BAC allocation dispute settled

By Bruce Kirkham

The Black Affairs Council accepted an offer Wednesday made by the Office of Student Affairs through the Undergraduate Student Organization because the council is usually earmarked for expenses incurred by the University such as musical copyright payments.

The fund currently contains about $2,000 and Mike Grizeland, USO chief of staff.

Because the money does not come from USO funds, the student senate will not have an opportunity to approve or disapprove the transfer of funds, said Stephanie Jackson, USO vice president.

The settlement falls within a degree set by the Campus Judicial Board for Governance to reach a compromise.

Joseph said that he was notified by phone he was free to make an offer to deal with the issue.

Bob Duvall, manager of the Student Organization Account, said that he was notified by phone.

Bob Duvall made the offer from the BAC through the USO.

"The $1,144 will come from the Student Organization Fund," Joseph said. "It will be better off. However, it will be not at the expense of other students," Palmer said.

"The fact that student affairs intervened prior to consulting with the USO undermined our negotiating effort," he said.

Bruce Swinburne, vice president for student affairs, made the offer to Neish in an informal discussion Wednesday Sept. 21, Joseph said.

"I warn me that it may be viewed by others as a play by student affairs to partially keep the USO of its executive power," he said. "We choose to view the allocation by student affairs as a certain student organization making available funds that ordinarily would not be available."

The settlement fails within a deadline Wednesday set by the BAC through the USO.

Health office to be constructed

By Dave Saehens

The Jackson County Board of Health announced plans Wednesday for the construction of a new public health office, citing inadequate clinic areas, small meeting rooms and overcrowded offices in their present facilities as reasons for the move.

According to Dr. Antonio Thomas, president of the Jackson County Board of Health, the new office will be located at the northeast corner of Lake Road and Illinois Route 13 between Carbondale and Murphysboro, and will combine the facilities the board occupies in the two cities.

"The county health department could better serve the citizens of Jackson County from one location designed for the purpose," she said at a press conference in the board's Murphysboro office. "Centralization of files and records, educational materials and services would be less confusing to our clients and would eliminate duplicating costs in transmitting information," she said.

Thomas said they estimate the new building, which will contain about 7,800 square feet, along with the five acres of land needed for the project will cost up to $600,000.

Based on that figure, she said, an architect has estimated that with a $250,000 cash downpayment, monthly payments on a ten-year mortgage will be approximately $3,300.

"Currently, the Jackson County Health Department pays a combined monthly rental for two office facilities of nearly $2,000," she said. "We project that if we remain in our present facilities, our combined rent may increase next year to $2,800 per month."

Thomas said the county board authorized the board of health to designate $200,000 as "building fund" to be used as a downpayment for the office.

This fund came from interest earned on the board's existing capital that has been invested over the years, she said.

"We do not propose a tax increase, nor will we require additional funds from the county in order to build," she said. "Money in our budget presently being spent on rental and other overhead costs will be applied to pay off the mortgage "

Thomas said once the building is paid for, the department will no longer need to request tax dollars for monthly building payments.

The five acre site for the new office will cost $60,000 and was agreed upon after two years of negotiation, she said. The price was reduced by $23,000 from the original asking price.

Some of the factors considered when choosing a site for the new office, Thomas said, were central location, off street parking, availability of public utilities and accessibility to the public.

Thomas said that by consolidating its staff into one building, the board estimates it can save over $1,800 per year in phone costs, $1,000 per year in utilities, and $900 per year in staff travel between offices.

"The monthly cost of rent and overhead costs amounts to $3,980," she said, which "approaches the mortgage estimate of $3,300."

Thomas said there are methods of transportation available for handicapped and senior citizens, and there are very few people who presently walk to the department.

"The county health department could better serve the citizens of Jackson County from one location designed for the purpose," she said at a press conference in the board's Murphysboro office. "Centralization of files and records, educational materials and services would be less confusing to our clients and would eliminate duplicating costs in transmitting information," she said.

The Graduate and Professional Student Council was expected to approve a similar resolution Wednesday night.

GSPC President Ann Greecley said Wednesday that the council's concern was not with the actual policy on the Free Forum area but with who handles the complaints concerning that area.

"We would like to see the responsibility taken away from SIU-C Security officers and given to the Office for Student Affairs," she said.

FORUM from Page 1

would be taken to remove speakers causing the disturbance, Fairure said.

At present, she said, only calls from educators are responded to. Fairure said that a call back procedure could be implemented by the end of this week.

On Sept. 7 the Undergraduate Student Organization approved a resolution in favor of banning all speakers from the area at the north end of the Student Center.

At one point the resolution states, "all individual freedoms are protected by a democracy only if the freedom of others are infringed."

The Graduate and Professional Student Council was expected to approve a similar resolution Wednesday night.

GSPC President Ann Greecley said Wednesday that the council's concern was not with the actual policy on the Free Forum area but with who handles the complaints concerning that area.

News Roundup

Ax-murderer sentenced to life

BELLEVILLE (AP) - An inmate convicted in the 1982 murder of a prison-farm foreman during an escape from the Menard Correctional Center was sentenced Wednesday to natural life in prison.

I regret what happened and I don't understand why," 25-year-old Bruce Davis said calmly before he was sentenced by St. Clair County Circuit Judge John Hoban.

Davis, who had seven previous convictions, waived his right to appeal, said he would not appeal the sentence, which does not permit parole.

Compromise expected to pass

WASHINGTON (AP) - House and Senate leaders Wednesday predicted approval of 16-battle plan to redefine war powers to compromise with Congress, as both chambers nearing adjournment voted on the plan authorizing U.S. Marines to remain in Lebanon for up to 18 months.

Reagan told Republican congressional leaders at the White House that approval of the compromise "will demonstrate to Syria, the Soviets and others that the U.S. government is united," and "will enable us to advance U.S. peacekeeping interests on a solid basis."

Beirut airport to remain closed

BEIRUT (AP) - The government on Wednesday scrapped plans to reopen the Beirut airport Thursday after Druse militia leader Wald Jumblatt threatened to seal it.

Public Works Minister Pierre Khoury said he would keep the airport closed until a truce supervising committee made up of representatives from the army and Druse, Christian and Shiite Moslem militias "completed discussions on the issue and security arrangements in and around the airport."

LOANS from Page 1
Palmer said that if a student can't be convinced to repay the loan, a suit is filed through the state's attorney general's office.
In Illinois, $160.9 million of $1.8 billion loaned to 533,000 students has been repaid. About $94 million owed by 252,432 students is in various stages of repayment, and $90.5 million owed by 38,967 students is in default.
Nationaliy, $12.3 billion of the $35 billion loaned to 21 million students has been repaid since the program began 17 years ago. $1.1 billion owed by 500,000 students is in default. The remainder doesn't have to be repaid until a later date.

STUDENTS from Page 1

Last year, there were 584 Malaysian students on campus. Venezuela has the second highest foreign student enrollment with 167 students and Iran is third with 95, a drop from 156 students last year.
Walker said that SIU-C is not receiving any new students from Iran because students are finding it difficult to obtain visas to get out of the country. She said currency restrictions and the fact that Iranian students must go to a third country to enter the U.S. has attributed to the decrease in enrollment at SIU-C.

Iran had the second-highest foreign student population on campus last year. From Hong Kong, there were 63 students from both Taiwan and India, 59 from Singapore, 55 from Nigeria, 54 from Jordan, 33 from Korea, 25 from Japan.
The report lists a total of 386 foreign students in the College of Business and Administration, more than any other college on campus. In the College of Liberal Arts, there are 327 students and in the College of Engineering and Technology, 258.
Total enrollment for students working on master's degree is 378, with 149 students in advanced studies and 229 in professional studies.
The total number of foreign students on campus, including those in non-credit programs, is 2,068, up from last year's total of 2,044.

Marcos claims regime secure

MANILA (AP) A memorial service for an impoverished Filipino shot through the head during an anti-government riot turned into a demonstration against President Ferdinand E. Marcos.
Wednesday. Students paraded with clenched fists, chanted anti-span names and national songs.
Marcos, meanwhile, claimed the mounting political turmoil posed little threat to his 18-year-old regime. "I don't fear that we are in any way panicked or paralyzed by this terrorism," Marcos said in a nationwide radio and television address. "We never panic. You know that.
But Bution Aquino, brother of assassinated opposition leader Benigno Aquino, claimed that government officials "are seeing the handwriting on the wall," that he's "Marerox's ready to go at any time."
"All I can tell you is that we will not stop until freedom of the Philippines is achieved. We will fight until death," Aquino told the church crowd which after the service marched several miles to Bug your pardon.
A headline on page two of the September 28 issue of the Daily Egyptian incorrectly stated that the CIPS energy plan had been approved by the Carbondale City Council.
A response by Robert Paul, city energy coordinator, to accept the revised CIPS plans was approved by the Council.
Also, a story on page 2 incorrectly reported that the city Planning Commission voted 6-3 with one member abstaining to deny the rezoning request by Jim Pearl, Inc. The Commission voted 6-3 with one member abstaining to approve the request.

Man charged with weapons use

A Carbondale man was arrested and charged with aggravated battery and illegal use of a weapon Wednesday after he allegedly struck a woman with an unknown object and dragged her toward a car, according to SIU-C Security.
Anthony Lynch, 42, Route 3, was taken to Jackson County Jail after the incident, which occurred at 12:30 p.m. near the intersection of Douglas and Lincoln drives by Thompson Point.

**E-Night article not a good reflection**

As Executive Chairman for the Student Center, I would like to make a few comments about the recent article "E-Night low at E-Night." (Liz Myers, Monday, Sept. 20).

First, the article failed to touch on what I consider to have been the highlights of E-Night and it did not accurately reflect the Student Center's festivities.

SPC and the Student Center were responsible for supplying over 55 activities in a four-hour time period. And since the Student Center and E-Night low on entertainment, I assume that this did not fully investigate the wide variety of scheduled activities.

Activities were: Chicago connection 1.2.

Melrowney and SII's Joey

— Dave Rudolph, who appeared getting in the Old Main Room.

The return of Gladys Knight and the hit as the American Craftsman in the Reservoirs (which were not too large, thanks to the Far Bar, incidentally, spin tunes at this event, not the Soul Dance, which wasAIDed by WUI's soul staff in the Roman Room.)

The "Guitars and personators" air guitar contest.

The SII "Twit Olympics," which promoted the upcoming performance of Monty's Python by Graham Chapman.

The Barber Shop Activities in Art Alley, which included the surf sounds and a professional harmonica contest.

The Student Center 'suppressed' his art

I am writing in regard to the Student Center's attempt to suppress art. I am referring to the art object known as "Ode to Mustang" which was removed from the Student Center. It was made before about six months ago.

"Ode to Mustang" was a personal dedication that I had made to the Student Center only a few months ago. The administration had it relocated to the Student Center and I think the art work would look better without the words as well as the subject matter.

I don't believe the art should be removed, as I believe it is a true representation of how the Student Center is beginning to organize itself. It also has a special meaning for myself, since I was not very interested in the Student Center, but I had joined because I was interested in the area of Campus Services. I believe the art work will be a good representation of the Student Center.

I think the administration should have left the art work on the Student Center and left it to the student center to decide what is best for the Student Center. I think this is the best way to keep the Student Center organized and to keep it from looking like a big jumble.

W.D. Klimstra, director of wildlife research, and Robert Mara, professor of botany, fear for the woods' plants and animals — and rightly so. But if they feel so strongly about the area, why did they give the title to pick up the phone and call. Dougherty when they saw the work being done. That's just basic communication.

DOUGHERTY said, "The faculty has an open invitation at any time to offer its suggestions and work with us on the project. I am open to suggestions from anyone who wishes to contribute to the project. We need to work together to protect the wildlife in the woods."
Egyptian children's weavings on display at Faner Museum

By Lisa Nichols
Staff Writer

To prove that the potential for artistic creativity is innate, Egyptian architect Ramses Wissa Wassef began an experiment in 1952 in the village of Harrania, about 15 miles from Cairo, Egypt.

Wassef wanted to show that children who have been unexposed to the art of weaving could learn the techniques rapidly and design sometimes intricate patterns, proving that the young have an innate ability to create.

The experiment proved quite fruitful and 50 tapestries — ranging in value from $60 to $10,000 — were displayed in the University Museum North Gallery, located in Faner Hall. The tapestries are on consignment and prospective buyers may contact the museum to arrange purchases.

David Williams, an expert on contemporary Egyptian tapestries and himself a collector, brought the collection to the museum to arrange purchases. The exhibition, which opened Monday and continues through Friday, and from 1:30 to 4:30 p.m. on Sunday. The exhibits are supported by funding from the Museum and Art Galleries Association.

In conjunction with the tapestry display, photographs of Egypt taken by Eugelle Harrania are also on display. The photographs show a panoramic view of the timeless pyramids and tombs of Egyptian pharaohs, along with modern scenes of Egyptian schoolboys and street vendors.

The children were paid for their work based upon the size of the tapestries. The care taken in the weaving was slow, for a skilled weaver is able to complete only about one square meter in a month, Williams said. With only one child working on each tapestry, some of the larger works took months of dedicated effort to complete.

The children were presented with a gift for each tapestry. Many adults who began weaving as children in 1952 still weave, most of them within one of 20 separate shops which were patterned after the original Wassef studio.

Collins to open Celebrity Series

Judy Collins, a singer-songwriter whose material reflects her own life and the world around her, will open the 83-84 Celebrity Series season at Shryock Auditorium at 8 p.m. Friday.

Collins, who describes herself as a contemporary pop singer, has recorded 19 albums since 1961. From these, she has interpreted songs in folk, rock, country, and musical theater. Her distinct style has produced such hits as "Both Sides Now," "Soon," and "Who Knows Where the Time Goes."

It was Collins' early years in music that engendered a taste for variety and an insistence on quality. Her first involvement in music was in the classics, studying with conductor and teacher Antonia Brico. At 16, Collins moved from piano to guitar and embarked on a folk singing career in the Denver night club circuit.

In the mid-1960s, Collins began donating her time and talents to political causes. In 1968, Collins, along with Ethel Merman, co-produced the "Save The Children" album which featured songs by her, Joan Baez, Mimi Farina, Janis Ian and other.

As she enters her third decade as a recording artist, Collins has a body of work to her credit of both commercial and artistic importance.

Section A tickets are no longer available, but good seats still remain in Sections B and C for $10.50 or $9.50. The Shryock Auditorium box office is open Monday through Friday 11 a.m. to 6 p.m.

Gay, Lesbian Peoples Union schedules awareness week

By John Racine
Staff Writer

The Gay and Lesbian Peoples Union will sponsor another "Gay Awareness Week," beginning Sunday afternoon and continuing through next Friday.

According to Ray Bradford, a member of the GLPU's Member Steering Committee, the high point of the week will again be "Blue Jeans Day," on Thursday.

While the GLPU has slated six days of awareness sessions, Bradford said that next Thursday's event will be the most thought-provoking and effective of all programs.

"Blue Jeans Day is far more effective than any other activity during the week," he said. "Our main objective for the week is to raise the consciousness of Carbondale and especially of the campus to the gay community. We want to educate (straight) to what it really means to be gay.

"We want to break down some of the myth and eliminate some of the prejudice that exists," he said. "And in order to do that, they have to have people who are educated."

"Even if it's just one day a year to go out in the clothes that are going to have to think about homosexuality," Bradford added.

On Blue Jeans Day every month will speak the word "homosexual."

"On Thursday, everyone who supports the right to live an alternate, gay lifestyle should wear blue jeans. That doesn't mean you have to be gay to wear blue jeans," he said.

Gay, Bradford said, are discriminated against on the job and have virtually no civil rights. "About the only guaranteed right that we do have is that which is provided by the due process of law," he said.

Last year the advent of Blue Jeans Day brought a mixed reaction from students. "Our objective is not to make people mad," he said. "A lot of people who get mad are those who have been brought up in families that teach themselves. They are the worst. They are the violent ones."

Quoting a Kinsey Institute survey on sexuality, Bradford said that 40 percent of all American college students have a homosexual experience during their college careers. Everyone, at one point, has to face someone who lives a gay lifestyle."

"Gay Awareness Week" begins at 2 p.m. Sunday with a picnic near Cedar Lake. Admission will be $2, he said. On Monday, the GLPU begins its series of workshops that are designed to promote gay awareness. Thomas, the editor and publisher of the Gay News-Telegraph based in St. Louis, will be the keynote speaker at an assembly in Ballroom D of the Student Center from 3 to 5 p.m.

Thomas, who is a charter member of the National Gay Press Association and who heads one of the nation's top 10 newspapers serving the gay community, will speak on the gay community where it has been, where it is now and where it is going, Bradford said.

On Tuesday, from 7 to 5 p.m., members of the GLPU's speakers bureau will hold an open forum in the Illinois Room. No set topic of discussion has been chosen for the meeting.

On Wednesday a two-part program on "Christianity and Homosexuality" will be presented by Reid Christensen, a member and minister of the gay-oriented Universal Fellowship of Metropolitan Community Churches, and the Rev. Steve Lobacz of the Wesley Foundation.

The first part of the three-hour lecture will include discussions of scriptures pertaining to homosexuality and the second part will be an open discussion of those attending the workshop in Ballroom B. Thursday, besides being Blue Jeans Day, will include a noon meeting in the Free Forum area of about 30 of the GLPU's 50 active members.

Friday will be a quiet day of observance, he said. The weeklong event will end with a celebration of gay lifestyles by GLPU members at Main Street East.

Crab Orchard bridge to close

The bridge over Crab Orchard Creek located near the east end of Carbondale Old Route 13 will be closed to all traffic of the reconstruction of the bridge beginning Oct. 3.

Barricades will be installed on Old Route 13 near the Giant City Blacktop intersection and near the Lakeview Shopping Center Road. Traffic will be detoured to New Route 13 north of the bridge site, the state Department of Transportation said.

Preparations for U.N. simulation begin

By John Stewart
Staff Writer

The beginnings of the 20th United Nations simulation at SIU-C will be at 7:30 Thursday at the Technology Building auditorium. The interest meeting will be the first of four meetings during this semester to orient students and start working towards the actual simulation, which will be February 9-11, 1984, according to Frank Kingsberg, simulation faculty advisor and professor emeritus of political science.

Organizers of the event expect 300 students to participate, with 75 countries represented by four delegates each. Resolution committees will be set up to deal with four topic areas such as political, economic, legal and security issues. The committees will discuss issues, draft resolutions, present them to the General Assembly and urge or dissuade their passage.

The political committee will deal with special issues such as nuclear disarmament, while the economic-social committee will tackle such topics as Third World development, international trade, agriculture and medicine. The legal committee is expected to deal with topics like human rights, maritime law and air-space agreements. The security committee will legislate Central America policy, the Palestinian issue and other related subjects.

The simulation attempts to "provide an environment where international understanding is promoted and peaceful recourse in conflict resolution is encouraged."

Organizers are working with the Student Programming Council to have a diplomate or United Nations delegate come to SIU-C to give the keynote speech, set for the opening session February 9, Kingsberg said. The actual three-day simulation will closely parallel the workings of the real United Nations, he said. "It's a stimulating occasion" to see students dealing with important international issues just as world leaders do, Kingsberg said. "The United Nations simulation provides students an opportunity to learn about world problems and it creates international understanding."

Many international students participate in the simulation, and that adds to the experience. The Model United Nations Association sends out letters to potential participants through the Office of International Education, as organizers believe it adds to student's experiences.

In the past, students from the United Kingdom, Malaysia, India, Nepal, India and the United States have been on the U.N. executive committee, which heads the simulation. This year's secretary general is Grayson Gil, political science graduate student.

"The United Nations will be very important in the future - it will play a vital role in defining conflicts," Kingsberg said. Just as the U.N. will serve as a forum for the peaceful settlement of international disputes, so will the model U.N. promote understanding, he said.

SIU Democrats map program for registration, recruiting

Voter registration and membership recruitment will be two major goals of the SIU Democrats as they gear up for the 1984 election.

The group, which held its first meeting of the semester Tuesday evening, will be actively involved in state and local elections next year, according to Mark Hutchings, who was elected president of the organization.

Hutchings, a senior in administration of justice, said he hopes the group can work with organizations such as the Undergraduate Student Organization and the League of Women Voters to register as many students as possible prior to the primary election next spring.

Although students traditionally have had the poorest voter turnout of any age group, Hutchings said they could be more likely to become politically active in light of the cuts made to student organizations such as the Unitaed Nations Students Association.

The group's by-laws have been adopted by the SIU administration of justice said he believes the group can work with the organization and the League of Women Voters to register as many students as possible prior to the primary election next spring.

Law School offers introductory talks

Pre-law Night will be held at 7:30 p.m. Tuesday, Oct. 11, in Room 102 of the Law Library.

D.J. Hopson, dean of the Law School, will lead a discussion about entering law school. The group's director, Rita Moss, will speak. Law students will also discuss their experiences.

"Any student who is interested in entering law school can talk about their experiences," Moss said.

The United Nations Students Association (UNSA) statewide branch will hold its first meeting Tuesday evening at 5:30 p.m. in Room 102 of the Law Library.

The branch hopes to focus on world issues and the role students can play in solving them. The branch hopes to focus on world issues and the role students can play in solving them.

Wanted! Concerned students

Many students write letters to the Daily Egyptian Editorial Page commenting on the world situation. We, the members of the United Nations Students Association, genuinely appreciate the sincere concern that the students of SIU have shown for the many social and international issues facing the world today. However, we recognize that there are few avenues available for the students to act upon their concerns.

The purpose of the UNSA is to provide an opportunity for students to demonstrate those concerns which they have voiced so often in the pages of the D.E. Therefore, we challenge all socially conscious students to participate in the educational and enlightening experience.

We provide the forum whereby these issues can be discussed and debated through workshops, seminars, and lectures.

These programs will culminate on February 11, 1984, when an actual simulation of the United Nations General Assembly will bring together in the university's group of students representing the nations of the world.

If you would like to sign up or have any questions, the UNSA will have information tables set up on the first floor of the Student Center from 11:30 a.m. to 1:30 p.m. and on October 35. The first general organizational meeting is scheduled for tonight, September 25, in the Tech Auditorium at 7 p.m.

Luzinski's homer lifts Sox

OAKLAND, Calif. (AP) — Greg Luzinski's 31st homer of the year, a two-run shot in the fifth inning, led the American League record for designated hitters and broke a 2-2 tie, carrying the Chicago White Sox to a 3-2 victory over the Oakland A's on Wednesday.

Rich Dotson, 317, pitched five innings to gain the victory. He needed relief help from Jerry Koosman and Dennis Lamp, who recorded his 14th save.

Luzinski's drive over the left-field fence tied a mark set by Jim Rice in 1977 and equaled in 1978 by Rice (Carty) and 1982 by Andre Thornton. Chris Nyman also drove in a pair of runs with a single and home run.

Phillies romp over Cubs

CHICAGO (AP) — Bo Diaz rapped five hits, including two home runs, and Joe Morgan had four hits and drove in three runs Wednesday to lead Philadelphia to a 13-6 victory over the Chicago Cubs as the Phillies clinched the National League East Division championship.

It was the Phillies' 12th victory in 13 games and assured them of their fifth division title in eight years and first since 1980, when they won the World Series in six games from Kansas City.

Mike Schmidt also contributed to the 13-hit attack with his major league-leading 40th home run and a triple.

Volleyball team tries to halt skid, but opposition keeps toughening

By Sherry Chisenhall
Sports Editor

After being pounded at the Brigham Young University Preview in Utah last weekend, the women's volleyball team should have no where to go but up.

But this weekend the climb will be steeper than the mountains of Utah that the team played in. Coach Debbie Hunter and her club will check into the Tennessee Classic in Knoxville, a seven-team tournament that also boasts entries by sixth-ranked Kentucky, third-ranked Tennessee, and respectable clubs from Duke, Temple and Texas Tech.

"When you get a loss, especially a pounding like that, it's hard to bounce back," said Hunter. "We have to be sure on our serve. We just can't hold our own at the net against that kind of weekend. We're just handing it. I think spirits will be in the right place this weekend. It's easier to get motivated for teams with this kind of expedition.

"Toni (Reyes, assistant coach) said in practice the other day that if we had passed at BYU like we did in practice, we would have won the tournament."

At BYU, the Saluki nemesis, as always, was inconsistent serving and passing. Hunter said movement and timing could be the keys to her team's problems.

"Often we're a half-step away from where we could make the highest percentage pass," she said. "We do too much reaching and lose some ball control."

"Our main measurement isn't on winning or losing. We're still focusing on how to exploit our opponents," Hunter said her team can't be a pitty-pat塀.

"We've had two very productive practices, and I feel we're sitting pretty good. I've seen no miracle to stay with Kentucky, which is under the guidance of former volleyball standout Mary Jo Peppier. The team went straight from having no contention for the top 20 to a No. 6 ranking.

Also on the Saluki tournament schedule is Louisiana State, one of the bigger teams in the tourney, according to Hunter. SIU-C will also face Duke, which will probably be the Salukis' tightest matchup at UT.

Hunter said she feels her team is capable of rebounding from the BYU fiasco and playing respectable volleyball in Knoxville.

"All we have to do go is practice," she said. "We've had two very productive practices, and I feel we're sitting pretty good. I've seen no sign of defeat in practice."

"None of us are accepting that kind of weekend. We're just handing it. I think spirits will be in the right place this weekend. It's easier to get motivated for teams with this kind of expedition."
Shipp rebounds from bad play

By Jim Lexa Staff Writer

Arkansas State is the next squad on the Salukis' schedule and don't think that the Salukis have any interest in starting a two-game losing streak last season.

For Greg Shipp, the late-gate victim of last year's 35-30 defeat to the Indians.

With the Indians on their 49- yard line, the Salukis had the game won. Strong safety Greg Shipp was the top female finisher in the King 38: Tokheim would not be denied. The Salukis have a carryover from the tournaments, both regular and invitational, the last two days of practice this week.

"I've been a year ago, and I know it was a good year," said Shipp. "I was hurt by that play. I felt it was astrose as if I gave the game away."

FT

The Salukis gave up a total of 469 yards running to the Indians with only 146 yards offensively by the Salukis. The run's performance was something to be remembered.

This year, though, the Salukis secondary is a year older, and wiser.

Cornerbacks Terry Taylor and Donnell Daniel, who have combined for three MVC Defensive Player of the Week Awards this season, and safety Billy Thomas round out the starting secondary that has seven of the team's 12 interceptions.

The season record is 20, which was last year's total. This year, the Salukis have an average of almost one interception per 11 plays and taken down into their territory.

Taylor, who, like Shipp, is a sophomore, a fourth-year starter, has only had 11 interceptions, though he holds the career interception mark with 13. "There's no way anymore," Taylor said. "They don't know where to throw the ball. They throw to any matter side they throw to because we're going to pick it up."

Quarterbacks don't throw too much to Shipp's side either. Shipp intercepted his 13th career pass Saturday, but his first since 1981. He does not have to intercept passes to make his presence felt on the field. A lot of teams will run away from him because he is a threat.

Daniel, who is also a senior, is a team in interceptions with three, and has run two interceptions back for touchdowns. His return average per interception stands at 34.7.

Thomas and reserve John Wilson each have two interceptions.
