Fond Memories of Old Main

(Editors Note: On Alumni Day in June gavels fashioned from timbers removed from the tower of Old Main were presented to past presidents of the Alumni Association. Arthur G. Cross ’97-2, Chicago, association president in 1906, was unable to attend and wrote this letter when he received his gavel.)

A few days ago our letter carrier brought me a surprise package—a part of the tower of Old Main. The gavel was an excellent sample of the work done in SIU. I have seen many gavels, none of them better, and very few as that from Old Main material. For this one, I want to express my appreciation and thanks.

My class, 1897, was the largest ever graduated at Carbondale. That number held top count for about 10 years, the number was 29. That number would be unlikely to be noticed at current graduation exercises.

Gavels made from Old Main added to a news item that the national treasury has loaned $5,250,000 for the erection of new buildings at SIU probably indicates that the days for Old Main are numbered. That is the building that I remember best. In fact it is about the only one that was in use during my school days.

A Gratifying Job

The July 1962 issue of Southern Alumnus has provided much pleasure to me in seeing in print names of my former classmates and faculty.

Although I haven’t attended class reunions in many years, I still experience nostalgia when I receive the publication.

For many years I have lived in beautiful Atlanta, Georgia. I am active in the civic, business and religious life of this teeming city, but I shall always love my native State and my Alma Mater.

I am employed with the Georgia Society for Crippled Children and Adults (The Easter Seal Society), in the State Headquarters Office as Financial Secretary. Working around physically handicapped children and adults—knowing in some small way I am helping them in their efforts to return to a normal way of life—has been the most gratifying experience of my life.

Studying the Hutterites

Last August I accepted a teaching position at the University of Manitoba, Winnipeg, Canada.

Winnipeg is in the heart of “Hutterite” country and I have spent the past two weekends at Hutterite colonies near here, with a view of doing some research on “The Social Psychology of Religious Communism” (title of a book I am writing). This is one of the reasons I took this job. They accept me as practically a Hutterite since I speak the language and am from Amana, Ia. There are about 20 colonies within 30-mile area here.

Winnipeg is great! About 50 per cent European (French, Ukrainian, German, Icelandic, etc.—few British). Canada is very different from the USA.

Small World, Indeed

Have just returned home after spending the summer in France. Attended the NDEA Language Institute sponsored by the University of Oregon.

I spent six days in Paris, seven weeks in school in the city of Tours and nine days touring Languedoc, Provence, Auvergne, Bourgogne, Champagne, and Ile-de-France. Had a most enjoyable summer!

Just as I was entering the Louvre Art Museum in Paris, I met Helen Blackburn, Class of 1946. Small world!

Keeping Up Across Country

Just a note to give you our change in address and bring you up to date.

Mel graduated with a Master’s Degree in geology from the University of California in Berkeley this past June. He now is employed on the geological staff of Texico, Inc., here in Ventura.

We certainly enjoy reading about Southern’s progress and of our friends in the Southern Alumnus. Keep up your excellent work!

Mr., Mrs. Melvin H. Fischer ’60

On the Cover

While many campuses are fast turning into broad expanses of concrete and brick buildings and asphalt parking lots, Southern Illinois University retains its natural rustic beauty, especially in the Thompson Woods area.

The serenity and charm of Thompson Woods seem far removed from the hustle and bustle of the hub of the campus. Its stillness is a welcome relief from the seemingly continuous noise of the huge construction machines in other parts of the campus.

On warm Indian Summer days this fall, hurrying students and strolling couples traveled the paths from residence hall to class, to the library, to the University Center.

Many perhaps did not notice the colorful reds, yellows, and russets of the changing leaves, engrossed as they were with the more important and immediate problems of analytical chemistry, softwood dendrology, ancient and medieval political science, or Meso-American chronicles.

They probably were unaware of the numerous Thompson Woods inhabitants—the energetic squirrels scurrying about collecting their winter supply of acorns and walnuts or the birds swooping from one tree to another and fattening up on the plentiful berries and tasty grubs.

Perhaps, like this couple seen sauntering hand in hand, they did not actually notice all these things about them but still they had a feeling of well-being, of beauty around them, of being part of a world of learning and doing and living.

Jay King, field representative in the Carbondale office of the SIU Alumni Association, snapped this scene while touring the campus last month with his trusty camera.

This first duo-tone cover of the Southern Alumnus is presented through the combined efforts of the Printing Service departments.

Record Enrollment Again at SIU

When the record book for enrollment for the fall term was closed in September, the total had reached 16,243. This is 1,615, or 11 percent, higher than fall enrollment last year.

The Carbondale Campus had 11,619 students and the Edwardsville Campus 4,624. This does not include extension or adult education classes.

The freshman class is the largest ever, at 5,589, more than 500 above last fall’s figure. Remaining totals show 3,423 sophomores, 2,617 juniors, 1,990 seniors, and 1,645 graduate students. There are 979 unclassified undergraduates.

There are 10,554 men and 5,689 women. The Edwardsville Campus has 2,348 students at Alton and 2,276 at East St. Louis centers.

On the Carbondale Campus the Registrar Robert McGrath (left) just grinned and President D. W. Morris muttered “Wow” as the 16,000th student to register for fall quarter was introduced to them. The student is Fred Pe Leate (center), East St. Louis, junior advertising major in the School of Communications.

Avoid Spring Rush--1963 Freshmen, Apply Now!

On November 1 the SIU Admissions Office started accepting applications for admission for the fall of 1963 from high school seniors. Applications for University housing also are being accepted now.

High school seniors are encouraged, in fact, urged to apply now and avoid the spring rush, last-minute confusion, and perhaps disappointment.

The high school senior must write the Admissions Office, Southern Illinois University, Carbondale, requesting admission and, if he desires, University housing. The Admissions Office then will instruct him about the steps to be taken and all necessary forms to be supplied.

If the student ranks in the upper two-thirds of his high school class, he can be granted admittance at the end of his seventh high school semester—that’s January, 1963. If he ranks in the lower third of his class, he must wait until June, 1963, and completion of his high school work to be considered for admittance.

All enrolling freshmen must take the American College Test. It can be taken during the senior high school year. Most high schools administer the ACT but students at high schools which do not give it will have ample opportunity to take it in their area.

University housing is not assigned until the student is accepted for registration.

Advisement by University personnel about the course of study for the new freshman also can be accomplished before next fall. Appointments with advisers can be made after the student receives admission.

The Admissions Office will gladly answer all questions concerning entrance into SIU. But write as early as possible. High school students are invited to stop in for information.

Financial Advice

For those students who are concerned about the financial aspects of attending SIU, the University has published a booklet of information.

Prepared by Arthur Swanson, coordinator of the Financial Assistance Center, it details means by which worthy students can secure financial help with college expenses. It lists general qualifications such as scholastic standing, need and citizenship, explains methods of application, and summarizes types of assistance available—scholarships, awards, prizes, grants-in-aid, private agency awards, and student loan funds.

Types of assistance include federal assistance, state assistance, and nongovernmental assistance. Non-governmental assistance comes from 169 agencies, many administered by the SIU Foundation.

SOUTHERN ALUMNUS
A broad, basic study program inaugurated to meet new challenges, to utilize new education methods, and to prepare the student to assume his proper responsibilities in an ever-changing world.

Because of the unparalleled changes in the world of today, the accelerated pace of living, and the tremendous advances in technology, educators are examining, reviewing, and deliberating on the philosophy, the goals, the nature of American education.

This has, been going on for 30 years throughout the country, and especially since the enrollment avalanche on campuses after World War II and even more so since Sputnik. No less true is this on the SIU campus.

While the University always has been concerned about the adequacy and effectiveness of its teaching, it was about 10 years ago that the concern was re-emphasized. It was felt then that there should be a change in basic requirements. After all, there had been little change in required subjects in 25 years or more. Some of the courses dated back to 1936.

Many felt that programs should be revised, courses updated and upgraded, new ideas introduced—in fact, the entire concept of the educational goals of the University needed to be reviewed and scrutinized.

During the ensuing decade individuals, committees, subcommittees, ad hoc committees, and various groups have studied this problem. It has been taken to the faculty, to the students, to the alumni, and to outside consultants. The response has been interesting, controversial, and certainly educational.

But from it all has evolved the General Studies Program, which was instituted in part for freshmen during the 1962 Summer Session and wholly for freshmen in this fall term.

A Slow Beginning

Several years ago the Faculty Council reviewed the general degree requirements of the University and reported to President D. W. Morris. President Morris invited the faculty to state their opinions and views on
establishing a broad, flexible program of general studies. Comments were solicited from a number of outside consultants and from visiting professors on campus who represented many years of teaching experience at major institutions of the country.

With the establishment of the Edwardsville Campus and with a change in the conception of a general studies program, it was decided new machinery was needed for further study—to take into account the criticism on the part of many faculty members about introducing such a program and the introduction of a new element, a second campus.

Vice President Charles D. Tenney became chairman of the three-man committee which included E. Claude Coleman, director of Plan A, and Prof. S. D. Lovell, of the Edwardsville Campus.

This committee conducted an investigation over a year—they interviewed faculty, students, representatives of the administration, and people who knew about general degree programs at other colleges. They visited Washington Square College of New York University, Hofstra College, Boston University, MIT, Harvard, University of Michigan, Michigan State, Wayne State, and Butler University.

They submitted a report of their findings and recommendations at the end of 1960 but it was not acceptable to the faculty. They revised the report and this was adopted in June of 1961. The General Studies Program would be put into operation starting with the 1962–63 academic year.

**President’s Committee on General Studies**

Responsible for setting up the program is a President’s Committee on General Studies. Chairman of the seven-man group is Prof. Harry H. Smith, of the Edwardsville Campus. Assisting him are Willard D. Klimstra, professor of zoology and director of Cooperative Wildlife Research; Robert Faner, Department of English; and Robert Layer, chairman of the Department of Economics, these three men from the Carbondale Campus, and from the Edwardsville Campus Melvin E. Kazeck, associate professor of social sciences; Laurence R. McAneny, associate professor of science and technology; and John A. Richardson, assistant professor of fine arts.

These faculty members represent the broad areas of social studies, humanities, the sciences, communication, and health and physical education, which make up the total program.

The committee meets twice each quarter (alternately at Carbondale and Edwardsville) to review and approve all general degree courses for the bachelor’s degree. For liaison between the committee and the operating units on both campuses, an executive officer has been appointed on each campus—Prof. John W. Voigt, of the Department of Botany and former acting dean of the College of Liberal Arts and Sciences, for the Carbondale Campus, and Professor Lovell for the Edwardsville Campus.

The committee is charged with the general planning and review of the program and the faculty designs the courses. Execution of the program is left to the operating organizations on the campuses.

Because of the differing natures of the two campuses, the General Studies Program is flexible enough to tailor its requirements for each campus. The Edwardsville Campus could stress one area over another considering its commuting student body and develop its option courses with regard to its facilities, staffs, and interests.

During these first couple of years of the program, it will necessarily be an experimental process. The committee has set the courses for the first year and now is at work on the second-year level. Then it will turn its attention to the upperclass courses and while this is going on will review the underclass courses for weaknesses and strong points. The entire program will be in operation by 1966.

**GS Requires Half of Total Hours**

In the General Studies Program the student will have to devote half of his class credits to General Studies courses—96 of the necessary 192 hours he needs for a bachelor’s degree. Most students will complete their GS requirements in their freshman and sophomore years. Some will extend the program into their junior and senior years.

All freshmen must enroll in General Studies and are advised first in that program and then referred to an adviser in their special field of study. A student does not have to declare his major until the end of his sophomore year.
Philosophy of Program

The underlying philosophy of the General Studies Program is to provide a broad basic education, a comprehensive fundamental program that will help equip the student with the knowledge he will need to meet intellectual, spiritual, and social demands. Since it is impossible to include all of the important subjects, it becomes necessary to include the essential ones.

Knowledge is a unified thing. When general courses are too scattered, too fragmentary, the student graduates without a sense of the total meaning of his educational experience. This was brought out by the students who were interviewed.

The students criticized many of the former general requirement courses they had taken as not sufficiently challenging. Some courses repeated material they had had in high school or in other college subjects. There was too much rote learning, too much random factual content and too little intellectual content. The function of importance of the particular subject in his total education was never made clear even by implication.

The report of the students' opinions went on to say, "Furthermore, because each course is taught in isolation from the others, each has to be an elementary course. There is no build-up from the less complex to the more complex, no cumulative effect, no real advance to broader and deeper understanding."

Consequently, progressive sequences have been designed. First-level courses are planned sequences, with the second quarter's work based on the first, and the third quarter's work based on the second. Instead of each subject being a small, self-contained unit without prerequisite, one depends on another and a sense of continuity enters into the whole program.

The basic courses serve as prerequisites for second-level planned sequences, which in turn deal with more advanced materials and concepts. In this way, general degree requirements provide the student with both depth and breadth of knowledge.

Alumni Questioned on Education

In April of 1961 questionnaires were sent alumni asking for their opinions and views of the education they had received at Southern and requesting comments and suggestions. Most of the respondents were from classes graduating during the last 10 years and they represented not only those trained to teach but also those trained in various other professional curricula. A great majority answered thus—

1. There should be an increasing emphasis on a broad general background for each student.
2. This broad general background should be required before specialization is allowed.
3. There should be an increasing emphasis on graduate and professional programs.
4. Specialization should be largely concentrated in advanced work on the graduate level.
5. If a choice must be made, the University's best teachers should be assigned to freshman and sophomore classes.

Many of the alumni wrote long and thoughtful letters supporting their answers. They were grateful for what the University had done for them and gave it firm support in its growth in quality and quantity.

Five Categories of Subjects

General Studies subjects have been divided into five...
General Studies . . .

categories—sciences, social studies, humanities, communications, and health.

Area A (sciences) requires 24 hours devoted to Man's Physical Environment and Biological Inheritance. This includes three courses in Energy and Particles (physics and chemistry) and three courses in Man’s Biological Inheritance (an introduction to the study of composition, structure, and function in living things.)

Area B (social studies) requires 24 hours devoted to Man’s Social Inheritance and Social Responsibilities. There are three courses on Man and Culture in Time and Space (temporal and spatial development and evaluation of civilization—emphasis on western civilization from the Middle Ages to the present and its great influence on the rest of the world); three courses on Culture, Behavior, and Society (an integrated examination of anthropological, psychological, and sociological contributions to the understanding of human behavior) and three courses on Political Economy (the making of public policy in the economic sphere through a study of the functioning of the economy and the operation of government).

Area C Covers Humanities

Area E (health) requires six hours devoted to health and physical development. This includes all of the physical education classes and sports and a course in Healthful Living.

The first level (basic) courses in the A, B, and C areas require major emphasis and are full-year sequences. They are taken during the freshman year since they are designed to be prerequisites for the second and third level sequences which are based upon them.

Second level (continuation) courses are based on first-level courses and probably will be completed during the sophomore or junior year. In each of the first three areas several different planned sequences are offered on the second level to allow the student some options.

Third level (advanced) courses are offered to juniors and seniors only and these are three-hour courses. The student here is allowed a considerable number of options. This is stressed very definitely in the General Studies Program—there are only 15 hours of absolute requirements; all other requirements allow the student considerable freedom in selecting options. Under the old system a student was not guaranteed any electives.

Securing Requirements for Program

A student can meet partial requirements of the General Studies Program without taking the course by three methods—waiver, advanced-standing assignment, and proficiency examination.

The student can waive the first-level sequence in the A, B, or C area if he plans to concentrate his college work in one of those areas. He begins his work at the second level of the area. However, if he does not declare a specific field of concentration, then he is not allowed to waive a first-level sequence.

The student, through training or experience, may be qualified to begin work in some area at a level above the usual. If he can show his qualification through the A.C.T., high school record, or some other evidence, he is allowed to take advanced work in that area if more is required, discontinue any further work if none is required, take advanced work for his major or minor requirements, or take additional courses in the area as electives.

The student is encouraged to make full use of the proficiency examinations which are offered. If he passes them successfully, he is exempt from taking that portion of the program; and if he passes with a B or better, he receives credit toward graduation requirements.
The purpose of this talk is to discuss the changing relationship between excellence and society. As the goals of society change, the importance it assigns to any area of excellence is altered. . . .

Excellence that is relevant responds to the challenge thrust upon us by our times. What are these challenges?

One is the adaption to rapid change.

With the new knowledge made available by science, we have opened both the gates to heaven and to Pandora's box. The ground we thought so firm seems to shift beneath us. Geographic boundaries are receding with remarkable speed. The frontier is no longer marked by longitude or latitude. It is out in space. There is some question among educators as to whether when man lands on the moon the study of the moon should be classed as geography or astronomy.

The University, which for years has been the critical edge of society, suddenly seems conservative. Its libraries double every 15 years. It can easily feel overwhelmed by constant change or succumb to fears of numbers, vocationalism, or poverty. . . .

In the present day of ideological challenge and scientific breakthrough, we recognize change as an inevitable part of life. We seek excellence in flexibility and courage to face change that is both challenging and disturbing. We must be both the conserver of a heritage and the innovator for tomorrow without losing our balance. But each individual must decide whether he wishes to lead or to follow the culture of which he is a part.

The second challenge to excellence is society's quest for a clear and worthy purpose. . . .

A student, a university, and a culture must have a clearly defined long-term goal. . . .

People of excellence are called upon to restate a national purpose. We already have picked up some of the threads: technological and humanitarian missions to other nations, an inner spirit of dedication to a cause, and a political initiative. . . .

A third challenge to excellence is open confrontation of great issues.

We have reached, in this second half of the twentieth century, global competitiveness with a few natural barriers like the mountains or oceans of old remaining. Imports compete with American products. Diplomats argue before vast audiences linked by television and radio. Scientists struggle on equal footing to wrest nature's secrets from her. In all this, there is no substitute for excellence and the nation that ceases to strive declines. . . .

A fourth and final challenge is the problem of educational emphasis.

How should the intellectual experiences be organized to develop the liberally educated man and woman? The natural sciences have produced such enormous dividends for the time invested in them, and they have promise of even larger rewards. . . that this emphasis is most tempting.

The social sciences have made great advances, but we do not stand in awe of them, nor do we count as many solved problems. In this area are the political problems, psychological problems, economic problems, and the methods of teaching the young. If we stand near a breakthrough in delinquency, illiteracy, or dictatorships, then emphasis of the social sciences will be urged. . . .

It takes courage to transcend ignorance, prejudice, and provincialism. Motivation for this takes more than formal education. It begins early in homes. It is learned from the public image of those in business, industry, government, and teaching.

If engineers are paid more to design contours of automobiles for beauty than for safety. . . if economists are better rewarded for selling stock than analyzing the market. . . if men are paid more to bury the dead than teach the young. . . . an impression is gained that starts an erosion which is very hard for a school to arrest.

But a university doesn't just deplore this situation. It holds up a mirror, as Socrates of old, and raises the questions "that corrupt the minds of youth" and bring disenchantment with things as they are. This will always seem subversive, but only to those who grow old. . . .
New Transmitter for WSIU-FM

A new transmitter for WSIU-FM received early in September went into operation October 7 for broader coverage of the campus radio station.

The 37,000-watt transmitter was purchased from Gates Radio Company, Quincy, low bidder on the installation at $12,000. The jump from the old 22,000-watt unit should stretch the "strong signal" area to St. Louis, Vandalia on the north, beyond Evansville, Ind., to the east, and south into Kentucky.

WSIU-FM, staffed mostly by undergraduates majoring in radio-television study, plans full sports coverage of SIU home and away football and basketball games, as well as the University High School football games here. Home baseball games will be broadcast next spring.

Other program highlights are the full 1962-63 season of broadcasts from New York’s Metropolitan Opera House, nightly programs of classical music, live and taped broadcasts of various campus concerts and Thursday morning convocations, and transcribed features.

Engineering Curriculum Being Drafted

A detailed proposal for the University’s new engineering degree curriculum is being drafted for submission to the Illinois Board of Higher Education in January.

Julian Lauchner, new dean of the School of Technology, said he is pushing hard to meet a self-imposed three-month deadline on an engineering program format. The curriculum also must be approved by the SIU Board of Trustees.

Meanwhile, architect’s drawings for a new Technology Building Group to house engineering studies and the Department of Physics have been submitted to President D. W. Morris for approval. Next step would be preparation of working blueprints for a bid-advertising date in March. The four-building group is scheduled as the last item in the University’s current $28-million construction program.

Perkins and Will, the Chicago architectural firm which designed the Agriculture Building and Thompson Point residence halls, is planning the technology group. It consists basically of four interconnected buildings, one of them four stories, east of the Lake on the Campus.

The Technology Building Group is slated for completion in June, 1965.

Dean Lauchner presently is officed at 1000 South Forest until the School of Technology takes over the former T. W. Abbott residence on Thompson Street south of University Center.

M.S. in Education at Edwardsville Campus

The master of science in education degree, with an academic concentration in elementary education, guidance, administration and supervision, or special education, may now be completed on the Edwardsville Campus.

In the past, graduate students on the Edwardsville Campus had to take part of their work at Carbondale to complete degree requirements. Students working toward a master of science in education with concentrations in some areas of secondary education will still have to do part of their work at Carbondale.

It is expected about 75 students will have met requirements for the master’s degree in time for June, 1963, graduation at Edwardsville Campus.

Library Acquires Book-Manuscript Collection

SIU has purchased a book and manuscript collection of English and American expatriate writers of the 1920’s and 1930’s from New York collector Philip Kaplan.

Some 300 authors are represented by books, little magazines, letters, photographs, and manuscripts. Many of the volumes were the personal copies of the authors or presentation copies.

The collection includes some 1,100 letters from such writers as Richard Aldington, E. S. Basche, Maxwell Bodenheim, Kay Boyle, Bob Brown, Erskine Caldwell, Hart Crane, Harry and Caresse Crosby, Nancy Cunard.

In addition there are about 75 manuscripts, from one-page poems through full-length novels and five diaries, representing Kay Boyle, Hart Crane, Harry and Caresse Crosby, R. D. Dunning, Montgomery Evans, Jake Falstaff, Ford Maddox Ford, David Gascoyne, Jean Genet, John Dos Passos, Nathaniel West, and Edmund Wilson.

Competitive Market Less Important

For various reasons the competitive market as it operates in agriculture today will become less important in the long run, according to Prof. Walter J. Wills, farm marketing specialist.

This situation will grow out of changes in marketing arrangements, the out movement of gold from the United States, long-run inflationary tendencies, the European Common Market, and technological advancements. Credit agencies and others concerned with financing farm operations will need to understand these changes and their impact on farming in this country to maintain sound economic conditions in agriculture.

Professor Wills predicts there will be more specification buying and selling and more negotiated prices in marketing farm products in the future. Buyers and sellers will be bargaining more as groups than individuals, and coordination of production and marketing may become more commonplace in agriculture. Marketing orders and agreements have been used with varying success for some commodities and probably will continue to be used in some form.

The country’s present rapid loss of gold to other countries in spite of a favorable balance of trade cannot go on indefinitely. Government steps to halt the out movement in the next year or two will cause some changes in the economy which will have an influence on farm prices, either directly or indirectly.

Creeping inflation will continue, Professor Wills says. Many forces will be at work to produce a higher level of government planning in various sections of the economy and this may result in additional built-in rigidities in the economic system to affect adversely many farmers trying to adjust to changing conditions.

Six European countries comprising the European Common Market are a major export market for U.S. agricultural commodities, especially feed grains, wheat and soybeans. Now some method must be devised for being included in world trade arrangements made with the Common Market countries.

Fossil Hunting Brings Rare Find

A fossilized egg “guesstimated” at 35 million years of age was discovered by paleontologist Edwin C. Galbreath, of the Department of Zoology, during a trip in northern Colorado last summer. He says the egg, which is in “a remarkable state of preservation,” may be from some kind of hawk.

Professor Galbreath, who has spent the last 15 summers fossil hunting in the west, made his find on an outcropping of rock in a windblown section of semi-desert in Weld County. “If there had been a nest nearby I would have thought the egg was a live one,” he said. Recent weathering had stripped away only a small part of the stony shell, revealing the equally stony but slightly smoother interior.

Based on finds of fossilized hawk bones in the same area, Galbreath thinks an Oligocene period hawk may have laid the egg. It is about the same size as a chicken egg, but weighs out at a third of a pound.

Fossil egg discoveries in the central west are comparatively rare, Professor Galbreath reports; perhaps 30 have been made since paleontologists began looking for them. His recent find has become part of the fossil collection in the Department of Zoology.
International Limnologists Visit SIU

Fresh-water scientists from all over the world late in the summer came for a five-day visit with SIU as the host and southern Illinois lakes, ponds, rivers, and streams as the big attraction.

The field excursion was one of 10 throughout the United States arranged as a windup to the 15th International Congress of Limnology held in August at Madison, Wis. The 40 limnologists who selected the southern Illinois trip visited Horseshoe, Devil's Kitchen, and Little Grassy lakes, Mississippi River, the Pine Hills Swamp—even strip mine ponds near DeSoto. They made a side trip to Big Springs and the Current River in Missouri at Little Grassy.

and observed operations at the Illinois state fish hatchery at Little Grasy.

Limnology—the study of physical, chemical, and biological characteristics of inland waters—is a strong science in Europe and most of the tour party was from there. Eleven were from Germany and four from Poland. Others represented England, Finland, Denmark, France, The Netherlands, Sweden, Malaya, Austria, Belgium, and Scotland. Only two were from the U.S.

Many European limnologists, like their American counterparts, are grappling with the problem of water pollution.

WSIU-TV Presents—

Four classroom courses for area elementary and high schools, continuation of “The Play of the Week,” a Friday night “Festival of the Arts” feature, and three new film packages are highlights of the 1962-63 schedule of WSIU-TV, Channel 8. The station signs on at 8:30 A.M. Monday through Thursday and at 4:30 P.M. on Friday. No programs are presented on Saturday or Sunday. The station signs off at about 10 P.M. each operating day.

Making their debut this fall were elementary school programs in social studies, art, and history, and a high school general science course. Some 70 schools belong to the Southern Illinois Instructional Television Association.

The programs, produced by WSIU-TV on videotape for the SIITA, will run through next May. Instructors are Sue Kempfer of the Evanston school system (Our Western World), Alice Schwartz of SIU's University School (Art and You), Harold Perkins, Carbondale Community High School (The World Around Us) and Richard Qualls, Herrin High School (Growth of a Nation).

An SIU extension course in beginning sociology, featuring Professor Douglas Rennie, is shown at 7 P.M. on Monday and Thursday.

A weekly National Educational Television film series is presenting eight 30-minute shows called “Jazz Casual,” spotlighting Dizzy Gillespie, Dave Brubeck, Carmen Macrae and other jazz artists. This is viewed at 8 P.M. on Wednesday and repeated on “Encore” on Thursday at 5:30 P.M.

The “Play of the Week” series again is shown at 8:30 P.M. on Tuesday with a repeat on Wednesday. Forty top dramas include O’Neills’ The Ice Man Cometh; Mary Stuart, starring Eva LeGallienne as Elizabeth and Signe Hasso as Mary; Judith Anderson in Medea; Chekhov’s The Cherry Orchard, with Helen Hayes; Sean O’Casey’s Juno and the Paycock; Marc Connelly narrating George Bernard Shaw’s Don Juan in Hell; Wingless Victory with Eartha Kitt; four short plays by Tennessee Williams; Highlights of New Faces, a musical to be viewed during the Christmas holidays; and The World of Sholom Aleichem, three short Yiddish plays.

SIU Press Fall Listing

SOUTHERN ALUMNUS
Alumni Award Winners on WSIU-TV

Alumni Achievement Award winners are being briefly featured as “Alumnus of the Week” during the SIU News Review program every Thursday night from 8 to 8:30 on WSIU-TV.

John W. Allen ’22-2, Dr. Bennett Y. Alvis ’08-2, Dr. Percival Bailey ’12, Dr. Eugene M. Bricker, ex ’30, Dr. Leo J. Brown ’32, and Richard G. Browne ’19-2 have been so honored on the program since it was inaugurated September 20.

Cooperating with WSIU-TV in presenting “Alumnus of the Week” is the Alumni Television Programming Committee of the Alumni Association’s board of directors. The committee is headed by Bert Casper ’25-2, ’27, superintendent of Cobden schools, and George T. Wilkins ’29-2, ’37, Illinois state superintendent of public instruction.

Alexanders Feted by Benelux Chapter

When Prof. Orville Alexander, chairman of the Department of Government, returned this fall from a trip around the world, including a summer of teaching in Germany, he reported that one of his most interesting experiences was a visit to the Council of Ministers of the Common Market in Brussels, Belgium. Camille Albert Becker, M.S. ’57, member of the staff of the secretariat of the council, conducted Professor and Mrs. Alexander through the council building, offices, and conference rooms.

The Alexanders had been invited to visit the SIU Benelux Chapter, newest of the alumni clubs. They flew to Brussels July 28 and were entertained by Mr. Becker and Fernand Criel, M.A. ’61. That evening they were guests of the club at dinner at the Ecu de France restaurant.

Attending were Vice President Becker, Secretary Criel, Mr. and Mrs. Andre Kahn, M.A. ’59 (Eva Sinreich, M.A. ’59, treasurer), and Mr. and Mrs. Lorenzo Stampa, M.A. ’61 (Christianne, ex ’61). Mr. Stampa is academic adviser.

On July 29 the Alexanders went by train to Antwerp and were entertained by Mr. Criel, who conducted them around the town to the harbour and other points of interest.

The Benelux Chapter hopes more faculty members, as well as alumni and students, will include Brussels on their European itinerary.

The chapter recently lost its president when Warren Taylor, ex ’36, was transferred to South Africa by the Caterpillar Company. The club members feel very indebted to the Taylors for helping establish their group.

NOVEMBER, 1962
Basketball, gymnastics, swimming, and wrestling are gradually easing into the athletic picture at SIU, where Coach Carmen Piccone’s football squad and Coach Lew Hartzog’s cross country team are in their final month of the fall season.

Actually, Coach Bill Meade’s gymnasts will inaugurate the busy winter sports scene with a colorful intrasquad meet November 20, four days prior to the final home football game against North Texas State.

However, it will be the first weekend in December before the indoor athletes take over for good. Highlighting the occasion will be an eastern trip by Southern’s cagers headed by first-year coach Jack Hartman.

**Hopeful for Good Year**

Hartman, who a year ago directed Coffeyville, Kan., Junior College to a 32-0 record and the national championship, is hopeful for a “good year,” but is quick to caution that this year’s schedule is the toughest in the school’s history.

With 10 of last year’s 12 lettermen returning, Southern is certain to floor a veteran squad and “may be able to cause some trouble,” according to Hartman. But the Salukis are scheduled to open against a pair of toughies in Gannon College at Erie, Pa., and St. Bonaventure at Buffalo’s Memorial Auditorium.

Although they do appear to have an occasional breather during the 1962-63 slate, the Salukis will be facing such basketball powers as Oklahoma, Western Michigan, Kentucky Wesleyan, Toledo, Tennessee State A. & L., Butler, Western Kentucky, and Southeast Missouri State.

Key performers in Southern’s outlook appear to be Ed Spila, a third-team UPI Little All-American selection last year who also was named to both the NCAA regional and finals all-tourney teams, and Dave Henson, a sharp-shooting forward who posted a .495 field goal percentage last season. Spila and Henson will co-captain this year’s squad.

In top-supporting roles will be three former area prep stars, Harold Hood of West Frankfort, Eldon Bigham of Pinckneyville, and Rod Lindler of Centralia. All have excellent shots at first-team position, but will have to contend with the likes of 6-8 Frank Lentfer, Riverdale; Dave Needham, Plainfield; Mike Pratte, Bonne Terre, Mo.; Ed Blythe, Carbondale; Dan Corbin, Villa Grove; Paul Henry, Indianapolis; Bob Butler, Champaign; Duane Warning, Frankfort; and Joe Ramsey, Sandowal.

Ramsey led Coach George Iubelt’s freshmen in scoring last season while Warning, Butler, and Henry will be appearing here for the first time this year. All have shown well in early-season workouts which got underway October 15.

**Gymnasts Eye NCAA**

The gymnasts once again have established the NCAA championship as their goal for the season and not even a second-place finish will ease the pain should they fall short of the mark. Meade’s athletes have claimed a pair of runner-up trophies the past two years after placing seventh in 1960.

“This undoubtedly should be the best overall squad we’ve ever had,” Meade said, “and barring injuries or other misfortune, we should be in a good position to challenge defending Southern California for the national title.”

Veterans Fred Orlofsky and Bruno Klaus will be returning for their final season of intercollegiate competition while several juniors, including nationally prominent tumbler Rusty Mitchell, the NCAA champ, and Tom Geocaris, runner-up in still rings, will be relied upon heavily. Dennis Wolf,
a sophomore sensation from California, also adds considerable class to the squad.

The gymnasts will be competing in dual meets against the finest teams in the midwest, Michigan State and Penn State, while Coach Ralph Casey's swimmers will challenge Indiana's untouchable Hoosiers and Minnesota and Coach Jim Wilkinson's wrestlers Oklahoma State and Oklahoma. All will be among the nation's elite in their respective sports.

Swimmers Try for Comeback

Southern's swimmers hope to make somewhat of a comeback this winter after a 2-4 record last year against extremely rugged competition. Casey feels veterans Ray Padovan, Jack Schiltz and diver John Robbins will score heavily and a pair of sophomores, Ted Petras and Skip Green, who will be competing for the first time on the varsity level, should provide an excellent nucleus.

Wilkinson is also well braced with veteran performers with Ken Houston, Don Millard, Roger Plapp, the Coniglio brothers, Pat and Frank, and Izzy Ramos returning for another season of mat warfare.

While the four winter sports are anxious to take over, Piccone's gridders and Hartzog's distance runners are not about to give up until November is virtually completed.

Southern's football team, after dropping its first two games to tough opponents, came back strong and is being considered as one of the school's finest ever. Although lacking a single standout, the squad is bolstered by fine overall balance, excellent defensive play, and firm determination.

The Saluki harriers, with All-American Jim Dupree, Bill Cornell and Brian Turner representing the top three positions, will complete their fall schedule by running in the National AAU and NCAA meets the last weekend in the month.
"The purpose of Beaver Ridge Pottery is to continue in a manner appropriate for today the age-old exploration of possibilities for forming clay by hand on the potter's wheel. Clay is a sensitive material. In response to the skilled potter's hands it can become a vibrant personal object as no mass-produced item ever can. Beaver Ridge Pottery makes no attempt to be repetitive in its production. Instead it is hoped that each piece in addition to revealing the honest earthiness of the material and the skill of the ancient tradition will be a new expression of man's continuing desire for objects of beauty."

Charles R. Counts, M.A. '57, returned to his potter's wheel late last summer after several months as a reactivated reservist in the Army, and Beaver Ridge Pottery resumed full operation. He became a civilian again just in time to start planning and designing the Craftsman's Fair of the Southern Highlands at Gatlinburg, Tenn., October 23-27. He had been designer of that fall fair in 1960 and '61 and of the Craftsman's Fair at Asheville, N.C., in the summer of '61.

Beaver Ridge Pottery is a thriving business, a partnership of Mr. Counts and his wife Rubynelle, ex '57. It is located on Beaver Ridge off Tennessee Highway 62 between Knoxville and Oak Ridge. The Countses bought the five-acre ridgeland farm four years ago. On it were two log cabins connected by a dog trot and considered of no value.

But with the imagination and skill derived from their trade and with the resourcefulness of the pioneers (make what you need or do without), they made one of the cabins into a home and the other into a studio workshop. They've had Beaver Ridge Pottery since 1959. There they produce pottery thrown on a kick wheel, glazed in rich earthy glazes, and fired to a stoneware temperature. They specialize in individual pieces, turning out one-of-a-kind pieces—bottles, vases, planters, patio lights, wall decorations, architectural decorations, most of them modern and sophisticated and mostly in the earth colors of brown, black, charcoal, and gray.

They do all of the work themselves, from getting the clay to firing. And they can't make enough pieces to fill their orders.

Mr. Counts grew up in the atomic city of Oak Ridge, Tenn. He attended Berea College in Kentucky, where he studied history and political science. But during his required working hours in the college pottery, he became interested in ceramics. He also became interested in a student from
Easley, S.C., Rubynelle Waldrop. They shared an interest in the theater, he working with the properties and she with the costumes.

They married and came to SIU. While Mr. Counts studied for a master of arts degree in pottery, Mrs. Counts did graduate work in English. Next they traveled to the west coast and he became an apprentice under Marguerite Wildenhain, famous potter who had received her training at the Bauhaus workshop in Germany. He studied at her Pond Farm Workshop at Guerneville, Calif., and also did advanced work in ceramic technology and industrial design at the University of Southern California.

A perfectionist, Mr. Counts has exhibited at many national shows. He was included in the Young American Craftsmen 1962 Exhibition at the Museum of Contemporary Crafts in New York City early this fall. He now is at work on a one-man exhibition for early next year at the Elizabeth Slocumb Gallery at East Tennessee State College.

He also participates in Lookout Mountain's Plum Nelly Clothesline Art Show and, of course, in the Craftsman's Fairs.

The Craftsman's Fair, held in the summer at Asheville and in the fall at Gatlinburg, has the finest displays of homemade articles from one of the largest groups of craftsmen in the country, men and women from the mountains and valleys of Maryland, the Virginias, Kentucky, Tennessee, the Carolinas, Georgia, and Alabama. Seven shops and the two fairs provide opportunity for these members of the Southern Highland Handicraft Guild to exhibit and sell their wares.

Mr. Counts travels through the highlands gathering specimens for exhibition at the fairs. For the Asheville Fair he designed A-frame structures, 12 feet tall, to house the exhibits. He said the A-frame symbolized "Anyman's House; the most primitive teepee, the log house of our pioneer ancestors, today's contemporary dwelling."

In addition to his pottery work, Mr. Counts also designs books for the University of Tennessee Press.

Mr. and Mrs. Counts have a young son, Craig Elliott. Whether or not he has inherited his parents' ceramic skills, it's a sure bet he loves to dabble with—or in—mud.
1908

Though "very far removed in time and progress of the University," Mrs. Donald C. Bunn (Carrie Malone, 3), Seattle, Wash., manages to keep up with SIU through the Southern Alumnus. She is a life member of the Alumni Association. Mrs. Bunn writes of her "great thrill of pride in the growth of the 'Normal' to a full-fledged university." She entered SINU from Bank Lick in Williamson County and also lived in Marion. She was a teacher in Paxton before her marriage. A widow, she has a son and a daughter. Though "very far removed in time and progress of the University," Mrs. Donald C. Bunn (Carrie Malone, 3), Seattle, Wash., manages to keep up with SIU through the Southern Alumnus. She is a life member of the Alumni Association. Mrs. Bunn writes of her "great thrill of pride in the growth of the 'Normal' to a full-fledged university." She entered SINU from Bank Lick in Williamson County and also lived in Marion. She was a teacher in Paxton before her marriage. A widow, she has a son and a daughter.

1912

William H. Ball made his third visit to the campus since graduation to attend the 50th reunion of the class on Alumni Day last June. He and Mrs. Ball (Myrtle E. Martin, ex '21) came from El Paso, Tex., where he has retired as professor of chemistry at Texas Western College, a branch of the University of Texas. He had taught there since 1928. Mrs. Ball was a speech instructor at Texas Western. They have three sons. Also returning for the reunion was Mrs. John D. Becker (Mary Esther Mayer), of Evansville, who was accompanied by her son, James, a civil engineer. A daughter lives in St. Louis. Mr. Becker died in December.

1914

Evan B. Brockett, 2, writes from Santa Monica, Calif., that he hopes to attend the golden reunion of the class in 1964. He is emeritus head of the music department of Santa Monica City College, a post he held since 1936. A native of southern Illinois, he taught in rural schools, in Herrin, and at Joliet Township High School and Junior College before going to California. He was in opera work and did choir singing for over 40 years. He and his wife Helen have three children.

1917

Zoe Oliver Allen, 2, went to Alaska during World War II to do construction work, spending four years at Adak and Shemya in the Aleutian Islands, and five years at Anchorage before going to Fairbanks, where he now is living in retirement. Among those present for the 45th reunion of the class on Alumni Day in June was H. Carl Gregg, 2, of Boca Raton, Fla., who was president of the senior class. He retired in 1959 as vice president and treasurer of Syracuse University. Also present was Raymond R. Gregg, 2, director of business affairs at Eastern Illinois University, Charleston.

1921

Mrs. Allan L. Bostwick, of Belleville, is the former Edna Alviss, 2. She has two children. From Quincy Mrs. L. H. Sims (Lora A. Marten, 2) writes, "It is dues paying time again and that gives me the yearly opportunity to say hello. We are 'aging' right along and so are our adorable grandchildren. Jeffrey has now reached the ripe old age of four and is feeling quite grown-up. Robin Lee, his little sister, will be two in October. They live in St. Louis, but we get to see and enjoy them quite frequently. My nephew, Wayne Marten, has the Egyptian Daily sent to me and I enjoy reading of all the remarkable progress at the University—but after all these 41 years away it is very seldom that I find a familiar name in it."

1922

John W. Allen, 2, retired educator and author of the newspaper column, "It Happened in Southern Illinois," went back to school last summer. He attended the 15th annual Seminar on Early American Culture at Cooperstown, N.Y., and attended courses on "Farmhouse Foods and Fireplace Cookery," "Wrought Iron and Non-precious Metals," and "Firearms in America." All of which, no doubt, will give him added fodder for his many speaking engagements. Enroute home, Mr. Allen visited his son in Washington, D.C., Russian specialist in the Library of Congress, and also attended a presidential news conference, his second. On Alumni Day Mr. Allen was one of the four recipients of Alumni Achievement Awards.

1924

Dr. Virgil A. Beadle, ex, Carbondale dentist, had a dream come true last summer when he and his son, V. A., Jr., made the 1,050 mile to Cheyenne, Wyo., by truck and horseback in little over a month to attend Cheyenne's "Frontier Day" celebration. They rode in the parade there. The two men alternated driving the truck. They spent the nights in the truck and rode their horses most of each morning and a few hours in the evening.

SOUTHERN ALUMNUS
Mr. and Mrs. Clarence A. Reeder, 2, '35, Pinckneyville, celebrated their 50th wedding anniversary August 29. Mr. Reeder has retired from federal government service with the U.S. Army Reserve Center in Centralia. The couple has two children, Paul '48, M.A. '50, and Mrs. Robert Keene (Bobbie Reeder '61).

Mrs. Albert M. Nelson (Bessie Harris, 2), Chicago, has been a second grade teacher in the Markham public schools in Cook County for 16 years. She has two sons.

1925

New superintendent of Kinnmundy-Alma Community Unit School is Robert I. Hartley, 2, M.S. '62. A former mathematics teacher at Nashville High School, he also has taught and coached at Farina, Ashley, Sandoval, Irvington, and McKendree College. For nine years he has been a member of the Centralia Township High School and Junior College board.

Cornelia Blum, 2, retired commercial teacher, lives in Iuka.

1926

Mr. and Mrs. Abraham K. Patrick '21-2 (Ruth Davis, ex '28) live in Steeleville. Mr. Patrick organized the Elkville Community High School and was its principal from 1919 to 1926, served as superintendent of the Dongola public schools from 1926 to 1930, as superintendent of the Thebes public school from 1930 to 1935, and superintendent of schools at Steeleville from 1935 until retirement. Mrs. Patrick has been a case worker with the Illinois Public Aid Commission for 21 years. They have two sons, Lawrence and Harry L. '43.

Mrs. Clayton N. Slifer of Effingham is the former Rachel I. Crawford, 2.

Mrs. Cecil R. Bass (Mildred Scott Corzine, 2, '53) teaches at Brush School in Carbondale. Her husband, C. R. Bass, ex '14, is a retired Illinois Central Railroad conductor.

1928

Mrs. Frank C. Hearn (Esther Kopp, 2, '43) is a homemaking consultant at the Emily Griffith Opportunity School in Denver, Colo. She has a son Charles.

Mrs. Earl Rushing (Velma Radford '26-2) has been a teacher in the Marion schools since 1948.

Jessie Hill, 2, Mt. Vernon, has retired from teaching. She holds a bachelor's degree from Washington University in St. Louis.

1929

Mrs. Robert W. Brown (F. Jane Clark, ex), Anna, Latin and English teacher at Shawnee High School the past three years, this fall started teaching at Anna-Jonesboro Community High School.

Olive Boner, 2, '50, teaches the first grade at Edwards School in West Frankfort.

Mrs. William V. Stutz (Jewell Crea Corn, 2), Alton, has taught in the Bethalto Unit Eight schools for 12 years. She has a son William.

1930

David M. Stroup '24-2, mathematics and social science teacher at Carbondale Community High School and member of the faculty 14 years, has moved to St. Petersburg, Fla., where he is teaching mathematics. Mrs. Stroup is the former Alma G. Fulerwider '26-2, '54, and they have two children, Mrs. Kenneth R. Biggs (Barbara Stroup Thornsberry, ex '48) and Capt. David M. Stroup, Jr. '55.

Mrs. R. W. Hooks (Mary Vivian Springer '28-2) has been a high school teacher in Memphis, Tenn., for eight years. She has a son Charles.

1931

Mr. and Mrs. Harry B. Shaw, ex (Dorothy V. Schoch '34-2) recently moved to Ashland, Ky., where Mr. Shaw is business manager of the federal correctional institution there. He has been with the U.S. Bureau of Prisons almost 20 years. The Shaws have two children.

Mrs. Marion B. Treece (Madelyn C. Scott '28-2), teacher at the SIU University School, last spring was promoted to the rank of assistant professor.

1932

New principal of Pinckneyville Community High School is Harley F. Quillman '26-2, assistant principal for 22 years. His wife is the former Alta Lucille Thimmig '26-2 and they have a son.

In Washington, D.C., Kathleen Mitchell is a cataloger at the National War College Library. She has had that job since her release in 1955 after 11½ years of active duty in the WAVES.

Mrs. Perl Hansaker (Edith E. Wooten, 2, '55), is a teacher of the educable mentally retarded students at Lincoln School in Carbondale.

1933

Alice K. Swagler, 2, is owner of Holland and Swagler, general store in Shattuck.

Since 1937 Carl Harold Johnson, Portland, Ore., has been a representative for the Lyons and Carnahin Publishing Company. Before 1937 he was principal of Anna Junior High School.

Miss America's Grandmother

Although Pamela Gilbert, Miss Illinois and an SIU senior, did not capture the Miss America crown at the Atlantic City pageant in September, the granddaughter of an SIU alumna did.

Jacquelyn Jeanne Mayer, of Sandusky, O., Miss America for 1963, is the granddaughter of Mrs. Charles H. Buck (Emma Schumaker '09-2, '24). Originally from Anna, Mrs. Buck was a high school teacher and principal before moving to Ohio.

Paul E. Swofford, former principal of Edgewood School in Fort Myers, Fla., now is a real estate broker in that city. He and Shirley Harvey Swofford, ex '39, have three children. Before moving to Florida, Mr. Swofford was basketball coach at Benton High School and director of athletics at Morris High School.

Anton J. Slechitchy has been chairman of the education department at Loras College in Dubuque, Ia., for 11 years.

Olin L. Hileman, 2, '50, junior high school consultant in the Office of the Illinois Superintendent of Public Instruction, Springfield, received a Ph.D. in education last spring from George Peabody College for Teachers, Nashville, Tenn.

In West Frankfort Mrs. Herman Kinney (Juanita Murphy, 2, '56) is on the faculty of the Joiner School in Frankfort Unit District 168. She has two children.

1935

John M. Brewer, head of the English Department at the Missouri School of Mines and Metallurgy at Rolla, Mo., was the graduation speaker in May at Marion High School. He formerly was principal of Crab Orchard High School.

Last spring the SIU chapter of Theta Xi presented its distinguished service award to William M. Marberry, assistant professor of botany at Southern, for professional achievement, service to state and local organizations and to the University.

Lt. Col. Emmett E. Cockrum, of Lowry AFB, Colo., is serving for six months with the Royal Thai Air Force in Thailand. Mrs. Cockrum (Virginia Fern Council, ex '36) teaches the first grade in the Denver schools; the twins, Douglas and Rose-
mary, are juniors at George Washington High School in Denver; David is a sophomore at SIU; and Carol '58 (Mrs. Stuart D. Walker) lives at Randolph AFB, Tex., where her husband is a captain and they have a daughter, Elaine ceil.

1936
Mrs. Jack Welch (Grace Basket), Englewood, Colo., a teacher in Cherry Creek School District Five, attended a Workshop in Creative Writing in the Elementary School on the SIU campus last summer.

Roger C. Hake this fall joined the faculty of Nashville Community High School as head track coach and assistant football and basketball coach. He formerly was head coach in all sports at Pleasant Hill. The Hakes (Sarah Lova '58) have two children.

Mrs. Audry Hill Lindsey is on the faculty of Mankato, Minn., State College.

Mrs. John W. Boyd (Freda Silkwood, 2) Sesser, teaches at Ewing-Northern Consolidated School in Ewing.

1937
Mr. and Mrs. William C. Browning (Mildred Hanson, ex '36) live in Houston, Tex., where he is director of research with the Milwhite Company. They have two children. Mr. Browning was a research chemist with the Marathon Corporation in Rothschild, Wis., before moving to Texas in 1957.

Mr. and Mrs. Lee Rushing (Mary F. Baker, ex '35) both are with the Clifton schools, he as senior high school principal and she as a second grade teacher. They have four children.

1938
E. Laverne Marietta has joined Western Michigan University at Kalamazoo as head of the business education department. He formerly was associate professor in business education at Michigan State University since 1956. Mrs. Marietta (Neola Whitlock '39) is teaching in the Kalamazoo elementary schools. They have three children.

Norman Krueger, Metropolis, former school teacher, now is distributor and operator of Kirby Sales and Service in Paducah, Ky.

From Wood River Sodiemazelle Hepsler '31-2 writes, "I have retired from the Wood River school system and will be traveling. After teaching 39 years, I plan to really enjoy life."

1939
Mr. and Mrs. Arthur Bert Miller, M.S. '38 (Elizabeth Waters Miller '58) have moved from Shawnetown, where he was principal of the high and junior high schools and she was a grade school teacher, to Momence. In Momence he will have a similar post and Mrs. Miller will teach the third grade.

From Evansville, Ind., Harold V. Black, chief draftsman with Mead Johnson, writes, "I have been employed in this capacity for nearly five years. Our primary concern is supplying design and details of facilities for our domestic and foreign manufacturing plants. Mead Johnson is a manufacturer of pharmaceutical and nutritional products. Metrecal is one of our dietary products that has worldwide acceptance and has set the industry standard."

1940
Alfred W. Richardson, professor of physiology at St. Louis University, has perfected a transistORIZED electromagnetic blood flow meter. He has designed four other models of blood flow meters but the new one is 30 times smaller than the others. It is about the size of a house brick and has a amplifier no larger than an ordinary pack of matches. The meter records the slightest movement of blood in the biological system or in a tube. It is valuable for research in the laboratory and to the heart surgeon in open-heart operations. During open-heart surgery the meter picks up the measurement of blood flow as blood is pumped through the heart-lung machine. Professor Richardson also has invented a machine to determine the clotting tendency of blood following heart attacks and a pocket-size radar and microwave detector for safeguarding against radiation. He received a gold medal award in 1949 from the Congress of Physical Medicine for his first blood flow meter.

Charles Strusz, former Carterville High School principal, has joined the Herrin High School faculty as commercial and mathematics teacher and cross country coach.

1941
Since 1943 W. A. Bozarth has been Douglas County superintendent of schools. He also has served as president of the Illinois Association of County Superintendents of Schools, as a Rotary governor of the 25 counties of east central Illinois, and as an official delegate to President Eisenhower's White House Conference on Education at Washington, D.C. He and his wife Edith live in Tuscola and have five children.

Mr. and Mrs. Wilbur R. Rice (Edith Lloyd Rice '45) live in Orinda, Calif. He is a research analyst for the federal government. Mrs. Rice formerly was a teacher at Carbondale Community High School.

Arthur A. Samford is a member of the faculty of the Mt. Vernon Township High School and Junior College.

1942
Ralph L. Smith, professor in the department of Old Testament at Southwestern Baptist Theological Seminary, Ft. Worth, Tex., was unable to attend the class reunion last June because he was teaching in the summer session there. He has been on its faculty since 1949.

From Tallahassee, Fla., Mrs. Marshall R. Colberg (Peggy Lou Dean) wrote that she could not join her classmates on Alumni Day. Her husband, head of the economics department at Florida State University, is on a year's leave of absence to write a book on the South on a Ford Foundation grant. He is president of the Southern Economics Association. Mrs. Colberg is active in the League of Women Voters and helped form a chapter in Tallahassee. They have two children, Marsha, 15, and Danny, 11.

William L. Ramsey, principal of Zeigler High School the past year, now is superintendant of Zeigler-Royalton Community Unit District 188.

1943
The Rev. John W. Stations is pastor of the Methodist Church in Morrill, Neb. He has two children.

Dr. Milford Blackwell, St. Albans, N.Y., is a psychiatrist. He has a medical degree from Meharry Medical College, has taken post graduate training in neurology at the National Hospital in London, England, and is certified in psychiatry by the American Board of Psychiatry and Neurology.

Robert C. Yates, ex, is general sales manager for Weatherford Oil Tool Company, Inc., Houston, Tex.

Mrs. Glenn S. Aston-Reese of Pittsburgh, Pa., is the former Ella Miller. She has four children.

1945
Hewey E. Tweedy has been principal of Dupo High School the last three years. He formerly coached at Mattoon and at Zeigler. Mrs. Tweedy is the former Helen B. Crain '50.

Mrs. Norman E. Wasson (Mary J. Bald- win) is librarian at Norris City High School.

1946
Marguerite C. Barra is chairman of the clothing and textiles department at Stout State College in Menominee, Wis.

The Rev. Max L. Martin is pastor of SOUTHERN ALUMNUS
the First Methodist Church in Litchfield. He is married and has three children.

For the last six years Helen Jean Blackburn, M.S. '47, has been on the faculty of Pan American College, Edinburg, Tex., where she is assistant professor of mathematics. William T. Holder, M.S. '49, is an administrative assistant in the Roxana Unit Schools. His wife is the former Gloria Moroni '52.

1947

Charles Lloyd Holliday is on the staff of Morris Library at SIU. He lives in Murphysboro.

Mr. and Mrs. Danny Wales (Mildred Louise Sanders) have moved from Marion to Phoenix, Ariz., where both are teaching.

Wilson W. Coker, ex, considered one of the outstanding young composers in this country, has been named to the administrative staff of the Lincoln Center for the Performing Arts in New York City. A former Ford Foundation fellow, he has been chairman of the Department of Fine Arts and Humanities at Hartwick College, Oneonta, N.Y. He now lives in Forest Hills, N.Y.

George Elston, Jr., B.S. '50, resigned as mathematics instructor at Herrin High School to join the Department of Mathematics at SIU. He had been on the Herrin faculty since 1950.

1948

Dr. David P. Richerson, Christopher, medical director of the Franklin-Williamson Bi-County Health Department, received a master's degree in public health last spring from Tulane University, New Orleans. He has been health officer two years, before that had a private practice in Christopher.

The Rev. Joseph C. Evers, in his third year as pastor of Epworth Methodist Church, Belleville, received a Ph.D. in the field of church history from Boston University in June. At 35 he is the youngest man in the Southern Illinois Conference with a doctoral degree and the only pastor in the conference with an earned doctorate. He has been a pastor 18 years.

Robert Goalsby, ex, professional golfer from Belleville, was second in the U.S. Professional Golfers Association tournament in July, first in the Insurance City Open tournament in Hartford, Conn., in August, and first in the Denver Open in September.

Mrs. Harold A. Poole (Kinuye Jitodai) is a catalog librarian at the University of Washington library, Seattle. She has a son, John S., born July 20, 1961.

BORN: To Mr. and Mrs. John Kramer, Jr. (Charlotte Elizabeth Tuthill), Alexandria, Va., second son, Mark Wayne, April 29. Mrs. Kramer is vocational office coordinator at Groton High School.

Educator Honored in Houston

Last Memorial Day Houston, Tex., Radio Station KXYZ saluted Mrs. J. E. Hunsaker (Lorraine Dunn '24-2, '28) as "First Lady of the Day" in recognition of her outstanding work in education.

Mrs. Hunsaker has taught in Houston elementary schools 32 years, all but five in Southland Elementary School of which she has been principal for 18 years. During that time Southland has won three trophies as most beautiful school in the city. Mrs. Hunsaker has developed an exceptionally strong and effective citizenship program in the school.

She is the 1962-63 president of the Houston Elementary Principals Association of which she is a charter member and was its first vice president. She also is a member of the Texas Accreditation Committee for Universities and Colleges and a member of the curriculum committee of Dominican College in Houston.

Her husband is John E. Hunsaker '22-2, '24. They first met on campus. Later he went to the University of Florida and they met again when she started teaching at Grand Chain, where he was superintendent of schools. They moved to Houston in 1931, he to teach at Johnson Junior High School and she to teach English and history at Woodrow Wilson School.

Mr. Hunsaker later joined the faculty of the University of Houston. He now is in the real estate business.

1950

Lt. John A. Mueller is assigned to the NROTIC Unit at Stanford University, Stanford, Calif.

Jack E. Wallace, M.A. ’57, received a Ph.D. in biochemistry last February from Purdue University.

Robert K. Williamson, VTI, is manager of the IBM department for J. W. Mortell Company, Kankakee.

1956

Mr. and Mrs. M. Allan Kays (Dorothy Tucker, ex) and their two sons live in Eugene, Ore., where Mr. Kays is in the geology department of the University of Oregon. He received a master’s and a
Alumnus To Receive $1,000 Award

Next spring Daryle H. Busch ’51, associate professor and head of inorganic chemistry at Ohio State University, will travel to Los Angeles to attend the 144th national meeting of the American Chemical Society and to receive a $1,000 award in inorganic chemistry.

The prize, given “to recognize and encourage fundamental research in the field of inorganic chemistry,” goes to Professor Busch for his work in many areas of inorganic chemistry, including coordination chemistry, chemistry of sulphur, mechanism of substitution reactions, and chemistry of inorganic complexes.

An Ohio State faculty member since 1954 and head of his division since 1961, Professor Busch is widely known as an authority in chemical research and as a consultant. Since 1956 he has been a chemical consultant to E. I. duPont de Nemours and Company and last year was named consultant to the Surgeon General on the Medicinal Chemistry Study Section of the National Institutes of Health. He is the author of some 50 articles and reports in scientific publications.

Native of Carterville, Professor Busch holds two graduate degrees from the University of Illinois and is a member of Alpha Chi Sigma, Phi Lambda Upsilon, Phi Mu Epsilon, and Sigma Xi science societies. In 1959 he was secretary of the Columbus, O., section of the American Chemical Society. During part of 1960 he was a visiting professor at the University of Florida.

Mrs. Busch is the former Geraldine Barnes, ex ’50. They have five children.

Alumni To Receive $1,000 Award

Professor Busch

From Washington University in St. Louis.

Jack M. Parr has joined the National Cash Register Company as an installation representative for the NCR 315 computer in the data processing systems and sales division. He presently is in Muncie, Ind., where he is working on the installation of a computer for Ball Brothers Company, Inc.

Mrs. James V. Stogsdill (Alice Nan Stephenson) is a teacher in the Madison County schools. She lives in Collinsville and has two sons.

Mr. and Mrs. Edward R. Bevis, Jr. (Patricia K. Sill, ex) and their son Michael live in Alexandria, Va. Mr. Bevis is with the Foreign Agriculture Service in the U.S. Department of Agriculture.

Joseph J. Perjak, VTI, is a plant accountant for Allied Mills, Inc., Omaha, Neb.

At the inauguration of Pres. Vernon R. Alden at Ohio University in Athens, O., in May, Southern Illinois University was represented by Joseph B. Bodkin, analytical chemist with Sharp-Schultz Company of Lancaster, O.

MARRIED: Anna Duckworth to John Ruscin, M.S., June 2, Sullivan. He is a physical education teacher and coach at Sullivan Junior High School and she is an art teacher.

BORN: To Mr. and Mrs. Robert J. Horn (Gloria L. Heit), Joliet, a daughter, Audrey Regina, April 9.

To Mr. and Mrs. Bill Weeks (Alice Ann Yewell), Marion, a son, Glen Alan, March 20. Mrs. Weeks is a former teacher in the Marion schools.

To Lt. and Mrs. Duane R. Wilson (Carolyn Sue Fozard, ex ’54), Larson AFB, Wash., a daughter, Nancy Beth, August 17.

1957

Lt. Harold D. Casleton, Elkhville, was graduated from the U.S. Air Force’s Squadron Officer School at the Air University at Maxwell AFB, Ala., in August and now is assigned to Stewart AFB, N.Y.

Robert W. Tyndall, M.A., is a senior IBM programmer with Republic National Life Insurance Company, Dallas, Tex.

George W. Hagan has been a sales engineer with Lane-Wells Company in Houma, La., for the last five years. He is married and has two children.

Emil R. Spees, M.S. ’59, has joined the University of Vermont, Burlington, Vt., as director of student activities. He formerly was manager of the student center at Washington and Jefferson College, Washington, Pa. Last spring he represented SIU at the inauguration of Pres. Paul A. Miller at West Virginia University.

Camille Albert Becker, M.S., is a member of the staff of the secretariat of the Council of Ministers of the European Economic Community (the Common Market). He attends most of the meetings of the council in Brussels, Luxembourg and Strasbourg. Mr. Becker was instrumental in forming the SIU Benelux Alumni Chapter in Brussels.

Ralph W. Dimmick is a research assistant in the Cooperative Wildlife Research Laboratory on the SIU campus.

Mrs. Phillip J. Koclanes (Lucretia Crain) is teaching second grade at the South Side School in Herrin.

In Nashville, Tenn., Leslie N. Shive, VTI, is yard superintendent for Farris Hardwood Lumber Company. He lives in Goodlettsville, Tenn., with his wife, Judith Ann, and three children.

MARRIED: Barbara Witt to Charles Rusiewski, August 18, Nashville. He is business education and instructional materials teacher at Nashville Community High School.

BORN: To Mr. and Mrs. Wallace W. Biemann, M.S. ’62, Carbondale, a daughter, September 1.

To Mr. and Mrs. Louis D. Cheli, St. Louis, a son, Mark Louis, April 11.

To Mr. and Mrs. Sylvester F. Collins, Jr. (Derenda M. Taylor, M.S. ’62), Flint, Mich., a daughter, Sylvia Lisante, March 5.

To Mr. and Mrs. Larry Gene Haege, Grand Rapids, Mich., a daughter, July 6.

1958

In June William G. Eidson, M.A. ’59, graduated from Southern Baptist Theo-
logical Seminary in Louisville, Ky., and this fall began work on a Ph.D. in the field of the New Testament at Vanderbilt University, Nashville, Tenn. Mrs. Edson (Barbara Absher '59), who taught music in junior high school in Louisville, plans to continue teaching in Nashville.

Mr. and Mrs. Omar E. Winter (Carol Jean Keeney '57) and family live in Ft. Wayne, Ind., where Mr. Winter is training and development supervisor in the personnel offices of General Telephone Company of Indiana. He also teaches at the Indiana University extension center in Ft. Wayne.

Mr. Winter has a master's degree in business administration from Indiana University.

Lt. and Mrs. Clinton L. Noren (Carole D. Chambless '59) live in Dover, Del., where he is stationed at Dover AFB, flying C-124s and making many flights out of the country. Mrs. Noren keeps busy with club activities and base functions.

Rev. P. Wendell Garrison, who received a bachelor of divinity degree in July from Southwestern Baptist Theological Seminary, Ft. Worth, Tex., is minister of the Baptist Church at Paris, Tex. He and Margaret Hill Garrison, ex '57, have two children—Gregory born April 10, 1959, and Ruth born April 29, 1962.

Lowell F. Burgener is a systems engineer for Radio Corporation of America at Van Nuys, Calif.

Richard G. Patterson, who received a degree from the University of Illinois College of Medicine in June, now is interning at the Illinois Research and Education Hospital in Chicago. He is married to the former Sue Phillips '60. They live in Villa Park and have a son, Richard Clinton, born August 22.

MARRIED: Dr. Sandra Annette Clatts, ex, to Dr. Richard T. Bilinsky, June 15, Chicago. Both received degrees from the University of Illinois College of Medicine in June. Mrs. Bilinsky now is interning in pediatrics at Michael Reese Hospital in Chicago.

Shirley Ann Ecker, VTI, to James R. Hughes, June 17, Carbondale.

Pamela Kay Hindman, M.A. '62, to Charles R. Hearn '59, M.A. '60, August 12, Carbondale. They are living in Minneapolis, Minn., where he is doing doctoral work at the University of Minnesota.

BORN: To Mr. and Mrs. Alfred E. DiPietro, M.S. '61 (Mary Ruth Tehow '52, M.S. '58), Longview, Tex., a son, August 3. Mr. DiPietro, formerly with the Building Trades Institute at Mendota, now is assistant professor of construction technology at Le Tourneau College at Longview.

To Mr. and Mrs. Thomas C. Oliver, M.A. '60 (Yvonne Edwards, ex '59), Carbondale, a son, July 15. Mr. Oliver is supervisor of testing at the SIU Counseling and Testing Center.

To Mr. and Mrs. Robert S. Revak, M.A. '60, Murphysboro, a son, August 29. Mr. Revak is a lecturer in the SIU Department of Physics and Astronomy.

To Mr. and Mrs. Merrill S. Rosenthal, ex (Carole G. Thaxton), Wood River, a son, Mark Thaxton, February 17, in Heidelberg, Germany. Mrs. Rosenthal, former teacher at Roxana High School, has returned to the Roxana school district to teach in the junior high school.

To Mr. and Mrs. Glenn A. Schmitz (Kathleen Phillips, ex '55), Benton, third daughter, Vickie, February 11. Mr. Schmitz is on the faculty of Benton High School.

1959

Frederic W. Huston, Jr. is a cost accountant with U.S. Gypsum Company in Pittsfield, Mass.

Mr. and Mrs. Neil O. Brown (Sandra I. Conery '61) are living in Bloomington, where he is a junior mortgage analyst with State Farm Life Insurance Company and she is teaching second grade at Oakdale School in Normal.

Mr. and Mrs. Don A. Reville (Marilyn Woodside '58) live in Bellbrook, O., and have a daughter, Lynnette Renee, one year old. Mr. Reville is an assistant buyer for the Rike-Kumler Department Store in Dayton, O.

Thomas R. Hansbury is a purchasing agent for LaSalle Steel Corporation, Chicago. He is married and has two children.

Linda Sue Gould to Terry Stonecipher, May 27, Mt. Carmel.

Verla Dee Harrelson to Duane C. Pitchford '60, December 25, 1961, Macedonia. They are living in St. Louis, where he is on the faculty of McKinley High School.

Phyllis Jean Van Landingham, ex, to David R. Hentzel, M.A., August 12, Centralia. They are living in Iowa City, la., where he is a graduate assistant in the history department of State University of Iowa while working on his Ph.D., and she is continuing her undergraduate studies.

June Ann Hinnors to Helmer A. Engh, Jr., M.S. '59, July 7, Carbondale. Mr. Engh is a teacher at Beeman High School, Midlothian.

Sue Ann Keeton to Philip J. Pellegrino, June 16, Carbondale.

Margaret Eberle to Marvin Lauterjung, August 25, Champaign. He will enter Army Officers' Candidate School this fall.

Darlene M. Meller to J. Patrick Lawler, VTI, March 3, Bartlett.

Paula Jane Mackey to Charles T. Baker '61, June 22, Herrin. They are living in Champaign, where she is teaching in the elementary schools and he is a graduate assistant in chemistry at the University of Illinois.

Linda K. Pelhank to Donald J. McArthy, March, Harrisburg.

Kitty Ann McClure to Fred Scarlett, April 1, Vandalia.

Eleanor Ann McRoy to Larry E. Meyer, (Continued on page 25)
Two Members of SIU Family Die

Two members of a well-known SIU family have died in recent months. Mrs. William Troy Felts (Jennie Hodge '94-2) widow of William Troy Felts '94-2, '11, died September 6 in Murphysboro at the age of 89 after a long illness. Her son, Dr. William Troy Felts II '26-2, '28, died in Carbondale August 22 at age of 55.

Mrs. Felts, native of Murphysboro, had two sisters who attended SINU—Millie, ex '90 (Mrs. John W. Alexander) and Mary, ex '98 (Mrs. James Giles), both of whom survive. She taught school in Evans­ton before she married Mr. Felts in 1898. He joined the SINU Department of Mathematics in 1901 and was chairman when he died in 1935. He had served as president of the Alumni Association in 1901, 1907, and 1914. They had two children—Dr. Felts and a daughter, Genevieve '20-2 (Mrs. M. J. Myers, DeSoto).

Dr. Felts was born in Carbondale and taught at its Community High School before entering Northwestern University School of Medicine. He returned to his home to become a prominent and highly respected physician and surgeon. During World War II he was a captain in the Air Force Medical Corps.

Dr. Felts was a member of the American Medical Association, American Academy of General Practitioners, and Jackson County Medical Society. He served as class representative on the Alumni Association Legislative Council and he and Mrs. Felts were active in the Jackson County Alumni Club.

Mrs. Felts (Ethel Croessmann '26-2) and two children, William Troy III '61 and Amelia Jane, ex '58 (Mrs. William F. Case) survive.

1947

Charles Raleigh Phillips, M.S. '48, principal of Lincoln School in Johnston City three years, died July 23 at the age of 55. He formerly was superintendent of the city schools at New Shawneetown and later principal of Vergennes High School.

1949

Walter J. Eadie, civil engineer with Central Illinois Public Service Company, Marion, died August 22, in Marion, at the age of 41. Born in Springfield, he had served in the Army during World War II and was stationed at Pearl Harbor when it was bombed. His father was a former state director of mines and minerals. His wife and 11 children survive.

1950

Mrs. T. B. Roberson (Madge Elder Roberson), Eldorado, died December 3, 1961, at the age of 71. She was music supervisor of the Norris City Grade School. She had been a music supervisor for 40 years, most of that time in the Eldorado schools. A daughter, Mary Beth '40, survives.

1954

Harry Vernon Lewis, M.S. '56, principal of Greeneup Grade School since 1956, died April 9, 1961. He had been a mathematics instructor at Edwardsville Junior High School and principal of Percy Elementary School before going to Greeneup.

1958

George W. Batts, social studies teacher

1962 Classnotes . . .

(Continued from page 24)

March 17, Carbondale.

Vera Lou Mosely to Edmund C. Foster, Jr. '61, August 25, Cypress. They are living in Carbondale, where he attends Graduate School at SIU and she is a secretary at the Rehabilitation Institute.

Norma Sue Rogers to Thomas Scott Abney '60, June 15, Jonesboro.

Evelyn H. Seyer to James A. Sappenfeld, August 11, Belleville. They are living in Santa Clara, Calif., where she is teaching mathematics and science at L. C. Curtiss Intermediate School. He is working on a doctorate at Stanford University on a National Defense Education fellowship in American literature.

Judith Ann Sudheimer to William F. Payne, Jr., June 10, Carbondale. They are living in Ft. Devens, Mass., where he is on duty with the Army.

Birth

To Capt. and Mrs. Gary W. Robbins, M.S. (Marilyn Foster '57), second son, Wesley Mitchell, December 21, Carbondale. They now live in Lubbock, Tex., where he is a flight instructor at Lubbock AFB.

at Carterville Grade School, retired lieutenant colonel of the U.S. Army, and graduate student at SIU, died July 25 in Morris Library at the age of 47. Native of West Frankfort, he had enlisted as a private in the Army in 1935, served in North Africa and the ETO during World War II and later in Korea. He retired in 1956.

NOVEMBER, 1962
At the joint orientation for newcomers on the faculties of Carbondale and Edwardsville campuses this fall, President D. W. Morris announced a broad plan for exchange of teaching talents between the two campuses to begin next fall. He pointed out that it would tend to bring closer ties between the two campuses, result in an exchange of ideas, muster the entire strength as a university, and be good for students and faculty.

Another exchange program will start next fall, this one between SIU and Montclair, N.J., State College. It probably will begin with the exchange of two juniors. Although foreign exchange has become an established program in this country, little has been done between various geographical regions of the U.S. The program is to help students discover regional differences, characteristics, attitudes, and methods.

New Symphony Orchestra Conductor

Warren Van Bronkhorst, 36-year-old orchestra conductor at Chico, Calif., State College, is the new conductor of the Southern Illinois Symphony Orchestra, replacing Carmine Ficocelli. Mr. Van Bronkhorst also is head of string instrumentation and associate professor in the Department of Music. He holds two graduate degrees from Eastman School of Music and is a violinist. Before joining the Chico faculty in 1956, he taught at the University of Hawaii.

The organ purchased from a Rockford church last year and installed on the stage of Shryock Auditorium was dedicated October 28 at a concert by Robert Noehren, organist at the University of Michigan. Other concerts this term include the string quartet November 18, Marjorie Lawrence's Opera Workshop November 11, and the Christmas Oratorio December 1-2.

SIU "Family" Grows and Grows

According to a recent estimate, the SIU "family"—faculty, staff, students, and their families—has grown to constitute nearly 43 per cent of the total population of Jackson County. Of a county population of about 43,000 residents, SIUers would number about 18,000 this fall. That annoying jog of East Grand Avenue at South Marion Street has been straightened out. The University granted the city a 12-foot right-of-way to improve Grand between Marion and State to provide a better access to Wall Street.

Students and faculty are included in Jackson County's plan to immunize everyone against polio, with the first of three "SOS" Sundays (Sabin Oral Vaccine Sundays) starting October 7. The cost-free immunization program is offered by the county medical and dental societies in cooperation with the Jackson County Health Department.

From the Edwardsville Campus

Herbert H. Rosenthal, head of the Social Sciences Division and member of the faculty since 1955, is acting dean of instruction for the Edwardsville Campus during the fall and winter quarters while Dean William T. Going is on sabbatical leave to do research on the writings of William March in the British Isles. Milton B. Byrd, associate dean of the Humanities Division, has resigned to become vice president in charge of academic affairs at Northern Michigan College.

On the Lecture and Dramatic Stage

Freshmen attending convocation this term are scheduled to hear Dwight Cooke, world news commentator; Patricia McCormick, matadora; George Counts, visiting professor and education authority; Gill Robb Wilson, editor of Flying magazine; Hugh Miller, director of Royal Academy of Dramatic Arts of London.

The Southern Players this season present Maurice Pagnol's Marseille, Harold Bell Wright's Shepherd of the Hills, adapted by Charlotte McLeod; Luigi Pirandello's Right You Are; Lorraine Hansberry's Raisin in the Sun; and Ketti Fring's Pulitzer Prize winner adapted from Thomas Wolf's Look Homeward, Angel.

Newest member of the SIU family of magazine publications is Oceanic Linguistics, a journal of worldwide circulation. Conceived at last fall's 10th Pacific Science Congress in Honolulu, the magazine provides information on research in the Austronesian and Papuan languages, two families of tongues that are one fourth of those spoken in the world. Editor is George Grace, assistant professor of anthropology.
