\* Opening day of term.

\*\* Closing day of term.

† Closing day of Spring Term and opening day of Summer Term.

The school will be in session seven Saturdays within the Summer Quarter.

† Annual Home Coming.

Fall Term, 1924, opens Monday, September 22.

Fall Term, 1924, closes Friday, December 12.

Winter Term, 1925, opens Monday, December 29.

Winter Term, 1925, closes Friday, March 20.

Spring Term, 1925, opens Monday, March 30.

Mid-Spring Term, 1925, opens Wednesday, May 6.

Spring and Mid-Spring Terms, 1925, close Wednesday, June 17.

First Session Summer Term, 1925, opens Wednesday, June 17.

First Session Summer Term, 1925, closes Friday, July 24.

Second Session Summer Term, 1925, opens Saturday, July 25.

Second Session Summer Term, 1925, closes Friday, August 28.

### HOMEcoming.

Friday-Saturday, November 7 and 8, 1924. Two days of reunion and entertainment.

Friday—

Athletic stunts, reception, "Strut and Fret" play.

Saturday—

Society reunions, Cape Girardeau — Carbondale foot-ball game; alumni banquet.

## **FACULTY.**

1924—1925

Henry William Shryock, Ph. B., President, Head of English Department

Emma L. Bowyer, A. M., Grammar, Acting Head of English Department, Junior Examiner and Adviser

Mae C. Trovillion, A. M., Dramatic Art

Elizabeth C. Hickson, A. M., Faculty Head of Anthony Hall

\*Elizabeth A. Cox, A. M.

Mary Henderson, A. B.

### **Education:**

George D. Wham, B. Ed., Senior Examiner and Adviser.  
Dean of Faculty

### **Language:**

AUDITORIUM

First—*A four year elementary school certificate valid for teaching and supervision in the elementary schools and in the first and second years of the high school of any district in the State for which the requirements shall be:* (1) Graduation from a recognized high school and from a recognized normal school, or an equivalent preparation; (2) three years' successful teaching, two of which shall have been in the State on a first grade county certificate; (3) a successful examination in English, educational psychology, and the principles and methods of teaching, and (4) the preparation of a thesis on one or more elementary school problems, the subject or subjects of which shall be selected from a list prescribed by the Superintendent of Public Instruction.

Second—*A four year high school certificate valid for teaching and supervising in any high school and in the seventh and eight grades of any district in the State for which the requirements shall be:* (1) Graduation from a recognized college or university, or the completion of an equivalent preparation; (2) three years' successful teaching, two of which shall have been in the State on a first grade, a high school, or a supervisory county certificate; (3) a successful examination in English, educational psychology, and the principles and methods of teaching, and (4) the preparation of a thesis on one or more secondary school problems, the subject or subjects of which shall be selected from a list prescribed by the Superintendent of Public Instruction.

Third—*A four year supervisory certificate, valid for teaching and supervising in all grades of the public schools in any district in the State.* The requirements for this certificate shall be: (1) Graduation from a recognized high school and from a recognized normal school, or an equivalent preparation; (2) three years' successful supervision, two of which shall have been in this State on a county supervisory certificate; (3) a successful examination in English, educational psychology, sociology, the history of education, and school organization, administration, and supervision, and (4) the preparation of a thesis on one or more problems of school administration, the subject or subjects of which shall be selected from a list prescribed by the Superintendent of Public Instruction.

SEC. 6. County certificates granted by the county superintendent and the requirements for the same shall be as follows:

First—A second grade elementary school certificate valid for two years in the first eight grades of the common schools of the county and in the ninth and tenth grades when endorsed for the same by the county superintendent. This certificate shall be renewable on evidence satisfactory to the county superintendent of six months' successful teaching or twelve weeks' professional training, and a second time if in the period following the date of issue the holder shall have acquired eighteen weeks professional training in any recognized school providing such training, and, thereafter, the same shall be renewable indefinitely for periods of two years upon evidence of successful teaching and professional growth satisfactory to the county superintendent. The

applicant for this certificate shall be examined in orthography, civics, Illinois history, physiology, penmanship, reading, grammar, geography, United States history, arithmetic, *general science*, pedagogy, and the principles and methods of the State course of study. *Graduation from a recognized high school or an equivalent preparation shall be required for admission to the examination. At the option of the county superintendent this certificate may be issued without examination to persons who have completed the junior year's work in a recognized normal school or its equivalent.*

Second—A first grade elementary school certificate, valid for three years in the first ten grades of the common schools of the county, and in the high school when endorsed for the same by the county superintendent. This certificate shall be renewable indefinitely for periods of three years, upon evidence of successful teaching and professional growth satisfactory to the county superintendent. The requirements for this form of certificate shall be: (1) Graduation from a recognized high school, or an equivalent preparation; (2) six months of successful teaching, and (3) an examination in orthography, including spelling, civics, Illinois history, physiology, arithmetic, pedagogy, English, algebra, general history, and any three of the following natural sciences: botany, zoology, physics, chemistry and physiography. *This certificate shall be issued to graduates of a recognized normal school, or from an institution offering an equivalent preparation, provided the applicant has had one year of successful practice teaching, and applies for the certificate within three years after graduation.*

Sixth—A special certificate, valid for two years in the common schools of the county, renewable for two-year periods. Such certificate shall be issued in music, drawing, agriculture, manual training, domestic science, domestic art, physical training, penmanship, bookkeeping, German, and such other subjects as may be added by the Examining Board and shall authorize the holder to teach only the subject or subjects named in the certificate. The requirements for this form of certificate shall be graduation from a recognized high school, or an equivalent preparation, and a certificate showing the completion in a recognized higher institution of learning of at least two years' special training in the special subject or subjects, certified credits in English and the principles and methods of teaching, and satisfactory evidence that the applicant has taught or can teach the subjects successfully. In lieu of such special training and certified credits a special certificate may be obtained by an examination in English and the principles and methods of teaching and in the special subject or subjects. (As amended by an act approved June 23, 1915.)

SEC. 7. The county superintendent is hereby authorized to issue a *provisional certificate valid for one year* to persons of his or other counties who fall below the required *minimum or average in an examination for second grade certificate. This certificate may be issued without examination to persons who have completed two years of work in a recognized normal school, or one year of such work if the applicant is a graduate of the tenth grade.* Such certificates shall be desig-

nated on their face, "Provisional," and the same shall not be renewable or issued the second time to the same person.

#### LOCATION, ETC.

Carbondale is a city of nearly 7,000 inhabitants, with many refined people. It is easy of access, and offers inducements for board and social advantages beyond most places of its size. It has, perhaps, fewer temptations to idleness, and combines religious and educational privileges in a degree greater than the average town of its size. Parents may be assured that their children will be as safe as in any school away from home, and students may come here and feel assured that economy and industry will be respected and honored by their fellow students and by the faculty. The Illinois Central Railroad affords ample facilities for convenient access, three of its branches passing through Carbondale.

#### TERMS OF ADMISSION.

All applicants for admission must present evidence of good moral character and, to secure free tuition, they must agree to teach in the public schools of the State for a time not less than that covered by their attendance upon the school. This agreement must not be entered upon unless the applicant fully intends to teach. It may become void, however, if engagement to teach cannot be secured by reasonable effort. In case of a permanent change in plan, the individual is expected to pay to the registrar of the Institution the difference between the regular tuition for the entire time and the incidental fees he has paid.

Those who hold scholarships under the Lindley Bill are not expected to sign the agreement to teach and are admitted without the payment of any fees.

An eighth grade graduate may enter the six year course without examination. A student with evidence of completion of ninth grade work is admitted to the second year of the six year course. A tenth grade graduate may enter the third year of the six year course. A student holding either second or first grade certificate, and who has taught eight months or more, may be permitted to take examination on one or more units of the sixteen secondary year-credits required for college entrance. The University of Illinois will accept these examination credits for entrance, provided they are taken within the first year of attendance and do not exceed eight year-units. None may take an examination in any course after he has had a more advanced course in the same subject. A student without entrance credentials may take examination on such recognized secondary units as he may select.

All other entrance requirements and all graduation requirements are provided for in the following rules adopted by the Board of Trustees of the five Normal Schools:

## A.

## ENTRANCE REQUIREMENTS.

I. *High School Work:*

1. Graduates of any recognized four-year high school or academy may be admitted to any standard two-year or other curriculum of college rank.

2. Fifteen units of entrance credit from a recognized high school shall be the minimum requirement for admission to such standard curriculums of college rank.

3. Fewer than fifteen units of entrance credit from recognized high schools may secure admission to the longer curriculums for non-high school graduates, or shall be counted for conditional admission to the curriculums of college rank.

4. Students from non-recognized high schools, academies, and the like may be admitted on the same terms as from recognized high schools, but no entrance credit shall be accepted from the non-recognized high schools until the student has completed successfully one year's work in the normal school and has thereby established a basis for his rating.

## B.

## ADVANCED STANDING.

1. Credits for advanced standing may be obtained:

a. By transfer from recognized higher institutions.

b. By examination.

c. By earning the credit by work done in, or under the direction of the normal school.

2. Students coming from state normal schools in other states whose standards are the same as obtain in Illinois may receive full credit for the work accomplished in such schools.

3. Students from city teacher-training schools in Illinois shall receive credit only after the training school has been inspected by a member of the faculty of the normal school in whose supervision district the training school lies, and his recommendation confirmed by the action of the normal school president's council.

4. No credits shall be given for high school work in excess of the units required for graduation.

5. No credit except by examination shall be given for work done in business college or like unrecognized institutions unless such credit is recommended by the teacher in the normal school in whose class the student has done one term's work.

6. Graduates of recognized colleges and universities may be admitted to a one-year curriculum.

7. Undergraduates of recognized colleges and universities may enter the normal school and receive credit for such of their college work as will apply to the curriculum upon which they enter.

C.

## GRADUATION REQUIREMENTS.

1. The requirements for graduation in the standard two-year curriculum shall be 24 credits beyond the entrance requirements.

2. By a *credit*, or *term credit*, is meant the amount of work done in a term of twelve weeks in a subject requiring daily preparation by a typical student carrying four studies and reciting five times a week in each.

3. Recitation periods are 45 minutes in length, laboratory period 90 or 95 minutes. Ninety minutes is assumed to be the average amount spent in preparing each daily recitation.

4. The terms *half-credit* and *quarter-credit* may be used with their obvious meaning for six weeks courses, or courses not requiring daily preparation.

5. Students may be allowed to make two credits in physical education.

6. Exceptional students may be permitted to take 25 hours of work per week. By exceptional students are meant mature students already familiar with the subjects to be taken, or other students whose previous standing is in the upper fourth of their classes.

7. No student shall be graduated from any Illinois state normal school unless he shall have done one year's resident work in that normal school.

## Expenses.

## TUITION.

To those who sign the agreement to teach, tuition is gratuitous; but the ruling of the Board of Trustees of the Institution requires that there shall be an incidental fee charged. At present this fee is \$2 for the term of twelve weeks, and \$1 for the summer term. The rates of regular tuition in the different departments are as follows:

	Summer Term.	Fall Term.	Winter Term.	Spring Term.
Normal (Resident of Illinois).....	\$3.00	\$6.00	\$6.00	\$6.00
Training School .....	.....	3.00	3.00	3.00

No fee will be charged for the first two years of the six year course.

## ANTHONY HALL.

With the beginning of the Fall Term, 1913, the Woman's Building, Anthony Hall, was opened. This model school home for girls will accomodate about seventy students. It was erected and furnished at a cost of \$75,000, and every possible provision has been made for the comfort, safety and well-being of its inmates. Board and lodging in this ideal boarding house will be furnished at \$6.50 per week. We reserve the right to charge a higher rate if it becomes necessary.

A deposit fee of \$5.00 must accompany each application for room.

For the accomodation of the students a bank is maintained in the office of the Registrar, and the students are urged to transact their business through this bank, provided they have not already established relations with one of the local financial institutions.

### OTHER STUDENT HOMES IN CARBONDALE.

Much of a student's success depends upon the conditions at his boarding and rooming place. He must have not only fresh air, pure water, wholesome food, even temperature and good light in his study room but also favorable conditions for study and for sleep. The following conditions as applied to rooming places meet the approval of the faculty:

On the part of the householder—

1. Men and women not to room in the same house.
2. Premises hygienically clean and supplied with good, sanitary water.
3. Good light in study rooms and rooms heated to not less than 68 degrees.
4. Telephone accessible.
5. Parlor furnished at reasonable times.
6. Reports to the University authorities of the illness of students, and of habits of study, sleep, or recreation on the part of students if these are likely in any way to injure the health, reputation or character of the student, or to interfere with the success of his work in school or to bring discredit upon the school.

On the part of the student—

1. Quiet and order in the house at all times.
2. Proper care of furniture and premises.
3. Repair of damages beyond ordinary wear.
4. Householder to be notified when students expect to be away from the house later than 10:30 P. M.
5. Absence from town to be reported to the householder and address left.
6. Vigorous co-operation on the part of both student and householder, in cases of contagious diseases within the house, to prevent the exposure of others and the spread of the disease.

There are three modes of living practiced by the students.

1. Board and room in the same house. The cost of board and room is from \$6.00 to \$9.00 per week.

2. Room with light-housekeeping. Students who practice light-housekeeping are able to reduce their living expense as low as \$4.00 a week. The average cost of meals of those who reported their expenses for the year 1920-1921 was less than \$3.00 per week.

3. Rooms without the privilege of light housekeeping. Such rooms, two persons to the room, cost \$1.50 to \$2.50 per week per person.

Be sure to have it clearly understood how many are to occupy the room with you. Except in unusual cases, the committee believe that two in a room secures the best results.

No contract for a room will be considered binding unless a deposit amounting to one week's rental shall be paid. Said deposit need not be returned, unless the renter has good reasons for failing in his part, and not even then, except he notify said landlady before the term of school opens.

All students are urged to consult the Committee on Boarding Places before engaging rooms.

Committee: E. G. Lentz, 520 S. Normal Ave.  
W. M. Bailey, 701 S. Poplar St.  
Geo. M. Browne, 902 S. Normal Ave.  
Mary M. Steagall, 808 S. Illinois Ave.  
Lucy K. Woody, 703 S. Poplar St.

### **Free Instruction in Instrumental Music.**

The free instruction in violin and other stringed instruments, cornet and other brass instruments, has proved very successful. Encouraged by the interest in the violin, cornet work, etc., the management has opened three music rooms, each provided with a piono, and an organ has been added to the equipment, so that any student who wishes to prepare himself to lead the music in his school with either the organ or piano, may be accommodated.

## **LITERARY SOCIETIES.**

### **ZETETIC AND SOCRATIC.**

During the first term of the first year of the Institution, September, 1874, the Zetetic Literary Society was organized. Later in the year a sister organization was planned for, and in due time was thoroughly established and christened the Socratic Literary Society. These have a large membership and are well attended.

The more elaborate exhibition of what these societies are able to do is annually given to the public on Monday and Tuesday evenings of Commencement Week.

The varied programs of these literary societies from week to week add very materially to the work of the English department in securing additional practice in the delivery of original and other matter, and in the opportunity for becoming acquainted with parliamentary usages, thus fitting the Normal student for more intelligent service in the communities in which he may labor.

The Faculty and Board of Trustees foster, with much care, the best interests of these valuable adjuncts to the literary work of the Institution. Their usual time of meeting is on Friday evening of each week in the halls provided by the University.

**ATTENDANCE UPON CHURCH.**

Students are urged to identify themselves at an early date after entering the Normal School, with some church of the city. It is assumed, of course, that the student will affiliate with the church to which he belongs at home, or with which he is most in sympathy as to doctrine and modes of worship.

**Christian Association.**

The Young Men's Christian Association and the Young Women's Christian Association each has a well-conducted organization, which meets weekly in a room fitted for their use on the second floor in the Library Building. Their committees look after new students upon their arrival, and those who may be sick while attending school, and in many ways minister to the wants of their fellow students. Several classes in Bible study are maintained by these societies. The State college secretaries of each of these branches of Christian work pay the Institution a visit twice a year, or oftener, for conference and direction of work. New students upon their arrival may recognize the representatives of these associations by special badges worn, indicating their willingness to render their kindly services whenever needed. These persons may be trusted implicitly in directing strangers to boarding houses and clubs.

**AGRICULTURAL CLUB.**

The Agricultural Club is a department organization, and has grown from a charter membership of five, eight years ago, to a present membership of over one hundred forty. It meets every Wednesday evening. The programs are in the main agricultural. Topics on soils and crops, livestock, horticulture, and community work with ways and means of accomplishment are discussed.

The club stands for the social interests of the institution, and for the higher ideals of student friendship. Several meetings of this nature have been held during the year when members of the club invited their friends. A big "round up" meeting for closing the year's work is now being planned.

Students taking an agricultural subject are urged to join the club, and assist in promoting a better student fellowship.

## SENIOR COLLEGE COURSES.

### Courses for Ed. B. Degree.

The course leading to the degree of Bachelor of Education covers two years beyond Junior College, and one year, at least, must be in residence. Twenty-four credits are required for the degree, all of these credits being in addition to and more advanced than those for which the Normal diploma is given. The candidate for the degree who offers credits from some other school or earned otherwise than in regular class attendance, must satisfy the Committee on Degree Course that the work has been of equal value with the corresponding study in the Degree Course.

Where not otherwise stated, classes meet five times a week with forty-five minute periods. The science courses have also laboratory or field work or both, usually immediately following the recitation periods. For the number of hours devoted to each science, see the following detailed courses.

In the following program, the arrangement by years is partly for convenience. One year courses may be taken in either year. In some courses, the second year may be taken first. The instructor should be consulted as to details.

One year of professional work is required, consisting of one term of High School Education, followed by one term of High School Practice, with a third term either in School Administration or High School Practice.

Candidates for the degree will state what subjects they expect to choose. Twenty-four term credits are required for the degree; for the Major subject, two years, for any Minor subject, one year, will be taken as a unit.

The number above the subjects denotes the hour for the class throughout the year. Where more than three subjects come in one term, there is a choice.

## ENGLISH.

HENRY W. SHRYOCK.

EMMA L. BOWYER.

MAE C. TROVILLION.

ELIZABETH C. HICKSON.

ELIZABETH COX.

MARY HENDERSON.

*Eng. Gram. 6. Adv. English Grammar.* A general survey of grammar with a view to teaching it to seventh and eighth grade children. Explanations given in the different text books are discussed. Report of Committee on Nomenclature studied. Kittredge and Farley Advanced English Grammar in hands of each one as a basis for study.

*Eng. 8. Elocution.* Whole credit will be given to those doing extra work in public speaking. Text: Cumnock's Choice Readings.

*Eng. 8a. Dramatic Art.* In addition to the regular course in elocution, some time will be spent in study and the practical work of coaching plays.

*Eng. 8b. Advanced Elocution.* Practice in public speaking.

*Eng. 9. Rhetoric.* Advanced oral and written composition. Text: Forms of Discourse, Cairns.

*Eng. 10. English Poetry.* Technique of poetry. Text: Pancoast's English Prose and Verse; supplementary studies, Macbeth, Paradise Lost, Idyls of the King, and Princess.

*Eng. 11. English Prose.* Text: Pancoast's English Prose and Verse; illustrative material drawn from the works of DeQuincy, Macaulay, Carlyle, and Lowell.

*Eng. 6. Method English.* This course covers the work in reading and language in the primary and intermediate grades. Observation lesson in reading and language in the Training School constitute an important part of the work. Text: Klapper's Teaching Children to Read.

*Eng. 6a. Method English.* Course designed for those expecting to teach in upper grades or high school. Classics taught in these grades are studied. Lesson plans made.

*Eng. 7a. American Literature.* A survey of American literature from the Colonial period to the present day. Texts: Boynton's American Literature, and Boynton's Milestones in American Literature.

*Eng. 20. Victorian Novel.* A study of representative Victorian writers. Texts: Hardy's Return of the Native; Stevenson's Kidnapped; Reade's Cloister and Hearth; Trollope's Barchester Towers.

*Eng. 21. Contemporary American Literature.* This course includes a special study of those writers whose books can be used on teaching. Text: Manly and Rickert's Contemporary American Literature.

*Eng. 22. Contemporary British Literature.* Text: Manly and Rickert's Contemporary British Literature.

*Eng. 17. Old English.* Grammar and Easy Reading. Text: Bright's Anglo-Saxon Reader. Some reading of Old English will be done, but principally we shall trace the development of our language, and account for the presence in our modern speech of many irregular forms.

*Eng. 14. Shakespeare.* This course consists of a thorough study of As You Like It, King Henry V, Hamlet, and The Tempest, with a brief survey of several other plays.

*Eng. 15. The Short Story.* This is principally an advanced theme course dealing with the technique of the short story, with illustrative material from the works of the best short story writers. Three days a week will be devoted to the study of the story, two days to the writing of original stories.

*Eng. 23. Essay.* Various types of essays will be read and discussed.

*Eng. 24. Modern Drama.* This course will include a study of the technique of the modern drama.

*Eng. 25. Advanced Rhetoric.* Course based on Genung's Working Principles of Rhetoric.

*Eng. 26. Development of the Drama.* Lectures and library reading on the development of the drama.

*Eng. 29. Magazine Fiction.* The principles of the short story will be studied in a few classics, but mainly in the fiction of current magazines.

## LATIN AND GREEK.

HELEN A. BALDWIN.

FULLER COMBS.

College students may begin Latin and receive credit for a minimum of two years. Students having two or more years in high school may continue, getting college credit for each term after the first two years; eight years may be completed.

For advanced students majoring in Latin practice teaching is provided.

*Latin 1, 2, 3.* Beginning Latin. Smith's Elementary Latin is used, the aim being familiarity with the elements of Latin grammar.

*Latin 4, 5, 6.* Caesar's Gallic War, the equivalent of four books. Grammar is further studied. One fifth of the time is given to composition. Much attention is paid to historical background. Walker's Caesar is the text.

*Latin 7, 8, 9.* Cicero's Orations, the usual six. The life and times of Cicero are studied. Johnston and Kingery is the text. Scott's third year composition is used, and Bennett's Grammar is recommended.

*Latin 10, 11, 12.* Vergil's Aeneid, six books. Verse form is studied and Vergil's character and philosophy are expanded.

Vergil and Cicero are given in alternate years: Cicero in 1924

*Latin 13, 14, 15.* A term of advanced composition is given, based on Cicero and intended for future teachers.

Cicero's Essays on Old Age and on Friendship and Horace's Odes and Epodes.

*Latin 16, 17, 18.* Livy, Bks. XXI & XXII; Phormio of Terence; Abbott's collection of Cicero's Letters.

*Latin 19, 20, 21.* Tacitus' Agricola and Germania; Horace's Satires and Epistles; Vergil's Eclogues and Georgics.

*Latin 22, 23, 24.* A selection of Pliny's Letters is read, largely for grammar review, and a portion of Quintilian. A play of Plautus is studied, with dramatic background. A selection from the elegiac poets; Catullus, Ovid, Propertius and Tibullus, is read.

*Latin 40.* A term in Roman Private Life, open to any college student having already credit for two years of Latin. This is a lecture course dealing with the personal history of the Romans of different periods, methods of building, of education, food and dress, marriage, religious views, etc. Given at intervals, sometimes in summer.

*Latin 41.* A half term of Methods in Latin, for teachers. Deals with the psychology of the subject, objectives and means of their attainment, text books, etc. Given at intervals.

*Greek 1, 2.* Careful study of Greek inflections and syntax, with practise on the Anabasis. White's First Greek Book.

*Greek 3.* Seymour's Odyssey. This is read rapidly for the story. Little attention is given to dialectic variations as Attic Greek is more useful to students.

*Greek 4, 5, 6.* Two months more of the Odyssey; then a review of grammar, some orations of Lysias and Plato's Apology or Crito.

## FRENCH.

J. M. PIERCE.

*French 1, 2, 3.* Méras, Le Premier Livre (Edition Phonétique). Worman's First French Book. Guerber, Contes et Légendes. Lavis, Histoire de France (Cours élémentaire). Newson's First French Book with Hoelzel Wall-pictures of the Seasons.

*French 4, 5, 6.* Maïret, La Tâche du Petit Pierre. Dumas, Le Comte de Monte Cristo. Erckmann-Chatrian, Madame Thérèse. Halèvy, L'Abbé Constantin. Daudet, La Belle Nivernaise. Mérimée, Colomba. French-English Dictionary. Reference Grammar. French Newspapers.

*French 7, 8, 9.* Dumas, Les Trois Mousquetaires. Brioux, Blanchette. Hugo, Les Misérables. Sandeau, Mlle. de la Seiglière. Dumas, La Tulipe Noire. Roz, Littérature Française. French newspapers. Scientific French.

## ART.

GLADYS P. WILLIAMS.

GRACE L. BURKET.

*Art. 1. C. Drawing* is the beginning or foundation of drawing. Chief problem: The principles of perspective are studied and applied in the drawing of curved and straight edge objects. No attempt is made to produce anything beyond a sincere expression. Mediums are pencils, ink and crayons.

*Art. 3. Blackboard drawing* is valuable to those expecting to teach in the grades. Composition and perspective are studied. Drawings are from dictation, memory and imagination.

*Art. 15. Freehand Drawing.* Charcoal drawing from the cast. Some drawings finished in water color washes.

*Art. 8. Advanced Freehand Drawing.* Continuation of Art. 15.

*Art. 2. Elementary Water Color.* A knowledge of color is now generally recognized as essential in almost every walk of life. This course covers a study of the theory of color and color harmonies. These studies are worked out in terms of dress and interior decoration. Practical problems relating to costume design are given that the student may appreciate correct dressing. Problems in interior decoration are taken up as the use or abuse of color in the home has much to do with the happiness and efficiency of those in the home.

*Art. 10. Advanced Water Color.* A continuation of the problems in Art 2. Work from still life and from nature. Some practice in the use of pastels.

*Art. 6. Elementary Design.* This course consists of problems illustrating the underlying principles of design, also the practical application of these principles in the making of various useful articles. Instruction in the technique of tooled leather work and stenciling is given. General principles of good lettering.

*Art. 7. Advanced Design.* A continuation of the study of the principles of design and their practical application. Principles of conventionalization applied to nature. Advanced work in cut and tooled leather, in which the students make many useful and beautiful articles. Design is studied in its relation to manual training and art in the home.

*Art. 7a. Design, Elements of Composition.* Elementary study of simple architectural problems. Mediums: pencil, pen and water color.

*Art. 21. Commercial Design.* In this course design is studied with reference to its application in the business world. Principles of advertising, methods of reproduction, and printing are studied in terms of the commercial world.

*Art. 21a. Design, Study of Elements.* Continuation of Art 7a.

*Art. 9. Clay Modeling.* This course includes the making of type forms and objects based on them, simple animal forms, modeling from casts, tiles and hand built pottery.

*Art. 24. Bookbinding.* This course is offered to meet the increasing demands for industrial art. The craft itself is one that comes in touch with everyday life, and skill acquired in this is of permanent value. The materials for the bookbinder's craft are inexpensive, easily handled, and require no tools or equipment that can not be used in the class-room.

The course covers a progressive series of problems in bookbinding suitable for the several grades of the elementary and high school. It includes mending, rebinding and sewing books.

Students will find it to their advantage to bring several volumes of their own for binding.

*Art. 4. Public School Drawing.* This course is planned to meet the needs of the grade teacher, departmental teacher of art, and supervisor of art. The work is arranged to establish a relation between the child's home life and the industrial world. Successful public school are courses are studied. Each student works out problems for all the grades. Text: Sargent's How Children Learn to Draw.

*Art. 5. History of Art.* This course consists of study of the salient characteristics of each period of Architecture, Sculpture and Painting, beginning with that Egypt and continuing up through the modern schools. The school is provided with a good reference library, a collection of prints, lantern slides and casts. Text: Reinach's Apollo.

*Art. 9a. History of Architecture.* Ancient to Modern times; considering, influence of material, climate, political and economic conditions on styles of Architecture; evolution of structural and ornamental forms. Text: Hamlin's history of Architecture.

*Art. 13. Picture Study.* To become familiar with the great masterpieces of the schools of painting, and to develop an appreciation for the same, is the aim of this course. History of painting is studied as a foundation. Principles governing the laws of composition are discussed. Due consideration is given to Illinois Picture Study Course. Text: Van Dyke's History of Painting.

## HISTORY.

G. W. SMITH.

E. G. LENTZ.

*Hist. 9. Method History, Junior College.* This course has for its purpose the study of the nature of history, the organization of the subject-matter, and the consideration of the proper material for the several years of the school course. Especial attention is given to what should be done in presenting history matter to the primary and intermediate grades.

Preparing lesson plans and conducting recitations will occupy a portion of the time. Careful attention will be given to the History outline in the State Course of Study. Text: Mace's Method.

*Hist. 13. English History, Junior College.* The value of this course lies in its relation to the Junior College course in American History which follows it. The aim is to trace the growth of English institutions and to observe briefly the planting of those institutions in America. Due attention is given to the social and economic phases of the history as well as the political life of England. The course is concluded with the study of the Stuart period. Text: Cross' A Shorter History of England and Greater Britain.

*Hist. 17. Modern Europe, Junior College.* This also is a preparatory course to Junior College American History. It is a study of revolutionary Europe of the eighteenth and nineteenth centuries with brief attention to the problems which in any way affected American history. Beginning with the English Revolution of the seventeenth century it covers in a general way the Old Regime, the French Revolution, the Napoleonic Era, and the Revolutions after Vienna. The study is brought down to 1870. Text: Hazen's Modern Europe.

*Hist. 14. American History, Junior College.* One term is given to the study of the growth of the American Colonies toward economic and political independence, the causes of the Revolution, the problems following it, and the progress of the New Nation in the first half of the nineteenth century. Text: Muzzey's The United States of America, Vol. I.

The courses which follow comprising two years of Senior College history are intended to present intensive studies of certain important phases of world history. The method of the study is stressed with a view to preparing the prospective teacher of high school history for the most effective work in this special field. Extensive library reference work is required to familiarize the student with the general literature of the subject. The writing of theses upon selected topics and the making of numerous oral reports are among the requirements of each course. No credit can be given for work done in absentia unless it be carried on by correspondence with a reputable school offering such courses, and then only by previous approval of the department.

*Hist. 15. Advanced Greek History.* This course is a study of Greek civilization and its meaning to world history. The general topics for discussions are: origin of the Greek peoples; their migratory movements; the city-state form of government; sources of culture, art, literature, education, religion, science, etc.; the spread of Greek culture into Asia, Africa and the West. Text: Bury's Greek History.

*Hist. 16. Roman Political Institutions.* In this course we take a comprehensive survey of the political institutions under the Monarchy, the Republic, and the Empire. We find the sources of many of our American political institutions in the political institutions of the Roman people. Whenever we find the opportunity we make comparisons between these Roman institutions and similar ones of our own day. Text: Abbott's Roman Political Institutions.

*Hist. 26. English Constitutional History.* The origin, growth and present workings of the English Constitution is the special study of this course. The American political heritage from England receives due emphasis. Owing to the technical nature of the subject, Hist. 13 or its equivalent is an imperative pre-requisite. Text: Taswell-Langmead's English Constitutional History.

*Hist. 23. The Age of Feudalism.* This is a study of the origin, development and decay of feudal institutions from the age of Charlemagne to the fifteenth century. The emphasis is placed upon the political institution, the feudal state, but the social and economic phases of feudalism receive attention. This course is preparatory to Hist. 24. Text: Thorndyke's History of Medieval Europe.

*Hist. 24. The French Revolution.* This course occupies a middle ground between the old and the new order—the final extinction of the remnants of the Federal System. Beginning with the Old Regime the study is carried through the revolutionary cycle concluding with the fall of Napoleonic Empire.

*Hist. 25. Europe Since 1870.* This course begins with the Franco-Prussian War, takes up the organization of the Empire, and traces the expansion of the governments of Western Europe. The World War in its various aspects and the world problems growing out of it is the subject of this study. Text: Turner's Europe Since 1870.

## GEOGRAPHY.

FRANK H. COLYER.

MARJORIE MAE SHANK.

*Geog. 4a. Primary Methods.* This course covers the work in the primary and intermediate grades. The discussion of the principles of teaching geography in grades four, five, and six constitutes the greater part of the work; but opportunity will be given for observing the teaching of geography in these grades in the Training School.

*Geog. 4b. Advanced Methods.* This course covers the work in grades seven and eight. The discussion of the principles of teaching geography in the advanced grades is the purpose of this course.

*Geog. 11. Advanced Geography.* This course presupposes Geog. 2 and Geog. 3, or their equivalent, and deals with the more important principles involved in economic geography. Text: Whitbeck's Economic Geography.

*Geology 7. Sr. College Geology.* This course is the first in a series of three terms in college geology and the study of rocks and minerals. The course is designed for students of senior college standing. Text: Chamberlain and Salisbury's College Geology.

*Geology 8. Sr. College Geology.* This course is the second in a series of three terms in college geology. It deals primarily with a study of the most important rocks and minerals.

*Geology 9. Sr. College Geology.* This course is the third in a series of three terms in college geology, making in all a year's work. It deals with the historical phase of geology. Text: Chamberlain and Salisbury's College Geology.

*Geog. 10a. Sr. College Commercial Geography.* This is the first term in a year's work in commercial geography and meteorology. This course is for students of senior college standing.

*Geog. 10b. Sr. College Commercial Geography.* This is the second in a series of three terms of advanced senior college commercial geography.

*Geog. 12. Sr. College Meteorology.* This is the last of a series of three terms in senior college geography. The course deals with a discussion of the science of the atmosphere.

## PSYCHOLOGY AND PEDAGOGY.

GEORGE D. WHAM.

W. O. BROWN.

J. M. PIERCE.

*Education 1. School Management.* A study of such topics as the first day of school; the organization of the school; the daily program; equipment, sanitation, decoration; the conduct of the recitation; discipline and moral training. Lesson-planning is an important feature of the course. Text: Bagley's Class-room Management, or its equivalent. Additional readings according to topic.

*Education 2. Educational Psychology.* A study of the facts and laws of mental life with special reference to the learning and teaching processes. The various principles that underlie effective teaching are developed and illustrated by concrete exercises and problems. Text: Bagley's Human Behavior, or its equivalent. Assigned readings in James' Talks to Teachers, Colvin's The Learning Process, and McMurry's How to Study.

*Education 3. Principles of Education.* A systematic study of the fundamental principles of education as derived from the basic sciences of biology, physiology, psychology, and sociology. The principles thus derived are applied in the interpretation and criticism of current and proposed educational theory and practice. Text: Bag-

ley's Educative Process, or its equivalent. Assigned readings in Spencer's Education, Ruediger's Principles of Education, and Horne's Philosophy of Education.

*Education 11. General Method.* A detailed study of the various processes of teaching and learning involved in elementary education. Text: Parker's Types of Elementary Teaching and Learning, and Parker's General Methods of Teaching in Elementary Schools.

*Education 4. History of Education.* The chief aim is to afford the teacher the sanity of judgment that comes only by seeing present-day education in perspective against its historical background. It traces the evolution of educational ideals and practice in response to social needs and to the contributions of philosophic and scientific thought. Texts: Cubberley's A Brief History of Education and Curoe's Outline of History of Education. Additional readings in Graves' History of Education and Cubberley's Book of Readings.

*Education 10. Measurements.* A course including a study both of intelligence and educational tests. Texts: Terman's The Measurement of Intelligence, and Monroe's Measuring the Results of Teaching. Assigned readings and the practical use of test materials.

*Education 9. School Administration.* This course is designed primarily for those who look forward to positions as supervisors, principals, or superintendents. Texts: Cubberly's Public School Administration or its equivalent, and Stark's Every Teacher's Problems.

*Education 8. Primary Education.* One half the course is a study of child psychology. Text: Freeman's "How Children Learn." The other half is made up of two weeks each of story-telling, drawing, and elementary construction. The course is planned especially for those who teach within the first four grades of the elementary school.

*Education 6. Sociology.* A consideration of the origin, nature and functions of society and social institutions. A special study of the relation between society and the individual, and for the practical social problems growing out of the complexity and rapid development of modern society. Text: Hayes' Introduction to the Study of Sociology, or its equivalent.

*Education 7. High School Method.* A detailed study of the various processes of learning and teaching involved in high school education. Texts: Parker's Methods of Teaching in High Schools, and Parker's Exercises for Methods of Teaching in High Schools.

*Education 7a. High School Administration.* A study of such topics as adolescence; the history and aims of secondary education; high school courses of study; high school equipment; and the problems of organization, management, and discipline peculiar to the high school. Texts: Inglis' The Principles of Secondary Education; King's The High School Age.

*Education 5. Advanced Psychology.* Besides equipping the student with an organized knowledge of mind this course further attempts to train him in the art of introspection in the study of his own mental processes, and thus to increase his power to discern and control the mental processes of others. Observation and experiment throughout

the course. Text: Tichener's Textbook in Psychology, or its equivalent.

## MATHEMATICS.

W. T. FELTS.

F. G. WARREN.

DILLA HALL.

*Math. 17 and 18. Advanced Algebra.*

*Math. 34 and 35. Solid Geometry.*

*Math. 40. Adv. Arith.* A course in college arithmetic with a college text for high school graduates or those of equal rank who need special work in the rationale of the various processes and principles. Attention will be given also to the pedagogy of these processes. This work is so organized that when circumstances demand either half of the course may be taken for a half credit. These divisions are known as Math. 40a (first half) and Math. 40b (second half). Taking only half the course is discouraged.

*Math. 30. Meth. Arith.* A course in the pedagogy of arithmetic in the grades. Prerequisites: B Arith. and Psychology. This work is so organized that a student may take either half for a half credit. (Math. 30a and Math 30b). However, taking the course in halves is discouraged.

*Math. 25. Plane Trig.* This course is now a Junior College course and in sequence with Adv. Arith. and Meth. Arith. gives a full year of junior college mathematics.

*Math. 19. College Algebra I.* Amplification of many of the topics in Math. 17 and Math. 18. Variables and functions, mathematical induction, complex numbers, theory of equations, limits, infinite series, probability.

Prerequisites: Math. 17, 18 and 25.

Text: Rietz and Crawthorne's College Algebra.

*Math. 27. Plane Analytical Geometry I.* Cartesian coordinates, curve and equation, straight line, circle, polar coordinates, functions and graphs, transformation of coordinates, parabola, ellipse, hyperbola.

Prerequisites: Trigonometry and College Algebra I.

Text: Smith and Gale's Plane Analytical Geometry.

*Math. 45. Teaching of Secondary Math.* Discusses the pedagogy of algebra, geometry and trigonometry.

Prerequisites: Math. 34, Math. 35, Math. 19, Math. 19a, and Math. 40.

Text: Nunn's Teaching of Secondary Mathematics.

*Math. 42. Calculus.* One term in the Elements of Differential and Integral Calculus.

*Math. 19a. College Algebra II.* A second term in College Algebra is offered for those specializing in mathematics. The work is a continuation of No. I. The same text is used.

*Math. 28. Analytical Geom. II.* A continuation of Math. 27. Parabola, Ellipse, Hyperbola, Transcendental Curves and Equations,

Tangents, Parametric Equations and Loci, Cartesian Coordinates in Space, Surfaces, Curves and Equations.

*Math. 26. Plane Surveying.* A short course in the elements of plane surveying for those planning for an Engineering Course in some other school. Text: Reed and Hossmer.

*Math. 45. Differential Calculus.* A continuation of course 42.

*Math. 46. Integral Calculus.* An extension of courses 42 and 45. Text for courses 42, 45 and 46: Townsend and Goodenough.

## HYGIENE AND PHYSICAL EDUCATION.

WILLIAM MCANDREW, MEN.

F. LOUISE GRAVES, WOMEN.

### *Women:*

A method course for graded work in public schools. The course aims to equip teachers to comply with the Illinois law requiring a minimum of one hour weekly in physical training. Text book to be announced.

The Course consists of:

1. A survey of physical education sufficient to enable the teacher to use authorized prepared lesson plans.
2. Games—simple and highly organized.
3. Rhythm plays and folk dances.
4. Value and use of posture test.
5. The athletic badge test whereby any child can gain the privilege of wearing a national society button after attaining to certain physical standards.
6. Entertainments, pageants, etc.
7. Supplementary reading.
8. Notebooks.

Classes meet daily.

*First Year:* Physical Education 1a, 2a and 3a. Three periods a week. Hygiene lectures, gymnastics, games and rhythm work. Material used in class suitable for teachers planning to work in the elementary grades. Notebook and reference work required.

*Second Year:* Physical Education 4a, 5a and 6a. Three periods a week. Hygiene lectures, gymnastics, games and rhythm work. Material suitable for teachers preparing for work in the intermediate and upper grammar grades. Notebook work and reference reading required.

*Third Year:* Physical Education 7a, 8a, 9a. Three periods a week. Methods course for students expecting to do practice teaching in the training school or to teach Physical Training work on graduation. Organized athletics, advanced folk dancing, and aesthetic dancing. Prerequisites: First, Second Year work, and the work of the preceding terms with a grade above passing mark.

*Physical Education 10, 11.* A method course in two units of six weeks offered during Spring, Midspring, and Summer terms, for stu-

dents already in the teaching field. Reference reading required Elementary and Grammar work offered in plays, games, folk dancing and gymnastics, together with ideas on play fests, pageantry and program planning, for adults as well as children.

As a uniform costume is required, students are requested NOT to obtain suits before entering the school.

*Men:*

*First Year. Physical Education 7, 8, 9.* Fall, Winter, and Spring Terms. Much the same work is covered as in the two years work in the high school course, but an entirely different view point is kept in mind. An effort is made throughout to impress upon the student the instructor's attitude, and frequent opportunity will be given to various members to take charge of and instruct the classes. Four periods per week.

*Physical Education 10.* Coaching is offered during the first six weeks of the Summer Term. The work covers basket ball and track and, for those who desire it, baseball. When there is sufficient demand football is also offered. The theory and practical application of the courses offered is gone into thoroughly, particularly a firm grounding in the fundamentals being demanded. The object of the course is to fit the student to coach in high school. Five periods per week.

*Physical Education 11.* The school supports a football team during the Fall Term. Physical Training credit is given to men retained on the squad. Students are not dropped from the squad because they have no chance of making the team. They are encouraged to work for the physical benefits and to learn the game, as not a few who are unable to make the team ultimately coach this branch of athletics.

*Physical Education 12.* A basket ball team represents the school during the Winter Term. The statement above concerning the football team holds true for basket ball.

*Physical Education 13 and 14.* Baseball and track. The same facts hold for these branches of sport as for courses 11 and 12.

*Physical Education 15.* Credit in the fall and spring may be obtained by playing tennis.

*Physical Education 16.* Interclass basket ball teams are formed and a regular schedule played during the Winter Term. Credit is given to the men who make the teams.

## MUSIC.

JOHN H. JAQUISH.

JULIA A. DICKERMAN.

HELEN E. SMITH.

RUBY A. ROBERTSON.

*Music 1. Method Music.* This course is offered to those students who have not had elementary training in music. It consists mainly of sight-reading simple songs and exercises; but also includes

drill in pitch, rhythm, and theory; formal ear training (response, oral and written); song singing by use of syllables; and appreciation of music (listening lessons). Text: School Music Handbook by Cundiff-Dykema.

*Music 2. Method Music.* A course designed to meet the music requirements demanded of grade teachers. The work covers pedagogic principles of music teaching, observation in Training School, practice in lesson plans, and practical experience in class teaching.

Perequisite: Music 1, or previous training equivalent to that course. Text: School Music Handbook by Cundiff-Dykema.

*Music 3. Practice Teaching.* This course offers an opportunity to teach music in any grade of the Training School. All teaching will be under the supervision of students enrolled in Music 4 and members of the music department. Class will meet once a week for further training in methods, for discussion of problems encountered while teaching, and for general discussions with supervisors. Text: School Music Teaching by Karl Gehrken.

*Music 4. Supervision of Music Teaching.* This course is outlined purposely for those students who wish to specialize as music teachers. An opportunity is offered to supervise music teaching in all of the grades of the Training School. Class will meet twice a week to study problems of the Junior and Senior High Schools, to form courses of study for music in the grades, and for discussions with practice teachers.

*Music 5. Harmony.* An optional subject in the Art Course, but a valuable one for students specializing in music or for students desirous of advanced work in theory. The work covers the formation of major and minor scales, thorough study of intervals, the common chord, harmonic progressions, cadences, sequences, the chord of the sixth and six-four, the dominant seventh and inversions, and natural modulations. Text: A Treatise on Harmony Part 1 by J. Humfrey Anger.

### Applied Music.

Class instruction in piano, violin, and other orchestral instruments is elective. Classes recite three days each week, one credit being given for three terms work.

*Music 21, 22, 23. Violin First Year.* The subject matter of the text used is correlated with the singing lesson wherever possible. Emphasis is placed upon the mechanics of the instrument by employing: (1) short and easily memorized exercises in rhythmic form for the development of the bow hand and arm; and (2) technical exercises suitable for young beginners designed for the purpose of training the left hand. Text: Max Fischel's Graded Course, Book 1 and Book 2.

*Music 24, 25, 26. Violin Second Year.* The work of the second year provides for the presentation and the development of the third position, the more difficult keys, rhythms, bowings, and the easier harmonies; during the latter part of the year the seven positions in scale

form are used. Text: Elementary Violin Lessons by Eugene Gruenberg and Max Fischel's Book 3.

*Music 40, 41, 42. Piano First Year.* Teaching of the rudiments of piano playing from one of the most approved methods for beginners. Careful attention is given to hand culture, touch, music notation, rhythm and ear training. Text: Standard Graded Course of Studies by W. S. B. Mathews.

*Music 43, 44, 45. Piano Second Year.* The W. S. B. Mathews Standard Graded Course continued.

The University maintains a band, orchestra, and a girls' glee club. Students who are especially interested in music are urged to apply for membership in at least one of these organizations. One credit is given for three term's work in any of these organizations.

## CHEMISTRY.

GEORGE M. BROWNE.

ROBERT A. SCOTT.

The growth in popularity of the study of chemistry during the past has been largely due to the growing conviction that chemistry is the foundation of other sciences and of nearly all of our modern industrial processes. A knowledge of chemistry is now considered an essential part of a liberal education. During the past few years the Normal has been adding to its equipment to meet this demand and it is now prepared to give three full years of work in chemistry and thus to prepare students to teach chemistry in the public high schools and also to prepare them for entrance to the medical schools.

*Chemistry 1a. General Inorganic Chemistry.* For students who have had no previous study of chemistry. Periods 1 and 2 or 5 and 6 during the Fall Term, or 7 and 8 during the Winter Term.

*Chemistry 2a. General Inorganic Chemistry.* Periods 1 and 2 or 5 and 6 during the Winter Term, or 7 and 8 during the Spring Term.

Chem. 1a is a prerequisite.

*Chemistry 3a. General Inorganic Chemistry.* Periods 1 and 2 or 5 and 6 during the Spring Term.

Chem. 2a is a prerequisite.

*Chemistry 1b, 2b, and 3b. General Inorganic Chemistry.* With laboratory work in qualitative and quantitative analyses. For students who have had one year's work in chemistry in their high school.

*Chemistry 7. Descriptive Chemistry and Qualitative Analysis.* Lectures, recitations, and laboratory work. Period 3 during the Fall Term.

*Chemistry 8. Descriptive Chemistry and Qualitative Analysis.* Lectures, recitations, and laboratory work. Period 3 during the first half of the Winter Term. Chemistry 7 is prerequisite.

*Chemistry 10. Elementary Quantitative Analysis.* Lectures, recitations and laboratory work. Period 3 during the last half of the Winter Term.

*Chemistry 11. Elementary Quantitative Analysis.* Lectures, recitations, and laboratory work. Period 3 during the Spring Term.

*Chemistry 13. Elementary Organic Chemistry.* Recitations and laboratory work. Period 4 during the Fall Term.

*Chemistry 14. Elementary Organic Chemistry.* Recitations and laboratory work. Period 4 during the Winter Term.

*Chemistry 15. Elementary Organic Chemistry.* Recitations and laboratory work. Period 4 during the Spring Term.

## PHYSICS AND ASTRONOMY.

S. E. BOOMER.

DILLA HALL.

*Physics 2, 3, and 4.* For those who have had no high school preparation in physics. These three courses constitute a year's work. The chief aims are to develop scientific methods of thinking, to interpret physical phenomena, and to become acquainted with many of their applications to industry. Local industrial plants are visited and written reports required. The marvelous progress made in physics during the war, such objects as the electron theory, radioactivity, and spectrum analysis are emphasized to stimulate scientific imagination. Courses 2 and 3 cover the work as given in Millikan and Gale's Practical Physics and Millikan, Gale, and Bishop's Laboratory Course in Physics. Eight periods per week are required.

Course 4 reviews 2 and 3 and is especially planned to help those who have had a year of high school physics and desire a review. Difficult topics laws and principles receive special attention. The individual desires of the class help to determine the nature of the course. Individual interests are encouraged in library and laboratory assignments.

*Note.* At the beginning of the Mid-Spring Term, students may enter any of the above courses for which they are prepared. Courses for which there is sufficient demand are given the Summer Terms.

*Physics 5.* Planned especially for those in the Household Arts Course. Applications of physics in the home. Whitman's Household Physics is used.

*Physics 6, 7, and 8.* These three courses constitute a year's work for those who have had a year of high school physics. Kimball's College Physics and Schulz Laboratory Manual are used. One or more of these courses are given in the summer sessions according to the needs of students.

## ASTRONOMY.

Todd's New Astronomy is used as a text. Five recitations per week, together with frequent evening observations with and without the telescope, constitute the work. As the students go on in their study from the earth to the moon, the sun, the planets, the stars, and the nebulae, their vision is broadened perhaps as rapidly in this ennobling

science as it can be in any subject. The varying phases of the moon and the inferior planets, the vast distances to the stars, their great magnitude and high velocities, their constitution, temperature, and brilliance appeal especially to those who enjoy thinking along these lines. Those who take the course will find it helpful in presenting the difficult problems of mathematical geography and in vitalizing their nature study work.

## BIOLOGY.

W. M. BAILEY.

MARY M. STEAGALL.

DELIA CALDWELL, M. D.

### *Botany:*

*Biology 21a. General Botany.* An introductory course in Botany for Students of the Junior College. It consists of a brief study of the morphology and structures of representative plants of the great plant groups, the general classification of plants and the evolution of the plant Kingdom. This course or its equivalent is prerequisite to all of the courses in Botany in the Senior College. Recitations and laboratory studies, each, five periods per week.

*Biology 22. Morphology of the Thallophytes.* A study of the structures, development and relationships of the groups of Algae and Fungi, evolution of the plant body, origin and evolution of sex in plants, parasitism and saprophytism in the Bacteria and Fungi. Recitations and laboratory studies, each, five periods per week. Fall Term of the first year of the Senior College Course.

*Biology 23. Morphology of the Bryophytes and Pteridophytes.* A continuation of course 22. This course consists of a study of the structures, development and relationships of the liverworts and mosses, ferns, equisetums and club noses, evolution of the sporophyte, alternation of generations and heterospory. Recitations and laboratory studies, each, five periods per week. Winter Term of the first year of the Senior College Course.

*Biology 25. Morphology of the Spermatophytes.* A continuation of Course 23. This course consists of a study of the structures, development and relationships of the Gymnosperms and Angiosperms, vascular anatomy of the seed plants, the development of flowers, the gametophytes, fertilization and embryology of the seed plants, and the structure and development of seeds and seedlings. Recitations and laboratory studies, each, five periods per week. Spring Term of the first year of the Senior College Course.

*Biology 27. Physiological and Ecological Anatomy of Plants.* This course consists of a study of the absorptive, conductive, synthetic, protective and storage tissues of plants in relation to their functions, and variation in their structures in relation to changes in environment. Recitations and laboratory studies, each, five periods per week. Fall Term of the second year of the Senior College Course.

*Biology 26. Plant Physiology.* This course should follow course 27. It consists of a study of the synthetic processes in green plants,

digestion, translocation and uses of food in plants, the nutritional processes in plants without chlorophyll, respiration and fermentation, absorption of water and mineral nutrients, water relations and requirements of plants, movement of materials in plants, functions of mineral nutrients, growth in plants. Recitations and Laboratory studies, each, five periods per week. Winter Term of the second year of the Senior College Course.

*Biology 28. Plant Ecology.* This course consists of a systematic study of plant associations, and the influences of external factors on the origin, variation and development of plant associations. Field studies, recitations and lectures. The greater part of the field work is done on Saturdays when all day trips can be taken. Spring Term of the second year of the Senior College Course.

### *Zoology:*

Each of the following courses requires five recitation periods and at least five laboratory study periods per week. They are planned for advanced students expecting to teach the subject.

*Biology 1a. General Zoology.* This is an elementary college course in zoology dealing with the salient facts of Invertebrate zoology, noting the evolution of groups and varieties. The field work will be largely devoted to a study of local forms, life histories, habits and environment. Economic relations will be emphasized. This course is similar to Biology 1, except that it studies animal life through the invertebrate form using microscopic material for much of the work.

*Biology 2. Invertebrate Zoology.* This course is a continuation of Biology 1a. Here the single living cell will be taken into consideration, in both its simplicity and its complexity; its limitations will be seen and the factors sought that give rise to the Metazoan. The rise of tissues, and the combination and organization of these into organs and systems will be studied. The inter-relation of lower organisms will be noted in both field and laboratory and successive steps in the evolution of more complex forms studied. Methods of preparing invertebrate whole mounts will be given, and slides prepared for class use. Fall, 1924.

Any College Text in Invertebrate Zoology may be used, but Invertebrate Zoology by Van Cleave is recommended for both these invertebrate courses.

*Biology 3 and 3a. Vertebrate Zoology.* Biology 1 of its equivalent must precede these courses. They may precede or follow the Invertebrate Zoology. They cover the general field of Comparative Vertebrate Anatomy and should be taken in sequence. The subject is taken from a phylogenetic and evolutionary standpoint. Structures, origin of various tissues and organs, and development of skeleton will receive especial attention. Biology 3 deals with tissues and organs, biology 3a with systems. Fall and Winter, 1926.

Texts: Hyman's Laboratory Manual for Comparative Vertebrate Anatomy, and Kingsley's Comparative Anatomy of Vertebrates.

*Biology 5. Ornithology.* Required, Biology 1, or its equivalent. The object is to recognize practically all the birds of the locality at this season, to know their field markings, their characteristic position,

calls and flight, together with their feeding and nesting habits, economic importance in relation to Agriculture and Horticulture and laws for protection. For bird structure the English sparrow or pigeon will be used. Two field trips per week will be made, equivalent to five school hours per week. A special study of some individual bird will be made by each student.

Texts: Reed's Land Birds East of the Rockies; Chapman's Birds of Eastern United States.

*Biology 6. Entomology.* A course of economic interest to all students of Biology, to teachers of rural and village schools and to students of Agriculture. The critical point in the life histories of the common local insects will be emphasized and its ecological or pathological importance. The relation of insects to crops, truck gardens, orchards, lawns and parks will be studied, as well as the effectiveness of certain remedies and preventive measures for such pests. Much field work and individual experiments will be encouraged. This may be taken anywhere in the college course, but preferably after Invertebrate Zoology. Methods of Classifying, mounting, preserving and naming forms will be stressed.

Text: Sander's Entomology.

*Biology 6a. Animal Ecology.* A study in local fauna and habitat. High school and Invertebrate Zoology are prerequisites. Animals are considered in relation to each other and to their environment. The animal societies and formations of lake, stream and forest will be found and factors noted that control their successions. This necessitates an acquaintanceship with all the common animals of the region, their names, habitats, relations, characteristics and associations. Fall Term of 1924 or 1925.

Text: Allee's Synoptic Key, and access to a number of both vertebrate and invertebrate manuals must be had.

*Biology 8. Embryology.* The course is confined to vertebrate embryology. The chick and pig embryos will be used as types and studied in detail, through the study of whole mounts, as well as serial sections. The development of the eggs of such other forms as frog, bird, fish, etc., will be used for comparison. The ontogeny of the individual will be studied in its apparent relation to the race phylogeny. Given, Winter Term 1925.

*Biology 9 and 9a. Methods in Histology.* Biology 9 is a study in technique, and that of 9a in recognition of microscopic material, and a study of its history. The best methods of preparing histological material in both Botany and Zoology are used, thus the student is given a nucleus of material and equipment for doing advanced original work in morphology, with skill to work independently. The student becomes acquainted with microscopic structure of animal tissues and watches their development from the primitive germ layers. Given Spring and Summer 1926.

Texts: For technique; Guyer's Animal Micrology, and Chamberlain's Plant Histology. For structures; Hill's Organography, and Dahlgreen and Kepler.

*Biology 31. Nature Study.* This course presupposes Biology 1 and 21. It is planned for teachers in the elementary grades and supervisors of elementary work.

The time is devoted to the finding of sources of material for adaptation to the various grades. Types will be studied. Much time will be spent in the field, getting acquainted with local material and learning methods of doing out-door work. An opportunity will be given for the observation of classes taught in the Training School. Mid-spring and Summer Terms.

Text: Downing's Source Book in Nature Study.

## PHYSIOLOGY, HYGIENE AND PUBLIC HEALTH.

*Biology 24. Bacteriology and Sanitation.* Introductory study of bacteriology and sanitary science, including a study of the morphology and biology of bacteria, yeasts and molds, and the relationships of these organisms to human interests. The course includes the following phases of the subject: methods of sterilization and disinfection, preparation and use of culture media, methods of growing and studying cultures, physiological characteristics of microorganisms, methods of microscopic examination, effects of physical and chemical agencies on microorganisms, study of enzymes and fermentation, bacteriology of food preservation; bacteriology of the soil, pathogenic microorganisms, and bacteriology of household sanitation and personal hygiene. One hour of lectures and recitations and one hour of laboratory work daily, 120 hours. Fifth year. Winter term. Prerequisites: El. Physiology and El. Chemistry. 5 and 6.

*Biology 4a. College Physiology.* This course is more advanced than the El. Physiology and will take up especially the physiology of digestion, secretion and excretion, metabolism. Also a more extended study of nutrition, especially of the nutrition of school children. One hour of lectures and recitations and one hour of laboratory work, daily, 120 hours. Sixth year. Winter term. Prerequisites: El. Physiology and Chemistry. 3 and 4.

*Biology 42. Home Nursing and Care of the Child.* A study of the care of the family in health and disease, and the feeding and care of the infant and young child. One hour of lectures, recitations, and demonstrations daily, 60 hours. Prerequisites, Col. Physiology, Bacteriology and Sanitation.

*Biology 41. Sanitation and Public Health.* A study of general hygiene, and of sanitation and epidemiology, as applied to the home, the school, and the community. One hour of lectures and recitations daily, 60 hours. Spring Term. Prerequisite, Bacteriology and Sanitation.

## DEPARTMENT OF HYGIENE AND PUBLIC HEALTH.

DELIA CALDWELL, M. D.

It is the province of this department to have the oversight of the health of the students, especially for the purpose of detecting and

excluding communicable diseases; to assist the local and state health authorities in establishing and maintaining quarantine, whenever it is required by law.

The physician in charge of this department has an office in the Main Building, keeping regular office hours, during which any student may have the benefit of consultation, with diagnosis of conditions and general directions in regard to matters of diet, exercise and good care of the body. It is not the policy of this department to prescribe or administer professional assistance, except first aid in injuries or sudden illness occurring during school activities. All of those students who are found to require the services of a physician are referred to our local physicians, whenever possible to the family physician of the student.

One of the duties of the physician in charge is to visit the boarding or rooming house of any student to investigate, when necessary, cases of suspected contagious disease, or any other condition affecting the health or welfare of the students or of the school.

In general, it is the object of the medical adviser to promote good health among the students, both in the school and in their homes.

## AGRICULTURE.

R. E. MUCKLEROV.

C. C. LOGAN.

The aim of the Agricultural Course is to develop a better appreciation for farm life by study of economic production, and to enable those who choose the work to teach it to others or to find a safe and profitable employment in the practice of farming.

The Normal owns a 110 acre farm which lies just south of the campus. In addition to the regular class work, students are required to make observations and to study the various phases of livestock farming on this farm. Demonstration plots are used to illustrate the various methods of soil treatment in relation to crop production. Students carry on project work from time to time with the various crops.

All the animals kept on the State Farm are pure bred. Percheron horses, Holstein cattle, Shropshire sheep, Duroc Jersey hogs, Barred Rock and Single Comb Rhode Island Red chickens, are used for class demonstration and judging work. Demonstration work in the feeding of farm animals is also carried on each year.

Students of the department find it profitable to join the Agricultural Club. While this club is more or less of department work, it is one of the factors promoting student life and the best interests of the institution. The club meets every Wednesday evening of the school year. The programs are made up of music, optionals, studies in soils and crops, livestock production and improvement, and community work.

*Animal Husbandry 5. Feeds and Feeding.* This course includes the more elementary and fundamental principles of the relation of plant and animal life, chemical elements of nutrition, compounds of animal

nutrition, composition of the animal's body, digestion of food, conditions influencing digestion and the laws of nutrition. The analysis of feeds, chemical feeding stuffs, together with their relative value as based upon a maintenance ration as applied to animals of various ages either at rest or doing light work will be studied. Starting feeding trials on the State Farm and a careful study of the balanced ration for milk and meat productions with the various animals will be carefully worked out. A study will be made of the late feeding experiments carried on by the different universities with various breeds of livestock. Observation of the feeding trials carried out on the State Farm will also be studied.

*Animal Husbandry 7. Dairy Production.* Balance of factors on a dairy farm, location of buildings, kinds of buildings, location of fields and selection of crops, the breed of dairy cattle, breeding, efficient feeding, marketing products, relation of dairying to the community. Three or four trips for the inspection of a few of the best dairies and dairy farms are required in this course.

*Animal Husbandry 6. Principles of Breeding.* The work embodies variation, mutation, inheritance of acquired characters, the pure line, segregation and dominance, reversion, blending inheritance, mendelian factors, theory of sex determination, prepotency, influence of environment, methods of animal breeding, and the factors involved in conducting breeding experiments. (Laboratory work.)

*Animal Husbandry 4a. Poultry.* Pigmentation, molting, inheritance of type, breeding, mating, influence of environment, incubation, feeding for early maturity, market conditions, marketing, poultry farming, including ways and means of developing the industry, results of egg laying contests.

*Animal Husbandry 10. Elementary Production and Manufacture of Dairy Products.* Herd selection and testing, care and management. ways and means of testing and manufacture of various dairy products, care and sale of cream, use and care of separators, com- ??? ??

*Animal Husbandry 1a. Swine.* History of the leading breeds, types, characteristics, adaptability, production of pure bred and grade herds, market classes and grades, market reports, and judging will constitute the work.

*Animal Husbandry 1b. Swine.* Economic production, breeding, feeding, housing, care and sanitation, common diseases, marketing, and grading.

*Animal Husbandry 32. Principles of Livestock Judging.* Leading characteristics of the various breeds of livestock, native homes, selection for feed lot, market requirements, breeding, nomenclature of external parts, score card and comparative judging.

*Agronomy 8. Farm Management.* Farm Management is a study of the business principles in farming, or the science of organization and management of a farm enterprise for the purpose of securing the greatest continuous profit. This course is planned with the above purpose and includes a study of such topics as the characteristics desirable for a farmer, cost of living on a farm, types of farming, main-

taining the fertility, livestock problems, size of farms, capital, methods of renting land, farm labor and equipment, marketing products, records and accounts, choice of a region and buying a farm.

*Agronomy 15. Principles of Agricultural Economics.* This course will take up the factors of production, principles of farm organization, forces and conditions which determine prices of agricultural products, rents, means of acquiring land, tenancy and land ownership, land speculation, land tenure, marketing and the middle-man, credit, transportation, state aid, county agent work, livestock and grain marketing, foreign competition, taxation problems.

*Agronomy 22. Marketing and Price of Farm Products.* General survey of exports and imports, market variation, weather influences, systems of marketing, supply and demand, holding for high prices, spread between producer and consumer, causes of fluctuations, quotations as an indicator of market demands, functions of middlemen.

*Agronomy 11. Farm Mechanics.* Principles of mechanics, equipment, machinery of the farm, principles of construction, general problems. Exercises in rope work, soldering, belt lacing, pipe fitting and general shop practice. (Two periods daily.)

*Teachers' Course 10. Rural Life.* A course planned for those interested in rural welfare. Study of rural life conditions, needs, standards, ways and means of improvement. The place of agriculture in community life. Problems of elementary and secondary school agriculture.

*Teachers' Course 5.* This course will begin with a review of the work done in the State Course of Study as a basis of work to be done in high schools, relation of agriculture to community life, adaptation of courses, home project work, reports, materials, club work and social life.

*Agronomy 1. Farm Crops.* Insects of farm, orchard, and garden, and methods of control.

*Agronomy 2. Farm Crops.* Cereal crops. A study of plant structure, habits, characteristics, requirements, methods of production and harvesting.

*Agronomy 3. Farm Crops.* Forage crops. A study of plant structure, requirements, habits and characteristics, with special attention given to legumes and crop rotations.

*Agronomy 5. Soil Physics and Management.* The value and functions of organic matter. Soil moisture, erosion, drainage, aeration, temperature, tillage and irrigation.

*Agronomy 6. Soil Fertility.* A study of essential elements of plant food, and methods of increasing soil fertility and crops production. Soil analysis and testing for acidity. An intensive study of limiting elements of plant food such as nitrogen, phosphorus, calcium, and magnesium, with special reference to Southern Illinois.

*Horticulture 8.* The principles of fruit growing with special reference to the home orchard; pruning, spraying, and marketing.

*Horticulture 8a.* Beautifying the farm home with trees, vines, and shrubs. Amateur landscape gardening.

*Horticulture 6. Elements of Horticulture.* Vegetable gardening,—the production of vegetables for home use.

*Horticulture 7. Small Fruits.* History, varieties, propagation, harvesting, and storing.

## HOUSEHOLD ARTS.

MISS JONES.

MISS WOODY.

*Household Arts 1a. Needlework.* (Applied Art Course.) This course embraces the making of articles in which design in construction and stitchery is the underlying principle. The work in textiles considers the economic and social aspects of the production and consumption of materials.

*Household Arts 2. Garment Making.* This course embraces both hand and machine work. Stress is laid upon the suitability of material and trimming and upon economical purchasing. The work involves the use and alteration of commercial patterns, some drafting and the various methods of trimming. The work in textiles embraces the history of the industry and the fundamentals of cloth making.

*Household Arts 3. Dressmaking.* The work involves the making of two summer dresses, a study of materials, color combinations and line in dress, some drafting of patterns and the elaboration of plain patterns.

In textiles the work includes the study of the important fibers and their manufacture into cloth.

*Household Arts 19. Costume Design.* In this course dresses will be constructed in inexpensive materials. These will be planned from the standpoint of becomingness to the individual. A study of historic costume will accompany the work and be relied upon to furnish suggestions for the plans.

*Household Arts 14. Advanced Dressmaking.* This course gives experience in handling wool and silk.

*Household Arts 20. Millinery.* The work in millinery embraces the fundamental principles of hat making. Students make four types of hats: one on a crinoline frame, one on buckram, one on wire and one on willow.

*Household Arts 5, 6, 7. Selection and Preparation of Food.* Three terms of the selection of food in terms of its nature, composition, and cost. The first course deals with the principles of cookery. The second and third terms consider problems in food costs, marketing, food combinations, and meal service.

*Household Arts 9. Household Arts Organization.* This course deals with Household Arts education. A study of the history of the movement, the organization of courses of study, the presentation of lessons, and equipment.

Teaching Household Arts. Supervised teaching with a minimum of thirty lessons taught.

*Household Arts 11a. Nutrition.* A study of food and its relation to the body. Text: The Chemistry of Food and Nutrition, Sherman.

*Household Arts 11. Dietetics.* Food requirements of individuals and families for varying conditions of age, sex, occupation and income. Text: Laboratory Manual for Dietetics, Rose.

*Household Arts 12a. Home Management.* Budget studies, systems of household accounts, standards of living, and organization of household labor. Also a study of household equipment. Practice work to be arranged in Senior Year. Text: Andrews' Economics of the Household.

*Household Arts 12b. Home Planning,* style of architecture, furnishings and interior decoration, heating, lighting, and water supply.

*Household Arts 12c Home or Institutional Problems.* Supervised home or institutional management, including four weeks of practical work to meet the Smith-Hughes requirement. Special problems in invalid cookery and demonstrations.

## MANUAL ARTS.

LOUIS C. PETERSEN.

J. H. SCHROEDER.

The department is equipped with benches, tools and power-driven machinery, suitable for carrying on construction work in woods and metals according to modern industrial practice. This affords students an opportunity to develop skill in the use of tools; to gain experience in managing different kinds of machines; to acquire knowledge of industrial processes and modern shop methods of drawing, designing, and construction; to study the properties of different materials, their history and industrial importance; to organize subject matter for shop courses; to obtain training in teaching classes in the manual arts.

*Man. Arts 1. Method Elementary Construction.* For teachers of the lower grades. Study of purpose and nature of contents of courses. Choice of materials. Technical and expressional handwork. Processes of construction. Preparation of materials. Management of equipment. Methods in organization and presentation of subject matter. Outline of courses. Text: Illustrative Handwork—Dobbs.

*Man. Arts 6a. Pattern Making.* Study of draft, shrinkage and finish, coring, split and loose piece patterns. Making of wood pulley and gear patterns from segments. Foundry practice in moulding and core making. Operation of brass furnace. Study of cupola operation, iron and alloys.

*Man. Arts 7. Forge Work.* The student learns the management of the fire and the grades of heat, the use of tools and appliances, the different kinds of blows and forging operations, such as drawing, bending, upsetting, forming, straightening, twisting, welding, and tempering. Exercise involving these various steps are worked out. Properties of metal are studied.

*Man. Arts 8. Art Metal Work.* This work includes the making of angles, forming curves, binding, punching, riveting, filing, sawing, drilling, beating, annealing, soldering, etching and coloring by heat and chemicals. Problems incorporating these operations are worked out.

*Man. Arts 9 and 10. Machine Shop Practice.* The student gains experience by doing practical work at the vise, the drill press and the lathe. He makes an analytical study of the shape and function of details of tools and machines, properties of metals, cutting tools and speeds. Text: Lathe, Bench, Forge—Burghardt.

*Man. Arts 10a. Machine Shop Practice.* This course includes work on the planer, scraper, fitting and assembling machine parts; building speed lathes. Text: Machine Tool Operations—Burghardt.

*Man. Arts 11, 12, and 13. Mechanical Drawing.* The work begins in the fall and continues through the year. It includes the use of instruments, applied geometry, lettering, orthographic projection, developed surfaces and intersections, pictorial representation, technical sketching, architectural drawing, machine drawing, tracing and blue-printing, strength of material, and specifications. Text: Engineering Drawing—French.

*Man. Arts 31. Mechanics of Machinery.* Motions and velocities. Instantaneous centers. Velocity diagrams. Motion mechanism. Cams. Gearing. Gear trains. Belting. Intermittent and quick-return motion. Text: Mechanism—Keown.

*Man. Arts 17. Constructive Design.* A detailed study is made of the principles governing contour outline, spaces and masses as related to the proportions of furniture, machinery, and buildings. Projects are designed subject to the requirements of adaptability, strength, and beauty for the purpose intended. Text: Industrial Arts Design—Varnum.

*Man. Arts 18. Instrumental Perspective.* This course treats of the location on the picture planes of the perspective of points, lines, surfaces and solids. Application is made in drawings of houses and parts of machinery. Text: Perspective Drawing—Lawrence.

*Man. Arts 20. Methods in Manual Arts.* A study of the principles, origin and development of manual training in the school. Trade guilds and unions, relation of youth to industry, factory system and shop management. Place of manual arts in the schools. Texts: Teaching Manual and Industrial Arts—Griffith. The Manual Arts—Bennett. Principles and Methods of Industrial Education—Dooley.

## COMMERCIAL.

T. L. BRYANT.

EDWARD V. MILES, JR.

EMMA FRANCIS.

*Commercial 7. Bookkeeping.* This course in introductory bookkeeping is planned for those who have never studied the subject. The work is taught on the laboratory plan. The double entry system is introduced in the beginning and all the laws governing the debit and

credit of business transactions are fully explained and mastered. The journal, day book, cash book, sales book, purchase book and the auxiliary books are introduced and their use in accounting fully demonstrated. A complete line of business transactions is placed in the books of original entry, posted to the ledger, trial balance taken, inventories entered, and accounts closed. A comprehensive study of the financial statement is made. Text: McKinsey's Bookkeeping and Accounting, Vol. 1.

*Commercial 8. Bookkeeping.* Partnership accounting is studied and several sets are worked out. This course embodies all the principles taught in Commercial 7. The student is familiarized with negotiable instruments and their use. Text: McKinsey's Bookkeeping and Accounting, Vol. 2.

*Commercial 9. Bookkeeping.* Corporation and Manufacturing Accounting are offered in this course. It takes up the changing of books from single proprietorship and partnership to a corporation. In this work the latest systems of accounting are presented. Commercial 6, 8 and 9 require two hours each, the first is used for discussion, and the second for laboratory work under supervision. Text: McKinsey's Bookkeeping and Accounting, Vol. 3.

*Commercial 13. Commercial Law.* The aim of this course is to give a comprehensive training in the law pertaining to business. In the text the fundamental and governing principles of law are stated; differences in fundamental principles of dissenting authorities are referred to. Leading illustrative cases are given.

Contracts, Sales, Negotiable Instruments, Agency, and Bankruptcy are among the topics studied. Text: Burgess' Commercial Law.

*Commercial 14. Commercial Law.* This course is a continuation of Commercial 13, covering Bailments, Partnership, Corporations, Insurance and Property.

*Commercial 26, 27, and 28. Advanced Accounting.* A second year course in accounting designed to give intensive study in theory and practice. The course deals with partnerships and ventures, corporations, investments, stocks and bonds, depreciation, reserves, surplus, dividends, corporate obligations, balance sheet and profit and loss statement, statement analysis for credit purposes, statement analysis for investment purposes, Mergers vs. Consolidations, Parent vs. Holding Companies, consolidated statements and fiduciary statements. Text: Advanced Accounting—Bennett.

*Commercial 29. Principles of Economics.* A general survey of industrial society, its structures, its institutions, its operations. The first part of the course examines briefly the structures of medieval industrial society and the evolution of modern capitalistic industry. The second part of the course deals with certain outstanding features of the present industrial society, such as private exchange cooperation; the pecuniary organization of society; the significance of technology; specialization and interdependence; risk and risk-bearing; concentration in large-scale production; ownership of wealth and income, and control of industry; impersonal relations; the guidance of economic

WHEELER LIBRARY

activity. The third part of the course is concerned with private property; competition and social control of industrial activity. Texts: Our Economic Organization—Marshall; Industrial Society, Marshall & Lyon.

*Commercial 30. Principles of Economics.* A continuation of Course 29, being designed to work out the principles of value, including those determining rent, wages, interest and profits, in our pecuniarily organized society. Text: Principles of Economics by Seagar.

*Commercial 31. The Financial Organization of Society.* A broad general survey of the whole financial system. It includes a study of the nature and work of the various types of financial institutions, of the forces that have led to their development, and of their relation to the organization of industrial society. The principal forms of financial institutions covered are: coinage and monetary systems; credit; commercial banks; savings banks; bond houses; trust companies; stock exchanges and the various forms of cooperative credit associations. Text: Financial Organization of Society—Moulton.

## LIBRARY SCIENCE.

MIRIAM HERRON.

*Lib. 1. Library Methods.* The modern curriculum demands that, for successful school work, the library must be used by teachers and pupils. The teacher of today must know how to use a library intelligently and be able to direct the children's reading.

An elementary course in library science for Normal School students and teachers who may have charge of small school libraries in rural communities and small towns, is offered the Summer Term. The aim of the work is not to train librarians but to acquaint teachers with library indexes to prepare them for selecting books for supplementary work, for directing the children's reading, and for making the school library valuable to pupils. Some of the subjects discussed in the course are: (1) care and treatment of books; (2) selection of books; (3) use and object of the card catalogue; (4) Dewey decimal classification system; (5) general reference books; (6) periodical literature; (7) children's literature; (8) organized library factors; and (9) preparation of a bibliography. The course consists of lectures and practical problems. No text is necessary.

## THE LIBRARY.

The Wheeler Library possesses a working library of nearly 34,000 books and 2,000 pamphlets. Both books and pamphlets are classified according to the Dewey decimal classification. The dictionary catalogue has three entries (author, title and subject) for every book, and many books have analytical subject headings in addition. The books have been carefully selected with reference to the needs of the various departments. They comprise the standard works in literature, travel, history, science, philosophy, pedagogy, and art; and general

works of reference, including dictionaries, encyclopedias, yearbooks, atlases, and books of quotations. All periodical literature which is of permanent value is bound and made accessible by Poole's index and the Reader's guide. Nearly one hundred and fifty of the best current periodicals are received in the library, as well as many county newspapers. The library contains much bibliographical material on children's literature and many beautifully illustrated books for children. There is a large collection of classified pictures for use in all departments. Numerous government reports are received and catalogued.

The library is open on school days from eight to five-thirty and on Saturday mornings. During the Summer Terms special hours are announced.

### THE TRAINING SCHOOL.

The Training School is organized into two units, the elementary school, consisting of grades one to six, inclusive, and the secondary school, including the Junior High School, grades seven to nine, inclusive. These groups of pupils furnish not only an opportunity for practice teaching, but an opportunity for observation in theory and practice of teaching for the various classes doing normal school work.

Normal school students are admitted to *Practice One* in their junior year. During the first half of this term an effort is made to fit the student to take up the work of teaching a definite class and a definite subject without too great a loss to the class, and with a minimum of loss to himself. Brief studies are made to discover the practical values to the teacher of a knowledge of the aim in education, the function of the school, the function of the different lines and units of work, the cycles of child development, and of some of the elementary school practices—the problem method, the project method, and the socialized recitation. The work consists of library reading, round table discussion and lecture.

The second half of the term is devoted to round table discussions, observation of lessons by critics and efficient practice teachers, and to the organization of lesson units into plans.

*Practice Two, Three, and Four* are taken in the *Senior* year by those who have had *Practice One*. The work in the Allyn building consists of plan writing and daily teaching in a single subject in one grade. The object of this work is to develop a high degree of technique in the teaching process. The work in the Brush School will require the practice teacher to take full charge of a room through several recitation periods. The work here is intended to develop a high degree of efficiency in school management and administration. The teacher must take full charge of records and make the usual reports. There will be a room critic in addition to a general supervising critic.

Those students taking *Practice Two, Three, and Four* should, if possible, keep the eighth hour free for meetings, and consultations.

It is advisable for a student teacher to do work in each of the several departments of the Training School, but opportunity will be

GYMNASIUM

given to specialize in any one department. The work in the Junior High School will be limited to those students of maturity, experience and efficiency who expect to teach in our best secondary schools.

While there will be a general uniformity in plan writing, yet each critic teacher will use his own individuality in working out the details. Consultation periods, and special meetings will be worked out independently by each critic teacher.

A thorough mastery of subject matter is required of all those who teach in the Junior High School. This will be judged by the number of courses previously taken in the chosen line in the other normal departments.

Two units of Practice are offered in the Senior College and one required. This work should be done in the secondary courses and under the supervision of the department head.

The larger supervision of the work of the Training School will require general meetings of all critic and student teachers. This work will be in charge of the superintendent. At such meetings a discussion will be made of the particular course of study—its origin in life, its unification, its lines of work, their function in the course, the adaptation of the course to the child at different levels of his growth, etc. Special or division meetings will be held, at which time only those teachers immediately concerned will attend. At these meetings the details of work will be considered.

*Special Notice:* Every effort will be made to accommodate teachers in service who can attend Mid-Spring and Summer terms only. Those who must get practice teaching in these terms should write in for places as soon as they are sure they are to attend in these terms. Names will be filed for work in the order of the receiving of the applications. Opportunities for practice teaching in these terms are very limited. In the Summer term, the first four grades only are in attendance. *Practice One* is open to students in both Mid-Spring and Summer terms, and should not be pushed aside for other work, as it is preliminary to *Practice Two*. Do not expect to carry more than one-half unit of practice work in either Mid-Spring or Summer term. In the second summer quarter, no practice work will be offered except in the Senior College course.

## RURAL DEPARTMENT.

W. O. BROWN.

ALICE BELLE FOSTER.

During the year beginning September, 1923, we have had charge of three rural schools for the purpose of giving rural practice teaching to those who have elected to teach in the country and in small villages.

The Glade School district No. 96 in Jackson County has been under our supervision for three years. In addition to this school two

others have been under our direction during the past year,—the Bridge, No. 92 in Jackson County, and the Stone, No. 39 in Williamson County.

Within the past year 135 different teachers have taken one or two terms of four weeks each in one or another of these rural schools. Many of these are already under contract to teach in the country or in villages. Added to these are a number of others who previously had taken this rural practice. Taken together this makes a respectable showing among the rural and village teachers of Southern Illinois. Almost without exception these teachers testify to the efficacy of the suggestions and help which they received in this rural practice.

It is our purpose to follow up these teachers as far as possible to see what success they are having in their actual teaching experience in order to strengthen our course in its weaker phases. Several of them, it is now known, have met with such good success that their salaries have been materially increased. Others have proved quite satisfactory, and with some more practical experience they will be numbered among the best teachers.

For the coming year we have agreed to teach five of these rural schools. This will place the rural department of this institution in the front rank of all such departments among the state teachers colleges of the United States.

The rural schools to be under our direction for the coming year follow:

The Glade, Dist. No. 96, Jackson County.

The Bridge, Dist. No. 92, Jackson County.

The Buckles, Dist. No. 98, Jackson County.

The Stone, Dist. No. 39, Williamson County.

The Foreville, Dist. No. . . . ., Williamson County.

All of these schools are to begin Monday, September 8, two weeks before the opening of the College. A sufficient number of practice teachers have signified their desire to do practice work during vacation that we anticipate no confusion at all in launching this important undertaking in good form.

The course in rural practice teaching will consist in—

(a) Attention to the purely physical phases of rural or small village schools; such as, the proper heating, lighting and ventilating of rooms; cleanliness in all its aspects; water supply; blackboards; maps; globes; libraries; toilets, etc.

(b) The beautifying of school premises, clean up days, patrons days, parent-teacher associations, club work for boys and girls.

(c) Rural health problems, play and playground activities with a touch of rural sociology.

(d) All routine factors of school management, as, the passing of lines, passing of working materials and other factors in time-saving.

(e) The use of the state course of study and some supervised study and individual instruction.

(f) The proper use of maps, globe and other apparatus.

(g) The technique of teaching Reading, Spelling, Writing, Arithmetic, Language, Geography and History.

(h) Methods of control, the proper questions to ask, etc.

During the year just closing courses in Rural Education have been offered in the regular classes at the College. Approximately two hundred fifty students have availed themselves of these. It is the purpose to offer these or other courses in Rural Education throughout the coming year. One in particular to which attention is called carries with it credit in practice teaching.

Many requests have been made for a course in Rural Education for Junior College students who expect to teach in rural or village schools before finishing in the Junior College. It is hoped that such a course may be offered in the Summer Term of 1925.

## HIGH SCHOOL DEPARTMENT.

A department accommodating more than four hundred high school students is maintained. In common with all the better class teacher training institutions we find it necessary to provide practice teaching of secondary rank to fit our graduates for high school positions. Furthermore, conditions in Southern Illinois cause us to enroll a good many students who have never had secondary privileges and who are too old to feel at home among the boys and girls of the ordinary high school. In addition to all this, we have a good many ambitious country boys and girls from sixteen to twenty years of age who wish to enter the teaching profession but who have never had any high school training. These mature students are at the end of three years of training recommended for the provisional certificate. In order to secure this the student must not only have done three years of work beyond the eighth grade, but he must have had at least one term of rural school management, a half term of "lesson-plan" work, and one term in rural practice. To enable us to carry out this program we maintain a rural practice school system which includes five rural schools, three in Jackson County and two in Williamson County, all of these on the hard roads system out of Carbondale. —

ALLYN BUILDING

## HIGH SCHOOL PROGRAM.

## FALL TERM

	Time	English			Mathematics			Language	
		H. S. Gram.	Eng. I	Eng. III		Pl. Geom.	D. Arith.	1st yr. Lat.	1st yr. Fr.
1	8:15

## SUGGESTED SECONDARY COURSE.

## First Year.

Fall.	Winter.	Spring.
English I	English I	English I
Algebra I	Algebra I	Algebra I
Elective	Elective	Elective
Elective	Elective	Elective

## Second Year.

English II	English II	English II
Pl. Geometry	Pl. Geometry	Pl. Geometry
Biology	Biology	Biology
Elective	Elective	Elective

## Third Year.

English III	English III	English III
Gen. History	Gen. History	Gen. History
Elective	Elective	Elective
Elective	Elective	Elective

(Students who expect to teach after this year should carry Rural Education and Rural Practice as extra subjects)

## Fourth Year.

English IV	English IV	English IV
U. S. History	U. S. History	U. S. History
Elective	Elective	Elective
Elective	Elective	Elective

Following are the subjects open to high school students:

## LIST A.

English I, II, III.....	3 years
Algebra I.....	1 year
Plane Geometry .....	1 year
Physics, or Chemistry, or Biology, or Physiography (each with laboratory work) .....	1 year
	<hr/> 6 years

## LIST B.

Latin .....	1 to 4 years
French .....	1 to 2 years
English IV .....	1 year
*Advanced Algebra .....	$\frac{1}{2}$ year
*Solid Geometry .....	$\frac{1}{2}$ year
*Trigonometry .....	$\frac{1}{2}$ year
General History .....	1 year
American History and Civics .....	1 year
Commercial Geography .....	$\frac{1}{2}$ year
*Geology .....	$\frac{1}{2}$ year

MAIN BUILDING

Physiography .....	1 year
Physiology .....	$\frac{1}{2}$ year
Zoology .....	$\frac{1}{2}$ year
Botany .....	$\frac{1}{2}$ year
Physics .....	1 year
Chemistry .....	1 year

## LIST C.

Agriculture .....	1 to 3 years
Bookkeeping .....	1 year
Business Law .....	$\frac{1}{2}$ year
Commercial Arithmetic (only after Algebra) .....	$\frac{1}{2}$ year
*Domestic Science .....	1 to 3 years
Drawing, Art and Design .....	$\frac{1}{2}$ to 1 year
Drawing, Mechanical .....	$\frac{1}{2}$ to 1 year
Manual Training .....	1 to 2 years
Music .....	1 to 3 years
Shorthand and Typewriting (together) .....	1 to 2 years
Education .....	1 year
Grammar .....	$\frac{2}{3}$ year
Penmanship .....	$\frac{1}{3}$ to 1 year
Physical Training .....	$\frac{1}{3}$ to 2 years

Of 16 year credits required for graduation, the 6 units of List A are prescribed for all courses. Of the 10 units that remain, 6 must be selected from List B. The remaining 4 units may be selected from List B or List C or both.

**Additional Requirements for Special Courses.**

Students who expect later in College or University to take up any of the following courses:

Literature and Arts, Journalism, Pre-Legal, Household Administration and Home Economics must take 2 years of Latin, French or Spanish (both units in the same language).

For Pre-Medical courses, students must have two years of the same foreign language and also 1 year of History and Civics.

For University courses in Chemistry and Chemical Engineering students must have 2 years of French, 1 year of Chemistry in addition to another unit of laboratory science from List A, and also Advanced Algebra  $\frac{1}{2}$  year.

For University courses in Commerce and Business Administration, students should take 2 years of Latin, French, or Spanish (both units in the same language) or Advanced Algebra  $\frac{1}{2}$  year and Solid Geometry  $\frac{1}{2}$  year or Science (in addition to the unit of List A) 1 year.

Students who look forward to Engineering must take Advanced Algebra  $\frac{1}{2}$  year and Solid Geometry  $\frac{1}{2}$  year.

\* Courses not scheduled but will be offered if there is sufficient demand.

For University courses in Agriculture, 1 year of Science (in addition to the unit of List A) must be taken.

For University courses in Music, the student must have Latin, French or Spanish, 2 years (both units to be in the same language), and Music 2 years.

The student who plans to take University courses involving College Mathematics, Physics, or Advanced Chemistry including the curriculums in Home Economics, the Pre-Medical Curriculum and the Curriculums in Commerce and Business Administration in which University courses in Mathematics are prescribed should take  $\frac{1}{2}$  year of Advanced Algebra.

## ENGLISH.

### *First Year.*

Literature and Life. Book One; drill in punctuation, oral and written composition. In addition, the following books will be read:

*Eng. I. (Fall Term).* Selected novels, Christmas Carol.

*Eng. Ia. (Winter Term).* Last of the Mohicans, Treasure Island.

*Eng. Ib. (Spring Term).* Merchant of Venice, Richard Carvel.

### *Second Year.*

Literature and Life. Book Two; punctuation, oral and written composition. In addition, the following books will be read:

*Eng. II. (Fall Term).* Quentin Durward, The Crisis:

*Eng. IIa. (Winter Term).* Ivanhoe, Man for the Ages.

*Eng. IIb. (Spring Term).* The Oregon Trail or Vandermark's Folly, Merchant of Venice, Idyls of the King.

### *Third Year.*

Halleck's English Literature, Century Hand Book.

*Eng. III. (Fall Term).* Prologue to Canterbury Tales, Macbeth, The Moonstone, The Virginian.

*Eng. IIIa. (Winter Term).* Carlyle's Essay on Burns, Sir Roger de Coverly, David Cooperfield, Modern Plays.

*Eng. IIIb. (Spring Term).* Essay on Johnson, Palgrave's Golden Treasure, Kenilworth, Vanity Fair.

### *Fourth Year.*

*Eng. IV, Eng. IVa, Eng. IVb.* Century Hand Book, House of Seven Gables, Hamlet, Talisman, Three modern novels, Moulton's Short Stories, Twelfth Night, Jane Eyre, Franklin's Autobiography, Emerson's Essays, Burke's Speech on Conciliation, Theme Building.

*H. S. Gram. 1 and 2.* High School Grammar may be substituted for any two terms of third or fourth year English.

*Eng. Gram. 1. Review Grammar.* This course is for third and fourth year pupils. It is designed especially for teachers who will use Gowdy's Grammar.

## LATIN.

Four years of secondary Latin are offered. The general aim of the course is to create an abiding interest, to develop subsidiary values, and to prepare for college.

*Latin 1, 2, 3.* Text—Place's Beginning Latin.

*Latin 4, 5, 6.* Texts—Place's Second year Latin and Scott's Latin Composition. The equivalent of the traditional four-book course is covered.

*Latin 7, 8, 9.* Cicero's Orations—texts, Johnston and Kingery and Scott's Prose. An amount equal to six orations is required. With strong classes some letters, or a bit of Ovid or of Sallust may be read.

*Latin 10, 11, 12.* Virgil—text, Knapp's Virgil's Aeneid with Ovid. An effort is made here to develop a feeling for some of the finer literary qualities involved in translation.

## FRENCH.

*French 1, 2, 3.* Méras, Le Premier Livre. Worman's First French Book. Guerber, Contes et Légendes.

*French 4, 5, 6.* Lavissee, Histoire de France. Mairet, La Tâche du Petit Pierre. Dumas, Le Comte de Monte Cristo. Mérimée, Colomba. French-English Dictionary. Reference Grammar. French Newspapers.

## ART.

*Art 25. Freehand Drawing.* This course is offered to meet the requirements of the State University for college entrance. Time required—two hours daily. Subjects covered—perspective, pencil technique, design, blackboard drawing, and elementary water color.

Fall Term: One hour of perspective and one hour of blackboard drawing.

Winter Term: One hour of perspective, one hour of design, and pencil technique.

Spring Term: Elementary water color.

## HISTORY.

*Hist. 4. Illinois History.* Illinois History is a Spring term subject in the second year of the six year courses. Two aims are held in view in presenting the subject: To meet the needs of those who must prepare for the teachers' examination; and to show the intimate relation of Illinois History to the more general subject of United States History.

Some attention will be given to the matter of local history, since the students from Southern Illinois will find many matters of State and National importance in their several counties.

*Hist. 1. American History.* This course has for its aim to build up a background for American History by giving a brief survey of European History prior to the discovery of America.

When this background is fairly well understood, the work of discovery, colonization, and settlement in America is taken up. This is followed by the study of English colonial institutional life, and a study of the causes which brought about the political separation of the colonies from the mother country.

*Hist. 6. American History.* This course comes the Winter term in the fourth year, and is a continuation of Course 1. The work begins with a study of the political separation of the American colonies from the mother country. Special emphasis is given to the formation of State Governments; The Confederation; The Constitutional Convention; Organization of the Government under the Constitution; The Rise of Political Parties; Internal Development. Attention is given to outside reading, and to reports on special assignments, and to written tests.

*Hist. 8. American History.* In this course we study the conditions which produced the Civil War; the war and its accompanying problems; the problems of reconstruction and more recent events.

*Hist. 7. Civics.* The course in Civics is made thoroughly practical by giving due emphasis to local and Illinois State Government, and the teacher's viewpoint is kept constantly in mind. The study of the Federal Government is made to reinforce the preceding terms in American History.

*Hist. 10. General History.* The course in General History continues throughout the year and comprises a general survey of Ancient, Mediaeval and Modern times. The Fall term is devoted to the study of Greek Civilization with a preliminary study of its Oriental background. Much outside reference reading and both oral and written reports are required.

*Hist. 11. General History.* See explanation of Course 10. Roman history is the subject of the Winter term's work. The period of the Dark Ages down to the age of Charlemagne is included. Much reference work, as above, is required.

*Hist. 12. General History.* This is a brief summary of the Middle Ages followed by a more intensive study of modern times. The European background of American history is kept constantly in mind. One or more themes giving the student some practice in the use of library material will be required.

## GEOGRAPHY.

*Geography 2 (C).* This course deals with the general principles of geography, followed by a careful study of the Continent of Europe. Considerable attention will be given to library work, thus acquainting the student with the chief sources of geographic information and how to use them. This is a 12 weeks' course with 5 recitations per week.

*Geography 3 (B).* This course is devoted to the study of North America. Library work is an essential part of the course. The aim is to give the student a knowledge of the chief sources of geographic

information and practice in using these sources, in the study of North America. This is a 12 weeks' course with 5 recitations per week.

*Geography 6. Physiography.* This is a High School course devoted entirely to the physical phases of geography and their influences. Laboratory work and field observations are an essential part of the work. This is an 18 weeks' course. Text: Salisbury's Physiography, Briefer Course.

*Geog. 5. Industrial and Commercial Geography.* This course presupposes Geog. 2 and Geog. 3, or their equivalent. The discussions deal primarily with the commerce and industries of the United States, but with a less intensive survey of other countries. Text: Smith's Commerce and Industry.

## SECONDARY EDUCATION.

*Education 1b. Rural School Management.* A course especially adapted to the conditions and needs of the one-room country school. One half of the term is devoted to such matters as organization, equipment, and control; the other half, to the technique of teaching and the making of lesson-plans. Texts: Wilkinson's Rural School Management, Charter's Teaching the Common Branches, and the State Course of Study.

## MATHEMATICS.

*Math. 14. Alg. I.* The fundamental operations with literal and signed numbers, scale drawings and graphs, simple equations, stating algebraically simple problem situations.

*Math. 15. Alg. I.* Factoring and fractions, stating and solving problems involving the difficulties of factoring and fractions, the line graph.

*Math. 16. Alg. I.* Simultaneous equations with both numerical and literal coefficients, with both integral and fractional terms, involution and evolution, radicals, and quadratics.

The student should plan to take these courses the first year beyond the eighth grade.

Students who have had no arithmetic beyond what they received in the eighth grade do not know enough arithmetic to teach the subject. A year of work in the high school grades is offered for them.

*Math. 1. D Arith.* A thorough review and drill in the fundamental processes, common and decimal fractions, denominate numbers, with special attention given to the weaknesses usually found. Attention is given to standard tests.

*Math. 2. C Arith.* Percentage and its applications. Type problems and their solution. Business usages and customs. This course specializes in the work outlined in the State Course of Study for seventh grade.

*Math. 10. B Arith.* Mensuration and allied topics,—lumber measure, metric system, longitude and time, involution and evolution. This course specializes in the work outlined in the State Course of Study for the eighth grade.

The student should plan to take Math. 1, Math. 2, and Math. 10, in sequence, the third year of his secondary work.

*Math. 31. Geom. I.* Book I of Plane Geometry.

*Math. 32. Geom. II.* Books II and III of Plane Geometry.

*Math. 33. Geom. III.* Books IV and V of Plane Geometry.

The usual theorems and exercises of Geometry are covered, including symmetry, maxima and minima, and incommensurables. Emphasis is placed upon proper methods of study. Power and independence are aims rather than retention of a large mass of information.

## HYGIENE AND PHYSICAL EDUCATION.

### *Women:*

*Physical Education I.* This course covers the full year. Classes meet daily. Posture Training. Recreational and Educational gymnastics. Apparatus work. Games. Folk Dances.

*Physical Education II.* This course covers the full year. Classes meet daily. Posture Training. Recreational and Educational gymnastics. Apparatus work. Organized games. Advanced Folk Dances. Aesthetic Dancing.

As a uniform costume is required, student sare requested *not* to obtain suits before entering the school.

### *Men:*

*Physical Education 1, 2, and 3.* Fall, Winter, and Spring Terms. Four periods per week. Fall Term setting up exercises, Winter Term basket ball, Spring Term baseball and other games.

*Physical Education 4, 5, and 6.* Fall, Winter, and Spring Terms. Four periods per week. Fall term a review of work covered the preceding fall and a continuation of the same. Winter Term indoor baseball and basket ball, Spring Term baseball and track.

## CHEMISTRY.

To meet the needs of students preparing for college the following courses, making a high school unit, are offered:

*Chemistry 1. Elementary Chemistry.* Recitations and laboratory work. Periods 1 and 2 during the Fall Term.

*Chemistry 2. Elementary Chemistry.* Recitations and laboratory work. Periods 1 and 2 during the Winter Term. Chem. 1 is prerequisite.

*Chemistry 3. Elementary Chemistry.* Recitations and laboratory work. Periods 1 and 2 during the Spring Term. Chem. 2 is prerequisite.

College students are not admitted to these courses.

## PHYSICS.

*High School Physics.* A year is given to Physics,—mechanics and heat the Fall Term, electricity the Winter Term, sound and light

the Spring Term. Seven periods per week. Practical Physics, Millikan and Gale. A Laboratory Course in Physics, Millikan, Gale, and Bishop.

## BIOLOGY.

*Biology 21. Elementary Botany.* An elementary course in Botany of high school rank. The study of plants is approached from the physiological viewpoint, with the nutrition of the plant as the central theme. Sufficient study of anatomy and physiology of plants is included to make possible an understanding of the processes of nutrition and reproduction in plants. Recitations five periods per week, Laboratory and field studies five periods weekly.

*Biology 1. Elementary Zoology.* This high school course in Zoology has as its purpose to give a general view of the field of Vertebrate Zoology. Type studies will be used to represent the great groups. Scientific approach will be given by the working out in the field and laboratory of a group of problems leading to the discovery and study of a few of the basic biological principles. These studies will also include an acquaintanceship with animal life in its ecological relations, geographical distribution and economic relations.

*Biology 4. Elementary Physiology.* This is beginning Physiology and is given in the second year high school. It includes human anatomy, the structure and elementary composition of the body, with the physiology, the performance of all the functions of the body. It also includes an elementary study of health and sanitation, especially the student's health, and the sanitation of the school and home. Spring or Fall Term. One hour of recitation and one hour of laboratory work daily,—120 hours.

## AGRICULTURE.

*Animal Husbandry 13. Farm Animals.* This is an elementary course in animal husbandry, covering the types and breeds, life history, native home, adaptability and popularity of our domestic animals.

*Animal Husbandry 13a. Farm Animals.* This is a continuation for six weeks of Animal Husbandry 13, completing the semester's work. Breed characteristics, food nutrients, an explanation of the balanced ration and the Babcock test will be the work of this course.

*Animal Husbandry 4. Poultry.* Selecting the farm flocks, types, breeds, varieties, feeding and general management.

*Animal Husbandry 1. Sheep.* Origin of the sheep industry, adaptability, types, breeds, market classes and grades, grades of wool, establishing the pure bred flock, grading for market, care and management, feeding and housing, adaptability to Southern Illinois.

*Animal Husbandry 2a. Beef Cattle.* The work in beef cattle includes the general problem of fattening cattle for market, relations of cattle feeding to soil improvement, business phases of feeding, pro-

duction and feeding of baby beef, market classes and grades, general equipment, diseases, breeding beef cattle, and the elementary principles of cattle feeding and breeding.

*Animal Husbandry 2. Dairy Cattle.* The dairy cow as a food producer, characteristics, types, breeds, native homes, historic development, adaptation to climatic conditions, judging, selection, breeding for production, and balanced rations, will constitute the larger part of this term's work.

*Animal Husbandry 24. Elementary Feeding.* This course deals with the classification, digestibility and functions of feed nutrients, values of feeding materials, and balanced rations for farm animals.

*Agronomy 13a. Elementary Soils.* The last six weeks of the Winter term will be devoted to the physical properties of soils, type soils, size of soil particles, pore space, internal surface area, water holding power, and air circulation.

*Agronomy 13. Elementary Soils.* This course will include the ten essential elements of plant food, sources of the different plant foods, water, air and soil, limiting plant foods, organic matter and legumes; crop rotation and the replacement of foods taken out by plants or crops, the purchase of limestone and rock phosphate, and the fundamental principles of a permanent fertility.

*Horticulture 5. Elements of Horticulture.* Fruit growing in general for home consumption, the family orchard, economic importance, general ornamental planting to beautify the farm home.

## MANUAL ARTS.

*Man. Arts 2. Woodwork.* Light wood construction and drawing suitable for intermediate grades, care and use of simple tools, study of woods, trees, fastenings and finishes. Discussion of lumbering, millwork and allied industries. Text, *Essentials of Woodwork—Griffith.*

*Man. Arts 3. Joinery.* Construction from common stock involving the different types of joints. Study of wood working tools and machinery, processes of making and finishing projects economically. History of the evolution of modern tools, machinery and factory.

*Man. Arts 4. Cabinet Making.* Practice in furniture construction, caning and finishing as employed by cabinet-makers. Carving, veneering and polishing. Study of design, period-styles and manufacture of furniture. Text, *Woodwork for Secondard Schools—Griffith.*

*Man. Arts 5. Wood Turning.* Care and operation of power machinery. Study of the use of turning tools for the different cuts. Practice pieces and application on useful objects. Center, faceplate and chuckwork. Text: *Art in Woodturning—Klenke.*

*Man. Arts 6. Pattern Making.* Study of draft, shrinkage and finish, coring, split and loose piece patterns and foundry methods. Practice in molding for simple castings. Text: *Wood Pattern Making—Hanley.*

## COMMERCIAL.

*Commercial 1. Penmanship.* This course presents the study of penmanship in the latest methods of developing the subjects. All of the work both in movement drills and in letter and word writing are studied in tempo.

The rhythm is first developed by counting. Drill on the straight line and the ovals, direct and indirect, constitute a part of each recitation.

The pedagogy of the subject as presented in the different compendiums of penmanship is carefully worked out and studied in class. Comparative values of different movements are presented, also the rise and fall of different systems.

A study of the plan as outlined in the State Course of Study is required of all taking this work.

Towards the close of each term opportunity will be given to all who desire to write for a Palmer's Teachers' Certificate. To possess a Palmer's Teachers' Certificate ranks the holder as fully equipped, not only as a master of the art of business writing, but also prepared to teach this subject in the most modern and up-to-date method. One-half credit is given for each twelve week term. Text: The Palmer Method of Business Writing.

*Commercial 3. Commercial Arithmetic.* Short methods in dealing with the fundamentals. Aliquot parts of 100. A mastery of the 45 combinations. Tables of denominate numbers. Fractions. Formulas used in percentage and their applications. Formulas used in mensuration. Solving and analysis of problems by mental processes.

Vocational problems in mensuration, lumber, building plastering, papering carpeting, painting. Land measure. Base line. Principal meridian. Township section and its divisions. Distance. Surfaces. Solids. Capacity. Ratio and Proportion. Longitude and Time. Text: Smith's Arithmetic of Business.

*Commercial 4. Commercial Arithmetic.* A mastery of single column addition. Some time will be given to double column addition. Short cuts in dealing with the fundamentals. The single equation method of stating and solving problems and checking results. Arithmetical problems in business.

Denominate numbers. Bills. Statements. Accounts. Sales. Shipments. Cash account. Bank account. Closing and ruling ledger accounts. Daily balances. Percentage. Profit and loss. Interest. Bank discount. Trade discount. Brokerage. Commission. Premium. Stocks. Bonds. Insurance. Taxes. Negotiable paper. Text: Smith's Arithmetic of Business.

*Commercial 5. Commercial Arithmetic.* Equation of accounts. Cash balance. Partnership. Trading account. Profit and Loss. Inventories. Financial Statement. Present Worth. Balance Sheet.

Building and Loan Associations. Terminating. Serial. Permanent. Earnings. Distribution of Profits. Annual Reports.

*Commercial 17. Shorthand.* The principles of the system as found in the first eight lessons of the Gregg Manual form the basis

of study. These principles include a study of phonetics and the characters to represent these sounds; the rules for formation of words; the use of the word signs; the phrasing devices for speed and legibility; writing from dictation, and reading from notes and printed plates. Texts: Gregg Shorthand Manual; Gregg Speed Studies; Graded Readings in Gregg Shorthand.

*Commercial 18. Shorthand.* The work started in Course 1 is continued. The Gregg Manual is completed and a theory test given. This work includes abbreviation of long outlines; prefix and suffix forms and more advanced phrasing. Texts: Gregg Shorthand Manual; Gregg Speed Studies; Graded Readings in Gregg Shorthand.

*Commercial 19. Shorthand.* Advanced dictation to attain speed and enlarge the vocabulary. Rapid, continuous sight reading and typewritten transcriptions from plates and notes. Special work in secretarial practice, using actual instructions and model stationery. Many phases of the business world are touched upon, such as railroad, mining, insurance and others. A note-taking speed 100 words per minute and a transcription speed of 40 words per minute are expected before completion. Method work if asked for. Texts: Gregg Speed Studies; Advanced Dictation and Secretarial Training.

*Commercial 23. Typewriting.* A study of the parts of the machine and their uses; care and cleaning of the machine. The learning of the keyboard by touch system and a series of drills fixing the position of each character. Frequent drills in rhythm and speed are a part of the program. Text: Intensive Touch Typewriting by Ross.

*Commercial 24. Typewriting.* A continuation of Course 1. Work in exercises requiring originality. Tabulating, making stencils, correcting rough draft, making carbon copies, and copying legal forms are phases taken up. Speed receives greater attention and the student is encouraged to earn one of the 40 word certificates issued by the typewriter companies. Text: Intensive Touch Typewriting by Ross.

*Commercial 25. Typewriting.* Open to those who have a speed of 35 words per minute. This term is devoted to the development of speed and accuracy in typing. Daily work is given so that the student may become master of his machine. The regular speed tests are given each month and certificates awarded as earned. A speed of sixty words per minute is necessary for completion. In addition to the work in typing, a thorough course in filing covering the theoretical basis and the practical use of filing devices is given. Texts: Intensive Touch Typewriting; Modern Filing.

SCIENCE BUILDING
