Civil Service work plan cut

By Randy Roguski
Staff Writer

A plan to cut the workweek of Civil Service employees from 40 hours to 37 hours has been temporarily scrapped by administrators which would cost nearly $200,000. Tom Busch, assistant to the president, said Monday.

Busch said the plan was "in the works" for a year, but not the "right move" for the University, in a letter to the faculty. But Albert Somit favors the idea and will look at it again in the fall.

The plan to reduce the current 40-hour workweek was proposed to Somit in October by the State Employee's Council. The plan is expected to save Somit about $19,000.

"I'm sure Civil Service is concerned that it would be easy to do," said Baker. "But I don't see any way around it."

According to Baker, the 7-hour proposal by the State Employee's Council is about $44,000 in academic salaries and $18,000 in office salaries.

The costs would mean paying more money to Civil Service personnel, Baker said. The plan would mean increasing student fees, because the potential boost in Civil Service work would mean higher costs of cutting the workweek.

Marks said it may be "too early" to talk about a 37-hour work week, because of the 1976 bank robbery, and the potential exists that federal cutbacks will have in research programs. The plan would also create "too many weaknesses in the financial system." Baker said.

"We are seeing states which are making huge surpluses, particularly in the Great Lakes area, which we are a part of." said Shaw. "And we are seeing states which are much worse off than we are finding that they are going to have to take money back in the middle of the year from their agencies. The situation has gotten so bad."

It's not just the state of the economy, according to Shaw.

BOMB KILLS POLICEMAN IN BELFAST; SANDS’ FAST REACHES 58TH DAY

BELFAST, Northern Ireland (AP) — A booby-trap bomb planted in a hijacked truck exploded in Belfast on Monday, killing one policeman and injuring another. A delivery truck, hijacked in the Belfast early Monday and rigged with a bomb, was driven into the predominantly Roman Catholic Ardoyne district where police found it. The bomb went off as they tried to move it, police said.

One officer was dead on arrival at Royal Victoria Hospital, spokesman Gerry Carson said. He said two of the injured men were in critical condition.

An anonymous caller to a Northern Ireland radio station later claimed responsibility for the blast on behalf of the terrorist splinter group INLA, which claimed responsibility for the 1979 car-bomb assassination of Conservative politician Airey Neave at the House of Commons in London.

The blast came after police arrested 19 leaders of a campaign supporting Sands demands that the British government restore special privileges for imprisoned IRA guerrillas.

A later mob of 200 youths in the staunchly Catholic Falls Road area of Belfast, near Andersonstown, stoned police and hijacked two buses which were set afire, police said. Rohers dispersed when police moved in.

A bomb from the IRA’s political front, said in Belfast that Sands was “very seriously ill, extremely weak and close to death.”

The IRA gymnast, serving 14 years for illegal possession of a firearm, was in bad shape,” said his lawyer, Pat Finucane. But Sands was experiencing periods of lucidity, the lawyer added.

Court orders Agnew to repay state

AXNAPOLIS, Md. (AP) — Former Vice President Spiro T. Agnew accepted kickbacks from engineers while he was governor of Maryland and must pay the state $2,187,350 for violating the public trust, a circuit judge ruled Monday.

“There is no question that Mr. Agnew violated his public trust,” said Judge Bruce Williams.

The judge said evidence presented at a civil trial proved that in 1967 and 1968 Agnew was engaged in an unlawful relationship with two associates, H. H. "Butt" Hammerman and Jerome Wolff, to solicit kickbacks from contracts awarded by the state to the two men.

Agnew denied the charges and said he had not shown any damages not suffered by other taxpayers, but he upheld the state’s right.

Agnew’s lawyer, Thomas R. Harrison, said he would appeal the ruling within 30 days.

Agnew did not testify, and Harrison said he did not expect the former vice president to comment on the ruling.

USO NEEDS A FEW GOOD PEOPLE

Pres. Elect Todd Rogers & VP Elect Gregg Larson are now taking applications for:

Commissioners
Academic Affairs
Housing, Tuition and Fees
Student Welfare
Campus Development and Service
Fee Allocations
Minority Affairs
Election
Public Relations

Bureau
Book Co-op
Legislative Activities
Recruitment/Orientation
Student Advisory System
Student Telephone Directory

And Other University Wide Appointments...

FEE ALLOCATION COMMISSION
Gregg Larson Commissioner would like to thank:

Group I Chairman Joe Diezler
Max Schmeling
Paul Ohanian
John Olson
Brian Schilling
Chris Coulomb

Group II Chairman John Mitchell
Gary Shodid
Sandra Pitts
Clyde Myslinski
Andre Martin
Glenn Stolar

Group III Chairman Leith Smith
Jon Sago
Laure Fienne
Donna Smuskiewicz
Bernie Schofield
Kevin C. Jans

The Commission had to allocate some $200,000 of student fees to over $550,000 of requests. Recommendations will be submitted to the Senate for partial ratification on Wed., April 29, 7 p.m. Renaissance rm. All are invited.

The Commission would like to thank all groups for their patience & cooperation.

NEWS ROUNDUP

Another Atlanta black found dead

ATLANTA — The body of a black male was found collapsed in trees in the Chattahoochee River on Monday, and the Fulton County medical examiner said he didn’t fill the description of 21 year-old Jimmy Ray Payne.

“It looks like it’s going to be him,” Payne said. Dr. Robert Stivers, the Fulton County medical examiner. “He’s dressed in red shorts only and he’s been in the water about the right amount of time.”

Three boys who were fishing in the river Monday spotted the body caught in tree branches about 20 feet from the bank of the river.

Reagan budget nearing approval

WASHINGTON — President Reagan’s economic program took a giant step forward Monday as House Democratic leaders all conceded that they lack the votes to pass their own budget, and Republican senators reached agreement on a revised blueprint to accommodate the administration’s tax and spending cuts.

Speaker Thomas P. O’Neill said a private head count showed “many Democrats” will vote to approve the president’s budget plan.

Bomb damages German atomic plant

HAMBURG, West Germany (AP) — A bomb explosion early Monday seriously damaged a West German atomic power plant, police reported but there were no reports on radiation danger.

Two large power lines at the Northwestdeutsche Atom Power Plant on the lower part of the Weser River near here were damaged and operations were temporarily discontinued plant officials said.

Paris mayor backs Giscard d’Estaing

PARIS — President Valery Giscard d’Estaing, seeking a second seven-year term in a May 10 runoff against Socialist Party leader Francois Mitterrand, won a lukewarm personal endorsement Monday from one of his most defeated rivals.

Paris Mayor Jacques Chirac, who finished third in the first round of voting Sunday, is in a strong position to wrest concessions from Giscard d’Estaing. Chirac told a news conference he personally would vote for the 53-year-old incumbent because it fitted his conservative political philosophy better than socialism did.

In Sunday’s poll, with 99.6 percent of the vote counted, Giscard d’Estaing won 32.3 percent. Mitterrand 25.9 percent. Chirac 18 percent and Marcilhac 15.4 percent.
Apparent suicide blamed on overdose of alcohol, drugs

By Andrea Nixng
Staff Writer

A preliminary examination has shown that an overdose of an unknown drug and alcohol was the cause of death in the apparent suicide early Sunday morning of a 16-year-old member of the Chicago Knockers mud wrestling team. Jackson County Coroner Don Ragsdale said.

Margaret Parsons of Toronto, Ohio, was found unconscious in her motel room by members of the mud wrestling team at about 4 a.m. in a "full cardiac arrest," said Carbondale police. The team was staying at the Best Motor Lodge, 700 S. Main St. police said. She was pronounced dead at Memorial Hospital in Carbondale at about 3:30 a.m. according to police.

Ragsdale said an apparent suicide note found in Parsons' purse revealed that she was despondent over the death of her boyfriend, who was killed in December in an automobile accident. The note said the girl "couldn't cope," and she couldn't live without the boyfriend, recording to Ragsdale.

Ragsdale said an autopsy will determine the type of drug Parsons consumed. will be concluded in about two weeks. Police said there is no evidence of foul play.

Parsons, whose stage name was "Peaches" and "Dream," performed with the Chicago Knockers before about 1000 people early Saturday evening as part of SICU Springfest '81. Parsons walked around the stage carrying a sign that told what round the match was in. She wrestled in the tag team match against two radio jocks.

D. Renee Graeve, spokeswoman for the Chicago Knockers, said Parsons had been performing with the team for about six months.

In an interview Saturday night, Parsons said she used to work at a day care center. When asked how she started mud wrestling, she replied, "I was drunk. I got on stage at amateur night and I liked it."

Marlene Parsons, 16, the victim of an apparent suicide prior to her performance with the Chicago Knockers mud wrestling troupe in front of Shadyock Auditorium Saturday evening.

Elderly offered health screenings

Free health screening for senior citizens will be offered Wednesday and Thursday by the Eureka and Harris Centers Comprehensive Health Care Program.

The screening, which will include tests for blood pressure, hearing a test for incontinence, and a test for anemia, will be held Wednesday from 10 a.m. until 4 p.m. at the Eureka Senior Center. Thursday's testing will be at the Carbondale Senior Citizens Center, 602 E. College St., from 9:30 a.m. until noon.

The results of the tests will be forwarded by the Health Care program to the individual's doctor, and a referral service will be available following the tests for those without a regular physician.

Those without transportation who wish to participate in the tests can arrange for a ride by calling the Comprehensive Health Care Program at the Eureka Center.

'Marathon' is a rare book about a rare and special man

Colman McCarthy

does not adversely affect the heart. Few athletes
have had such a long period of physical effort
during their lifetime as DeMar.

In his private life, DeMar worked as a com-
troller. He taught Sunday school at his Baptist
church in Selma, Ala., and was a member of the
local Kiwanis.

DEM MAR writes poignantly of his
feelings when his talent was "slipping away
at a rate that coincided with the shrinking
of some of his earlier conquests. "No longer does
success in marathons depend on the amount of
training I do. Frequently, a rest and just a little
physical exercise is necessary to make me a better
runner. Do I not destroy the man who
likes his beer and cigarettes a little thinner?"

DeMar never took up boxing and
smoking, being a Baptist among the retired
soldiers. In a recent interview, he said,
"I have been a Baptist for many years."

DeMar never had a heart attack.
He died peacefully in his sleep.

DeMar's family had a little idea of
what he was doing. When he
finished the marathon, he
ran into the arms of his
wife, who was waiting for
him at the finish line. She
cried, "I love you, DeMar."

All laws restrict freedoms

The recent article by Ann
Puckett presented a
falsehood. In her article,
"自由" was used in
a sense that someone who
has something to
freedom. It's not
freedom.

Of course an anti-abortion
law is constitutional
and does not violate
any human rights.

I do not blame anyone who
favors abortion on
demand for claiming they are 'freedom' or 'pro-choice'.

Those who favored slavery
claimed that they were
"freedom." Those who
favored segregation claimed
they were "freedom.

I do not blame anyone who
favors abortion on
freedom. They are really for
freedom, but I do not agree.

The real issue is the
freedom of choice. In recent
times the great champion
of freedom, before the
pro-choice people came
on the scene, was Lester Maddox,
who even became governor of
Georgia. He said, "I stand for
freedom to practice
segregation. In Lester
Maddox's day, he said
that "freedom" was a false
issue, and that it seemed
to the average American
that "freedom" was a false
issue.

Today some liberals follow
the intellectual concepts of
Lester Maddox claim that
"freedom" is the issue
with respect to abortion.

Those who oppose abortion
are really for
freedom. They are not
for choice.

The real issue is freedom.

Letters submitted to
the editor will not be
published.

The question isn't freedom

This is a response to a
recent letter by Jack
Puckett, entitled
"One Alternative is Not
Freedom."

She was defending the
appropriateness of using
the word "freedom" in the
phrase "freedom of choice."
Her reasoning was that in
order to have freedom,
one must be able to choose from
among alternatives. When
one is not given a choice,
one's freedom is curtailed,"
she said. She also said that
people have alternatives:
to abstain or to continue
the behavior.

In saying this, she is
assuming this decision to be
one's own and not affected
by everyday decisions
made with the freedom
that exist in everyday
decisions. In these
decisions, there is genuine
freedom of choice. Also, these
alternatives violate no laws,
writing or other.

In contrast to this, consider
the decision to kill another
person. This person has
freedom of choice. I guess he
does, but I do not have freedom
of choice. Freedom to take
life away from another person
is not freedom.

So once again, the main
point in this issue is the
freedom of choice but at what
point human life begins. If it
has no existence, there is
no freedom of choice to abort
really want to take freedom to
take life away without bearing
any unfavorable consequences.

So, let's look beyond
the smoke screens of freedom
of choice to the real issue: life
or death.

Coryell’s expertise reaches beyond bad sound, blown fuses

By Alan Sculley
Staff Writer

Jazz guitarist Larry Coryell had his problems Sunday afternoon. First, his guitars didn’t get to the show on time. When he finally did get his guitar to play, the sound was horrible. Then to top it all off, twice when Coryell played electric guitar during the second set, a fuse on his amplifier blew.

Somehow Coryell kept his sense of humor. He also kept playing the most amazingly fast guitar on the scene. A guitar audience has seen it all, but even Coryell’s dedication to give them a standing ovation at the end of the show. He kept on with a theme. He had some occasions of apologizing for the distorted sound.

But nevertheless, the crowd loved Coryell. And no amount of bad sound, blown fuses or blown fuses could keep Coryell’s stature from being a shining star on Sunday. To get an idea of how fast Coryell plays, a guitar solo recorded at 33 rpm at 45 rpm and you’re getting close. The intensity, the blood that was shown in his tightly strained facial expressions and the speed of his foot, which never stopped tapping.

During his two sets, which ran between 45 minutes and an hour, he played a number of his own compositions from his more than a dozen albums, as well as cover versions by such jazz greats as Charles Mingus, Stanley Clarke, Chick Corea and John Coltrane.

When Coryell last came to Carbondale in spring of 1983 as an opening act for John Scofield and although the last show along his six and 12-string acoustic guitar, this time he varred his act by adding a grand piano, an electric piano and the oil and sheen that comes with those.

While he is renowned for his guitar work, Coryell also showed talent on the keyboards. His sometimes zany stage personality showed through on those songs as he frantically pounded the keys, and even punched the strings inside the piano.

Inge’s play ‘Bus Stop’ to be performed

William Inge’s sensitive comedy, ‘Bus Stop,’ a drama of five tired travelers stranded at a roadside dinner during a blizzard, will be performed by the Action Theatre of Louisville at 8 p.m. Friday in Ballroom D of the Student Center. Tickets are $2.50 for students and $4.50 for the general public and can be purchased at the Student Center Central Ticket Office.

The play tells the story of a 21-year-old woman who is trying to gain the attention of a man from another bus on her way from Kansas City. She is stranded overnight. Other characters include the cafe owner and a bus driver who strikes up a friendship, a middle-aged scholar and a young girl who works in the cafe.

 Pulitzer Prize-winner Inge has also written “Picnic,” “Come Back, Little Sheba,” “Natural Affection” and “The Price.” ‘Bus Stop’ is the final production of the Student Center Student Stage Productions for the 1989-90 season.

Activities

United Way Awards Ceremony. 9 a.m., Ballroom A.
George S. Counta lecture. 7:30 p.m., Davis Auditorium.
Shortcourse in oral reading, 8 a.m. - 1 p.m., Student Center.
ROTC meeting. 9 - 10 a.m., Student Center Ballroom.
SIU Backgammon Club meeting, 6 - 11:30 p.m., Recreational Room.
Affiliate Action United Way meeting, 5:30 - 6:30 p.m., Ballroom A.
Finley Service meeting, 10 - 11 a.m., Mississippi Room.
Saluki Student Chronicle meeting, 3:30 - 4 p.m., Ohio Room.
Missouri Student Association meeting, noon - 1 p.m., Activity Room.
SIU Jazz Corps volunteer recruitment group organizational meeting, 5 p.m., Ag Building 200.

Suit filed against Menard prison

EAST ST. LOUIS (AP) - Charging that conditions on death row at Menard Correctional Center violate constitutional rights of their constitutional rights, the American Civil Liberties Union filed a class-action lawsuit in federal court Monday seeking injunctive relief.

Heaven’s Gate ‘suffers from some flaws

By Bill Crews
Staff Writer

With the Academy Award winning ‘Deer Hunter,’ Michael Cimino established himself as a filmmaker who could tell a compelling story on a grandiose scale and still preserve its human compassion and intimacy. His controversial new Western epic, ‘Heaven’s Gate,’ proves that even the best storytellers have their flaws and need guidance.

The saga of ‘Heaven’s Gate’ is a star-crossed one to say the least. Originally clocking in at four hours, several influential critics, including the New York Times’ Vincent Canby, crushed the film as a wretched mess in May. Reports abound of Cimino wasting untold sums of money and time in production.

The film was sent back to the editors for a massive facelift and has now been trimmed down to about 140 minutes with the budget coming in at around $35 million, according to the Chicago Sun Times. This shorter, refurbished version is considerably better at this length than its original Boston Marathon size. It is still visually awe-inspiring.

Cimino’s screenplay tells the story of rich cattle ranchers launching a bloody vendetta to clear a Wyoming county of its European immigrants, whom the ranchers characterize as anarchists, outlaws and thieves. Set in the 1870s amid bustling boom towns of the west, ‘Heaven’s Gate’ tries to be a moral parable on the ‘American Dream,’ those who have the wisdom or the nerve to strive to attain it (immigrants). Unfortunately, Cimino’s visionary concept is sullied by a screenplay that pools along without much focus and the grotesque mistaking of Kris Kristofferson in the lead role. Very honestly, Kristofferson’s wooden approach to acting doesn’t seem proper enough for high drama and small town drama clubs. In a nutshell, he’s a failure.

His performances no emotion or sympathy to his key characters. Cimino sets the West for the Help right its wrongs. However, he ends up being a marshall, and getting stuck between his love for a local immigrant hooker played with much emotion by Isabelle Huppert and his love for a local immigrant widow. Cimino’s anti-war portrayal of the calico Indians, who are acting with the mandate of the government, the congress and even the president himself.

If all this sounds fairly compelling, you’re right. But the film’s pace of ‘Heaven’s Gate’ storytelling and direction reduces this promising story to nearly unwatchable drudgery. It’s also obvious that this film simply wasted too much time and effort. Scene shifts are confusing, actors speak at times and often whatever dramatic pace has been established is blown.

Christopher Walken pops in briefly. He appears in a conceived role as Kristofferson’s opponent for Huppert’s love. John ‘Egbert’ Huppert Hurt turns in the film’s best performance as a sad-faced, drunken calmer who sympathizes with the mountain men.

Not only are the actors connected to Cimino’s personal life, but Viomaz Szigmondi’s atmospheric photography reviews a too moody and sepiatored for some viewers! Between 9 a.m. and 9 p.m., the pealing period music are also lost in the film’s muddled approach to pace and staging.

After nearly two hours of slow pacing character and plot development, the film winds down with a pretentious, overlong isn’t everything overlapping in this film? battle scene as the immigrants fight back against the hired guns. The film ends with a new twist of fate ending set in 10 years later. It contains no true message to save any dignity or respect for Cimino’s long-winded storyline and extravagant direction.

However, let’s not go ahead with plans to hang Cimino from the highest tree, like many critics, and Hollywood executives would prefer to do. ‘Heaven’s Gate’ is not the cinematic bomb which early reports characterized it to be. It’s simply a bad film ruined by excessive uses of money and time.

Starr marries

LONDON (AP) - Former Beatles drummer Ringo Starr married American actress Barbara Bach in a civil ceremony Monday attended by the other two surviving Beatles, Paul McCartney and George Harrison.

Report lists no change in crime during first 3 months of '81

It was another quiet quarter for the SIC-C Security Department, reported Thursday by SIC-C Security Director Virgil Trumeter.

The number of criminal offenses reported by SIC-C Security during the first quarter of 1981 was the same as in the same period of 1980. Security Director Virgil Trumeter said Thursday that the number of criminal offenses reported by SIC-C Security during the first quarter of 1981 was the same as in the same period of 1980.

The report lists no change in crime during the first quarter of 1981 at $51. All damage to property during this period was attributed to vandalism, including $3,000 damage caused by a person at the Saluki Stables.

SIC-C Security Police also reported a traffic accident during the first three months of 1981. These accidents, which were classified as fender benders, totaled 13.

The report said 367 vehicles were towed from campus during January, February and March 1981 as compared to 37 in the same three months of 1980.
Abortion ban could be 'dangerous'

By Brenda Wiglenbach
Staff Writer

THE BATTLE OVER legal abortions has been heating up for several years but it appears it will reach its highest point sometime in the near future. Whether you are pro-choice, pro-abortion, anti-abortion, or pro-life depending on the group you represent. It may be the time to take a closer look at the battle over legal abortions.

Monday's Supreme Court decision on state abortion laws and the recent passage of the Hyde Amendment which stopped federal funding of abortions has been a hot issue of interest for all groups involved in the abortion issue. The battle over abortion has taken new life in the political battlegrounds.

The abortion of Ronald Reagan, who supports the right-to-life movement, and the present lobbying of right-to-life groups for the passage of the Human Life Amendment is a source of concern for the pro-life groups, which has resulted in a "Stop HLA" movement in several cities, including Cleveland.

Jann M. Nader, a staff attorney in clinical law at SFB, said that the passage of an HLA could be dangerous.

"THIS AMENDMENT doesn't just prohibit abortion," Nader said; "it will also affect the legality of some of the most popular birth control forms used today." That ban would include contraceptive devices such as the Pill and IUD, she said.

There are several versions of the HLA which now present some confusion. At times, she said, "We must be aware of which HLA we are discussing." She added that there are several.

Nader explained, circulating through the T. A. House and Senate.

The Helms-Dornan HLA would not permit abortion under any circumstances. "I am aware of what is going on in the state of Illinois," Nader said, even when the mother's life is endangered or if a rape victim is involved. Other HLA's will permit abortion for preservation of the mother's life and for some cases of rape or incest, she said.

All versions, Nader said, prohibit the use of contraceptive devices which prevent implantation of the fertilized egg. The basis for the ban, she said, would be that life begins at conception and that anything which prevents implantation would be abortive in its effect.

OTHER AREAS of concern to Nader are:

This amendment would override a Supreme Court decision favor to medical organizations in that those organizations would be protected.

In 1975, the Supreme Court decided that a woman could not say when life begins. They said that the decision should be left to the individual. Thus, the right to an abortion on demand was born.

Since the 1973 decision in the Roe v. Wade case, pro-life groups have been fighting for the rights of the unborn and lives of those who are being aborted. They are now fighting for the passage of an HLA, which could prohibit all abortions and ban the use of some types of birth control, such as the Pill and the IUD.

There are more than 200 women's groups circulating through Congress.

THE HELMS-DORNAN HLA does not provide exceptions for abortions.

Wayne A. Helmer, associate professor of thermal and environmental engineering at SU-C, said that other amendments would permit abortions in some cases for preservation of the mother's health and reversable cases. He is president of the local Christian Action Council, said, he is usually referring to the Helms-Dornan HLA.

"The whole basis for the HLA centers around the enormous evidence that, from fertilization on, the fertilized egg has the characteristics of human life. The evidence, he said, includes the facts that the unborn baby's heartbeat begins between the fourth and fifth week after conception. Brain waves can be detected as early as 8 and 10 days and the baby's systems are in operation by the eighth week and functioning by the 11th week. The baby, Helmer said, has also been a different genetic code from that of the mother.

"If people believe this evidence and conclusions, Helmer said that almost all of the arguments against the HLA disappear." If however, they do not accept this evidence and conclusion, he admitted, many of the arguments for the HLA can be undermined.

See ANT, page 12

... but 'human life' would be protected

By Brenda Wiglenbach
Staff Writer

ABORTION HAS long been a subject that brings diverse reactions from all sectors of society. Ask anyone what should be done and you can almost always expect a balanced view on either side of the issue.

This is a tough one. Monday's Supreme Court ruling on state laws governing abortions, the recent passage of the Hyde Amendment which stopped federal funding for abortions and the present lobbying of pro-life groups for the passage of the Human Life Amendment is the issue of concern to the pro-life groups.

In 1972, the Supreme Court decided that it could not say when life begins. They said that the decision should be left to the individual. Thus, the right to have an abortion on demand was born.

Since the 1973 decision in the Roe v. Wade case, pro-life groups have been fighting for the rights of the unborn and lives of those who are being aborted. They are now fighting for the passage of an HLA, which could prohibit all abortions and ban the use of some types of birth control, such as the Pill and the IUD.

The Helms-Dornan HLA does not provide exceptions for abortions.

Wayne A. Helmer, associate professor of thermal and environmental engineering at SU-C, said that other amendments would permit abortions in some cases for preservation of the mother's health and reversable cases. He is president of the local Christian Action Council, said, he is usually referring to the Helms-Dornan HLA.

"The whole basis for the HLA centers around the enormous evidence that, from fertilization on, the fertilized egg has the characteristics of human life. Helmer said, and this human life ought to be legally protected."

He said that medical evidence indicates that fertilization of the egg is in the beginning of human development.

The evidence, he said, includes the facts that the unborn baby's heartbeat begins between the fourth and fifth week after conception. Brain waves can be detected as early as 8 and 10 days and the baby's systems are in operation by the eighth week and functioning by the 11th week. The baby, Helmer said, has also been a different genetic code from that of the mother.

"If people believe this evidence and conclusions, Helmer said that almost all of the arguments against the HLA disappear." If however, they do not accept this evidence and conclusion, he admitted, many of the arguments for the HLA can be undermined.

The Army ROTC Club will hold a bake sale from 8 a.m. to 2 p.m. Tuesday in front of Farmer Hall.

The Carbondale Community Education’s Advocacy Council will meet Tuesday in two sessions. The first meeting will be held at 3 p.m. at the Wesley Foundation, 501 S. Illinois Ave., and the group will meet at 7 p.m. at Carbondale Savings and Loan, 900 W. Main. The purpose of the meetings is to allow Carbondale citizens to participate in the community education process.

The Illinois Department of Personnel will interview students in life sciences, social service and finance from 8 a.m. to 3 p.m. Tuesday in Room B-210 Woody Hall. Students must have a resume on file at the Career Planning and Placement Center and a call 442-3814 for appointments.

A limited number of applications for summer student positions at the Recreation Center will be available Wednesday morning at the Equipment Room in the Recreation Center. Application must have your ACT on file at the Student Work and Financial Assistance office.

Auditions for a summer playwriting workshop will be held at 3 p.m. in the Communications Lounge next to the Lied Center. The summer play will include "Up on a Rolling Pine" by William Lewis and "Lolita" by Ken Roberts. Roles will be cast for seven females and eight males. The workshop is a practical laboratory for the fall class in which graduate students present their original plays, and may be taken as a course for credit. Audition are open to students and the public.

The College of Education and the Career Planning and Placement Center will co-sponsor an Education Career Day from 10 a.m. to 3 p.m. Wednesday in the Student Center hallway. Seminars on skills, resume writing and hiring techniques will be held and representatives from school districts in Illinois and other states will interview candidates for teaching positions.

The Rape Action Committee of the Women’s Center in Carbondale is now accepting applications from women interested in being trained for service on the rape crisis peer team. The committee is a group of trained volunteers who provide psychological support and information to rape victims, and accompany medical visits to any hospital or clinic requested. Applications are available at the Women’s Center, 401 W. Freeman, and must be submitted by May 15.

BRIEFS POLICY—Information for Campus Briefs must be delivered or mailed to the Daily Egyptian newsroom, Communications Building, Room 112, by 1 p.m. the day prior to publication. The item must include time, date, place and sponsor of the event and the name and telephone number of the person submitting the brief. Briefs will be run only once.

MOVING?

Say the word, and we can hear you across the country.

As a Gallery of Homes real estate broker, we can help you find a home in over 5,000 communities. It’s as simple as putting you in touch with one of our local independent Gallery brokers located coast to coast.

Furnishing you with information on homes, real estate values, and your new community is all part of our complete relocation service.

Gallery of Homes Sales Counselors are specially trained to assist families on the move from the day you start looking to the day you move into your new home.

We can start helping today. All you have to do is say the word.
Lecturer raises questions over fertilization out of womb

By Naomi J. Cornelissen
Student Writer

Test-tube conception was the topic of the S.U. School of Medicine's second colloquium, as the physical, moral and ethical aspects of in vitro fertilization—or fertilization outside the body—were discussed.

Matthew Freund, chair-person of the psychology department, addressed the various methods of inducing pregnancy, while John Fletcher, director of the National Institute of Health, addressed the questions involved in artificially-induced pregnancy.

Freund also discussed artificial insemination, surrogate mothers, artificial and cloning—or using a donor egg with the nuclear removed and replaced with a complete nucleus from either parent.

In addressing these and ethical questions of in vitro fertilization, Fletcher explained moral problems as "problems you have here and now and how you should think about them to solve the situation." Fletcher termed ethics as "posing above the situation to examine the way you have been thinking and acting." Fletcher said that four ethical and moral areas of in vitro fertilization were considered. These include the treatment of the embryo—whether for laboratory study or for later implantation in a human subject; whether to treat infertility as a disease or a condition; and whether in vitro fertilization is an "artificial process that degrades a natural process; and the idea of the 'Frankenstein factor,' or whether in vitro fertilization will lead to genetic manipulation.

However, Fletcher said, "If we knowingly let couples have children with a chance of transmitting defects, then we should be able to make those couples without that problem to attempt to have children. During the question and answer period following the colloquium, the lack of legal protection in vitro fertilization was pointed out. Among the legal grey areas are: Whether a child born to a surrogate mother would be, whether or not a surrogate mother is guilty of adultery, who is responsible for the child, whether for laboratory study or for later implantation in a human subject; whether to treat infertility as a disease or a condition; and whether in vitro fertilization is an "artificial process that degrades a natural process; and the idea of the 'Frankenstein factor,' or whether in vitro fertilization will lead to genetic manipulation."
Reagan foreign policy focused on containment of Soviet Union

News Analysis

Establishing credibility was a major first step.

The president set the tone at his initial news conference on Jan 29 when he called the Soviets liars and cheats best on world conquest. Haig said Soviet-inspired terrorism had to be stopped. Other officials joined in.

However, the rest of the administration's policy seems slow in developing, leading one veteran State Department official to describe the administration's approach as "a cannon in search of a target."

The delay was partly because the administration decided to embark on an exhaustive review of U.S. foreign policy around the globe and partly because it made its economic program the highest priority. However, the review is nearing completion now and the outline of the new policy looks something like this:

U.S. readiness to counter aggressive Soviet moves with moves of its own, in a kind of global chess game. These can include pressure on Cuba, arms deals with China or help for Afghan rebels.

New muscle to block Soviet aggression through sharply increased military spending and providing arms to friendly nations. The Carter policy of minimizing global arms sales is dead.

Junking Carter's approach to human rights behavior as a condition for close relations. Concerns with South Korea, Argentina and Chile will be sought, and public criticism of friendly nations will be minimized.

Establishment of a "strategic consensus" of nations in the Middle East, stretching from Turkey on the West to Pakistan on the East to block Soviet incursions and ensure U.S. and international access to the region's oil.

A gradual buildup of U.S. military forces in the Middle East, beginning with participation in a Sinai peacekeeping force between Egypt and Israel in 1982, but later including facilities, if not bases, for a Rapid Deployment Force. This continues a Carter policy.

An arms-length approach to the new Marxist-oriented nations of Africa, especially where Cubans and Soviets are involved as in Angola and an attempt to prevent a smart regime from emerging in Namibia. Preliminary relations with South Africa will also be sought.
Teacher helps NASA with models

By Pam Petrow
Staff Writer

The space shuttle in his office is only a miniature replica, but Jefferson F. Lindsey III, professor of technology at John A. Logan College, has developed a piece of equipment that is used on the real thing.

Lindsey, who has been involved with the National Aeronautics and Space Administration since 1964, developed and patented an antenna used in transmitting radio signals from the lunar module back to earth.

"The 'backpack antenna,'" he said, "is foot long, flexible blade that is attached to the astronaut's space suit; took him two years to develop, he said.

The antenna has been used by astronauts on all the Apollo and Skylab missions. The Lunar Rover, the four-wheeled vehicle used on the moon's surface by astronauts in the later Apollo missions, was also equipped with the antenna, Lindsey said.

Lindsey has spent several years researching and developing math models to determine the effects of thermal tiles on space shuttle antennas. When the antennas are attached to the shuttle, the ceramic tiles are placed over them. It's the extreme heat generated from re-entry into the earth's atmosphere we're talking about, he said.

"Although the tiles distort the messages sent from Earth, they're needed," he said. He believes the great heat and vibration from the engine valves caused several tiles to fall off the space shuttle Columbia during its launch earlier this month.

"The space shuttle is also equipped with an electronic landing system, developed in the early 1970's. The system consists of three guidance antennas that are built into the spacecraft. When the shuttle prepares to land, computer readings are taken from each of the three antennas.

"It's like a voting system," Lindsey said. "If one of the devices malfunctions, the computer will take readings from two out of three of those that are similar."

The system should electronically guide the spacecraft to a landing, but NASA will conduct further tests before the system is used, he said.

Lindsey said commercial airplanes will be using a similar landing device within the next 10 years.

Lindsey, who came to SIUC last year, graduated with a bachelor's degree in electrical engineering from the University of Texas in 1961. He worked as a full-time employee at NASA after the next four years, then taught at the University of Houston for 12 years.

When he worked on NASA research projects and consisted of three guidance systems for McDonnell Douglas Corp. He received his master's degree in electrical engineering from the University of Houston in 1967 and his doctorate in engineering from Lamar University in 1970.

"I came to SIUC because it was an opportunity for me to teach and continue my research," he said.

Lindsey would like to do further research for NASA while at SIUC.

Jefferson Lindsey

Health News...

THE FIVE MOST DANGEROUS WORDS

BY DR. ROY S. WHITE
Doctor of Chiropractic

One of the most disappointing aspects of our educational efforts for the public is the number of people who continue to come to our office having said and over and over, "I'll just go away." When I first went into practice, I felt that over a period of time I would assist many of these people who had fallen into this category and would 'save them from the error of their ways.' Not only was I fulfilled, but the public would learn to search for solutions rather than learning to live with.

The disappointing thing is that today I have just as many people coming to my office for care that have been saying, "I'll just go away." for far too long a period of time.

For a question or call.

Since the 1973 ruling, Helmer said, millions of unborn children have been killed by abortion. "The subsequent Supreme Court abortion rulings have further eroded the rights of the unborn child, the minor's parents, and the fetus itself," said Helmer. "The only recourse that is legally available is to protect the life of the unborn through a constitutional amendment." Helmer said that the similar recourse was taken in the Dred-Scott case of 1857 when blacks were defined as non-persons.

Helmer said that the case was corrected by the 14th Amendment.

HELMER WENT on to declare that the HLA which does not mention exceptions does not mean that abortion should be allowed. "In fact, it is twisted logic to suggest that removing the exception clause from the amendment means removing the right to abortion," he said. "One must kill the innocent and remove the rights of the child's mother's rights in order to save her." Helmer also questioned whether abortion should really be allowed for the distressed mother at all. "In all cases of rape," he continued, "the rights of the unborn must be preserved, but that does not mean that abortion should be allowed in such cases." Helmer said that if life truly begins at fertilization, then it is the duty of the medical profession to preserve fertilized eggs from attaching to the uterus and the result of that fertilization. Helmer said that the moral and ethical arguments for abortion are no longer valid.

Farmers launch first major corn planting of spring
By the Associated Press

Tractors will roll through Illinois fields this week, weather permitting, as farmers launch their first major corn planting effort of the spring, agronomists say.

"If the rain stays away, I think we'll have most of the corn planted this week," said farm adviser Darrell Crutis of DeWitt County in Central Illinois. "Some of them are planting today (Monday) if they don't have any already." "

Workshop to aid those who work with alcoholics
By Colleen Murphy

A basic course for professionals who work with alcoholics will be hosted by the Division of Continuing Education May 11 through June 5.

The 27th Midwest Institute of Alcohol Studies is sponsored by the Illinois and Indiana Departments of Mental Health, the Michigan Office of Substance Abuse Services and the Wisconsin Department of Health and Social Services Continuing Education Conference Coordinator Andrew Marcree will coordinate the course.

Guest speakers will include Daniel Anderson, president of Hazelden, a not-for-profit organization for people dependent on mind-altering chemicals, and Patricia Eckert, assistant coordinator of the M.U.-C. Student Health Program.

More than 300 people are expected to attend the course which will include special interest seminars on adolescent treatments, women alcoholics, substance abuse and the elderly, fetal alcohol syndrome and spirituality.

Marcree also will coordinate two additional alcohol-related workshops this summer.
Replacement not wanted for role of Jock Ewing

LOS ANGELES AP — If the producer of "Dallas" has his say, none will replace the late Jim Davis in the role of Jock Ewing, the silver-haired, gravel-voiced patriarch of the Texas oil dynasty.

Davis, 72, who recently underwent surgery for a perforated ulcer, died in his home at Hollywood last week. A memorial service will be held Friday at the First Unitarian Church in Tarzana with a private burial to follow Aug. 26, 1987.

The current season, however, readily has been filled and will not be affected as "Dallas" winds up the season Friday with another cliffhanger to keep the audience in suspense for another season.

Davis does not figure in the new mystery that begins Friday. Jock Ewing and "Maggie" played by Barbara Bel Geddes, are on a second honeymoon in Europe and will not appear in the show.

Davis played a pivotal role in "Dallas." Much of the money earned by the Thorne family was created by his son J.R. came in attempting to beat out his brother, Bobby. Patrick Duffy, for the attention and affection of his father. The two brothers are rivals for control of the Ewing Oil Company and up to now Jock had been the key to control. Neither brother seems willing to make it a partnership.

Last year the shooting of J.R. generated worldwide interest and became one of the most celebrated whodunits of all time. The show with the solution broke records. More than 41.4 million homes tuned in.

Friday's victim apparently won't get off as lightly as J.R. It looks like it will be murder and another member of the cast will be the chief suspect. Although the "Dallas" people won't say for sure.

Criminal justice professor working with inmates' records

By Colleen Moore Staff Writer

Dennis Anderson, an SIU-C professor of criminal justice psychology, has a new job at the Illinois Department of Corrections. Anderson was the first registered criminal justice psychologist in Illinois.

Anderson's work at the Illinois Correctional Center includes conducting research, evaluating prisoners before they are released parole and screening "class X" offenders before they are allowed work release.

"Class X felons are aggravated kidnappers for ransom, rape, deviate sexual assault, armed robbery, armed violence, treason, aggravated arson,进展 battery, certain hard narcotics transactions and calculated drug conspiracy."

During work release inmates stay at a center, where they are under supervision, Anderson said.

Ballroomists crush

DEATH CANYON, Utah (UPI) — If names count for anything, two Illinois ballroomists flying in the International Guest Ballroom Competition picked a horrible place to drop out of the contest.

Rob Pettenucci and Paul Wassen of Oak Brook, crashed their balloon Sunday at the mouth of Death Canyon, located in the desert badlands of Utah's Juab County.

"Without a waiver," he said. "We might have to re-cast. Something would want very much not to do.

The current season, however, readily has been filled and will not be affected as "Dallas" winds up the season Friday with another cliffhanger to keep the audience in suspense for another season.

Newman Center participating in National Volunteer Week
By John Schrag

Through the cooperative efforts of the Newman Center and Chi Alpha, students and staff are encouraged to volunteer in the Carbondale area. About 100 students participate in activities each week. About 100 students donate their time each year in a variety of volunteer programs, said Liz Raser, volunteer coordinator at the Newman Center.

Many of the students will be at the Newman Center on Washington Avenue on Friday for the May Day Appreciation Fair. This event will honor Newman Center volunteers as part of National Volunteer Week, which runs from April 27 to May 3.

Baer graduate student in Community Development, said there are six volunteer programs run by the Newman Center. Baer and the other volunteer coordinator, Kathy Keefe, senior in University Studies, are in charge of the programs. These programs serve children, elderly, mentally handicapped patients, and prisoners.

One of the most popular volunteer services is the Big Brother Big Sister Program, in which students adopt a child based on their age, gender, or other factors.

The students participating in the program this semester must spend about four hours each week with the children. "Whatever they can to be a friend," Baer said. "Cindy Kolker, senior in early childhood education, is a Big Sister to a 6th grader from a low-income home. This is her second year as a Big Sister.

'I find the program very rewarding," said Kolker. "It's always been an interest of mine. I really realize that a lot of them don't have the opportunity to spend time with older people."

M.D. Yenneke, a junior in computer science, is working with another SIUC student, David Green, in their "adoption" of three grade-school brothers. "Most of these kids come from broken homes and don't get a chance to go out very often." she said. "It doesn't take much to get them excited."

Another volunteer program deals with the elderly. About 15 SIUC students are learning to quilt from some elderly women living in East Highrise. A low-income elderly housing unit in Carbondale. The semester-long project allows students to learn the art of quilting while providing companionship to people who ordinarily do not interact with young people.

Beth Katchmar, senior in agriculture, said she enjoys her work on the piece of needlework.

"It's a lot of work," said Katchmar. "It's also a lot of fun. You can learn a lot from older people. They always love to tell you stories."

Katchmar estimated that when the quilt is completed, it will have taken over 100 volunteer hours. The quilt, about 9 feet long and 3 feet wide, will be raffled off at the Newman Center when it is finished. The proceeds from the sale will go to the residents of East Highrise.

Eldorado wants to buy Rend Lake water

ELDORADO (AP) — With less than two weeks of water left in the city reservoir, officials of the Saline County community were considering using water from the Rend Lake Conservation District, which offered to sell them water for $6 a day. Eldorado Mayor Richard Moore met with the board of the water district to work out a contract for the sale of 100,000 gallons of water a day.

Rend Lake Conservation District Administrator Larry Foster said the water will be drawn from the system at Galatia and pumped to the Eldorado community of 5,000 which has been hardest hit by summer drought and a dry winter which has also affected at least four other cities.

Foster said the water will be sold at 60 cents per 1,000 gallons with Eldorado responsible for maintaining and maintaining the pipeline to Galatia. He said the RLCDD board was fully ready to extend the contract past 60 days if necessary, but stressed the wish to keep the sale on a temporary, "emergency" basis.

Eldorado is currently pumping 100,000 gallons a day from the Galatia and Harrisburg water systems. The city's major users are industry, industrial water and in Ferrell Hospital has installed an 8,000-gallon storage tank to ease the demand on the city supply. Normal water usage in Eldorado is 100,000 gallons a day. Moore said, but preservation measures have significantly reduced water draw to about 300,000 gallons.
Netters’ finale spoiled by Illini

By Rod Furlow
Staff Writer

The men’s tennis team lost to Illinois, 7-2, Monday. Saluki Coach Dick LeFevre was perplexed over the team’s play.

“I don’t know how we beat them 6-4 earlier and lost like this now,” LeFevre said. “We were lackadaisical out there. I guess U of I just wanted to win the match more than we did.”

The only win Monday for the Salukis came in singles. Lito Ampro beat Todd Black, 6-1, 6-0, and John Greif beat Scott Sommer, 4-6, 6-4.

“I hope we got all this out of our system. Because we have the conference tournament to play now,” LeFevre said.

“Maybe we were looking ahead to the tournament instead of concentrating on the match.”

The loss makes the Salukis’ season record 11-11. Illinois finishes the season at 15-11. The win over the Salukis broke a four game Illini losing streak.

“After four straight losses we were desperate for a win,” Illini Coach Jack Grooppel said. “The main difference in our play against Illinois this time and the match earlier is that we weren’t physically prepared earlier. Dick LeFevre has the fastest team in the nation.”

LeFevre questioned the inconsistency of the Salukis. They play SIU-C beat Indiana State, 7-2, Sunday, which was days after the Saxamores had beat the Illini, 6-3.

“I can’t figure this team out. In the match against Indiana State we won every singles match. Today we won two,” LeFevre said.

Warner is WIA’s Athlete of Year

Divor Julia Warner has been selected as the 1980-81 athlete of the year for Women’s Intercollagiate Athletics.

Warner and other athletes were honored at the annual WIA awards banquet Sunday night.

A senior from Lake Zurich, Warner is a four-time AIAW national All-American the past two seasons. She placed 11th at nationals last year and finished 10th this season, the highest any Saluki diver has ever finished at nationals.

Another diver, Tracey Terrell, received the Virginia Gordon Memorial Tribute. Gordon is considered to be the best single diver in the world and the only student diver ever to compete at SIU-C. She died of cancer in 1974.

Terrell, a junior from Miami, Fla., is a two-time diving All-American. She placed 12th at nationals as a freshman off the three-meter board. This season, she placed 12th in one-meter diving and ninth in three-meter diving. Her score is the highest combined finish by any SIU-C diver.

Debbie Dennis was named the outstanding seeror. That award is presented by the Student Athletes Advisory Board.

Dennis, a senior from Mechanicville, N.Y., was a defensive standout as a right halfback on the field hockey team. She was an all-conference selection the last two seasons.

Citing disagreements with football head coach Greg Dempsey, quarterback Arthur "Slingshot" Williams said Monday he has decided to leave SIUC at the end of the spring semester and transfer to Tennessee State in hopes of making the TSU team as a walk-on for the fall.

Williams, a 6-3, 190-pound native of Memphis, Tenn., joined the Salukis as a freshman walk-on in 1978 and played through the 1979 season. Going into last season, he was one of the potential starting quarterbacks, along with Gerald Crist and Paul Goodson. He was redshirted so he would have two years of football eligibility remaining.

Williams said he has not contacted SIU head coach John Merritt or any of Merritt's assistants since he made his decision, and only last week contacted admissions personnel at TSU regarding enrollment for summer school.

He last participated in a Saluki practice last Monday, and said he had not been in contact with Dempsey since that time.

When contacted Monday afternoon, Dempsey said he had no comment until he talked with Williams, and Merritt could not be reached for comment.

Williams said Dempsey had not treated him fairly throughout his three years at Southern Illinois, and that he felt it was in his best interest to go elsewhere.

"What it was," Williams said, "was what the coaches called transferring your mind. It made me feel like I had never been there. I've been here three years. It threw me off a little.

"I felt I wanted to be part of the football team. I wanted a chance to play."
