Freeze Voters give
Simon their support
By Phillip Florini
Staff Writer

Paul Simon, Democratic candidate for U.S. Senate, received the endorsement of the Illinois Freeze Voters on Sunday at the group's convention in Peoria. Simon received the support of most of the 200 people in attendance.

Joyce Fry, a delegate from the 20th Congressional District, said it was no surprise that Simon received the freeze voters' support. "I think the endorsement of the Freeze Voters will give people already concerned about the peace issue support to Simon," she said. "It will also pull together those who support him from Southern Illinois.

At the convention with Simon was Hinsdale attorney Alex Simon, seeking the Democratic nomination in the U.S. Senate race.

The convention, which followed the two-hour forum, was brief as Simon received the endorsement on the first ballot. The endorsement means a $5,000 check to Simon's campaign.

Representatives were also present for Democratic candidates Philip Rock, state senator and comptroller, Robert Burrus, the other candidate to receive votes at the convention.

Forrest Claypool, Simon's press aide in Chicago, said Sunday that the congressman was hopeful that he would get the endorsement but wasn't certain.

"It certainly shows that he's the most credible candidate on arms control," his record reflects this," Claypool said.

Claypool said Simon has been the most Democratic seeking the Senate seat who has voted on arms control in the last 10 years. Simon voted for the freeze resolution and against the MX missile and nuclear weapons buildup.

Simon did not cast a vote on the nuclear arms warfare legislation.

At the two-day Freeze Voters convention, Simon also received six votes against endorsement, including three from Southern Illinois.

Simon favors a six-month delay of the deployment so the United States can test the first ballistic re-establish arms control talks with the Soviets.

Simon has expressed support of a delay, Claypool said, which within seven staff members remain at the Let anese Defense Ministry. As the Marines were pulling out, Syrian anti-aircraft fire forced a U.S. reconnaissance jet to fly back to sea. The New Jersey responded with shelling of Syrian positions in the Mediterranean near Beirut.

A military spokesman in Damascus said there were no new positions and positions which are already vacant are still subject to such review. Positions funded by "soft money," or local accounts, are not affected by the hiring freeze.

U.S. battleship fires on Syrian gunfire
By Stephen K. Hindi

BEIRUT, Lebanon (AP) - The U.S. Marines pulled out of Beirut last Sunday and an hour later the battleship New Jersey turned its big guns on Syrian anti-aircraft fire.

The situation of about 1,000 Marines began just after midnight Sunday and was completed in about three hours with the front-line combat zone turned over to the New Jersey by being tossed out by helicopter.

The last of the Marines' nine-day evacuation of their carrier-group sealed into the Mediterranean at 12:37 a.m. with Staff Sgt. Jerry Klokosch, of Toledo, Ohio, waving from atop the ship.

The Beirut airport positions the Marines evacuated were divided up quickly between the Lebanese army and Muslim militias, with the key airport positions going to the army. The militia raised their green flag over the western perimeter of the airport base and also claimed part of the coastal highway.

With the Marines, the Italians and the British only, a 1,500-member French contingent, the Multinational Force in Beirut. It is deployed along the green line.

About 100 Marines remain to guard the U.S. Embassy offices on Beirut's northern coastline.

Hiring freeze ends, but not fiscal pinch
By Joe Small
Staff Writer

The University’s hiring freeze has been lifted. The freeze, implemented more than a year ago to save money in the event of a state budget cut, was lifted for replacement positions on Feb. 8, a University official announced Friday.

Lifting the freeze is not a reflection of a better state or University budget picture in the coming year, according to John Baker, executive director for planning and budgeting. He said another hiring freeze will be considered should the University’s financial situation call for it in the future.

With the Marines, the Italians and the British only, a 1,500-member French contingent, the Multinational Force in Beirut. It is deployed along the green line.

About 100 Marines remain to guard the U.S. Embassy offices on Beirut’s northern coastline.

30 U.S. Army advisers and seven staff members remain at the U.S. Embassy in Damascus, said there were no Syrian casualties.

The New Jersey fired "over 10 rounds," said U.S. Army Col. Ed McDonald, of Rochester, N.Y. Western reporters also saw the battleship firing what seemed to be its five-inch guns. The Christian "Voice of Lebanon" said two American ships fired 49 shells at Syrian missiles.

It was the first time since Feb. 8 that the U.S. Navy had fired its biggest guns. On Saturday night, the USS Coral fired more than 70 rounds of its five-inch guns in response to what a Marine spokesman said was anti-government militia fire on Beirut.

The New Jersey began firing 68 minutes after the last Marine amphibious personnel carrier moved out toward Navy warships lying off the coast.

The Marines were happy to be leaving.
Nuclear power has harmed Southern Illinois, Parr says

By Phillip Fierini
Staff Writer

By proposing a moratorium on the construction of nuclear power plants in Illinois, 58th District Senate candidate P.L. Parr said the state must be serious about the effects nuclear power has had on the coal industry in Southern Illinois.

Parr said that nuclear power has been costly to Illinois and has taken jobs away from coal miners. The Union County farmer outlined his positions on coal development and utilities in a press conference Friday.

Parr contends that Southern Illinois is feeling the bad effects of nuclear power more than any other area and may soon become a dump site for low level nuclear waste produced in the Midwestern states. Illinois, he said, produces 40 percent of all waste in these states.

"Some of us will pay higher utility rates because of the increased cost of building and maintaining nuclear plants," said the Hick Creek native.

The Illinois Commerce Commission must accept responsibility for putting more miners out of work, Parr said. The ICC approves the construction of nuclear plants.

Parr claims that it costs less to get energy from coal than from nuclear power. He said that nuclear plants under construction should either be converted to coal-powered facilities or scrapped.

Parr also said additional research should be done to develop more efficient methods of removing sulfur from coal.

Because acid rain has become a political matter, Parr said the state and federal government should work with the coal industries to determine whether high-sulfur coal is actually causing acid rain, which he said has not been proven.

Parr said it will be important to act on upcoming legislation that may limit or stop the mining of high-sulfur coal.

Parr supports a coal severance tax of 2 cents per ton to be established "once the Southern Illinois economy is going again." He said the third of the tax would go to county governments where coal is produced and the final third would go to the state.

Parr also said he opposes the use of diesel engines in mines. He said he believes the nation’s ultimate energy source will eventually be the sun. But Parr also said he opposes the use of diesel engines.

Dioxin levels higher than reported

TIMES BEACH, Mo. (AP) - Preliminary tests of soil in this ghost town have found a concentration of the highly toxic chemical dioxin nearly four times stronger than previously known.

Dioxin levels range up to 1.2 parts per billion in the soil, according to an unpublished Environmental Protection Agency computer printout of 540 samples taken from ditches, wells and area homes.

"The results have been validated, which means that the lab's procedures have been checked," an EPA chemist said.

Couple's deaths possible suicides

PEORIA (AP) - Peoria County's coroner said Sunday that millionaire Elio Batterton and his wife, Edna, missing for more than two months before their bodies were found Saturday in the Illinois River, may have committed "a double suicide".

Bushbe said there were no signs of foul play on either body. Part of the investigation by police is focusing on why Batterton gave expensive gifts, including a diamond ring and several sacks of silver coins worth about $30,000, to an old friend the day before the couple vanished.

What to do with downtown?
Chamber finds no consensus

By Brice Kirkham
Staff Writer

It may not have solved the city's downtown redevelopment woes, but a lot of Carbondale business owners had a chance to air their opinions.

City staff members were the guests at a special meeting Thursday sponsored by the Chamber of Commerce to hear suggestions of downtown business owners on downtown redevelopment.

Complaints ranged from the reluctance to invest in downtown businesses because of the uncertain future of the area to the perceived unfairness of parking meters on South Illinois Avenue.

Suggestions ranged from building an office complex, apartments, or the conference center to sponsoring a festival to coincide with the annual Springfest celebration.

The overbearing support of the City Chamber of Commerce to hear about the city's downtown redevelopment efforts was sponsored by the city's downtown redevelopment audience.

The city would consider “reasonable offers” to purchase property in the redevelopment zone founded by South Illinois and University avenues and Monroe and Elm streets.

Local project developers are usually required by HUD to contribute about five times the amount of the grant, said Donald Monty, community development director.

The city is still collecting the 4 percent sales tax on hotel and motel revenues and a 1 percent sales tax to assist financing of redevelopment. The taxes, which bring in about $80,000 annually, are being used to pay for debt service on existing bonds, according to City Finance Director Paul Sorgen.

The City Council voted in December to allow purchase options for downtown properties to expire, which in effect placed the conference center plans on hold.

The city owns 13 parcels of the 32 needed for the proposed conference center and parking garage.

Dixon said, however, that the city would consider “reasonable offers” to purchase property in the redevelopment zone, or new projects with any developer.

Dixon said that the city staff is actively investigating all three possibilities with special attention to keeping a $2.0 million Urban Development Action Grant, which must be used in accordance with Department of Housing and Urban Development guidelines. HUD requirements limit the use of the grant, with about $600,000 has been spent, can be used only for land acquisition, relocation payments and demolition of structures.

The council recommended that the city staff investigate all three possibilities with special attention to keeping a $2.0 million Urban Development Action Grant, which must be used in accordance with Department of Housing and Urban Development guidelines. HUD requirements limit the use of the grant, with about $600,000 has been spent, can be used only for land acquisition, relocation payments and demolition of structures.

The 1980s, according to a memo to the council, the city received about $300,000 worth of applications from seven service agencies totaling $139,251 will be considered by the council.

The city’s downtown redevelopment would not only lead to increased sales and sewer revenues and a 1 percent sales tax to assist financing of redevelopment, the taxes, which bring in about $80,000 annually, are being used to pay for debt service on existing bonds, according to City Finance Director Paul Sorgen.

Bible's use to defend abortion appallingly

Letters

I believe that President Reagan's position on abortion before any group and that this right is a personal one and as president in the White House.

I share Mr. Eaton's belief that spiritual matters should be left to the individual, and not regulated by the government.

However, the choice of whether or not to experience parenthood comes before the will of God is, and that is what you own. I Corinthians 11:17 says, "If any man destroys the temple of God, he will be responsible." As far as I can see, the law of repentance, begins with correction, and the parents should have their choice. I suggest either contraception or abortion —

Teachers need doubled pay, higher goals, math expert says

By Phil Milano
Staff Writer

Teachers' salaries ought to be doubled if education is to be meaningful. Teachers who are not well paid are not likely to be very effective teachers, William Willoughby, professor at New York University and president of the National Council of Teachers of Mathematics, said recently.

Willoughby made the keynote address at a mathematics conference at SIUC Saturday for the Illinois Council of Teachers of Mathematics. The conference was sponsored by the Illinois Council of Teachers of Mathematics, the SIUC Division of Continuing Education, the Curriculum, Instruction and Media Department, and the Department of Mathematics.

Willoughby, speaking in Smith Auditorium, repeated some of the testimony he made to the U.S. Senate Subcommittee on Education, Arts and Humanities in March 1983. He said individual and corporate taxes would be a reasonable source of education funds, and that local taxes were the most crucial taxes for education.

"The prospects for the younger generation," he said, "are dim." Young people are choosing more lucrative fields. In an interview before his speech, Willoughby said one of the problems in elementary mathematics education is that it starts out as too abstract for children. Word problems in textbooks, he said, need to be more realistic so teachers and children don't skip over them. "However, sooner or later you've got to get to the abstract. Children must learn that there is one number that can apply to them. That is a great abstraction," he said.

Willoughby has been developing teaching methods and textbooks for elementary and secondary mathematics for about 20 years. One method of teaching mathematics is using "Real Math," in which the student learns to connect mathematics to reality. The use of physical objects such as small wood blocks with numbers on them helps to accomplish this, he said.

Increased time must be spent on education, but this extra time needs to be spent by teachers outside the classroom. Learning about education, according to Willoughby, he and his associates, must be increased for those becoming and remaining teachers.

"Some universities certify math teachers if they have a degree in math, but no courses in education. Teachers should have a strong preparation in content and in the foundations of education, such as its history and psychology, in order to be certified," he said.

In an interview before his speech, Willoughby said one of the problems in elementary mathematics education is that it starts out as too abstract for children. Word problems in textbooks, he said, need to be more realistic so teachers and children don't skip over them. "However, sooner or later you've got to get to the abstract. Build trade, save soil, agr chief says

By John Racine
Staff Writer

Farmers must develop trade relations and improve conservation programs, said Lane Werries, Illinois Director of Agriculture.

Speaking before an audience of students, staff, faculty and alumni at the 3rd annual All-Ag Banquet, Werries said that since he took the job as head of the Department of Agriculture three years ago, he has worked in both projects.

He told of his trip last fall to the People's Republic of China where he met with members of that country's agricultural community. As a result of that visit, he said, most of the Illinois-based companies that accompanied him are now developing trade with that country.

"The only way we're ever going to be good traders with China is to go over there," Werries said. "We can't sit on our hands.

He also advised farmers to look for ways to increase and upgrade their own production efficiency. He said recent estimates put soil loss at 12 tons per acre annually. About 40 percent of Illinois's 24 million acres of the state's produce producing land, loses more than the average, he said.

One way to improve conservation would be to decrease the number and direction of tillage passes, Werries said. He also said that more money needs to be spent on conservation.

Fabric arts topic of museum talk

M. Joan Lintault, associate professor in the School of Art, will present a slide show and lecture titled "Japanese Shibori and Indian Tie-Dying," at 4 p.m. Wednesday at the University Museum in Faver Hall.

Lintault, who has studied fabric as an art medium, recently returned from a sabbatical in Japan where she studied methods of decorating fabric with intricate designs and patterns.

The museum is featuring an exhibit on Japanese tie-dyed kimonos by Marilyn Royson that will run through March 8.

SIU law students 4th in moot court

Morgan Falkner
Staff Writer

SIUC placed fourth of 10 schools over the weekend in the 25th annual Midwest Regional of the Philip C. Jessup International Law Moot Court Competition at the University of Illinois Law Building.

Second-year law student William Knopp of the SIUC team captured top honors in the oratory part of the competition, with a 112.5 average score.

North Carolina, which was the competition, beat Indiana University-Indianapolis in the final round Sunday afternoon. North Carolina advanced to the semifinals in Washington, D.C., in April.

The competition, held at SIU-C for the first time, centered around a hypothetical case, Naturalia vs. Industria, involving the nationalization of a corporation in a developing country.

A St. Louis University professor of international law, Isaac Dove, was one of the judges of the competition and said he was "very impressed by the quality of argument." Dove, a former SIUC faculty member, said the law students exhibited a "great deal of polish."

The scoring of the competition was based on written briefs which were submitted prior to the competition, and five rounds of oral courtroom debate.

Steven Kaeser, president of the SIU-C Chapter of the Association of Student International Law Societies and coordinator of this year's competition, said that recognition for the SIU-C Law School was a benefit of hosting the 3rd annual regional.
PRIMARY ELECTION AND NON PARTISAN REFERENDUM NOTICE

Notice is hereby given that on TUESDAY, MARCH 20, 1984 at these polling places

**DEMOCRAT PARTY and REPUBLICAN PARTY**

for the offices of

- President of the United States
- United States Senator
- Representative in Congress-22nd Congressional District
- State Senator-38th Legislative District
- Representative in the General Assembly-116th Representative District
- Clerk of the Circuit Court (1st Judicial Circuit)
- Coroner
- State's Attorney
- County Board Members (for all seven districts of Jackson County)

and to elect:

- Delegates to the National Nominating Conventions
- Alternate Delegates to the National Nominating Conventions
- Precinct Committeemen

The polls will be open from 6 a.m. to 7 p.m. on March 20, 1984

Dated at Murphysboro, County of Jackson, State of Illinois this 27th day of February, 1984

Sig Kaps, Delta Chi take ‘Oscar’

Theta Xi top winners repeat

By John Racine

Staff Photo by John Racine

Scot Hoke, left, and Jim Murphy perform at the variety show.

And for the second straight year in the combined groups division, Alpha Gamma Delta and Alpha Tau Omega fraternity were unsuccessful in capturing SIC’s answer to the Oscar from Sigma Kappa and Delta Chi. Alpha Gamma Delta’s and ATO’s show, “In Search of Oz,” was original, lively and well produced and lacked the gaffes and gags that plagued other shows, but it didn’t win the judges’ votes.

The team of Sigma Kappa and Delta Chi put on an entertaining show with a “Salute to Hollywood,” filled with dancing and many of Hollywood’s trademark tunes. It was a repeat of the group’s winning “Salute to Broadway” last year and of “New York, New York” from Love — a formula apparently for Theta Xi success.

“In Search of Oz” won every creative award except the one for best sets, for which it tied with Delta Chi Sigma’s show. The Inter-Greek Council also sponsored the show.

The variety show had a problem with length again. The program lasted three hours, one hour shorter than last year.

Much of the credit for the shortest show goes to improved narration. Brent Lancaster and Delta Zeta sorority member Christy Wyrostek were the master and mistress of ceremonies. Lancaster hammed and did magic to entertain the crowd while Wyrostek remained on stage and played the victim to the jokes.

The Black Fire Dancers took top honors in the small group category with a reasonable facsimile of Michael Jackson’s $1 million “Thriller” video. The group won a $100 cash prize from American Express.

Five members of Phi Beta Sigma fraternity stepped their way to second place in the intermediate class with a “Sleep Show.”

Andrea Walton took first place and $50 from American Express in the small group category. She sang “Holy One” and received cheers from the crowd of about 200.

Crash near home kills pilot, 16

MANHATTAN (AP) — A 16-year-old pilot was killed Sunday when the single-engine plane in which he was soloing plunged to the ground in rural Wood County about 150 yards from his home, authorities said.

The county sheriff’s office identified the teen-ager as Matthew Maischle, of Manhattan Township. Sheriff John Shirley said the boy had a solo permit and was the only one aboard the two-seat Cessna 152 aircraft.

No other injuries or ground damage were caused by the crash, which occurred in an open field about 12 miles south of Joliet.

Oh, sum we could cut down on the sizes, use artificial cheese, soup on the items and then sell it for two for one. But we just don’t believe in doing business that way.

For over 30 years, we’ve been making the best pizza we know how, and we’ve been given it free, in 30 minutes of less. Call us tonight.
Engineering pentathlon tests students' skills and imagination

By Phil Milano
Staff Writer

Having the special skills of an engineer would be a prerequisite, a help during National Engineering Week's Pentathlon from 9 to 11 a.m. Thursday in the Technical Careers Building.

Each pentathlon event, sponsored by student engineering organizations, was based on an engineering principle.

The most Charting event, sponsored by the Institute of Electrical and Electronic Engineers required contestants to find their way through a computer maze in the shortest possible time and with the least number of moves.

One engineering student made it through the maze in 300 moves and 340 moves. Another contestant, by wildly pursuing the cursor keys in rapid succession, finished in 84 seconds with 50 moves.

Joe Magee, interested in engineering mechanics and materials, won the event with a time of 10 seconds.

Another event, sponsored by Tau Beta Pi, an engineering honor society, was the egg drop. It emphasized skill in structural design in order to drop a raw egg five stories from the top of Tech Building A and not break it survive intact. A special egg package was necessary. The package had to drop near a black "X" on a white sheet below.

The tension was high as Ercan Alp, a graduate student in engineering mechanics and materials and a part-time faculty member, opened his container after it had plummeted to the ground. His scrambled results stunned the spectators.

For Bill Palmer, of Cobden, graduate student in engineering mechanics, the principle for success in the egg drop event was not to tamper with a winning design. Using the same container that won for him last year — an orange juice can packed with foam rubber, inside a potato chip can, with a layer of bread dough between the cans — Palmer dropped the egg just 29 inches away from the target.

He credited fins on the package for the accuracy of the drop.

Persons acrobatic at throwing paper airplanes had a good chance to win the aircraft design competition, sponsored by Blacks in Engineering and Allied Technology. Contestants were required to throw a paper airplane of their own design down a hallway for as much distance and hangtime as possible.

Andy Sibrel, senior in engineering mechanics and materials, won the event with a hangtime of 2 seconds and a distance of 324 centimeters.

The America Society of Mechanical Engineers sponsored the mousetrap competition, in which contestants had to build a mousetrap-powered vehicle. Darryl Leftwich, senior in mechanical engineering, won with a distance of 62 feet 3 inches. He also won the pentathlon for the second consecutive year.

The compressive structure competition was sponsored by the Society of Women Engineers. Contestants had to build a structure of no more that 10 computer cards and place it on a compression device. Leftwich won the event with a structure that sustained 3.15 pounds of pressure per gram of weight.

Another event capping off Engineering Week was the toy design competition, sponsored by Turco Manufacturing. David Iverson, senior in engineering mechanics and materials, won the event and took home $100 with a wood car-boat-airplane powered from he estimated took eight hours to design and 25 hours to build.

The winners in each category received a beer mug with the event and year engraved on it, and Leftwich received a trophy for winning the pentathlon.

Puzzle answers

1. Call 529-3267.
2. And couples are encouraged to attend. For more information, call 529-2951.
3. Recreation Committee Building Room 124. A brief will be published once and only as space allows.
4. BLACs in Engineering and Allied Technology will meet at 4 p.m. Monday in the Student Center Orient Room.
5. Jackson County Right to Life will meet at 7:30 p.m. Monday in the Community Room of First Federal Savings and Loan Association, 500 W. Main St. For more information call 529-2951.
6. Recreation for Special Populations is sponsoring a tour to New Orleans and the Gulf Coast from March 10 to 17. The package will include transportation and lodging, and cost is $255 per person. The trip is limited to the first eight people to sign up. Registration is open at the Recreation Center Information Desk. For more information call Rick Green or Jay Taska at 536-4537.
7. Morris Library staff is offering LCS terminal instruction from 4 to 5 p.m. Monday and Tuesday and 9 to 10 a.m. Thursday. For more information call 529-5000.
8. Mobilization of Volunteer Effort is having a steering committee meeting at 7 p.m. Monday in the Student Center Curithir Room, to organize the April Red Cross blood drive.
9. Wrestling Club is holding daily organizational meetings and practice. Beginners are encouraged to attend. New dates are 2 to 4 p.m. Monday through Friday in the Martial Arts Room in the Recreation Center. Practices will include conditioning and in the improvement and will run through May 2. Tournament information will be available at steering committee meetings.
10. A slide presentation about spina bifida, narrated by Phil Donovan, will be shown at 7 p.m. Monday in Student Center Activity Room A. The slide show is sponsored by the SHC-Circle-K club.
11. College of Business will offer walk-in advisement from 10 to noon and 1 to 4 p.m. Monday through Friday, for the next two weeks.
12. The Hillsville Pavilion Meet of Natural Family Planning will be discussed at 7:30 p.m. Monday at the Newman Center, 716 S. Washington. The class is free and couples are encouraged to attend. For more information call 529-2957.

Don't make scapegoat of coal for acid rain, Percy declares

By Dave Saelens

NORTH BEND, Ill. - U.S. Sen. Charles Percy denounced a proposed solution to the acid rain problem Sunday and said the shutdown of coal mines that produce high sulfur coal

Percy said he favors a clean environment, but is opposed to taking drastic action before the cause of acid rain is known - especially of that action is going to cost 40,000 coal miners their jobs.

In one of four campaign stops made by Percy Saturday, the 62-year-old senator spoke at the annual Union County Lincoln Dinner, hosted by the Union County Republican Women's Club and the Young Republicans.

Percy, who is seeking his fourth term, told the capacity crowd at the Anna Sunshine Inn that he believes the real problem can be found in the exact cause of acid rain. drastic measures which will cost people their jobs should not be taken.

"I don't even know if pollution from cars is a cause, and I'm not about to buy into coal muggings when we don't know the

Escapée believed to be in Illinois

KINGSPORT, Tenn. (AP) - After five days of a futile search for three escaped convicts, authorities said Sunday they are still convinced one of the men fled to Illinois and the other two remain in Tennessee.

"It is more than just a belief," Tennessee State Police Chief Investigator Arza Carson said of the latter two, whose fate has yet to be determined.

"With the tight surveillance we have here and the fact that nothing positive has developed outside the area, we feel quite sure they are still in the area," Carson also said Sunday the TBI has concluded that a third escapee has fled the state.

He said an examination of fingerprints on a stolen car found abandoned in Glen Carbon, 31 miles northeast of St. Louis, proved inconclusive, but other information has convinced the TBI that Sylvester Alexander fled Tennessee in the car.

He said most of the fingerprints on the car were smudged and could not be lifted off the car's surface. She also said he had been to the escapee's farm in the state.

"The jury was unable to reach a verdict on a jury charge of promoting prostitution and a misdemeanor charge of soliciting a prostitute. Monroe Circuit Judge James Dixon did not set a date for sentencing.

The jury was unable to reach a verdict on a jury charge of promoting prostitution. Monroe County Prosecutor Ronald Waiczakaknski declined to say whether he would attempt to retry Krueger on that charge.

Prof convicted of promoting prostitution

BLOOMINGTON, Ind. (AP) - The lawyer for an Indiana University professor convicted of promoting prostitution and soliciting a prostitute says his client "started a social life," not a prostitution ring.

John Krueger, 56, an expert on Mongolian language and culture, faces a possible nine-year prison sentence and $1,000 fine following his conviction Saturday night.

Krueger remained free on bond after a Monroe Circuit Court jury found him guilty on a felony charge of promoting prostitution and a misdemeanor charge of soliciting a prostitute. Monroe Circuit Judge James Dixon did not set a date for sentencing.

The jury was unable to reach a verdict on a jury charge of promoting prostitution. Monroe County Prosecutor Ronald Waiczakaknski declined to say whether he would attempt to retry Krueger on that charge.

Perspective and key in pursuit of jobs

By Dave Saele
Staff Writer

Erwin was a 40-year-old student majoring in computer science at SIU-C. When he came time for him to graduate last year, he ran an aggressive job search through the Career Planning and Placement Center.

Through persistence and determination, he was accepted at Sangamon State University in Springfield to earn a master's degree in computer programming, and was later offered a part-time position as a computer programmer with the Department of Public Health.

Erwin’s story would not be out of the ordinary except for one fact — he has severe cerebral palsy and has to use a mouth stick to operate a computer keyboard.

Erwin’s story is one of many success stories placement counselors at the Career Planning and Placement Center recall.

Valerie Brei-Parrish, a placement counselor who worked with Erwin, said that although he was a classic example of a severely disabled person, he was determined to achieve his goals.

“After week, he would come into the office for every single interview he could get,” Brei-Parrish said. “Rain or shine Erwin was here to take every test possible.”

In addition to Erwin’s physical disabilities, which included a verbal impediment.

she said he also had his age working against him.

“Erwin’s story shows that it really doesn’t matter how severe a disability is. If a person is persistent and determined, they will get the job they’re looking for,” she said.

Richard Gray, director of the CAPP said many of the success stories that come from the placement center are the result of people’s persistence, following an aggressive job search process. Learning how to interview and “at least taking the advice” of placement counselors.

Marvin DeTomasi, also a placement counselor, recalled a marketing major who graduated last December and wanted to work for a company in Georgia.

Through his aggressive job search, he was successful in gaining a position with the Georgia company, and later went to the placement center saying, “It’s exciting to be able to work for the company I really wanted to work for, doing what I want to do. It seems all worth it when his story achieves their goals.”

DeTomasi said it’s very inspirational to see students like these achieve their goals.

“I think his letter really sums up what it’s all about,” she said. “It’s hard to know where he wanted to work and went out and got it.”

Gray said it is never too early for students to begin preparing their job search strategies.

Insurance agent still selling at age 95

BRADLEY (AP) — Service is the name of the game if you want to be a successful insurance agent. John Krueger says. He should know — at 95, he’s been selling insurance for 60 years.

Hired for part-time service by the company’s founder in 1923, Krueger is the oldest active State Farm Insurance agent, and possibly the oldest active insurance agent in the country.

“It’s not a snap,” says the nimble-minded Krueger. “You have to give people service.”

He still works several hours a day, although he leaves much of the work to his son and his office staff.

His son, Harold, is no rookie either. At 70, he’s been selling insurance alongside his father for 38 years.

The secret to his father’s success, Harold says, is that “he never gives up. He’s always pushing.”

Long-time friend and first senior vice president of the company A.W. Tompkins, 88, credits Krueger’s longevity to his interest in people.

“He enjoys working because he likes people. There’s no question about that,” Tompkins said.

Perry injured his knee in a collision in Thursday’s game with teammate Doug Novsek, and was replaced in the starting lineup Saturday by Harry Centers.

“We considered not dressing him,” Van Winkle said. “I was disappointed that we had to play him as much as we did.”

Dick Ross, Andrew Hocker and Herbert Johnson were the highest contributors to Tulsa’s loss.

FOUR SETS.

The Salukis won the first 12 points and set a school record with 14 aces. Ross had 23 points and No.12 rebounds, and Harris 25 points.

The Salukis lost just briefly, in the first 1-0, before Tulsa gradually pulled away, by as many as 26 in the first half.

The trapping, zone-pressing Hurricane defense was down SIU’C’s halfhandled forces 18 turnovers in the opening half. The turning points in the first half were the key to the ballgame.

Tulsa coach Nolan Richardson said.

The Salukis managed to cut the deficit to 13 at halftime. SIU-C shot 41 percent in the half while Tulsa connected on 60 percent.

“We got a lot of cheap baskets, but our defense eroded them,” Richardson said. “Our defense has just been devastating.”

Perry played only nine minutes, most of the Salukis’ offensive output came from guards Bernard Campbell and Roy Birch. Campbell led all scorers with 28 points, and Birch had 18. Campbell was also the team’s leading rebounder with 16.

Perry had 11 points and nine rebounds. Hunter, who played 35 minutes, had nine points and nine rebounds. The Salukis outrebounded Tulsa, 58-42.

SIU-C made a brief run in the opening minutes of the second half, getting it within nine with 1:39 left, but the home team retaliated with a 15-4 spurt to regain its 20-point lead.

“We had a chance to get back in it, but they score baskets so quickly,” Van Winkle said.

Tulsa, which took 91 shots, connected on 32 percent compared to 44 percent for the visitors.

The Salukas now look ahead to the regular-season finale at Drake, which could determine whether they host an opening round game in the MVC tournament.

“We’re a little off balance right now, with some of our guys not healthy,” Van Winkle said.

Winkle said his team “needed to make sure that we were not happy with this game and that we couldn’t beat Tulsa — playing this way. When we walked off the floor, I told them to put it behind us and start thinking about Drake and the tournament.”

Purdue keeps netters’ season winless

By George Pappas

Staff Writer

In men’s tennis competition Saturday afternoon at the Student Center, the Salukis lost to Purdue 6-2.

Purdue won its third match in a row, beating the Salukis 6-3 at the Egyptian Sports Center. The Salukas must have been able to pull out a win in six matches this season.

There were a couple of bright spots for the Salukis in their losing effort. Gabriel Cech put on another good performance as he dismantled Purdue’s Chris Visconti, 6-3, 6-0. At No. 3 singles, Cech has a 3-3 record, the best on the Salukis.

At No. 2 singles, Lars Nilsson lost his sixth straight as he was downed by Purdue’s Kevin Gregory 7-6, 7-6. Saluki Coach Dick LeFevre said he was thinking about doing a flip-flop in the lineup.

“I think Gabe deserves a shot at No. 2,” LeFevre said. “He has been playing really well. Lars may play No. 3 now.”

Willy Rambo said he wants to do is win a match just to get back on his feet. Maybe he can do it at No. 2.

The Salukas were also delighted to see No. 3 Paul Rauch get back on his feet as he beat Andrew Hocker 7-6, 6-4. This was Rauch’s first win in four matches. He also teamed up with Roeland deKornt at No. 3 doubles for the first time this year and they won 6-4, 7-6 over Mark Costa and Carl Canco.

Other than that, the story was the same for the winless Salukas. Purdue’s No. 1 singles player Adam Able showed what has made him an All-American. Purdue 10 tennis player for the third year as he beat Saluki Pete Lars Nilsson 6-4, 6-2. Able was 3-6, while Winkle fell 6-4, 6-2. Winkle said it took advantage of Winkle’s serve to win the match.

He wasn’t landing his first serve, and one second was landing high in the court,” Able said. “This gave me a chance to break him a lot as I had him in trouble behind the baseline throughout the whole match.

At No. 4 singles, Purdue’s Mark Kozak took advantage of an upset Chris Vincenti, 6-5, 7-6, 10-8. Vincenti got upset during the match over a call and his loss of temper was his downfall in a 6-7, 6-4, loss.

Purdue’s Steve Quanor, 6-2, at No. 5 singles 6-3, 6-1. In doubles, Winkle and Nilsson, 6-4, lost to Able and Gregory 3-6, 7-5 at No. 1. Vincenti and Visconti, 2-4, lost to Mike Seimenea and Brian Dick 3-6, 3-6 at No. 2.

The Salukas’ next match will be against Illinois Saturday at the Egyptian Sports Center.

“We’re going to have a rough time against Illinois,” LeFevre said.

Illinois beat the Salukas 8-1 Feb. 12.
Steele leads women gymnasts to convincing tri-meet victory

By Jim Leva

The Saluki women's gymnastics team won three of four events Sunday at the Arena to beat Illinois State and Indiana. Besides upping its record to 9-16, SIUC improved upon its four-meet scoring average and strengthened its bid on the No. 2 ranking in the central region.

SIUC scored 178.4375 to defeat Indiana, 173.95, and Illinois State, 174.25.

Illinois State had beaten the Salukis Feb. 19 at the Illinois Collegiate Classic, and the two squads were expected to battle it out again. However, the Redbirds lost Betsy Cekander, their top all-arounder who won the ICC all-around with a 37.70, to a foot injury before the meet and trailed the Salukis by 3.5 points after one event and never threatened.

SIUC replaced a 174.30 mark on its average with the 178.00, and boosted its average to 178.875.

Lori Steele led the Saluki attack and was the meet's all-arounder with a 38.30, the second consecutive time that she has broken the 36-point barrier. Steele said she was "shocked" with the all-around honors - her first - but that it will help in upcoming meets.

"This will give me confidence, a lot of confidence," Steele said.

Steele hit her uneven parallel bar routine for the first time this season, scoring a personal best 9.50. Steele, though, lost 0.5 penalty points because she did not use the low bar and she had only one directional change instead of the required two.

"We tried getting away with just her holding the low bar," Saluki Coach Herb Vogel said. "Since this is the first time that she has gotten through her routine, we've just found out that we'll have to change her routine a little bit."

Before, Steele had to improve when she did not use her bar routine, thereby using the low bar and making the second directional change.

Saluki X-Celene Spillman, expected to challenge for the all-around crown, finished fourth with a 35.70. Besides Steele, Indiana's Karen Glad, 36.15, and Tracey Blake, 35.70, finished ahead of Spillman. This was the first time in eight meets that Spillman did not lead the Saluki squad.

Vogel said that Spillman was "tired up" to beat Cekander, and over did it.

"Michelle is putting too much pressure on herself to score as high as what she has been this year," Vogel said.

Women's track team takes 6th at GCAC meet

By Steve Kutos

The Illinois State women's track team swept the distance events and claimed the Gateway Collegiate Athletic Conference indoor championships Saturday at Cedar Falls, Iowa.

The Redbirds, with three first-place finishes by Wendy Van Stielo in the one-, two- and three-mile runs, scored 106 points. SIUC, with first-place finishes from Denise Blackman in the 300-yard dash and Rhonda Mielke in the shot put, finished sixth with 77 points.

"I was disappointed with some of our athletes' performances," SIUC Coach Don DeNoon said. "I think the players rose to the occasion, but they didn't reach out and gain the extra tenth of a second they needed to finish third instead of fourth and sixth instead of seventh."

Blackman broke her school indoor record of 35.90 in the 300-yard dash with a 35.75. She edged Wichita State's Nina Thompson, 36.10. In the 800, Thompson countered by nipping Blackman.

"Denise ran her best but she had some terrible starts throughout the meet," DeNoon said. "That cost her some time and she has to work on getting out of the blocks faster."

McCaulland won the shot put with a 47-foot, 7.5-inch throw. Illinois State's Donna Rollingworth took second far back with a 41-4 effort. It was the first time in five meets that McCauland did not better her school record in the shot put.

Debra Davis finished fourth in the 440-yard dash with a 57.63. Drake's Carlson Blackman, Denise's twin sister, won the event with a time of 55.54.

Kathryn Doelling broke the school record in the 800-yard dash with a time of 2:22.70 and finished seventh.

The balance beam could have been the Salukis' downfall, as it was last week, but Indiana and Illinois State also had problems on the beam.

Indiana won the beam event with 43.50, while SIUC, 41.85, and Illinois State, 42.50, each had seven falls. The Salukis had seven falls off the beam last week at the ICC.

Illinois State Coach Janet Anthony said her squad lacked the "total mental concentration" needed during a meet and it cost the Redbirds.

"We have to learn how to do it every time at a meet," Anthony said. "It definitely took its toll with consistency, our top all-arounder, out."

Except for the balance beam, the Salukis scored at least five points in each event, while Indiana and Illinois State each broke the 45-point mark in just two events.

Gina Hey won the floor event for the Salukis with a 9.80 mark. It was the first time that Hey had competed in the floor exercise since the Missouri Quad Jan. 21, because of an ankle injury.
**Men gymnasts beat Nebraska**

Before the largest crowd of the season, the fifth-ranked SIU-C meet came from behind and upset the defending MVC champions, Nebraska Cornhuskers 278-45 to 265-21 Sunday afternoon at the Arena.

"I think the kids realized that after we lost the last event," Saluki Coach Bill Meade said. "Some teams may have thought we’d just give up, but our boys just kept fighting back. They deserve a lot of credit because the pressure was really on them.

The second-ranked Cornhuskers, 6-3, grabbed an early lead in the meet by winning the first three events and they were up 16-13 at 11:1-1. But SIU-C won the vaulting event 47.13 to 46.75. Nebraska brought back and won the parallel bars 49.30 to 49.10. At that point, the Salukis were down 232.65 to 231.90.

In the last event, the high bar, Nebraska’s John Omela flew off with a 9.3 score. Saluki George Ulan took the win with a 9.45. Then Cornhusker all-around Chris Riegel scored a 9.55 and Saluki Brendan Price countered that with a 9.3.

The Salukis then received a break where Nebraska all-around Wes Stuter fell off the high bar during his routine and scored just an 8.8. With the pressure on, Saluki Kevin Mazzeka came up and nailed his personal best, a 9.6. John Omela scored 9.55, but Saluki all-around John Levy scored the victory with a 9.6 that, along with Mazzeka, was the event’s high score.

It might be expected that with the win over Nebraska, the Salukis will move up in the NCAA Coaches Poll from their present 11th position.

"I’m sure the rankings will change," Meade said. "But I’m not worried about that. But, if I had to rank ourselves, it would be about 10th or 11th.

The rankings come out Tuesday.

The win over the five-time NCAA defending champs means the Salukis are finally up.

"This is the best feeling I have ever had," Levy said. Saluki senior Herb Voss put up a spectacular performance on the pommel horse, winning the event with 8.8 points. This is a big time this season he’s achieved that mark.

Injuries, turnovers spell defeat for Salukis

TULSA, Okla. — Some doubted whether the SIU-C plane, carrying the Salukis basketball team, would ever come down after it departed for Tulsa following SIU-C’s 75-71 loss against Illinois State Thursday in Carbondale.

The plane did come down, and so did the Salukis. 111-90 to the Tulsa Hurricane before 9,200 spectators at the Assembly Center.

The loss dropped SIU-C, 7-8 in the Missouri Valley Conference, temporarily into fifth place with one game left — at Drake Thursday — in the regular season. Creighton, 7-2 with two games left, was idle Saturday.

The Bluejays play Wichita State at home and at Bradley.

For the Hurricane, 15-2, 23-2 overall, it’s the sole possession of first place in the MVC. Illinois State closed its second straight, 34-47 to Nebraska.

SU-C was hampered by injuries. Nate Buffalo missed his second straight game due to a knee injury, and center Ken Perry did not start for the same reason.

Despite a number of setbacks Friday, the Saluki men’s track team — back on the track for the first time since the NCAA indoor championships in St. Louis — continued their streak of consecutive Missouri Valley Conference championships Saturday at the MVC meet.

The Salukis scored 197 points, which was 57 more than second-place Drake (140), and 13 points more than third-place Wichita State (184). The team was idle Saturday.

The Salukis 197-point score was their highest since the MVC indoor and outdoor meets in 1984.

Hartog said that the Salukis lost 20 points to their opponents because of injuries and bad performances. Perry Duncan produced the first Salukis lead of the meet when he was able to compete Saturday. Saturday was a different story.

"The kids realized they had to be at 100 percent," Hartog said. "They were the only exception," Hartog said. "We had a great day.

All told, the Salukis set six records, won three events and established a meet record with their 197 points. A Saluki lead was then established two MVC records. Friday night his team set the national record in the 1,500 dash, 3:43.61.

Tom Smith took third in the shot (33-1) and second in the discus with his personal best throw of 145-6. John Sayre took second in the triple jump and sixth in the 350-pound throw.

Sayre set a MVC record in the pole vault, 14-11 1/2, which was placed in the intermediate height category.

The MVC distance medley team of Mike Elliott, Elvis Forde, Mike Keane and Edinson Wedderburn took first and set a new MVC record in the event.

Forde ran the 400-meter leg of the event in a time of 49.15-2. It was the first time the event has been run in the MVC championships.

Mike Franks ran an "incredible" 300-yard dash, Hartog said. Franks was first with a time of 35.46.

Elvis Forde ran the fastest indoor time in the country in the 600-yard dash. Forde’s time of 1:28.70 is the fastest in the MVC.

Bunyan came from behind to place second in the two-mile run won by teammate Mike Keane.

Wedderburn finished third in the 1,000-yard run in 2:11.0. Illinois State’s Mike Sullivan set a MVC record with a time of 2:08.67.

Another first-place finish for the Salukis was in the long jump, where David Grothhausle led with a 23-4-1/4. Gavin Harnharter placed third in the triple jump with a 46-5.

The Saluki mile relay team once again placed first, but did not come close to their world best time at 3:03.84. Saturday they ran a 3:13.18. Hartog held Duncan out of the event because of his ankle injury. Mark Hill took his place.
