From their vantage points on the stair landings, this group of coeds at Woody Hall presented an interesting subject for the camera of Photographer Rip Stokes, of the SIU Photographic Service.

Alumni Clubs

Washington county alumni held a noon luncheon meeting Thursday, Oct. 15, at the Nashville grade school cafeteria, in conjunction with the County Teachers Institute.

Approximately 45 attended the affair, which was presided over by MARVIN C. MARTIN, 1939, chairman. Alumni Director Bob Odaniell spoke to the group on “Your Place in the Alumni Association.”

Martin was re-elected chairman for the coming year.

Monday, Oct. 19, about 36 members of the Franklin county club met for a 7:30 p.m. dinner at the Franklin Hotel in Benton. Dr. GUY LAMBERT, 1933, president, was in charge of the meeting.

As a part of the program, Willis G. Swartz, dean of SIU's graduate school, introduced three University foreign students, representing Korea, India, and the Philippines. Bob Odaniell spoke briefly, explaining the newly-adopted alumni association constitution to the club.

New officers for the coming year were elected, with WALTER COLLINS, ex-1927, as president; Mrs. GRACE WYKES, ex-1898, vice-president; and Miss ETHYL PYATT, 1925-2, 1940, treasurer.

Plans are being made by the State of Missouri alumni club to attend the SIU-Washington U. football game on Saturday afternoon, Nov. 14, in St. Louis, according to President A. R. McLIRATH, 1924-2. After the game, there will be a cocktail hour from 5:30 to 6:30 p.m. at the Melbourne Hotel, followed by a dinner meeting at which Glen "Abe" Martin will be guest speaker.

Dinner reservations, $2.50 per person, should be sent to Miss NADA GRAMMATICOFF, 5946 Oakerst Pl., St. Louis, Mo.
HUNTING
Now It's A Six Billion Dollar Business

By Dr. W. D. Klimstra
Director, SIU Wildlife Research

Recently the U. S. Commerce Commission reported that hunting and fishing by 33 million people is a six billion dollar business. Approximately 13 million hunters, (500,000 in Illinois) showed an average yearly expenditure of $316 dollars each.

This is probably the only big business in the world in which harvesting expenses are continually higher than the value of the crop. It continues to exist only because it's all for fun. In earlier times, however, it was a different matter.

Back in the days when men made their homes in caves and obtained food from Nature’s great warehouse there was no harvest problem. Scarcity crops resulted in primitive men tightening their belts or moving into virgin territories to establish a more secure home. Slowly crude tools were improved; the spear replaced the club and the throwing stick was followed by the bow. The plow evolved, the bow was replaced by the gun and finally the horse gave way to the tractor.

Our human race soon became drunk with these inventions and entered on a spree of devastation. Cities died; countries accepted famine as the normal lot of humans; and races of people disappeared from the earth. In the United States poor land practices made poverty and deterioration the rule rather than the exception for large portions of our population.

Miles of streams were destroyed, marshes drained, forests removed, soils depleted, wildlife slaughtered, all resulting in diminishing returns from one of the world’s favorite sports . . . hunting.

We must have been more intoxicated than we thought. Only in recent times have we really begun to sober enough to analyze the devastations that has been committed. The hangover resulted in a throbbing head and a dim vision, but we are beginning to recognize the mess of things. It is time we stepped off the merry-go-round. With a few more years of waste and destruction, there would have been no wildlife crop to harvest. Certainly our food crops would not have held up under such continued exploitation of the land.

On the farm, man plants and Nature furnishes the increase. More and more as man’s influence is extended, it comes to work that way with wildlife. However, in the case of wildlife most sowing is accomplished by leaving seed stock instead of planting it.

Many parallels exist between wildlife and farm management. None is more striking than the harvesting. The fundamentals are the same although crops and harvesting tools differ.

The wise farmer prepares his fields to make them suitable for the crops...
he plans to plant. He saves sufficient seed from the previous year to provide for this year's needs. As a precaution he saves more and plants more than are necessary if growing conditions are favorable. He is playing it safe, knowing that if seed germination is high, young plants may be so thick that competition for food, light and space may occur, and that thinning may be necessary.

The resulting crop may be good or poor but in any case when it ripens it must be harvested or the increase goes to waste. Fortunately crop production is rarely so poor that it does not exceed seed requirements for the next season. Long-time research in crop production has virtually assured good returns each year.

Livestock raisers begin the spring with the minimum number of animals necessary to produce all the young the summer forage can support. At the approach of winter when forage becomes scarce excess animals must be sold or supplementary feeds provided to carry them through the year. Temporary shelter may also become necessary during the critical winter months.

Carrying Capacity of Land

It is obvious that the important point in farming is the carrying capacity of the land. If soil fertility remains the same, each season and each field then has a poorly-defined maximum as to how much can be safely produced. If the crops considered are plants or animals, for each there is this limitation. Through exploitation, limits may be exceeded for a short time, but eventually this results in diminishing returns.

When old, sick and afflicted peoples were driven from the families of primitive tribes they were recognizing the limits of the carrying capacity of their range. Instinctively these people knew that their success rested in the pre-reproductive and reproductive segments of their families which were strong and healthy. Today many hunters and fishermen think that because cottontails are not under every clump of vegetation, a covey of quail in every fencerow, or streams not half fish and half water, the wildlife programs are poor investments. Our wildlife can be increased by research and management, but even these have limits beyond which they can not go.

The game crop, like other crops, must be harvested or it goes to waste for under normal conditions wildlife populations produce a surplus of animals. The size of this surplus is dependent upon the reproductive ability of the animal but even more on the capacity of the land or water to provide suitable conditions for their reproduction. The carrying capacity changes seasonally as the aspects of the units of land and water change, reaching a peak in the late summer and fall and low in late winter and early spring. Needless to say all environments do not have the same capacity to support wildlife because of the differences that exist in the units. Wildlife management then aims toward increasing the carrying capacities of lands and waters which results in an increased wildlife population available for hunting.

Hunting Not Harmful

If we leave enough wildlife stock for seed, shooting does not reduce the potential of the game crop. In fact, most evidence indicates that thinning out the fall crop actually makes for a better crop next year. A population, like a farmer's livestock or even man himself, under crowded conditions results in a condition of disease, starvation and old age which is followed by low reproduction and survival. Consequently, provided adequate seed stock is left, we should not be charged with brutality for hunting.

The allowable take of game depends upon the size of the fall population and the conditions for survival during the lean seasons of the year. A farmer has a distinct advantage with his plants and animals for his crops are under daily inspection. With wildlife the situation is obviously different. This introduces a factor of uncertainty both as to total populations and as to the amount of game that may be safely removed. The situation is further complicated by the fact that most of the game harvesting is not done by the farmer but by persons unfamiliar with local conditions. Obviously, controls then should be left to professional wildlife personnel who from research and surveys are qualified to formulate hunting seasons, daily limits, hunting methods and other regulations which will result in sustained yields of the game crop.

The fact that professional persons should establish regulations does not relieve the individual hunter of personal responsibilities. Every hunter is responsible for knowing the details of game regulations. Ignorance is no excuse for violation. Professional wildlife agencies or agents will provide such information upon request.

When considering the game harvest, there is an inclination to overlook the fact that there is an important item of waste. Unretrieved dead and injured animals often contribute five to twenty per cent of population losses during the hunting season. This waste can be greatly reduced if shooting is improved, shots passed up that are beyond normal range, and a careful search made for game shot down.

A discussion of hunting should doubtless contain much about safety. However, this is intentionally omitted. The fool who is consistently pointing his gun at a companion or shooting at every movement in the vegetation is beyond any power of persuasion. The best advice is to...
The map above designates the three conservation zones of Illinois which take into account climatic differences in determining hunting seasons for various types of game.

stay away from him. If he needs a companion, arrange so that it is someone you don’t like.

Hunting Outlook for 1953-54

Barring unfavorable conditions, Illinois hunters can expect reasonably “good” game populations this fall and winter, as indicated by surveys of various state, federal and private agencies. Firing, which began with the opening of the squirrel season Aug. 1 in Southern Illinois, will continue through Jan. 15. In all, Illinois hunters can take nine types of wildlife with the gun, exclusive of birds and animals upon which there is no closed season. Game animals and birds that can be taken include squirrel, rabbit, raccoon, opossum, quail, pheasant, dove, duck and goose.

The prolonged drouth has made squirrel hunting extremely difficult in most areas of the state. It will likewise affect most other hunting should it continue. A lack of water, such as occurred last year, can make many stop-over places for waterfowl so unattractive that the birds will scarcely stop. Continued mild weather may so delay the mass migration of northern ducks that the season will be virtually over before large flights arrive in Southern Illinois. Because of the dry and dusty conditions prize dogs will experience much difficulty in finding game should the drouth continue into the remainder of the hunting season. Hunters must not be responsible for fires should they wish to continue their favorite sport.

Generally, our overall resident game is probably equivalent in numbers to that of last year, if not slightly better in the case of the rabbits. Among the migratory forms, doves seem to be increasing over the previous very low years, geese are equivalent or slightly higher and ducks probably some lower. In the case of the latter group, some species show an increase, but the mallard, which makes up the bulk of the Mississippi Flyway kill, is reported to be decreased by as much as 25 per cent from last year.

Where to Hunt What

Although this information is based on hunter-kill reports for 1950-51 as analyzed by Marquardt and Scott of the Illinois Natural History Survey Game Section, it will in general indicate where hunting for specific game species is best in Illinois. This analysis shows the relative degree of success of hunters in killing the various kinds of game available.

On the basis for per cent of successful hunters they can be ranked as follows: rabbits, squirrels, pheasants, quail, ducks, doves and geese. However with regard to per cent of the total kill they rank: rabbits, squirrels, quail, ducks, doves, pheasants and geese. When analyzed on the basis of zones, the Southern zone leads in the kill of rabbits, quail and geese whereas the Northern zone is highest in numbers of pheasants, ducks and doves. The Central zone is second best for any of the animals reported.

Rabbits contributed about twice as many to the hunters’ bags as did any other game species. Best results were in the northern and central counties of the Southern zone. Squirrels showed the best kill in the western two-thirds of the Southern zone above the lower tier of counties. Quail kills were best in a band four to five counties wide across the Southern zone from the southwestern to the southeastern corner. Ducks were taken in greater numbers along the Illinois river largely in the Northern zone. In the Southern zone, Alexander, Franklin and Williamson counties showed average to good kills in the vicinity of the state and federal refuges. Dove kills, although highest in the Northern zone, (Continued on Page 12)
Clara Baudison models a type of Hawaiian dress, the muumuu.

The only Alaskan igloos seen by Mrs. Helen Matt are made by children at play, like the one below.

Gladys Lynch celebrates Christmas in the warm climate of Uruguay.

Alumni Around The World

Life Outside These United States Has Proved Both Satisfying and Surprising to Former SIU Students With a Peculiar for Travel

The magic of far-away places has beckoned a number of Southern alumni, who may be found anywhere from Ekwak, Alaska, to Hawaii, to Punjab, Pakistan.

A recent mailing to the 42 foreign addresses in the alumni file brought wide-spread response and some inside information on life abroad.

For instance, from the Hawaiian Islands came news of as many as five alumni—CLARENCE L. HODGE, 1932, and wife, JANE WARREN Hodge, 1933, GENE WARREN Hodge, 1933, GENE TRINI, 1937, CLARA MARIE BAUDISON, 1952, and D. RANSOM SHERRETZ, 1926.

The Hodges, who have been living in Honolulu for the past 12 years, first came to Hawaii on a 92-foot schooner in 1940 as leaders of a group of students and liked it so well that they came back the next year to live.

They and daughter Shore, four years old, have just moved into a brand new home, completed in August, at Waialae-Kahala behind Diamond Head. Hodge is director of public relations for the Honolulu Chamber of Commerce.

Apart from the undue influence of a husband employed by the Chamber of Commerce, Mrs. Hodge is "sold" on Honolulu, which she describes as "a modern American city in a tropical setting, with a cosmopolitan population and a relaxed pace . . . the climate is probably the most pleasant in the world."

Many alumni passing through this crossroads of the Pacific during World War II and in peacetime have stopped off for a visit, the Hodges report.

Their most recent guests, during the past summer were EARL TROBAUGH, ex-1939, and THELMA PHILLIPS, 1935.

Another Hawaiian

Also a resident of Honolulu is D. RANSOM SHERRETZ, 1926, who will be remembered as a past president of the Honolulu alumni club.

In June, 1953, Sherretz was appointed a member of the Governor's Cabinet for the Territory of Hawaii, with the title of executive secretary of the Employees' Retirement System which covers all employees of the territory and its political subdivisions.

Before moving to the islands, he taught at Collinsville high school six years, and then in Hawaii taught at the University of Hawaii, served as personnel and training officer for the Honolulu police department and was personnel director of the city and county of Honolulu for fourteen years.

At Southern Sherretz was a student from the first grade until he received his bachelor's degree and was editor of the Egyptian, president of the senior class and founder of the first social fraternity, Sigma Alpha Pi.

He has taken just as active a part in Hawaiian affairs and is a past president of the Honolulu Lions club, past district governor of the Lions club of Hawaii and Guam, member of the Outrigger Canoe club, officer and director of several island corporations, deacon at Central Union church, a member of the Board of Managers of Mid-Pacific Institute, and a past president of the alumni association of the SOUTHERN ALUMNUS
University of Hawaii, where he received an M. A. degree.

He and Mrs. Sherretz, the former Lucy Baldwin, of Hamakuapoko, Maui, and their three sons reside at 2426 Oahu avenue in Honolulu.

Police Chief

Still another resident of Honolulu is Gene Trini, whose job as Chief of Naval Base Police places him in charge of 152 persons, including detectives and policemen who make up the foot and patrol divisions. Naval Base Police have the important task of guarding Navy installations, the shipyard and housing units for Pearl Harbor.

Trini, who has been chief of police since 1946, is a member of the International Association of Chiefs of Police, an honor much coveted in the police profession. He also maintains a law practice, and is a member of both the Territorial Bar association and the Illinois Bar association. He received his law degree from the University of Illinois.

Aside from police and law work, Gene is also known as one of the foremost interpreters of basketball rules in Hawaii and has been president of the Honolulu Board of Basketball Officials for the past three years. The leading game official, he holds clinics and teaches basketball officiating and has recently been appointed a member of the National Rules Examination Committee for two years.

Basketball has always been his favorite hobby—he played on the varsity team at Southern—and he credits an SIU course in basketball officiating under Capt. McAndrew with much of his present success in that sport.

Trini, his wife, Marvallie, and two children, Gene Allan, 5, and Marvallie Patricia, 2, intend to make the Islands their permanent home. They are now living at 629 17th street, CHA-3, Honolulu.

Hawaii for Teachers

"Hawaii is the place for teachers who favor short school days and plenty of holidays and vacations," writes Clara Baudison, who spent the past year teaching third graders at Lanai City on the Hawaiian island in Lanai.

"Our school lasts from 8 a.m. to 2 p.m. And it's a territorial law that all students from kindergarten through grade six rest during the hour following lunch... Some school holidays are the birthdays of Presidents Roosevelt, Lincoln and Washington, Prince Kuhio, King Kamehameha, May Day and many others.

"My class consisted of 31 third grade pupils whose racial ancestry was Hawaiian, Chinese, Japanese, Filipino, Korean and Caucasian. Seekers of unusual names may add Maricruz Macadangdang and Gwendolyn Leilani Kaiokamalie to their lists. These were the names of only two of the girls in the class.

Of the Hawiians Clara had this to say: "... they are friendly and hospitable... they definitely want you to like their island and are eager to show you all the places of beauty and interest."

Land of the Eskimos

More than 3,000 miles due north of the Islands, another Southern alumna and her family have made their home in the land of the Eskimos. For the past 12 years the former HELEN FULENWIDER, 1940, and her husband, Jesse Matt, have been living and working with the Eskimos of Western Alaska in the capacity of teachers with the Alaska Native Service, a branch of the Office of Indian Affairs. Their village of Ekwak, on the Nushagak river in the Bristol Bay area, has a population of a little under 100 natives with two white people besides the Matts, who have one daughter, Cheri Lynn, 6.

Their duties comprise not merely teaching school, but also include being nurse and medical aide, recreational director, social welfare agent, friend and counselor. The versatility of the
Matt's further extends to operation of a short wave radio station, with which they keep daily contact with the nearest doctor 90 miles away and with the Alaska Communications System, Alaska's version of Western Union.

Contrary to popular conception, Alaska is not a perpetually frozen wasteland punctuated here and there with snow igloos. According to Mrs. Matt, no self-respecting Alaskan Eskimo would inhabit a igloo. In the section in which she lives, homes are two- and three-room cabins, and in other areas, where trees are non-existent, houses are made of sod or occasionally of lumber. Generally there is snow on the ground for five months of the year, but during the summer there are long days of continuous sunlight, during which lush gardens can be produced. The Eskimos are happy, friendly, honest and self-reliant. "They have the unique talent of being content with what they have today—let tomorrow take care of itself."

For transportation, in place of the car usually considered standard equipment in the average U. S. home, the Matts have two substitutes—a team of five grey sled dogs and an Aerocraft Chief plane. The sled dogs they keep, Mrs. Matt admits, solely for the fun of owning and driving them, but the villagers still use dog teams for hauling wood, running trap lines and making short journeys. The plane, which operates on pontoons in summer and on skis in winter, serves as the chief mode of travel for the Matts, and for most Alaskans, who are very airminded. Perhaps the most important role of the airplane is that of removing patients from remote areas to hospitals.

Alumna in Canada

As an expert on life in the North Country, Mrs. Matt shares honors with alumna, BLANCHE GRAFF, ex-1931, who is now Mrs. I. H. Smith, a resident of Churchill, Manitoba, Canada, for the past five years.

Mrs. Smith, a graduate of the University of Illinois, was first introduced to the North, and to her future husband, back in 1939 when she went with a U. of I. group to Churchill to study animal and plant life in the sub-Arctic. While there, she met Smith, a trapper and fur trader, who was familiar with every form and phase of Arctic life. Nine years later, she returned to Churchill to become Mrs. Smith and to enter a life entirely different from anything she had known before.

Churchill, where the snow never entirely disappears and cold winds blow in from Hudson Bay, is 526 miles north of the nearest highway at Le Pas. It is situated in the midst of the nesting grounds for migratory birds and is visited during its brief summer season by geologists, ornithologists, writers, explorers, sportsmen, and many others.

Life as a housewife in the far North presents many problems. Gardening is almost impossible, and as a result, fresh vegetables have to be shipped in by heated railroad car. Chicken is 95 cents per pound, milk 45 cents a quart. The water supply is bought in the form of 75 or 100 pound blocks of ice and melted down for daily use.

Active in civic affairs, Mrs. Smith is president of the Churchill branch of the Canadian Legion Ladies Auxiliary, the northernmost branch in Canada. She is also one of a three-member committee which governs Churchill, an unincorporated district.

A Year in the Philippines

It was a year ago Oct. 17 that TAYLOR NEELY, 1949, and wife CATHERINE GIBBS Neely, ex-1949, arrived in the Philippine Islands to do evangelistic missionary work among the Visayan-speaking people.

Sent by the American Baptist Foreign Mission Society, the Neelys are living at 140 Rosario street, Bacolod City, which is on Negros Island. Their work also includes the island of Panay, and they spent much time traveling to the villages, or barrios as they are called, and visiting the various churches.

The Neelys have found the larger Philippine towns influenced greatly by American culture and numerous American products obtainable if one is willing to pay the price. However, life in the barrios is still quite primitive, with most of the natives living in bamboo houses.

They plan to remain in the Philippines for a term of five and one-half years, returning to the States in 1958.

Ecuadorian Alum

When JAIME A. DAVILA, ex-1952, traveled to South America after completing his studies in education and English at Southern, he was not going to a foreign country but to his home in Quito, Ecuador, from which he had come under a Rotary International scholarship.

In Quito, the principal city of Ecuador with a population of 250,000, Jaime is working for his government as a teacher of English at Montufar high school, a public school. In addition, he is teaching English at a private high school, the Ecuador Military Academy, and at Centro Ecuadoriano-Norteamerican, an institution which works to promote a better relationship between Ecuador and the United States. In summer, Davila also teaches Spanish to North Americans at the Centro.

His address is Carrera Costa Rica
reminiscing about the states, he writes: “i will never forget... the great opportunity rotary international gave me to attend southern illinois university in order to learn about your educational systems and programs of study that may be applied in my country... the exchange of young people between different nations of the free world is doing a great deal to promote international friendship, which will... cross boundaries for kindness and mutual interests.

“i visited and talked in more than 20 rotary clubs; i talked in many other different clubs and cultural organizations; i visited grade schools, high schools and universities, villages, towns and big cities; i met many americans in these places... talked with them and formed friendships... i came back to ecuador with a warm regard for the united states of america.”

teaching in uruguay
far to the south of ecuador, but still in south america, lives another alum, gladys lynch, ex-1944, who teaches at crandon institute, casilla de correo 445, montevideo, uruguay.

at present she is at home in salem on furlough from her duties but is to return the first of january. she first left the united states for south america in january of 1948, stopping for six months’ training in spanish at medellin, colombia before arriving in montevideo, a city of almost a million inhabitants.

at crandon institute, a school under the auspices of the woman’s society of christian service of the methodist church, spanish children hear english as soon as they come to kindergarten, with classes taught half in spanish and half in english. by the time they reach the third grade, which miss lynch has been teaching, they are beginning to carry on whole conversations in english.

in her travels, she has visited jaime davila’s home, quito, ecuador; lima, peru; santiago, chile; buenos aires, argentina; bolivia, panama, costa rica and cuba. to her south america is a picturesque country of great contrasts with many courteous people who are eager to make foreigners feel at home in their land.
Southern’s Library Of Tomorrow

After 40 years of service, Wheeler Library has outlived its usefulness and is being replaced by a new ultra-modern structure, designed with an eye to the future.

Three years from now it should no longer be necessary for a book borrower at the University library to wait hours while the book of his choice is being ferreted out of a quonset hut or some other odd nook or cranny around campus.

For, if everything goes as planned, the year 1956 will see the completion of a modern functional library structure whose keynote is flexibility and comfort.

Excavation of more than 18,000 cubic yards of earth for the basement area of the 170-by-304-foot building began in July, with Edgar Stephens Construction company of Cairo as contractor. Of the nine firms bidding on the job, Stephens was lowest with a $2,291,768 bid. By postponement or omission of certain minor items the cost has been lowered so that $279,964 of the appropriated funds will go for the site development, architects’ fees, books and equipment.

The brick building, to be completed in 700 calendar days, will consist of two floors and a basement, providing 145,850 square feet of floor area. The entire shell of the building will be completed with available funds, as well as 42 per cent of the interior. The rest of the interior will be finished as soon as sufficient funds have been appropriated.

Capacity 1,200 Readers

Capacity of the new structure has been estimated 1,200 readers and 350,000 volumes. The present Wheeler library collection consists of about 140,000 volumes, with about 10,000 to 15,000 being added yearly. In recent years almost half of this collection had to be moved to other campus buildings because of a lack of space and the aged condition of the present library, in use since 1903.

With a 281-foot frontage on Chautauqua street, the new library will be located 85 feet east of the recently-completed Life Science building. Its central location in regard to present and projected SIU buildings will make for convenience in use. Two main entrances, north and south, will handle the flow of traffic.

The concept of modular design will be employed in the construction—which means that there will be supporting walls. Instead the floor slabs will be supported by 105 concrete columns spaced 23 feet apart and surrounded by free-standing walls. The columns will be of sufficient footing to provide strength for four additional floors which will be added in the future when vertical expansion becomes necessary.

Floor areas on the third through the sixth floors will measure 186 by 140 feet, occupying the central portion of the building (as shown in the sketch on the next page.)

Flexibility a Feature

One of the most important features of the new building will be its flexibility and adaptability to changing requirements in interior arrangement. The fact that it will be so flexible is due to three factors: an almost complete absence of horizontal obstructions; floor strength characteristics permitting inter-change-ability of book storage areas and reader areas; and an independence of each module quadrant from all of the other module quadrants in regard to lighting, ventilation and heating.

A bay, consisting of four module quadrants, measures 23 by 23 feet from center to center of the reinforced round concrete columns, each of which is 18 inches in diameter. With a clear distance of 21 feet, six inches between the columns, loaded free-standing book
stack ranges may be placed in any desired location or direction and may be moved anywhere in the library to vary the size of reading areas or working space. Floor-to-ceiling distance will measure eight feet, $1^{1/4}$ inches.

For checking out books a charge desk will be centrally located between the north and south exits. Students will have to pass between the desk and a railing to leave the building by either exit and during rush hours, the desk will be manned at both points. During normal or slack hours one clerk will be able to handle the whole procedure.

Beyond the charge desk, students will be free to go where they wish and will have access to all book shelves with the exception of a few rare books and manuscripts and a very small group of closed reserve books.

**Five Subject Divisions**

Book collections and reading areas will be placed in five broad subject divisions—social sciences, business administration plus economics, humanities, education and science plus home economics. In addition there will be a separate Lincoln memorial library.

In each reading room, all material concerning an instructional department or several closely related departments will be kept together and will include books, periodicals, documents, pamphlets, reference tools, slides, phonograph records, microfilms and microcards, picture files and indexes.

Because the use of books for instruction today has been augmented greatly by other media of communication, planners of the new library have also incorporated facilities for audio-visual aids, groups preview rooms, listening rooms, a film library, a photo laboratory, a lecture room for 156 persons, a broadcast control room and a textbook rental service.

Along with flexibility, the comfort of those who will be using the library received special treatment from the designers. For one thing, the building will be completely air-conditioned, which will make for better study conditions, especially during the hot summer months.

A system of illumination, with low contrasts in brightness in the field of vision and good lighting for all areas, will be provided. No light fixtures will be exposed. Ceiling lighting will be of the fluorescent "egg crate" type called louverall, which cuts eye strain and provides a uniform, diffused light.

On the ceilings above the louverall fixtures noise will be reduced by acoustic material. Doorless, glazed enclosures housing the desks of reference librarians will likewise be acoustically-treated so that information may be given without interfering with the general peace and quiet.

**Special Sections**

Other special sections have been included in the layout. Nine group study rooms of various sizes will be located in different reading areas to allow
An interesting sidelight in the construction process—Southern's art students invade the library excavation site to dig clay for their pottery class. Life Science building looms in the background.

numbers of students to study together, and a large number of individual study desks will be placed around. A double-glazed typing room, 12 by 22 feet, will be available to students, as well as individual typing booths.

For students who wish to study at the library but need no library materials, a special study area has been provided. Near the south entrance, a comfortably-furnished large lounge with books for browsing and general education will be located.

Along with student needs, the requirements of the library staff have also been taken into consideration. Ample work areas will be provided, including a multilith room, a small bindery, convenient elevator connections between the receiving room and the order division, a staff conference room, and typing rooms next to each reference office. There will also be a large staff lounge, covering 530 square feet, and a staff kitchen.

Windows in the new building will be kept at a minimum. Reading and stack areas facing east and west will be windowless to prevent undesirable glare, heat loss in winter and h at gain in summer. The administrative suite, study area and library science class room on the first floor east will have double-glazed wide windows protected by a six-foot-wide overhang, and there will also be double-glazed windows on the north exposure on all floors.

Facing south, there will be only strip windows on the first floor and no windows at all on upper floors. The basement will also contain no windows.

Ornamental Lobby

With all the functional aspects of the building which might be called ornamental—an entrance lobby whose ceiling extends through the second floor to a height of 24 feet, in contrast to the less than nine foot ceilings in the rest of the building.

Even this section is partly utilitarian, however, since it will be equipped with built-in glass cases for use as an exhibit area.

Finally, in the south end of the lobby will be an inscription on a stone tablet, as firm and enduring in its message as the concrete pillars of the building's foundation, reading: "IN A DEMOCRACY WE MUST HAVE FAITH IN THE ABILITY OF FREE MEN TO LEARN THE TRUTH THROUGH THE UNHAMPERED INTERPLAY OF COMPETING IDEAS."

Foreign Students

This year's group of 25 foreign students on campus represents 12 different countries and almost as many religions.

Thirteen of the students are doing graduate work, but four have enrolled as freshmen.

Six of the students are from Jordan: Fahmi Dahdah, Farid Dahdah, Abd Daqqaq, Faiz Daqqaq, Richard Patterson and Ali Shukair. All are sophomores in pre-engineering except Abd Daqqaq, a freshman.

Iraq is represented by Salem Al-Jaryan, freshman agriculture major, and Saad Jaber, graduate student in government.

Other countries represented include: France—Marie Antoinette Untereiner, graduate student in English; Austria—Norbert Mayr, business administration graduate student; Israel—Zamir Bavel, senior education major, and Emak Fial, sophomore English student; Guatemala—Jose Braham and Juan Calle, microbiology graduate students; Honduras—Elba Munoz; Chil.; Carlos Verdugo, graduate student in business; San Salvador—Mario Santos, graduate student in physical science; Mexico—Roberto Hernandez, graduate chemistry student; Lebanon—Khalid Dishani, graduate government student; Philippines—Consuelo Roxas, graduate in government, and Gloria Fuentebella, English graduate; Korea—Pauline Choy, English graduate; Jamaica—Gloria King-Powell, pre-med freshman; India—Sojata D-sarcodi, graduate art student.
Civil Defense

Is Everybody's Business!

By Dr. A. Frank Bridges, 1929

When the Federal Civil Defense Act of 1950 was signed by President Truman he called upon all citizens to lend their support to Civil Defense in their own communities. President Truman said: "It will take the best efforts of all of us to get ready and to stay ready, to defend our homes. No true American would want to give less than his best to that cause, and no one who knows the American people could ask for more."

President Eisenhower in his State of the Union Message declared that Civil Defense was a "sheer necessity." President Eisenhower also said: "Because the building of a completely impenetrable defense against attack is still not possible, total defense strength must include Civil Defense preparedness."

The President also said, "Because we have incontrovertible evidence that Soviet Russia possesses atomic weapons, this kind of protection becomes sheer necessity. Civil Defense responsibility primarily rests with the State and local governments—recruiting, training and organizing volunteers to meet any emergency."

Are We Ready?

How many of us are ready? Many of us are among the millions of must be trained in Civil Defense before our country can call itself ready for an attack. The attack could come at any time. Our homes, our jobs, our families, and our very lives may be at stake. We cannot hide the home front and it cannot retreat if we are to survive as a free people in the event we are attacked.

Too little has been done in Southern Illinois, the State of Illinois, and the USA in the name of Civil Defense. Much effort has been expended in Southern Illinois to encourage our counties and cities to organize for Civil Defense. Some of the communities that have gone ahead with their organizations are Eldorado, Carmi, Anna, Carbondale, Benton, Marion, West Frankfort, Zeigler, Christopher, Sesser, Chester, Metropolis, Pinckneyville, and Thompsonville. Several other communities are making progress in their planning.

Every effort should be exerted to organize Southern Illinois. Power plants need adequate protection and supervision in case of disaster and before, highways will need to be manned, (several highways in the area have been designated as Civil Defense routes), additional police and firemen are necessary, many will need to be trained in the skills of first aid, evacuees from our cities will have to be housed and fed and maybe even rehabilitated.

People must be convinced that if an A-Bomb or H-Bomb ever comes that every one will be involved — whether they live in a large city or a rural community. Food, power, oil, medicine, communication, transportation and the like will still be basic needs of the people.

Rural Help

Rural areas have three basic functions in the Civil Defense program:

1. To give direct aid to the stricken cities.

2. To give full help to the people forced to leave their cities or homes.

3. To be able to take care of themselves perhaps without fuel, power, chemicals, transportation, communication, safe water, medical supplies, and fewer medical and nursing personnel.

Southern Illinois University, through its official representative, has assisted a number of communities in their organization. In May of 1953 Southern sponsored the First Oriental Conference in the United States for Civil Defense in a rural area. This conference was given favorable recognition in the August 1953 issue of the Pathfinder.

Civil Defense needs are great but the problem can be solved if people will just open their eyes. There is danger! If we will just cease to be so complacent — and get on the ball, we have the answer — our people. We cannot be caught napping again!
were spotty throughout Illinois. The ring-necked pheasant supported the highest kills in the northeastern corner of the Northern zone. Geese kills (largely Canada geese) were naturally higher in the Southern zone because of the location of the Horseshoe Lake refuge, where one of the largest known concentration gathers each fall.

**SIU'S Wildlife Research Lab**

Since 1949, SIU has taken an active part in the program of wildlife conservation in Illinois through the instigation of a program of training and research in wildlife management. This was the first such organized educational program in the state. Growth and development of this new venture has exceeded all expectations because of the local, state and national interests that have resulted. The University has matched these interests through financial assistance and the provision of a wildlife research laboratory.

Research projects to date have included the bob-white quail, ring-necked pheasant, cottontail rabbit, fox and gray squirrel, waterfowl, habitat development, predation, and wildlife surveys. Many of these projects are or will be established as cooperative programs which will include the Illinois Natural History Survey, Illinois Department of Conservation, Fish and Wildlife Service, Wildlife Management Institute, Illinois Coal Strippers Association and Trux-Trac Coal Company.

The Wildlife laboratory is now temporarily housed in the new animal house, constructed as part of the nearly-completed Life Science building. Utilizing the laboratory are nine graduate students, five of whom are research assistants. The states of Illinois, California, Pennsylvania and North Carolina are represented by the laboratory personnel.

**Building Nears Completion**

Southern's new Life Science building, now almost 95 per cent complete, should be ready for use by the spring of 1954, according to Willard Hart, of the architectural service.

Located on Chautauqua west of the cafeteria, the structure will house the departments of zoology, botany, microbiology and physiology.

Third floor quarters have been provided for the botany department, headed by Walter B. Welch. Facilities will include two freshmen laboratories, three research labs, five department of fices, and a storeroom.

Two botany lecture rooms, one seating 36 and the other 72, will also be available. The 72-seat lecture room will have a terrace and raised type flooring.

All of the second floor and part of the first floor will go to the zoology department, headed by Willard Gersbacher. Zoology facilities will consist of two lecture rooms and seven laboratories.

The microbiology department and biological research lab will have a complete laboratory for microbiology, fully equipped with over $100,000 worth of apparatus. In addition, there will be a lecture room seating 68, a conference room and library, office, six staff labs, photography room, temperature control room, sterilizing room, preparation room, stock room, three graduate labs and one large undergraduate lab.

Carl C. Lindegren is department chairman and director of biological research.

According to Dr. Harold Kaplan, physiology department chairman, the move to the new building will improve facilities by 500 per cent and will place the department in one set of quarters instead of three different buildings. The physiology, health education and microbiology departments will share a large lecture room, and in addition, physiology will have a discussion room, two preparation rooms, stock room, storage room and several types of special labs.
Jo Rushing Named Queen

Jo Rushing, senior from Chester, was crowned Queen of Southern’s 1953 Homecoming at an impressive ceremony Thursday night, Oct. 29, in Shryock auditorium. Jo, a business major, is president of the Sphinx club and her sorority, Sigma Sigma Sigma, and is a past AF ROTC “Sweetheart.”

In the Queen’s court were Carolyn Bernhard and Ita Lou Bozarth, both of West Frankfort, and Eleanor Miller and Arnette Rhinehart, both of East St. Louis. Her attendants were Marilyn Liebig, of Belleville, and Marilyn Rhymer, of McClure.

During the ceremony, retiring Queen Audrey Mayer, of St. Louis, was escorted to the throne, which she later relinquished to the new queen.

Ernie Limpus and his orchestra provided coronation music and played for the informal dance which followed the ceremony.

Float, Decoration Winners

Winners of the float and stunt contests appearing in the Homecoming parade Saturday morning, Oct. 31, were announced at halftime of the football game that afternoon.

Marching in the parade were more than 1,000 school musicians in bands representing 21 Southern Illinois schools.

Men’s first place in the float contest went to Sigma Pi fraternity; men’s second place to The Still; women’s first place to section C of Woody Hall; women’s second place to Pi Kappa Sigma; mixed group, first place, Vocational - Technical Institute; best stunt, Delta Sigma Epsilon.

Winners in the four classes of house decorations were also released Saturday.

Anthony Hall, men’s residence hall, won first place in Class A, men’s division, and Theta Xi fraternity received honorable mention.

Delta Sigma Epsilon received first in Class A, women’s division, while Sigma Sigma Sigma was awarded honorable mention.

The Manor House, men’s rooming place, received the first place award in Class B, men’s division, and the Student Christian Foundation won honorable mention.

In Class B, women’s division, Tower Hall received first prize, while The Duchess was awarded honorable mention.

Each of the first place winners received gold cups for their efforts.

Pulliam Awards Made

Four undergraduate students were awarded the first Roscoe Pulliam Memorial Alumni Scholarships Saturday after the Homecoming football game. They were: Gordon Arthur Fore, freshman pre-engineering student from Mt. Vernon; Dorothy Marie Osborn, junior home economics major, of Pana; Lois Harris, freshman P. E. major, of Carlyle; and Edwin H. Krutsinger, junior accounting student, of Louisville.

Established last spring as a memorial to the late Roscoe Pulliam, Southern’s president from 1935 till his death in 1944, the scholarship fund consists of contributions from Southern alumni. The students are selected on the basis of scholarship and leadership by the University’s scholarship and loans committee.

Making the awards was Bob Odamie11, acting alumni director.

Alumni Board Members Meet

Members of the SIU Alumni Association board met during Homecoming weekend for their regular business session. Attending the 9 a.m. meeting Saturday, Oct. 31, were 10 board members, Bob Odamie11, acting alumni director, and Dr. Baker Brownell, President Morris’s representative to the board.

Members discussed the new constitution, with emphasis on procedure for the election of class representatives to the legislative council. Nomination and final election ballots will be mailed to all association members prior to April 1. Everyone who is an associate member or prior to April 1. Everyone who is an associate member...
Alumni association board members held their traditional business meeting on Homecoming Saturday morning. Present were, left to right—WILLIAM F. PRICE, 1948; G. WARREN GLADDERS, ex-1937, association president; R. E. MUCKELOY, 1903; TROY HAWKINS, 1918-2; BOB ODANIELL, 1951, acting alumni director; Mrs. MABEL PULLIAM, ex-1947; Dr. Baker Brownell, university president's representative to the board; Mrs. ELIZABETH LEWIS, 1952, secretary-treasurer; Mrs. JESSE STUART SPARR, 1924-2; AUBREY J. HOLMES, 1935; ED CURTIS, ex-1953, vice-president. GUY GLADSON, 1910, attended the board meeting but is not in the picture.

Pat Lamont, left, presides at the alumni tea held at the Student Union after the football game and serves coffee to alums JIM CANNON, MS-1951, and his wife, the former MERLINA REFIEUNA, 1951, of Metropolis. Pat, a junior from West Frankfort, was student chairman of the Homecoming alumni committee.

New male occupants of Anthony Hall came through with first prize, Class A, men's division.

An Eastern runner evades Southern tacklers in this shot from the Saluki-Eastern Homecoming game, which the Salukis won 6 to 0.

Queen Jo Bushing and her escort pause at the dance for a chat with Eddie Sauter, of the Sauter-Finegan orchestra.

Homecoming play cast included Carole Kusken, Kirkwood, Mo., left; John Douglas, Carbondale, and Pat Lamont, West Frankfort.

"Dig That Crazy Cat" won first place, Class A, women's division, for Delta Sigma Epsilon sorority.
Enthusiasm ran high at a recent pre-game pep rally at the Student Union. Southern's new cheerleaders plus an impromptu pep band were chief noisemakers.

Each team had its share of fumbles and both SIU and Eastern recovered three opponent fumbles, but to no avail.

In yards rushing, Southern backs compiled 213 yards to only 88 for Eastern. The Panthers, however, were ahead in passing with 133 yards gained passing to the Salukis' 61.

**Woody Hall Dedicated**

Southern's new women's dormitory, Woody Hall, was officially dedicated Sunday, Nov. 1, and open house was held from 3 to 6 p.m.

The public was invited to see how the girls at the two million dollar hall live. All rooms were open for inspection and student guides available to point out various features of the new building.

A special guest at the dedication was Miss Lucy K. Woody, Professor Emerita, for whom the dorm was named.

**Chi Delts Go National**

Members of Chi Delta Chi, Southern's first social fraternity, were formally pledged Oct. 26 to Phi Kappa Tau, national fraternity with headquarters in Oxford, Ohio.

According to Harlan Seats, fraternity president, formal installation will take place in mid-November. Phi Kappa Tau has 69 chapters throughout the United States.

Chi Delta Chi was founded in 1932 and has been very active in campus affairs. It is especially noted for having originated Spring Sing in 1946, and also for taking first place in the affair each succeeding year.

**STUDENTS VOTE TO INCREASE ACTIVITY FEE ONE DOLLAR**

At a recent balloting, SIU students voted 801 to 231 in favor of increasing their student activity fee one dollar, which would go into a Student Union fund to help defray the costs of a proposed permanent student union building.

Next formal action toward putting the increase into effect is approval by the University Board of Trustees. If the Trustees approve, the fee raise will be effective winter term. Normal school scholarships will cover the increase for scholarship holders.
Organize County Clubs

Alumni who remember the days of the county club may be interested in learning that two such clubs are in the process of organization at Southern.

Forty SIU students attended the first Montgomery county club meeting recently. Wendell Keepper, agriculture department chairman, opened the meeting with a brief welcome. Keepper, a former Montgomery county resident, and Mrs. Keepper are sponsors of the group.

Bob Odaniell discussed reasons for organizing county club and pointed out that meetings of student county club and alumni clubs of the same county might be held jointly.

Odaniell, organized of the first Cook county club, also spoke at a meeting of the new Cook county club, made up of students from Chicago and vicinity.

Officers were elected, with Gene Krolack, of Calumet City, as president.

Dr. Paul Huntsinger, assistant professor of speech, is sponsor of the Cook county organization.

Orchestra Concert Nov. 17

First concert of the season by the Southern Illinois Symphony orchestra will be presented at Shryock auditorium Nov. 17, according to Maurits Kesner, music department chairman and orchestra conductor.

Featured soloist will be Edith Garrison, of Mt. Vernon.

This year's orchestra, consisting of 78 members, is the largest that Southern has had so far, and its members include professional musicians and music instructors of Southern Illinois. Towns represented are Murphysboro, Anna, Herrin, Royalton, Mt. Vernon, Zeigler, Carbondale, Christopher, Johnston City, Jonesboro, Benton, Cairo, Carterville, Centralia, Du Quoin, Marion, Metropolis, Pinckneyville, and West Frankfort.

Three local concerts will be presented by the orchestra under the sponsorship of the Carbondale Business and Professional Women's club, with proceeds going to a scholarship fund.

Dates for the other two concerts of the 1953-54 season are Tuesday, March 2, 1954, and Tuesday, May 11, 1954.

Two out-of-town concerts will also be given—at Anna, Nov. 15, and Chester, Nov. 25.

SIU Faculty Members Receive Degrees

Two University agriculture department members, Alex Reed and William T. Andrew, have completed requirements for doctorates, according to W. E. Keepper, department chairman.

Reed recently finished work on a doctorate from the University of Illinois in the college of agriculture department of dairy science. His dissertation on “Production and Utilization of Milk in 16 Southern Illinois Counties” is expected to be published as a University of Illinois experiment station bulletin.

Andrew completed work for a doctorate from Michigan State College and expects formal conferring of the degree in June. His graduate specialization is in the field of vegetable plant physiology. A native of Canada and a graduate of the University of Alberta, he joined Southern’s faculty in 1950 as an instructor in vegetable crops.
NAMES MAKE NEWS

Before 1900

Mrs. J. C. Langsdorf, MARGARET HUGGINS, 1898, is now living at 1010 Esther avenue, Vancouver, Wash. After her graduation from Southern, she went west to Salmon City, Idaho, where she taught school for four years, was elected county superintendent, and was married. The Langsdorfs have three sons and eight grandchildren.

1900-1919

Dr. CLAUDE L. LARUE, 1905, and wife, are residents of Shreveport, La., where their address is 629 Wilder Place. The LaRues recently returned from an extended cruise of the Caribbean.

Mrs. CLARA LOUISE NASH Allen, 1908, writes that she is residing at 185 North Chester avenue, Pasadena, Calif. After teaching in the Los Angeles public schools for eight years, she became the wife of Dr. A. B. Allen, of Pasadena, who preceded her in death in 1948.

General JOHN R. HODGE, ex-1914, has moved to 508 Oakridge avenue, Fayetteville, N. C., from Ft. Monroe, Va., where he was Chief of the Army Field Forces.

Mrs. ESTELLE FLOTA, 1915, and her husband, C. T. Flota, reside at Truth or Consequences, N. M., where they are owners of Greenwood Lodge. Their address is P. O. Box 767.

Miss ELLA GERLACH, 1918-2, has moved from 5602 Enright avenue, St. Louis, Mo., to 1343 McCutcheon Road, Richmond Heights 17, Mo.

Mrs. J. M. Tchoukaleff, ATANASKA EVANOFF, ex-1919, lists her address at 528 Washington avenue, Alton. Mrs. Tchoukaleff attended Northern Illinois Normal after leaving SIU and received a bachelor's degree from Washington University, St. Louis.

1920-1929

Mrs. Preston L. Wettaw, JEWELL ALLEN, ex-1920, of 2121 Illinois avenue, Eldorado, is retiring this year after a three-year term as State Chairman of Business and Professional Women of the Woman's Baptist Mission Society of Illinois. Mrs. Wettaw, who is active in organizational work in Eldorado, had the honor of being elected as president of the Illinois Federation of Women's Clubs in 1941, and also served four years on the Board of Directors of the General Federation.

Mrs. J. CHARLES MAY, 1921-2, writes that her address is 1214 West Waldo, Independence, Mo. Mrs. May resided for six years at Papeete, Tahiti, in the Society Islands.

Mrs. MAX A. SAUTTER, 1922-2, has moved from 420 Speedway, Truman, Ark., to Hancock, Mich., where she may be reached in care of Hoar Brwinger.

WESLEY R. DICKSON, 1923-2, is employed in a Denver, Colo., laboratory analyzing ores and minerals. Dickson's address is 1960 Colorado Blvd.

JULIAN GREENLEE, 1932, has been appointed a professor in the education department of Florida State University at Tallahassee. Before coming to FSU, Greenlee was a professor of physics at Western Michigan College of Education, and also had taught at Columbia University, New Hampshire Teachers College, University of Florida and the University of Maine. He received an MS degree from the University of Illinois and MA and Ed. D. degrees from Columbia University Teachers College. Dr. Greenlee has recently published a book, "Teaching Science to Children."

Miss HELEN O'KEEFE, 1926-2, lists a change of address from East St. Louis to St. Louis, where she resides at 6212 Arendes Dr.

MARY BOOS, 1926-2, is Mrs. Paul Young, of 57 Berrywood Drive, Glendale 22, Mo.

Mrs. RUBY ICE Craft, 1926, (Mrs. Ernest J.) is now employed as a teacher at Coulterville high school.

ROSE L. RIXMANN, 1927-2, is the wife of Lt. Col. L. R. Stultz. The couple, who have two children, reside at Nashville.

JAMES A. PRITCHARD, 1927-2, is married and the owner of a sandwich shop in Rosiclare. The Pritchards have one son, Marshall, 10.

GEORGE GOAD Harriss, 1927-2, and husband LAWRENCE H. HARRISS, 1929, have moved to California from Freeport. Their address is 418 La Jolla, San Mateo, Calif.

Also in California is Miss MARY J. GOSS, 1926-2, 1928-4, of the education department at San Jose State College, San Jose, Calif. Her home address is 2069 Rixford Way, San Jose 28.

Mrs. Kenneth McMath, MARY LOUISE REINHARD, 1928-2, lives at 136 Pullen Blvd., Centralia.

Mr. and Mrs. HARVEY M. MUNGER, both 1928, have a change of address from 536 Linden, Centralia, to Patoka. Mrs. Munger is the former ALBERTA E. GARRISON.

CLAUDIA JUNE ROBERTSON, 1929-2, is now Mrs. George Allen, and resides at Sixth avenue, R. R. 4, Des Moines, Iowa.

Dr. VERNON V. COLLINS, 1929-2, is now living in Chicago, where his address is 7831 Evans avenue.

1930

GEORGE WILLIAM KARRAKER, 1930-4, and wife, the former PAULINE HUNSAKER, 1930-2, are making their home in Tucson, Ariz., where their address is 2209 East Water.

MARGARET GLOVER Hanson, 1930, and husband, CLINTON HANSON, ex-1930, have moved from Louisville, Ky., to 208 Chelsea Road, Fairless Hills, Pa.

Mrs. GERALD E. HOTZ, 1930-2, lists a change of address from St. Louis
Army Lt. Col. ROBERT R. REED, 1934, senior advisor to the Leaders School, Republic of Korea Army, goes over plans for training with Col. Cho Kim Dong, his Korean counterpart. Col. Reed, whose wife resides at 1202 West Chautauqua, Carbondale, is a member of the Korean Military Advisory Group. He entered the Army in 1937.

ALTON A. GREER, 1934, is living at Junction, where he is a lawyer and an electrical contracting contractor. He and wife Orpha J. are the parents of five children.

Mrs. Robert L. Feldmeier, CLARA GOEDDEL, 1934-2, and family have moved from Waterloo to Cape Girardeau, Mo. Their address is 1744 Cecilia street.

HAZEL LOUISE TOWERY, 1934, writes that she has purchased her own home at 1705 Spring avenue, Nameoki Station, Granite City.

VIRGINIA YOUNG, ex-1934, is now Mrs. A. Bartow Ray and lives at 111 Hazelton, Falls Church, Va.

JOE L. SIMMS, 1935, holds the position of principal and teacher in the Whittington schools system. His wife is the former ALBERTA HAYER, ex-1922.

The address of FRANK M. DAVIS, ex-1935, is Box 575, Alamogordo, N. M. Davis, bookkeeper at a New Mexico air force base, is married and has three children.

Mrs. EDITH KIDD Smart, 1930-2, writes that she has been living in the West for the past sixteen years. Her address is 2729 E. Indian School Road, Phoenix, Ariz. The Smarts have one daughter, Walda, and a new granddaughter, Lucinda Kay Peterson, born last July.

1931

Mrs. ROBERT LEE MITCHELL, 1931, has moved to Darien, Conn., where her address is 16 Holly Lane.

1932

Dr. PAUL Q. PETERSON, ex-1932, and wife, MARY KATHRYN LENTZ, 1934, have moved from Columbus, O., to 1820 Arden Lane, Sacramento, Calif.

Mrs. EDWIN A. MILLER, 1932-2, now resides at 1211 West Eighth street, Junction City, Kans.

1933

LESTER L. CORZINE, ex-1933, is now a resident of Belleville, Mich., where he is a part-owner of three supermarkets. He and Mrs. Corzine, the former HELEN LOOMIS, 1933, have three children and reside at 42833 East Huron River Dr.

The address of ROBERT E. BROWN, ex-1933, is 1403 North State street, Marion.

JAMES LACEY PAYNE, 1933, has the position of cashier at the First National Bank in Mt. Vernon. He and wife Mary Jane live at 820 North street.

Mrs. Calvin Covell, MARCEDIETH HOLMES, 1933-2, is a resident of Reno, Nevada, where her address is 791 Grand Canyon Blvd.

Miss BARBARA HOYLE, 1933, has begun her sixth year of teaching in the high school of Burley, Idaho. Her address is 1616 Schodde, Burley.

HOWARD W. GARRISON, 1933, is a civil engineer and may be reached through General Delivery, Wellston, Ohio.

WAYNE HALTERMAN, ex-1939, is residing in Long Beach, Calif., and lives at 1070 Hoffman, Long Beach 13.

1933

Miss MARIAN E. THRAILKILL, 1934, has moved from Chicago to Mt. Prospect, where her address is 104 West Northwest Highway.

ALumnus Authors Dictionary

Released in September was a new botanical dictionary written by Dr. H. I. FEATHERLY, 1920, professor of botany at Oklahoma A and M college, and published by the Iowa State College Press.

Said to be the first of its kind written and published in the United States, the dictionary is designed to perform the practical service of acting as a "seeing eye" to plant scientists and botany students lost in a labyrinth of plant nomenclature and Greek and Latin components. Embracing a glossary of more than 7,000 specific botanical terms, the text is the result of 12 years of research.

Only one other similar text ever has been issued. It was compiled for British plant scientists and published in England 25 years ago.

During the past 28 years as a member of the A and M faculty, Dr. Featherly has become nationally recognized as an agrostologist, or grass specialist. He is a member and past president of the Oklahoma Academy of Science.

Dr. Featherly's address is 1903 West College street, Stillwater, Okla.
HUGH S. WINKLER, 1935, and wife, the former BEULAH ALLEN, ex-1928, reside at 500 South 17th street, Mt. Vernon. Winkler, who was formerly superintendent of schools at Dahlgren, is now superintendent of Odin schools.

Dr. ROBERT JACOBS, 1935, has assumed a new position as assistant director of the Educational Records Bureau, 21 Audubon avenue, New York 32, N. Y. He was formerly director of counseling at the A and M College of Texas at College Station, Texas.

CHEMISTRY ALUM PROMOTED TO VICE-PRESIDENCY

Dr. REA WINCHESTER, 1931, Ph.D-1937, has been promoted to vice-president and technical director of the Vansteel Metallurgical Corp. of North Chicago. The second of Southern's graduates to obtain a doctor's degree, Dr. Winchester has been with Fansteel since 1937.

His address is 634 North Lewis, Waukegan, Ill.

1936

MYRTLE E. TALBERT, 1936, is the wife of T. LOUIS TEMPLETON, ex-1932. The Templetons live at 313 St. Louis street, Pinckneyville.

ROBERT D. BELL, ex-1936, is manager of accounting at the Westinghouse Electric Corp. offices in Kansas City, Mo. His address is 436 West 47th street, Kansas City.

1937

WESLEY G. BOVINET, 1937, and wife, the former VIRGIE M. LINDSEY, ex-1935, live at Sesser, where he is principal of Sesser high school.

FRED WILLIAM THALGOTT, 1937, has moved from Zeigler to Elm street, Park Forest, Chicago Heights.

ORLAND STANLEY, 1937, and wife, MARIAM MAXEY, ex-1933, are residents of Marion, where their address is 604 South Virginia.

Alumna in Advertising

MARION A. ALLEN, 1934, of 210 Sul Ross Apt. 4, Houston, Texas, recently received a Master of Letters degree from the University of Houston. Miss Allen, who has resided in Houston for the past six years, has taught fashion illustration and costume design at Feather and Feather School of Design.

Last fall she and Mrs. Mary Alice Little started their own advertising agency under the name of Allen-Little Advertising, and the two handle various types of work, including custom-designed Christmas cards for business firms or individuals.

Although managing her own agency, Miss Allen still finds time to teach commercial art part-time at Feather and Feather.

HARRY J. BRINKMAN, 1940, and wife, the former ROSA I. FIERCE, 1932-2, live at East Carondelet, where their address is R. R. 1, Box 41.

LILLIAN PILLOW, 1940, is now Mrs. Clayton Yauch and resides at 18747 Kelly Road, Detroit 24, Mich. She is employed as a secretary for Chevrolet in Detroit.

MRS. BEULAH FREEMAN Sulens, 1940, lists her address as 811 Logan avenue, Elgin.

JUNE HAYTON, ex-1938, is Mrs. Kenneth E. Lawler and resides at 1011 Oakdale, Springfield. The Lawlers have one daughter, 3½ years old.

MRS. DUDLEY E. WARNER, 1938, has moved from 1526 North Gate Rd., Baltimore, Md., to 400 Holly street, Virginia Beach, Va. Warner was recently transferred to Norfolk, Va., as branch manager for Westinghouse Electric Supply Co. The Warners are parents of a new daughter, Barbara Jane, born May 29, 1953.

The address of JOHN CALVIN SWOFFORD, JR., ex-1938, is 7817 Adkins, St. Louis 23, Mo.

Miss IRENE E. CRAIG, 1938, lists her address as 224 North Valencia street, Alhambra, Calif.

DONALD W. HOGUE, 1938, formerly of Washington, D. C., is now living at Natick, Mass., where his address is General Delivery.

1939

JOHN C. PRATT, 1939, writes that he and his family have recently moved to a new home in Blue Island, where he is manager of an insurance agency. The Pratts formerly lived in Racine, Wisc.

1940

W. W. DAVIDSON, M. D., 1940, has moved from Chicago to Centralia, where he lists his permanent address at 622 East Third street.

HARRY J. BRINKMAN, 1940, and wife, the former ROSA I. FIERCE, 1932-2, live at East Carondelet, where their address is R. R. 1, Box 41.

LILLIAN PILLOW, 1940, is now Mrs. Clayton Yauch and resides at 18747 Kelly Road, Detroit 24, Mich. She is employed as a secretary for Chevrolet in Detroit.

Mrs. BEULAH FREEMAN Sulens, 1940, lists her address as 811 Logan avenue, Elgin.

Lt. Col. JAMES L. HUDELSON, ex-1940, has an APO listing, 1142 S/A Sq. APO 168, c/o PM, New York, N. Y., Col. Hudelson, who is married to the former Carolyn Mann, was graduated from the University of Illinois in 1951.

Mrs. ANN WILSON McIntyre (Mrs. Lester B.), 1940, is taching the second grade at Chester Public school. The McIntyres have two children.

1941

Alumnus, Composer of SIU’s Alma Mater, Is Named Winner of Pep Song Contest

Winner of Southern’s pep song contest has been announced as CLARKE MORGAN, ex-1934, who is now staff organist for the CBS radio network in New York.

Composing songs for Southern is nothing new to Morgan, who also wrote the SIU Alma Mater, as well as several songs for his fraternity, Chi Delta Chi.

After leaving SIU, he made numerous appearances at St. Louis hotels and radio stations KNOX, KWK, KSD and WIL, and then served in World War II as an Army medical corpsman. He refused to let the Army interfere with his career and while stationed in England, played for the British Broadcasting Company and performed at various English nightclubs.

Returning to the States, Morgan filled engagements at Santa Monica and Palm Springs, Calif., Erie, Pa., and several Eastern cities. He later joined the staff of radio station WNEW, New York, where he had his own show.

Since 1947, he has composed and played the music sequences for “Wendy Warren and the News,” a CBS presentation, and also composed and played the music for the television serial, “The First Hundred Years,” during its 19-month run.

He is currently featured on “Fun For All,” starring Arlene Francis and Bill Cullen each Saturday afternoon on CBS radio.

one child and live at 4549 Page, St. Louis, Mo.
