Sad librarian cites budget, trims hours

Hours at Morris Library will be reduced as a result of a 1976-77 budget limitation, Kenneth G. Peterson, dean of library affairs, said Monday.

Peterson said that at midnight on Fridays and Saturdays the library will close at 10 p.m. Friday and 6 p.m. Saturday. Hours will be restored to midnight on both Friday and Saturday preceding the last week of classes and exam week each semester.

In addition, the library will close on Sunday afternoons during vacation periods when classes are not in session. "This change has resulted from the fact that no additional support costs were appropriated for 1976-77 to cover the increased minimum hourly wage rate," Peterson said.

"The action is being taken only after consultation with library division heads, leaders of both student and faculty groups, the Dean's Council and the University administration."

User counts have been recorded for two consecutive weekends to try to determine the extent to which people will be affected by the shortened hours. Peterson said. On Fridays after 10 p.m. and Saturdays after 6 p.m., the number of users per hour in Morris Library averaged one-half of one percent of those during the total student enrollment.

Peterson said.

Multiplier arrival brings tax bills closer

By H. B. Kepplowitz

Jackson County moved a step closer to getting its tax bills out with the receipt Monday of the state multiplier.

The multiplier is a number the state uses to insure that all county is assessed on an equal basis. Each county attempts to get a multiplier of one. Which means that the assessments will not be changed. A multiplier of less than one means that the assessments are too high and must be lowered. Jackson County Clerk Robert Harrel said the Jackson County rate is 1.9914.

The county is not yet ready to send out the tax bills; however. The Jackson County Circuit Clerk's office still has to determine the tax rate. another number that figures in the tax equation.

The formula for determining a person's county tax bill has three variables: the assessed value; the multiplier; and the tax rates. The assessed value is 33.3 per cent of the resale value of a property. The assessments are made by township assessors at the start of the year.

At the same time the assessments are being done, the county taxing bodies (school, airport, mosquito abatement, civil defense, etc.) are arriving at their projected budget. The assessments are turned into the county clerk, and residents are then given a chance to appeal their assessments.

The clerk also gets the multiplier and multiplies that number times the assessed value of the property. The assessed value of their property will be multiplied by 1.9914.

The tax rate corresponds with the percentage of the overall county budget that will be appropriated to each taxing body, and how much the property owner must pay. Then the county clerk determines how many taxing districts overlap in the property, and what the rate for each of those taxing bodies is.

Finally, the county clerk adds up the rates and multiplies that number times the equalized (multiplier-applied) assessed value of the property. Harrel would not say when he expects the tax bills to be mailed. He said it depends on several factors, and he does not want to make a prediction and be wrong. Jackson County is the last Illinois county to get its tax bills out for the second year in a row.

No moo toot

Warching Saluki Jim Sobacki tooted toward victory Saturday while the football Salukis won their second game of the season by defeating West Texas State 21-17. See page 18 for more pictures from Saturday's game. (Staff photo by Chuck Fishman)
Voter registration deadline is Oct. 4

The Jackson County voter registration deadline is Oct. 4. A voter must live in a precinct 30 days prior to the Nov. 2 election to be eligible to vote. Citizens who register at the Jackson County Clerk’s office in the Murphysboro Courthouse from 8 a.m. to 4 p.m., Monday through Friday, or 8 a.m. to 1 p.m. Saturday. Carbondale residents may register at the Carbondale city clerk’s office.

Shawnee Forest supervisor to be transferred

HARRISBURG (AP) — Charles Hendricks, supervisor of the 300,000 acre Shawnee Forest, is to be transferred. Hendricks will be supervisor of Carbondale National Forest in Pocatello, Idaho, the U.S. Forest Service announced Monday. Hendricks’ replacement will be David Jolly, programs and land use planning specialist with the service in Atlanta, Georgia. No date for transfer has been announced.

Breakthrough expected in UAW–Ford talks

DETROIT (AP) — Progress was evident Monday in negotiations between the United Auto Workers and the struck Ford Motor Co. “The dam could break at any time,” said one reliable union source. A session on life insurance by some of the bargainers from both sides Monday morning was to be followed in the afternoon by a main table session, the first formal meeting of full bargaining teams from both sides since last Thursday. With a nationwide walkout by 170,000 hourly workers nearly two weeks old, negotiators have said publicly that they have not resolved any of the major issues that sparked the work stoppage Sept. 15. But union and company sources said Monday a weekend of informal talks between ranking negotiators for each side was constructive and could provide the basis for an imminent settlement. “There has been some movement, but not the kind it takes to end a strike.”

Carter blames poverty level on Ford

PORTLAND, Ore. (AP) — Jimmy Carter said Monday that President Ford’s economic policies placed a record 2.5 million Americans below the official poverty line last year and have created a new class of people to whom the American dream has been denied. The Democratic candidate pledged that if elected president, he would never increase taxes on Americans who work for a living, or whose major source of income comes from wages and salaries rather than interest, dividends and capital gains. It was an assertion Carter has made repeatedly. He made it again Monday in efforts to cast his statements he made concerning taxes in an Associated Press interview more than a week ago. In that interview he indicated he would seek to raise taxes for everyone above the median or medium income. But when reminded that the median was somewhere around $12,000, he said he could not fix a level at which an increase would be sought.

Ford promises to jail career criminals

MIAMI (AP) — President Ford said Monday that a crusade against crime, including a drive to jail career criminals and “violent and streetwise” youthful offenders, would keyv the first 100 days of a new term if he wins the presidency. He said the voters should check the ballots on Nov. 2 “and identify those candidates who have demonstrated indifference or passiveness toward crime.” Ford’s appearance here closed out his three-day campaign swing through the Deep South, and he was to return to Washington later on Monday. In a stern law-and-order speech to more than 2,000 members of the International Association of Chiefs of Police, Ford accused Congress of inaction on his own crime-fighting proposals and said: “I serve notice today that a tip priority of the first 100 days, beginning with Inauguration Day for the Ford administration, January 20, will be the rallying of America behind federal anti-crime legislation.

Pro-Palestinian guerrillas hanged in Syria

DAMASCUS, Syria (AP) — Thousands of Syrians pressed around the gallows Monday to see the bodies of three pro-Palestinian guerrillas hanged by the government in retribution for a bloody raid on a Damascus hotel last week. The government said Monday it had hanged the three guerrillas in nock by noontime, a half-hour or more in public square facing the Semiramis Hotel, where four terrorrists were being held, and placed the remains on a platform until an arrest by Syrian troops. Syrians then hanged onto balconies and rooftops to see the bodies before police removed them.

The government said one guerrilla and four hostages were killed and 34 hostages were wounded during the seven-hour siege and battle. The three captured guerrillas were executed just 24 hours after the takeover. The guerrillas, who called themselves the “Black June” group, apparently were protesting Syria’s military intervention in the Lebanese civil war.

British pound reaches all-time low

LONDON (AP) — “The British pound, once the staid currency in the world, looked Monday to clinch at $1.08, an all-time low against the American dollar. A foreign exchange dealer said British money has fallen “like a stone, unstoppable descent to hell.” The pound’s fall Monday — to 64.31 pence, or 64.31 cents, was the lowest level — was compared to the 1.2613 level at the end of trading Friday. That was also a record closing low.

Until Monday, the historic low—meaning the low at any time during the trading day—was 1.0718, registered on June 3.

Housing code inspector says refugee homes must be fixed

Chicago, Ill. (AP) — A dilapidated ceiling (top photo), is only one of the problems with the house located at 207 W. College St., which is occupied by Laotian refugees. John Yow, director of City Code Enforcement said peeling paint is a potential hazard to small children, like the little girl standing in the kitchen of the house. (Staff photo by Peter Zimmerman)

Cypriot refugee fund

The contract signed by both Karagiannis and Linson gives full responsibility for any expenses incurred for repairs deemed necessary by housing code standards, or for other code violations. Carbondale City Attorney John Womack said the contract would not fix the City from charging code violations to either Karagiannis or Linson. He would not comment on the validity of the contract.

“Tt has no place to go. how could I say no to them,” said Karagiannis. Linson paid rent and bought food for the first month that the 36 occupants lived in the two houses. Linson and Chuck Glover, owner of Chuck’s Rental at 708 E. College St., may serve with code violation notices upon inspection of a trailer at 708 E. College St., which houses refugees. Yow said.

The trailer is owned by Linson and has housed the Paborochi family for the last six months. Thongavong Paborochi said he attends John A. Logan Jr. College studying technology five meetings a week and works at Nutrition Headquarters, 301 W. Main St., from noon till 8 p.m. six days a week.

Glover has already issued the family three evacuation notices, Paborochi said.

The family is currently negotiating the purchase of a trailer in Carterville and hopes to leave Chuck’s Rentals by Saturday, Paborochi said.

Glover said it violates housing code to have nine people living in a two-bedroom trailer. Paborochi’s seven children are the only children in the court. “It’s grossly unfair to the children,” Glover said.

Barrett Rockman, a Carbondale landlord, rents a two-bedroom trailer to a family of four refugees. Rockman said he has a high regard for Linson and sees him as “the only one willing to help refugees.”

Rockman, who holds a degree in sociology, says Linson performs many of the duties of a caseworker but without the caseworker’s educational background. Rockman said Linson does a lot for the refugees with the limited resources available to him.

Rockman said he knows of no available housing in Carbondale where the refugees could live.

Allen Gesnell, director of Urban Renewal and Housing in Carbondale, said available housing in Carbondale is at its lowest rate in the past ten years. He said he knows of no available housing in surrounding communities.

Richard Diedrich, owner of Diedrich Real Estate, 800 W. Main St., said he is not aware of any available housing anywhere and added that since June 1, his office has refused customers wanting housing.

Rhodesian guerrillas want military control

By John Edlin
Associated Press Writer

SALISBURY, Rhodesia (AP) — The Rhodesian government has begun taking steps to establish a new form of government in the area now dominated by black nationalist guerrillas.

Robert Mugabe, who claims to command some 10,000 guerrillas of the Zimbabwe People’s Army ZIPA, said in an interview in Luassa, the capital of the guerrilla-held region, that: "There must be a disintegration of Prime Minister Ian Smith’s government. It is impossible for forces in the Rhodesian government to replace the settler forces in Zimbabwe, or else the proposals would be a sham and hollow.

"Smith leads the white minority government of Rhodesia, a breakaway British colony called Zimbabwe by black nationalists.

Both Smith and the presidents of five black nations — Mozambique, Angola, Botswana — regarded as the “front line” states in the battle for black majority rule in Rhodesia—also objected to letting Smith set up the interim government, and said they want Britain to convene a conference for that purpose. The British immediately announced preparations for such a meeting.

The black Africans also reaffirmed their decision to continue armed struggle by black guerrillas.

The Rhodesian government said that the plan had been handed over by Secretary of State Henry Kissinger after his 11-day African shuttle, and that the Africans were now backing out of the agreement.

But the State Department in Washington said the plan as outlined by Smith had never been approved by the Africans. A spokesman said the Africans informed Washington they had not rejected the British plan. He said this was "the position on track."

"The process is going to require major adjustments by both sides,” William D. Rogers, undersecretary of state, told newsmen. He stressed that the Africans would need a "very long preconference, and some time in which to explore the whole question of the African countries, to get the tune on track among the black Africans."

$1.6 million needed for appeal

By Steve Hahn
Daily Egyptian Staff Writer

Carbondale Mayor Neal Eckert said Monday he plans to regulate housing through licensing rather than rent control.

Eckert said that with a rent control ordinance, the city must decide the proper rate of return the landlord should get from a housing investment.

He also said controls tend to discourage the up-grading of the rented properties.

Eckert and John Yow, city code enforcement director, said the Negro housing issues during a luncheon with state and local government officials and the Student Tenant Union.

Under a rent control ordinance, the city would list the highest legal maximum rents a landlord could charge. If a landlord wished to enter the program, the city would issue a permit to rent after the housing is inspected and found to be in compliance with the city code.

Yow said the City Council considered a licensing plan two years ago which was tabled because of the financial and manpower burden that housing inspections would put on the city.

He also said the plan was opposed both by the city’s landlords and by members of Student Government who argued that a licensing program would wipe out some of the cheaper housing some students must live in because of financial difficulties.

During the meeting, Rick Pere, code coordinator of the Student Tenant Union, said state law enforcement officials said they were bringing complaints. He specifically said State’s Attorney Robert McGlone has received complaints in the disputes.

Pere said Houd told him he will not settle Smith’s case this week before the election time; "but Houd denied making the statement. He said election time has nothing to do with his non-involvement."

"I am not an arbitrator between landlord and tenants. It is my policy and always has been, election time or not, to not get involved in that type of conflict, especially when there is a written contract involved. That’s civil law,” Houd said.

The state’s attorney is responsible for the prosecution of cases in which state laws have been violated. Houd would only become involved in a civil suit in a case to which a county agency was a party. He is involved 1.2 per cent of the time, comparing it with the city’s 8.0 per cent.

Houd said he is impossible to know if there are code violations unless someone tells him. The city does have housing inspections, he said, but it is impossible for all structures to be checked every year.

16.7 per cent in the first half of 1976, than in the corresponding period of 1975.

But the figures did not show any apparent connection between the price rise and the increase of oil imports.

U.S. gasoline is refined in domestic refineries from crude oil. The average daily down does not affect the both U.S.-produced and imported, rose only about 1.4 cents per gallon during the same period, amounting mainly due to the price increases on domestic crude oil.

"Summing up its findings for the first half of 1976, the FEA came up with this picture of U.S. energy supply and demand — Energy consumption for the first five months was up 1.3 per cent; U.S. energy, production for the first six months was up 1.6 per cent. The gap was filled by higher energy imports. Crude oil imports increased 33 per cent, but were partly off by a 13 per cent decline in imports of refined petroleum products. Natural gas imports increased 5 per cent. Taken together, the imports rose some 18.6 per cent, corresponding essentially to the net increase in oil.

A big part of the increase in demand, rising 3.8 per cent, is due mainly to the 4.7 per cent rise in motor gasoline demand.

The FEA said the increase in demand is due to the increase in energy demand, rising 3.8 per cent due mainly to the 4.7 per cent rise in motor gasoline demand.

Spurneditchikker stabs two women

By Pete Retzbach
Daily Egyptian Staff Writer

Two Carbondale women were stabbed Saturday night in the parking lot of the Carbondale Mall by an unidentified man to whom they refused to give a ride, Carbondale police said Monday.

Melody Benz, 23, of Route 2 and Roberta Evers, 21, of 821 S. University Ave., were returning to their auto at about 9:20 after shopping at the Mall when a man came up to them and asked for a ride, police said.

When the women refused, the man allegedly pulled a knife and stabbed both women in the back, police said. Benz was stabbed in the chest.

The man fled by foot, heading west on Illinois 13. He is described as short, of medium build with medium-length black hair. He was wearing blue jeans and a plaid shirt, police said.

The two women were taken to Memorial Hospital of Carbondale by an ambulance from the J.C. Energy Service.

Taylor was listed in satisfactory condition Monday at Memorial Hospital of Carbondale. She was in intensive care Saturday night, a hospital spokesman said.

Benz was transferred to Wellborn Baptist Hospital in Carbondale.

A spokesman for the hospital said Benz was being treated for stab wounds and that she was in serious condition.

The knife was described by police as a butcher knife, with a blade about 6 to 8 inches long.

The man is being sought by police, who are investigating the incident.
Presidential debate format needs revisions

Generalissimo Francisco Franco of Spain used a singularly definitive way of presenting the news to his public, with a view of one of the most important news events of this election period. In essence, the format was the one that the league members administered the live audience before the first debate to remain silent and not ask the question, in essence, they were told not to act "live." This creates a potentially dangerous precedent.

The rules imposed by the National League of Women Voters on the coverage of the Ford-Carter debates, in the words of CBS president Richard Salant, "created a dangerous precedent for news coverage." In fact, Salant walked out of the first meeting with the league in protest when the restrictions were announced. The restrictions included allowing the candidates to choose which correspondents would ask the questions, the types of cameras used and where the cameras would be positioned.

The watching public is, in effect, receiving a sterilized view of one of the most important news events of this election period. So sterilized was the format that one of the league members admonished the live audience before the first debate to remain silent and not ask the question, in essence, they were told not to act "live." The public is being deprived of the complete news event witnessing only what the candidates want them to see or hear. We urge them, in effect, to receive a sterilized restraint and censorship of a news event. The public is now being deprived of the complete news event witnessing only what the candidates want them to see or hear. We urge them, in effect, to receive a sterilized restraint and censorship of a news event. The public is being deprived of the complete news event witnessing only what the candidates want them to see or hear.

Alternative to improve refugee plight

Moral dogmatism emanating from compassion toward one's fellow human beings cannot be questioned. Moral dogmatism lacks understanding of reality. Nothing, for instance, angers people concerned about the plight of refugees like the refugees themselves. These people felt that Carbondale had the resources to help refugees adjust to a new way of life in a totally alien environment. These same people finally determined that while some resources were available, i.e., teaching English to refugees, a crucial resource was not available—housing.

How can one call sponsor so many refugees knowing that adequate shelter is either in short supply or non-existent? Even if housing were available what would be the prospects for employment? Almost nil. In June, 1976 unemployment was 11.5 per cent and 27.5 per cent in the country. I am not against helping the Vietnamese or Laotians or any refugee for that matter. But when you do things on faith alone without confronting reality you mess with people's lives. Who are you helping? Aside from the article describing living conditions, are the refugees learning English? Who knows? They possibly get? Can the refugees be integrated into the community if there are no jobs available.

Perhaps Carbondale could provide a service: teach refugees English, provide skills training and then those who cannot be absorbed into the local economy could be advised of areas in the country where their learned skills were in demand. Short of that, the certain areas of the country may already have shortages and lack of skills. I would be alarmed if the refugees language skills, I let would be employed anywhere on the areas where employment opportunities are greater. Certain rational plan of refugee assistance should already exist. If not, it should be developed with SU taking the major role.

Mike Grady, Program Specialist Community Development

Nix boxing

After reading Dave Henin's article on the attempt to organize a boxing tournament on the campus and UID student, teacher and coach, I was dismayed.

The answer to my question is simple. The answer is, "Sorry, but no."

I know that it is possible to organize a tournament, but it is not possible to have one right now. There are too many things that need to be taken into account: safety, scheduling, finances, and legal issues.

Jerry Cass,.ui., Sophomore

Rockford high schools losing more than sports

By Cindy Yomantas
Student Writer

Extracurricular activities are an important part of the education process. The students realize this the booster clubs and students have anything to say about it.

It seems these two groups are at odds with the Board of Education as to what activities are important at the high school level.

All extracurricular activities for the city's high schools were cut by the school board when Rockford's Aug. 26 tax increase proposal was defeated. The referendum lost by an overwhelming margin - 24,421 to 13,913. A total vote of 38,334, or 71 percent of the total vote.

It was a no-win situation for no more cheerleaders, no more football, no more dramatic plays. Newspaper and yearbook staffs have been reprimanded because they are self-supporting. This happened in the high schools of the second largest city in the state - a city which ranks 17th in per capita income nationwide in comparison to cities of a comparable size. Though the school board was able to sit back and be content with such a program for its public school students, the students were not.

Extracurricular activities are an important part of the educational process: the students realize this.

In a demonstration unequalled by any other seen in Rockford, more than 1000 high school students walked out of classes Monday and converged on the Board of Education building. They wanted sports back and they made sure the school board knew it. Girls in cheerleading uniforms (unofficially) conducted a pep rally on the grounds of the administration building - this time yelling for sports in general, not sports. Last year's football players, swimmers and wrestlers voiced concern about getting the college scholarships for which they had worked the last three years.

Band members also express discontent at the present school situation.

The logic behind these demonstrations, which drew front page coverage three days running from both Rockford newspapers, was that every time the students walked out the school district lost money.

As one worrywart put it, "It's gonna cost them more than sports."

After two days of walk-outs, student action finally paid off. The school board, after rejecting numerous earlier proposals, granted the booster clubs permission to attempt to finance extracurricular activities.

Unfortunately, the board's action came after the deadline for fall programs to begin in order to be eligible for state championships. (Who needs Friday night football games or homecoming anyway, right?)

So whether booster club actions are successful or not, the city that had the 1974 state high school football champions will have no entrants this year.

After returning its 3/4 decision which allows the booster clubs to attempt to finance all fall sports (except football and field hockey) and all non-sport activities which the funds can cover, the board said it was unhappy with its decision. In fact, the deciding vote was cast in favor of the program only because the member wanted to get "these children back in school."

The booster clubs, made up of representatives from each of Rockford township's five high schools, have until this week to present the school board with a performance bond to cover the costs of fall extracurricular activities estimated to cost about $385,000. Three of the board members conceded that there is little hope for raising the money.

Again the board has underestimated what unhappy, riled people can do. Booster club leader Don Edwards, working with the enthusiasm of the entire student body, has collected $45,000 in cash and has $20,000 in pledges.

Why all the fuss over extracurricular activities? It seems, as one disgruntled school board member put it, that extracurricular activities are more important than basic education in the minds of most people. More important? Maybe not, but school without them is an awful bland form of education.

Extracurricular activities are the only things that keep the students interested. If a swimming coach is the only guy who can keep Jimmy going to English classes, because Jimmy likes to swim, what's wrong with that? Jimmy's parents are happy that swimming is keeping him in classes.

Students in the present situation for the basketball team or acting in a play, students are learning a lot that they can't get from overcrowded classrooms.

(East High School, built in 1940 for 1800 students, now has approximately 2800 students.)

Students learn to work in a group, to discipline themselves, to take responsibility and often to become leaders. Many times, as students let their creative talents grow, they discover future careers - not too often found in sophomore history.

Rockford may have a bigger problem than it can handle when all of a sudden thousands of high school students have no Friday or Saturday night games to entertain them.

If extracurricular activities have spotlighted basic education in the minds of many Rockford residents, then maybe there's a good reason. Maybe the school board should do something about making basic education more relevant for today's student.

Regardless of the outcome of Rockford's school situation the Board of Education has at least been educated a little themselves as to how much they can play around with education.

' Debate' more an exchange of views

By Jim Wisuri
Daily Egyptian Staff Writer

After all was almost said and done, it was left to the miracles of modern technology to grab the headlines for the first debate between Gerald Ford and Jimmy Carter.

History will debate whether the "28 minute gap" of the networks' pooled staffs will rival Rose Mary Woods' 18 minute misuse of three years ago.

The audio malfunction with about 10 minutes left in the debate certainly provided comic relief from the plethora of unanswered charges which kept the "debate" from living up to its name.

And even though Ford and Carter don't go into remarks on the nation's intelligence system, the press went out. The country's radical elements may say it was no coincidence, but Harry Reasoner and Howard K. Smith of ABC News described the incident as one caused by the pooling of the major network's resources.

Reasoner's wit was also a highlight of the evening - not to take anything away from Walter Cronkite or John Chancellor.

After the audio breakdown he marveled at the fact that despite thousands of dollars worth of electronic equipment and manpower, the Walnut Theater in Philadelphia was for all practical purposes, separated from the rest of the country.

Although the League of Women Voters deserves a lot of credit for bringing the candidates together in Philadelphia, they are also to blame for the event's shortcomings.

One, the rebuttals of the candidates did, as Harry Reasoner said, "often raised more interesting questions than the original statements."

There should have been an opportunity for a candidate to answer his opponent's rebuttal if the spirit of a debate was the point of the proceedings.

Second, the league would not allow the television cameras to show the audience at the Walnut Theater, ostensibly to focus all the attention on the candidates and what they were saying.

This hampered television's coverage considerably. Not only would random audience shots have provided a little variety for the viewers, but the pictures of audience reaction would have added another dimension to the reporting.

Were President Ford's domestic policy statements the reason for an occasional flash of Jimmy Carter's toothy grin, or was he sharing a chuckle with his wife Rosalynn, she of the 400 spectators invited to attend by the League?

There were undoubtedly viewers who also would have liked a glimpse of Susan Ford and her attire as she witnessed her father's attempts to woo the voters of America.

Finally, the debates should have had a more relaxed feel. Though both candidates were provided with chairs, neighbor sat down until the microphones went dead.

There also should have been an intermission to ease the boredom of accounting, counter-charges and half-truths. An interlude would have allowed the public to catch its breath and reflect on what was said while at the same time making it easier to raid the refrigerator.

Howlett, Thompson talk of promises, Daley's power before press group

By T. Lee Hughes
Associated Press Writer

SPRINGFIELD, Ill. — In their first face-to-face confrontation of the gubernatorial campaign, Michael J. Howlett and James R. Thompson squared off recently over the issues of campaign promises and the influence of Chicago Mayor Richard J. Daley.

During a joint appearance at a meeting of the Illinois Press Association, Republican Thompson accused Democrat Howlett of making campaign promises to build highways and other projects "without determining where the money in coming from.

"And I'm not sure that we can campaign in that fashion," Thompson said. Howlett, who was seated next to him at the table, replied that the highways be had suggested would cost the state treasury only about $1 million in fiscal 1978, and the cost of the funds "would be federal or local money."

And he said the Middle Fork Reservoir and two other reservoir projects he supports would cost about $10 million in fiscal 1978 "which is a reasonable program for the state of Illinois. The two candidates folded questions from a panel of reporters, the first time they had appeared jointly in a format that permitted questioning. The Howlett campaign has repeatedly refused Thompson's challenges to debate during the campaign, with Howlett saying what counts is administrative action, not debating talent.

Despite this, Friday's session took aspects of a debate, with the candidates exchanging barbs that sometimes brought outbursts of laughter from the audience. Thompson said later that he considered the exchanges a "minimum-min debate."

"It wasn't a debate, it was a discussion," Howlett said. "During their exchanges, Thompson charged Howlett for relying on heavily on possible federal funds in promoting new highways. 

"There is a limit to the amount of federal money available in Illinois and the governor must choose between resurfacing, reconstruction and new highway construction."

Thompson said.

"Jimmy Carter and the Democratic Congress will give us the money," Howlett retorted in laughter, and the audience broke into laughter.

Howlett, who was seated next to him at the table, replied that the highways were had suggested would cost the state treasury only about $1 million in fiscal 1978, and the cost of the funds "would be federal or local money."

And he said the Middle Fork Reservoir and two other reservoir projects he supports would cost about $10 million in fiscal 1978 "which is a reasonable program for the state of Illinois. The two candidates folded questions from a panel of reporters, the first time they had appeared jointly in a format that permitted questioning. The Howlett campaign has repeatedly refused Thompson's challenges to debate during the campaign, with Howlett saying what counts is administrative action, not debating talent.

Despite this, Friday's session took aspects of a debate, with the candidates exchanging barbs that sometimes brought outbursts of laughter from the audience. Thompson said later that he considered the exchanges a "minimum-min debate." "It wasn't a debate, it was a discussion," Howlett said. "During their exchanges, Thompson charged Howlett for relying on heavily on possible federal funds in promoting new highways.

"There is a limit to the amount of federal money available in Illinois and the governor must choose between resurfacing, reconstruction and new highway construction," Thompson said. "Jimmy Carter and the Democratic Congress will give us the money," Howlett retorted in laughter, and the audience broke into laughter.

SPRINGFIELD, Ill. — In their first face-to-face confrontation of the gubernatorial campaign, Michael J. Howlett and James R. Thompson squared off recently over the issues of campaign promises and the influence of Chicago Mayor Richard J. Daley.

During a joint appearance at a meeting of the Illinois Press Association, Republican Thompson accused Democrat Howlett of making campaign promises to build highways and other projects "without determining where the money in coming from." Howlett, who was seated next to him at the table, replied that the highways be had suggested would cost the state treasury only about $1 million in fiscal 1978, and the cost of the funds "would be federal or local money."

South battles creeping vines; 60-foot stems climb buildings

JACKSON, Miss. (AP) — The South is fighting another war, and the vines are winning.

Southerners fight and fall back daily from a beautiful Oriental pest, the kudzu vine, a decorative friend in the 19th century turned ravager late in the 19th century, principally as an ornamental porch vine. Hospitable Southerners didn't know the vine would take over the house. One Louisiana said, “My daddy had a kudzu vine, and it began to take over the house and the yard and the trees. My daddy called it ‘yard-a-night,’ cause I’d swear it grows that fast. He fought that vine for 20 years and never did win.”

They say they can control kudzu.

In Mississippi, the state highway department makes no pretense of waging all-out war on kudzu. Its crew just skirmish a bit here and there when some irate property owner screams about an invasion.
Farmers starting to harvest drought-damaged area crops

By William Prater
Associated Press Writer

Illinois farmers have begun the harvest of corn and soybeans beset by drought, disease and pests.

It was providence, not agricultural skills, that meant the difference this year between fair crops and famine one.

Harvesting is in progress or ready to begin in drought-stricken Illinois. In some areas the work is beginning a week or more earlier than usual because the crops are drying out, not from lack of sun, but from lack of moisture.

On the average, crops will be far below early expectations. And on an average, the plants were hurt badly by drought. But individually the pictures are mixed, with hundreds of farmers combining embarrassingly meager fields.

At the University of Illinois experimental plots near Brownstown, small stands of soybeans yield up to 35 bushels an acre, about average for the Rock River country.

But farmers starting to harvest are finding a number of murky Midwest lakes and rivers in useful stores, or even in junk, He's a diver. probed the bottoms of normal rainfall this summer, the harvest may be optimism.

The corn boar, stalks and other rhizomes and diseases have done their part to trim this year's harvest, but they've all been caused or aggravated by the drought.

This summer in the northern Illinois county of DeKalb, primarily a corn and beef producer, recorded 1.5 inches of rain instead of the normal seven, said Ben Bolen, UI farm extension advisory.

"And at one station, they recorded just 8.5 inches. In the south half of the county, corn is down 35 percent from a year ago. For the whole county, we'll be down 20 percent." Northern Illinois farmers "had started opening the soybean fields," Bolen said. "We've found information on yields, but county-wide I'd say we're going to be off 20 percent from last year.

The east central portion of the state has some of the richest prairie soils in the world, and the dark black dirt retains its moisture well.

With about one-fourth of the soybean crop harvested in Macon County, "It's going to be about 35 to 45 bushels an acre," predicted Bob Chamberlain, an associated farm advisor.

Some early varieties of beans which caught late spring rainfall just right "are up to about 50 bushels but the late planted ones have done poorly," Chamberlain reported.

The county average last year was 90 bushels an acre, one of the best in the state.

The county average last year was 90 bushels an acre, one of the best in the state.

FORT ATKINSON, Wis. (AP) —
Charles Daniels likes to collect antiques, artifacts, junk and whatever else people lose or throw away.

But he doesn't do his collecting in nickels or dimes or even in not-so-nice rubbish piles.

The deeper, the darker and the wetter it is, the better Daniels likes it. He's a diver, probing the bottoms of murky Midwest lakes and rivers with self-contained underwater breathing apparatus scuba gear.

Daniels, who farms in Hurley, Ill., but often visits his parents here, has been a diver and occasionally is the otherwise uninviting Rock River.

He and partner Monte Smith, a Fort Atkinson policeman, have made several dives into the river which runs through downtown.

They have found a number of valuable or at least interesting items on the muddy riverbottom, including an old clay spittoon.

"It's a very rare piece," says Daniels, who says the Rock River is so shallow and muddy that he only feels his way along the bottom rather than trying to see anything.

He and Smith have also found a number of old clay beer bottles, circa 1880, as well as an old clay beer keg.

Daniels also found a number of old rusty bottles and a copper gourd, usually used by bootleggers to measure whisky and other drinks.

He can't see anything

She's stripped, wormed and now she wrenches

By Charlotte Black

Albuquerque Tribune

ALBUQUERQUE, N.M. (AP) - She was a former stripper, but was so scared the first time she went onstage that she tripped and fell flat, and _"I couldn't carry them,"_ says Wendy Stewart.

She's a first-rate mechanic and a partner in a business dealing in racingwheels. She started a worm farm because she plans on being very lazy. And, if cars come in from my wheelchair, at least I can push it between my beds.

Wendy Stewart bought Albuquerque Zoo Exchange - recently rechristened AGEX - two years ago. She operates it with her partner, Ann Fagin.

She's small and dynamic, with a Midwestern accent.

"She spurned the only courtship I was interested in," said Rabb, who is the huge elephant at the Brookfield Zoo.

"After Di~iorVi~i~~~:~h~~t~a~~ studying results of an autopsy to determine wasn 't receptive," said Rabb, who is found dead in her stall, lived for two years. She was "a former stripper, but was so scared the first time she went onstage that she tripped and fell flat, and..."

She's the daughter of a Los Angeles auto parts store and a huge apple ranch, and my parents..."

"But I never knew it. My father was forced to teach me what life was all about." She got married the day _"That was in_ 1972. That marriage and two other marriages are now over. She says she's been "happily divorced." She also didn't inherit when a business bankruptcy was staged. She's a former stripper, but was so scared the first time she went onstage that she tripped and fell flat, and..."

"Wendy says," I weeded out the ones who did. It's worth the trip to climb into her red pickup with while she runs errands. She says she likes the..."

"Wendy laughs," She says, as the_ "A lot did. I didn't want to use poison and wanted to solve the problem in a way which would be least harmful to the ecosystem..."

Her name is fairly often sought by museum scientists, whose expertise is behind the exhibits of African elephants, Indian headress and Egyptian mummies usually associated with natural history museums.

When Brookfield Zoo near Chicago was reconstructing a more natural environment for its animals, it went to scientists from a Field Museum geologist about the kind of stone to use.

A museum zoologist was asked by a Bolivian government in charge of a national museum to help trace the source of a parasite which was causing hematemesis in camels. It was found that it was carried by a native cat and the government could then institute control measures.

Inger said that stricker fish and wildlife laws have increased the number of inquiries the museum receives from officials at O'Hare International Airport, the world's busiest commercial airfield.

Inspectors there are called upon to decide whether feathers or pells are from birds or animals on lists of endangered species and forbidden entry. Not all of these are easily recognized, so the advice of museum scientists is sought.

"The insects are usually handled by specialists-frequently is sought by home owners who want to identify insects they find on their property..."

"The answer," Inger said, "is maybe yes or no..."

"But if you can't tell what they are, it's best to send a few bugs into the lab...

"We'll give you the best deal..."

"Save $106 on jet fares to Europe and book anytime you want. ceelandic...

Leadership conference slated by Future Farmers of America

By Judy Comstock
Daily Egyptian Staff Writer

Officials of the national Future Farmers of America (FFA) will hold a three-hour seminar for high school students at 7 p.m. Tuesday in the auditorium and the seminar room of the Agriculture Building.

The two-hour seminar, to which FFA officers from 18 states and Canada, and representatives of agriculture organizations in Southern Illinois have been invited, will involve discussion of goal setting, projects, and new ideas as 4-H individual goals.

Doug Lynn, FFA vice-president of the FFA from the eastern region, and Lee Louden, FFA vice-president from the western region, are visiting SIU as part of a tour of Midwestern universities.

During their two day stay, they are speaking to agriculture education class faculty and administrators, in addition to conducting the seminar.

Louden said the purpose of Chicago area post offices may be overcharging

CHICAGO (AP) — Post offices in the Chicago area may have been overcharging customers by nearly $8 million a year, a sampling by the state's consumer advocate showed Monday.

If the same sloppy and inaccurate procedures are common throughout the nation, the overcharges could amount to $300 million, said Consumer Advocate Celia Maloney.

She said there was no evidence of fraud, but instead blamed inaccurately calibrated post office scales and "sloppy procedures."

Maloney said her investigators mailed three parcels and three sample letters at random during the past year. The parcels were sent to post offices in the city and the suburbs.

Postal clerks got things straight less than one-third of the time, Maloney said, and there was a total net monetary error of 5 per cent in the post office's favor.

"In the city of Chicago alone," she said, "this means that post offices collected almost $20 million profit at the expense of the consumers last year."

Maloney said the sample letters and parcels were first weighed on highly accurate state scales. When they were brought to the post offices, she said, the scales there were wrong 48 per cent of the time.

Hastings said that some times the error was cancelled out by a second, human, error in calculating the amount of postage due.

The tour is to inform future agriculture teachers of the opportunities and programs of FFA so they can do a better job with students when they go out to teach. The tour also brings feedback from the universities to the national level of FFA, Louden said.

FFA is an organization for high school students in agricultural education. Along with vocational education, FFA provides laboratory experience for these students.

Nationally, FFA has 500,000 members. There are 17,000 members in Illinois, Louden said.

At the university level, the College FFA which gives agriculture education majors practical experience in advising and working with high school chapters, Louden said. There are 55 members in the SIU chapter.

Areas of FFA training include farming, environmental science, food processing, forestry, conservation, small animal care and horticulture.

Louden said he is in agricultural education at Ohio State University. Anderson is a pre-veterinary science major at the University of Wyoming. Both have taken a year off school to travel around the country to speak to their local chapters and meet with instructors at universities, state FFA chapters and local members.

Kentucky State's new head is SIU Ph.D. graduate

A 1968 Ph.D. graduate of SIU was inaugurated Friday as president of Kentucky State University in Frankfort.

William A. Butts, who received his doctorate in political science, took over from former President Carl M. Hill in December 1975.

Butts, 43, is a native of Kilmichael, Miss. In 1952, he graduated from Mississippi Valley State College in Itta Bena with a bachelor's degree in political science. He taught in public schools in Natchez, Miss., and came to SIU in 1962, receiving a master's degree in government the next year.

After receiving his Ph.D., at SIU in 1966, he taught at Mississippi Valley State in Itta Bena with a bachelor's degree in political science. He taught in public schools in Natchez, Miss., and came to SIU in 1962, receiving a master's degree in government the next year.

1977 cars get better gas mileage than 1976 models, EPA says

Unyielding pedestrian

Fred Castro, sophomore in business, sits conspicuously in the middle of Lincoln Drive in front of the Communications building. He was waiting for a ride home Friday and didn't want to be "missed".

WASHINGTON (AP) — Purchasers of new 1977 model cars can expect to get about six per cent better gasoline mileage than owners of 1976 model cars and 34 per cent better mileage than owners of 1974 models, the Environmental Protection Agency (EPA) said.

The agency said the 1977 model cars tested in its laboratory averaged a theoretical 18.6 miles per gallon (mpg) per gallon of gas, or one mile a gallon better than the 1976 models tested a year ago.

The 18.6 mpg industry average exceeds the 18.0 mpg federal fuel economy standard which will go into effect with 1978 model cars. There was no federal requirement for 1977 models.

The EPA said 11 of the 13 automobile manufacturers met the 1978 standard with their 1975 models and 7 of the manufacturers met the 1980 standard of 20.0 mpg.

The improved mileage is the result of better engines, new engine combinations and changes in the average weight of the cars produced by each manufacturer. EPA said. Slightly over half the improvements, resulted from better engines and new engine combinations, the agency said.

Foreign-built cars dominated the top mileage spots with the diesel-powered Volkswagen Rabbit taking the number one spot with an average 44 mpg. EPA said. The agency said the 90-cubic-inch Rabbit diesel averaged 30 miles on its simulated city driving and 52 miles on the simulated highway cycle.

A four-cylinder Toyota Corolla with a 71-cubic-inch engine took second place with a 41 mpg rating while the Volkswagen Dasher diesel was third with 38 mpg.

The Mazda 888 with a 78-cubic inch-engine was fourth with 38 mpg. The top American finisher was the Chevrolet Chevette with a 96-cubic-inch engine. It finished fifth with 36 mpg.

All of the top finishers had manual transmissions. The top finisher with an automatic transmission was the Chevrolet Chevette, which averaged 30 mpg on the EPA cycle.

The biggest over-all improvement by a manufacturer came from Mazda, which improved the mileage of its cars by an average 18.2 per cent. EPA said 11.4 per cent of that improvement came from changes in vehicle weight and in the mixture of models being offered for sale and the remainder came from changes in the engine and in new engine combinations.

General Motors also made a large improvement over all. EPA said, increasing its average by 10.4 per cent. The agency estimated 6.4 per cent of GM's improvement came by reducing vehicle weight and the mixture of cars being sold.

The 1977 model fuel ratings continue an upward trend that started with the 1975 models. Mileage dropped from 1967 to 1974, hitting a bottom of 13.9 mpg. Industry average in 1974. The industry average in 1975 was 13.6 and the 1976 model hit 13.7 mpg.

The cars tested by EPA are those that meet federal emission controls in effect in 49 states. Cars from California have to meet more stringent standards in effect in the state and generally do get poorer mileage.

On-campus job interviews to be given

The following on-campus job interviews will be held on campus in the Career Planning Placement Center Oct. 4 to Oct. 8. For view appointments or additional information, interested students should visit location at 1240, Woody Hall, Section B, Room 204.

Monday, Oct. 4
Oro Drug, Inc. of Oak Brook, Ill., will interview prospective trainees in store management. The entry-level positions offer training on the job at store locations in administration, personnel, buying, merchandising, marketing, accounting, sales training, physical, and other aspects of running a retail business.

Tuesday, Oct. 5
The FBI will interview prospective special agents. The education requirements are: law, accounting, and language. Applicants must meet the following requirements: be a U.S. citizen, 23 to 34 years of age, have vision no worse than 20/200 corrected to 20/20, and not be color blind. Factory Mutual Engineering of Chicago, Ill., will interview for the position of consultant engineer in the loss prevention and property conservation field, which includes, inspecting and consulting in all industrial plants insured in the Factory Mutual System. A B.S. degree in any engineering field, chemistry or physics is the education requirement.

Wednesday, Oct. 6
Morse-Bay Wardner of Ithaca, N.Y., will interview prospective salesmen of power transmission equipment. A 16-month training program offers sales positions in major U.S. cities. Majors accepted include B.S. in industrial technology, B.S. in management, and B.S. in marketing.

Thursday, Oct. 7
Industrial Risk Insurers of Chicago will interview students for engineering, inspection and industrial consulting. Requirements are B.S. in Engineering, Technology, Chemistry, and Physics.

Loyola University's School of Business in Chicago will interview students interested in the MBA program at Loyola University. A.U.S. Navy Recruiter from St. Louis will interview for training programs with placement in the following areas: geophysicist (seismography); geophysicist (meteorology); aeronautical engineering duty officer, civil engineering corps, nuclear power program, nuclear power instructor, naval aviation programs, surface line program, engineering duty officer and supply corps officer. Many different majors are accepted for these programs.

Friday, Oct. 8
Texas, Inc. of Houston will interview students interested in the MBA program at Loyola University. B.S. and Ph. D. degrees. Texaco geologists apply knowledge to the discovery of new oil and gas reserves by interpreting surface and subsurface information and by recommending prospective acreage for the location of exploratory wells. Interviewees must complete Texaco application prior to interview. The U.S. Navy recruiter from St. Louis will conduct further interviewing.

All job applicants must be U.S. citizens.

Information night set for students

Browning Carrott, chairperson of the Prelaw Advisory Committee, announced that the annual prelaw information night will be at 7:30 p.m. Tuesday, Oct. 5, in Lawon Hl.

The meeting is open to all interested students, freshmen through graduate level, and any other members of the University community considering law as a career. The program will feature the director of admissions for the SIS School of Law, Associate Dean Thomas G. Roedy Jr., and a panel of alumnae.

The panelists each will talk about particular problems facing prelaw students.

Wednesday, Oct. 6
Morse-Bay Wardner of Ithaca, N.Y., will interview prospective salesmen of power transmission equipment. A 16-month training program offers sales positions in major U.S. cities. Majors accepted include B.S. in industrial technology, B.S. in management, and B.S. in marketing.

Information night set for students

Browning Carrott, chairperson of the Prelaw Advisory Committee, announced that the annual prelaw information night will be at 7:30 p.m. Tuesday, Oct. 5, in Lawon Hl.

The meeting is open to all interested students, freshmen through graduate level, and any other members of the University community considering law as a career. The program will feature the director of admissions for the SIS School of Law, Associate Dean Thomas G. Roedy Jr., and a panel of alumnae.

The panelists each will talk about particular problems facing prelaw students.

Three discs show better turn

By Keith Tushorn
Daily Local News Staff Writer
I've Got A Reason
The Richie Furay Band
Asylum-TE 4617
Bigger Than Both of Us
Dr. John Hall and John Oates
RCA APL 1467
Good Single Good Playin'!
Grand Funk Railroad
MCA 2119

Here are three albums by three different groups who play three different types of music. The reason discs are a turn for the better. It is never to hear a whole album's worth of material from Richie Furay for a change, since his output was at a half-hearted minimum with the Southern-Hillman-Furay Band. "I've Got A Reason" is a completely whole-hearted, though, as its theme line in Furay's conversational year ago, to Christianity.

He and his band are at full strength here, with Furay's singing better than ever, the band's playing more than satisfactory, and the compositional blending of country and rock styles superb. The Downstate Rambler's band has been chosen as the back-up band for the Vassar Clements bluegrass concert at 8 p.m. Thursday in Shryock Auditorium. The Downstate Rambler band was one of the several bluegrass bands that auditioned before judges and students behind Woody Hall Saturday for a place in the Vassar Clements Concert. Mike Blank, assistant director of the Student Center and one of the judges said, "The Downstate Ramblers were picked because they are a more refined band than the others and a very good one. They also look the part." Blank also stated that the band was a more traditional than progressive band.

Netters split two matches

By Rick Korch
Daily Egyptian Sports Editor

The women's tennis team split two
matches over the weekend as they
were nipped by Illinois State 5-4,
then came back to knock off Indiana 8-4.
The action took place at Normal.

Briggs, Marsha Blaedel and
Shad Deen all kept their undefeated
records intact with two wins. Briggs
and Bladed, the No. 1 and 3 players,
are both 6-0, while Deen is 7-0,
playing in the No. 4 or 5 position.

Blaedel also raised their doubles
record to 5-1.

"We weren't doing too good and
we shouldn't have lost the first
match," said Coach Judy Auld. In
the Illinois match, she changed the
lineup and apparently it worked.

For the first time all year, the
Netters won all three doubles
matches. "We've never done that
before," Auld said. "The doubles
players look really good."

Sophomore Sue Ciapikay was
moved to the No. 3 position in the
second match after losing in the No.

IM softball
quarterfinals being played

SIU's 12-inch intramural softball
playoffs are underway and several
teams have emerged as favorites.

At Lery, graduate assistant in
charge of softball said. "There are
great teams, and the Dugout has
looked good. Pulloutfits and the
Walters have both tough weeks."

Lery mentioned Legal Eagles,
Phetia Thu, Kappa Alpha Psi, and
Ballbusters as other possible
contestants. Unbeaten teams still in
contention are the Bombers, Kingsha S. T. R., Pierce Olympians,
Schwartz Street, Buchingsingers and
Pierce Super Jacks 11.

After Tuesday's play sixteen
teams remain. Wednesday's games,
Thursday's quarterfinals, and Friday's semifinals are being
played at 4 and 5 p.m. at field east
of the Arena. Saturday's championship game begins at 10 a.m.

"In a single elimination tourney
like this, Lery said, "a team can't afford to look ahead to it's next
game. You have to play every game like it's for the championship.

Lery noted that the 46 teams
that qualified for the playoffs this year is the most ever for softball.
"We didn't have as many unbeaten
teams this year," he said. "It seems that more matches were pretty
evenly matched."

Tuesday's top games will pit two
unbeaten teams against one other
times. The undefeated Wairers play Dugout while Schwartz Street
tangle with once beaten Freeway Flyers.

Saluki's new men cheerleaders help form a pyramid during the game. Pictured are (front) George Burns, Barry Gibson, Tom Nellock, Terry Ricci, Arthurene Clemons; (middle) Jane Holmes and Nancy Lipe; (top) Jan Stiritz and (background) Ron Goeringer. Joyce Mays and Dorothy Glenn are not pictured.

Home opener win drives fans wild

Something Saluki football fans aren't used to returned to McAndrew Stadium Saturday—a winning football team.

Fans and players alike let out their emotions after Bob Collins dove in for the winning touchdown. It's been a long six years since the fans had something to cheer about at a home opener, but they couldn't have asked for a better finish than the Salukis provided in Saturday's 21-17 victory over West Texas State.

The Salukis will be looking for their third straight win next Saturday when Lamar comes to McAndrew Stadium.

The student side of the stadium was packed, and a crowd of 11,500 was on hand. Not too many people left early, and most stayed around to rant and rave after the game.

With four of their next six games on home turf, the Salukis have an excellent chance to finish with a winning record for the first time since 1971.

With the Marching Saluki Band performing at their clowning best, the fans had plenty to cheer and laugh about. In short, a good time was had by all, except of course, the West Texas State Buffaloes.

If the game was any indication of what is to come, football at McAndrew Stadium will provide some entertaining Saturdays in Carbondale.

Athletic Director Gale Sayers was introduced to the crowd at halftime, and he summed up the feelings of the entire athletic department when he said: "With this kind of fan support, SIU's athletic program could be No. 1 in the country."

SIU Athletic Director Gale Sayers yells encouragement to the Salukis during Saturday's game. To his left is his assistant John Novotny. (Staff photo by Daryl Littlefield)

A group of students whoop it up after quarterback Bob Collins' touchdown put SIU up by four points with 44 seconds left. (Staff photo by Peter Zimmerman)
Women golfers second in state

By Dave Heun
Daily Egyptian Sports Writer

Despite cold and wet weather, the SIU women's golf team finished second in a shortened version of the state tournament held in Macomb over the weekend.

A steady rain halted play after nine holes Saturday, forcing a scheduled 36-hole tournament into a 27-hole tournament.

The Salukis, in-state rival, the University of Illinois, successfully defended its state title by placing first with a score of 692. SIU followed with 335 and Illinois State and Western Illinois tied for third with 371 strokes.

The first 18 holes were played in 50 degree weather Friday at the Macomb Country Club, and the Salukis finished fourth.

"You can't complain about the weather," said Coach Sandy Blaha. "Nobody shot real well, and the girls were saying that a lot of good shots were kicking out of bounds."

Sandy Lebednik shot an 81 in the first day, which is about 10 strokes over her usual score. Judy Dehnen shot an 85. Both came back the next day to shoot a good nine holes in a steady rain at the Western Illinois University course.

Lemons and Dobrman finished second in 36 holes, and the tie for fifth place Illinois Rockey Beach finished with the lowest score at 118.

Blaha said that Illinois had the tournament rapped up after the first day, but she was disappointed that the rain kept them from winning. Lebednik forestalled the possibility of holes.

"The Salukis beat Illinois in their tournament this year," and Blaha claims that the Illini are the near Salukis will have to concentrate on bearing.

"They really elaborated as last year," she said. "I never be seeing them again, we play them about five times this year." The team has next weekend off, but travel to Michigan State for the Midwest Tournament Oct. 8-9. All of the teams that competed in Macomb will be there, setting up another meeting with the Illini.

You and your Minolta.

Pick up your Minolta and look through the finder. Are you looking out? Or into your own mind? You use an image floating in space. Did you capture it, or create it? Something is in you and you respond. Your Minolta responds with you.

A Minolta SLR is so natural in your hands it feels like a part of you. Everything works so smoothly. You never have to break away from the total information finder to make adjustments. The image is always big and bright right up to the instant you shoot. And patented CTC, the lens metering assures you of accurate exposures, even in high contrast situations. You're free to explore the limits of photography with a Minolta SR 1. Over 40 superbly crafted Rokkor X and Minolta/ Carl Zeiss lenses let you stretch your imagination from fisheye wide angle to super telephoto.

Three models, the SR-7002, SR-720 and SR-7200, provide quick match needle exposure measurement, shutter speeds to 1/1000 of a second and traditionally effortless Minolta handling. Plus a wide range of creative and convenience features to match your second budget. The right one is at your Minolta dealer. Waiting for you. For literature, write Minolta Corporation, 101 Williams Drive, Ramsey, N.J. 07446 in Canada

Anglophoto Ltd. P.O.

Get a better picture of America.

Minolta products are thoroughly reliable. With Minolta you can say "I've got a real camera." The Minolta will hold you. The 4-page book ordered under the suggested retail price is yours for the asking. 

What's in your picture? It's in the yellow record of getting a Minolta! Which Minolta do you choose? We built cameras from the start. We are Minolta. Minolta Corporation. 101 Williams Drive, Ramsey, N.J. 07446. Minolta 4 is a week for delivery.
Saluki comeback shocks Buffaloes

**Saluki fans impressed with Saturday's show**

By Doug Dorris
Assistant Sports Editor

An estimated 11,500 fans showed up at SIU's first home football game under new Head Coach Rey Dempsey. The crowd, which reflected the campus student body, was most impressed with the Salukis. Tony Towpfs, SIU football player, said, "Rey Dempsey's the difference. I'll be here another four years, and he's been here four years. We've never had a head coach who's been here four years." Towpfs has been recruited by Alumnus Tony Towpfs, who helped to bring in many players this year.

Quarterback Bob Collins hugs the ball after scoring the winning touchdown with 44 seconds remaining in Saturday's 21-17 win over the West Texas Buffaloes. Tackle Mike Abeği (74) provided a big block in the play. (Staff photo by Peter Zimmerman)

**Buff's stampedede**

Nancy Lipe, an SIU cheerleader whose job it is to know crowds, said, "This is the most enthusiastic crowd in football I've seen since I've been here. I'd like to thank the fans for their support."

Saluki comeback shocks Buffaloes

**Daily Egyptian Sports Editor**

Not very many people could believe it. For nearly three minutes earlier, the Salukis, under new Head Coach Rey Dempsey, had been down, 17-0. They didn't give up, however, and the final score was 21-17 West Texas State

Leonard Hopkins, last year's Saluki starting quarterback, said of Collins, "He's not exceptionally fast—he's almost slower than I was—but he's not exceptionally tall, and he doesn't throw exceptionally well, but he looks real good. I agree very much with Dempsey's offense. I wish I could have played today, for either team."

Davie Figueroa, a senior in public relations and another former SIU football player, said, "Dempsey's done a hell of a job in turning the program around. The Drake game last week was the turning point. And he turned it around with the same guys, Weaver had. The four-year players, they want to win. They're getting put down. And Sayers helps, too. He's the one helping to recruit. He's the one."

Diane Friedman, a junior in journalism, said, at the start of the fourth quarter when the Salukis trailed West Texas State 17-7, "Rey has done amazing things. I think even if they lose it won't keep the fans away."

Dennis McDonald, a senior in public relations, said, "I can remember going past standing in the alumni bleachers, just me and another guy, no one left in the fourth quarter, getting drunk and shouting. Send me my transcripts, I wannna transfer outta this place somewhere they have a winning program. Now, I think I'll stay around and graduate."

More fans were watching the game this year than in 1972, which always was the case in the past, but still there was a liberal sprinkling of drunks in the stands Saturday.

The Delta Upsilon fraternity was one pocket of free-wheeling drinkers, and they were more than willing to give their impressions of the game. "The Salukis are the best team on campus. I need another drink."

**Buff's stampedede**

First downs 34 16

**thurday in the third quarter,** Coach Rey Dempsey said, after his second win at SIU. "But we started to regroup, and didn't lapse out our composure and poise."

"I think it's great that we could come from behind and win," he said. "Now I know this team will never think of quitting. They'll keep going from now on even if the score is 30-7."

"West Texas was a darn good football team, but we out-physicalled them. We played with guts and 116 percent effort."

Dempsey praised just about everybody on his team and the coaches for not folding. He even praised the fans, which marked the largest crowd in years.

"My back was to the students, so I knew the people in the west side were cheering. But I could hear that the students were with us at the end," he said, referring to the chant of "SIU, SIU, SIU," that rang through McKern Stadium near the end of the game.

Not very many people could believe it. For nearly three minutes earlier, the Salukis, under new Head Coach Rey Dempsey, had been down, 17-0. They didn't give up, however, and the final score was 21-17 West Texas State!

Leonard Hopkins, last year's Saluki starting quarterback, said of Collins, "He's not exceptionally fast—he's almost slower than I was—but he's not exceptionally tall, and he doesn't throw exceptionally well, but he looks real good. I agree very much with Dempsey's offense. I wish I could have played today, for either team."

Davie Figueroa, a senior in public relations and another former SIU football player, said, "Dempsey's done a hell of a job in turning the program around. The Drake game last week was the turning point. And he turned it around with the same guys, Weaver had. The four-year players, they want to win. They're getting put down. And Sayers helps, too. He's the one helping to recruit. He's the one."

Diane Friedman, a junior in journalism, said, at the start of the fourth quarter when the Salukis trailed West Texas State 17-7, "Rey has done amazing things. I think even if they lose it won't keep the fans away."

Dennis McDonald, a senior in public relations, said, "I can remember going past standing in the alumni bleachers, just me and another guy, no one left in the fourth quarter, getting drunk and shouting. Send me my transcripts, I wannna transfer outta this place somewhere they have a winning program. Now, I think I'll stay around and graduate."

More fans were watching the game this year than in 1972, which always was the case in the past, but still there was a liberal sprinkling of drunks in the stands Saturday.

The Delta Upsilon fraternity was one pocket of free-wheeling drinkers, and they were more than willing to give their impressions of the game. "The Salukis are the best team on campus. I need another drink."

Nancy Lipe, an SIU cheerleader whose job it is to know crowds, said, "This is the most enthusiastic crowd in football I've seen since I've been here. I'd like to thank the fans for their support."
