Bombs kill 3 in Iran; ‘U.S. agents’ blamed

By The Associated Press
A wave of bombings killed at least three persons in Tehran on Monday, and Iran’s police blamed the blasts on “U.S. agents.” Occupied U.S. Embassy came under gunfire three times overnight from “anti-revolutionary Iran’s tanks” in passing cars, and militants inside the embassy said revolution guards returned the fire. Tehran radio reported.

The militants moved some of the American hostages from the embassy to safe sites to make another U.S. rescue attempt more difficult as Tehran radio said. Iranian officials promised to return the bodies of eight U.S. convicted spies who died in last week’s abortive attempt to free them.

At a meeting in Luxembourg, leaders of America’s European allies agreed to impose sanctions against Iran unless “decisive progress” is made by May 17 toward the destruction of the 31 American hostages held since Nov. 4.

Moustapha Mirsalim, who heads Iran’s police operations, said in a televised interview in Tehran on Monday that the hostages were killed in an apparent reference to the hostage rescue attempt.

The bombs that exploded Monday had been set under a car in a parking lot and exploded when driving, and in front of a bank and drug store. They said a fifth bomb was detonated.

A telephone caller to the Paris office of exiled former Prime Minister Shapour Bakhtiar said the first two explosions of the “Shock Group Khorraramdin,” named after Ali Dara Bakhtiar, a Bakhtiar tribesman who had not heard of the group, said the caller warned that such bomb attacks would continue until the destruction of Ayatollah Ruhollah Khomeni’s reactionary and clerical regime.

A revolutionary guard commander himself only as Ali, said 34 persons were injured in the parking lot blast, and 10 cars were destroyed. Asked the multinational bombings, the guard commander said: “I’m certain that it is the work of those Americans who infiltrated into Iran and their agents.”

Iranian officials claimed after the rescue effort failed last week that a number of other Americans also had infiltrated into Iran. Pentagon officials in Washington declined comment on the claims.

Iranians also claimed to broadcast a statement by militants saying some of the 50 Americans in the occupied embassy in Tehran had been moved.

Shaw says Iranian student ban, education philosophy conflict

By Diana Penner
Staff Writer
We have an obligation to analyze any resolution, but a rapid resolution of the question of opposition from the students does not exist. It is not the issue of student participation in all issues of the University. Shaw said he has no decision to suggest to the board on the student policy.

Shaw said the University must take into consideration its basic values and traditions and keep in mind its primary goal of allowing students to access to higher education, regardless of their political views.

Acting President Hiram Lesar said implementing the resolution would be “contrary to the University’s normal policy and contrary to the whole history of education.”

The resolution, introduced by Rep. Gerald Bradley, D-Metamora, was opposed from the beginning by most who wanted it unconstitutional. Supporters of the resolution say it is up to the military governments to make it constitutional.

Rep. Bob Richardson, D-Metamora, said Monday he does not wish to co-sponsor the resolution at this time, but he will wait to make a decision until after amendments are made.

Vance disapproves of rescue mission, resigns in protest

WASHINGTON (AP) - Secretary of State Cyrus R. Vance, apparently kept in the dark about a decisive White House meeting, resigned Monday in a public clash with President Carter about the aborted hostage rescue mission in Iran.

An administration official who requested anonymity told The Associated Press that Vance had no idea Carter intended to consult with other key advisers about the rescue operation at a National Security Council meeting on Friday, April 11.

Vance was on a brief Florida vacation. He returned after the weekend and registered his dissent at a second council session April 15. By then, according to this account, Carter virtually had decided to approve the operation.

Vance quietly submitted his resignation to Carter last Monday, before the rescue attempt failed in an Iranian desert Thursday night because of equipment failures and other mishaps.

Vance's resignation marks the second time in seven years that a secretary of state, supposedly the chief American foreign policy expert, has left after losing a conflict with the president's national security adviser.

Vance's departure prompted speculation about other resignations within the administration. Vance had been kept in the dark about a decisive White House meeting, according to this account, Carter virtually had decided to approve the operation.

About 20 graduate students, citing a lack of input in both the new and old student trustee guidelines, contested the election scheduled to be held Wednesday along with the initial Undergraduate Student Government elections.

Jim Dudd, a graduate student in the Center for the Study of Crime, Justice and Correction, said he will present a petition to Chancellor Kenneth Shaw, Acting President Hiram Lesar and Vice President for Student Affairs Bruce Swaine on Tuesday.

The group is protesting the election because the Graduate Student Council has not had input into the drafting of the election guidelines.

Graduate students contest election; cite lack of trustee guidelines input

Undergraduate Student President Pete Alexander wrote the new guidelines and presented them to both the student body and the GSC in April 3. The senate rejected the guidelines, but the GSC did not.

At that time, the GSC objected to the number of signatures needed to “write-in-vote,” the advertising expenditure limit and the poster display limits.

The two student trustee candidates signed a paper saying they would abide by the new guidelines, Alexander said.

Dudd said the protest will be continued until the election is postponed until fall with the current trustees, Bob Dice, who came out of the duties of the office until then, or that the election be moved back two weeks until the GSC has had a chance to amend the guidelines.

Dudd said the group would also like to see more students run for the position.

Dodd said the protesting students will recommend either that the election be postponed until fall with the current trustees, Bob Dice, or that the election be moved back two weeks until the GSC has had a chance to amend the guidelines.

Dodd said the group would also like to see more students run for the position.

Gus Bode

Gus says you can't expect grad students who are studying to be professors to like anything about the undergrads.

Proposed tenant union needs student assent

By Karen Guille
Staff Writer

A referendum dealing with the establishment of a student tenant union will be on student election ballots Wednesday.

The referendum, sponsored by the Student Health Policy Board, asks students if they would support a $1 refundable fee to form a student-directed tenant union, which would work with students, the Carbondale Housing Code Commission and the student's attorney to enforce health and safety codes in off-campus, off-campus housing, according to Jan Curtis, one of the nine members of the policy board that advises the University's Student Health Programs.

The money from the fee would be used to set up an office and hire a full-time coordinator to work with a student staff, said Curtis, a doctoral student in higher education.

The task force is concerned with violations of health and safety codes in off-campus housing. Curtis said: "Some students are not aware of the city code commission, and if they are, they may be reluctant to complain about code violations because of the fear of retaliation from their landlords."

Because the student population is transient, many housing code violations are not reported, Curtis said. The tenant union would try to eliminate some of the long-standing health and safety code violations that go unreported every year, Curtis said.

The referendum would need the support of at least 50 percent of the students voting in the election before being presented to the Undergraduate Student Organization and the Graduate Student Council for consideration, she said. After being considered by student groups, the referendum would be presented to the Board of Trustees.

Student Attorney Elizabeth Streeter is sponsoring the formation of a student tenant union.

"Most other schools have tenant unions," Streeter said. "The University of Illinois Champaign-Urbana or provide an additional level of administrative hierarchy, two issues that were part of his platform when he was applied for the chancellor position last spring.

Shaw said the committees will "determine proper subjects for future studies and report back in about one month. They will be like any other temporary committee on campus."

In a letter to Shaw, Faculty Senate President Lawrence Dennis wrote, "I have to register my dismay that the task force to study Academic Affairs includes no faculty member who does not also hold an administrative title of some sort."

Shaw responded, "At this late date, I do not believe that changing the task force would be of any real benefit."

The Faculty leadership will move on a resolution regarding the absence of a non-administrative faculty member on the Academic Affairs committee at the last meeting of the 1979-80 senate Tuesday.

The task forces, each chaired by a member of Shaw's staff, include academic affairs, chaired by Howard Powers, and student affairs, chaired by Thomas Britton acting as chairman; administrative affairs, Dennis Wilson, chairman; and public affairs, chaired by Vice Chancellor James Brown.

Shaw's task forces draw criticism

By Chuck Hemphill
Staff Writer

Chancellor Kenneth Shaw denied Monday that the four task forces he created to study cost effective cooperation among the various SIU-C campuses would inhibit campus autonomy or provide an additional level of administrative hierarchy, two issues that were part of his platform when he was applied for the chancellor position last spring.

Shaw said the committees will "determine proper subjects for future studies and report back in about one month. They will be like any other temporary committee on campus."

In a letter to Shaw, Faculty Senate President Lawrence Dennis wrote, "I have to register my dismay that the task force to study Academic Affairs includes no faculty member who does not also hold an administrative title of some sort."

Professors cite various issues in reaction to Iran rescue try

By Andrew Zinner
Staff Writer

The ill-fated rescue attempt made last week to free the hostages in Iran came as a result of increasing pressure on President Carter, and factors such as weather conditions and bureaucratic impetus dictated the time to try the mission, according to an informal survey of campus authorities on the military and politics.

Manfred Landecker, professor of political science, said the bureaucratic costs of such a lengthy planning stage made implementation of the mission mandatory.

He also cited the situation in Iran as being one of the causes for the rescue attempt at this time. "It became apparent that if the Iranian President Bani-Sadr is not in control, and after the failure of the UN commission to improve the hostage situation, something had to be done."

David Derge, a political science professor, echoed that deteriorating weather conditions, such as the coming of warmer weather, had an effect on the time of the mission. Technical questions had to be weighed along with political ones, he said.

Domestic pressure on Carter was a driving force behind the rescue attempt, according to M. Jacob Carroll, professor of history. "Carter had to show he wasn't weak, that he was doing something. Pressure forced him into taking chances he might not otherwise have taken."

Carroll said the rescue plan, with its many details, had too much of a chance to go wrong. He said there were "too many places where the plan could have broken down." He added that military views, which may have been heeded in the decision, can be grandiose. 

"Especially in the Special Forces, (who were attempting the rescue) there is an attitude that anything can be accomplished," Carroll said. He described the rescue plan as a very shaky, long-shot move. Members of Congress, especially Sen. Frank Church, D-Idaho, have leveled criticism at Carter for his secrecy and apparent disregard for provisions of the War Powers Act, passed in 1974 to limit executive discretion of war-making powers.

Landecker said that, according to last Friday's New York Times, Church and Sen. Jacob Javits, R-N.Y., had sent Carter a letter earlier in the week warning him to follow the War Powers Act before Congress prior to any military advances made anywhere.

"Tougher moves in the last couple of weeks may have tipped off the senator's suspicions, but I don't think they had gotten wind of the plan ahead of time," Landecker said. "Recent considerations of mining and naval blockades indicated that Carter was considering harsher measures."

Derge pointed out that in crisis situations, presidents have historically garnered the support of the American people. This is the case again, according to the latest Gallup Poll. The poll, taken last Friday, reported 71 percent of respondents supporting the rescue move, compared to 18 percent who disagreed.

At least one person disagreed with the decision to attempt the military rescue enough to resign his position in Carter's administration. Secretary of State Cyrus Vance announced his decision to quit Sunday night. Apparently over the weekend of the Act, Vance was being considered for the military rescue plan as a way to preempt the Iranian military action, according to reports.

According to Carroll, Vance felt he was being pressured to resign his position in Carter's administration. Secretary of State Cyrus Vance announced his decision to quit Sunday night. Apparently over the weekend of the Act, Vance was being considered for the military rescue plan as a way to preempt the Iranian military action, according to reports.

The American people apparently supported the attempt, according to the latest Gallup Poll. The poll, taken last Friday, reported 71 percent of respondents supporting the rescue move, compared to 18 percent who disagreed.

We are outraged! And so is G. Kurt Boyle, the only student presidential candidate who wants student government at SIUC to be a fun organization instead of a junior political science club.

Boyle’s campaign theme, “I am outraged,” is a call for change that is so sorely needed. Just a few examples of the outrages that student government gets itself into can be found in the incredible chain of election events in the past few weeks.

One candidate craved food because current Student President Pete Alexander appoints—of all people—another candidate’s roommate as election commissioner. A vice presidential candidate appointed to the student activity fee allocation board, is accused of being in a position to influence votes through his role on that board.

All followed by lengthy investigations, more allegations, and an outrageous waste of students time.

Boyle says the first thing he’d do if elected would be to fire his vice president. There Wurtz.

Mark Michalic’s two years of experience as a student trustee at Rend Lake Community College make him the best choice to replace departing student trustee David Saal as SIUC Student Trustee.

Although he admits that there are differences in being a trustee at a junior college and doing similar work at a zillion public universities, both boards work basically the same way, especifically that they have pluggd student government for years.

For starters, he suggests painting glowing yellow lines on the dorms so students will be able to find their way home easier on weekends.

Boyle takes student government in the right perspective. He said the presidential debate April 15 to attend the Ted Nugent concert as a student. When asked about his absence from the debate Boyle said, “I’m rather spending the evening with a few thousand of my constituents rather than have a battle of wits with five unarmed men.”

Boyle’s ideas are good ones, but the Daily Egyptian proposes the following: Vote for Boyle and write in the name of Greg Materna as Boyle’s vice president.

With Boyle being in charge of the public relations end of student government, Materna will handle the kinds of hell internally. Materna demonstrates a wiser view of student government and recognizes the need for student leaders to be more responsible rather than irresponsible.

Materna can be an activist, somewhat of a radical, rather than a student politician.

Which brings us to the only problem student government would have were Boyle to be elected: the seniors. As seniors under an outrageous administration, they would be encouraged to include that position on their resumes. Pity.

For the beginning of better student government at SIUC, vote Wednesday with fee statement and ID for Boyle and Materna.

---

Michalic was also experienced in student government at SIUC, where he was a student trustee at the same time as Michalic.

The former workings of both boards are parallel. I’ve been there before and I know how the decisions are made,” he said.

Michalic also takes a very realistic look at the possibility of an SIU Student Trustee running on a ticket as an advisor to a regular voting member. “If no SIU Student Trustee will obtain a vote in the next couple of years, but Michalic says he will push for it to govern himself on my board. The idea of student trustees actually getting votes is a down the line. As far as a long-range term for getting a student vote, Michalic wants to combine the efforts of those that support student trustees in Illinois, who then would go collectively to the IBHE and the legislature.

“We can get the ball rolling now at the grass roots level. In a couple of years, we could convince the governor that students are responsible enough to vote. Michalic is also experienced in something SIUC will have to do next year—searching for an admission and student services (RSC) to have a visa to get to academic affairs, since current Vice President Frank Horton is leaving June 1 to become chancellor at the University of Wisconsin-Milwaukee. And other presidential candidates can be expected to leave. The West Frankfort native was on the Presidential Search Committee in 1978-79. and had to examine 106 presidential applications. Since he was also a board member, he helped trustees in the final interviewing process.

He also has experience in student government. He has been a SIU student senator this year, and was student body president at Rend Lake for one semester. Michalic also favors open meetings, although he stresses that he sees no problems in current board dealings.

But if it ever comes about that the trustees violate the open meeting act, I will tell the board members. And if that doesn’t help, I will not hesitate to tell the public that the board violated the open meeting act.” Michalic said. "And I believe in openness at all times."

Michalic favors SIUC going Division 1A—the larger division in athletics for the grounds that the University will participate in teams resulting in more revenue.

However, I will look very closely at the athletics fee increase, if elected. A lot more research needs to go into that issue. "Michalic also promised to look objectively at the athletics fee increase once we have the board votes this fall on whether to eliminate this spring’s $40 increase or continue it." Michalic is a good listener. At Rend Lake, he was part of a statewide committee that traveled throughout the Midwest getting student trustees opinions about their jobs.

Michalic’s experience as a trustee has also earned him the endorsement of the Black Affairs Council.
Some inadequate lighting deliberate

By Leanne Wannam
Staff Writer

Sections of SIU-C's campus have been deliberately left with inadequate lighting to encourage use of the Brightway Path, a three-mile-long foot route on campus established to provide a "well-lit" path for night travelers, according to the Director of the University Police.

"We can design programs for people and make it safer to walk on campus but unless people really use the programs we have accomplished absolutely nothing," said Thomp­son Woods, a senior in zoology, and William Brown, a senior in accountancy, take a ride on the recently instituted Night Safety Bus.

She said she found the schedule in the Daily Egyptian confusing. "I had some confusion over the schedule and it is the rule for the bus, she said.

Busch estimated that 25 to 33 people ride the bus each night. The bus costs $82.50 a night to run.

Another complaint students have about the bus route is the stops. Some students say the bus is available for men and women who fear for their safety.

Leanae Mazur, a junior in coal­mining technology, said she was very pleased with the service the bus provides. "I just ride the bus for transportation, but I don't think the walk to Southern Hills is very safe," she said.

Mazur said her husband and son, who has control over their safety Sunday through Thursday nights. The women's transit reduced its services when the bus began operation.

The transit is used by two cars rather than the three it used previously.

Gayle Remey, who said she rides the bus for safety, said, "A lot of the men I don't think the bus is available for them."

I said she found the schedule in the Daily Egyptian confusing. "I have some confusion over the schedule and it is the rule for the bus, she said.

Atray, Ritter enter western hall of fame

Oklahoma City (AP) - Terence Atray was named in the Hall of Fame of Great Westerners at the 15th annual Western Heritage Awards Banquet at the National Cowboy Hall of Fame and Western Heritage Center.

Atray was described as one of the most famous men not only in America but in the world.

The flying tents and quick draw of Tex Ritter were shown in film clips on a screen during the ceremonies, and Ritter was named to the hall of fame posthumously.

The judge, C. V. Shbakker, succeeds to the charge of the plaintiff, S. Shankland, in a scene from "Trial by Jury," which was presented April 26 and 27 at Quigley Hall Auditorium.

Cast adds flavor, talent to funny comic opera

By Carrie Sweezy
Staff Writer

Today a woman must sue her husband in court to end a legal bond of marriage, but in past centuries the husband was for a woman to sue her beloved in court for not marrying her.

With such an incident in mind, W. S. Gilbert, Arthur Sullivan, and Richard D. (the G. and A. of Sullivan's d'Altons) created the hilarious cantata Trial by Jury, which was performed Saturday and Sunday by the Margene Lawrence Opera Theatre at the Quigley Auditorium.

The one act performance was set in 1853 and centered around the Court of the Exchequer, where Angelina Sarah Shankland has brought her former-suitor Edward John Lawrence to court for the breach of his promise to marry her.

The subject matter itself had the basis for comic potential and the cast took this lead and went on from there. Under the direction of Jack Darre, a graduate student in opera music theater, the cast added enough flavor and talent to keep the audience satisfied.

the audience laughing throughout the performance. Angelina, the plaintiff, is depicted as a poor broken-hearted and helpless bride-to-be who was left standing at the altar in a crowded courtroom. She really, however, is a cunning and witty woman. Edwin, who is proposed as the judge, is proposed as the judge, and when he realizes this, but no one else does. Angelina's lawyer, who she wants and uses her femininity to win the hearts and sympathy of the judge and all-male jury.

Her bridesmaids also use their beauty to entice people in the courtroom and their voices to tell of Angelina's "woes." Edwin, seeing through the plot, comes to his own defense and describes how it is "to try to be in love with a boring woman." The results are par for the course. Just as he wins the empathy of the judge and jurors, Angelina lets loose a tear, flutters her eyelashes and subsequently wins back their votes, of course.

Kazee superbly played the part of a frantic and frustrated man who does not want to be a bridegroom, at least not with Angelina as his bride. His facial expressions captured the audience's attention from the moment he entered the stage and if not for his comical and vibrant displays of emotion, the part of Edwin would have been dry of humor.

Speaking of himself as "another's love-sick boy," he is disguised at Angelina's phony portrayal and at what appears to be an unsuccessful attempt to hid himself from her loving advances. Enchanted at the bridesmaid's beauty, he uses every available moment to flirt with them, proving the point that he was not ready for marriage.

Hans Ashbaker executed the role of the old, rich and senile judge with perfection. His voice was loud and powerful and his mannerisms quite comical. Revealing that age is no barrier in the judgement of law or beauty, he solves the case in a most logical fashion, he proposes to Angelina himself.

With no spoken dialogue in the presentation, the cast had to rely on their singing abilities to carry off the opera successfully. With the talent present this was easily achieved and the results were a humorous mockery of a supposedly solemn legal proceeding.

Dance company to perform combination of styles, forms

James Cunningham and the Acme Dance Company, an institution in the competitive dance world, will perform at 8 p.m. Friday in Ballroom D of the Student Center as the final event of the season for Center Stage Productions.

The company's theater pieces merge reality and fantasy and combine various elements of light, forms of dance, yoga and acrobatics. The company performs its pieces either in extravagant costumes or in the nude.

Members of the troupe come from backgrounds ranging from basketball, football and yoga to writing, university teaching and directing for television. The company also teaches at colleges, elementary schools and high schools in addition to performing.

Center Stage Productions notes that some scenes in the performance will be of mature subject matter. Tickets are $3 for students and $4 for the public and are available at the Student Center Central Ticket Office or at the door the night of the performance.

Activities

Coalition of Progressive Social Scientists, meeting, 7 p.m., Activity Room B.
Sigma Chi Alpha, meeting, 7:30 p.m., Activity Room A.
Muslim Student Organization, meeting, noon, Activity Room B.
Southern Illinois Roadrunners, meeting, 7 p.m., Activity Room B.

Students in the Advancement of Management, meeting, 7 p.m., Activity Room B.

Alpha Lambda Delta, meeting, 6 p.m., Ohio Room.
Free school, class meeting, 7 p.m., Kasiski Room.
Some poor lighting intentional to encourage special path use

(Continued from Page 5)

absolute safety is impossible," Vice President for Student Affairs Bruce Swinburne said. According to Harrell Lerch, building maintenance supervisor for the Physical Plant, when the Brightway Path was established, lights were not put only those fixtures along the path, leaving the rest of the campus dark.

Patty Follansbee, a graduate assistant working for Women's Services, said "The idea of not lighting certain areas is to discourage people from taking shortcuts through those areas."

The perimeter of the path follows Lincoln Drive from the Student Center to Woody Hall and reaches into the Brush Towers, Thompson Point and Small Group Housing residence hall areas. The path also covers Grand Avenue near Hall and then reaches out to Harrel Lerch. The inner circuit of the Brightway path crosses campus with a concentration of well-lighted paths extending from the Life Science buildings to Davies Gymnasium. The side streets leading to part of the path are given first priority for snow removal.

"It is necessary to have it spread out for the benefit of the most number of people. I know there are some people who would rather walk in a straight line but that idea is not viable." Clarence Joe Dougherty, vice president for campus services, said.

Lerch said the path is lit by three types of lights. Pedestal lights are the shorter concrete fixtures on campus - 12-foot tall lights on campus walkways and 20-foot tall lights on roads that are part of the path. Pedestal lights located both on and off the path are unique in the quality of light that they produce.

If you’re walking toward a pedestrian light, you wouldn’t be able to see a person at a distance. The quality is very low in terms of safety, he said.

As of last week, 25 lights along the path were burned out and about three more were missing fixtures. Four consecutive lights along the path on Lincoln Drive were not lit.

Physical Plant employees do not regularly maintain the path, but rather rely on people who walk the path and the University police to report burned out lights and broken fixtures.

"We do not do a routine check of those lights," Lerch said.

If a report of a burned out light is received during the week, the Physical Plant replaces the light the same day. But, when a burned out light along the path is received on a weekend, the light would not be replaced until the following Monday.

"We are on overtime to repair a light," he said.

According to Trummer, the path has been extended since its inception. But, a comparison of the Brightway Path map published Jan. 17, 1979 with the current Brightway Path map printed March 27, 1980 shows the path has been cut and no longer includes a route from the Technology Building-D to the Arena’s classroom entrance.

Dougherty said, "To light the entire campus would not be in line with requests from the president of the United States to conserve energy.""Trummer said continual vandalism of the lights in Thompson Woods is the reason the area has not been included as part of the Brightway Path. He said overgrown trees and shrubbery in the woods also make the area a safety risk to night travelers. Those 'problem' areas are also inaccessible to police motor patrols.

"The path is spread out over so many paths that I don’t think it is as effective as it would be if it was one direct path," Lerch said.

Trummer, Follansbee and Swinburne agree that the Brightway Path alone is not effective in making the campus a safer place to walk at night. But when the path is viewed as a component of the University’s total safety program its effectiveness increases, they said.

According to Swinburne, the University’s safety program has three main parts. The first is transportation, in the form of the 40-passenger bus, available to only those people who feel they are not safe when they walk on campus at night.

The second part of the program emphasizes "raising the consciousness" of female students by making them aware of their susceptibilities to assault when they walk on campus at night.

Swinburne said, Programs offered by Women’s Services and the University Police provide information to female students in areas of self defense and rape counseling.

SUMMER HEALTH PLAN

Continue your S.U. Student Health Insurance Plan for the Summer for $45.00.

Coverage is continuous for those students enrolled for Fall Semester.

Only students enrolled for Fall semester are eligible for Summer coverage.

Benefits

When you require services because of an accident or sickness which commences while your policy is in force, the insurance company will pay for the reasonable medical expenses incurred as follows:

1. if hospital and you will have to pay the first $25.00 of incurred expenses. The Company will pay the next $500.00 of hospital X-rays and lab fees expenses.

2. the plan has a coverage provision which provides for payment of 75% of (a) hospital expenses over the initial $25.00, (b) reasonable and customary surgical and hospital charges, (c) reasonable and customary in-hospital drug charges.

3. the plan also covers a portion of the cost of emergency room services.

The plan carries an annual maximum payable of $5,000.00 for incurred expenses.

Send your check for $45.00 made payable to Upchurch Insurance Agency, P.O. Box 3218, Carbondale, Illinois 62901, along with your name, student I.D. number and home address.

An endorsement card and certificate of insurance will be forwarded by return mail. Claim procedure is outlined on certificate of insurance.

State tests to certify users of pesticides will be offered to students and faculty members at 3 p.m. Wednesday in Room 250 of the Agriculture Building. Certification for a person who will be using pesticides is a state requirement. Tests for the various types of certification will be offered.

The first official meeting of the Southern Illinois Coalition against the Death Penalty will be at 7:30 p.m. Tuesday in Ballroom A of the Student Center. This coalition brings together lawyers, former prisoners, other citizens interested in altering this form of punishment and members of Amnesty International.

The SIU Water Ski Club will meet at 7 p.m. Tuesday in the Illinois Room. The club is new on campus and will be concentrating on ski competitions. All levels of experience are welcome.

National Law Survival Quiz to be broadcast by WSIU

By Chuck Hempstead Staff Writer

Questions and answers regarding common legal problems will be aired at 8 p.m. on Law Day, May 1, over WSIU-TV, with lawyers of national prominence featured to provide the answers.

The program, called the National Law Survival Quiz, will be co-sponsored by the Jackson County Bar Association and the Young Lawyers Division of the Illinois State Bar Association.

A "Call-A-Lawyer Service" will be provided the same day from 8 to 10 p.m. for persons with specific legal questions to obtain free advice. The telephone numbers of the service will be announced during the Survival Quiz, and the caller's name will not be asked. The lawyer-caller discussions will not be broadcast.

David Johnson, associate dean of the School of Law, said the School of Law will participate in Law Day activities this weekend because May 1 conflicts with the students' finals. He announced that the annual alumni golf day and party will be Friday and that law students will present high school classes with information on law as a career option.

Saturday, said Johnson, will be the annual awards banquet night at the Student Center, with Judge Richard Mills, 4th Appellate Court District, as the featured speaker. Book and cash awards will be presented to the outstanding law student writer, the outstanding contribution to the School of Law by a senior, and the top-ranking student in each class. Johnson said.

Tickets are available through Johnson's office for $3.

Canada envoy surprised by U.S. reaction

LOS ANGELES (AP) - Kenneth Taylor, the Canadian ambassador who helped spirit six Americans out of Iran, says he and his countrymen have been surprised and pleased by the American public's warm reaction to their efforts.

Taylor and his wife, Patricia, were honored at a reception Saturday at the home of the Canadian consul general.

"It was an event that had a good conclusion," Taylor said.

"It was a simple, straightforward, understandable humanitarian event which people like to read about on the front page," he said. He cited incidents in which amusement parks gave Canadians free admission, buses offered Canadians discounts and individuals bought them drinks.

Militants stormed the U.S. Embassy in Tehran last Nov. 4, taking American hostages. The six Americans spirited out of Iran with forged documents were not in the embassy at the time.

What are you doing this summer? Why not spend part of it with us?

Plan now to enroll for the regular academic Summer Quarter at Southern Illinois University at Edwardsville

Open Registration: June 10 & 16, 8:30 a.m. until 7:00 p.m.
Summer Classes Begin: June 16, 1980

Courses range from the full 11 week term to 8 week sessions and short term workshops ranging in duration from weekends to 4 weeks.

Courses of instruction are open in all levels from introductory to graduate, offered during the day and evening. The format of instruction varies from traditional classroom to workshops.

Special Interest Courses:
A variety of special workshops for teachers, counselors and school administrators.

A full year of basic French, German and Spanish language instructor, in one summer.
Visiting Student status easily available for students home for summer from other colleges.

THE MORE YOU KNOW, THE BETTER YOU ARE.
Carbondale mini-pumper saves gas, money by using less fuel

By Mary Ann McNulty Staff Writer

Carbondale Fire Department's new "mini-attack" pump is working out just about as fire department officials expected: It is saving money by using less fuel.

After about four weeks of testing for $320 fire truck on calls, Fire Chief Charles McGaughan said it has worked out just about as we expected," said McGaughan. He added the city for the smaller truck, a new concept in fire equipment, in an effort to save money and fuel.

McGaughan explained that the larger trucks owned by the department use more gas because they are so heavy. The mini-attack pumper is much lighter and easier to handle, McGaughan said. The unit is built on a 1976 Dodge one-ton chassis and is powered by a 300 cubic inch V-6 motor. The red truck is a four-wheel drive vehicle with a pumping capacity of 300 gallons per minute. The unit carries the same number of fire fighters as the larger units do.

McGaughan said the pumping capacity is great enough to provide water to fight a fire in a single-family dwelling. The larger units have a 1,000 gallon per minute pumping capacity. The fire chief explained that last winter the department had a lot of problems with the larger units getting stuck in the snow. The larger trucks are also harder to maneuver through towns and are prone to accidents. McGaughan said in the last few years, two trucks have been involved in wrecks while going to a fire scene.

The new pumper is also equipped with a foam and setting agent proportioner used to fight liquid spills and fires. McGaughan said this feature does not make the other units do not have, will be helpful in fighting liquid spills.

"In the long run it will be a benefit to the department and the city," McGaughan said. "It gives us another way to fight fires per minute pumping capacity.

The mini-attack pumper is housed at the city's No. 2 Fire Station on Oakland Avenue and makes all grass and car fire runs in the city, according to the fire chief.

The unit has also been used for most of the false alarm calls in the city.

Reminders of the folks back home fill offices of many Congressmen

Congressional offices in the nation's capital are not the only ones that reflect the personalities of the people who occupy them. They usually also feature some reminder of home, wherever that is.

Rep. Fred Thompson's office in the Massachusetts district includes hundreds of miles of craggy coastline. His district produces 6 percent of the nation's cranberry crop. In the office water cooler there's a wall-size picture of a cranberry bog. There's a Wabanlak aquarium tank and a sign made of wood from the deck of the USS Constitution.

Thompson's office was empty for two years because I didn't want anything hanging from my wall that I didn't like in my district. Studds explained that his office features a star-shaped patchwork quilt of the nation's states. Montana Rep Ron Marlenee brought a piece of state, Montana's republic, from his ranch outside Shelby - there's a bundle of his own spring wheat in his office dowryway.

The wheat came from my fields in South Dakota and grain from an area where my grandfather was one of the first settlers in 1962. The nearest checkers to mine away, he said.

Three Texas representatives have different reminders of home. Charles Stenholm displays tiny cotton bales. Martin Frost has candles shaped like cowboy hats. Charles Wilson has a bumper sticker with the message, 'Secede.'

WASHINGTON - The Army began taking applications Monday for the 1986-1987 academic year for Army ROTC scholarships that offer you the opportunity to attend college and to serve in the Army. The Army said Monday that applications will be accepted for Army ROTC scholarships now through May 10.

Applications are being made available through the Army ROTC program at colleges and universities. The scholarships benefit students at all levels - freshmen, sophomores, juniors and seniors. They also benefit students who attend state institutions.

The Army ROTC program provides scholarships to students majoring in science and engineering. The program offers scholarships that are equivalent to full tuition, and includes a monthly stipend, and a book allowance.

The Army ROTC program is available at more than 170 colleges and universities across the nation. The program offers students the opportunity to attend college and to serve in the Army.

Applications are available at all Army ROTC units and should be submitted by May 10. The Army ROTC program is available to students majoring in science and engineering.

Effectiveness of Night Safety Bus studied

By Mimi Jarzemsky
Staff Writer

The effectiveness of the Night Safety Bus, which is averaging between 200 to 300 riders a night since it began operating March 30, cannot be measured accurately in one month, said Bruce Swinburne, vice president for student affairs.

The bus is a part of a campus safety program which also includes Brightway Security Patrols, Night Safety Transits, safety education programs, and Saluki Patrols.

"We have accomplished a goal to make the campus more safe. That's not to say the campus is safe, that's an absolute term," Swinburne said.

Toni Busch, assistant to Swinburne, said although bus ridership is low, "I think there will be an increase in the use of the bus as time goes on. We want students to participate, and we're looking for an evaluation process. But how do you evaluate the effectiveness of it?"

Swinburne has asked Institutional Research and Statistics to write a study that will measure students' perceptions of the bus system and the amount of sales for the fee, which is composed of three undergraduate, one graduate, student, a representative from the SIC Security Department, a representative from Student Services and Busch. The fee will be monitored to see if it's being used as designed.

"The board will look at summer transit possibilities and may drop the Women's Night Transit cars or drop the bus," Busch said.

Bobby Mahon, a graduate student working in Swinburne's office, said: "You have to give any new system time before you evaluate it."

Students may turn ridership figures with the Women's Night Safety Transit ridership figures.

In the winter months, about 150 women use the transit cars each night, Majka said. In the spring and summer, when the weather gets nice and daylight hours are longer, ridership drops because more women walk.

Since the bus began operating, ridership of the Women's Night Safety Transit has dropped to about 100 passengers a night, Majka said.

"About the time that the bus started, daylight hours started getting longer and more women were walking. But the ridership hasn't decreased that much," she said. "Many women who are traveling alone at night use the transit cars because it's safer than the bus as a rape prevention measure."

Majka said she can see the need for the bus as a comprehensive safety measure, but the bus won't help people who live in outlying areas of Carbondale.

"It's not as good a rape prevention measure as the transit system, but people have to take individual responsibility to take care of themselves. The University can only go so far," Majka said.

Last year students voted to approve fee increase of up to $1.50 for a comprehensive transit program, which would include both transit cars and a bus system. This summer, a 9% percent fee increase that will cover the costs of the program will go into effect, Busch said.

When the fee is initiated, the Safety Transit fee budget will have an operating budget of about $28,000, Busch said.

"If there is any money left after the transit system is paid for, additional Saluki Patrols will be added to patrol the Brightway Path, Busch said. However, Swinburne said the 95 cent fee will only cover the costs of the program through fiscal year 1981, which ends June 30, 1981, because of inflation and declining enrollment."

That fee will not hold, Swinburne said.

Currently, the transit cars, which cost about $15 an hour to operate, and the bus, which costs about $600 a night to operate, are being funded by appropriated money that the University did not spend last year, Busch said.

"I suspect that these costs will increase as the price of gas increases," Busch said.

The President's Budget Advisory Committee allocated $5,000 to operate the transit cars from January 1979 to May 1979. Busch said the Committee also allocated an additional $15,000 from mid-year money for operation of the bus and transit cars from the summer of 1979 to the spring of 1980.

"We just received about $1,000 from mid-year fall-out money to install a lift on the bus for handicapped," Busch said.

A Resource Allocation Management Plan (RAMP) has been written to be presented to the Illinois Board of Higher Education for additional funding, Busch said.

"We're asking for about $50,000-plus to be used over a three year period," he said.

The University is also sending a proposal to the Illinois Law Enforcement Assistance Administration, he said.

"Right now we're trying to get copies of proposals that have been funded. We're looking for money to help cover the costs of the evaluation, which is asking Institutional Research to make up," he said.

The Women's Interim Night Transit began operation in January of 1976 when the Women's Transit Authority, operating out of the Women's Center, was formulated. It was closed in December of 1976 for a lack of funding.

Both the bus and the transit cars begin operating at dusk and run until midnight. The transit cars are for women riders only and run seven nights a week. Males and females may ride the bus, which operates Sunday through Thursday, Majka said.

Several abuses of the Women's Safety Transit system have been reported this semester, Majka said. Transit drivers have received a lot of verbal abuse from passengers who have had to wait to get picked up or wait to be dropped off at their destination, she said.

"There have been obvious cases of people using the transit system for their own convenience. This is not a transportation system, it is for the safety of women," Majka said.

Transit drivers have been instructed to take passengers who are very abusive to the SIC Security Police, she said.

"There's a list of people who must not be picked up. I call them to see how they have been abusing the system and tell them what the system is for," Majka said.

So far, transit has not refused to pick up riders except in cases where a group of women who are going to the same destination call. Majka said. In cases like this the women are asked to walk together.

"Transit doesn't want to put people in danger, so they don't want to make those types of decisions, but they have to lay down the law when they are being abused," she said.

...
Car dealer nets horse in gimmick trade offer

WORCESTER, Mass. - AP - Used car lot owner Joe Smalley said he put up the "We Trade Anything" sign as a gimmick. But there he was trading a reconditioned 1975 Celica for some cash, a seven-year-old Plymouth Duster and a 4-year-old chestnut gelding.

"I never, never expected to trade a horse," said Smalley on Saturday after he made the swap with Amy Ball, a Shrewsbury woman. "I have no idea what I'm going to do with it, but I'll keep it for a little while I used to ride when I was young."

The deal was struck after Ms. Ball, who said she was unable to raise the $3,000 for the Japanese import, decided to take Smalley's sign seriously.

"She came in and said, You trade anything, right?" Smalley explained. "I says OK what have you got, she says a horse."

"I checked around to see what a horse like that is worth - it's registered and everything and we agreed on $1,500."

Smalley had the horse taken to a stable near his home in nearby Paxton.

"Now I've got to go out and buy a saddle," he said. "That's a little bit like reconditioning a used car, I guess."

Ankle hinders Babcock at USGFs

By Ed Dougherty
Staff Writer
It was a sad ending to what has to be considered a disappointing season for sophomore all-rounder Brian Babcock. He finished 11th at the United States Gymnastics Federation Men's National Championships at Ohio State University in Columbus last weekend.
Babcock entered the meet with a slight disadvantage because of an injury to his already-weak ankle he sustained at the USGF regionals April 19-20 at Michigan State University.
"The injury to his foot caused him to lose a considerable amount," Saluki gymnastics Coach Bill Meade said.
Even though Babcock was injured, he reached the individual finals of the pommeled horse competition. He finished seventh with a two-exercise total of 17.625. Jim Harkung of Nebraska was first with a 19.25.
Babcock scored more points in 10th place this year than he did in last year's 33rd-place finish. In Thursday's compulsary competition, Babcock scored a 52.2, 3.3 points behind USGF all-around champ Peter Vidmar of UCLA.
Friday he scored a 53.15 in the optional competition. Combined with his compulsory score, Babcock had a total of 105.35. Vidmar finished first with a 114.9 and Harkung was a close second with a 114.6.
Missing from the competition of gymnastic elite were Olympic hopefuls Bart Conner and Kurt Thomas. Conner became ill from food poisoning he received at a hotel and Thomas was recovering from a back injury. Both will petition the USGF for special Olympic tryouts.
The top 14 men and women finishers qualified for the U.S. Olympic gymnastics team tryouts that will be held in Jacksonville, Fla., May 26-28. The top seven finishers will comprise the U.S. Olympic team.
Babcock was not fortunate enough to make the Olympic tryouts, but that doesn't mean SIU won't have an Olympic representative. Meade has been selected as the assistant coach for the U.S. Olympic team.
Meade replaces Nebraska Coach Francis Allen, who took the place of former Indiana State Coach Roger Clark as head coach. Clark had to resign as head coach because of his post as director of the USGF.
"I was honored they selected me, because it is a choice position," Meade said.
Even though the chances of the U.S. team going to Moscow are very slim, Meade said the team must be "ready in case something happens." He said the top 12 men and women finishers at the Olympic trials will compete in mixed pairs exhibitions in Detroit, Chicago, Indianapolis, San Diego, Los Angeles and Las Vegas beginning June 6.
Then the U.S. Olympic team will travel to West Germany June 29, stay for four days and compete in a meet with the West Germans. The team will return to the United States July 11.

Netters take 4th place at Valley

By Rick Klett
Staff Writer
Led by freshman Lisa Warrem, the women's tennis team placed fourth in the 30th annual Missouri Valley College Tennis Tournament last weekend at Columbia. Missouri.
Oral Roberts defeated seven teams in their place, scoring 55 points.
Warrem, the Salukis' top player record-wise, added three singles victories to her 13-3 record and teamed with Carol Oes for two more doubles wins to have a hand in 10 of the Salukis' 31 points.
The Maroon native downed south Western's Debbie Bennett. Drake's Teal Carroll and Oral Roberts' Kathy Zalewski before falling victim to No. 1 seed Silveira, header of co-host sevena College.
Warrem and Foss defeated southwest Western's Debbie McGowan and Gayla Dzorak and Orals' Cathy Vagelov and Talea Cummings in straight sets before losing to the No. 2 seed, Missouri's Neumxburger and Nancy Dickens.
Missouri's Lisa Neuburger and Warrem of co-host Missouri were Olympic hopefuls Bart Conner and Kurt Thomas. Conner became ill from food poisoning he received at a hotel and Thomas was recovering from a back injury. Both will petition the USGF for special Olympic tryouts.
The top 14 men and women finishers qualified for the U.S. Olympic gymnastics team tryouts that will be held in Jacksonville, Fla., May 26-28. The top seven finishers will comprise the U.S. Olympic team.

Hartzog says Lee is ‘a superstar’

(Continued from Page 29)

us become one of six teams that took over.”

Hartzog said, “He handed off to David who got step one by a Bowling Green runner. It shook him up and he stumbled. He still ran a 46.9 and brought us into first.”

“Billy Moran ran the best race of his life and knocked four full seconds off his personal best,” Hartzog said.

Billiken battered by Saluki homeres

(Continued from Page 29)

Milwaukee, Wis., who leads the pack and couldn’t get out

Hartzog said. Schulz had the flu the past few weeks.

“Karslen is back and ready to go,” Hartzog said. Schulz had the flu the past few weeks.

“What is most pleasing to me is not the time they turned in or the place they finished, but the fact that our three distance runners grew up. They matured as university distance runners.” Hartzog said.

“They stood up under the pressure of 29 universities in a screaming stadium. That can make it tough to run a good race,” Hartzog said. “They will do nothing but get better from there on. They will lose a few races, but they’ll be tough competitors.”

Sponsor of Davies bill is ‘most valuable player’

(Continued from Page 28)

women athletes. What about the physical, education students who have to use the building? They are here for an education, and poor facilities certainly stand in the way of that.

And what about all the students who participate in intramurals? Recently, the intramural basketball playoffs had to be held up because of conditions in Davies.

Everyone who uses Davies—athletes, physical education students and intramural participants—is risking injury by stepping into the building.

It’s a crying shame that Davies, which was built when Calvin Coolidge was president of the United States, never has been renovated. SIU has tried for 11 years to secure the money necessary for renovation from the state, but the attempts never have been successful.

But maybe this attempt will be. And if it is, Women’s Intercollegiate Athletics, the Physical Education Department and the Intramural Office should thank Bruce Richmond.

Although he’s not an athlete, he’ll certainly deserve some kind of an award if Davies Gym finally is renovated.

Saluki second baseman Bobby Doerrer Junior: "I'm just glad to be here," while P.J. Schrants makes the ps to get out of the way of St. Louis' Carl potant. SIU defeated the Billikens, 18-4.

Saluki homers batter Billikens

By Mark Pahlich
Staff Writer
The SIU baseball team put together a perfect ending to a perfect day against the Billikens. Under coaches, in a triple play in the ninth inning, winning the game 18-4, and giving Coach Itchy Jones his 399th career victory.

The triple play, which Doerrer Greg Soumendi to Billikens Steve, was the one that Davies SIU team has had in Jones' 11 years of coaching. "That's the first...we've been on the good end of a triple play," he said. "It was a good ending to a pretty good day."

The day included a 15-hit performance, including three home runs, behind winning pitcher Paul Evans. The Salukis also received some help from the Billikens pitching staff, which walked 16 SIU players, something Jones said he was happy to see.

"Whenever we walk that many times, it shows our players are doing more selective and are waiting for their pitches," Jones said.

Salukis' scoring attack began in the third inning when Gerry Miller tagged his ninth home run of the season, a three-run hit. Miller went three-for-four on the day including eight walks. The Junior from

"(Continued on page 19)"

Hartzog: 'David Lee is a superstar'

By Rod Smith
Staff Writer
In 24 years as coach of the SIU track team, Lew Hartzog has been known to members of the press, as well as his athletes, as a very colorful, loquacious speaker.

But even Hartzog is running out of adjectives to describe the performances of hurdlers David Lee and Joel Hartzog.

After weeks of reporting on Lee's "super effort," "awfully good race," and "a competitive running," all the coaches could say is what track followers have really known all along. "Right now, David Lee is a superstar," Hartzog said.

Lee became the second man in the history of the Drake Relays to break the 50-second barrier in the intermediate hurdles, winning the race in 49.6, only 0.4 seconds off the meet record established in 1970 by Ralph Mann of Brigham Young University.

"All he did was run under 50 seconds for the third week in a row," Hartzog said. "We were disappointed that he didn't break the record, but he can't break one every week. He had to stand around for two hours after he ran the high hurdles and he didn't look as sharp."

Maybe he didn't look sharp to Hartzog, but other coaches thought otherwise.

"People came up to me and said he was the smoothest intermediate hurdlers was the one that he had ever seen," Hartzog said.

Lee also took second in the high hurdles, an event which Hartzog said is only the junior's fifth best event behind the intermediates, long and triple jumps and quarter mile. His second time of 13.29 was a personal best and also qualifies him for the NCAA championships.

It seemed that Hartzog was even more pleased with the performance of second-year hurdlers Scott Givens and Steve Ross, who set the Drake record in 1980.

"That's the same way we approach football. Some great big defensive tackle might be the gentlest guy in the world when he's off the field, but once he puts on his helmet and goes out there, it's a whole different story.

"Sports can be considered as a microcosm of society," Thirer said. "Many of the occurrences you see in everyday life are reflected in sports, although you'll see them to a greater degree of reference. If you see it in sports, you'll see it in life.

Thirer added that such questions are ultimately critical to the research of the Minnesota Twins Monday. Willie Horton, who tripled and scored a run for the Tigers in the first run in the second inning, began the Twins threat, according to Soth, 0.1 out later. Bill Stein singled and Fellers' error allowed the runner to the mound by Ted Cox loaded the bases.

Larry Con's sacrifice fly was not scored, Horton and the Mariners loaded the bases again when Joe Simpson walked.

Huntz: 'David Lee is a superstar'

By Dave Kane
Staff Writer
Editor's note: This is the first of two interviews with Dr. Joel Thirer, an assistant professor of physical education at SIU-C. Thirer is considered an expert in sports psychology.

You're a hockey game, and suddenly a fight breaks out on the ice. The fans behind you scream for blood and encourage one of our major goals is fighting breaks out on the ice. The fans behind you scream for blood and encourage a fight. "Just do what you can, and the fighting breaks out on the ice. The fans behind you scream for blood and encourage a fight. "Just do what you can, and the fighting will stop."

The簡単な話 about the behavior of athletes

By Dave Kane
Staff Writer
The Saluki baseball team put together a perfect ending to a perfect day against the Billikens. Under coaches, in a triple play in the ninth inning, winning the game 18-4, and giving Coach Itchy Jones his 399th career victory.

The triple play, which Doerrer Greg Soumendi to Billikens Steve, was the one that Davies SIU team has had in Jones' 11 years of coaching. "That's the first...we've been on the good end of a triple play," he said. "It was a good ending to a pretty good day."

The day included a 15-hit performance, including three home runs, behind winning pitcher Paul Evans. The Salukis also received some help from the Billikens pitching staff, which walked 16 SIU players, something Jones said he was happy to see.

"Whenever we walk that many times, it shows our players are doing more selective and are waiting for their pitches," Jones said.

Salukis' scoring attack began in the third inning when Gerry Miller tagged his ninth home run of the season, a three-run hit. Miller went three-for-four on the day including eight walks. The Junior from

Hartzog: 'David Lee is a superstar'

By Rod Smith
Staff Writer
In 24 years as coach of the SIU track team, Lew Hartzog has been known to members of the press, as well as his athletes, as a very colorful, loquacious speaker.

But even Hartzog is running out of adjectives to describe the performances of hurdlers David Lee and Joel Hartzog.

After weeks of reporting on Lee's "super effort," "awfully good race," and "a competitive running," all the coaches could say is what track followers have really known all along. "Right now, David Lee is a superstar," Hartzog said.

Lee became the second man in the history of the Drake Relays to break the 50-second barrier in the intermediate hurdles, winning the race in 49.6, only 0.4 seconds off the meet record established in 1970 by Ralph Mann of Brigham Young University.

"All he did was run under 50 seconds for the third week in a row," Hartzog said. "We were disappointed that he didn't break the record, but he can't break one every week. He had to stand around for two hours after he ran the high hurdles and he didn't look as sharp."

Maybe he didn't look sharp to Hartzog, but other coaches thought otherwise.

"People came up to me and said he was the smoothest intermediate hurdlers was the one that he had ever seen," Hartzog said.

Lee also took second in the high hurdles, an event which Hartzog said is only the junior's fifth best event behind the intermediates, long and triple jumps and quarter mile. His second time of 13.29 was a personal best and also qualifies him for the NCAA championships.

It seemed that Hartzog was even more pleased with the performance of second-year hurdlers Scott Givens and Steve Ross, who set the Drake record in 1980.

"That's the same way we approach football. Some great big defensive tackle might be the gentlest guy in the world when he's off the field, but once he puts on his helmet and goes out there, it's a whole different story.

"Sports can be considered as a microcosm of society," Thirer said. "Many of the occurrences you see in everyday life are reflected in sports, although you'll see them to a greater degree of reference. If you see it in sports, you'll see it in life.

Thirer added that such questions are ultimately critical to the research of the Minnesota Twins Monday. Willie Horton, who tripled and scored a run for the Tigers in the first run in the second inning, began the Twins threat, according to Soth, 0.1 out later. Bill Stein singled and Fellers' error allowed the runner to the mound by Ted Cox loaded the bases.

Larry Con's sacrifice fly was not scored, Horton and the Mariners loaded the bases again when Joe Simpson walked.

Huntz: 'David Lee is a superstar'

The Saluki baseball team put together a perfect ending to a perfect day against the Billikens. Under coaches, in a triple play in the ninth inning, winning the game 18-4, and giving Coach Itchy Jones his 399th career victory.

The triple play, which Doerrer Greg Soumendi to Billikens Steve, was the one that Davies SIU team has had in Jones' 11 years of coaching. "That's the first...we've been on the good end of a triple play," he said. "It was a good ending to a pretty good day."

The day included a 15-hit performance, including three home runs, behind winning pitcher Paul Evans. The Salukis also received some help from the Billikens pitching staff, which walked 16 SIU players, something Jones said he was happy to see.

"Whenever we walk that many times, it shows our players are doing more selective and are waiting for their pitches," Jones said.
