## FACULTY

1916-1917

Henry William Shryock, Ph. B., President, and Head of English Department,

Martha Buck, Grammar,  
Lily Gubelman, Ph. B., Grammar,  
Helen Bryden, A. B., Composition, Literature,  
Jennie Mitchell, A. B., Dramatic Art.

Department of Languages,

Carlos Eben Allen, Ph. D., Vice President, Registrar and  
Business Agent, Latin,  
J. M. Pierce, A. M., French, German,  
Emma L. Bowyer, A. B., Latin.

Drawing and Design,

Gladys P. Williams,  
Grace L. Burket.

Civics and History,

George Washington Smith, A. M., Secretary of Faculty.

Geography and Geology,

Frank H. Colyer, A. B.

Mathematics,

William Troy Felts, Ed. B.  
Ward H. Taylor, A. M.

Psychology and Pedagogy,

George D. Wham, Ed. B.

Music,

Glenn C. Bainum, A. B.  
Ruth Bradley, Piano,  
Julia Dickerman Chastaine, Violin,  
Raymond Moore, Cornet,  
Dorothy Keesee Lynn.

Chemistry,

George Mervin Browne.

Physics,

Simeon E. Boomer, A. M.

Biology,

John P. Gilbert, A. M.

W. M. Bailey, S. M.

Mary M. Steagall, Ph. B., Ed. B.

Agriculture,

Renzo Muckelroy, S. B.

H. B. Piper, S. B.

Manual Arts,

Louis C. Petersen, S. B.

Household Arts,

Grace E. Jones,

Lucy K. Woody.

Commercial,

Richard V. Black, Accts. M.

Anne McOmber,

Charles R. Ismert.

Physical Training,

Inez L. Hollenberger, Ph. B., Girls,

Wanda Newsum, Head Physical Welfare Department,  
Girls.

William McAndrew, A. B., Boys.

Bureau Rural School Work,

W. O. Brown, A. B.

Training School,

W. A. Furr, A. M., Superintendent.

## STANDING COMMITTEES

### Degree Courses:

C. E. Allen,  
J. M. Pierce,  
J. P. Gilbert,  
Simeon E. Boomer,  
Ward H. Taylor,

### Social Life Students:

Inez L. Hollenberger,  
Fadra R. Holmes.  
Helen Bryden,  
William McAndrew,  
W. T. Felts,  
F. G. Warren.

### Boarding Places and Employment:

G. W. Smith,  
F. H. Colyer,  
Mary M. Steagall,  
Inez L. Hollenberger,  
R. E. Muckelroy,  
Glenn C. Bainum.

### Appointments Committee:

G. D. Wham,  
W. A. Furr,  
R. V. Black, Secretary.

Winter Term, 1917, opens Tuesday, January 9.

Winter Term, 1917, closes Thursday, March 29.

Spring Term, 1917, opens Tuesday, April 3.

Mid-Spring Term, 1917, opens Monday, May 7.

Spring Term and Mid-Spring Terms, 1917, close Wednesday,  
June 20.

Summer Session, 1917, opens Monday, June 25.

Summer Session, 1917, closes Thursday, August 2.

Fall Term, 1917, opens Tuesday, September 18.

Fall Term, 1917, closes Thursday, December 20.

Winter Term, 1918, opens Tuesday, January 8.

Winter Term, 1918, closes Thursday, March 28.

Spring Term, 1918, opens Tuesday, April 2.

Mid-Spring Term, 1918, opens Monday, May 6.

Spring and Mid-Spring Terms, 1918, close Wednesday, June 19.

Summer Session, 1918, opens Monday, June 24.

Summer Session, 1918, closes Thursday, August 1.

## HISTORY

An act of the General Assembly of the State of Illinois, approved April 20, 1869, provided for the establishment of this Normal School. By this act it was ordered that five trustees should be appointed by the Governor of the State, who would fix the location, erect the buildings, and employ teachers for the school. The trustees located the school in the town of Carbondale, on a lot of twenty acres, three-fourths of a mile south of the station of the Illinois Central Railroad. The cornerstone was laid on the 17th day of May, 1870, with impressive ceremonies by the Masonic fraternity. The building was finished in time to be dedicated July 1, 1874, the first faculty commenced the work of instruction in the new building July 2, 1874, at which time a summer session of four weeks was opened, with thirty-five students attending.

On the sixth day of September, 1874, the regular work of the Normal University commenced.

On the afternoon of November 26, 1883, at 3 o'clock the beautiful building was discovered to be on fire, and before 5 o'clock p. m., despite the efforts of the faculty, students, and citizens of Carbondale, the entire building was in ruins. By the heroic labors of students, teachers and citizens, the library was saved, and most of the furniture; also the physical and chemical apparatus. All the material in the museum was lost.

The citizens kindly offered the use of rooms in some of the business blocks, which the trustees accepted, and the school went on with regular recitation work, with an actual loss of less than two days. In the meantime a plan was proposed for a temporary school building, and in less than sixty days a building was completed containing fourteen rooms, and the Normal School began its wonted studies in this, its temporary home.

The General Assembly, by an act approved June 27, 1885, appropriated \$152,065 to replace the first building, then lying in ruins. The foundation and stone walls of the first story were utilized, thus saving from \$12,000 to \$15,000.

This building, which is the main one of the entire plant, is a magnificent structure, in many respects superior to the one destroyed by fire. It was dedicated Thursday, February 24, 1887, and occupied by the school with much rejoicing on the following Monday.

The Science Building was provided for by an act of the General Assembly in the winter of 1895, appropriating \$40,000 for the purpose. It accommodates the physical chemical and biological laboratories, the museum, gymnasium, manual training and agricultural department. It was completed in the fall of '95, and was dedicated in '96. It also provided for the library till May 14, when the books were transferred to the new Library Building, now

known as the "Wheeler Library;" so named in honor of the late Judge S. P. Wheeler.

The Library Building was erected in the fall and winter of 1903-4 at a cost of \$30,000. It was dedicated June 7, 1904.

The Forty-fifth General Assembly made an appropriation of \$50,000 for the erection of a Modern Model School Building. This building was completed within the appropriation late in December, 1908, and adds very much to the material equipment of the Institution. It was dedicated with appropriate exercises on January 11, 1909. This building is named in honor of the late President, Robert Allyn.

The Forty-seventh General Assembly made an appropriation of \$75,000 with which to establish a Woman's Building. This structure, now known as Anthony Hall, was completed in the fall of 1913 and was dedicated with impressive ceremonies on October 23. For the first two terms after the opening there were a few vacant rooms in the hall, but with the opening of the spring term, 1914, every available room was in use and there was a waiting list.

The Forty-eighth General Assembly appropriated \$50,000 for the construction of a new light, heat and power plant.

The Forty-ninth General Assembly made an appropriation of \$135,000 for a new auditorium, gymnasium and administrative offices. It is hoped that this new building will be ready for occupancy by the opening of the Fall Term 1917.

### **AIMS**

Educational institutions may be divided according to their aims into four classes:

First: The public schools, whose aim is the promotion of good citizenship by securing to all people the intelligence, morality and patriotism which are essential to the existence and progress of the State. Second: Colleges and universities, whose object is the general and full development implied in complete manhood and in the best preparation for professional life. Third: Professional and polytechnic schools, in which the student is helped in his preparation for his chosen lifework. Fourth: Such institutions as the Royal Society of Great Britain, the Sorbonne of France, and our own Smithsonian Institute, which have for their special object the advancement of science and art. This Normal University belongs to the third class; it aims to give the best physical, mental and professional equipment for teaching.

The State Normal school holds an important relation to the system of public schools. It helps to create and sustain a high standard of educational work. It should serve as a driving force and a balance wheel to the whole system. Sanctioned and supported by the State, it can institute those investigations and experiments which result in much good to all the schools. It brings school facilities within the reach of many who otherwise would be uneducated and enables them to repay the State by teaching in the public school. If the State needs a great university which shall be a center of educational forces, if an agricultural college should be sustained on account of the importance of agriculture, much more, and for similar reasons, should the normal school receive the care and benefactions of the State. Man is more than all things else, and whatever contributes to his better development is of the highest use.

If the graduates of normal schools shall take high rank as superintendents, principals, and teachers in the public schools, they must possess three elements of success: A full development of mental power, a thorough mastery of the sciences involved, and a thorough training in methods of instruction and school arrangement. If the normal school should neglect the first and second, the graduates would be supplanted by those of other schools; and if they fail in the latter, there would be no good reason for the existence of these institutions. Hence, we aim, first, to insure a broad and thorough culture; and, second to give special prominence to the professional work peculiar to a normal school. Under the present conditions of Southern Illinois, this school must hold itself ready to do more or less academic work. As the better grades of high schools are created in the patronizing territory of the school, the need of the academic phrase of the institution will become less and less, and the professional side will be more and more emphasized.

## GENERAL INFORMATION

You are asked to note carefully the following sections from "An Act to provide for the certification of teachers."

Sec. 6. County certificates granted by the county superintendent and the requirements for the same shall be as follows:

First.—A third grade elementary school certificate, valid for one year in the first eight grades of the common schools of the county in which it is issued and in no other county. This certificate shall be renewable once only and on evidence satisfactory to the county superintendent of three months' successful teaching or six weeks' professional training. Applicants for this certificate shall be examined in orthography, civics, Illinois history, physiology, penmanship, reading, grammar, geography, United States history, arithmetic and the principles and methods of the State course of study. This certificate shall not be issued the second time to the same person.

*At the option of the county superintendent this certificate may be issued without examination to persons who have successfully completed two years of work in a recognized normal school, or one year of such work if the applicant is a graduate of the tenth grade.*

Second.—A second grade elementary school certificate valid for two years in the first eight grades of the common schools of the county and in the ninth and tenth grades when endorsed for the same by the county superintendent. This certificate shall be renewable on evidence satisfactory to the county superintendent of six months' successful teaching or twelve weeks' professional training, and a second time if in the period following the date of issue the holder shall have acquired eighteen weeks' professional training in any recognized school providing such training. The applicant for this certificate shall be examined in orthography, civics, Illinois history, physiology, penmanship, reading, grammar, geography, United States history, arithmetic, elementary science, pedagogy, and the principles and methods of the State course of study.

*At the option of the county superintendents this certificate may be issued without examination to persons who have completed the junior year's work in a recognized normal school, or its equivalent.*

Third.—A first grade elementary school certificate, valid for three years in the first ten grades of the common schools of the county, and in the high school when endorsed for the same by the county superintendent. This certificate shall be renewable indefinitely for periods of three years, upon evidence of successful teaching and professional growth satisfactory to the county superintendent.

The requirements for this form of certificate shall be: (1) graduation from a recognized high school, or an equivalent preparation; (2) six months of successful teaching, and (3) an examination

in orthography, including spelling, civics, Illinois history, physiology, penmanship, reading, grammar, geography, United States history, arithmetic, pedagogy, English, algebra, general history, and any three of the following natural sciences: Botany, zoology, physics, chemistry and physiography. *This certificate shall be issued to graduates of a recognized normal school, or from an institution offering an equivalent preparation, provided the applicant has had one year of successful practice teaching, and applies for the certificate within three years after graduation.*

Fourth.—A high school certificate, valid for three years in the high schools of the county. This certificate shall be renewable indefinitely for periods of three years on evidence satisfactory to the county superintendent of successful teaching or supervision and professional growth.

The requirements for this form of certificate shall be: (1) Graduation from a recognized high school, or an equivalent preparation; (2) a certificate showing the completion of at least two years' successful work in any recognized higher institution of learning, and (3) an examination in English, pedagogy, and six high school subjects, three majors and three minors, chosen from a list prescribed by the examining board hereinafter provided for: *Provided, however, that graduates of a recognized normal school, college or university may offer within three years after graduation, certified credits in lieu of examination in the above subjects accompanied by faculty recommendations of ability to teach in the high school.*

Fifth.—A supervisory certificate valid for three years for supervisory work in any district in the county and for teaching in the schools supervised by the holder. This certificate shall be renewable for three year periods on satisfactory evidence of successful teaching or supervision, and of professional growth. The requirements for this certificate shall be: (1) Graduation from a recognized high school and at least two years' work in a recognized higher institution, *one of which shall have been in a normal school*, or an equivalent preparation; (2) two years' successful teaching or supervision, and (3) a successful examination in English, educational psychology, the history of education, and school administration.

### Location, Etc.

Carbondale is a thriving little city, healthful and beautiful, of over 6,000 inhabitants, with many refined people. It is easy of access, and offers inducements for board and social advantages beyond most places of its size. It has, perhaps, fewer temptations to idleness, and combines religious and educational privileges in a degree greater than the average of towns and cities of its size. Car-

bondale has no saloons. Parents may be assured that their children will be as safe as in any school away from home, and students may come here and feel assured that economy and industry will be respected and honored by their fellow students and by the faculty. The Illinois Central Railroad affords ample facilities for convenient access, three of its branches passing through Carbondale.

### **Terms of Admission**

All applicants for admission must present evidence of good moral character and, to secure free tuition, they must agree to teach in the public school of the State for a time not less than that covered by their attendance on the school. This agreement should not be entered upon unless the applicant fully intends to teach. It may become void, however, if engagement to teach cannot be secured by reasonable effort. In case of a permanent change in plan, the individual is expected to pay to the registrar of the Institution the difference between the regular tuition for the entire time and the incidental fees he has paid.

Those who held scholarships under the Lindley Bill are not expected to sign the agreement to teach and are admitted without the payment of any fees.

Eighth grade graduates enter without examination. Persons holding third grade certificates, or with evidence of completion of ninth grade work, are admitted to the second year of the normal. Teachers holding second grade certificates, not obtained by exchange, are admitted to the third year of the regular normal course. Graduates of accredited high schools enter with junior standing. Reasonable credit will be given for work done in other schools, provided satisfactory evidence is presented.

### **Expenses**

#### **TUITION**

To those who sign the agreement to teach, tuition is gratuitous; but the ruling of the Board of Trustees of the Institution requires that there shall be an incidental fee charged. At present this fee is \$3 for the term of fourteen weeks, and \$2 for the term of twelve weeks, and \$1 for the summer term. The rates of regular tuition in the different departments are as follows:

	Summer Term.	Fall Term.	Winter Term.	Spring Term.
Normal (Residents of Illinois) ..	\$3.00	\$8.00	\$6.00	\$6.00
Training School.....		4.00	3.00	3.00

#### **BOARDING**

Board can be had in good families in Carbondale at rates varying from \$3.50 to \$4.50 per week; and by self-boarding, or by

boarding in clubs, the cost may be reduced to \$3.00 per week. By strict economy the whole expense of boarding and tuition may be reduced to less than \$125 per year.

For the accommodation of the students a bank is maintained in the office of the Registrar, and the students are urged to transact their business through this bank, provided they have not already established relations with one of the local financial institutions.

#### ANTHONY HALL

With the beginning of the Fall Term, 1913, the Woman's Building, Anthony Hall, was opened. This model school home for girls will accommodate about seventy students. It has been erected and furnished at a cost of \$75,000, and every possible provision has been made for the comfort, safety and well-being of its inmates. Board and lodging in this ideal boarding house will be furnished at \$4.50 per week, except for summer term.

A deposit fee of \$5.00 must accompany each application for room.

No applications and deposits will be received for the school year beginning in September until June 1 preceding.

Applications and deposits for the summer term will not be received before May 1.

#### **Free Instruction in Instrumental Music**

The free instruction in violin and other stringed instruments, cornet and other brass instruments, has proved very successful. Encouraged by the interest in the violin, cornet work, etc., the management has opened three music rooms, each provided with a piano, and an organ has been added to the equipment, so that any student who wishes to prepare himself to lead the music in his school with either the organ and piano, may be accommodated.

#### **LITERARY SOCIETIES**

##### ZETETIC AND SOCRATIC

During the first term of the first year of the Institution, September, 1874, the Zetetic Literary Society was organized. Later in the year a sister organization was planned for, and in due time was thoroughly established and christened the Socratic Literary Society. These have a large membership and are well attended.

The more elaborate exhibition of what these societies are able to do is annually given to the public on Monday and Tuesday evenings of Commencement week.

The varied programs of these literary societies from week to week add very materially to the work of the English department

in securing additional practice in the delivery of original and other matter, and in the opportunity for becoming acquainted with parliamentary usages, thus fitting the Normal student for more intelligent service in the communities in which he may labor.

The Faculty and Board of Trustees foster, with much care, the best interests of the valuable adjuncts to the literary work of the Institution. Their usual time of meeting is on Friday evening of each week in the halls provided by the University.

#### ATTENDANCE UPON CHURCH

Students are urged to identify themselves at an early date after entering the Normal school, with some church of the city. It is assumed, of course, that the student will affiliate with the church to which he belongs at home, or with which he is most in sympathy as to doctrine and modes of worship.

#### Christian Association

The Young Men's Christian Association and the Young Women's Christian Association each has a well-conducted organization, which meets weekly in a room fitted for their use on the second floor in the Library Building. Their committees look after new students upon their arrival, and those who may be sick while attending school, and in many ways minister to the wants of their fellow students. Several classes in Bible study are maintained by these societies. The State college secretaries of each of these branches of Christian work pay the Institution a visit twice a year, or oftener, for conference and direction of work. New students upon their arrival may recognize the representatives of these associations by special badges worn, indicating their willingness to render their kindly services whenever needed. These persons may be trusted implicitly in directing strangers to boarding houses and clubs.

#### Departments

The Normal University forces are organized into two general schools—the Academic and the Professional. The purely academic work is cared for in the Normal University High School, which offers as wide a variety of courses and as thorough a training as is provided in the best secondary schools anywhere.

The Professional school is organized into two separate bodies: First, the Normal School proper; second, Teachers' College. A graduate from the Normal School proper receives the usual diploma, and the school offers the following courses: 1. A special two-year course for graduates of four-year high schools. 2. A general

course of five years. 3. A German course of five years. 4. A Latin course of five years. 5. An Art course of five years. 6. A course in Manual Training of five years. 7. A course in Household Arts of five years. 8. A course in Agriculture of five years. 9. A Business course of five years.

The Teachers' College offers a choice of three courses: one leading to the Ed. B., another to the Ph. B., and the third to the A. B. degree. A graduate from the regular Normal School may finish the degree course within two years. A graduate from a reputable college may receive the degree at the end of one year.

**COURSES LEADING TO A. B., PH. B., OR ED. B. DEGREE**

Rules governing the degree courses:

Graduate courses in which a class meets daily for one term shall be given one credit or unit.

Twenty-four units are required for any baccalaureate degree, these units to be in addition to those required for the normal diploma. No duplication of credits is permissible.

No member of the faculty may admit to any degree course any student who is not a graduate of the school, without having such registration approved by the president.

Any subject *required* in any degree course may be offered as an elective in any other degree course. Any subject found in the senior year of our several courses may, upon approval by the president, be offered as an elective, provided it has not been used for graduation.

### The A. B. Degree

Candidates for the A. B. degree must meet the following requirements: Four years of Latin, and two years of Greek are required of all candidates for this degree. All of the Greek and the last two years of Latin may be taken with other degrees courses and counted as part of the required 24 credits. In addition to these requirements, the following credits must be made:

Mathematics .....	3 units
History .....	3 units
High School Education.....	1 unit
High School Practice.....	1 unit
Psychology .....	1 unit
English .....	1 unit
Biological or Physical Science.....	2 units

Electives are offered:

Latin (additional) .....	6 units
<i>or</i>	
Modern Language .....	6 units
Mathematics (additional) .....	3 units
Biological or Physical Science.....	4 units
English .....	2 units
Geology .....	1 unit
Astronomy .....	1 unit
Art .....	3 units

### The Ph. B. Degree

Six units in one line or department of work shall constitute a major. Three units in one line or department of work shall constitute a minor.

Upon entrance to this course each student shall elect (through consultation with the heads of the departments concerned) one major and at least one minor, to be chosen from the following:

---

Mathematics .....	6 units	(1 major, 2 minors)
Biological Science .....	6 units	(1 major, 2 minors)
Physical Science .....	6 units	(1 major, 2 minors)
History .....	3 units	(1 minor)
Earth Science .....	3 units	(1 minor)

(The biology consists of a year each in botany and zoology; the physical science of one year of chemistry and one of physics.)

All candidates are required to complete:

Modern Language .....	6 units
English .....	1 unit
High School Education .....	1 unit
High School Practice .....	1 unit
Psychology .....	1 unit

The five elective units needed to complete the work for a degree may be chosen from any major or minor group except the group in which the candidate has chosen his major.

### **The Ed. B. Degree**

Candidates must meet the following requirements:

Psychology .....	1 unit
Sociology or History of Education.....	1 unit
Child Development or School Administration.....	1 unit
High School Education.....	1 unit
High School Practice.....	2 units
English .....	1 unit

The electives in this course are to be chosen from at least five departments in which graduate work is offered leading to the A. B. and Ph. B. degrees.

**READING, ELOCUTION AND ENGLISH LITERATURE**

HENRY W. SHRYOCK

HELEN BRYDEN

JENNIE MITCHELL

English 1 and 2. First year. Two term course. Five recitations a week.

The basis of the work is the eighth book in the Reading-Literature series. The work begins with a number of type studies as follows: Poetry, Tennyson's Gareth and Lynette and Wordsworth's Michael; oration, Webster's Bunker Hill Address; the story, Hardy's Three Strangers; the drama, Tennyson's The Falcon of Ser Federigo. Section two of the book provides ample drill in oral reading, and the third furnishes abundant examples of story-telling, description and explanation. From beginning to end the work addresses itself to the ear, and the selections are all read aloud in class. Running parallel with these reading lessons is a series of composition exercises.

English 4. (Second year composition.)

A study of paragraphing, syntax, and punctuation, with a thorough study of the three elements of composition—unity, coherence and emphasis. Practical work in the writing of compositions. The class studies of Charles Dickens' Tale of Two Cities, are used as the basis of some composition work.

**Reading**

English 5. (B) Selections studied, Lady of the Lake and Silas Marner. While the emphasis is placed upon literary analysis of the two masterpieces studied, the elocutionary drill is not neglected.

**Elocution**

English 8. On term's work provided for; text, Cumnock's Choice Reading. (Half credit.)

**Literature**

English 7. (C) Texts, Swinton's Studies in English Literature; Johnson's History of English and American Literature; English Prose and Poetry, Manly. Translation from Old English Prose, Cook and Tinker; Translations from Old English Poetry, Cook and Tinker.

English 10. (B) Technique of poetry; texts, Lanier's Science of English Verse and Corson's Primer of English Verse; supplementary studies, Macbeth, Paradise Lost, Idylls of the King, Princess.

English 11. (A) The Essay; texts, Clark's Manual of English Prose Style; illustrative material drawn from the works of DeQuincy Macaulay, Carlyle, and Lowell.

### **Degree Course Work**

English 13. (A) Public Speaking.

English 12. (B) Special course in Fiction based on the following works: *Bride of Lammermoor*, *Vanity Fair*, *David Copperfield*, *Adam Bede*, *Kidnapped*, *Last of the Mohicans*, *Marble Faun*.

### **RHETORIC, GRAMMAR AND ORTHOGRAPHY**

MARTHA BUCK  
LILY GUBELMAN

English 9. (Rhetoric) Text, *Forms of Discourse*, Cairns. This class meets five times a week through the fall term.

English 6. (Method of English) This course deals with the pedagogy of the language arts. The development of the language faculty in the race is considered in connection with the development of the language faculty in the individual. Reading, language and grammar are treated, not as separate subjects, but as different phases of the same subject. The state Course of Study is used very largely as a basis for the work.

### **GRAMMAR**

(Eng. Gram. 1.) The course starts with a study of the fundamentals of analysis. The parts of speech with their inflections are carefully studied and much drill is given in the use of correct forms.

Eng. Gram. 2.) Some time is spent in a review of the more difficult points in connection with the parts of speech, such as classification of the verb, the forms and uses of the subjunctive mode, the infinite, the participle, and the verbal noun. The complex sentence is carefully studied, as are also idioms and phrases due to abridgement.

(Eng. Gram. 2, for H. S. Graduates.) The course includes a review of the fundamentals of analysis, of the difficult points connected with the parts of speech, and a careful study of the complex sentence. Idioms and phrases due to abridgement are also studied.

(Eng. Gram. 3.) This includes one-half of the term given to *Methods in English*. It begins with the simpler principles suitable for beginners, considering how to make them plain and practical; then passes on to the more difficult parts of our language structure. In this way a complete, but rapid review of grammar is obtained, from the standpoint of the teacher.

### **(Comparative and Historical Grammar)**

(Eng. Gram. 5.) The aim of this course is to furnish the student with a historical background for the study of English grammar. English, an almost uninflected language, is compared with Latin, a highly inflected language, in order that the pupil may understand the devices used to offset the loss of inflections. The student is also taught the history and growth of the language, especially as reflected in the forms and constructions of modern English.

### **ORTHOGRAPHY**

This course includes a study in the spelling of words frequently used, in distinguishing between words pronounced alike but spelled differently, in learning the use of the dictionary and the value of the diacritical marks, and in dividing words into syllables. Every effort will be made to make this course a valuable help toward the achievement of good form in all written work done by the pupil.

### **LANGUAGES**

C. E. ALLEN

J. M. PIERCE, ASSOCIATE

EMMA L. BOWYER, ASSISTANT

The Latin and German Courses provide for four years of Latin or German, and pupils are advised to choose one language and take four years of it. Credit is given, however, for four years of foreign language study, with the condition that not less than one year of any language shall be accepted. With this condition pupils may offer French or Greek as well as Latin and German.

### **Latin**

Twelve terms of Latin are required of all those who take the Latin Course. An advanced course of two years is now offered. This course is designed primarily to meet the demands of those preparing to teach Latin in the high school.

Latin 1, 2, 3. Hale's First Latin Book is used as the text throughout the first year. Quantitative pronunciation is taught and pupils are required to mark long vowels in all written work.

Latin 4, 5, 6. The second year is given to the study of Cæsar and prose composition. Five books of the Gallic War are read, and prose composition based on the first four books is taken from Hale's Latin Composition. Bennett's Latin Grammar.

Latin 7. Orations of Cicero. First three against Catiline with selections from Sallust's Catiline and prose composition.

Latin 8. Cicero. The fourth against Catiline with selections from Sallust, the orations for the Manilian Law and the poet Archias. Daniell's Prose Composition.

Latin 9. Ovid. Selections, about 1,500 verses. Greek and Roman Mythology.

Latin 10. Virgil's Aeneid. First three books. Scanning and Mythology. Study and recitation on Sellar's Virgil.

Latin 11. Six books of the Aeneid completed. Sellar's Virgil.

Latin 12. Cicero, Essay on Old Age. Phormio of Terence.

### **Advanced Courses in Latin**

Latin 13. Livy (Books XXI, XXII).

Latin 14. Horace (Satires and Epistles).

Latin 15. Tacitus (Germania and Agricola) Suetonius (Julius Cæsar and Augustus).

Latin 16. Virgil, (Eclogues and Georgics).

Latin 17. Juvenal.

Latin 18. Review and Methods.

### **German**

German 1, 2, 3. Bacon's New German Grammar.

German 4, 5, 6. Immensee, Germelshausen and Der Lindenbaum. Aus Nah und Fern. Trauemereien. Ho her als die Kirche.

German 7, 8, 9. Der Fluch der Schoenheit. Deutsche Gedichte, von Klenze.

Inkognito and Cand-phil. Lauschmann.

Krieg und Frieden. Pole Poppenspaeler.

German 10, 11, 12, with 7, 8, 9, and additional individual work.

### **French**

French 1, 2, 3. Bierman and Frank: Conversational French Reader. Easy French.

French 4, 5, 6. La Tâche du Petit Pierre. L'Abbé Constantin. Colomba. Madame Thérèse.

### **Spanish**

Spanish 1, 2, 3. De Vitis: Spanish Grammar. Elementary Spanish Reader.

Spanish 4, 5, 6. Spanish Anecdotes. Flores de España. Correspondence and Commercial Forms. Spanish Daily Life.

## **ART**

GLADYS P. WILLIAMS

GRACE L. BURKET

Realizing the cultural value of Art study and the fact that drawing is one of the best means of mental development, a certain amount of work in this department is required in all courses. Advanced study is offered for those who wish to become supervisors of drawing or who are particularly interested in Art.

### **Drawing**

(Art 1). The principles of perspective are studied and application is made in the drawing of objects singly and in groups; drawings are made also from nature, using as subjects: flowers, fruits, trees and simple landscapes. The arrangement is both pictorial and decorative. Mediums used are pencils and crayons.

(Art 3). A term in blackboard sketching is offered to meet the demand that the teacher shall be able to draw on the blackboard rapidly and clearly for the purposes of illustration. Practice will be given in drawing from objects, from memory and from imagination.

(Art 8). Drawing in charcoal, from still life and from casts. Out of door sketching.

(Art 14). Continued work in charcoal from casts of flowers, fruits, animals and the human figure.

(Art 15). Life sketching. Study of the proportions of the human figure. Drawing from pose in costume.

### **Watercolor**

(Art 2). Work from nature and from still life. Study of the theory of color and of color harmonies. Application to the problems of home decoration and of dress.

(Art 10). Studies from nature and from still life. Out of door sketching.

### **Design**

(Art 6). This course includes a study of the principles of design, balance, rhythm and harmony; and of the terms, tone, measure and shape. By problems the student is led to a practical application of these terms and principles. General principles of lettering. Letter forms and proportions.

(Art 7). Continuation of the study of the principles of design. Practical application of these in the making and applying of designs for different materials and purposes. Principles of conventionalization applied to natural forms. Theory of color in its

application to design. Design is studied in its relation to manual training, commercial life and art in the home.

(Art 9). Clay modeling. This course includes the making of type forms and objects based on them, simple animal forms, modeling from casts, tiles and hand built pottery. Some instruction in firing and glazing of pottery.

(Art 21). Commercial Design. In this course design is studied with reference to its application in the business world. Principles of advertising are studied, color and printing.

### **Methods**

(Art 4). Public school art in its relation to American life will be discussed. Talks by the students on the different phases of art illustrated by numerous drawings. Methods of teaching art in the grades. Students will be required to make out a course of study in drawing for the first eight grades.

### **History of Art**

(Art 5). A study will be made of Architecture, Sculpture and Painting in order that the student may become familiar with the masterpieces in these subjects. The school owns a large collection of pictures and some good lantern slides. These are used and talks are given. Each student will be required to make a note-book to cover the work of the term.

(Art 11). History of Architecture and Sculpture. Similar work to Art 5 but more time will be given to the study. A text book will be used as the basis of instruction but this will be supplemented by talks, readings and pictures.

(Art 12). History of Painting. A study will be made of the art of the different countries of the great artists and their paintings.

(Art 13). Picture Study. Composition and the principles of art will be studied in their relation to pictures. The subject of how to judge a picture will be discussed. Individual pictures will be studied, with reference to their use in school work.

### **Degree Courses**

(Art 17, Art 18). History of Art. The art of a country will be studied in relation to its geography, history and political and social life. The library has an excellent collection of books which will be used for reference. Two terms required.

### **Design or Watercolor**

(Art 19, Art 20). Advanced work will be given in either water color or design. One term of either required.

## HISTORY

GEORGE W. SMITH

*El. Gen. History. Course 5.* This course is a suitable background for American History. It will include a general survey of the Mediterranean countries and England. Toward the end of the term the subject matter will be the settlement and development of the American colonies.

*Illinois History. Course 4. Text, Smith.* Illinois history is a part of the history of the United States. While this is kept constantly in view, the pupil is brought to a realization that this history was made at our very door. Some attention will be given to the spirit of local history and to the method of investigation.

(B) *Course 6. Text, Channing.* The work in this class will begin with the political separation of the American Colonies from Great Britain, and will consider as general topics the following: The Formation of the State Governments; The Continental Congress; The Confederation; The Constitutional Convention; Organization of the Government Under the Constitution; Rise of Political Parties; Internal Development.

*Civics. Course 7. Text, Guitteau.* A course in Civics will be given the Spring Term of the first year. The machinery of our federal and state governments, as well as local governmental matters, will be considered. Attention will also be given to present civic problems.

(A) *Course 9. Text, Mace.*  $\frac{1}{2}$  Credit. In this course the general subjects for discussion are: the general nature of the subject matter of history; the principles and processes of its organization; the phases of elementary history work; and a study of the periods of United States history.

*Grecian History. Course 10. Text, West.* While the history of Greece will occupy a large share of the time, a brief summary of the oriental nations will be taken.

*Roman History. Course 11. Text, West.* This term will be devoted to the period from the founding of Rome to the time of Charlemagne.

*Mediaeval Europe. Course 12. Text, Davis.* European history will occupy the time of the class the spring term. The length of the term is such that only a general summary can be taken. Emphasis will be given to the relation of European history to American history.

*English History. Course 13. Text, Cheyney.* English History follows the three terms of general history of the Junior year. The value of this course lies in its relation to American History. Special emphasis will be given to the origin and growth of those institutions which have been transplanted to our own soil.

### Degree Courses

*Advanced Greek. Course 15. Text, Bury.* This course is offered the fall term. Attention will be given to sources; migratory movements; city-state government; confederations; art, literature, and other sources of Greek culture.

*Roman Political Institutions. Course 16. Text, Abbott.* In this course we take a comprehensive survey of the political institutions under the Monarchy, the Republic, and the Empire. Whenever the opportunity offers, comparisons will be made between Roman institutions and those of more recent times.

*The French Revolution. Course 17. Text, Mathews.* The work in this course begins with Lowell's *Eve of the French Revolution*, and Young's *Travels in France*, as a background after which the text is used as a basis of discussion.

### GEOGRAPHY AND GEOLOGY

FRANK H. COLYER

*Geography 2. (C) Text, Dodge.* This course gives a general survey of the principles of geography followed by a study of the continent of North America. Special attention will be given to the geography of the United States.

*Geography 3. (B).* Geography 2 is necessary before taking this course. It is the aim of this course to make an intensive study of some one continent, as Europe or South America. Considerable drill will be given in the use of books of reference and supplementary material of various kinds.

*Geography 4. (A) Text, Dodge and Kirchway.* Courses 2 and 3 should precede this work in methods. The purpose is to discuss the principles and methods of teaching geography in the various grades of the public schools.

*Geography 5. (Industrial and Commercial Geography.) Text, Smith.* It is the plan of this course to give a general discussion of the industrial and commercial conditions of the leading countries of the world with particular attention to the United States. Many of the simpler geographic and economic principles governing trade and industries will be discussed.

*Physiography (Course 6). Text, Salisbury.* It is the purpose of this course to give prospective teachers sufficient training in the physical side of geography to successfully teach this subject in all the grades in the public schools. Courses 2 and 3 should precede this work in physiography.

*Advanced Geography (Course 11).* This course is for high school graduates. A thorough study of some one continent will be covered in the term. The chief aim is to discover the reasons, or principles involved in study of the continent selected.

### ELECTIVE

*Geology 8. Text, Salisbury.* This course aims to give a general view of the field of geology. A few of the more important

rocks and minerals will be studied. Chief attention will be given to the dynamic and historical phases of the science.

### Degree Courses—Geology

*Geology, 9, 10 and 11. Text, Chamberlain and Salisbury's College Geology.* All students taking these courses should have a working knowledge of botany, zoology and chemistry, also Geology 8. The aim of these three terms' work is to give a much more detailed study of dynamic, structural and historical geology than that in general geology.

## PSYCHOLOGY AND PEDAGOGY

GEO. D. WHAM

### *Education 1. School Management.*

The following topics indicate the nature of the course: The first day of school; the organization of the school; the making of programs; discipline and moral training; securing and holding attention; the technique of the recitation; school equipment; sanitation and decoration; the teacher's relation to parents, school board, community and profession.

Bagley's *Class-room Management*, or its equivalent, is the text. Additional readings as the topic demands.

### *Education 2. Psychology.*

This is a course in elementary educational psychology. The various principles that underlie effective teaching are developed, illustrated by concrete exercises and problems, and then exemplified by illustrative lessons taught by the critic teachers of the Training School.

Colvin and Bagley's "A First Book in Psychology," or its equivalent, is the text. Assigned readings in James' *Talks to Teachers*, Colvin's *Learning Process*, and McMurtry's *How to Study*.

### *Education 3. Principles of Education.*

This course is a systematic study of the fundamental principles of education as they are derived from the basic sciences of biology, physiology, psychology, and sociology. The principles thus derived are, throughout the course, applied in the interpretation and criticism of current and proposed educational theories and practice.

Bagley's *Educative Process*, Bagley's *Educational Values*, Ruediger's *Principles of Education*, Horn's *Philosophy of Education* and Spencer's *Education* are the books studied and read.

*Education 4. History of Education.*

The chief aim of this course is to afford the teacher the sanity of judgment that comes only by seeing present day education in perspective against its historical background. It traces in the history of nations the evolution of educational ideas and practice in response to social needs and to the contributions of philosophic and scientific thought. The important periods are studied as they are represented by noted writers and reformers.

Monroe's *History of Education* is the text. Additional readings in Graves' *History of Education*, Quick's *Educational Reformers*, and Painter's *Great Pedagogical Essays*.

*Education 5. Advanced Psychology.*

This is intended to be an advanced course in pure psychology without special regard to its application to teaching. It attempts to equip the student with an organized knowledge of the facts and laws of mental life. It further attempts to train the student in the art of introspection in the study of his own mental processes and thus to increase his power to discern and control the mental processes of others. Throughout the course introspection is aided by experiment.

Titchener's *Text-book in Psychology*, or its equivalent, is the text. Seashore's *Experiments in Psychology* is used for experimental work.

*Education 6. Sociology.*

This course includes the consideration of the origin and nature of society and of the great social institutions of family, church, state, and school. It makes a special study of the relation between society and the individual, and of the practical problems, industrial, governmental, and educational, growing out of the complexity and rapid development of modern society.

Ellwood's *Sociology and Modern Social Problems* and Ross's *Social Psychology* are used as texts. Assigned readings throughout the term.

*Education 7. High School Education.*

This course purposes the study of such topics as adolescence; the history, aims, and methods of secondary education; the organization of high school courses of study; high school equipment; and the problems of discipline and management peculiar to the high school.

The text used is Johnson's, *The Modern High School*, Assigned reading of addresses, reports and bulletins on high school subjects.

*Education 8. Child Development.*

This course attempts to trace the stages of physical and psychic growth from infancy to maturity, and thus to secure a more intelligent basis for organization, course of study, discipline, and teaching in the different grades of the elementary and high school.

Among the books studied and read are Tanner's *The Child*, King's *Psychology of Child-Development*, Kirkpatrick's *Fundamentals of Child-Study*, Swift's *Mind in the Making*, and Hall's *Youth*.

*Education 9. School Administration.*

The primary aim in this course is to give a comprehensive view of the elaborate organization and specialization of educational forces in the United States, and a corresponding appreciation of the educational machinery through which these forces operate. Following a brief review of the development of the American Public School System is the study of such topics as, units of organization and supervision, school finances, courses of study, school plant, grading of pupils, measurement of results of teaching, improvement of teachers, and adjustment to community needs.

Dutton and Snedden's *Administration of Public Education* is the text. Additional readings as demanded by the topic studied.

**MATHEMATICS**

WILLIAM TROY FELTS

WARD H. TAYLOR

The work in this department is primarily to give an understanding of the processes and forms of expression in the several branches of mathematics offered; to secure experience in operations; to train the pupil in his power to select features of prime importance, exercise individual judgment in formal reasoning and choose logical steps in demonstration; to see the practical and business aspect of the topic when practicable; and to present the history and pedagogy of each to such extent as seems practical. To accomplish these ends the following courses are offered.

**NORMAL COURSES****Arithmetic**

SENSENIG AND ANDERSON

First Year. Two courses are offered for students just out of eighth grade, and who need more thorough grounding in the fundamentals before taking up the regular courses.

First term, Math. 1. (D Arith.) A thorough review and drill in the elementary processes, g. c. d., l. c. m., common and decimal fractions, with a view of fixing principles.

Second term, Math. 2. (C Arith.) Percentage and its more useful applications with particular attention to business applications, customs and usages. This is an enlargement of the work of seventh grade as outlined by the State Course.

Second year, third term, Math. 10. (Arith. B) Mensuration, metric system, specific gravity, and air pressure. This is an enlargement upon the work of eighth year as outlined in the State Course.

Fourth year, second term, Math. 30. (Arith. A) The pedagogy of arithmetic in the grades and interpretation of the arithmetic of the State Course. Pre-requisites, Pedagogy B, and Math. 10. Brown and Coffman's *How to Teach Arithmetic* is the text.

### **Algebra**

First year, third term, Math. 3, Alg.-Geom. This course is a combination of algebra and geometry. It is planned (1) to make a natural and easy approach to the study of formal algebra and geometry, and (2) to furnish the necessary algebraic and geometric content for a complete mastery of the eighth grade arithmetic as outlined in the State Course of Study. This course is prerequisite for both Math. 14 (D. Alg.) and Math. 20 (C Geom.) First Year Mathematics by Breslich is the text.

Third year, first term, Math. 4. (D Alg.) Alg.-Geom. course as given in Math. 3, continued with the geometric element stressed. Breslich's First Year Math. is the text.

Second term, Math. 15. (C Alg.) A comprehensive review of Math. 14, involving literal exponents, simple equations and simultaneous equations in two and three unknowns involving integral, fractional and literal coefficients. Pre-requisites, Math. 14.

Third term, Math. 16. (B Alg.) Inequalities, involution, evolution, theory of exponents, logarithms, radicals, and quadratic equations. Pre-requisite, Math. 15, or one full year of high school algebra.

Fifth year, third term, Math. 17. (A Alg.) Simultaneous equations involving quadratics, theory of quadratic equations, zero and infinity, ratio and proportion, variations, progressions, binomial theorem, indeterminate coefficient. Pre-requisite, Math. 16, or one and a half years of high school algebra in an accredited high school. This course may be elected in lieu of A Geometry.

## **Geometry**

SLAUGHTER AND LENNES

Fifth year, first term, Math. 20. (C Geom.) Half of plane geometry completed. Less freedom of assumptions than in Math. 3 and 4. Emphasis in accord with Report of Committee of Fifteen. Prerequisite, Math. 3 and 4.

Fifth year, second term, Math. 21. (B Geom.) Plane geometry completed. A survey of plane geometry as a whole is made, with discussion of alternative proofs, order of theorems, a possible minimum number of assumptions, etc. Pre-requisite, Math. 20.

Fifth year, third term, Math. 22. (A Geom.) Solid Geometry, Mensuration is emphasized. This course is elective with Plane Trigonometry and A Algebra. Pre-requisite, Math. 21.

## **Degree Courses**

As occasion demands courses will be offered for graduate units in the following:

Plane Trigonometry. This may be selected in lieu of solid geometry or A Algebra in graduating from any of the Normal courses in which solid geometry or A Algebra is accepted. When so used, solid geometry or A Algebra may be used as a graduate credit in lieu of it.

College Algebra. Amplification of most of the topics of Math. 17 with variables and functions, mathematical induction, complex numbers, theory of equations, limits, infinite series, probability. Pre-requisite, Math. 17. Text, Hawkes' College Algebra.

Plane Analytics with enough of the elements of solid analytics to give a foundation for calculus. A few higher plane curves discussed.

Differential and Integral Calculus, with emphasis on the former. The approach is by the theory of limits. Applications to laws of physical science. Two units of work will be offered in calculus with the stress upon the integral in the second unit; maxima and minima, curvative, definite integrals, multiple integrals, area and volume by integration, first and second moments, infinite series, etc.

Pedagogy of Secondary Mathematics. Discussion of the methods of presentation of algebra, geometry and trigonometry; recent movements in the field of secondary mathematics, etc.

## **PHYSICAL TRAINING AND ATHLETICS**

INEZ L. HOLLENBERGER

WANDA NEWSUM

WILLIAM MCANDREW

First year: Three terms, three periods per week, under director.

Second year: Three terms, three periods per week under director.

Three terms, two periods per week, reported exercise, to be elected during the three upper years. These exercises to be selected from the following: walking, tennis, basket ball, volley ball, base ball, track, aesthetic dancing, or any other approved exercise.

All high school graduates, who in the Normal are registered as third year students, are required during the winter term of their first year to take work in the gymnasium under the director.

A course in playground management and games is offered during the spring and summer terms. The spring term work is divided into two six week divisions. The work of the summer term is identical with that of the first six weeks of the spring term.

During the winter each class is represented by a girl's team and a boy's team in two series of interclass basket ball games. Interclass competition in track and tennis is also held. A new athletic field has been completed just off the campus. Four tennis courts are provided for students use. Every year the Southern Illinois Interscholastic is held under the direction of the athletic department. This a track and intellectual meet held for the high schools of Southern Illinois.

The Normal is a member of the Illinois Intercollegiate Athletic Association and has teams for intercollegiate competition in foot ball, basket ball and track work.

## MUSIC

GLENN C. BAINUM

RUTH BRADLEY, ASSISTANT

JULIA DICKERMAN CHASTAINE, VIOLIN, VIOLA, CELLO

H. RAYMOND MOORE, BRASS WIND INSTRUMENTS

The several courses provide for definite study of the theory and practice of music, and aim to train the individual to appreciate good music and to prepare the prospective grade teacher for teaching the subject.

### Music 2 (Elementary)

Although designed for grade teachers this course is equally valuable to students in voice, piano or orchestral instruments. It includes the study of the symbols of notation, major, minor and chromatic scales, measures in common use, rhythmic patterns, musical terms, syllable singing, song study, etc.

To complete elementary music, students must pass written test in the theory of music and be able to sing at sight, with words or Italian syllables, music of the degree of difficulty of "America."

Text: Music Notation and Terminology, Gehrkens.

### **Music 3 (Advanced)**

Music 3 is a combination of advanced theory, history, biography and methods. Theory continues the study of diatonic and chromatic scales, key relationship and modulation employing chromatics as members of the dominant seventh chord, common chords, terminology, sight-reading, and song analysis. Assigned topics in history and biography are presented by members of the class. Methods include the systematic study of at least one course in public school music, outlines of the music as presented in the Training School, care and training of the child-voice, monotones, class organization, rote songs and song interpretation. The Victrola is used for purposes of illustration.

Pre-requisite: Music 2.

Texts: Readers supplied.

Music Notation and Terminology, Gehrkens.

Education Through Music, Farnsworth.

### **Music 4 (Harmony and Music Appreciation)**

Music 4 is an optional subject in the Art Course but is a valuable course for those who desire advanced work in theory. Two days each week are devoted to the study of melodic and harmonic structure of simple four-part music. Students are required to write simple melodies and harmonize same in common and dominant seventh chords. Three days each week are given to music appreciation including musical form, history, and biography. Through the use of the Victrola special emphasis is given to the study of opera and oratorio.

Pre-requisite: Music 3. By permission from the department, students may enter this course and take Music 3 as a parallel course.

Texts: Harmony Simplified, Shepard. Musical Form, Cornell. First Studies in Musical Biography, Tapper. History of Music, Fillmore.

### **Instrumental Music**

Class instruction in orchestral instruments is elective; one credit, (two terms), may be substituted for Music 4. Classes recite three days each week.

### **Music 21, 22, 23 (Violin First Year)**

The subject matter of the text used is correlated with the singing lesson wherever possible. Emphasis is placed upon the mechanics of the instrument by employing: (1) Short and easily

memorized exercises in rhythmic form, for the development of the bow hand and arm; and (2), technical exercises suitable for young beginners, designed for the purpose of training the left hand.

Pre-requisite: Music 2.

Text: Mitchell's Public School Class Method, Book 1.

### **Music 24, 25, 26 (Violin Second Year)**

The work of the second year provides for the presentation and development of the third position, the more difficult keys, rhythms, bowings, and the easier harmonies; during the latter part of the year the seven positions in scale form are used.

Pre-requisite: Music 23 (Violin).

Text: Eugene Gruenberg—Elementary Violin Lessons.  
Meyers School of Third Position.

### **Music 31, 32, 33 (Brass Wind Instruments First Year)**

Instruction is offered in all brass wind instruments,—four years in cornet, trumpet and all other valve instruments played from treble staff, and two years in trombone, baritone, euphonium, tuba and all other valve instruments played from bass staff. Students who have some training in the technic of these instruments will be examined and graded according to their ability.

Music 31 is the class for beginners and includes tone production and lip development through simple exercises in three keys. Students are required to take music 2 as a parallel course.

Music 33 provides for the training of the diaphragm, breathing exercises, and scales and exercises in three additional keys.

Music 33 includes sight-reading of simple finger exercises and the study of the more difficult keys.

Text: Langey.

### **Music 34, 35, 36 (Brass Wind Instruments Second Year)**

The work of the second year consists of exercises for velocity and the perfecting of tones in the higher register; solos and duets of medium grade of difficulty are used.

Text: Langey.

### **Music 37, 38, 39 (Cornet and Trumpet Third Year)**

During the third year some practice in band and orchestra is given. The technical exercises include the study of appoggiature, mordent, gruppetto, trill, etc.—preparation for solo playing. No student will play in public without permission from the instructor.

Text: Arban.

**Music 40, 41, 42 (Piano First Year)**

Teaching of the rudiments of piano playing from one of the most approved methods for beginners. Careful attention is given to hand culture, touch, music notation, rhythm and ear training.

Text: "Standard Graded Course of Studies," by W. S. B. Mathews.

**Music 43, 44, 45.. (Piano Second Year)**

The W. S. B. Mathews "Standard Graded Course," continued.

**Music 46, 47, 48. (Piano Third Year)**

The W. S. B. Mathews "Standard Graded Course," continued. Other studies given by the instructors according to the needs of the individual student.

**Advanced Piano**

This course is offered to students who have had three or more years of piano playing before entering the Normal. The course of study is planned to meet the needs of the individual student.

**Special**

The University maintains a chorus, band and orchestra. Students who are especially interested in music are urged to apply for membership in at least one of these organizations.

**CHEMISTRY**

GEORGE M. BROWNE

MR. —————, LABORATORY ASSISTANT

The facilities for teaching chemistry have recently been much enlarged. Increased equipment for the study of general chemistry has been provided until now one hundred students may be accommodated each term. New balances, weights, glassware, platinum ware, graduated flasks, buretts, pipets, etc., enable the student to study qualitative and quantitative analysis. The equipment for the study of household chemistry has also been much enlarged to accommodate the enlarged classes for the study of foods and other household substances.

All courses in chemistry require both text and laboratory work; two hours of laboratory work being required for each recitation omitted.

**Chemistry 1**

This is a course for beginners and was designed to meet the needs of the pupils of the domestic arts and the agriculture courses.

It is the chemistry of air, water, solution, and of the more common acids and of a few metallic compounds. Two periods of recitation and six of laboratory work are required per week.

### **Chemistry 2**

Chemistry 2 is a continuation of chemistry 1 which is a prerequisite. It is largely a study of the carbon compounds of most interest to the feeder of man and of animals. A few metallic compounds are also studied.

### **Chemistry 3**

During the third term of study especial attention is given to the study of the more common metals and their compounds. Three periods of recitation and four of laboratory work are required each week of this term.

Chemistry 1 A, 2 A and 3 A are courses for those wishing to enter college or medical school. These are the courses for the regular normal students.

Text: McPherson and Henderson's College Chemistry.

### **Chemistry 4**

Household chemistry is the chemistry of soap and other cleaning agents, of dyes as effected by laundry agents, and the chemistry of some of the common food materials. Chemistry 3 should precede this course.

**Chemistry 5 and 6** are postgraduate courses in organic chemistry with laboratory work in food materials. These courses are not offered in the year 1917 and 1918.

### **Chemistry 7 and 8**

Chemistry 7 and chemistry 8 constitute a half year's work in qualitative analysis of the common bases and acids. The text used is "The Elements of Qualitative Analysis," by W. A. Noyes.

### **Chemistry 9**

Advanced qualitative analysis is a half year's work in the analysis of insolubles and the identification of the rare elements. The work includes the analysis of many of the common rocks and mineral ores.

### **Chemistry 10 and 11**

Elementary quantitative chemical analysis is begun in chemistry 10 and is continued in chemistry 11. The two courses are a half year's work.

Text: Talbot.

### **Chemistry 12**

Advanced quantitative chemical analysis. A half year's work.

## **PHYSICS**

S. E. BOOMER

1. This course is given in first year, but it is required of all those in the normal department who have never studied physics. It deals very largely in a qualitative manner with the common phenomena of every day life. It intends to develop the habit of observation and intelligent interpretation of these phenomena, to make for efficiency in the nature study work of the common schools, and to prepare for those sciences which precede the more advanced courses in physics.

Many demonstrations and about forty simple laboratory exercises with a well kept note book constitute the experimental work.

2 and 3. Together these form a complete course in general physics. The aim is to give an appreciation of the physical laws of nature, to study their industrial applications, and to develop the scientific habit of thought. The former, which is given both the fall and winter terms, covers mechanics and heat. The latter, which is given both the winter and spring terms, covers magnetism, electricity, sound, and light.

Pre-requisites: Physics 1, Math. 3, 14. Math. 15 must precede or accompany course 2.

Texts: A First Course in Physics (Revised), Millikan and Gale. A Laboratory Course in Physics, Millikan, Gale and Bishop.

4. Some of the more difficult problems in the above courses receive fuller treatment. The library is used extensively, assignments of reading being adapted to the purposes of the individual. Four hours per week recitation, two hours per week laboratory.

Texts: Several of the leading high school texts and manuals are used, but each members purchases one text and one manual.

Students may enter any of the above courses given in the spring term for which they are prepared at the beginning of the mid-spring term. When there is sufficient demand work given the first half of the spring term will be repeated the summer term, thus enabling students to make one credit during mid-spring and summer terms.

### **Degree Courses**

6. Mechanics and Heat. Fall term.

Pre-requisites: The equivalent of courses 1-3. Trigonometry must precede or accompany this course.

7. Magnetism and Electricity. Winter term.

8. Sound and Light. Spring term.

Courses 6, 7 and 8 constitute a one year course of college physics. Recitation three hours per week, laboratory four hours per week.

### **Astronomy**

The course is largely descriptive, formal mathematics being reduced to the minimum. The relation of the earth to the heavenly bodies, the changing seasons, the varying forms of the moon and the planets, units of time and distance receive attention. It is intended to be helpful in teaching mathematical geography.

Text: Todd.

## **BIOLOGY**

J. P. GILBERT

W. M. BAILEY

MARY M. STEAGALL

G. H. FRENCH, CURATOR OF MUSEUM

### **Biology 1**

This is a first course in Zoology for those who have no credit for the subject in a good high school. The course will cover the general field of Zoology, using type studies as a basis for the larger group studies, and as a means of training in method of approach to the study of animals. Considerable emphasis will be placed on field studies as well as on the laboratory and recitation work.

### **Biology 2—Invert. Zool.**

This course in Invertebrate Zoology is for advanced students who wish to teach the subject. Animals will be studied in detail as to the structures and functions of organs. As far as time will permit, studies in morphology, physiology, relation to environment, and the inter-relation of organisms will be assigned to individual students in the laboratory and field. The student is expected to gain some knowledge of methods of research. Histological methods taught as required.

Required: Zoology 1, or equivalent.

### **Biology 3—Vert. Zool.**

The course in Vertebrate Zoology for advanced students is a continuation of Zoology 2, and it will follow the same general plan. Students may take this course before taking Zoology 2, yet they are advised that the better plan would be to follow the order as printed in the course of study. Histological methods and studies emphasized as needed.

Required: Zoology 1, or equivalent.

Note.—Students are advised to take entomology and ornithology before they take Zoology 1 or 2.

### **Biology 4—Physiology**

This is a course in elementary general physiology, hygiene and sanitation. The structure, work and care of the organs of the body will be studied. Diseases will be studied as to causes, spread, prevention and treatment. Home and school sanitation will be discussed.

### **Biology 6—Entomology**

Insects will be studied as to their life histories, adaptive structures, relation to environment, economic importance, and as agents for the spread of disease. The locust, the money bee, the house-fly and other forms will be studied in detail as to their habits, external structures and adaptations, internal anatomy, etc. The relation of insects to crops, truck garden, fruit, lawn, and shade tree injury will be studied and remedies and preventive measures discussed at length. Much emphasis will be placed upon field studies. In presenting the subject it will be borne in mind that Entomology is especially adapted to teaching in the public schools.

### **Biology 5—Ornithology**

This class will be expected to learn to recognize practically all the common birds of the season, and to this end frequently field trips must be made. For bird anatomy the English sparrow or the pigeon will be used. The economic importance of birds in insect and weed seed destruction, in relation to crops and seed dispersal, will be emphasized. A bird calendar will be kept by each student, and bird protection will be discussed.

### **Biology 7—Apiculture**

The honey bee will be studied as to its adaptive structures, the history of a bee colony, the making of new swarms, comb and extracted honey production, and bee diseases and treatment. Various types of hives will be set up in the laboratory. Colonies of

bees will be available for work and the instructor will demonstrate queen rearing, etc., for the class. Colonies will be available for the use of individual students who desire to do the practical work of the bee keeper. The relation of the bee to fruits and flowers and the profits of the bee keeper will be discussed. Types of hives and methods most suitable for the professional or business man or farmer, who wishes to have an attractive and profitable "side" business of a few colonies of bees, will be given especial attention.

### **Biology 8—Comparative Embryology**

The chick embryo will be studied in some detail, while eggs of the frog, squash bug and other forms will be studied in comparison. The "recapitulation theory" will be discussed in this connection. The course will, of necessity, be brief and elementary, but it should be of great value in giving the student of Biology and Agriculture some insight into one of the most fertile sources of our knowledge of animals and their various adaptive structures.

### **Biology 10—General Biology**

This is a general course for preparatory students and it will deal with elementary general principles of plant life and animal life. The student will be expected to learn to recognize and know some characteristics and adaptations of the most familiar plants and animals. Elementary human physiology will form a part of the course. Topics in the State Course of study will be used in part of the work.

### **Biology 21—Elementary Botany**

A first course in botany. This course presents a general view of the field of botany, and includes an elementary study of the more common types of plants, their structures, functions and life relations. The student is introduced to some of the elementary and important facts concerning the life processes as they may be seen in plants. Attention is also given to presenting the practical and economical phases of the subject. Recitations, laboratory and field studies.

### **Biology 22—Adv. Botany**

A study of the Thallophytes. A systematic study of the morphology of this group, including such problems as evolution of the plant body, origin and evolution of sex in plants, life-histories of the different forms. Attention is also given to the physiology and life relations of these plants. The food-making processes are studied, and saprophytism and parasitism are considered in con-

nection with the fungi. Attention is given to the economic relations of bacteria and fungi. Recitations and laboratory studies. For those taking degree courses or advanced work.

Pre-requisite: Biology 21.

### **Biology 23—Adv. Botany**

A study of the Bryophytes and Pteridophytes. A continuation of Course 22. The morphology, physiology and life-relations of these groups. A consideration of the problems of "alternation of generations," the gametophyte, evolution of the sporophyte, etc. The study of these groups is considered largely from the standpoint of the evolution of the plant kingdom. Recitations and laboratory studies. For those taking degree courses or advanced work.

Pre-requisites: Biology 21 and 22.

### **Biology 25—Adv. Botany**

A study of the Spermatophytes. A continuation of Course 23. The morphology, physiology and ecology of the seed plants. A study of the vascular anatomy and reproductive organs of the sporophyte, the gametophytes, pollination and fertilization, the flower, the embryo, the development and structure of seeds, and other problems. A study of the functions of the different organs of the seed plant. The ecological groups and their relations. Some attention is given to the identification and classification of seed plants. Recitation, laboratory and field studies. For those taking degree courses or advanced work.

Pre-requisites: Biology 21, 22 and 23.

### **Biology 24—Bacteriology**

A study of the morphology, life relations and distribution of bacteria, yeasts and molds and their relations to human interests. Attention is given to the study of such phases of the subject as the relation of these organisms to decay, to the fertility of the soil, pathogenic bacteria and their relations to disease and to public health, methods of making cultures, methods of disinfection and sterilization, food preservation, prevention of disease, hygiene and sanitation. Recitations and laboratory studies.

### **Biology 26—Adv. Botany**

A field course. Identification of the seed plants of the local flora, for the purpose of becoming familiar with the common plants, the distinguishing characters of the principal families, and the use of manuals for identification. Given in the mid-spring and summer terms, or in the summer term.

**AGRICULTURAL DEPARTMENT**

RENZO MUCKELROY

H. B. PIPER

The aim of the Agricultural Course is first to reach the country boy in the country school by giving to the teachers a fair conception of the subject matter that they in turn may present the work, and second to make the teaching and demonstration so practical that those who do not care to teach may find safe and profitable employment on the farm.

The institution owns a sixty-acre farm which lies just south of the campus. The farm is well equipped with pure bred live stock—Percheron horses, Jersey and Holstein dairy cattle, Duroc Jersey, Chester White, Berkshire, Poland-China, Hampshire, Tamworth, English Yorkshire and Mule foot swine, Shropshire sheep, S. C. Red, Barred Rock and S. C. White Leghorn chickens, and grade Angus feeding cattle. The farm is equipped with the various kinds of machinery for farm work. Quite a little improvement has been made the last year by way of buildings, fencing etc.

Some of this farm is used for demonstration, where the various soil treatments are made. The remaining part is in a system of live stock farming.

Visitors are always welcome to inspect the work being done.

**An. Husb. 1—Sheep**

The work will be on mutton and wool breeds, types, characteristics, adaptability, market classes and grades of sheep and wool, the pure bred and grade flocks, feeding, housing, shepherding, judging and scoring.

**An. Husb. 2—Swine**

History of the leading breeds, types, characteristics, adaptability, production of pure bred and grade herds, market classes and grades, feeding, housing, care, common diseases, marketing, market reports, judging and scoring will constitute the greater part of the work of this course.

**An. Husb. 3—Dairy Cattle**

Characteristics, types and breeds, native homes, historic developments, adaptation to climatic and local conditions, judging and scoring, selection and breeding for production will constitute the larger part of the work.

**An. Husb. 4—Beef Cattle** ✓

The work in beef cattle includes the general problems in fattening cattle for the market, relation of cattle feeding to soil fertility, business phases of feeding, production and feeding of baby beef, market classes and grades, general equipment, diseases, breeding beef cattle and elementary principles of cattle feeding.

**An. Husb. 5—Horses**

This course will include a study of the various types and breed, market class and grade requirement, historic development of the leading breeds, adaptability, judging and scoring.

**An. Husb. 6—Poultry**

Basis and beginning the business, principles and practice of breeding, incubators and incubation, brooding, growing chicks, foods and feeding, parasites and diseases, housing and fencing, marketing, exhibition, scoring and judging, records, accounts and advertising and general methods of management will constitute the work.

**An. Husb. 7—Feeds and Feeding** ✓

This course includes the more elementary and fundamental principles of the relation of plant and animal life, chemical elements of nutrition, compounds of animal nutrition, composition of the bodies of animals, digestion of food, conditions influencing digestion and the laws of nutrition. The analysis of feeds, commercial feeding stuffs, together with their relative value as based upon a maintenance ration as applied to animals of various ages either at rest or doing light or heavy work, will be studied. Balanced rations for milk and meat productions with the various animals will be carefully noted.

**An. Husb. 8—Selection and Breeding**

That the student may better appreciate some of the products of plants and animals in their growth towards man's standards of perfection, a discussion of the subject is embraced in this course. The work embodies the origin of domesticated races (plants and animals), how they came to be domesticated, needs of improvements, natural and artificial selection, unit characters, variability, transmission of characters, heredity, environment, prepotency, hybridization, and some of the practical problems involved.

**An. Husb. 9—Dairying** ✓

The aim of the course in dairying is to study conditions as they exist in Southern Illinois and to make the work as practical as possible. Students will have an opportunity to study and work out the general problems of milk production, feeds and feeding, secretion, composition and testing, ferments and fermentations and their control, marketing milk, separation, ripening and churning of cream, finishing and marketing butter, varieties of cheese, general by-products of the dairy, statistics and economics of the dairy industry. A well equipped milk house will be used for laboratory work.

**An. Husb. 10—Stock Judging**

Relation of structure to animal judging, form, function, capacity, use of the score card, comparative judging, identification of market classes and grades of the various class of live stock will be the work of this course.

**Elementary Agriculture**

*11 A*—The aim of this course is to give a few elementary principles of the science of agriculture. The course includes a series of forty-four lessons on soils and crops with outline, demonstrations and references that will aid the teacher in presenting the subject. The work is for a six months' term in the country schools and covers such topics as soil formation, classification, soil type areas, physical properties of soils, elements of plant food, sources and uses to the plant, limiting elements, value of crop rotation, growing legumes, seeding and care of farm crops, seed selection and judging, beneficial and harmful birds and insects.  $\frac{1}{2}$  credit.

*11 B*—This course is planned to cover a six months' term in the country schools on animal life. The same general plan is taken up as in the soil extension. The work will include a study of types and breeds of horses, cattle, sheep, hogs and poultry, their care, feeding and general management. Lessons on the use of the score cards will be given.  $\frac{1}{2}$  credit.

*11 C*—Since the Normal course includes more material than may be used in High School work, and since students may be interested in planning such courses, the work of this term is for the special purpose of organizing such parts of the agricultural work as may apply to High School courses, meeting sectional demands and also college entrance requirements. A careful study of the Illinois Educational Commission's report will be made together with the recommendations of the best State Universities. Students taking this course will have a fair conception of the general field of High School Agriculture.  $\frac{1}{2}$  credit.

### **Agronomy 1—Crop Production**

The first few weeks of the course in crop production takes up an elementary study of the soil as a medium for root development. Other topics to be studied are elements of plant food and crop requirements, selection grading and testing of grain, insects and diseases, etc.

### **Agronomy 2—Crop Production**

The winter term is a continuation of the work begun in the fall, but arranged so that students may enter at this time. The legumes and crop rotations will take most of the time.

Laboratory work will be required in both courses.

### **Agronomy 3—Soil Physics**

The work in Soil Physics will be a study of matter and force, nature, origin and waste of soils, chemical and mineral nature of soils, soluble salts with the physical effects, typical nature of soils, soil moisture, amounts available and required by plants.

### **Agronomy 4—Soil Physics**

This term takes up the physics of plant breathing and root action, movements of soil water—gravitational, capillary and thermal—modes of controlling soil moisture, relation of air to soil, soil temperature with influencing conditions, objects, methods and implements of tillage, principles of farm drainage with practice in laying out drains.

### **Agronomy 5—Advanced Soil Fertility**

This course includes a more intensive and extensive study of the fundamental facts and principles of soil fertility, elements and their compounds, plant food and growth, soil formation, classification and composition, soil survey and analysis by the United States Bureau of Soils, crop requirements for nitrogen, phosphorus, potassium and calcium, rotation systems for grain and live stock farming, and uses of phosphorus in various forms.

### **Agronomy 6—Advanced Soil Fertility**

The work of this term includes a study of the soil investigations by culture experiments of the Rothamsted field and of the leading Universities of the United States and the Canadian field, various fertility factors, manufactured and commercial fertilizers, critical periods in plant life, farm manures, analyzing and testing soils, factors in crop production, and systems of crop rotations as related to permanent agriculture and successful farming.

### **Agronomy 7—Farm Management**

Farm Management is a study of the business principles in farming, or the science of organization and management of a farm enterprise for the purpose of securing the greatest continuous profit. This course is planned with the above purpose and includes a study of such topics as the characteristics desirable for a farmer, cost of living on a farm, types of farming, maintaining the fertility, live stock problems, size of farms, capital, methods of renting land, farm labor and equipment, marketing products, records and accounts, choice of a region and buying a farm.

### **Agronomy 8—Farm Mechanics**

The subject of Farm Mechanics is intended to bring the student into a fair conception of some of the simple things surrounding farm life. A few principles of architecture such as strength of materials, warmth, lighting and ventilation, principles of construction, etc., will be studied before taking up the elements of Farm Mechanics embracing the principles of draft, construction and maintenance of country roads, farm motors and farm machinery.

### **Horticulture—Orcharding**

The work of this course will consist chiefly of the elementary problems which arise in the care and management of a young orchard. The nature of the work is indicated by the following topics—Selecting the orchard site, choice of varieties, planting, fertilizing, cropping, cultivating, spraying and harvesting.

## **HOUSEHOLD ARTS**

GRACE E. JONES

LUCY K. WOODY

### **Household Arts 1**

#### *Fall Term:*

This course, which is offered in the fall term only, is designed to give a knowledge of the fundamental principles in hand work applied to useful articles. The articles are chosen to furnish suggestions to those desiring to teach the subject.

The work in textiles covers the history of the industry and the study of wool.

### **Household Arts 2**

#### *Winter Term:*

The winter term introduces machine work in garment making. The garments are planned as to style, suitability of material and

economical purchasing. The work involves the alteration of commercial patterns, some pattern drafting, fitting, and the various ways of setting in trimmings.

The work in textiles in this course embraces the study of cotton and silk.

### **Household Arts 3**

#### *Spring Term:*

This course consists in planning and making two dresses; a study of materials and color combinations in dress, some drafting of patterns and the elaboration of plain patterns.

In textiles the work covers the study of linen, the dyeing of fabrics, hygiene of clothing, laundering and the economic and social aspects.

### **Cookery**

### **Household Arts 5<sup>a</sup>**

#### *Fall Term:*

A general course in cookery designed for home use and is introductory work to the professional course.

Text: Greer's Textbook of Cooking.

### **Household Arts 6, 7**

#### *Winter and Spring Terms:*

In these two courses principles by means of experimental laboratory work are formulated and applied to cooking processes. The work is planned for the student who wishes to specialize. The production, manufacture, composition, nutritive and economic value of food materials used in the laboratory will be studied.

Text: Sherman's Food Products.

### **Household Arts 8**

#### *Fall Term:*

In the early fall canning and preserving of food, to be followed by demonstration cookery. Problems in the planning and serving of meals and the school lunch will be considered.

### **Household Arts 9, 13**

#### *9. Fall Term:*

First half of the term is a course in the consideration of the problems involved in the teaching of Household Arts in the elementary school. It includes the course of study and its relation to the school curriculum with the planning of lessons. Also the planning and cost of equipment and of maintaining work. Given in connection with practice teaching.  $\frac{1}{2}$  credit.

13. *Second half—Home Economics:*

A study of the organization of the home with reference to efficient planning of work. Also the household budget and systems of keeping household accounts. 1/2 credit.

**Household Arts 11**  
**Dietetics**

*Winter Term:*

This is a course in which the principles of nutrition and cookery are applied to the diet. Problems of specific nature for varying conditions of age, sex, occupation and income are worked out in the laboratory.

Text: Rose's Laboratory Manual of Dietetics.

**Household Arts 12**

*Spring Term:*

Introductory to the course is a brief survey of the evolution of the home. The planning of the house in reference to good proportion and convenience, the problems of artistic, economic and hygienic furnishing are other topics considered.

**Mid-Spring Course**

Household Arts 5<sup>a</sup> will be given the midspring and will continue through the summer term.

**Electives**

**Household Arts 10**

**Nutritional Physiology**

A study of the chemistry and physiology of digestion and a continuation of dietary problems.

Text: Stiles' Nutritional Physiology.

**Household Arts 17**

This is a course in invalid cookery.

Text: Pattee Practical Dietetics.

**MANUAL ARTS**

LOUIS C. PETERSEN

It is the purpose of this department to provide for the student the necessary facilities for acquiring the manual dexterity,

the industrial intelligence and the special training in method and organization, essential in teaching construction work.

The shops are equipped with modern benches, tools, and power-driven machinery and form an excellent opportunity for students to gain a practical experience in transforming the natural products into useful objects and in operating machinery.

Standard methods and skill in mechanical and perspective drawing are emphasized, parallel with the design and construction of furniture, tools and implements for the home, shop and farm.

### **Course 1—Elementary Construction**

This course consists of exercises suitable for the lower grades. Paper folding and cardboard construction, cord knotting and braiding, weaving and basketry, bookbinding and rebinding, study of textiles, papermaking, bookmaking and primitive industries.

### **Course 2—Benchwork in Wood**

This course includes work in thin-wood exercises suitable for intermediate grades. The study of simple tools, practice in the use of the rule, knife, coping-saw, try-square, compasses, plane, spoke shave, hammer, etc.; problems in simple wood-fastenings and finishes, and study of common woods.

### **Course 3—Bench Work**

The student will construct useful articles involving the various joints such as are used in furniture construction and interior house finishing, panel work, door and window framing. Wood finishing will be studied and applied in practice. Instruction pertaining to the structure of wood, the method of converting the tree into lumber, seasoning, characteristics of good timber, defects, methods of preserving lumber, etc.

### **Course 4—Cabinet Making**

This course includes a series of lessons in practical cabinet work, instruction in the use of such fastenings as are employed by cabinetmakers, glue dovetailing in its various forms, blocks and dowels. There will be lessons in carving, veneering, inlaying, rubbed glue joints, scraping, filling, varnishing and polishing. Study of structure and design of furniture.

### **Course 5—Wood Turning**

This work consists in the care and operation of the power-driven wood-turning lathe. A careful study is made of the method

of handling the tool for each cut. The practice exercises include turning straight cylinder, squaring ends and cutting shoulders, long taper cuts, "V" cuts, bead or short convex cuts, concave cuts, long convex cuts, inside and outside screw face plate work, face plate and chuck work, reversing work in chuck, etc. Articles made are such as furniture parts, Indian clubs, dumb bells, darners, rosettes, cups, trays, candlesticks, goblets, napkin rings, towel rings, pulleys and wheels. The shop is equipped with eleven 12-inch wood turning lathes, one 36-inch band saw and other necessary tools for this course.

### **Course 6—Pattern Making**

This course includes the study of draft and shrinkage (fillets and round corners), finish and double shrinkage, simple coring, simple split pattern, difficult core box construction, building up loose piece patterns and sectional patterns. Problems are such as ribbed patterns, bracket, tool post slide, face plate, cone-pulley, ring, hand wheel, flat wrench, crank arm, gland, stuffing box, simple pipe fitting, pillow block, arm pulley, gear wheel, globe valve, etc.

Foundry methods will be studied. Practice in molding simple castings.

### **Course 7—Forge Work**

This course is designed to give training in the working of iron and steel. In dealing with the heated metal the student learns that the material must be treated instantly. Quick thinking, and a sure blow are required to get the desired result.

The student is taught how to manage the fire and to recognize the grades of heat necessary for the working of the different materials, the use of tools and appliances, the effects of the different kinds of blows and forging operations, such as drawing, bending, upsetting, forming, straightening, twisting, welding and tempering. The exercises consist of various pieces, involving the practical steps, as follows: Hooks and staples, stirrups, chains, tongs, chisels, center punches, hammers, Venetian iron work and a finished set of tempered tools for iron turning in the machine shop.

### **Course 8—Art Metal Work**

A study is made of the properties of metals, the principles of structural and decorative design and the methods of construction. The work includes such operations as making angles, forming curves, binding, punching, riveting, filing, sawing, drilling, beating, annealing, soldering, etching, and coloring by heat and chemicals. Problems are: pen tray, sconce, tea mat, desk stand, tin cup, funnel, paper cutter, lantern, bracket, door plate, watch fob, escutcheon, hinges, plate, bowl, box and electrical apparatus.

### **Course 9, 10—Machine Shop Practice**

Addition of valuable machines to this department has recently been made, a fact that should arrest the attention of men who wish to acquire a high degree of mechanical training and a familiarity with modern shop practice. With these improved facilities this course offers exceptional opportunities for the study of metals, alloys, machine design, construction and operation. The exercises are as follows: chipping, filing, sawing, drilling, thread cutting with taps and dies, fitting, polishing, tool-making, center work, drive on centers, setting tools, face ends to length, turn to size, caliper accurately, cutting speeds, roughing and finishing cuts, taper work, face-plate work, screw cutting, chuck work, assembling of machine parts.

Projects made by the students include jackscrews, adjustable drawing stands, grinding machines, gasoline engines and 14-inch patternmaker's lathe.

### **Course 11, 12, 13—Mechanical Drawing**

One year of mechanical drawing is required in the Manual Training Course.

The work to be done comes under the headings as follows: The use of instruments, applied geometry, lettering, orthographic projection, developed surfaces and intersections, pictorial representation, working drawings, technical sketching, architectural drawing, duplication and drawings for reproduction, strength of materials, specifications and machine drawing.

### **Course 17—Constructive Design**

A study of the strength and proportion of the various kinds of joints, application of the principles of design to the apportioning of dimensions of the elements entering into the construction of objects.

### **Course 18—Instrumental Perspective**

This course treats of the location on the picture planes of the perspective of points, lines, surfaces and solids. The principles are worked out in their application to machine and architectural drawing.

## **COMMERCIAL DEPARTMENT**

**Bookkeeping, Banking, Business Arithmetic, Penmanship, Commercial Law, Stenography and Typewriting, Stenotype**

RICHARD V. BLACK

ANNE MCCOMBER, ASSISTANT

CHARLES ISMERT, ASSISTANT

### **Equipment**

The Commercial Department is equipped with a bank, whole-

sale room and the latest improved commercial desks.

The latest model of Burroughs Adding and Calculating machine has been added, and students are given the opportunity to become familiar with the operation and use of this very important labor saving device in the work of accounting.

A penmanship cabinet, providing a place for each student to file his papers has been added this year.

The typewriting room is equipped with modern desks, and the latest models of typewriting machines. The Underwood, L. C. Smith, Remington and Monarch machines are now in use in this department.

A Neostyle duplicating machine and a Globe-Wernicke cabinet have also been added to the typewriting department.

The department is equipped to give instructions in Stenotypy to those who may desire this line of instruction.

### **Com'l I.—Penmanship**

This course presents the study of penmanship in the latest methods of developing the subject. All of the work both in movement drills and in letter and word writing are studied in tempo.

The rhythm is first developed by the use of the metronome and by counting. Later in the work the Victrola is brought into use to perfect the mastery of free muscular movement.

Drills on the straight line and the ovals, direct and indirect, constitutes a part of each recitation. The practice on the four letter types that form the basis of penmanship is begun as soon as the movement on the drills is under good control.

Letters, both capital and small, are studied by groups. The type form of each group is studied and used in special drill. The letters of the group are then studied in their natural order. Letter drills are followed by word drills and sentence writing.

The pedagogy of the subject as presented in the different compendiums of penmanship is carefully worked out and studied in class. Comparative values of different movement are presented, also the rise and fall of different systems.

A study of the plan as outlined in the State Course of Study is required of all taking this work.

### **Com'l III.—Commercial Arithmetic 1**

Short methods in dealing with the fundamentals. Aliquot parts of 100. A mastery of the 45 combinations. Tables of denominate numbers. Fractions. Formulas used in percentage and its applications. Formulas used in mensuration. Solving and analysis of problems by mental processes.

Mensuration. Lumber. Building. Plastering, Papering. Carpeting. Painting. Land measure. Base line. Principal meridian. Township section and its divisions. Distance. Surfaces. Solids. Capacity, Ratio and proportion. Longitude and time.

### **Com'l IV.—Commercial Arithmetic 2**

A mastery of single column addition. Some time will be given to double column addition. Short cuts in dealing with the fundamentals. The single equation method of stating and solving problems. Methods employed by expert accountants in solving problems and checking results. Arithmetical problems in business.

Denominate numbers. Bills. Statements. Accounts Sales. Shipments. Cash account. Bank account. Closing and ruling ledger accounts. Daily balances. Percentage. Profit and loss. Interest. Bank discount. Trade discount. Brokerage. Commission. Premium. Stocks. Bonds. Insurance. Taxes. Negotiable paper.

### **Com'l V.—Commercial Arithmetic 3**

Domestic Exchange. Foreign Exchange. United States Custom. Storage. Equation of Accounts. Cash Balance. Partnership. Trading Account. Profit and Loss. Inventories. Financial Statement. Present Worth. Balance Sheet.

Building and Loan Associations. Terminating. Serial. Permanent. Earnings. Distribution of Profits. Annual Reports.

### **Com'l VII.—Bookkeeping 1**

This course is introductory bookkeeping and is planned for those who have never studied the subject. The work is taught on the laboratory plan. The double entry system is introduced in the beginning and all the laws governing the debit and credit of business transactions are fully explained and mastered. The journal, day book, cash book, sales book, purchase book and the auxiliary books are introduced and their use in accounting fully demonstrated. A complete line of business transactions are placed in the books of original entry, posted to the ledger, trial balance taken, inventories entered, and accounts closed. Loss and gain account and financial statement are worked out, and the entire ledger summarized in the balance sheet.

### **Com'l VIII.—Bookkeeping 2**

This course in bookkeeping constitutes the actual business practice. A bank and a wholesale room have been installed which gives special opportunity to learn the banking and wholesale busi-

ness, as well as the retail business. In the retail business each student becomes a proprietor. He is given a cash capital in college currency. The work in detail is as follows: Select a place of business. Leases a building. Opens an account with the bank. Buys merchandise from the wholesale house. Trades with fellow students. Writes checks, notes, drafts, and other business papers. Buys and sells for cash, on account, note, draft, and in combination. Writes trades in books of original entry, posts to the ledger, making daily trial balances and cash reports. After four weeks trading ledger is closed and business opened as a partnership. More advanced and new lines of trading are introduced. More skill and greater ability required. After four more weeks of trading the books are again closed and opened as a corporation. The work in trading is continued for two more weeks, when a final closing is made.

### **Com'l IX.—Bookkeeping 3**

Special sets in the different lines of business are offered. Grocery, Lumber, Hardware, Farm, Wholesale, Dry Goods, Boot and Shoe, Manufacturing, Commission. In all these lines of business the latest systems of accounting are presented. In the Actual Business Practice each student has been taught to rely on himself, and to see clearly the workings of the varied business transactions, so that in the advanced sets little difficulty will be met in comprehending the trades that are made.

### **Com'l X.—Banking 4**

This course deals primarily with Bank accounting. Actual practice in handling bank bookkeeping is offered in the actual business practice. The latest improved systems of accounting as employed by the best city banks are taught. A working knowledge of the following books is required for credit in this course: Depositor's Ledger, Discount Register, Correspondent's Register, Collection Register, Bond Register, Certificate of Deposit Register, Draft Register, Teller's Cash Register, Collection and Discount Tickler, Daily Statement, Certified Check Register, Journal.

The history and organizations of our banking system. Private Banks. State Banks. Trust and Savings Banks. National Banks. The Reserve Banks created by the recent banking laws. The Clearing House. The Bank as an economical institution in a community.

### **Com'l XI.—Corporations 5**

Corporations: Organization, Purpose, Government, Supervision, Kinds of Stock. Stock Certificates. Bonds. Earnings. Sinking Fund. Inprest Fund. Dividends. Surplus. Assessments.

Stockholders. Officers: Directors, President, Secretary, Treasurer. New York Stock Exchange. Comparative Value of Stocks and Bonds. Investments. Manipulation. Trusts. Syndicates.

Manufacturing: Raw Materials, Finished Goods, Production, Disposition. Factory System: Organization and Efficiency, Manufacturing Activities. One or more sets in Manufacturing Accounting required for credit.

### **Com'l XII.—Auditing 6**

Object, Term, Kinds, Duties, Working Papers, Order of Procedure, Method, Detection of Errors, Proving Cash Balance, Audit of General Cash Book, Petty Cash Book, Sales Book, Purchase Book, Journal, Return Books and Voucher Register, Adjustment Entries, Preliminary Trial Balance, Profit and Loss Statement, Financial Statement, Conclusion, Balance Sheet, Auditor's Report. Sets worked out by students in former courses will be used in giving practical experience in this course.

### **Com'l XIII.—Commercial Law 1**

Definition, Moral Law, International Law, Municipal Law, Constitutional Law, Ecclesiastical Law, Common Law and Equity, Statute Law, Criminal Law, Civil Law.

Contracts: Parties, Consideration, Subject Matter, Mutual Assent, Time, Conditions. Kinds: Formal Contracts, Simple Contracts, Oral Contracts, Written Contracts, Express, Implied, Executed, Executory, Mutuality, Construction, Mistake Fraud, Duress, Statute of Limitations, Insanity, Infancy, Married Women, Statute of Frauds, Sales of Goods Act, Discharge of Contract, Legal Tender, Bankruptcy, Sale of Personal Property: Sale and Barter, Bailment, Personal and Real Property, Fixtures and Chattels, Parties to a Sale, Factor, Pledge, Potential Existence, When Title Passes, Chattel Mortgage. Warranty: Express, Implied, Rights of Vendors, Rights of Vendee, Stoppage in Transitu.

Negotiable Instruments: Statute Law, Essential Elements, Negotiable in Form, Notes, Checks, Drafts, Bill of Exchange, Indorsement Acceptance, Certified Checks, Presentment, Waiver, Protest, Accommodation Paper, Forgery, Interest, Usury.

### **Com'l XIV.—Commercial Law 2**

Agency: General Agent, Special Agent, Relation of Principal and Agent, Power of Attorney, Obligation of Principal to Agent, Obligation of Agent to Principal, Obligation of Principal to Third Party, Obligation of Agent to Third Party, Liability of Principal for Torts and Wrongs of Agent, Termination of Relation of Agent and Principal.

Bailment: Benefit of Bailor, Benefit of Bailee, Mutual Benefit, Lien, Innkeepers, Common Carriers, Carriers of Passengers, Baggage, Partnership, Articles of Co-Partnership, Oral Partnership, Implied Partnership, Rights of Partners, Capital, Good Will, Liability to Third Party, Remedies Against the Partnership, Dissolution, Joint Stock Companies.

Corporations: Public Corporations, Private Corporations, Powers and Liabilities of Corporations, Dissolution, Membership, Stockholders, Common Stock, Preferred Stock, Management, Rights of Creditors of Corporations.

Insurance: Organization, Fire, Tornado, Life, Casualty, Employer's Liability Insurance, Fidelity, Credit, Plate Glass, Elevator, Steam Boiler.

Real Property: Corporeal and Incorporeal, Fee Simple, Life Estate, Tenant for Life, Emblements. Estates by marriage: Courtship, Dower, Homestead, Sale, Deed, Quitclaim, Warranty, Mortgages, Landlord and Tenant.

Courts and their Jurisdiction, Pleading and Practice.

## **SHORTHAND**

Text: Gregg Shorthand Manual.

Five periods a week. One credit.

Shorthand I (Com. 17) A study of the principles given in the Gregg Shorthand Manual. Lessons I to XI inclusive; elementary sounds and their shorthand representatives; word building; word signs; phrasing; reading and writing simple sentences; supplementary reading from the Gregg Writer plates.

Shorthand II (Com. 18) A continuation of Shorthand I, completion of the Manual; derivatives; abbreviation; advanced phrasing; short vocabulary; practice in writing and reading simple business letters.

Shorthand III (Com. 19) Review of the fundamental principles and phrases through practice in writing exercises especially arranged for their application; drills in writing proper names and derivatives; dictation from various phases of commercial work for speed practice; supplementary reading for the purpose of cultivating a correct idea of form and proportion, and to acquire smoothness in reading from notes.

Shorthand IV (Com. 20) Speed practice in writing consecutive matter other than correspondence.

## **TYPEWRITING**

Text: Ross' Lessons in Touch Typewriting.

Ten periods a week. One credit.

Typewriting I (Com. 23) Lessons I to XXI inclusive; instruction in correct habits of position, touch, fingering, and care

and manipulation of the machine; a study of correct forms of letter writing and artistic arrangement of material; addressing envelopes and writing on cards.

Typewriting II (Com. 24) Lessons XXII to XXVI inclusive; rough draft copying, copying legal forms, carbon duplicating; tabulating; billing.

Typewriting III (Com. 25) Stencil cutting and use of the Neostyle; study of various machines; miscellaneous exercises for study of arrangement; machine dictation.

Actual correspondence, programs, outlines, etc., furnished by the different departments of the school afford a great part of the material for the work.

### THE TRAINING SCHOOL

W. A. Furr, A. M., Superintendent.

F. G. Warren, A. B., Principal, High School.

\_\_\_\_\_, Assistant in High School.

Willis G. Cisne, Supervising Critic, Junior High School.

\_\_\_\_\_, Critic, Junior High School.

Fadra R. Holmes, Supervising Critic, Intermediate Department.

Marguerite Hanford, A. B., Critic, Intermediate Department.

\*Alice Parkinson, Critic, Intermediate Department.

Florence R. King, Supervising Critic, Primary Department.

Lulu R. Clark, Critic, Primary Department.

All science and language work in the High School is done by Normal departments in these subjects: Manual arts, music, art, physical training, and industrial work is done under the supervision of the Normal departments.

The Training School is organized on the following plan:

1. An *elementary* school consisting of the first six grades.
2. A *secondary* school consisting of the second six grades.

The *elementary* school is organized into two units. The first three grades constitute the *primary department*, and grades four, five, and six, the *intermediate department*. Each of these units is under a supervising critic and assistant critics. The supervising critic devotes her time to the work of supervision, the observation, plan writing, and practice of the student teachers. The assistant critics teach regular classes for observation of student teachers, and give model recitations for the observations of students in the department of pedagogy.

---

\*Absent on leave.

The *secondary school* is also organized into two units. Grades seven, eight, and nine constitute a *Junior High School*, and grades ten, eleven, and twelve a *Senior High School*. There are no head critics in either of these units. The completion of units of work on the departmental plan is characteristic of the work in these units, and is taught by regular critic teachers and student teachers under close supervision of the critic teachers.

Normal School students who have completed two years of the five year course are admitted to *Practice One*. This first term's work will be devoted to reading, to observation under close supervision (based on reading done), to discussion based on reading and observation, to plan writing, and to an amount of teaching determined by the efficiency of pupil.

Practice Two and Three will come in the Junior and Senior years, following the work in psychology and paralleling sociology, or history of education. Practice Two will be devoted to teaching, to plan writing, and to observation of work done by the critic teacher. Practice Three will be devoted almost wholly to teaching under sympathetic supervision. The work will be as nearly like public school work as conditions will permit.

It is advisable for a student teacher to do work in each of the several departments of the Training School. But opportunity will be given to specialize in any one department. The work in the Senior High School will be limited to those students of maturity, experience and efficiency who expect to do work in our best secondary schools and are taking the degree courses.

While there will be a general uniformity in plan writing, yet each critic teacher or supervisor will use her own individuality in working out the details. Consultation periods, and special meetings will be worked out independently by each critic teacher. *No practice teacher, however, should have work in another department at the eighth hour*, as this will interfere with practice work

The larger supervision of the work of the Training School will require general meetings of all critic and student teachers. This work will be in charge of the superintendent. At such meetings a discussion will be made of the particular course of study—its origin in life, its unification, its lines of work, their function and unification in the twelve year course, the adaptation of the course to the child at different levels of his growth, etc. Special or division meetings will be held, at which time only those teachers immediately concerned will attend. At these meetings the details of work will be considered.

The equipment of the training school is such as to offer superior opportunities for the training of teachers. The school is housed in a modern building of semi-fireproof construction. The building is equipped with every sanitary convenience, including modern

drinking fountains. Through co-operation with the departments of Domestic Economy, Physical Education, Manual Training, Music and Art, we are enabled to offer typical programs of work in all of the newer subjects. A school garden, a textile room equipped with a large loom, and a large number of exhibits contributed by many manufacturing companies furnish abundant material for the interpretation and study of industries.

## **LIBRARY SCIENCE**

MARY LOUISE MARSHALL

### **The Library**

The Wheeler Library possesses a working library of some 30,000 books and 1,400 pamphlets. It is classified according to the Dewey decimal classification. There is a dictionary card catalogue with full analytical entries (author, title, subject, etc.). The books have been carefully selected with reference to the needs of the various departments. They comprise standard works in literature, travel, history, science, philosophy, pedagogy and art, and general works of reference, including dictionaries, encyclopedias, year books, atlases and books of quotations. All periodical literature, which is of permanent value is bound and made accessible by Poole's index, Reader's guide, etc. Over a hundred of the best current periodicals are received in the library, as well as many newspapers from the surrounding towns and counties. The library contains much bibliographical material on children's literature, many beautifully illustrated books for children by well known illustrators, lists of children's books, etc. Numerous government reports are received and catalogued.

The library is open daily during school hours and on Saturday mornings.

### **General Course in Library Methods**

The modern curriculum demands that, for successful school work, the library must be used by teachers and pupils. The laboratory method of instruction makes the library the vital center of the school course of study. Educators are coming to require of the teachers a first hand knowledge of books for children, and of sources of information. The teacher of today must know how to use a library intelligently, how to teach her classes to use it and must be able to direct the children's reading.

Since the library has become the supplement of the school course of study and the necessary laboratory of teachers and pupils, instruction in the schools in the use of the library is indispensable.

An elementary course in library science for normal school students and teachers who may have charge of small school libraries in rural communities and small towns, is being offered each term. One half credit is given for the course.

The aim of the work is not to train librarians, but to acquaint teachers with library indexes and helps invaluable in the preparation of their work, to prepare them for selecting books for supplementary work, for directing the children's reading, and making the school library valuable to pupils.

### PERIODICAL LIST FOR 1916-1917

The following magazines are received in the Wheeler Library:

- |   |   |
|---|---|
| Advocate of Peace (Gift)                          | Aus Nah Und Fern                          |
| Alexander County School Journal (Gift)            | Bird Lore                                 |
| American Boy                                      | Blackwood's Magazine                      |
| American Carpenter and Builder                    | Boletin de la Union Pan-Americana         |
| American Cookery                                  | Bookman                                   |
| American Educational Review                       | Book Review Digest                        |
| American Historical Review                        | Breeders' Gazette                         |
| American Iron and Steel Institute-Bulletin (Gift) | Bulletin of the Chicago Public Library    |
| American Journal of Psychology                    | Bulletin of the Pan-American Union (Gift) |
| American Journal of Sociology                     | Business Educator                         |
| A. L. A. Book-list                                | Century                                   |
| American Machinist                                | Christian Science Journal (Gift)          |
| American Magazine                                 | Classical Journal                         |
| American Magazine of Art                          | Classical Philology                       |
| American Mathematical Monthly                     | Commoner (Gift)                           |
| American Penman                                   | Contemporary Review                       |
| American Physical Education Review                | Country Life in America                   |
| American Red Cross Magazine (Gift)                | Craftsman                                 |
| Annales, Les                                      | Cumulative Book Index                     |
| Annals of the American Academy                    | Current Opinion                           |
| Apostolic Review (Gift)                           | Dial                                      |
| Arts and Decoration                               | Drama                                     |
| Association Men                                   | Edinburgh Review                          |
| Association Monthly                               | Education                                 |
| Atlantic Monthly                                  | Educational Bi-Monthly (Gift)             |
|   | Educational Press Bulletin (Gift)         |
|   | Educational Review                        |
|   | Elementary School Journal                 |

Spring Term, 1917.....	1,114
Total . . . . .	3,933
Names counted more than once.....	1703
Number of individual students enrolled during the year exclusive of Training School .....	2,230

#### TRAINING SCHOOL (Grades 1-8)

Fall Term, 1916 .....	130
Winter Term, 1917 .....	138
Spring Term, 1917 .....	131
Total . . . . .	399
Names counted more than once.....	253
Number of individual students in Training School.....	146
Entire enrollment of individual students in all departments.....	2,376

ALUMNI REGISTER

COMPILED BY D. B. PARKINSON, PRESIDENT EMERITUS

Until the year 1914 the Annual Catalog of the Southern Illinois Normal University contained a list of the graduates of the institution only in the order of the years. The Alumni register naturally increased in length from year to year, till it added very materially to the bulk of the catalog and to the expense of printing and mailing the same.

Since the Annual Catalog of the institution is the best means of presenting to the public and the prospective students its courses of study, entrance requirements, rates of tuition, etc., the demand for its circulation became great. To a large majority of those desiring the information named, there was but little interest in the list of those who had graduated, especially in the earlier years; and yet those who have graduated retain a deep interest, not only in the above information relative to the progress of the school, but in the work and whereabouts of their fellow graduates.

In view of these conditions it was decided to publish a separate bulletin, putting into accessible form the more salient facts regarding the work and addresses of those who have graduated; first in the order of graduation, by *classes*, and following this, an *alphabetical* list, giving in addition the year of graduation and the register number.

On account of the additional expense the former method is resumed, at least for the present.

The older and larger an educational institution becomes, the greater is the number of those who have gone from it bearing its special seal of approval and commendation. These have, as a rule, a deeper interest in the institution and are pleased to receive its literature, especially the more formal publications.

In order that the institution may keep the mailing list of its graduates approximately correct, it is apparent that each graduate must do his individual part in furnishing the institution, annually, the desired information. More especially is this necessary when the address is changed. Because of this lack of cooperation, the institution mails out quantities of printed matter that never reach the persons addressed; and not being first-class mail matter, it cannot be forwarded or returned without additional postage.

A request, frequently made in the past, is here repeated, and with emphasis and cordality, that each graduate make it a special duty to keep this important matter in mind and report to the President of the school, not later than January first of each year.

OFFICERS OF THE ALUMNI ASSOCIATION  
FOR  
1916-1917.

President . . . . .	Lieut. J. Rockweell Bryden, 1887
Vice Pres. . . . .	Miss Mary Crawford, 1897
Secretary . . . . .	Mrs. Leah McGahey Reef, 1896
Treasurer . . . . .	Judge Herbert A. Hayes, 1905
Historian . . . . .	Mrs. Adella G. Mitchell
Chairman of Executive Committee . . . . .	Judge H. A. Hayes, 1882

Data covered by the Register: Reading from left to right—1, Alumni No.; 2, Name; 3, Number of years taught since graduation; 4, Present occupation; 5, Present address; 6, Course completed.

Interpretation of characters used in register: Single star (\*), deceased; double star (\*\*) paid tuition; Dagger (†), class historian; Question mark (?), address uncertain; *Italics*, course completed.

## ALUMNI REGISTER

(By Classes.)

## Class of 1876

1. Brown, John N.—(6)? *Eng.*
