"Southern Alumnus." (Sep 1958).

This Article is brought to you for free and open access by the SIU Alumni Association at OpenSIUC. It has been accepted for inclusion in SIU Alumni Magazine by an authorized administrator of OpenSIUC. For more information, please contact opensiuc@lib.siu.edu.
AERIAL VIEW OF SOUTHERN'S PROPOSED NEW CAMPUS SITE (story begins on page iii)
Mail Bag

Sentimental Grad

... Is it possible to obtain prints of pictures in the Alumnus? If so, will you please ask Photographic Services to send me a schedule of fees.

I was delighted to read in the current Alumnus that Southern's series in alumni dues billing had placed third nationally. We are familiar with the type of notices Ohio State sends out (Fred, '42, got his M.S. there), so I can appreciate how really good ours are. But since we have enjoyed being "hounded" by Ohio State, we think it's a little sad that Southern's prompt-paying alumni can't enjoy the sketches—in fact, may not even know about them.

I'm sure that my saying I enjoy reading the magazine is a trite and frequently heard statement, but nevertheless I say it sincerely. Waves of nostalgia engulfed me when I looked at the July issue. Then I knew for sure I had become a sentimental "old grad."

Happy Memories

As Mrs. Allen (Clara Nash, '08) is very ill and unable to write, I'm doing so in her stead.

She wishes to thank you for the gracious honor of Fiftieth Anniversary Citation received and for the kind letter enclosed.

Mrs. Allen relates many interesting stories connected with her years spent in Carbondale as a young girl and then again at the University.

She feels she has many happy memories to look back upon...

Mrs. Allen has given much of her gifts and talents in social work for her city. Her gay and spontaneous good humor has earned for her a multitude of friends and a deep respect of all who know her. Perhaps she might say that her University days have helped her achieve inner resources to accept the many illnesses which she has had to face...

To you and the Alumni Association, she extends her deepest appreciation.

Clara Nash Allen, '08

Prepares Booklet

I thought you might be interested in seeing a booklet I have prepared on the history of the Chicago Real Estate Board. (Cover picture below.)

The project took several months to complete, since the Board had never had its history compiled before. Because of the vital part the Board has played in the growth of Chicago, this booklet should have significance to students of history and economics. It is being given a wide distribution and was officially introduced at the 75th annual banquet of the Board in the Conrad Hilton Hotel.

Since my graduation from Southern, I have plunged into the world of journalism and writing. I can't say I have regretted this decision except for a little wistfulness every summer when I see my teaching friends embarking upon a summer of leisure.

Before joining Gardner, Jones & Cowell as a writer and account executive, I was a reporter for the Chicago office of International News Service and the Chicago Tribune.

(continued on page 23)
On the Cover

After extensive land surveys in Madison and St. Clair counties, a 2600-acre site two miles southwest of Edwardsville has been selected for a proposed new campus. The site is roughly 15 miles from the SIU residence centers at Alton and East St. Louis.

According to the SIU Board of Trustees, more than half the acreage is already under option and the University will seek options on the remainder. Purchase of the land, however, will depend on a $1,500,000 fund drive now underway, sponsored by the Southwestern Illinois Council for Higher Education.

The proposed campus is bounded on the east by old U.S. Highway 66 and on the west by an extension of State Route 157. The Illinois Transit Railroad tracks form the southern boundary and, on the north, a concrete highway running from Edwardsville to East St. Louis and Granite City. The land includes rough hills, wooded upland and bottomland under cultivation.

Dr. Paul W. Seagers, engineer and internationally known school building consultant of Indiana University, and Indianapolis architect Edward D. James made detailed studies of population growth patterns, accessible areas, drainage and water and power facilities at various sites in the area. On the basis of their findings and property appraisals in the area, Southern hired a realty company to take options.

President Morris said the Edwardsville site had good access roads and was developed to the extent that a college building program there would be feasible immediately.

The SIU Board said future negotiations with the property owners will be handled by Myron C. Bishop, an SIU associate professor of applied science and a real estate broker certified by the State of Illinois.

(continued on page 23)
The above citation was presented to Robert Odaniell, '51, alumni secretary, in recognition of "significant achievement in use of direct mail to promote homecoming participation." The award was made at the national conference of the American Alumni Council held in June at Lake Placid, New York. In addition to receiving first place in this category, Southern took third place in the alumni dues billing series. First place went to Ohio State University, second place to Stanford University. The brochure used to promote the Alumni family camping program tied for honorable mention. Responsible for the art work on these prize-winning mailers was Keith Connelly, '53.
Why Southern Needs

An Engineering School

President Morris pulled no punches in his speech last month before the Illinois Commission of Higher Education as he outlined Southern’s need for an engineering school. His speech followed one by Dr. David D. Henry, president of the University of Illinois, which opposes another engineering school in the state. Here is the text of the talk by Dr. Morris.

As a member of the first Governor’s Commission on Higher Education, I often urged that all hearings should be public hearings, and that the matters being considered and debated should have the largest possible audience. The general public is entitled to know what the problems of higher education in this state are and should have an opportunity at the earliest possible moment to pass judgment upon them.

This public hearing gives me an opportunity to clear up certain misconceptions concerning Southern Illinois University and its program, so that a wide audience can receive the clarification it deserves on the points of misconception.

Actually, what is up for consideration is the removal of an outmoded legal restriction upon the offering of engineering degrees by Southern.

Is this restriction sound?

First, therefore, permit me to question the soundness of such restrictive legislation as a means of solving educational problems. There are much better methods of controlling the educational program at Southern and at other state-supported institutions.

Restrictive legislation can never be tight enough to prevent an institution from doing unwise things if those who control it are unwise to start with. At Southern there are many things we could do under the law which we have not done.

But the evolution of our educational program has been a gradual one over the years because of the firm controls maintained by our curriculum councils, the Administration and our Board of Trustees. New programs have been authorized only after much study and when they could be justified in the interest of the school and the people and the area it serves.

It may come as a surprise to some to discover that when the 70th General Assembly created universities at Macomb and Charleston, out of the existing state colleges, it did not restrict their power to offer such programs as they deem appropriate to their needs. For many years the Teachers College Board has had authority to offer professional degrees in the programs denied our students.

That it has not authorized such degrees is mute testimony to the theory that in such matters administrative prudence may be a more effective deterrent than legislatively imposed controls.

It does not appear necessary to argue the logic or the merits of such a philosophy. The point is that no restrictive legislation is required to control the development of Southern since there is a better and more functional type of control. This control is the need of the area served by Southern Illinois University. The complaint in Southern Illinois is not that we have gone too far too fast, but that we have not yet been able to do some of the things that people in the area urgently feel should be done. At any time we should be happy to compare the efficiency, economy, and quality of our operation with the efficiency, economy, and quality at other state-supported schools. We are confident that the results would show that Southern is making as good use of its educational dollars as any other institution.

... When the institution was converted from a teachers college into a university the legislature and the state administration were responding to the clear needs of a large area of the state which had hitherto been neglected to the hurt of the whole state. The inadequacies of education in the area had become generally known, and our state legislature and state administration attempted to meet them. It is obvious that since Southern Illinois is a part of the state of Illinois anything that is injurious to it or that prevents its proper economic and social development is injurious to the state as a whole. We at Southern Illinois University took the legislature’s action as a clear mandate to develop programs that were suited to the needs of our own area and that would result in the proper use of the human and natural resources of the area.

Designed to help its area

What we have done under our authorization, therefore, is clearly related to the needs of Southern Illinois.

In the various fields Southern has entered, it proceeded carefully and with a great deal of study and consultation to develop programs designed to help its territory. In order to obtain the powers it needed in order to serve its...
area, however, Southern was forced to acquiesce to restrictive legislation back in 1943. Oddly enough this restrictive legislation involved two of the fields that are most necessary to the development of Southern Illinois as an area. I refer specifically to agriculture and engineering. Southern Illinois University, since 1913, had been offering work in agriculture suited to the problems of its area, which are quite different from those of the area surrounding Urbana, and yet it was forbidden to offer degrees in agriculture. This was so manifestly absurd that recently the restriction was removed, and I might add that a considerable amount of support for its removal came from staff members of the University of Illinois. Today there is a liaison committee between the agricultural schools of the University of Illinois and Southern Illinois University which enables the two institutions to cooperate fully and effectively in a program which is in the best interests of the farmers of all Illinois.

An unmet need

One unmet need of the Southern Illinois area, however, is the need for engineering and technological know-how which has been expressed both by the established larger industries in the area and by small industries attempting to get a foothold. The industries of the area feel handicapped in competing for engineering talent since they are removed from the training centers in technology and engineering.

For many companies engaged in light manufacturing or electronics, the presence of an engineering program may be an important item on their list of factors to be considered in locating a new plant. For example, the Magnavox Company recently located a new plant in Urbana. One of the reasons publicly given for this decision on plant location was the nearness to the College of Engineering of the University of Illinois.

It is all very well to say that engineering schools upstate and out of state are producing a sufficient number of graduates to take care of everybody. The fact of the matter is that they are not taking care of Southern Illinois and that in the circumstances it would seem wise to let Southern Illinois take care of itself. .. Within the limits of the restrictions placed upon it, Southern has done what it can to take care of this need. First of all it has developed a Vocational-Technical Institute which has received a great deal of attention. This institute offers courses of the kind taught in trade and business schools since there are no other such schools in Southern Illinois. It has a two-year program for the training of technicians (who must, of course, be distinguished from technologists and engineers). These technicians have found it easy to obtain employment, but obviously they fall short of providing the kind of advanced technological knowledge that is needed in Southern Illinois. To allow Southern Illinois to train certain low-ranking members of the engineering team without training the others obviously unbalances the picture.

Discriminating and inconsistent

We do not want our graduates to be relegated to the tradesman or craftsman category because of inadequate educational facilities. We would much prefer that the students with engineering aptitudes be diverted from the technical institute type of training into programs wherein considerable emphasis is placed on the basic sciences, mathematics and the techniques of engineering. We are happy to be able to provide these opportunities on the undergraduate level. All we seek now is authority to confer upon them the degree they deserve on the basis of their demonstrated abilities. With the degree would go the recognition, prestige and other intangibles identified with it. As General Motors put it in one of its advertisements for personnel: "Because engineering is a profession at GM—your graduate accomplishments are accorded added attention." (Journal of Engineering Education, Vol. 48, No. 5, February, 1958)

Secondly, Southern has developed an applied science curriculum—a four-year course leading to the bachelor of science degree. In this curriculum are the ingredients of an engineering curriculum and the graduates can readily take jobs of a kind that are often filled by engineers. But even though they are doing the work of engineers in many cases they cannot be called engineers. They are handicapped in engineering societies and in general they lack the advantages of being full-fledged members of the profession. It seems to us that it is the rankest discrimination that the young men of Southern Illinois who are interested in making a contribution to technology and who have met the requirements for it should be denied the degree and the title which they have earned, whereas the young men of other parts of the state taking very much the same kind of program should have the advantages of the degree. ..

Whereas certain of the University of Illinois leaders in the field of agriculture readily saw the possible advantages accruing to them from an affiliation with SIU, certain of the leaders in the field of engineering have taken the position that there should be an educational monopoly at one state-supported institution, regardless of its lack of success in providing adequately for our part of the state. Already these individuals are talking about extending the University of Illinois' engineering operation into Chicago, in spite of the presence in Chicago of some excellent technological institutes and engineering schools. Perhaps this extension is needed. Only study can show, but it seems inconsistent to argue that the dispersion of the engineering resources of the state universities possesses great merit as applied to Chicago but is illogical as applied to
Southern Illinois...

Southern is merely asking to be on an equal basis with the University of Illinois, Eastern Illinois University, Illinois State Normal University, and Western Illinois University, none of which has the kind of restrictive legislation in its charter as was imposed upon Southern Illinois University, so that it can, in cooperation with the Commission and with the other schools, be on an equal footing in planning the best possible educational program for its people and for the citizens of Illinois generally.

A second misconception is that Southern is immediately interested in developing an engineering school on the same scale as that of the University of Illinois. The University of Illinois’ engineering school is one of the largest and most expensively operated in the world. There are numerous good engineering schools which turn out excellent graduates but which lack the expensive buildings, the expensive laboratories, the expensive staff and the expensive overhead of the University of Illinois’ engineering school, and yet manage to do a pretty good job. Southern Illinois University is not attempting a duplication of facilities at the University of Illinois. Instead, it is attempting to meet the needs of its area and to do so in the way that is most economical to the citizens of Illinois.

Ban should be removed

In brief, the restriction of offerings in engineering at Southern Illinois University needs to be removed because:

1. Many of its students have enrolled in pre-engineering, applied science, and allied programs at Southern and see no reason for not being able to complete work for their degrees without uprooting themselves.

2. Many phases of an engineering program already exist at Southern and over a period of years additional courses could be added with little more expense than other courses which the University must provide for its increasing student body.

3. Industries located in Southern Illinois have pointed out the difficulty of holding in the area engineers who are not home-bred.

4. The professional engineers in Illinois should have increased opportunities for meeting with nearby engineering educators on the staff of Southern Illinois University for consultation and discussion of mutual problems.

5. Southern Illinois, for economic reasons, needs the kind of know-how that can be provided by engineers and technologists trained in and working in its own area.

A final group of misconceptions consists of certain bugaboos that have been interposed between Southern Illinois University and its desire to help its area by legitimate technological and professional approaches.

The bugaboos

First is the bugaboo of excessive cost. Certain “scare” figures have been used in public testimony against our measure. These figures have no validity whatsoever...

As I have already stated, there are many fully accredited, highly-rated engineering schools that are able to carry on sound programs at no place near the cost of the University of Illinois’ program. Secondly, SIU already has the ingredients of a general engineering program. It already has strong departments of physics, chemistry and other subjects which compose a great deal of the engineering curriculum. As its applied science program, which is still quite young, develops, the transition to an engineering program could be made easily and at comparatively small expense. Many of the faculty members and much of the equipment are already available...

The second bugaboo is unnecessary duplication of facilities existing elsewhere in the state. May I approach this point by talking for a moment about the need for public school teachers in the state of Illinois and the state’s attempt to provide an adequate supply of these teachers. There are now seven institutions, supported largely or in part by the state of Illinois, which train teachers. Under the monolithic concept of higher education which prevails in some quarters, this is very bad. The teacher-training facilities of the state are scattered. The various teacher-training institutions are duplicating each other’s courses and curricula (incidentally, at the request of the state which has set up specified courses of study for intending teachers); libraries for use of intending teachers have been constructed on various campuses; physical education facilities have blossomed forth; and in general the state has set up a large number of highly specialized, highly professionalized, highly duplicative, but highly necessary separate facilities for the training of teachers. In spite of this “duplication,” there is a teacher shortage which is perhaps more acute in some parts of the state than in others... Duplication is not necessarily unnecessary duplication.

Engineering is, like teaching, a profession which requires specialized facilities for its training and which is almost as widely discussed as the teaching profession because of the need to produce well-trained talent if we are not to fall behind other countries in technological know-how. The various states of the Midwest have their own engineering schools and a number of them, for example Michigan, have several state-supported engineering schools...

The bugaboo of “duplication” needs, therefore, to be carefully examined to ascertain whether or not the best method of training professional people is to put all our eggs in one basket with the fervent prayer that neither the eggs nor the basket will break under the pressure; or to take advantage of the science courses, the shops, the libraries, the staff members and the organizations existing (continued on next page)
at certain other potential training spots. Perhaps the need for engineers might be better cared for by this method than by an uneconomic concentration of facilities at one place. Perhaps students would be better served where they could receive more individual attention.

A third bugaboo is that an engineering program has to be handled with excessively meticulous care by a rare brand of specialists belonging to an elite class of society. If this were the case, the country would face an even more deplorable shortage of engineers than it already faces... Engineering is a difficult, complex, demanding subject, but this is not the same thing as saying that it is different from other professions in this respect, or that it is sacred, or that it has to be taught in a highly specialized way under highly specialized circumstances at a highly specialized place. With no sacrifice of educational standards, many colleges and universities manage to turn out highly-qualified engineers without making pretentious claims as to the peculiarities of this subject...

By precluding from the offerings of Southern Illinois University a program in engineering, the state of Illinois in effect unintentionally stacks the cards against the young men of the area. Typically, many young men wish to enter the fields of engineering and business in Southern Illinois. Although they may receive training in business, they may not receive training in engineering. Hence, they are forced to leave the area for their training which, as our friends in the engineering profession testify, generally means their loss to the area.

We regret that it has been necessary to wage an uphill struggle against obstacles in order to serve the needs of the state of Illinois as we can best serve it. May we suggest to the members of the Commission of Higher Education that if there is any doubt about Southern Illinois University's position in this matter they visit our campus and the rest of Southern Illinois with a view to checking up on our program. This technique of local or on-the-spot investigation has been used by the School Problems Commission with great success and has resulted in general public acceptance of its recommendations. We hope that the Commission of Higher Education can achieve the same success by going directly to the people involved and finding out what they need. It is to be congratulated on its holding of a public hearing today, which is a first step in the kind of grassroots approach which we at Southern have adopted and believe to be generally needed.

In summary, we earnestly request that the Illinois Commission of Higher Education recommend removal of restrictive legislation concerning engineering degrees at Southern, so that the state, through its designated agencies, can consider in an orderly and objective fashion developments in Southern Illinois University's program which would provide the engineering and technological knowledge needed in the area.

---

IT WAS ALL IN FUN

William T. Gooch, '49, and Bob Odaniell, '51, Southern's alumni secretary, look too happy for Gooch to have been playing "for real." Yes, it was all in fun. And FUN "fun" spells the first annual alumni family camping program.

We doubt that you would hear a dissenting voice were you to ask those who attended the camp if they had a good time. All of them say they plan a return visit to Little Grassy Lake next summer. A number of alumni dropped in for a short visit and went away with plans for joining the crowd next year.

There was plenty of swimming, horseback riding, and other outdoor sports. The children and grownups enjoyed crafts and the little ones proudly presented fruits of their labors to their parents who proudly accepted them.

One wife and mother said the thing she liked most about the camp was the feeling of security she had about her children. "I feel free to enjoy myself and all the while I know the children are having a good time and are not far away."

If there was any complaint at all, it was this, "You feed us too much at noon and then we just want to be lazy and relax." But you can bet that the three good meals provided each day made a terrific hit generally. Coffee was available in the main dining room at all hours of the day or night and there was food for that midnight snack we all love too much.
Ten Years of Progress

When Delyte Wesley Morris came to Southern Illinois University in September 1948 to serve as its president, he faced a challenge that would have staggered the ordinary man. Southern had just undergone the change from a teacher-training school to a three-college university and such a transition is not easy.

That he met that challenge well, no one will deny. When he came to the campus there were about 250 faculty members and the student body numbered 3,000. Today Southern boasts a faculty of more than 600, and anticipated resident enrollment for the fall term is around 10,000.

Southern now has six schools and five institutes, and offers courses on both the master's and the doctorate levels. Not only is there a more diversified program of study offered at Southern, but her physical plant has been considerably enlarged and improved. One has only to visit the campus to see the great physical changes. When Dr. Morris first came to Carbondale the campus was confined largely to a single block. The University now operates two campuses in the Carbondale area and residence centers in East St. Louis, Alton and Belleville. Since 1949 more than $25,000,000 has been spent for erection of new buildings.

Under the administration of this handsome six-footer with the keen eyes and ready smile, the salary level has been raised. The overloaded faculty situation has been relieved. More money has been available for research. He succeeded in convincing the legislators that SIU was not receiving her share of appropriations, thereby providing opportunity for expansion of facilities.

A native of the area, Dr. Morris feels a personal sense of responsibility toward this section of the country which has experienced its share of economic hardships. His mission for SIU has been and is training young people who will remain in the area to serve.

“The role of a university or college does not end with the development of youth,” Dr. Morris said soon after coming to Carbondale. “Such institutions should stand as fountains of knowledge where all might drink. Their reservoirs should be constantly replenished in order to irrigate the surrounding land.” Under his administration SIU has become so closely identified with the economic, social and cultural welfare of the region it is often referred to as “The People's University.”

Southern has, since his coming, achieved national attention from educators, from the press and from students the country over who took to the idea of getting an “education for living” closely tied to the everyday problems of an area.

By careful planning and budgeting, SIU has been able to take education off the campus to people of all ages without losing its high academic standing.

“In fact,” Morris says, “I believe the atmosphere of scholarliness and creativeness for students has improved, despite all the University's new interests.”

We quote from the May 1956 issue of Employment Security Review: “For more than one million people living in an inverted triangle between the Mississippi and Ohio rivers, Southern Illinois University has become as important an institution as their local banks and post offices . . . President Morris' leadership and the University's new independent role came at an appropriate time . . . At present there is hardly a city, town or village in Southern Illinois that is not benefiting from the University in some direct manner.”

Here is part of a quotation from an article appearing in the April 14, 1957, issue of Chicago American Pictorial Living Magazine: “The campus site, however, had little to do with the new role of dignity and importance Southern has attained. The motivating factor in Southern's personal success story is its president. Dr. Delyte W. Morris, a slender, brown-eyed, dedicated man, is the institution’s eighth president. Tall and benign, his dark hair is overtoned with a grayness that bespeaks of his magnetism.”

Nowhere is there a finer First Lady than pretty Dorothy Morris. When Dr. and Mrs. Morris came to the campus their sons, Peter and Michael, were small boys. This fall Peter will be a senior at SIU; Michael will be a freshman at Knox College.
Receive Promotions

At the June 24 meeting of the SIU Board of Trustees, 16 faculty members were advanced in rank and two acting directors of University agencies were given permanent status.

Dr. I. Clark Davis, '39, who has been acting director of student affairs, was given permanent status. Davis is also dean of men at SIU. He received his master's and his doctorate from Indiana University where he also served as a counselor. Before joining the staff at SIU, he was assistant to the director of student affairs at Purdue University.

Another acting director, Dr. William J. Tudor, was named director of area services. Tudor came to Southern in 1948 as a sociology professor. In 1951 he lectured in Greece under a Fulbright award. Dr. Tudor serves on the national board of field advisers of the Small Business Administration, as a member of the Illinois Public Aid Commission, the area YMCA Council, Southern Illinois, Inc., and is active in Boy Scout work. He is a past president of the Carbondale Chamber of Commerce, and was a member of the board of the National Conference of Christians and Jews.

Promoted to full professorships by the board were Harold W. See, executive dean of the Southwestern Illinois Residence Centers; Ralph E. McCoy, director of university libraries; John O. Anderson, Department of Speech Correction, and Abraham M. Mark, mathematics department.

New associate professors are John S. Rendleman, ex '47, University legal counsel; Sherwin Abrams, theater; A. Frank Bridges, '29, health education; John F. Hosner, School of Agriculture; Charles H. Lange, anthropology, and Julius Paul, government.

The following were advanced to assistant professorships: Charles Pulley, University architect; Lysbeth Wallace, art; Milton Shute, agricultural industries; Frances Phillips, '35, health education; Kent Moore and Alan Cohn, general library.

Alumni Office Moves

The huge expansion of Southern’s building program has necessitated a number of “moves” for several SIU offices. The home economics building group, located at the corner of University and Grand avenues, is progressing as rapidly as weather will permit. The building at 909 South University, former home of the Alumni Office, was moved recently to make room for this group. New alumni headquarters are now located at 211 Harwood, formerly used by the Health Center. This is your home on campus, so be sure to drop by the new location when you are in Carbondale.

Address Available

Southern Illinois University Press has published “We Happy Few,” an address by David T. Kenney, ’48, delivered at the eighty-second commencement on August 9, 1957. Dr. Kenney is associate professor of government and assistant dean of the
graduate school at Southern. Copies of the address are available, without charge. Send your requests to Southern Illinois University Press, Carbondale.

More Money for Research

During the last fiscal year, SIU faculty members received more than a half million dollars for research.

According to Dr. John Anderson, head of graduate research programs, $388,039 came through grants from such agencies as the National Science Foundation, U.S. Department of Health, Education and Welfare, the U.S. Atomic Energy Commission and the American Cancer Society.

The total allocated from SIU funds, $119,670, represents the largest contribution ever made by the school in a year's time and is more than all funds budgeted for SIU-sponsored special research on the campus between 1953 and 1957.

"Future requirements in research," says Anderson, "will exceed those of the past in order to keep pace in an educational environment emphasizing this critical aspect of university training."

A total of 232 projects were supported solely by SIU funds and covered a vast area of inquiry, from a study of "American Trade Unionism" to "Reactions of Cyclic Ketones" and "Polyphonic Lamentations of Jeremiah Before 1600."

for micro filming more than 20,000 ancient documents rescued from the basement of the courthouse at Bowling Green.

Many of the records were wet, she said. They were blurred and in poor condition. All were coated with more than a 100 years of dust.

"I even found my grandfather's marriage bond on the basement floor," said Mrs. Ferguson. The period covered by the papers ranged from 1797 to 1860.

Mrs. Ferguson says she retired three times from teaching and was called back on each occasion because of the scarcity of qualified teachers and, of course, her "love for the profession." Three years ago she was teaching mathematics and Latin for Joe Gholson, ex '49, in District 9 in northern Illinois. She gave her contract back to the board and asked Mr. Gholson to let her go back to "My Old Kentucky Home."

In the earlier years of her teaching career, Mrs. Ferguson taught in Warren County, Ky., for five years, two of them in a log school house. Then she went to Arizona Territory for five years. But she had met a man named Frank Ferguson who lived in Saline County in Illinois. He followed her to Arizona and persuaded her to become Mrs. Ferguson. For ten years they lived on "a lovely little farm near Galatia." Mrs. Ferguson helped in the local high school. She served as first secretary of the Galatia Parent-Teachers Association, the first PTA to be organized in southern Illinois.

After the death of her husband she taught in West Frankfort under C. A. Waller, '26. J. Lester Buford, '29, became superintendent of Galatia High School and she taught Latin, science, and was sponsor for the Eugene Field Literary Society under his regime.

Mrs. Ferguson attended Southern a number of summers and studied at Champaign one semester. During the depression years she "helped out here and there. My parents were growing older and the boys were in the Army. We had a good farm and I loved to help direct the work on it, so I tried to come home to do research and to help out in the emergency. But one day J. P. Willis, '31, superintendent of Golconda, called and asked me to teach physics and mathematics. It was only 155 miles from home and of course I was glad to help out again."

"When I went to Golconda in 1945 we had a class of 10 boys taking physics. They were all seniors and knew they were going into service at graduation. As a class project, we sent them to Marion to take flying lessons. They all soloed and went directly into the aviation department. That was a much-talked about undertaking. We broadcast our project on a Sunday. It was a thrilling experience for all of us, and I love to talk about it."

Although officially retired, Mrs. Ferguson remains very active. Last year she served as treasurer of the Bowling Green chapter of the American Association of University Women. She also takes an active part in the League of Women Voters. Her Bowling Green address is 947 Park Street.

Hobby Corner

For a number of years Nora Young Ferguson, '29, has been contributing to the historical societies of Virginia, Illinois, and Kentucky. Right now she is particularly interested in the early history of the area around Warren County, Ky. Last winter she organized and prepared

Nora Young Ferguson, '29
FOOTBALL PROSPECTS BRIGHTEST SINCE '47

By Bill Hollada, '51

With 19 lettermen expected to return, Southern's football prospects look brighter than anytime since 1947—the year SIU won its last conference grid title. Every position will have at least one returning letter-winner, with guards, tackles, centers, quarterbacks, and fullbacks being two and three deep in experienced men.

Heading the list of prospects is Carver Shannon, speedy senior halfback from Corinth, Miss., who has established new SIU scoring and rushing records. Playing in only eight games last year, he netted 732 yards in 88 carries—an average of 8.2 yards per try for a new SIU season mark. He also set all-time single-game rushing and scoring records as he picked up 249 yards in nine carries (an average of more than 27 yards per try) and scored 32 points as SIU tripped Great Lakes, 38-1, in the season finale.

In 1956 Shannon, who is 6-1 and weighs 195, gained 694 yards in 99 carries and scored 90 points—another SIU mark. Shannon is the fastest member of the squad, establishing a new all-time SIU track record of 09.8 in the 100-yard dash this past spring.

Other veterans returning in the backfield are halfback Ranette Lewis, East St. Louis; halfback Don Miller, Cairo; fullback and 1958 captain Cecil Hart, Hillsboro; fullback Tom Bruna, Thayer; quarterback Bill Norwood, Centralia; quarterback Dave Wheeler, Chicago.

Only weak position in the line appears to be at end, where only two lettermen, Richard Dawson of West Frankfort and Richard Nelson of Wheaton, will be available for duty. At tackles will be lettermen Houston Antwine, Memphis, Tenn.; Robert Bourque, Lynn Mass.; and Richard Carpenter, Centralia.

Veterans Willie Brown, Memphis, Tenn.; Jim Lynch, Benton; Nicholas Re, Dowell; and Charles Steptoe, Centralia, will return to their guard positions, while lettermen back at center are Shaun Hawthorne, North Adams, Mass.; Robert Laffoon, Eldorado; and James Marano, Saugus, Mass.

Even the coaching staff will have a veteran returning, as James Wilkinson, assistant coach and scout and head wrestling coach will return after completing his doctorate at Indiana University.

In addition to lettermen, Southern will be bolstered by several newcomers, including some transfer students. Among these will be Paul Brostrom, guard from Lane Tech in Chicago; Girard Secker, center from Hannibal, Mo.; Jan Janseco, halfback from Johnston City; James Sandusky, tackle from Benton; John Teerling, end from Chicago; and Bob White, tackle from Herrin. Transfer student Ron Winter, quarterback from Carmi, who was not eligible last season, will be ready for duty.

The 1958 Interstate Conference race is expected to be one of the toughest in years, with only Eastern and Northern Illinois picked to finish in second division.

Southern's 1958 schedule features six home games, including a September 20 night home opener against Evansville College and a November 1 Homecoming tilt with Washington & Lee University.

Practice opened September 1.

Cross-Country

With all six of the 1957 lettermen planning to return, Southern's cross-country team will be aiming for a winning season as it opens its eight-meet schedule by hosting Southeast Missouri October 8.

Coach Leland P. (Doc) Lingle, '27, expects to have more than 25 answer his first call for practice the middle of this month. Returning veterans are co-captains Carl Meier, Altamont, and Robert Cluss, Elmhurst; Dale Gleghorn, Sparta; Mahlon Mahony, Peoria; George Moore, Alton, and LeRoy McPherson, Zeigler.

Southern hopes for an improvement over the 2-3 record posted last year and the seventh-place finish at the 1957 Interstate Conference meet. Last year's IIAC winner, Northern Illinois, is highly rated again this season, but should receive some tough competition from Eastern Michigan and Central Michigan.

One of Lingle's yearly problems is finding a new course. Southern's ever-expanding building program keeps forcing him to lay out different cross-country routes.

Complete schedule: Oct. 8, Southeast Missouri, here; Oct. 11, at Western Illinois; Oct. 18, Eastern Illinois, here; Oct. 22, Missouri Mines, here; Oct. 25, at Illinois Normal; Oct. 29, at Southeast Missouri; Nov. 1, State meet at Loyola University; Nov 8, IIAC Conference meet at Central Michigan. Home meets will begin at 3:00 P.M.

One of World's Greatest

After a five-week tour of Russia, Poland, Hungary, and Greece, Phil Coleman, '52, has established himself as one of the world's greatest distance runners.

One of 44 members of an American track team, Coleman set a new all-time American record in the 3,000-meter (220 yards less than two miles) steeplechase race at Warsaw, Poland, on August 2. His record-breaking performance was overshadowed by two Polish entries, who broke the world record. Poland's Jerzy Chromik clipped off the dis-
tance in 8:32.1—3.5 seconds faster than the world record held by Hungary's Sandor Rosnyoi as 100,000 fans roared their approval.

Coleman won first in a meet at Budapest against top Hungarian and Czechoslovakian athletes. Earlier on the tour, he finished second in a meet against Russia.

Hollada Resigns

Editorial Writer Bill Hollada, who has handled sports publicity at SIU for the past three years, has resigned to accept a journalism-English teaching position at East Lynn High School.

A former writer for the Benton Evening News, Hollada taught at the high school in Benton a year before joining the staff at SIU.

Basketball Schedule

Twenty-one games and a Christmas holiday tournament at Quincy are on the agenda for the 1958-59 SIU cagers.

Dec. 1—Austin Peay T
Dec. 6—Drury College H
Dec. 9—Missouri Mines T
Dec. 13—Ohio University T
Dec. 19—Illinois Normal T

Feb. 28—Northern Illinois H

ALUMNI BOARD ELECTS McROY

At the fifth annual meeting of the Legislative Council June 14, two new members were elected to serve on the Board of Directors of the Alumni Association. They are J. Lester Buford, '28, and Jane Curry, '57. Dr. Guy W. Lambert, '33, past national president, was re-elected to another three-year term.

Council members were welcomed by Dr. William J. Tudor, director of area services. Reports were given by Donald Bryant, '40, president, and by Robert Odaniel, '51, executive secretary, and Glenn Storme, '29, treasurer.

At its June 14 meeting, the Board of Directors adopted a corporate seal for the Association. Other business included reports on the Roscoe Pullliham Alumni Scholarship Fund, the Joint Alumni Council and its plans for the new year, the Student Union and the Alumni Family Camping Program. The matter of Shurtleff College alumni was discussed. Also under discussion was the proposal of a lodge site for the Association at Devil's Kitchen Lake. The directors approved the budget for the Alumni Office.

Previously announced in the July issue were appointments to the SIU Foundation and reappointment of W. Stewart Williams, '29, to the Joint Alumni Council.

New officers were elected by the Board. The new national president of the Alumni Association is Paul F. McRoy, '34, Carbondale. McRoy is owner of radio station WCIL and is a Shriner. Vice president of the Carbondale Building Loan & Homestead Association, he is also a member of the board of the Methodist Church and has served as its chairman. For a number of years he served on the executive board of Holden Hospital. Mr. McRoy is married to the former Mary Helm, '33. They have a son and a daughter.

Dr. Martin Van Brown, '25, Carbondale physician, was elected first vice present, and George T. Wilkins, '37, Madison County superintendent of schools, was elected second vice president. Elizabeth Harris Lewis, '32, was re-elected secretary. Glenn Storme, '29, was re-elected treasurer.

In addition to the three new members mentioned earlier, others on the board include Bill Hudgens, '48; David T. Kenney, '47; James Schmulbach, '53; Ruth Keith Throigmortona, '22, and Donald L. Bryant, '40, retiring president. (Photos of the board members appear on pages 10 and 11.)
More than 180 alumni hold office in Southern alumni organizations. Some are members of the Board of Directors of the Alumni Association, but most of them hold office in one of the 33 alumni clubs scattered throughout the United States and Hawaii. It is heartening to see the increased interest and support demonstrated by so many loyal sons and daughters of SIU.

Here on these pages is a gallery of some of those who are helping to make Southern's alumni program grow. Row 1, l. to r., M. J. Bozarth, '30, president, and Aline Neftzger Van Natta, '29, vice president, Jackson County; Virginia Peithman Andreas, ex '40, secretary, St. Louis; W. A. Bozarth, '41, president, Champaign; Maurice P. Clark, '38, vice president, Chicago; Lewis J. Hilliard, '51, vice president, Jefferson County; Carl M. Planine, '30, president, H. W. Ellis, '36, vice president, and Cleo Doris Carter, '46, secretary, Williamson County. Row 2: Howard Keller, '46, president, Massac County; Juanita Peradotto Rule, '55, secretary-treasurer, Macoupin County; Enell Lindsey, '37, president, and George Franklin, '38, vice president, Peoria; Clarence Reeder, '35, vice president, and Maxine Heider, '52, secretary, Perry County; W. L. Zimbleman, '39, president, Franklin County; L. V. Lipe, '38, president, and Frances Henriick Krull, ex '47, secretary-treasurer, Randolph County. Row 3: Frieda Pulliam, '58, vice president, and Jennie Glaeser, '56, secretary-treasurer, St. Clair County; Robert Monday, '52, vice president, Wabash County; Auda Stone, '50, vice president, and Laceyella Johnson Foster, '42, secretary-treasurer, Saline County; E. M. Crossin, '30, president, and Jackson Drake, '50, vice president, Springfield; Raymond Defasnett, '36, president, and Darcy Ackerman Vaught, '45, secretary-treasurer, White County. Row 4: H. H. Sutton, '36, president, Curtin Englebright, ex '37, vice president, and Maxine Bishop, ex '35, secretary-treasurer, Wayne County; Charles Auld, ex '41, president, Washington County.

Continuing in the same order are members of the Board of Directors. They are Paul McRoy, '34, president; Dr. Martin Van Brown, '25, first vice president; George Wilkins, '37, second vice president; Elizabeth Harris Lewis, '32, secretary; Glenn Storme, '29, treasurer; J. Lester Buford, '28; Jane Carry, '57; David Kenney, '47; Dr. Guy W. Lambert, '33; James Schmulbach, '53; Ruth Keith Throgmorton, '22; Donald L. Bryant, '40, retiring president. Another director, Bill Hodges, '48, is not shown. The first alumni club meeting this year was held September 6 at the American Legion Farm, three miles south of Belleville. It was a get-together for the alumni of St. Clair County. A baseball game between SIU alumni and the East St. Louis Residence Center was held during the afternoon. (We went to press before learning the outcome.)

Other fall meetings already scheduled include one in Chicago on September 14, and one at Evansville, Ind., on September 17. The latter will be a hamburger fry at the home of Mr. and Mrs. N. W. Roser. Two meetings are set for September 28. One is being held in Springfield, the other at Norris City Lake picnic area, when the (continued on page 23)
Mrs. Frank L. Moss (Sarah Curtis) was unable to attend the class reunion last June but we are pleased to quote from a letter received from her last May. “It would be a joy and great satisfaction to see how the campus has grown and to view all the buildings erected since ’93. I still go about quite a bit, but could not undertake a trip away from home. I still do my housework and a bit with my flowers. Why not, instead of rusting out? When your nice letter and invitation came I was preparing a health talk for Home Bureau. Just now I was asked to give a tribute to a deceased D.A.R. member tomorrow. Yes, I will do that. For next Tuesday’s church group I will give an explanation of the Twenty-third Psalm. I also do my part as to programs in Garden Club. So much for my activities. My son and daughter are college graduates. So are three grandchildren. A fourth is a junior at the University of Illinois. The seventh grader has his college picked out. I wonder if the impetus for this formal education could have been given at old S.I.N.U.? ” Mrs. Moss and her husband live at 317 Sutherland Ave., Paris, Ill.

1909

Mrs. Carl K. Stull (Sadie McCreery, ex ’99) has moved from Urbana to Evanton where her address is 636 Hinman Ave. Her late husband was a member of the class of 1914.

1918

A letter from Mrs. Wiley A. Heiple (Inez Winn) received in June advised us that all health at that time prevented her from making plans to attend Alumni Day and also the Alumni Vacation Camp. She expressed deep interest in both and sent best wishes to her classmates. Mrs. Heiple lives in Wichita, Kansas, at 333 S. Erie Ave.

1921

Mrs. L. H. Sims (Lora Martin) and her husband proudly announce the arrival of their first grandchild. Born May 29, Jeffery William Woodul lives with his parents in Webster Groves, Mo. The Sims live at 1190 Mariedale, Kirkwood, Mo.

1922

Dewey Brush lives at 17350 Marlin Pl., Van Nuys, Calif.

MISSING 1918 REUNION

1923

William Estes is assistant postmaster in Salem. He and his wife live at 441 Ohio Ave.

1924

Arthur W. Cox writes from 3856 Lime Ave., Long Beach, Calif., that “retirement brings many satisfactions, the most recent one being a 3000-mile trip through northern California, Oregon, Washington, and Victoria, B.C. This is a trip I would highly recommend to anyone from the midwest.” Mr. Cox retired in June 1957 after a long career in the public school systems.

Mae Teel teaches at Pontiac School in Belleville during the winter and spends her summers in Nashville.

1926

Miscal Fierke is chemistry instructor at Morgan Park Military Academy. Until his recent appointment there Fierke had been in the chemistry department at Wilson Junior College. He has also served as head of the science department at Herrin Township High School, as assistant professor at the University of Illinois, and was a member of that university’s admissions committee for its College of Pharmacy. He also worked on the control of cotton and wheat root rot for the U. S. Department of Agriculture; organized and ran a research laboratory for development and production of amino-acids for American Maize Products Co., Rohey, Ind.; was supervisor, organic section, Sears, Roebuck & Company’s research and development laboratory; and was the company representative on four committees of American Society for Testing Materials to study automotive chemicals, roofing materials, soaps, and detergents. Fierke is married and has two grown children, a daughter and a son.

1928

Esther Breithaupt Ballard of Dixon is librarian at State School.

1929

Paul A. Crews lives in South Bend, Ind., at 431 N. Cushing.

1930

Vivian Randolph Reeves (Mrs. Chas. D.), who received her two-year degree from Southern in 1930, received her bachelor of science in education degree from SIU on June 15. She is an elementary teacher in the Harrisburg city schools. She and her husband have two sons, David, 17, and Robert, 10. Their address is 1908 Organ, Eldorado.

1932

Besse Hallagan is food editor of The Sacramento Bee. She lives at 1612 La Sierra Dr., Sacramento, Calif. Miss Hallagan received a two-year degree from Southern in 1924.

1933

Lucille Eckert Richter (Mrs. Milton G.) received her B.S. degree in education from Southern on June 15. She received a two-year degree in ’33. Mrs. Richter is a primary teacher at Cahokia Commonfields School. She and her husband and two children, Sandra, 14, and Tommy, 12, live at 1022 Express Dr., Belleville.

Dwight M. Karr is in the real estate business in Carbondale.

1934

Mrs. Lawrence Houghland (Helen Cunningham) received her bachelor of science degree in education from SIU on June 15. Mrs. Houghland, who teaches English at Marissa High School, received a two-year degree from Southern in ’34. She and her...
have three children, John Wayne, 13.

six children. They live at 463 Maplewood

cialist with the Air Training Command,

located in San Antonio, Tex. Mings and

dner at Millikin, specializing in teacher training in the elementary

field. McClure is married to the former Evalynn Bonham, ex '32.

Ernest L. Treece received the master of

science in education degree from Southern

on June 15.

Wayne Green, ex '36, has a paint and

wallpaper store at 400 N. Market, Marion.

He and his wife (Miriam Bramlet, ex '34) have three children, John Wayne, 13, Marilyn Sue, 10, and Heyward, 3.

John O. Mings is an educational

specialist with the Air Training Command, located in San Antonio, Tex. Mings and his wife (Charlotte Zepin, ex '37) have six children. They live at 463 Maplewood Lane in San Antonio.

Mrs. George Davy (Thelma Wilson) is consultant in secondary English in the Fresno (Calif.) city schools. She and her

husband live at 1576 W. Roberts Ave.

John E. Lee is postmaster at Tamaroa.

Lee and his wife have four daughters. They are Joyce Sue, 13; Julia and Judy, 11; and Betty Jo, 10.

Mrs. Earl Throgmorton (Edith Wall) is librarian at Galatia. Last year she served as librarian at the Anna-Jonesboro Community High School.

Dr. Howard L. Youell is assistant di-

rector of Products Research Division, Esso Research & Engineering Company. He and his wife and two sons, Donald Howard, 10, and Keith William, 2, live in Milford, N.J., on Rocky Hill Farm.

Hubert Fox is science teacher at the

junior high school at Marion. Fox and his

wife also operate a flower shop in Marion at 419 S. Court St. In his new assignment he replaces George Kaspar, Jr., ex '47, who resigned to teach in Phoenix, Ariz.

David M. Krause, ex '39, is office man-

ager of the Chicago Coliseum. He and his

wife live at 1629 W. Farwell.

On June 15 Arthur B. Miller received

from SIU the master of science in education
degree.

Rev. Paul M. Winder is pastor of the

Missionary Alliance Church in Logansport, Ind. He and his wife (Virginia Lieb, '36) and family live at 1527 North St. The

children are Phyllis, 16; Paul G., 14; Patricia, 8; and Peggy, 3.

Wayne Aiken is a field engineer for

Emerson Electric Company, St. Louis. He

and his wife and two children live at 4 Valley Lane in Ellicot City, Md. The Aikens' children are Della Ann, 16, and David Lancaster, 15.

Anna McCann, reading consultant for

the Belleville Township High School and

Junior College, was director of the Read-

ing Conference held July 18-19 at McKen-

dree College. Miss McCann received a two-

year degree from Southern in 1929 and in

1946 received her master's degree.

Russell D. Rendleman has resigned as

president of the Union County Tuberculo-

sus Association after serving for 15 years. Rendleman is superintendent of Union County Schools.

H. W. Wohlwend is the new assistant

registrar at SIU. He will also serve as part-time instructor in the College of Education. Wohlwend had been principal at Elkville High School for the past three years. He coached at Roalton High School from 1941 to 1955. He received a master's degree from Southern in 1954.

Lee Davis received the master of science

in education degree from SIU on June 15.

Earl Daves is director of adult educa-

tion at McKendree College.

Formerly of Natchez, Miss., Roy Edward Rude now lives at 265 Johnston Rd., Hamden, Conn.

Major Rex Owen Dillow, USMC, is

serving overseas. His address is H. & S. Co., 9th Marines, 3 R.O. Marine Div., c/o FPO, San Francisco, Calif. Dillow and his wife have two children, Matthew, 3, and Mary Elizabeth, 1.

Dr. William H. Freeberg, chairman of

the State Outdoor Education Advisory

Council, has been named to the Illinois Youth Fitness Advisory Board. Freeberg is director of recreation and outdoor education at SIU. The council includes representatives of groups in the state that work with children from six to 21. It is
designed to increase and improve contributions of youth and to increase the level of physical fitness.

Walter Holliday is superintendent of Ramsey Community Unit School District. He was formerly located in Gallatin, Tex. Holliday and his wife have two sons, Walter and George.

1943

On June 15 Helen Pyatt Dry received the master of science in education degree from Southern.

Mrs. R. E. Hoefer (Jane Magness) writes that a great deal has happened since her graduation. The first year she taught English in the junior high school at Jerseyville. In July of 1944, she and Jane Meisenheimer Gerlock went to Chicago—"the lure of the big city for the small town gal." There they worked for the Bureau of Labor Statistics under the direction of Dr. John B. Parrish, who had taught economics at SIU. Came the war's end and also the end of their jobs. Jane Meisenheimer went to graduate school and Jane Magness stayed in Chicago, working for the OPA for the next 15 months. The latter was married in 1946 and both their sons, Philip and Jack, were born in Chicago. In 1949 the Hoefers moved to Madison, Wis., where Mr. Hoefer became chief underwriter for Rural Security Life Insurance. In the summer of 1955 they built a new home in Monona Village, a suburb of Madison. There they enjoy the lake, a fine school system, and entertain their Southern friends. "If any of you are ever up this way, please stop to see us. We live just a half mile from Highways 12-18, the chief route between Chicago and Wisconsin Dells." The Hoefer's address is 423 LaBelle Lane, Madison.

Dr. Warren D. St. James is author of The NAACP: A Case Study in Pressure Groups published by Exposition Press, New York. St. James presents in the book an analysis of NAACP. He believes the organization's pressure efforts have had considerable success and credits it with a large share in the decline of lynching and cites its record of 34 victories in 38 Supreme Court cases—including the recent antisegregation decisions. St. James is a teacher and part owner of a cosmetics firm in St. Louis. He received his master's degree from SIU in 1947 and his doctorate from St. Louis University where he studied law. His wife is the former Virginia Hickman, ex '46. They have three daughters.

1944

Mrs. Marvin Aukes (Alma Catherine Darsnek) and her husband live at 3919 Yates Ave., Robbinsdale, Minn. Mrs. Aukes teaches sixth grade.

Rev. Merle Broyles is pastor of the First Methodist Church in Lombard. He and his wife have two children and live at 120 W. Washington. Charlotte is 17; Allen is 12.

Kenneth Carroll is director of the Technical Information Center, Chicago Rawhide Manufacturing Company. His Chicago address is 1037 N. Shore Ave. Carroll received an A.B. degree from Indiana State Teachers College and an M.A. from the University of Michigan (1948). He has also done work at the University of Michigan on his Ph.D.

The Rev. W. R. Hansen has resigned his pastorate at Fairmont Baptist Church in Fairmont, Minn., to serve as principal of the Des Moines Christian School, 6200 Franklin Ave., Des Moines, Ia. His residence address is 1420-62nd St.

Capt. Claron R. Robertson, Jr., ex '44, is assigned to the U.S. Military Academy at West Point, where he is an instructor in physics and chemistry. Capt. Robertson and his wife have two sons.

1946

Mrs. Ralph Carter (Cleo Doris) of Marion received the doctor of education degree from Indiana University on June 9. She received a master's from Southern in 1949.

Mrs. E. J. Helleny (Esther Jane Craver) is president of Xi Rho chapter of Beta Sigma Phi. Last year she served as social chairman. Mrs. Helleny is also a member of the Herrin Gardeners and the Order of the Eastern Star. In addition to having flowers as a hobby, she is interested in cutglass, enjoys sewing, and "loves to paint." A former home economics and art teacher, she has a son, Joey, 3.

Sister Jacinta Mann, the former Mary Mann, received the Ph.D. degree in education on June 16 from the University of Wisconsin. She specialized in measurement in statistics. Sister Jacinta is teaching at Seton Hill College in Greensburg, Pa. While doing her graduate work she held positions of teaching assistant and research assistant and during the last year was an advanced university fellow.

Clarence "Babe" Pierce returned to coaching this fall after serving the past two years as school superintendent at Mounds. He is head track and cross country coach at North Chicago High School. Pierce succeeds Bob Braden, '53. He had previously coached at Christopher where his team won 11 straight league titles in the old Coal Belt League and won the first championship in the more recently formed Black Diamond Loop. Pierce was a dash man at SIU. He shared the school 100-yard dash record of 9.9 for many years until Carver Shannon was credited with a 9.8 century this spring.

Claude J. Rose resigned last spring as superintendent of Shawnee Community Unit School District No. 84 to accept a similar position at Tremont Community Unit School District No. 702.

Lowell E. Wilson, ex '46, is aircraft material inspector for Aircraft Engineering & Maintenance Company, Oakland Airport, Oakland, Calif. He and his family live at 14886 Wiley St., San Leandro. Wilson and his wife have two daughters, Gay DeVonne, 9, and Lisa DeAnne, 7.

1947

Charles B. Beatty teaches in the Dade County public schools in Florida. He and his wife (Mattie Murrie, ex '42) and two children, Steve, 12, and Susie, 5, live in Hialeah at 5091 W. Eighth Ct. Beatty received the B.S. degree in education in 1947, the B.S. in vocations and professions in 1954, and in 1955 received an M.S. degree in education.

Marion Keith Blythe received the master of science in education degree from SIU on June 15.

Mrs. Frances Robinson York teaches in the Granite District in Salt Lake City, Utah. Her address is 177 W. Second, N., Apt. No. 6.

1948

Carl W. Brush moved to Marshall in
January 1958. He is general manager of Clark Service Company, one of the Illinois Farm Supply companies. He has been with the organization for six years. Previously he was with Tazewell Service Company as sales manager. His address in Marshall is 310 Pine.

Robert Curtis, M.A., ’50, is with Universal C.I.T. Credit Corporation in Decatur. Married to the former Jane DeLap, ’49, he and his wife have four sons. They are Bill, David, Tom, and Jim. The family’s address in Decatur is 1445 W. Hill.

Rev. James L. Nettleton is now pastor of the First Methodist Church in East Alton. For the past five years he has been serving Faith Methodist Church in Centralia. During his 16 years in the ministry he has served congregations in the Falmouth Circuit, DeSoto Methodist Church, and the Jonesboro Methodist Church. He received his theological training at the Perkins School of Theology, Southern Methodist University. He and his wife have two sons, Gary, 13, and Marlon, 3. The family’s East Alton address is 892 Valley Dr.

Dr. Robert D. Rawson is on the staff of Veterans Administration Hospital in Tuscon, Ariz. He formerly lived in Maywood.

In addition to being a homemaker, Mrs. Walter J. Schneider (Loretta Crider) does substitute teaching in the Hammond (Ind.) schools. She and her husband have two children, Linda is 8; Robert, 5. Incidentally, both celebrate their birthdays on June 18. The Schneiders’ Hammond address is 7606 Bertram Ave.

James Willmore of Belleville is a chemist. He received his master’s degree from the University of Illinois. He and Mrs. Willmore (Nina Price, ’47) and two daughters live at 156 Frey Lane. Linda is 5½; Jane is almost 1½.

W. F. “Bill” Price, M.A., ’49, has moved his law office to 173 W. Madison St., Suite 1101, Chicago 2. The new name of the law firm is Robinson & Price. He invites all SIU friends to stop by to see him now that he is located in downtown Chicago.

1949

William D. Carter is Crab Orchard Refuge manager. Before coming to Crab Orchard as acting project manager, Carter was at the Fort Niobrara Refuge in Nebraska. His wife is the former Bertha Wright, ’45. The Carters have three children, Jill, Jean, and Susan, 2, 4, and 7.

On June 15 James E. Fisher, Opal Toleta Morgan, Venda Rhine, Loy Ray Smith, and James R. Williams received the master of science in education degree from SIU.

Robert Etheridge, ’48, resigned last spring as assistant dean in the Office of Student Affairs at SIU to become assistant director of the men’s division of student affairs at Michigan State University. Etheridge, who received his doctorate from that institution in June, had been on the SIU campus for 12 years. While doing his graduate work at Michigan State, he was an assistant in the Administration and Educational Services Department and also served as full-time counselor in the summer counseling clinic. Etheridge and his wife, the former Veda Hollem, ’48, and two children, Robbie and Mike, moved to East Lansing in July. Their address is 230 Greenfield Parkway.

William Hurley received his master’s degree from the University of Denver on June 6.

Charles W. Koch is librarian at J. Sterling Morton High School and Junior College in Cicero.

William S. Lynch is teacher and coach at Jamaica High School in S sidew. Mrs. Charles McFarland (Lou Ella Dillon, ex ’49) advises us that she has moved from Richmond Heights, Mo., to 721 Pebbleshire Lane in Kirkwood.

On June 15 Leon Ross Sitter, M.S., ’51, received from Southern the certificate of specialist.

1950

Lindell E. DeJarnett is minister of music at Pattillo Methodist Church in Decatur. Ga. DeJarnett is married and has two sons, Stanley, 5½, and Douglas, 4. The family lives at 149 Candler Dr.

Thomas M. Gher, Carbondale, is a salesman for the Egyptian Window & Awning Company. Gher and his wife and two daughters live at 300 S. Dixon.

Mrs. James Hartzog (Mattie Wade Knight) and her husband and two sons, Jimmy, 3, and Donny, 8 months, live in Rio Hondo, Tex. Mr. Hartzog is in the grocery business.

Dr. Charles B. Koch, ex ’50, is a member of the Kuch Weston Clinic in Wisconsin. Koch and his wife (Marjorie Wilson, ex ’50) live in New Lisbon at 62 Liberty St. They have two daughters, Susan, 4, Patti, 2.

George F. Sawyer is industrial engineer for Wickwire & Spencer Steel Company. He and his wife and two children live in Three Rivers, Mass. Their address is Box 635. Mrs. Sawyer is the former Peggy Cromenees, ex ’46.

On June 16 Carl I. Stashe of Carbondale received a Ph.D. degree from Northwestern University.

Marion W. Tally received the master of science in education degree from Southern on June 15.

IN MEMORIAM

1926

Dr. J. Roy Leevy was injured fatally July 1 when a semi-trailer overturned on his farm tractor. He was crushed beneath the trailer in the mishap, which occurred on U.S. 52 at Klondike, northwest of Lafayette, Ind. A story about Dr. Leevy appeared in the July Alumnus under the 1926 class items concerning his activities in Phi Delta Kappa. Dr. Leevy was associate professor of sociology at Purdue University. A native of Mount Vernon, Ill., he joined the Purdue faculty in 1939. He received his master’s degree from Southern and his doctor of education degree from Indiana University. He also received a bachelor’s and a master’s degree from the University of Illinois. He was former vice president of the Ohio Valley Sociology Society, former president of the Indiana Academy of Social Sciences, was first vice president and director of Phi Delta Kappa, education fraternity, and president of the Alpha Mu chapter. He was also faculty adviser for Sigma Pi social fraternity, and
in 1946 he was agricultural adviser to the War Foods Department. He was one of the organizers of the Conference on Prison Education at Purdue. Levy was a member of the First Baptist Church in Lafayette, the Masonic Lodge and the Order of the Eastern Star in Lafayette, and Scottish Rite at Indianapolis. Survivors include the widow (Julia Hall, ex '23), two daughters, a son, two sisters, and a brother. 1949

Ralph F. Dewey, formerly of Cave-in-Rock, was killed May 24 by a bolt of lightning while trout fishing a few miles from Chetek, Wis., where he had lived for nearly eight years. Dewey went to Chetek after receiving his master's degree from SIU in 1950. He started as assistant principal and taught instrumental music and social studies in the high school. Later he became principal but continued with the music courses and band. As a student at SIU he minored in music and played with orchestra combos to help maintain a home at Southern Acres for his wife and son. Another son and a daughter were born after he went to Chetek. His parents, who live in Cave-in-Rock, also survive.

Lillian Gubelman, '02, died June 21 at a hospital in Santa Cruz, Calif. Miss Gubelman, a native of Mount Carmel, Ill., had made her home in Santa Cruz for the past nine years. She spent her life teaching, and for 26 years she was on the staff of the state teacher's college in Valley City, N.D. She received her master's degree from the University of Chicago. Miss Gubelman was a member of the First Congregational Church of Santa Cruz, the American Association of University Women; Young Women's Christian Association, and the Business and Professional Women's Club. Miss Gubelman was a former state president of the North Dakota Business and Professional Women's Club.

Gaylord Rybolt is a student worker at Menard State Prison. His address is 730 State St., Chester.

Sara Ann Schroeder teaches second grade in Kankakee.
Southern Sketches

Southern's largest summer graduating class received degrees August 8. Included among the 430 recipients were 155 who received the master's degree and 19 graduates of terminal programs at Southern's Vocational-Technical Institute...

President D. W. Morris and his two sons, Peter and Michael, became honorary Indians last month. They were initiated into the Kiowa tribe at the opening of the annual American Indian Exposition held August 18-23 in Anadarko, Okla. Dr. Morris also accepted on behalf of the University a citation for contributions made to the American Indians by Irvin Peithmann, staff member who has written two books on Indians and is now writing a third. Peithmann nominated Osceola, Seminole warrior, to the National Indian Hall of Fame. A bust of Osceola was dedicated at the Hall of Fame during the exposition...

Representing the SIU zoology department at the 25th International Congress of Zoology held in London July 16-23 were Dr. Charles Foote, professor of zoology, and his wife. Their research has resulted in maintaining and growing animal tissue under laboratory conditions for as long as 75 days. Foote has perfected methods of reproducing frog tissue in artificial cultures in order to study various effects that occur in whole animals. He has been able to change the sex of frogs and other amphibians by using synthetic hormones. While his studies have concentrated on sex differentiation and the subtle genetic changes that take place when hormones are fed to his amphibian tissues, the work has even broader applications. By using culture techniques, growth of cancerous bodies in living cells can be studied indefinitely...

Several thousand insects, 120 mammals and about 75 bird skins have been added to SIU's permanent collection of zoological specimens. The addition is the result of a successful field trip to Colorado. Its success, says Dr. Harvey Fisher, chairman of the department, indicates it would be practical to make the expedition an annual one. It will be scheduled as a summer field course for undergraduates in the field...

The chemistry department has been awarded another $1500 for scholarships by the Johnson Foundation. This will enable SIU to extend Johnson Scholarships to chemistry majors for another three years... A $2,000 grant for cosmic ray research has been awarded Dr. O. B. Young, professor of physics and director of the Atomic and Capacitor Research Laboratory at Southern. The grant was made by the National Science Foundation. The one-year grant was given Dr. Young to complete studies geared to the International Geophysical Year cosmic ray program. He received a similar amount to begin his studies which involve examining photographic plates which have been exposed to high altitude cosmic ray bombardment. When the particles hit the photographic emulsion, sometimes energized by billions of electron volts, they leave a permanent track. By studying the track and counting the delta rays that go out from it, this SIU scientist is able to identify the nuclear particles...

This year's recipient of the Elijah P. Lovejoy Award for Courage in Journalism went to J. Wilcox Dunn. Dunn is editor and publisher of the Princess Anne Free Press, Virginia Beach, Va. He was unable to receive the award in person because he was summoned to court as a witness in a law suit resulting from his weekly newspaper's six-year editorial war with a political machine. This award is made each year at the National Conference of Weekly Newspaper Editors sponsored by the journalism department at Southern. This year's conference, the fourth, was held July 14-18. It marked the third year for the annual Lovejoy award...

Plans have had to be revised for small dormitories and apartment units at Southern. Original plans called for 15 of the former, 10 of the latter. New plans call for nine dormitories and eight apartment buildings. Original bids exceeded the funds available. Under the revised plan there will be 128 separate apartments in the family housing unit rather than 160, and dormitory housing for 405 students instead of 675. Only $4,000,000 is available for this development and first bids amounted to nearly $5,000,000. The deadline for the new bids is September 9...

Under a new four-year degree program in forestry, SIU's first forestry camp will be offered during the 1959 spring term, beginning March 30. According to Dr. Neil Hosley, chairman of the department, the arrangement will give forestry students the chance to hold summer jobs with various forestry agencies, affording them practical experience as well as additional money to meet educational financial needs.
