rationale reflects some different concerns.

"You, there are a lot of petty rules," he said. "But we have obligations to the community. What permits us to be operating in the community are those petty rules. People in the community are in a controversial institution," he said.

"Saver's rationale reflects some different concerns. Yes, there are a lot of petty rules," he said. "But we have obligations to the community. What permits us to be operating in the community are those petty rules.

"People in the community," he said. "The complexity of the controversy," he said.

"Saver's rationale reflects some different concerns. Yes, there are a lot of petty rules," he said. "But we have obligations to the community. What permits us to be operating in the community are those petty rules.

"People in the community," he said. "The complexity of the controversy," he said.
The staff at Saver said the center has provided many residents with a chance to see where they were headed.

"I don't think there's any doubt that having this transitional experience helps," he said. "But there are so many factors that work against these guys -- parole restrictions, family problems, the economy -- that I have to wonder myself, 'Is what we do enough?'"
Magician to try blindfolded drive

Magician Brad Lancaster, senior in radio-television, will attempt a blind drive around human obstacles at noon Sunday in the parking area behind the Communications Building.

Lancaster said he will have five people stand at various points of the parking area to simulate human obstacles. He will then drive a car blindfolded. The drive will be a speed of approximately 15 mph, he said.

Garden plots for rent in city

People who want to plant a garden this spring but don’t have the land to do it may be interested in a Potomac Horse Center program.

Beginning Tuesday, 46 plots for gardening will be available on a lot behind the Park District offices at 115 W. Seventeenth St. Rent for the spaces is $12 for district residents and $14 for non-residents. An additional $5 refundable deposit is required to ensure that renters adhere to the rental agreement. The rent covers the cost of initial cultivation and water.

MARY ANN HINES ROWE, recreation coordinator for the district, said the plots vary in size but average 20 by 20 feet. More than one plot may be rented.

“It’s a successful program,” Rowe said. “We generally rent all of them.”

George Whitehead, park district director, said the program began in 1976. Last year the district rented 28 plots. He said he expects additional plots to be laid out after the snow melts.

Registration forms will be available at the Park District Offices between 8:30 a.m. and 4 p.m. Whitehead said most of the plots are rented early.

Trip to Horse Center planned

The SIU Equestrian Team and Salisbury Saddle Club will sponsor a trip to the Potomac Horse Center in Gaithersburg, Md., during spring break.

Those making the trip will participate in a week-long career course. Each day will include two hours of riding, two hours of lecture which will cover riding theory, veterinary care and stable management, and use of all facilities at the Potomac Horse Center.

Other activities will include trips into Washington D.C. and a day at the Smithsonian in

Airport group forms chapter at SIU-C, promotes aviation

By Alan Cockrell
Staff Writer

The American Association of Airport Executives, a group dedicated to tackling the problems and needs of airport management, has formed an SIU-C chapter.

The AAAE is a non-profit foundation with nationwide membership, and it lists three main objectives. They are to provide scholarships at recognized institutions of higher learning, to assist students and others in attaining management positions at civil airports, and to promote public recognition of the airport management profession and the airport dues.

According to Bob Moore, of the AAAE's publicity committee, the local group has two major goals this semester. One is to work with aviation materials stored in the basement of the School of Technical Careers and which Moore said were willing to the organization.

The materials will be used to form the nucleus of an aviation library located in the aviation facilities at Southern Illinois Airport.

Volunteers needed to move equipment

The Undergraduate Student Organization and the Carbondale Senior Citizens Center are looking for volunteers to help move equipment into the center's new facility. Volunteers will be needed from 9 a.m. to noon Saturday at the center. President Jerry Cook stated the equipment will be moved into the center at the 406 E. College St., and unloaded at 408 N. Springer, the new location of the Senior Citizens Center.

By Jim Geodes

Airline executives are there most of the time, "we felt it would be better to have the library at the airport, since most of the aviation students are there most of the time," Moore said. "We didn't want them to have to travel back and forth to STC when they needed to use the materials.

The second goal of the group is to send representatives to the national convention. Moore said. "AAAE holds two national conventions, one of which is strictly for professionals, such as airline representatives and airport management. The other, which we'll be attending, is held in a different city each year.

Manure-fed fish a new treat

Manure-fed fish a new treat

CHAMPAIGN (AP) - Move over the corn-fed beef and make room in the supermarket meat case for manure-fed fish.

The world needs the food and farmers need a way to dispose of organic waste, said Stephen Waite of the Illinois Natural History Survey. "We're eating a lot of manure-fed fish and they are delicious," said Waite. He is working with scientists at the University of Illinois in design demonstration units that could be used on farms or in cities to convert organic waste to food.

The system is called an aquaculture. Think if a chain reaction meal going on inside a large aquarium. Hogs eat protein, tiny creatures in the aquaculture eat the hog manure; fish eat the tiny creatures, and plants eat ammonia given off in the process.

Tale of Noah told a new way

By Jeff WIWJasoq
Staff Writer

Noah as a lecherous old man determined to spread bis "reed" through his son's wives?
"Surviving the Flood," the new production on Cali pre Stage presented by the Department of Speech Communication, shatters the "official version" of Noah's Ark, while probing some of the darker aspects of survival.

In their adaption of Stephen Minot's novel, Susan Mace and director Frank Trimble focus on the hierarchy within the ark clan, which consists of nine members of Noah's family, living on the upper decks, three times as many servants living on the middle deck and every animal in the world on the bottom.

The play is a first person narrative by Ham, third son of Noah, played with booming authority by Ken Scott. He is portrayed as a powerful, patriarchal, jealous of his grandfather and blind to the inhumanity of the flood and the class structure of the ark, that encourages adultery and places the servants on the same level as the animals.

Justin Dennis, junior in English, portrays Old Ham, the narrator of the Cali pre production, "Surviving the Flood."

During these breaks he wanders around, moving the frozen arms and bodies of the actors and expounds in retrospect on the scene with just a trace of an Irish brogue.

Sometimes his quick-freeze of the action (817-0794)

The action takes place inside the closed-up, foul-smelling ark. The family members and servants live, quarrel and eventually learn how to work together under close quarters. Only Noah remains aloof, the only one allowed to look out and get a breath of fresh air, a situation basic to the conflict.
within the family. However, the comic line "It couldn't be too pleasant with all that wind and water" becomes prophetic as Ham, with Methuselah's aid, sneaks a look outside, only to find floating bodies and wreckage. The sight rationalizes some of Noah's behavior as he advises Ham to "Take the fresh air in small doses."

Unlike the "official version," Noah's family emerges to find others who have survived the flood, a circumstance Noah uses to establish his hierarchy on dry land.

Frank Trimble, in directing his full-length play, has undertaken a difficult and complex subject. "This is a bit too broad for a two-hour performance, but its compositions for guitar written in 1980. "Sonata for Guitar" was composed by former SIU faculty composer Will Clay Bottje and is dedicated to Breznikar. The other premiere is that of "Six Bagatelles for Oboe and Guitar" by Guido Santorsola.

Other works to be performed are by Ibert, Underwood, Villa-Lobos and Ponce.

Breznikar has performed extensively in the U.S. and South America and recently released his debut solo album entitled "The Contemporary Classical Guitar: Music from Two Continents."

The performance is free and the public is invited to attend.

Beg your pardon

In the March 23 issue of the DE it was incorrectly reported that the initiators of the Mail Art Show are graduate students in philosophy. They are, in fact, graduate students in photography. There has not been an opening date set for the exhibit.
Engineers test fans for Norge plant

By Robert Green
Staff Writer

Engineers at the Norge plant in Herrin decided last fall they needed some expertise to determine how well a new lighter clothes dryer fan would perform. That's where Najm Rubayi came in.

Rubayi, an instructor in engineering mechanics and materials, is an expert on stress analysis, and since last October he and student research assistants have been putting Norge's new dryer fan through the mill with a technique called photoelastic stress analysis. I sing this technique, Rubayi and his assistants measured stress on the fans by coating strips of the special plastic polymer, which is used specifically for stress analysis, onto the fan blades. They then installed the fans in a clothes dryer frame and rotated them at the same speed as in normal household use. As it rotated, the plastic underwent the same stress as the metal it was cemented to, and the reflected polarized light allowed the stress to be observed and analyzed when seen through a special filter.

Rubayi said in photoelastic stress analysis, the stress shows up on the plastic as a series of rainbow-like bands on stress points when seen through the filter. He said black bands or spots indicate a lack of stress, while colors from red to blue indicate stress of varying intensities.

For precise measurements of stress, the shapes of the color bands are measured and the results translated into mathematical formulas, Rubayi said.

He said he and his assistants are now in the final stages of the project and consulting with Norge on the results. Rubayi said Norge has paid for equipment used in the project and for the time put in by student research assistants, and he said the project has provided good research experience on photoelasticity for the students.

"Photoelasticity is a wide field, and it's main advantage is it gives you an overall picture of stress distribution," said Rubayi, who teaches two engineering courses on stress.

Discarded Holly tapes found, have been released as album

NASHVILLE, Tenn. (AP) — In a cobwebby corner of a gymnasium-sized vault in California, a record company executive discovered a musical treasure.

Steve Hoffman, the catalog research and development coordinator for MCA Records in Los Angeles, stumbled onto tapes of 10 previously unreleased versions of songs by the late rock 'n' roll trailblazer Buddy Holly.

"The world should hear these," Hoffman thought when he realized what he had found last August.

The songs are on a new album, "Buddy Holly: The First Time Anywhere." Maybe "Baby" is one of the songs on the new album, but it's not the version that hit the charts in 1958. This one was recorded six months before and for some reason, was not as well regarded as the cut used.

Maryland's album was recorded in Clovis, N.M., where Holly had cut most of his recordings with producer Norman Petty. They include "Rock-A-Bye-Rock," "You Don't Change," "That's My Desire," "Baby Won't You Come Out Tonight," "It's Not My Fault," "Brown-Eyed Handsome Man" and "Bo Diddley.

MCA files showed that the 10 songs should be stored somewhere, but Hoffman was not able to find them until he accidentally stumbled onto them one day six months after his search began.

Brushing away cobwebs, he found them in a corner of an annex room of the vault. They were unmarked, except for the phrase, "Do not use." The 10 tapes, each in a box, were stacked in one larger box.

Hoffman immediately played the tapes. "I broke into a cold sweat," he recalled.

Dietary treatment successful in reducing pain, study says

NEW YORK (AP) — A nonprescription dietary supplement taken in combination with a low-protein, high-carbohydrate diet has significantly reduced chronic pain in some patients, a researcher said Thursday.

The diet apparently works by boosting levels of serotonin, a natural, pain-relieving chemical in the brain, said Dr. Samuel Seltzer of the Temple University School of Dentistry in Philadelphia.

"It's the first time it's been shown, as far as I know, that through dietary manipulation you can alter a patient's pain threshold," Seltzer said in a telephone interview.

The dietary supplement, called tryptophan, is available in health food stores, but Seltzer cautioned that pain sufferers should not try the diet without medical supervision.

"For one thing, if a patient has some pain, it could be serious," he said. "They should go to a physician to have it diagnosed." It is also possible, he said, that the pain is caused by something that can be cured or corrected.

Because the diet tends to make people lose weight, it should be followed only under the direction of a nutritionist, he said. "You don't want a patient to starve to death." Several experts in brain chemistry said Seltzer's results were plausible, but they did not comment further because they were not familiar with his work.

Dr. Marvin Hoffert, a neurologist at the National Institute of Dental Research in Bethesda, Md., said he was skeptical. The reason, he said, is that serotonin levels in the brain are determined by, among other things, the amount of serotonin in the diet.

On the other hand, he said he knew of no other research that has combined tryptophan with the kind of diet used by Seltzer, and the diet could affect the results.

Seltzer, a dentist, and his colleagues tested the regime on 30 people with chronic head and neck pain. Half were fed the diet with tryptophan, half were given a placebo. The subjects were assigned to rate the intensity of their pain on a scale from zero to one hundred before and after the dietary treatment.

The pain rating dropped from an average of 60 before the treatment to an average of 30 afterwards for the group receiving tryptophan, Seltzer said. The rating for the control group given a placebo dropped from 60 to 55, he said.

Seltzer added that those given tryptophan were also found to have an increased tolerance of pain—a smaller electrical charge applied to a tooth. A report of the study will appear in the April issue of the Journal of Psychiatric Research. A brief account of the work was published in the Feb. 19 issue of Science News.

Tryptophan is an amino acid, one of the chemical sub-units that make up proteins. It is required by the body but not produced in the body, so it must be obtained in food.

The amount of tryptophan was measured in the saliva of patients receiving tryptophan, Seltzer said. The diets could affect the results by reducing the amount of tryptophan available in saliva as well as by effects in the body, he said.

The limitations and potential of serotonin in the treatment of pain were discussed at the recent American College of Nutrition in Philadelphia.

Seltzer added that serotonin's effect on pain is caused by the chemical's effect on the brain, said Seltzer. For one thing, the treatment tends to reduce the levels of serotonin, he said. "For another thing, it's not only the serotonin that is decreased. It's all the chemicals that serotonin works with, such as dopamine and norepinephrine."
Children of smoking parents prone to disease, study says

CHICAGO (AP) — Children whose parents smoke are more likely to develop chronic middle ear disease — one of the most common afflictions in children — than those who live in smoke-free homes, researchers say.

A team of doctors at Children's Orthopedic Hospital and Medical Center in Seattle compared 76 children hospitalized for persistent middle ear effusion, or fluid build-up, with a group of children hospitalized for other reasons.

Though fluid build-up in the middle ear usually goes away by itself it can persist, causing hearing loss, language difficulties, learning disabilities and behavior problems, noted the doctors, who reported their findings in Friday's issue of the Journal of the American Medical Association.

Four factors were found to increase the risk of fluid build-up: middle ear infections, frequent nasal congestion, predilection to certain allergies and exposure to cigarette smoke.

"Exposure to two or more household cigarette smokers increased the risk for persistent middle ear effusion nearly threefold," wrote the researchers, led by Dr. Michael J. Kraemer, an ear, nose and throat specialist at the hospital.

"With household exposure to smoke from more than three packs of cigarettes per day, the risk increased fourfold," the researchers said.

Almost all the hospitalized children with persistent effusion, treated by surgical incision of the eardrum and removal of a drainage tube, had been victims of one or more episodes of middle ear infection, the authors said.

Most of the affected children had also suffered episodes of nasal congestion, which since raised the risk fourfold of fluid build-up in the ear, the researchers said.

When nasal congestion was added to cigarette exposure or predilection to allergic tendencies such as asthma, eczema or seasonal sinus irritation and sneezing — the risk increased.

"Children with all three factors ... were more than six times as likely to manifest persistent middle ear effusion than children with none of the factors," the doctors said.

"The most common ailments in children. are allergic diseases. which make up one of the most common afflictions in children. "

A study at 2,500 children showed that one in three visits made for illness of any kind resulted in diagnosis of middle ear disease. said the researchers, led by Dr. David W. Teale, a pediatrician at the Boston University School of Medicine.

The study was conducted at five Massachusetts medical centers in locations ranging from prosperous suburbs to inner city neighborhoods, the researchers wrote.

The researchers recommend that more training be provided to pediatricians for diagnosis and management of middle ear disease.

A study of 2,500 children showed that one in three visits made for illness of any kind resulted in diagnosis of middle ear disease, said the researchers, led by Dr. Daniel W. Teale, a pediatrician at the Boston University School of Medicine.
peakers to discuss phonology

Phonology, the branch of linguistics that studies the sounds of languages and examines how different speakers organize and use those sounds, will be the topic of an evening symposium this Friday at the Student Union.

Among the speakers are Peter Blamey of Purdue University, who will discuss "Natural Accounts and Strategies for Second Language Acquisition," and James H. McCawley of the University of Massachusetts, who will discuss "Phonology and the Phonological Theory," and David Stampe of the University of Illinois at Urbana-Champaign, who will lecture on "The Structure of English Language.' The lectures are free and open to the public.

Reagan's policy: bringing riches

WASHINGTON (AP) - President Reagan said Thursday that his domestic policies are beginning to bring rich rewards - and he predicted the decline in oil prices as "good news for the world economy." The president acknowledged that the drop in oil prices may cause short-term problems for some oil-exporting nations. But he said that in the long run, the price decline will spur economic recovery and "free vast amounts of real resources that previously had been devoted to energy." Reagan made his comments in a speech televised from the White House to audiences in Washington, London, Tokyo, and Zurich, Switzerland. The speeches were assembled by Newswave magazine to mark its 50th anniversary.

The president said: "As the winter sails, filled in many parts of America, we've seen that these policies are beginning to bring rich rewards. A new vibrancy is evident in our economy."

Beg your pardon

In Thursday's Daily Egyptian, a member of the Women's Center's Rape Action Committee was incorrectly quoted as saying that rape is sexualized, acted out violently. The quote should have read: "rape is violent in nature, acted out sexually."

IDEA game tourney is set; prizes will be awarded

Proving your prowess at a video game could prove the trip to Daytona Beach on your dorm's radar. The "Jump in Jump" tournament will be held from 2 to 4 p.m. March 2 through 7 at Alpha Tau Omega's Castle at the Student Union. The tournament is open to all students. Valid identification and press license is required. The tournament is sponsored by Alpha Tau Omega and is open to all students.

The prizes for the highest scores will include a trip to Daytona Beach during the race weekend.

Mr. Marketing at Chrysler and Rally Midway Manufacturing companies are conducting the tournament. It centers around the debut of the race-and-chase video game to the makers of Pac-Man and Mr. Pac-Man and the promotion of the National Collegiate Driving Championships. Top prizes in the championships will be held March 14 through April 2 at Daytona Beach Plaza Hotel parking lot, are the use of a new Dodge Shelby Charger and a $10,000 scholarship. There will be three winners.

Creeping Bulldogs at SIU-C as MVC playoff hunt goes on

By Dan Devine
Associate Sports Editor

Drake coach Gary Garner likes a team that plays tough man-to-man defense, takes care of the basketball, and has a patient, high percentage offense. "Sound familiar?" It seems to be the coming trend in the traditionally motoring Missouri Valley Conference. Illinois State, Creighton, Drake, even SIU-C all ascribe to conservative theories of playing the game.

Garner says it not that he has anything against opening up. Drake would run if it could, he said. "Personal dictates style of play. We don't have the personnel to dictate running up and down the court and shooting the ball. We've run it up and down the floor and miss the shot!"

Garner will bring that pragmatic attitude to SIU-C Saturday night, when the Salukis take on Drake at 7:35 at the Arena.

With the MVC season running to a conclusion, it's a must game for both teams. The Salukis have to win at home to entertain realistic hopes of gaining the last playoff spot. or better, while Drake looks for the last playoff home court advantage.

The Bulldogs are 11-12 and 7-7 in the Valley. A damaging 96-82 loss at home to Bradley Tuesday dropped them to fifth place in the Valley. League-leading Wichita State is in on probation and ineligible for postseason play, so fifth is actually fourth this year.

"We still have a ray of hope for the home playoff spot," said Garner who was the Valley coach of the year last season. "It was great shape, we haven't shown we're good enough to do that back to back."

Most of the Bulldog struggles have come on the road, where they've won just two conference games in two years.

"There have been stretches when we've played extremely well and there have been stretches where we haven't played well. We don't have a true star so we've got to have a team effort."

Garner divides up the Bulldog playing time among at least eight players. As a result the team doesn't have anybody in the Valley top 20 in scoring. It also doesn't help that Drake scores just 68 points per game, eighth in the league.

But the team doesn't give up many points either. It trails the Valley top team, leading Wichita State, 88-68 points per game, sixth in the league.

No one says this team has a superstar, but it is a living, breathing team, one that is willing to work, shooting 45 percent from the field.

The closest thing Drake has to a superstar is its defensive genius Dan Dunise. The 6-3 swingman guards the enemy's best scorer, and routinely shuts him off. Dunise has held 7-0 Creighton center Benson Benjamin to just 14 points in two games, and it doesn't seem to make him score less than five points per game.

6-8 freshman forward Melvin Matthias supplies the punch from the forward line, and has improved enough to average 14.8 in Valley play.

At center, SIU-C will see 6-9 Tom Fisher, if he plays well in Drake's game Thursday at Indiana State, 6-5 Rickery Welley, who has better offensive numbers, 9.4 in scoring and 4.9 rebounding.

The Bulldogs are solid at guard, with shooter Terry Youngfahse making a living outside the three-point line. Youngfahse, 11.6, has nailed a league-leading 31 of 70 three-pointers. Meanwhile, playmaker Stephon Butler controls an offense that, to be fair, has been known to run.

Men's tennis team faces test from improved Illinois squad

By Ken Perkins
Staff Writer

Everything must change, and that's what worries men's tennis coach Dick LeFevre. His 2-2 Salukis will face Illinois at 2 p.m. Friday at the Egyptian Sports Center, but it won't be the same Illini that finished behind them in a fall exhibition tournament.

It will be a stronger Illini, an Illini that has the ability to drop the Salukis under the 500 mark.

"I'd have to say they are the favorites in the match," LeFevre said. "They are much more improved."

Junior Barry Waddell takes a lot of the credit for that. He returned to the lineup after transferring and has made it potent at every position. He will play at No. 3 singles. That will make the Salukus more consistent and aggressive and offensively stronger than ever, and Heidi Eastman, Freshman Per Wadmark will look to extend his three-match winning streak at the first singles position. He'll be followed by John Greif, David Filer, Gabriel Coch, Rollie Ogilvies and Paul Rusch.

After the Illinois match, the Salukis will travel to Richmond, Ky., to play in a quadrangular tournament at Eastern Kentucky March 4-5. Also entered are West Virginia and Middle Tennessee State.

Women netters look to stay strong

The women's tennis team continues its drive into its spring season when it travels to Richmond, Ky., for the Eastern Kentucky Invitational this weekend.

A two-match winning streak won't take the line as no team scores will be taken, but the individuals have the chance to do well, according to Coach Judy Auld, as the players for the most part have shown a lot of strength.

Alessandra Molinar, at No. 2 singles, is playing more aggressively and offensively than ever, and Heidi Eastman, at No. 1, is developing a strong backcourt game to go along with her serve and volley game, according to the coach.

Stacey Sherman, at the No. 5 spot, is a consistent player not afraid to go into the net and played well in both matches of the season, Auld said.

At No. 6, Maureen Harney's record "speaks for itself," Auld said. The player with the highest winning percentage, Harney is a consistent and patient player who forces her opponent into making errors, said the coach.

Lisa Warrem, playing at No. 1 singles, and Mary Pat Kramer, at No. 3, need more time to work on their games and consistency, Auld said.

Two doubles teams will compete this weekend, and the Salukis have had good matches there.

Eastman and Warren, need time working together to get their game in shape, but Sherman and Amanda Allen, two smart players, are very compatible and have been playing well, according to Auld.

put 1982 Florida Junior College champion David Goodman at No. 1 singles and Neil Adams at No. 2.

Illinois, which will be playing its first dual meet of the season, defeated Indiana State 9-0 and Illinois State 7-2 in a triangular match two weeks ago.

Rounding out the Illinois lineup will be Andrew Lamberti at No. 4, Mike Meyer at No. 5 and Peter Brunton at No. 6.

The Salukis will be playing their first match since Feb. 12, when they lost to Vanderbilt 6-3 in Nashville, Tenn. SIU-C was at less than full strength for the match, with No. 6 singles player Scott Krueger out with the flu and several other players playing in less than perfect health.

Freshman Per Wadmark will look to extend his three-match winning streak at the first singles position. He'll be followed by John Greif, David Filer, Gabriel Coch, Rollie Ogilvies and Paul Rusch.

After the Illinois match, the Salukis will travel to Richmond, Ky., to play in a quadrangular tournament at Eastern Kentucky March 4-5. Also entered are West Virginia and Middle Tennessee State.

We're bringing an famous Olimpic gral medalist to town in a way you've never seen them before: on canvas. They're all part of Budweiser's Olympic Art Collection, a unique program to raise $1 million for the U.S. Olympic Games in Los Angeles.

The athletes - Olympic hockey great Mike Eruzione, basketball star Bill Russell, swimmer John Naber, discus thrower Al Oerter, track star Wilma Rudolph and distance runner Frank Shorter - were all commissioned by Budweiser to create original paintings using the tools of their athletic trade: the discus, hockey stick, running shoes, even a basketball. The result is truly something to see. And after you're done looking, you can look into owning a signed high-quality lithograph of any one of the paintings. They're available on a carefully controlled limited-edition basis for just $108.40. Or select a colorful poster for just $4.94.

There's no more beautiful way to support the 1984 U.S. Olympic Team than through Budweiser's Olympic Art Collection. So come out and see the exhibit. After all, as Mike Eruzione said, "Please don't make more paintings than there's room for."

Upset not impossible at meet in Nebraska

By Johan Staerklarzewski
Sports Editor

Can a team consisting of U.S. World and Olympic team members, a team that has won the last four national championships and a team that is a strong favorite to win the NCAA again, be beaten?

Nebraska, the men's gymnastics team faces Saturday afternoon in Lincoln, has been edged three times this year, and the Salukis are not overlooking the possibility that they can make it four. It won't be easy, though, according to SIUC Coach Bill Meade.

"If I had to pick someone to win the title, I'd pick Nebraska," he said. "I think they've got the lineup." 

Nebraska scored 224.65 to finish just behind UCLA last week at the UCLA Invitational, but some breaks on routines kept the Cornhuskers from scoring higher.

"We're capable of going 225," said Nebraska assistant coach Jim Howard. "Last week we had a hit percentage of 72, we have to do at least 55 percent to come close to our potential."

Even with major misses, the Cornhuskers are an awesome team. They'll be even stronger with freshman Chris Regel back in the all-around lineup. Regel, a winner of five medals at the National Sports Festival last summer, has been hampered by a wrist problem and had been working in only three events. This will be his first all-around competition since before Christmas.

Two of the major strengths over the last four years for the Cornhuskers, Scott Johnson and Phil Caby, have been competing heavily lately and will work on a few events rather than as all-rounders, according to Howard. All-rounders Jim Mikus, Wes Suter and Mike Bowers and parallel bars specialist Brandon Hull round out the Cornhusker lineup.

"We're jockeying around the line-up, but we're not considering this a runaway by any means," Howard said. "SIU did an exceptional job at UCLA, they've been improving their scores work by week. If they had a real hot meet, they could go 226."

That score is the one Meade's shooting for this weekend.

"I set that for a goal, and that's almost at the limit of our talent," Meade said. "Everybody has to do the job with no mistakes."

Brian Babcock, undefeated in all-around competition during both meets, will lead the Salukis as they face Nebraska for the fourth time this season. It's been a long time since we've gone against a national champion and been in the same weight class," Meade said. "If they have a few mistakes and don't have a great day, we can get them."

FINANCIAL AID AWARENESS WEEK

FEB. 20-26

1. Have you obtained the 1983-84 ACT Family Financial Statement (ACT/FFS) from Student Work and Financial Assistance?

2. Will your ACT/FFS be completed and mailed before April 1, 1983?

3. Did you indicate on your ACT/FFS that you wanted to apply for Pell Grant, ISSC Monetary Award, Campus-Based Aid, and Student Work?

4. Did you list SIUC's school code and include the ACT processing fee?

If you answered "no" to any of these questions, you may be missing out on assistance from federal, state and/or institutionally funded financial aid programs.

For information about financial aid for 1983-84, contact Student Work and Financial Assistance, Wandy Hall, 8 Wing, Third Floor, 453-4354.

Paid for by the Office of Student Work and Financial Assistance.
Gymnasts host powerful Mizzou

By Sherry Chisenhall
Staff Writer

Intimidation could play a key role in the ability of the women's gymnastics team to come up with the high team score it needs to win the Salukis host a powerful Missouri squad Sunday.

SU-C was dunned by Oklahoma State last weekend (76.85-68.90). Coach Herb Vogel didn't expect his team to beat OSU, but he said he expected a higher team score.

"On paper, they looked like the better team and we did not think we could beat them," he said. "The girls got worried watching Oklahoma warm up, and that blew the effectiveness of our warm-up. They let Missouri intimidate us like that, the meet is their's before they walk into the gym.

With injuries scratching several names from the Salukis rotation, Vogel has had to fill his lineup with gymnasts he hadn't expected to compete with. As a result, the team has had to swallow several low scores.

"This is a team sport all the way," Vogel said. "No matter how high the two girls are on the lineup score, the bottom part is equally important. Those high scores come off the performances of the girls at the bottom, because the scores escalate from the first performer to the last."

Vogel said he may have been wrong in emphasizing team scores over winning.

"If we go out to win, we'll get the scores we need even if we lose," he said. "We need to score at least 174 points to have a chance to quality for regionals. The best thing that could happen Sunday is that Missouri hits an event they're good at, because we'll perform up to the level of competition and score higher.

"We need to go after our routines aggressively," Vogel said. "We have to go after Missouri in the first event, and try not to be awe-struck by them like we were against Oklahoma. If we get through our routines with as few errors as possible, it could be a close meet.

"I would like us to just be competitive Sunday," he said. "I'll be disappointed if we let them intimidate us. If everyone goes out aggressively and we do just what we're capable of doing now, we could probably beat Missouri."

The women's indoor track team will finish its indoor season this weekend in Charleston against nine other teams at the Metropolitan Colleges Athletic Conference championships.

The Salukis have had a good season so far. They've placed well in several events and have broken 16 school records. But the GCAC meet is the one that counts, Coach Claudia Blackman said.

"We're going to run into some tough competition," Blackman said.

Illinois State and Western Illinois have been very successful against us, and Drake and Wichita State have plenty of 'alent."

Blackman said the Salukis could place in the top five "if we get a good performance from the whole team."

Blackman has gotten good performances from the sprinters and from the jumping team. "They have done most of the contributing to the Salukis' total points this season. The Salukis have finished in fourth in a six-team meet, sixth in an 11-team field and fourth in a five-team meet.

The Salukis will have Denise Blackman, Ann Lavine and Debra Davis, the owner of the team score. "Missouri will be a powerful Mizzou, we didn't expect the Salukis to do well," Blackman said.

If we let Missouri intimidate us, if everyone goes out aggressively and we do just what we're capable of doing now, we could probably beat Missouri."

Women tracksters await big meet

Women tracksters await big meet
Conference upset of c.
escape with a 63-54 win over ninth-place Illinois Salukis night.
Bv 289.5 petition, greater than four points until the final minute when the Redbirds wrapped up the battle Redbirds but fall short.

Swimmers jump to big lead at NICs
The women's swimming and diving team won five of the nine events and took several second to sixth place finishes on its way to the lead after the first day of the National, Independents Championships at the Recreation Center pool.

After Thursday's competition, SIU-C led the field with 20.5 points, followed by South Carolina, 225; Cincinnati, 126; Florida State, 121.5; and Lamar, 81.
The NIC meet continues this weekend, with preliminaries at 11 a.m. on Friday and Saturday, with finals beginning at 7 p.m. The Salukis added six more people to their already long list of qualifiers for the NCAA meet. During a preliminary heat Thursday afternoon, Janie Coontz qualified in the 500 freestyle in 5:42.72. She was joined Thursday night by Roxanne Carlton, who went 5:43.58. Also qualifying were Laura Peel in the consolation heat of the 50 breaststroke. 30.75 and Stacy Westfall in the 100 butterfly. 56.77. In the 200 breaststroke, Ken Byrd scored 15 to lead the Salukis, while the Salukis added six more preps to the roster.

Salukis battle Redbirds but fall short
By Dan Devine Associate Sports Editor

It might have been the biggest upset of the Missouri Valley Conference season, but instead it was just another loss for SIU-C.
The Salukis came close though, and second-place Illinois State was fortunate to escape with a 63-54 win over ninth-place SIU-C Thursday night.
Neither team held a lead of greater than four points until the final minute when the Redbirds wrapped up the victory with two free throws. Guard Michael McKenney hit six free throws in the last 55 seconds and Ricky Johnson added another, while the Salukas could manage just one point.
The death blow for the Salukis had come right before that, when Redbird forward Raynard Malaine converted a three-point play for a 56-53 SIU lead. That lead allowed the Redbirds to hold the ball, which forced SIU-C to foul.
"I thought the kids played great," said Saluki Coach Allen Dally, "but the Redbirds were inside and they executed their offense for 40 minutes."

Ken Byrd scored 15 to lead SIU-C, most of them in the first half, and then Darnall Jerome took up the slack in the second half. He had 14.
Raynard Malaine led the Redbirds with 12 while McKenney and Hank Corley had 10 each.

Missouri drops cagers as season nears end
By Brian Higgins Staff Writer

Coach Cindy Scott's hopes for a second career 20-win season abruptly ended in the second half of Wednesday's game against 17th-ranked Missouri as the Tigers reeled off points in six straight points to break open a seesaw battle and give Mizzou an 83-76 win.
The loss lowered the Salukis' season slate to 19-7 with one game remaining. The Tigers, now 18-6, took advantage of 27% of free throw shooting to knock the Salukas out of the picture for the Big Eight.

"They're struggling and they're not as good as they were last season," said Scott of the 6-13 Racers. "We'll be a decided favorite but it's never easy to win down there. An upset would be huge for us - another loss.

The Racers, who have only one conference game left, their roster are paced by the trio of senior centerr Forest Osawashish, 12.1 points, 9.9 rebounds; sophomore forward Jarien Redwood, 11.0 points, 7.1 rebounds; and junior guard Lori Barrett (10 points).

Football team adds five preps as recruiting year winds down
By Dan Devine Associate Sports Editor

SIU-C's football recruiting class continued to take shape as Coach Rey Dempsey announced that five more high school players had signed national letters of intent.
That brings to 18 the number of high school signees since Feb. 6. The Salukas also have on hand five junior college transfers, and Dempsey said that SIU-C could expect to add several more preps to the roster in the immediate future.

"I think we've got a good class," said Dempsey, who has 11 and 12 in next year's class.

Kelsey Corey Potter has 50-30 plus range according to Dempsey, and comes from Bethalto, as does offensive tackle embrace RobBraun, 6-3 and 250 from Cape Girardeau, Mo., who might be a good defensive tackle. Frank Stewart, 6-3 and 260 from West Virginia, and Pat Call, 6-3 and 250 from Lorain, Ohio, should improve the defensive line, an area that Dempsey said was hurting.

Kicker Corey Potter has kicked 30-30 plus range according to Dempsey, and comes from Bethalto, as does offensive tackle embrace Rob Braun, 6-3 and 250 from Cape Girardeau, Mo., who might be a good defensive tackle.
