Article by Alum

Miss Ann McCann, remedial reading teacher at Township High School, has gained national recognition recently through the publication of an article on “Continuing the Reading Program in the High School” in the “Teachers Service Bulletin in Reading” issued by the Macmillan Company. One hundred thousand copies are being distributed in schools throughout the country.

A 1940 graduate of Southern, she also has a master of arts degree in education. Miss McCann has taught in Belleville for six years. Previously to this she had done similar work at the East Alton Public Schools, had been a supervisor at the training school in Carbondale, taught during a summer at St. Louis University.

A frequent for the article was made two years ago by Miss Marie Roth, reading consultant for the Macmillan Company, one of the largest publishers of educational materials. Miss McCann submitted her article last August.

Miss McCann states in her article, a continuation of a special reading program from the elementary to the high school for those students “who have tried to read, understand, and to interpret the experiences offered them in the books, and who yet, for various reasons, must be helped.” The individual students themselves, have not been capable of reading successfully at any grade level.”

She lists as causes of failure in high school reading: physical handicaps, mental immaturity, social misadjustments, limited background of experience, the feeling of continued failure, lack of interest in the home, and the too frequent inability of the crowded school to give the necessary individual attention.

Her suggested remedies include individual diagnosis, a separate class, a grounding in an entire language art program, and continued checking and testing of the student’s progress.

The remedial reading clinic at the local school, on which Miss McCann has based many of her observations, has had wide recognition for its program, its equipment, and its results.

Distinction Goes To SIU Alumni Association

The Southern Alumni Association received one of the several Burton W. Armstrong Memorial American Alumni Council at the district meeting in Chicago Nov. 29-Dec. 1.

A resolution outlining a proposal for the American Alumni Council and the American Association of Universities in Europe to be combined and suggest that the armed forces radio facilities made available for the organization of alumni clubs of various universities and colleges in sign countries was selected as the best to be introduced. The resolutions on organization of alumni clubs and on increasing alumni membership.

This resolution was suggested by the Illinois Alumni Services, that stated that preparation should be made now for such programming so that in case there is a world wide conflict, American students would be able to maintain some contact with their individual programs while they attended their alma mater.

A portable display featuring the utilization of “Black List” to illustrate the proposed campus plan for 1970, that welcomed favorable comment from the British curb across the ocean and other universities and colleges including T. Hasbrow Topping, national president of the American Alumni Council. He suggested that Ms. Collins had the student consider the construction and usefulness of a United Alumni Council News, official publication of the Council.

TRUSTEES DECIDE ON FUTURE BUILDINGS IN SPECIAL SESSION

Plans to go ahead with the construction of four buildings were made by the University Board of Trustees at a special session called for December 9. The plans are for new buildings—life science, service shop, arts and physical education and industrial education wings for the new training school, will be begun as soon as funds are released.

Earlier plans included partial demolition of the old barn to provide room for the transitions to the four buildings as of December, 1970. It was necessary to trim the program temporarily to bring it in line with money available.

Although the library projects made by the University Board of Trusties, the amount cut was from $50,000 in the library project the order of $25,000 was cut for the order of Greek work in the proposed school.

The building plans carry with them a sadness. The building projects were brought to the house in the memory of Dr. L. E. Brown, Board chairman, and that he hoped the funds would be made available next year.

Burglaries Reported In 3 Campus Offices

A series of burglaries occurred in December. In December, office week-ends stayed at the equipped room of the men’s gym, the room of the second floor of Old Main, and the Clay Clay Tilton library near door.

A desk drawer in the library was broken into, and some of the history departments, and some stamps were missing.

MRS. HART ACCEPTS TIME CAPSULE FOR ALUMNI

A 600 pound navy shell casing was erected on a landing in front of Shroyer Auditorium as the first stop in preparation for Southern’s centennial celebration to be held in 1974.

The capsule serve as a time capsule, and it contain a history of the university for the next 25 years. It will be a 1000 pound metal canister, and a tape recording of the history of the capsule. The project is sponsored by the Alumni Council.

State Selective Service Man Draws Grim Picture For Future College Delegates

On the ninth anniversary of Pearl Harbor, Colonel Paul G. Armstrong, Illinois State Director of Selective Service, told Southern students and interested parties that future deferments for college men will be few.

In a special meeting to clarify plans to go ahead with the Illinois Selective Service and procedures, Colonel Armstrong said that if a three and one-half million army to be raised from the age brackets of 19 through 60, only 500,000 of that group can possibly hope to be deferred. He pointed out that many of men in that age group are already in service, while others have dependents, or are unfit for service because of physical and mental handicaps.

From this 40,000 men to be deferred must come students, teachers and other who work in essential industry. It may become necessary to enlarge the manpower poll by ex-smokers, and to draft veterans and men with dependents.

Under the present law, a man is exempt from the draft if he served in the armed forces at least 90 days before Sept. 2, 1943, or if he served for one year prior to June 3, 1943.

Major Robert J. Turnbull, chief of the Illinois manpower division, who accompanied Colonel Armstrong, made it clear that there is little likelihood of any student being deferred for more than the current school year, unless the international situation grows much stronger. He pointed out, however, that medical students and dental students, might be expected to defer as long as they remain in good standing in their school work.

“Men cannot be allowed to en- list in other branches just as they are ready to be drafted because the army is greatly in need of leaders and skilled men,” Major Turnbull said. He emphasized that each man induced into the army would be given a reasonable chance to attend Officers’ Candidate School, and that college graduates and college students would stand an exceptionally good chance of being deferred for further specialized training.”

BISHOP NAMED TO NATIONAL SOCIETY

Dr. Leodfo Bischof, assistant professor of guidance and special education, has been voted an associate member of the American Psychological Association.

This is a national association open only to those who have done outstanding work in the psychological field.

Dr. Bischof is a 1940 graduate of Illinois State University, and has had additional training in education and psychology.

Armstrong University for the Historic Celebration

The shell will be opened on the occasion of the University’s centennial celebration.

The shell will serve as a time capsule, and it contain a history of the university for the next 25 years. It will be a 1000 pound metal canister, and a tape recording of the history of the capsule. The project is sponsored by the Alumni Council.
CLEARING THE AIR
THE SOUTHERN PIONEERS
By Wayne M. Mann

A distinguished university becomes noted often because of the assistance and guidance offered by outstanding alumni. Southern, in its new role as an institution higher with the name "University," is yet on trial.

The future should hold responsibility for the many involved in setting forth a program to suit the needs of a greater institution.

Since Southern was founded in 1874, 45,000 students have attended the school. Thirty thousand are still living to carry on in furthering our society. In this group there are probably a few who have reached positions of importance and could assist in the formation of a better program for the institution. Providing a means where such support could be utilized, the Southern Illinois University Alumni Association is instituting a new club called THE SOUTHERN PIONEERS.

Membership in this group will be open to those who contribute support and support by a yearly fee of $100. This money will be spent according to the dictates of the club members who shall meet once a year. A special dinner will be held at a time and will be allotted for discussion of pertinent topics.

University President D. W. Morris made this statement concerning the Southern Illinois Pioneers: "This group is a club that can promote a feeling of loyalty among those who are able to contribute their time, effort, and support to a greater Southern." It is a club that can promote a feeling of loyalty among those who are interested in becoming charter members of one of the important organizations of the Southern Illinois University Alumni Association. Tentative plans of the council are laid today of the matter that will mold the future history of Southern.

STUDENT COUNCIL ACCEPTS WSC RESIGNATION

The Weekly Student Council, as a result of the resignation was accepted of the WSC (Western Southern Club) yesterday, at the previous meeting of the Council.

To know the Student Council is grateful for the service performed by the WSC and appreciates the cooperation given the school.

As a result of the resignation, the Student Council moved to form a committee which will organize and co-ordinate all university social activities.

Tentative plans of the Council are to set up a committee including representatives from all major campus organizations.

The Teachers College Years of Development

The election of Professor H. W. Shryock as Dr. Parkinson's successor was an event in October, 1913. The library, then housed in the old Honors Building, was completed by mid-January. The board, Orville M. Karraker, chairman, had the task of choosing a new head of the English department. There were many faculty concerns other than a filled board, with its own plans of action. The teachers college status had been a source of pride for many years, and tenured faculty wanted to see their hard earned vacation time advance their scholarly standing.

Dr. Robert Allyn was in the curriculum, a Model School, and a large increase in staff satisfaction. At least a master's degree, (3) an increase of an enlarged, (4) an enlarged, (5) the use of college athletics, (6) the use of college athletics, (7) the use of college athletics, (8) the use of college athletics, (9) the use of college athletics, (10) the use of college athletics.

To raise Southern's standing within the state and among sister institutions and the broad scope of general education, the plan was to have a college curriculum. There was no college curriculum.

There were many improvements to the curriculum, a Model School, and a large increase in staff satisfaction. At least a master's degree, (3) an increase of an enlarged, (4) an enlarged, (5) the use of college athletics, (6) the use of college athletics, (7) the use of college athletics, (8) the use of college athletics, (9) the use of college athletics, (10) the use of college athletics.

To raise Southern's standing within the state and among sister institutions and the broad scope of general education, the plan was to have a college curriculum. There was no college curriculum.

ALLYN BUILDING TO BECOME MODERN ART CENTER

The Allyn b building, constructed in 1907 as a training school, will soon be converted into a new and expanded modern art building.

Studies, classrooms, and offices of the art department will all be housed in the former barracks for the first time in years. At present, the art department is located in three different buildings, Old 400, a far away from a former residence.

Burnett H. Shryock, new art department chairman, explained, "We have plans under way which show the smallest pieces of finest space setups for an art department to be found in any university."

It is planned to use the basement of the building for classes in ceramics, sculpture, graphic arts, design, and drafting. Offices, painting and drawing studios and education workrooms will make up the first floor. The second floor will have a modernly equipped art history and art appreciation building. All space will be utilized with every possible combination of art supply, art material, and art equipment. Special art supply, art construction, and art behavior galleries and the entrance to the building used as display areas will be added.

"Since we feel our duty to offer our students a comprehensive art education in the Southern Illinois area," Mr. Shryock said, "exhibit space to house artists as well as student work and traveling exhibitions of prominence will be included.

The Art building, as Allyn will soon be known, is being made possible by funds from the sale of the property of the old cannery on Thompson Street, the art building for all who wish to obtain a degree in fine arts, design, and drafting. Offices, of the Veterans Administration, and the Veterans Housing Project which occupied the houses on Grand were moved before the Christmas holidays to 1015 Thompson street on U. S. route 61.

Have You Received Your Obelisk?

Former students who attended SIU during 1949-50 are urged to write the Obelisk office if they have not obtained their copy of the yearbook.

To be eligible for a book without cost, the student must have attended for three quarters (or two quarters and one summer session) during 1949-50. Those who attended less than three quarters of the time period may obtain a book by sending a letter to Ms. Elizabeth J. Allen, Little Theatre Auditorium, SIU, Carbondale.

Little Theatre Audience To Get On Stage

The entire audience will be seated on the auditorium stage for the production of the winter play, "Ladies in Retirement," which will run for two nights Jan. 17-18. Reasons for the seating reversal is that the Little Theatre will be using central staging for the first time. Actors will play against the back wall of the auditorium, and one side of the stage will be bounded on three sides by the audience. Scenery will be reduced to a minimum.

Many of the parts have been double-cast so that a different cast will play each night, according to Dr. Archibald Macleod, director of dramas.

LaDunne Rymyer, senior, accepts the first scholarship to be awarded by the Grand Commandery of Knights Templar of the State of Illinois. Charles Pardee, assistant professor of history is shown giving LaDunne the award while I. Clark Davis, dean of men, looks on.

DR. TUDOR TO TEACH IN GREEK UNIVERSITY

Dr. William J. Tudor, associate professor of sociology, has accepted an offer from the University of Thebes to teach and conduct advanced research in Greece.

His appointment is in the sociology department at the Superior School of Agriculture at Athens, left for Greece on Dec. 27, and will begin his duties around the first of the year. He will return to the U. S. sometime during June of 1961.

MUSIC DEPARTMENT IS ACCREDITED BY NASM

University officials have been informed that the music department has been recognized as a full accredited member of the National Association of Schools of Music.

NASM is the only accrediting body for departments and schools of music in the United States and Canada. To date, SIU is the second state university in Illinois to be recognized by the association.

MILLIKIN PLAYING TUNE ON NETS

Captain Tim Millikin doesn't profess to have taken any music lessons, but he has certainly been playing a world tour on the nets in Southern's basketball games this year. The 6'7" Pinckneyville ace has scored 95 points in 4 games at this writing for a scorching 25-point per game average. To make the statistics even more impressive, the crows-crowed had an even 25-point average in conference play thus far. He dropped 27 points against Central Missouri and 25 against Michigan Normal. The staggering total puts him at the very top of conference scorers at this early date.

Last year, in his sophomore season, Millikin set an all-time Southern scoring record for conference play, and the way things look he'll surpass even that total this year.

Millikin, surprisingly enough, got off to a comparatively slow start this year. He hit 18 against Southeastern Louisiana, and 15 against Cape. But in the initial road trip of the campaign, he really cut the thunderbolts against the aerial ambitions of the Michigan loop members. Needless to say, Millikin is already on his way to his most glorious cage success yet. He said: "My cage achievements against the Michigan loop members. Needless to say, Millikin is already on his way to his most glorious cage success yet. He said: "My cage achievements against the Michigan loop members. Needless to say, Millikin is already on his way to his most glorious cage success yet. He said: "My cage achievements against the Michigan loop members.
