PRESIDENT'S FOREWORD

Southern Illinois Normal University enters upon the summer session of 1944 facing the same demands for service and sacrifices, the same problems, and the same dislocations that confront other institutions of higher education in the country. It is again planned to offer two regular six-week terms, including a variety of courses of the workshop type. These are planned for teachers who have not been teaching for a number of years, but who, because of the war emergency, are now re-entering the profession. In these courses opportunities will be provided also for regular in-service teachers to pursue professional problems of interest.

There is a second group of prospective students in whom Southern is greatly interested this summer, namely, those students who will be graduated from the high schools in June. It is desirable in war time that these students should begin college work before they are inducted into military service or drawn into war industry. Southern is prepared to make every effort to take care of this special group of students.

The third group of prospective students Southern is hoping to serve this summer is made up of those who desire to begin graduate work. For the first time, Southern Illinois Normal University has the privilege to offer courses which lead to the Master's Degree in education. We now have approval from the Teachers' College Board to offer work beyond the fourth year for teaching in the Biological Sciences; English; Foreign Language, including French and Spanish; Mathematics; the Physical Sciences; and the Social Sciences, including History, Economics, and Sociology.

We cordially invite former students of the college for either or both of the summer sessions to renew their acquaintance with the college and to secure from it whatever service they may require. We also extend an equally cordial invitation to those persons in Southern Illinois who are interested in furthering their education. We believe they will find here a cordial and hospitable faculty, a friendly student body, a progressively inspiring program, and opportunities for recreation—all of which is important for a successful and happy sojourn in summer school.

ATTRACTIONS OF THE 1944 SUMMER SESSION

ARTS AND SCIENCES AND VOCATIONS

In the summer of 1944 it is possible for the first time to take work leading to the B.A. Degree and the B.S. Degree in certain vocational subjects. The incoming freshman will wish to give some thought to the question of what degree he wishes to work toward. The advanced student who has been working toward the B.Ed. Degree and is now interested in the B.A. will find that it is very easy to make the change. He can probably do so by merely exercising some care in the selection of his courses.

GRADUATE WORK

Another innovation is the inauguration of graduate work leading to the Master's Degree in Education. Students who hold a bachelor's degree from this university or any other accredited institution; students who have done some graduate work in other accredited institutions; and seniors in their last quarter, who do not have a full program, are eligible to registration for graduate work. Forty-eight quarter hours of acceptable graduate credit are required for the Master's Degree, sixteen of which may be transferred from other institutions. Graduate work is offered in the following fields:

Elementary Education

Educational Administration and Supervision

Secondary Education in the following:

Biological Science

English

Foreign Language

Mathematics

Physical Science

Social Science

Written application for admission to the Graduate Division should be made to the Chairman of the Graduate Board on blanks secured at his office. Admission to the Graduate Division is not equivalent to admission to candidacy for the degree.

Graduates of other educational institutions should file official transcripts of all high school, undergraduate, and graduate work with this Chairman at least one month before matriculation.

WORKSHOPS

Workshop in Elementary Education. In the attempt to provide a flexible plan whereby elementary teachers can spend the summer working more directly on their special problems than the usual course arrangement allows, the so-called workshop plan was introduced in the summer of 1942. The plan will be offered again this year in the first summer session.

Those who wish to engage in this type of activity should decide upon the problem or problems which they wish to attack, should register for Education 333 for four quarter hours, and should confer with Mr. Bosley for suggestions as to other courses and activities which will be of assistance.

Opportunity will be provided in Education 333 for persons with similar interests to work together as a group toward the solution of their common problems. Each such group will be under the direction of a faculty sponsor.

Workshop in Rural Education. An opportunity will be given for a limited number of rural teachers and supervisors to work on problems confronting the rural school. The work will include class discussions, individual and group conferences, observation in a rural demonstration school, and participation in other activities under the guidance of specialists. Special consideration will be given to ways of utilizing environmental resources in providing for child growth and development. The Workshop in Rural Education will be offered during the first summer session. Several members of the Rural Education staff will assist in the workshop. This course is numbered Education 390. It will be offered for eight hours' credit.

Industrial Education. The Industrial Education Department provides much work that is of value to the future soldier or sailor. To accommodate these men, the department has removed all prerequisites for advanced courses, allowing freshmen and sophomores to enter any of the courses which they are able to carry. In this way, those who desire industrial education subjects may get a maximum number of credits in a short time. Now that women must carry on the work at home formerly done by men, it is highly appropriate for them to enter any industrial education course. The shortage of teachers in this field is serious, and trained women can teach industrial education as well as men. Industry is also anxious to hire women who have training in drafting or machine shop. To those who look forward to entering war industries, one section of intensive machine-

shop training is offered. This class meets fifteen hours a week and prepares men and women for industrial jobs in about 200 hours. There is no cost to students in this work.

BUREAU OF CHILD GUIDANCE

The Bureau of Child Guidance deserves the attention of every teacher and prospective teacher in that a knowledge of its services will greatly enhance his value to his community. Through the assistance of this agency, the adjustment problems of almost any child can be satisfactorily solved.

The Bureau of Child Guidance works in close cooperation with all other child-welfare agencies, with the public schools and public health officials of this area, and with the various teacher-training units of this college. Its personnel consists of well-trained faculty members from several departments, psychologists, social workers, doctors and nurses.

Special seminars offered in the 1944 summer sessions are Education 416, Techniques in Individual Measurements; Education 426, Procedures in Individual Guidance; Education 526, Techniques and Therapy in Individual Guidance. Schedules for these courses may be found under the offerings of the Education Department.

PARENT-TEACHER CONFERENCE

The eighth Annual Summer Conference of the Parent-Teacher Association will be held within the first summer session. Two speakers who are outstanding in the work of the Association will appear. Topics to be covered in the conference include plans of organization,

program making, health projects, and improvement of school and home conditions. Students and others interested are urged to take advantage of this conference. All meetings are to be held in the Old Gymnasium.

THE EDUCATIONAL EXHIBIT

June 13, 14, and 15, the usual Educational Exhibit will be held. Textbooks and reference materials, instructional devices, visual education, and general classroom equipment will be sent here by outstanding companies in the various fields, and put on display. Last year about two thousand people visited the exhibits of some forty companies. In spite of gas and tire rationing, which prevents representatives of these companies from visiting all the schools in Southern Illinois, we hope that city superintendents, high school principals, teachers, and board members will plan to attend this meeting. Address inquiries to E. E. Hall, Director of the Curriculum Laboratory.

RECREATION

The University will provide as adequate a program of recreation as is possible under the existing war-time conditions. For both summer terms programs will be conducted by the regular departments of instruction and administration and by other agencies on the campus.

Regularly scheduled events will include tennis tournaments, horse shoe tournaments, ping pong, the all University play night, concerts by orchestra and chorus, and exhibits in the University Museum. If enough are interested, there will be one baseball tournament. The photographic Exhibit will be held only if the photographic materials are available to civilians. There will be an exhibit in the Little Gallery each summer term. A recreation sketch class will be open to beginning students interested in art. (This may be taken for credit.)

The summer chorus will give concerts July 13, and August 24 at 7:30 in the evening. The summer orchestra will give its concerts the fifth week of each term. During the first term the University Museum will feature an Exhibit of Indian Carvings and during the second term old documents and letters from Southern Illinois.

The dates and time for the other events will be listed on the Calendar of Events Bulletin Board in the Gymnasium. These will be published also in the *Egyptian* far enough in advance to make ample preparation.

As in years past the Crab Orchard Beach will provide a fine place for swimming. Crab Orchard Lake will provide also a very excellent opportunity for fishing as well as boating. In the Crab Orchard Lake Area will be found some of the unusual features of the topography of Illinois. Many of these interesting places can be reached by bus and by hiking.

PRACTICE TEACHING

BRUCE W. MERWIN, Ph.D., Director
HAL HALL, Ed.D., Superintendent, Campus School

Campus High School: Louise Bach, A.M.; Virginia Congreve, M.A.; Alberta Gibbons, A.M.; Dilla Hall, M.S.; Hal Hall, Ed.D.; Audrey Lindsey, M.S.; C. C. Logan, B.S.; Charles Paterson, B.Ed.; W. Neal Phelps, Ed.D.; Lloyd J. Phipps, M.S.; Evelyn Davis Rieke, A.M.; Gladys L. Smith, M.A.; Harley Teel, A.M.; Madge Troutt, A.M.; Florence A. Wells, A.M.

Campus Elementary School: Mary Entsminger, M.A.; Ruth Husband, A.M.; Agnes Johnson, M.A.; Sina M. Mott, Ph.D.; Ora Rogers, A.M.; Madelyn Scott Treece, A.M.

Rural Training School: George Bracewell, A.M.; Jean Fligor, A.M.; Willis Malone, A.M.

The Practice Teaching Department will offer practice work in four fields: high school, elementary, kindergarten, and rural. As the facilities are limited, preference in assignment will be given those about to be graduated.

The campus elementary school, kindergarten through grade six, and one rural practice school will be in session for the *first* six weeks. For the Limited High School Certificate, practice work is given in the campus high school *both* six-week periods. High school classes will meet three times daily in order to cover one semester's work.

The campus high school will offer several standard courses, and also some electives that are not usually given by the smaller schools. Thus it is easy for a high-school student to find courses that he has not had, but which may be applied to graduation. The usual load is one half-unit, but a student may earn two half-units by attending six periods a day for the six-week session. The following courses will very probably be offered: Advanced Algebra, American History, Business English, Civics, Community Problems, Conservation, Creative Writing, Economics, English IV, General Science, Music Appreciation, Science of Aeronautics, and Trigonometry. For further information concerning the summer session program of the Campus Schools, write Hal Hall, Superintendent.

The Practice Department will offer practice in observation work in the *rural demonstration school* again this summer. The purpose of this work is to furnish an opportunity for the study of rural life, the rural school, and the rural community, and to provide experience in them. One of the schools located a short distance from Carbondale will be used as a demonstration school during the first summer session. Surveys, excursions, and contact with local people and community enterprises are a part of the course.

GENERAL INFORMATION

Fees for all freshmen and sophomores for each summer session of six weeks total \$8.75 plus Federal tax.

Registration Fee.....	\$5.00
Student Activity Fee.....	2.50
Book Rental Fee.....	1.25
	<hr/>
	\$8.75

Fees for juniors and seniors in the College of Education are the same as those for the underclassmen. The registration fee for the upperclassmen in the College of Liberal Arts and Sciences and the College of Vocations is \$10.00, but the student activity and the book rental fees are the same as for the others, making a total of \$13.75 plus the tax. Fees for each session for graduate students total \$7.50, not including the matriculation fee of \$5.00 and text books. These fees, exclusive of the book rental fee, are set by the Teachers College Board, and are uniform for all State Teachers Colleges in Illinois. This charge includes the fees for registration, limited medical service and hospitalization, library, and gymnasium and athletics. In addition to this, each student receives the weekly *Egyptian* and is given at the time of registration a ticket to the entertainment course.

Holders of acceptable Normal School Scholarships or Lindley Scholarships do not pay the registration fee of \$5.00 if they register in the College of Education. Scholarships given men and women honorably discharged from the Armed Forces of the United States in World War II excuse the holders from the registration fee in any College.

While this announcement of courses for the 1944 summer quarter may not be taken as final, most of the subjects will be given as scheduled. The normal student load is from seven to nine quarter hours. Each class meets twice as many periods a week as the number of hours of credit. In general, courses are regularly scheduled only three double periods, first and fourth, second and fifth, and third and sixth. Tuesday the second hour will be reserved for general assembly. Each class period is fifty minutes in length. Following is the schedule of periods for the summer, war time.

1st hour— 8:00- 8:50	4th hour—11:00-11:50
2nd hour— 9:00- 9:50	5th hour—12:00-12:50
3rd hour—10:00-10:50	6th hour— 1:00- 1:50

Courses numbered 100-199 are primarily for freshmen; 200-299, for sophomores; 300-399, for juniors and seniors; 400-499, for seniors and graduates; and 500 and above, for graduates.

REGISTRATION

Admission to the summer session is limited to graduates of accredited high schools and to those mature teachers whose experience entitles them to admission without high school graduation. The latter, however, will be admitted as unclassified students. Any student contemplating matriculation should have a transcript of his high school record and such college credits as he may have, sent to the Registrar prior to his coming.

The first day of each session will be set aside for registration. All students will be admitted alphabetically to the Wheeler Library, where they will be assigned to sponsors. These faculty sponsors will guide them in their selection of courses and approve the schedules when finally arranged. The tuition bills are also made out and paid at the same time.

**First Summer-Session
Registration**

Monday, June 12

- 8:00—Q-S Inclusive
- 8:30—T-Z Inclusive
- 9:00—A-B Inclusive

- 10:30—I-Mc Inclusive
- 11:00—M-P Inclusive

**Second Summer-Session
Registration**

Monday, July 24

- 8:00—A-B Inclusive
- 8:30—C-E Inclusive
- 9:00—F-H Inclusive
- 9:30—I-Mc Inclusive
- 10:00—M-P Inclusive
- 10:30—Q-S Inclusive
- 11:00—T-Z Inclusive

BOARD AND ROOM

Students may secure rooms in Carbondale with light housekeeping facilities at a cost of \$1.50 to \$2.50 each with two persons in a room, or may find room and board provided at proportionately low prices. Students are finding it profitable to pool their money for food and either prepare their meals co-operatively or engage a cook to prepare them. This plan is carried on in some rooming houses. Men desiring more information concerning housing are requested to write to Mr. E. G. Lentz, Dean of Men, and women should write to Miss Lucy K. Woody, Dean of Women.

The University Cafeteria, just across the highway from the campus, serves excellent meals at low cost.

REQUIREMENTS FOR GRADUATION

All of the work offered in the summer session carries regular college credit. A student may fulfill many of the requirements for the bachelor's degree by attending summers. A total of 192 quarter hours of credit is required for the degree. At least 64 hours must be in subjects not open to freshmen and sophomores. The following is a list of requirements which should be fulfilled by all students within the first two years of attendance:

Social Studies—15 quarter hours (work in 3 departments required)

History 110A, 105A—5 hours (required)

Government 200—5 hours

Economics 205—5 hours

Sociology 101—5 hours

Humanities—18 quarter hours

English 101, 102, 103—9 hours

English 205, 209, 211, 212—6 hours

Music 100 or Art 120—3 hours

Biology and Earth Sciences—14 quarter hours

P. & H. 202—4 hours

Botany 101, 202, or Zoology 101, 105—5 hours

Geography 100—5 hours

Physical Sciences and Mathematics—12 quarter hours

Chemistry, Physics, or Mathematics

(12 hours selected from 2 departments)

Practical Arts and Crafts—3 quarter hours

Agriculture, Household Arts, Industrial Education 203, Commerce (not required if student has had any of this work in high school, except where departments require such courses in their majors)

Physical Education—6 quarter hours. (See department requirements.)

*A reading knowledge of some foreign language (to be determined by examination) is required for graduation.

College of Education

The course of study in the College of Education leads to the Bachelor of Science in Education Degree.

All students in the College of Education are required to take American history and government.

Students preparing for high school teaching should take the following courses in addition to those listed above:

Education and psychology—20 hours: 206, 310, 315, 331, and 345

English 390, 392 or speech—3 hours

Practice teaching—12 hours. At least 4 hours must be in the student's major and at least 8 hours on the high school level.

* Not required in the College of Vocations.

A major of at least 36 hours and two minors, or a major of 48 hours and a minor of 24 hours in separate fields of study.

Students preparing for elementary teaching should take the following:

Art and music—15 hours (a total of 18)

Education and psychology—32 hours, including 206, 306 or 340, 311, 331, and 355

Mathematics—8 hours

Physical Education methods—3 hours

Practice teaching—12 hours (8 on the elementary level)

Minors in language arts, social science, and natural science areas.

College of Liberal Arts and Sciences

The course of study in the College of Liberal Arts and Sciences leads to the Bachelor of Arts Degree. On approval of the Graduation Committee a student may receive the Bachelor of Science Degree.

Requirements in addition to those of the first two years:

Psychology (Education 206) or philosophy (300 or 316)

A major of 42 hours

A minor of 24 hours

College of Vocations

The course of study in the College of Vocations leads to the Bachelor of Science Degree. Students in the College of Vocations will take the general requirements already listed. The subjects in which they may major are Machine Shop, Drafting, Secretarial Training, Accountancy, and Dietetics. Short courses may be taken in any of these subjects by those not candidates for the degree. For further information a student should write the head of the department concerned.
