Published monthly except August by the Southern Illinois University Office of Alumni Services, Carbondale, Illinois. Member of the American Alumni Council.

Payment of membership dues of $4.00 annually or $100 for lifetime membership entitles an association member to all alumni publications. Subscription to the Alumnus is by membership only. Second class postage paid at Carbondale, Illinois.

All information concerning alumni or special feature material should be addressed to the editor of Alumni Publications. Address changes should be sent to the SIU Alumni Office, Carbondale, Ill., 62903. Please allow four weeks for changes.

Printed by the SIU Printing Service at Carbondale.

---

On the Cover

Prof. Frank Konishi, of the Department of Food and Nutrition in the School of Home Economics, is one of the increasing number of faculty members engaged in vital research. To tell the story of the role research plays at SIU, David T. Kenney '47, M.S. '48, assistant dean of the Graduate College, associate professor of government, and member of the faculty since 1951, has written a special report which begins on page nine. Professor Kenney, voted "Most Popular Faculty Member" in 1960, is a vice president of the Alumni Association and member of the American Political Science Association, Pi Sigma Alpha, and Phi Kappa Tau.

THE MAIL BAG

The January Southern Alumnus contains two errors:
On page 17: "Professor Kirk, superintendent of the S.I.N.U. Training School from 1905 until his sudden death in 1911." Mr. Kirk was never superintendent during my time. When I entered school in September 1902, Mr. Kirk taught pedagogy. No. I didn't study pedagogy then but our hired girl did. Perhaps Mr. Kirk may have been superintendent before 1902, but in 1902 Mr. Jacob T. Ellis was superintendent and remained until his death in the summer of 1905. I remember this well, for Mrs. Dr. Parkinson came over to our house to tell mother. Mr. Ellis was succeeded by Mr. Samuel Ernest Harwood who remained until 1910, when he was succeeded by Charles Herbert Elliott.
Don't you have a file of old catalogs in which you can look up dates and check assignments?

On page 25: "Maj. Gen. John Reed Hodge." Reed Hodge retired as a general; "Full general" as the rank is spoken of in the service. That is two ranks higher than major general and the highest rank possible to obtain in peace time. See page 666 of the 1963, U.S. Army Register. Let us give this distinguished man his full due. I request this error be corrected.

Capt. Marcus R. Ogden, ex '16
1663 30th Avenue
San Francisco 22, Calif.
(Editors Note: Professor Kirk received his appointment as head of the Training School in 1894 and served in that capacity until 1901. According to the files in the archives, he was listed as a professor of pedagogy and school law in 1902 and as head of the mathematics department in 1906.

Gen. John Reed Hodge, ex '14, was promoted to the four-star rank of full general in 1952 when he was named chief of Army Field Services at Fort Monroe, Va., a year before his retirement.)

I'm sitting here in the midst of North American Van Lines boxes, reading our alumni magazines.

As I read, I noticed you don't have our new address and Bill's new position. We have a home at 24 Ardith Drive, Normal, Illinois. Bill is assistant toll engineer at the home office of General Telephone of Illinois in Bloomington, Illinois.

We do enjoy our SIU affiliations. As usual, Homecoming was fun and "friendly." Our six-month-old (De Lou) loved the bands at the parade. I guess my first parade was at the "ripe old age" of four or five months, too.

Many thanks for our magazine and all the SIU news.

Mr., Mrs. William V. Ittner '61
(Dorothy Anne Lingle '61)

A Backward Glance . . . .

Names and events that appeared in the campus news during late winter and early spring of 1959, 1954, 1939, and 1914

Five Years Ago

Ground-breaking ceremonies were held Friday, March 13, for the new University Center. First stage of construction, costing $3,779,555, will take two years. The center will be the hub of campus social and recreational activities, replacing the small, crowded and totally inadequate barracks that now serve as the student union. . . . Robert A. Harper, member of the faculty since 1950, is new chairman of the Department of Geography. . . . The Salukis took championships in gymnastics, swimming and wrestling and a second in basketball in the IIAC race.

Ten Years Ago

Opening of spring term will find the new indoor swimming pool open and ready for use in the physical education wing of University School. It measures 75 feet long and more than 37 feet wide. . . . Seniors Paul Morris, Venice, and Mary Myers, Kell, received Service to Southern awards at the annual Theta Xi Variety Show last month. . . .

Three major faculty appointments have been announced—Carl E. Erickson to be new director of athletics; Edward J. Shea, chairman of Men's Department of Physical Education; and Max Sappenfield, director of personnel.

Twenty-five Years Ago

Official recognition has been granted by the Student Council to the Little Egyptian Philatelic Society; Pi Delta Epsilon, national honorary journalism fraternity; Sigma Beta Mu, social fraternity; and Pi Kappa Sigma, social sorority. . . .

Bert Miller, Carrier Mills, is the first visual aids practice teacher. . . . Harold Catt, Charleston, Mo., is spring term president of Chemeka, honorary fraternity for chemistry majors with high scholastic records. . . . Merle Fulkerson and Harry Klie shared high acting honors for their roles in "Yellow Jacket," a Chinese drama that had such unique features as the presence of the chorus and property men on the stage throughout the entire production.

Fifty Years Ago

On the list of 681 graduates taken from the alumni register prepared for the Historical Bulletin, most of the alumni are teachers but there is a good representation of lawyers, physicians, dentists, county school superintendents, preachers, bankers, and political leaders. . . . The University has purchased three very promising heifer calves—all great milkers, full blood, and of excellent type—for $1,270. . . .

The Seniors almost had a weiner roast but the sleuth-footed Juniors captured the crackers. . . . "Terp's Place" advertises "Our Ice Cream and Sanitary, Iceless Fountain Drinks always in the lead" . . . .

"The 'esprit de corps' felt by the gentlemen of the Forum, whose sole purpose is to develop public speakers, is not expended in trying to gain triumphs over rival organizations, nor do its members loudly glory in its increasing membership; they do not even intend to sob sentimentally on graduation night about leaving 'the dear old Forum.' Their mission is a common sense one, and fits admirably with the educational ideals upon which this institution is founded."
A huge sketch of Prometheus set the scene for the one-man exhibit of bronze sculpture by Lawrence Marcell on display during January at Southern’s Loomis Gallery in Alton.

A smaller drawing of the Titan, fabled to have made men out of clay, stealing the fire to do so from Olympus, and a study Mr. Marcell calls "Prometheus and the Bird" were included in the exhibit by the first sculptor on the Edwardsville Campus.

Other mythological characters depicted were the moon goddess Diana which Mr. Marcell has done in alabaster and mounted on bronze; Bacchus, Roman god of wine, and Athena, Greek goddess of wisdom, done in bronze.

His "Woman of the Sea," on loan from the Butler Institute of American Arts, was included in the exhibit.

Born in Mission, Tex., in 1931, Mr. Marcell received his bachelor’s degree from Humboldt State College in 1959 and his master of arts from the State University of Iowa in 1961. He also studied under Renzo Finci, head of the sculpture department at Otis Art Institute of Los Angeles.

His prize-winning art has been displayed in a number of galleries. A bronze work, "Descent," on exhibit at The Missouri Show at City Art Museum in St. Louis recently, was sold to Howard Baer of Stix, Baer and Fuller.

From 1950 to 1954 the young sculptor served with the U.S. Marine Corps. Before coming to Southern last fall, he was engaged in studio work in Mentor, O. Although he entered teaching reluctantly (he was persuaded by members of the art staff to leave a successful free-lance career), his colleagues feel the Edwardsville Campus is fortunate to have him.

While he specializes in sculpture, drawing and jewelry making, Mr. Marcell also is interested in printmaking and ceramics. He currently is teaching classes in drawing since classes in sculpturing will not begin at Edwardsville Campus until fall.
Year-Round School

SIU becomes one of the few schools in the nation to operate on a full year-round basis with extension of the 1964 Summer Session to a full-length school quarter. In the summer term, starting June 15, all regular courses will be taught for a full academic quarter with the exception of some senior and graduate level instruction of special interest to grade and high school teachers working on advanced degrees. Those teachers whose school schedules would prevent attending a 12-week summer term can be authorized to take accelerated eight-week courses.

The University started in 1962 to bring about year-round operation when the traditional eight-week summer session was extended to 12 weeks for freshman subjects. Last summer the expanded term included sophomore subjects.

Problems of staff, operations, and even the summer commencement, are under continuous study of the Faculty and University Councils.

Pan-American Festival

The Latin American Institute will be joined by the Department of Journalism in sponsoring the 11th annual Pan-American Festival on the Carbondale Campus April 13–14. Theme will be “The News and Latin America.”

Each year the institute works with a campus group in conducting the event. This year experts on news from Latin American sources, both in the U.S. and in Latin American countries, will participate in the program designed to meet the interests of newsmen associated with newspapers, radio and television in the midwest.

Two medals will be presented for outstanding contributions to a better understanding between the hemispheres—one to a journalist or a news-gathering organization in the U.S. and the other to a writer or organization in Latin America.

Fulbrighters from Southern

When Francis A. Young, head of the Fulbright faculty committee in Washington, D.C., visited the campus early this year, he commented on the fact that Southern ranks among foremost schools in the country in number of Fulbright lecturers on its faculty. During the past five years SIU has had 19 faculty members receiving Fulbright awards for posts in 14 different nations and on every continent. There also is a substantial number of faculty members who received Fulbright grants at other universities before coming to Southern.

Fulbright lectureships are awarded by the committee on International Exchange of Persons under provisions of the national Fulbright Hays act, which provides funds for the program as part of an international education exchange program.

Lectures Via Phone

Students at six small colleges hundreds of miles apart will share the talents of Harry T. Moore, research professor of English and noted scholar of novelist D. H. Lawrence. Professor Moore was chosen by Stephens College, Columbia, Mo., to teach a Ford Foundation-supported course which will be carried by long-distance telephone to the campuses of Stephens; Drury College, Springfield, Mo.; Jackson State College in Mississippi; Langston University in Oklahoma; Morehouse College, Atlanta, Ga.; and Tougaloo Southern Christian College in Mississippi.

Professor Moore will deliver the lectures from his home, with the help of specially installed telephone equipment. The students will listen on conference speaker systems and
News of the Campus

will be able to ask questions. Professor Moore will inter­
view by telephone such noted literary figures as novelist
John Dos Passos, Pulitzer Prize-winning poets Karl Shap­
pire and Richard Wilbur, Negro writer Ralph Ellison,
and others. Leading critics will discuss the works of
Sherwood Anderson, F. Scott Fitzgerald and William
Faulkner.

Encyclopedia in Braille

A world of information is at the fingertips of blind stu­
dents on the Carbondale Campus with completion of a full
set of 145 volumes of the World Book Encyclopedia in
braille on the shelves of Morris Library. There also are
five volumes of supplementary materials for 1962 and
five for 1963.

The encyclopedia, published by Field Enterprises Edu­
cational Corporation, is a valuable source of background
material for the blind or partially blind students. In addi­
tion to student readers supplied to the visually handi­
capped students, the library has a number of textbooks
and other materials required in University courses which
have been recorded on tape, each running from eight
to 15 reels.

Two complete sets of Webster’s Student Dictionary are
available in braille. Each set has 36 volumes, each book
measures 11⅝ x 12 inches and is 2 to 3½ inches thick.

There have been as many as 12 blind students enrolled
during a quarter.

Visiting Professors

Since the University instituted its visiting professor
program several years ago, students, faculty, staff and
townpeople have benefited tremendously by association
with these distinguished teachers. The 1963–64 roster is
equally outstanding as in previous years. Among them are—

Jenaro J. Artiles, visiting professor of foreign lan­
guages. Professor at Westminster College, previously
visiting professor at St. Lawrence, Columbia, and Mis­
souri Universities. Author of several books and numerous
articles on Spanish and Cuban literature and history.

Harold R. W. Benjamin, visiting professor of education
in the Department of Educational Administration and
Supervision. Former dean of college of education at Uni­
versity of Minnesota and University of Maryland, pro­
fessor of education at George Peabody College, director
of adult education for Minnesota, director of international
education relations for U.S. Office of Education, visiting
lecturer at University of Buenos Aires.

Roma Gans, visiting professor in Department of Ele­
mentary Education, offering courses in reading in ele­
mentary grades and curriculum for kindergarten primary
grades. Professor of education at Teachers College, Co­
lumbia, until 1959; former assistant superintendent of
schools; editor for publishing firm.

Jean Gottman, visiting professor of geography. Inter­
national figure in city planning and author of widely read
and known Megalopolis. In addition to seminars, lectures,
and consultations, he is assisting in planning Edwardsville
Campus facility. Director of studies at University of
Paris; former member of Institute for Advanced Study at
Princeton and director of studies and research on social
problems for United Nations.

Frederick Guild, visiting professor of government and
director of Public Affairs Research Bureau. Before 1940
professor of political science and chairman of department
at University of Kansas; from 1940 until retirement direc­
tor of research department of Kansas Legislative Council.
Editor or co-editor of some 200 publications for council.

Duzilla Cray Kent, visiting professor in Department of
Home Economics Education, offering graduate courses
and serving as consultant. Former chairman and professor
emerita of home economics education at University of
Tennessee; state supervisor for home economics education
for state of Arkansas. Research for Southern Association
of Colleges and Secondary Schools and for U.S. Depart­
ment of Health, Education, and Welfare.

William L. Lacey, visiting professor of botany. Lect­
er in botany department at University College of
North Wales; former visiting lecturer at University Col­
lege of Rhodesia and Nyasaland. Has written extensively
on topics of paleobotany and on flowering plants, particu­
larly the orchid family.

Kemp Malone, visiting professor of English, offering
courses in Anglo-Saxon language and Beowulf. Leading authority on language, has honorary doctorates from Emory University, Yale, and University of Chicago. Professor of English at Johns Hopkins University, 1926–56. Author of books on Chaucer, the heroic legend, and literary history of England.

Elwood Murray, visiting professor of speech. Authority on interpersonal relations and semantics stemming from interest in language, speech, semantics, anthropology, and psychology. Former professor of speech and director of school of speech at Denver University.

Harlow Shapley, visiting professor of philosophy. Distinguished astronomer and philosopher. Former astronomer at Mount Wilson Observatory, director of observatory at Harvard, where he was Paine professor of astronomy, 1952–56. Holds 15 honorary doctorates from U.S. and foreign universities, including Princeton, Harvard, Brown, Copenhagen, Delhi, Mexico, and Ireland, plus numerous awards, prizes and honors.

Letitia Walsh, visiting professor of home economics education. Emerita professor, University of Illinois; former professor and department chairman at Stout State College; teacher education specialist for U.S. Office of Education; professor in school of education and social sciences at University of Chicago; editor and contributor to Illinois Teacher of Home Economics.

Neither Rain Nor Snow . . .

Wintery blasts don’t halt the postman, neither do they deter SIU teachers from taking education to the people of southern Illinois. During fall and winter quarters 26 members of the faculty took to the road once a week to hold extension classes in area communities. Come spring quarter 13 more will join the cavalcade.

Some drive as much as 100 miles away to conduct the 16-week courses. Most of the classes are designed to help area teachers complete requirements for certification or to upgrade themselves with work leading to a master’s degree. To help many area residents start college work in their home communities a number of General Studies courses are being offered.

Gifts to School of Agriculture

The School of Agriculture has been presented some very welcomed gifts in recent months. A. O. Smith Harvestore Products, Inc., Arlington Heights, has given the school two glasslined Harvestores, 14 x 32 and 14 x 50, for airtight feed storage, along with unloaders and augering equipment. The facilities, for swine nutrition and management research, have been installed at the school’s Swine Center.

Last fall Richard A. Lumpkin, prominent Mattoon businessman, gave the University 30 purebred American saddle horses for teaching and research purposes in the School of Agriculture. Included are 24 mares and six stallions of varying ages. The herd is valued at $20,000.

In addition to their value for teaching and research, the horses also will be used in SIU’s expanding program in outdoor education and recreation. An increased interest in pleasure and show horses in southern Illinois, as well as throughout the country, reflects the current trend toward more time and investment devoted to recreational developments.

Trustees Elect

At its first meeting in 1964, the Board of Trustees re-elected John Page Wham ’22-2, Centralia attorney, chairman for his 11th term. Also for an 11th term, Melvin Lockard, ex ’24, Mattoon banker, was re-elected secretary.

Kenneth L. Davis ’36, Harrisburg businessman, was elected to his fourth term as vice chairman. Other board members are Dr. Martin Van Brown ’23-2, ’25, Carbondale; Harold R. Fischer, Granite City; Arnold Maremont, Chicago; Lindell Sturgis, Metropolis; and Ray Page (ex officio), state superintendent of public instruction.

Sixth Model U.N. Assembly

A resolution calling for an end to nuclear weapons testing and transfer of all nuclear materials to peaceful purposes within four years was adopted by the sixth annual Model United Nations general assembly held on the Carbondale Campus last month.

The more than 250 student delegates also voted for a review of the terms of a 1903 treaty between the United States and Panama, endorsed new U.N. activity against racial discrimination, approved an increase of two and one-half per cent in United Nations dues, and gave “full support to the Universal Declaration of Human Rights.”

A resolution proposing the admission of Red China, on a two-year trial basis, failed to receive the necessary two-thirds majority at the session. A measure to suspend aid to Israel until that nation “negotiates some solution to the problem of Palestine refugees” was defeated.

Opening speaker at the two-day meeting was Paul Phillips, public affairs adviser for the Department of State’s Bureau of International Organization Affairs. He described the U.N. as “an overseer of peaceful change” . . . “Human progress holds the key to peace,” he told the delegates representing 62 countries, noting that “peace runs deeper than military containment, but is based upon advancements in science and technology.”
Personable Don Shroyer, a former area high school coach who enjoyed a successful six-year stint at Millikin University before joining up with the St. Louis Cardinals two years ago, is SIU’s new head football coach.

Shroyer, a native of little Lovington, was selected as Carmen Piccone’s successor after the latter had asked to be relieved of coaching duties and reassigned as an instructor in the Department of Physical Education.

The new Saluki grid boss owns an impressive list of credentials and already has made quite a hit with area fans, coaches, and prospective players.

At Lovington, Shroyer earned 13 of a possible 16 varsity letters while competing in football, basketball, track, and baseball and continued his active sports career at Millikin in Decatur. He lettered four years there as a halfback, captained the club his junior year, and received all-conference honors as well as Little All-American mention.

Following a short stay with the Chicago Bears where he discovered “there wasn’t enough of me to go around,” Shroyer launched his coaching career at Carmi High School and compiled a 31–10–4 record before returning to Millikin in 1956 as head coach. He revamped the university’s football program while there and moved into the pro ranks as a backfield coach after his 1961 Millikin club posted a perfect 8–0 record and captured the Illinois College Conference championship.

Married (his wife’s name is Marilyn) and the father of two children (Gail, 11, and Doug, 8), Shroyer assumed his new duties here February 1 and immediately jumped into the recruiting wars. The newcomer, however, has a large number of holdovers from last year’s 4–5 team and is in comparatively good shape.

“We will run out of a pro-type offense,” Shroyer said, “somewhat similar to that employed a year ago, but yet with definite changes here and there.” The 38-year-old coach spent his first few days on campus studying films of Southern’s 1963 games and was generally impressed with overall talent available.

“Our quarterback, Jim Hart, appears to be a real fine thrower and we hope to make the most of his ability,” Shroyer said. Hart, a product of Niles Township who will be a junior next fall, established numerous SIU records last season. Most notable were 14 touchdown passes and 1,041 yards gained through the air with 72 completions in 152 attempts.

*****

With the exception of NCAA championship meets, Southern’s winter sports seasons have been virtually completed. Coach Jack Hartman’s cagers, almost certain to receive an invitation to compete in the NCAA’s college-division tourney after a splendid mid-season winning streak, would be in action at Evansville, Ind., March 11–13 should they win a regional crown.

Saluki gymnasts, wrestlers and swimmers, however, will be competing in university-division competition. Coach Bill Meade’s outfit, which has claimed runner-up honors for the past three years, will be hoping to move up one notch at Los Angeles State College March 27–28. Coach Jim Wilkinson’s wrestlers, meanwhile, will be competing at Cornell University in Ithaca, N.Y., March 26–28, while Coach Ralph Casey’s swimmers will be stationed at Yale in New Haven, Conn., the same weekend.

*****

The 28th will also mark the start of Southern’s outdoor track season as Coach Lew Hartzog’s outfit is entered that day in the Arkansas Relays at Fayetteville.

Southern’s other three spring sports, however, will have already returned from trips south. Saluki baseballers and tennis players will spend the vacation break in Texas. Coach Abe Martin’s group has scheduled three games with both the University of Houston and Sam Houston State College while Coach Carl Sexton’s team will compete in the Rice invitational tourney as well as meeting Rice and Houston in dual meets. Coach Lynn Holder’s golfers, meanwhile, are slated to play in an invitational meet at Mobile, Ala.
Southern's complete spring schedules follow:

Lloyd V. Mitchell '42 (right) received congratulations, certificate for 20 years' federal service, and the Air Force 20-year pin from Brig. Gen. Roy W. Nelson, Jr., commander of Air Weather Service. Mr. Mitchell's service includes three and a half years as a weather officer in the Air Force during World War II and 16½ years as a civilian employee of the Army and Air Force. He is chief of special studies branch, Directorate of Scientific Services, at Air Weather Service headquarters, Scott AFB.

Lee R. Kolmer '52 (left), associate professor of extension research at Iowa State University, Ames, received the SIU agriculture alumnus achievement award at the All-Agriculture Banquet January 11. Making the presentation was Donald Robinson, Sullivan, president of the SIU chapter of Alpha Zeta, honorary scholastic fraternity in agriculture. Professor Kolmer, who received his master's and doctoral degrees from Iowa State, was on the SIU faculty before returning to Ames in 1955. He is a native of Waterloo.

Carl Sexton is coaching the tennis team during the two-year absence of John R. LeFevre, who joined the SIU education team in Saigon, Vietnam, last June as a consultant in health education.
Urban Sprawl
An international figure in city planning discusses ramifications of urban sprawl

Urban sprawl is an unstoppable development of the times which is much "cussed and discussed" but which can be directed with research, education, and proper information, Jean Gottman, visiting professor of geography, said in keynoting a two-day Urban Sprawl Conference on campus recently.

The conference was a scholarly meeting of geographers, planners, and others interested in the problem of sprawling urban developments. More than 100 persons participated in the meeting, sponsored by the Department of Geography, honoring Professor Gottman, director of the Twentieth Century Fund Study of "Megalopolis" and director of studies at the University of Paris.

City growth will keep going on and on, he said. "A safe assumption is that within 25 years twice as many people as now will be living urban modes of life. The task ahead is to double all existing urban facilities within these 25 years. Only some unforeseeable and still more awesome catastrophe could stop or delay this trend."

Life in a nice one-family detached structure, surrounded by a piece of green and with easy access to the place of work is a common desire among the majority of Americans and people of other countries, Professor Gottman continued. The planner's dilemma is the citizen's dream to achieve a mode of life combining all the advantages of a rural setting and urban life and excluding all the shortcomings of both.

"At the same time he is reaching for land and heaven, for security and opportunity, comfort and excitement."

This makes for progress and sprawl, but it also leads to disorder and frustration. Urban problems probably could be managed better if many people did not believe bigness in cities is bound to breed ugliness and sin.

"Too often we believe urban sprawl results from the flight away from the farms. It results probably as much, and in many regions more, from the flight of manufacturing plants and large warehousing away from densely built up urban districts, and from the out-migration of young families in search of living conditions that old urban districts have not tried to provide for them," Professor Gottman stated.

Many developments fostered by urban sprawl could be regarded as nice small towns just by being neighborhoods which enjoy some stability in area density and in the type of population, setting themselves off from their surroundings by some rules, a small amount of administrative autonomy and possibly a narrow "green belt" of land. This kind of smallness in urban scale now spreads inside and around large, sprawling metropolitan areas. Homogeneity may be provided by the racial origin of the community's people; by professional condition; by educational institutions, or by income level and social status.

"This is a different kind of club than the old small town where people were bound together by a common place of residence reflected in the tradition of living and working together in all kinds of social, trade and ethnic levels. This kind of town is waning and is being replaced by the suburban developments more akin to a system of segregated castes than to an integrated community. This is a disturbing trend," the professor declared.

His observations of urban trends and achievements in America and Europe have convinced Professor Gottman that responsible governmental institutions have the necessary powers to plan and regulate the situation. They could do more than direct and regulate it through taxation and credit policies, transportation regulations and subsidies, zoning, health and welfare laws which now are used, but they are reluctant to experiment because they doubt the situation warrants it. They feel if the need is urgent the public outcry will be loud, but the public does not cry louder because it does not positively know things could be helped and done rather easily.

Among those attending the conference were Henry Fagin, University of Wisconsin professor of urban and regional planning; Robert E. Dickenson, geography professor at the University of Leeds (England) who is visiting professor at University of Nebraska; Bart J. Epstein, B. F. Goodrich Company supervisor of sales facilities research; William L. Garrison, Northwestern University professor of civil engineering and geography; Edward Higbee, University of Rhode Island professor of agriculture and geography;

James B. Kenyon, University of Georgia geographer; Robert C. Ledermann, director of community facilities and urban renewal for National Association of Home Builders; Harold M. Mayer, University of Chicago professor of geography; Peter H. Nash, dean of Graduate School, University of Rhode Island; and Edwin N. Thomas, Arizona State University geographer.
The Constant Search

Research is an integral part of higher education and is essential for effective teaching at the university level. SIU encourages its faculty members to undertake research and assume the responsibility for promoting a research program.

by David T. Kenney '47, M.S. '48, Assistant Dean, Graduate College; Associate Professor of Government

Our time is known by many names. It is a time of cold war, an age of the atom, the space age. It is a time of population explosions, an age of technology, the era of automation. Frantic nationalisms confront us; it is a time of the emerging nations. It is a time of many times, an era of many eras, an age of many ages.

And it is also a time of an often unnoticed but most notable phenomenon, an assault upon the boundaries of man’s ignorance so great in magnitude and profound in consequence that it defies imagining. In the face of cataclysm and despair man’s resources are being marshalled in unprecedented fashion in the search for truth and understanding.

In no other age have certain human societies in so general a fashion devoted their time and treasure to the organized pursuit of new knowledge. The extent to which this condition prevails varies remarkably from one culture and nation to another, of course, and nowhere is it more evident than in the United States.

This constant search is carried on, in this land, by agencies of many sorts. Public and private corporations, both great and small, are participants in it. The great philanthropic foundations, based upon private fortunes, are champions of it. Private and public facilities for higher education have put their earnest attentions to it. Levels of government of every dimension pool their resources toward it. The federal colossus yearly directs huge budgets at it.

And the net result of this great campaign against the unknown and the misunderstood comprises a vast flood
Rose Padgett, chairman of the Department of Clothing and Textiles in the School of Home Economics, is studying beetles, the black carpet type, to find the best possible method of treating fabrics to protect them against the destructive insect.

An Historical View

Research has not been until recent times a central purpose of the University. Prior to 1948 its research program was supported entirely by state funds, in modest amounts—$200 in 1944, for example. Since 1948 the number of projects aided by agencies external to the University has grown from three to 121 in 1963. From the $200 of 1944 the University’s annual investment in state funds in research has risen to approximately $625,000 in 1960 and to more than a million dollars in 1963. Funds supplied by external agencies for research have grown to nearly $650,000 in 1960 and also more than a million dollars in 1963. Thus the total expenditure by the University of funds for research in the latter year exceeded two million dollars.

This growth of investment by the University in research activities, and its rising ability to attract research money from outside sources, has closely paralleled the expansion of its Graduate School. This is only to be expected in view of the necessary and intricate relationship of graduate education and research.

By 1951 the development and administration of an organized research program had been made a responsibility of the dean of the Graduate School, who was then

Carl C. Lindegren, noted scientist and chairman of the Department of Microbiology, established the Biological Research Laboratory in 1949, the first cooperative research agency on campus. Assisting him in the laboratory is graduate student Yong Nyu Bang of Korea.
Willis G. Swartz. He was later assisted in that activity by a small clerical staff and by a part-time assistant dean, who divided their attention between research and other functions of the Graduate School. The research program was made the particular responsibility of an assistant dean in 1958, under the direction of Dean Swartz, and of an associate dean in 1961.

Demands of the program made necessary enlargement of the research staff, from time to time, and as 1963 ended the administration of research activity was being carried on, under the direction of C. Addison Hickman, dean of the Graduate School, by John O. Anderson, associate dean and coordinator of Research and Projects; Eric A. Sturley, assistant dean for the Edwardsville Campus; Webster Ballance, assistant coordinator of Research and Projects; Wayne Stumph, assistant to the coordinator and contracts supervisor, and a number of clerical and technical assistants.

As it has been administered by the dean of the Graduate School, organized research activity at SIU has been developed in three general forms. One has been the special research projects arrangement, in which financial aid and other assistance have been extended to individual researchers for formally approved projects not otherwise aided.

A second has comprised the sponsored research programs. In it the Office of Research within the Graduate School has assisted researchers, and the University itself, to identify, and win the support of, research-oriented agencies external to the University. In a third, consisting of the cooperative research agencies, the development of continuing research ventures, with broad purposes and long-range goals, has been undertaken.

As mentioned, the number of sponsored research programs grew from three in 1948 to 121 in 1963. Special research projects, from a limited beginning in 1951, numbered 176 in 1963. The cooperative research agencies, initiated in 1949 with the establishment of the widely known Biological Research Laboratory, under the direction of the noted Carl C. Lindegren, professor of microbiology, numbered 21 early in 1963. Some more detailed description of these projects and agencies will provide an impression of their scope and vitality.

**The Special Research Projects**

In a time of much emphasis upon research in the sciences, group ventures, and projects of great dimension, there is the probability that certain individual undertakings, of great importance, will receive little attention and aid.

One purpose of the special research projects arrangement is to identify and assure the survival of such undertakings. Another is the development of research to the point where it may practically seek external sponsorship and support. In this plan for aid, individual projects are seldom subsidized for more than three years.

In order to win support for their work, staff members must submit formal proposals, approved by departmental chairmen and school and college deans, to a committee of the Graduate Council. Once approved, a project becomes eligible for aid in travel, the employment of student workers and research assistants, the purchase of equipment and supplies, and certain assistance in the preparation of materials for publication.

Some sense of the type and significance of aided re-
search in this category may be gained from a review of representative projects recently approved. Approximately 40 per cent of currently operative special research is housed in the College of Liberal Arts and Sciences.

In its Department of Anthropology Carroll L. Riley is conducting “An Archaeological and Ethnohistorical Investigation of the North Mediterranean Frontier.” In History, Harold E. Briggs has under study the “Variety of Entertainment in the Early American West,” and Dan P. Silverman “Alsace-Lorraine Under German Rule, 1871–1918.” Zoologists Herman Haas and Duwayne C. Englert are carrying on work, respectively, in “Experimental Embryology” and “The Genetics of Tribolium.”

Geography’s David E. Christensen is conducting “Experiments in Mapping from Raw Statistical Data”; while in Psychology Neil A. Carrier is concerned with “The Effects of Anxiety on Performance” and William C. Westberg and Stanley Gray with “A Study of Factors Related to the Ambition to Succeed Trait.” Florence M. Foote of Physiology is studying “Albumen Utilization in the Avian Embryo.”

In Japan as an exchange professor, Earl T. Hanson ’32 is making the most of the opportunity with work upon “The Impact of American Culture Upon Japanese Attitudes.”

Other schools and colleges, in addition to Liberal Arts and Sciences, provide numerous examples of significant work being carried on under the special research projects label. Industrial Education’s George H. Francis is at work upon the “Design and Development of a Hybrid Vidicon Television Camera Unit.” Thomas Martinsek, of Economics, is concerned with “Alternative Approaches to Demand Theory.” In Clothing and Textiles Rose Padgett is interested in “Textile Variants and Their Effect on Mothproofing Fabrics.”

Clarence D. Samford ’23-26, of Secondary Education, is tracing “Curricular Changes in Secondary Schools of Southern Illinois during the Twentieth Century”; and elsewhere in the College of Education Arthur Lean continues his interest in comparative education with a “Study of Scandinavian and American Educational Systems.”

The School of Communications may be represented by Mordecai Gorelik’s work with “The Good Woman of Setzuan”; the School of Fine Arts by Herbert Fink’s “The Metamorphosis of Line into Tone.” Much other work of equal worth could be listed but surely these mentioned suffice to present an outline of the special research projects underway at the Carbondale Campus.

The Edwardsville Campus too is productive of a body of significant ventures of this sort. Justin N. Frost is engaged in study of “Chromosome Structure and Behavior in Drosophila Melanogaster,” and Walter Hewitson in work upon the “Comparative Morphology of the Schizaeaceae.” In a somewhat different field Joseph Mogan is concerned with “The Theme of Mutability in the Works of Geoffrey Chaucer,” and Gordon Wood with “Modification of Computer Techniques for Linguistic Research.”

William Goodman is continuing his interest in the dynamics of government in “The Revision of the Two Party System in the United States.” William Shaw might be said to be immersed in the study of “Sea Animals and Submarines,” while Philip Vogel finds his concern to be with “The Changing Location of the Commercial Brewing Industry in the United States”—truly a yeasty subject.

As was the case for the Carbondale Campus, these few topics do no more than typify the range of the much greater number which the Edwardsville faculty has undertaken.

Illustrative of one sort of objective result of the special research projects program is the recent experience of Robert R. Spackman and Marvin E. Johnson. In their work upon “The Design and Development of Isometric..."
Exercise Equipment for the Whole Body,” in which their respective competencies in physical education and industrial education found a happy merger, they developed equipment suitable for use in isometric testing. Through the University’s Office of Research and the SIU Foundation a patent was obtained, and a manufacturing license granted to a firm in South Carolina. Other patentable research results had earlier followed a similar pattern.

The Sponsored Research Program

It is vitally important that the University encourage and assist its staff to become involved in research which is of concern to many significant agencies outside the University. In this way faculty talents may be merged with the resources of public and private entities in research of the broadest significance.

As this occurs the University becomes part of the great fabric of a truly national and international search after knowledge and understanding. It is toward this end that the sponsored research program is aimed.

Through contracts for research and grants-in-aid from external agencies involving in 1963 more than a million dollars of contributed funds, 121 sponsored research projects were in that year in operation. Federal agencies and private foundations were the chief contributors to the program, but as representative of many others could be listed the Anheuser-Busch Company, the San Francisco Forty-Niners, and the Sport Fishing Institute. In all 47 distinct agencies were involved.

A sampling of projects submitted for external approval by the University and its staff together, through its Office of Research, taken during a brief period in 1963, might typify the sort of work which is being cooperatively conducted.

Dean Wendell E. Keeper, School of Agriculture, proposed a study of “The Contribution of Agriculture to Economic Development” to Sperry and Hutchinson Company. The U.S. Public Health Service was the recipient of a number of proposals, including the Department of Food and Nutrition’s Frank Konishi’s “Metabolic Adaptation in Adipose and Hepatic Tissues,” Chemistry’s Roger Beyler’s “Synthesis of Steroidal Alkylating Agents,” and Psychology’s William Wagman’s “Behavioral Analysis of Sodium Chloride Deprivation.”

To the National Science Foundation went proposals of “Studies of Plants in Coal Balls of Pennsylvanian Age from Southern Illinois” from Donald A. Eggert, of Botany; and of “The Evolution and Ecology of Rodents on Small Islands of Known Age in the Southwest” from Harold E. Broadbooks of the Science Division at Edwardsville. Alexander Macmillan of the Transportation Institute proposed to the U.S. Coast Guard a joint consideration of the “Handling and Movement of Dangerous Cargoes on Inland Waterways”; and to the American Cancer Society Maurice Ogur of Microbiology suggested a “Study of Mutants with Impaired Respiration.”

Many other projects of no less importance could illustrate this group.

Typical of the significant activity undertaken in such joint projects is the work now underway in Quincy, under the direction of Charles V. Matthews, of the Edwardsville Campus Center for the Study of Crime, Delinquency and Corrections. Cooperatively with the U.S. Office of Education the center is attempting to demonstrate the curricular alterations and vocational training additions which might make the public school experience more valuable, in grades seven through 12, to the one-third of their pupils who are slow-learners. A more effective school curric-
The Cooperative Fisheries Management Research Program, directed by William M. Lewis, surveys fisheries resources of southern Illinois and investigates possible management procedures for the improvement of recreational fishing. University research funds are supplemented by financial support provided by the Division of Fisheries, Illinois Department of Conservation, and the Sport Fishing Institute. Members of the staff remove fish from one of the experimental ponds to weigh and study.

By Floyd Cunningham. Under the leadership of W. D. Klimstra, the Cooperative Wildlife Research Laboratory, and Cooperative Fisheries Management Research, headed by William M. Lewis, separately study aspects of wildlife and fish populations of the area.

Other agencies of this category concern themselves with problems of agriculture, public education, cultural anthropology, and community development, to list only a representative few. In all of this group, continuity and complexity of program, diversity, and collaboration with external agencies are recurrent characteristics.
Changes in Association Organization

Several important changes were made in the Alumni Association organization in action taken last Alumni Day. These changes were submitted to the Legislative Council at its annual meeting and passed by the association membership at the Alumni Banquet that evening.

Previously, the class representative, alternate, and vice alternate to the council were elected by their classes every other year to serve a two-year term.

With the changes in the constitution and bylaws last June, all those elected to represent their classes on the council beginning July 1, 1963, would serve until their next class reunion—at which time a class representative, alternate, and first alternate would be elected for a five-year term by those attending the reunion from nominations submitted by class members.

Nominations are now open for class representative positions on the Legislative Council for those classes holding reunions on Alumni Day—classes ending in 4 and 9. The Class of 1963 will elect their representatives for a four-year term; at their fifth reunion in 1968 they will elect council representatives for a five-year term.

Only members of the association are eligible to be elected to class representative offices on the Legislative Council. Only members of the association are eligible to vote for their class representatives. Former students are considered a member of the class with which they would have graduated had they remained on campus and finished their degree work.

Send nominations to the SIU Alumni Office, Carbondale, Illinois 62903.

Telefund Campaigns Scheduled

Six of the 11 alumni clubs holding telefund campaigns this spring have set the date for their fund-raising drives. Two already have held them—Macon County Alumni Chapter February 10-11 and Franklin County Alumni Chapter February 24-25.

Others include Jefferson County March 9-10; Madison County March 16-20, 23; Jackson County April 6-8; and Springfield Area April 8-9. Alumni living in the telefund campaign areas will receive a letter acquainting them with the fund-raising drives.
Sister Mary Tolentine, M.S. '60, Ph.D. '63, head of home economics at Notre Dame Woman's College in Kyoto, Japan.

Reunion of Sister Tolentine and her former teacher, Prof. Anna Carol Fults, chairman of the SIU Department of Home Economics Education.

Visits Home Ec Alumnae Abroad

Late in December Prof. Anna Carol Fults, chairman of the Department of Home Economics Education, left on a five-month sabbatical leave that would take her around the world for lectures, seminars, and reunions with home economics alumnae.

First stop was in Japan, where she visited Sister Mary Tolentine, M.S. '60, Ph.D. '63, head of home economics department at the Notre Dame Woman's College at Kyoto. Sister Tolentine received the first Ph.D. in home economics at Southern.

Miss Fults wrote that the college, in its third year, has 430 students and is a four-story rectangular building with a court and garden on the inside. While she visited there, the students demonstrated the formal tea ceremony and flower arranging.

Sister Tolentine is teaching a course in meal management and one in methods of teaching home economics. This spring she will have 40 students doing student teaching.

When Miss Fults left Japan, she went to Taipei. In the Philippines she plans to visit Amparo G. Olano, M.S. '61, supervisor of home economics for the Philippine Government Division Office at Naga. During March and April she will visit and work with Mrs. Pepi Tzakou Bautoris, M.S. '63, principal of the Maraslion School of Home Economics at Athens, Greece.

The Bakers of Colorado Springs

A young Pope County man who left Southern Illinois Normal to enlist in World War I, was wounded and returned home as a casualty, then moved to Colorado Springs because of his health, today can look back at a full and useful life.

Walter D. Baker, born in McCormick in 1894, attended school in Pope County and taught for several years before he came to Carbondale and Southern Illinois State Normal. But he didn't stay long enough to graduate.

After a few terms he left to enlist in World War I. Sent to France, he was wounded in the Argonne and came home a casualty. In 1919 he married Winifred Moore in Marion and the following year they moved to Colorado Springs.

For several years he was very ill, but despite his poor health he organized the Baker Realty Company in 1925. Since then it has become one of the oldest and largest in the Pikes Peak area.

It also has become a family business. The eldest son, Walter, Jr., returned in 1946 from World War II service and joined his father. They in turn were joined by the next son, W. Lee, in 1948 and by the youngest, Maurice G., in 1953. They formed a family corporation and departmentalized it into real estate, insurance, property management, and loans. Their slogan—"Old Enough To Know and Young Enough To Grow."

Mr. Baker has devoted much of his time and energy to professional, civic, and church activities. For 28 years he has been a director and treasurer of the YMCA, receiving a plaque from the West Central Area of YMCA for his long service.

He is a life member of the Disabled American Veterans, the American Legion, and Veterans of Foreign Wars. He is a trustee and secretary-treasurer of the Colorado State School for the Deaf and Blind. He served three years on the Colorado State Licensing Real Estate Board and is affiliated with local, state and national real estate and insurance groups. In 1954 he was chosen Realtor of the Year by the local Board of Colorado Realtors.

Mr. and Mrs. Baker, their three sons and their families, including six grandchildren, all live in Colorado Springs.

Classes

1889
Seventy-fifth Reunion
June 13, 1964

Retirement? That's just a word in the dictionary as far as Ira O. Karraker, '2, is concerned. He is 87 and still active as president of the First National Bank in Jonesboro. He has been with the bank 65 years, 40 of them as president. When he joined the bank in 1898, he was part-time janitor, teller, and bookkeeper. Later he was named assistant cashier and early in 1923 became president. During those years he saw many changes in the banking business—from $200,000 in 1898 the resources grew to $3,225,000; from a typewriter equipment has expanded to a high degree of automation; from a 12-hour day or longer banking operations now are conducted in a much shorter day.

Mr. Karraker taught school in Marion for two years after receiving his diploma from Southern; one of those years he was principal of the high school and the other superintendent of the Marion schools. During 1909-13 he was mayor of Jonesboro and during 1929-33 president of the board of education. His pet hobby is studying and writing about history and he is a member of the Union County, Southern Illinois, and Illinois State Historical Societies.

Two of Mr. Karraker's children are alumni—I. Oliver, Jr., '36, assistant superintendent of Western Electric Company, Princeton, N.J. (married to the former Martha L. Jones '39), and Louis R. '49, M.A. '52, assistant to the president of Augustana College, Sioux Falls, S.D. (married to Patricia Grace Stahleheber '43). His daughter Mary is a secretary in Greenville, N.C.

1909
Fifty-fifth Reunion
June 13, 1964

1911

When Isaac P. Caldwell, '2, made his last run as a conductor aboard the Illinois Central Railroad in November, he had four Carbondale-bound passengers he didn't expect. Four of his five sisters boarded the train at Murphysboro. They included Mrs. S. A. Holliday (Mary Caldwell, ex '12); all are from Carbondale. The fifth sister, Mrs. E. A. Miller (Margaret Caldwell '32-2), lives in Park Forest. Mr. Caldwell worked for Illinois Central 52 years. His wife, the former Mabel McGUIre, ex '12, a teacher, died in 1962. He has a daughter Alice '38 (Mrs. Ronald E. Coon), who lives in Harrisburg.

1912

Mr. and Mrs. Byrl Turner, ex, Marion, celebrated their 50th wedding anniversary in January. Mr. Turner retired at the end of 1961 as Williamson County circuit clerk after 20 years in that office. He was a deputy county clerk eight years before that. The Turners have a daughter who is secretary-treasurer of Marion Unit Two schools.

1913

Before she married and settled down in Grand Chain in 1917, Mrs. Guy C. Bartelson (Elizabeth Lewis, '2) taught home economics at Lincoln School in Carbondale for two and a half years. Since her husband retired from farming and the many
odd jobs he did around their little village, they have been spending their winters in Florida. Although they never had children of their own, they have been mother and father to all the children in Grand Chain. They devote most of their time to their church and community. Mrs. Bartleson attended the Golden Reunion last June.

Loyd M. Bradley, ex, Carbondale, is a member of the board of directors of the Carbondale Savings and Loan Association. A former circuit judge for the First District of Illinois, he has a law practice in the University community.

1914

GOLDEN REUNION
June 13, 1964

Prof. Edwin H. Schrieber, 2, retired last June from the faculty of Wisconsin State College, Superior, Wis. He had been chairman of the physics department since 1922 and for a time also served as dean of instruction. He has a bachelor's degree from the University of Illinois and a master's degree from the University of Wisconsin.

Mrs. H. Elmer Huddle (Bertha M. Klipfel, 2), Highland, is planning to attend the 50th Class Reunion on Alumni Day. She last visited campus for her 35th Reunion in 1949.

1918

In writing her regrets that she could not attend the class reunion last spring, Ina E. Steele, 2, extended an invitation to classmates traveling in Florida to stop and visit her in St. Petersburg. She retired in 1961 from the Florida State Children's Commission, a consultative agency for children and teen-age services on community and local levels. She had been in state work since 1939. Now she does some volunteer work for the Florida Conference of Social Welfare and also enjoys reading and rocking-chair leisure. Miss Steele received a bachelor's degree from St. Louis University in 1934.

Another member who could not attend the reunion was Mrs. John J. Bayer (Josephine Galvin, 2, '60), East St. Louis. She wrote that she had taught for nine years in the East St. Louis system after graduation, married in 1927 and moved to Granite City, where she lived for 10 years. She returned to East St. Louis and in 1952 started taking extension courses at the Belleville and East St. Louis centers. She was in the first class graduating from the Edwardsville Campus. Also in 1952 she returned to teaching and continues to teach in an East St. Louis elementary school.

Miss Ogden Honored

Susie E. Ogden '18-2, '31, who retired September 1 as associate professor of accounting after 31 years on the faculty, was honored by colleagues and alumni at a dinner in University Center in December. At that time it was announced that some 100 former students and associates had contributed to the establishment of a Susie Ogden Scholarship.

It is planned that the scholarship will become an annual one awarded by a committee consisting of Miss Ogden, chairman of the Department of Accounting, and one other person. At the dinner Miss Ogden was presented a scroll bearing the names of contributors to the scholarship.

Her daughter is an instructor in Nursing and Health Services.

1919

Forty-fifth Reunion
June 13, 1964

1921

Mr. and Mrs. Louie H. Clark, ex (Helen Mason, 2) live in Pueblo, Colo. They have two children. At one time Mrs. Clark was an elementary teacher in the Cicero schools.

Mrs. L. H. Sims (Lora A. Marten, 2), Quincy, who suffered a fractured back injury in July, 1962, reports she has fully and successfully recovered. Last summer she accompanied Mr. Sims to Maxwellton Braes, Door County, Wis., for a district leaders' meeting, and to Rockton for a special sales conference of Mr. Sims' company.

1923

Mrs. Jack N. Bramham (Ruth Lombard, 2), Burlingame, Calif., is an accountant with Pan American Airways.

On January 1 Clarence E. Wright, 2, Carbondale, became a judge on the Fifth District Appellate Court at Mt. Vernon under the new judicial system of Illinois. He had been serving as chief judge of the First Judicial Circuit of Southern Illinois during the changeover to the new system. Mrs. Wright is the former Alice Kelsey, ex '26.

Mrs. J. C. Lindsey (Lenora Perdue, 2) now resides with her son, James R. Lindsey '55, at 541 South 70th Street, Omaha, Neb. They moved there from Alexandria, Va.

James E. Mohan, 2, '59, principal of Lincoln School in Johnston City, was elected secretary-treasurer of the Williamson County School Administrators Association last fall.

1924

Fortieth Reunion
June 13, 1964

Robert A. McIvor, 2, is an attorney at law in Flat River, Mo.

Mrs. George Peek (Pearl Glenn, 2), Decatur, retired from teaching but still does some substitute teaching.

Another retired teacher is Mrs. Cyrus W. Etherton (Ruth Entsinger, 2, '43, M. S. '48), Carbondale. She formerly taught commercial subjects at Murphysboro Township, Gomah, and Campbell Hill High schools. She has a son, Edwin M., ex '36.

1927

After 10 years as superintendent of schools of the Cohden Unit and 10 years as principal of Cohden High School, Bert Casper '25-2 resigned last spring to become Illinois state director for the National Beta Club. The Beta Club is a service-leadership club for high school and junior high school students to "reward merit, encourage effort, and elevate moral welfare." Mr. Casper is a vice president of the Alumni Association. He is married to the former Mary Alice Reno '25-2.

Walter Collins, ex, is head of the Social Science Department and American history and American government teacher at West Frankfort High School. In 1953-54 he served as president of the Franklin County Alumni Chapter. Mrs. Collins is a former member of the SIU Board of Trustees. Their daughter Helen '57 lives in Tampa, Fla., where her husband, Charles H. Wildy '53, M.S. '56, is dean of men at the new University of South Florida.

1928

John Lester Buford '24-2, member of the Alumni Association board of directors and former association president, has announced that he will retire as superintendent of Mt. Vernon Grade School District 80 when his term ends September 1. He has been head of the system 26 years. Mr. Buford is president of the Horace Mann League, a public education organization which is challenging four Maryland state laws giving matching construction

SOUTHERN ALUMNUS
grants to four church-related colleges. Mr. Buford also is a former president of the National Education Association.

Last July Walter C. Lay, 2, joined the staff of SIU as an accountant in the Bursar’s Office. He and Mrs. Lay (Evogene Bratten ’34-2, ’48), formerly of Metropolis, now make their home in Carterville.

Mrs. Walter J. Adelsberger (Nannie Jones ’24-2, M.S. ’52) teaches English and French at Johnston City High School. She lives in West Frankfort and has three children.

1929

Thirty-fifth Reunion
June 13, 1964

John C. Moore, 2, is district manager in Marion, Ind., for the Social Security Administration in the U.S. Department of Health, Education, and Welfare. He is married and has two children, Marilyn and Albert.

Sue A. Johnson, 2, ’47, is a first grade teacher in the Belleville schools.

Virginia Marmaduke, ex, Chicago newspaper, radio and TV personality, who became vice president of Consolidated American Life Insurance Company of Illinois in 1960, is director of special events for the Illinois exhibits at the New York World’s Fair.

1932

James F. Allen ’28-2 has been a teacher in the Indian Field Service of the Bureau of Indian Affairs for over 25 years. He currently is in charge of the academic elementary schools at Toadlena, N.M. He and his wife Bernice have two children. Dr. Leo J. Brown, Carbondale radiologist and former Alumni Association president, was seriously injured in a sleigh ride accident on his farm early in January and had immediate surgery for internal injuries.

Melba Marie Ertelt, 2, ’43, teaches second grade in the New Athens Community School Unit.

1933

He is survived by Mrs. Ramsey (Edith H. Webster, ex).

SOUTHERN ALUMNUS
1960, after 40 years of teaching, died November 24, Los Angeles, after a long illness. Native of Nashville, she had taught six years in Granite City before moving to California, where she taught 34 years. She is survived by her sister, Mrs. Alexander Crawford (Pearl Huck).

Word has been received that Mrs. Randall R. Myers (Ethel Z. Gibbs, 2) is deceased. She had been a resident of Wood River for over 40 years, was a member of the Artists Guild there and a substitute teacher in the East Alton Grade Schools. One of her two sons is Larry Dale Myers '51.

1961, when she retired because of an attack of multiple sclerosis, died last April in Marissa. His wife and two children survive.

Claude Cox, ex, Carterville, owner and operator of the Cox Lumber Yard near Energy for 30 years, died November 1 at the age of 65. Surviving are his wife (Pearl Roberts, ex '19) and two children.

Mrs. John L. Maulbetsch (Grace Stewart '20-2) died in Northampton, Mass., October 14, 1961. A native of Perry County, she held a master's degree in mathematics from the University of Michigan and was working on a doctorate in celestial mechanics when she married. Her husband, from Geneva, Switzerland, has been vice president of Kollmorgen Optical Company, formerly of Brooklyn, N. Y., and now of Northampton.

Helene E. Street, 2 '48, Decatur grade school teacher from 1951 until November 1961, when she retired because of an attack of multiple sclerosis, died last April in Arlington, Va. She taught in Belleville before moving to Decatur.

Claron A. Robertson '23-2, manager of the Paducah, Ky., branch of Hoe Supply Company 33 years before retirement, died January 19 in Paducah at the age of 63. Native of Flora, he had been a mathematics teacher and high school principal before becoming associated with Hoe Supply. He was a life member of the Alumni Association, as are his four children—Maj. Claron A., Jr., ex '44, Robert N. '53, Mrs. Frank McCurdy (Vera L. '62), and Mrs. Edgar Eldridge (Thelma '41). He also was a member of the board of directors of the SIU Foundation, a past president of the Paducah Rotary Club, and an active worker in the Boy Scouts. Also surviving are his wife and three brothers, including Myron T. Robertson '28-2.

Frederick W. Willis, formerly of Carbondale, died in Tucson, Ariz., October 1, at the age of 56. He had joined the Regular Army in 1936 and during World War II was attached to the Air Corps, serving as sergeant major of the station hospital at Baer Field, Fort Wayne, Ind.

Lyndell Pullen, ex, Metropolis Chevrolet dealer and race horse farm operator, died January 14 in Metropolis at the age of 53. Surviving are his wife (Frances Middagh, ex '35) and two sons.

William A. Howe, director of the SIU Physical Plant since 1949, died January 22 in Carbondale at the age of 54. Native of Woodlawn, he had a master's degree from the University of Illinois. He was district engineer at Mt. Vernon for the Works Progress Administration during 1935-40, maintenance engineer at the Ordill Ordnance Plant during 1941-45, and consulting engineer at Mt. Vernon and field engineer at St. Louis and Aurora before he joined the staff at Southern. He organized the Egyptian Association for Mentally Retarded Children and was its first president; he served as adviser to Delta Chi fraternity. He is survived by his wife; three sons, Richard S., instructor in the SIU School of Technology; W. Gerry '64, vice president of the Student Body; and Donald M.; and seven brothers and sisters, including Samuel W. '24-2, '25, and Mrs. George B. Murphy (H. Jewell '30-2). A William Howe Memorial Scholarship Fund has been established. Contributions may be made by writing checks to Southern Illinois University and sending them to Robert Gallegly, Business Manager, SIU, Carbondale.

Maurice S. Thompson, ex, San Luis Obispo, Calif., carpenter and millwright, died February 10, 1963. He formerly lived in Marissa.

1963

Mrs. Hoyt L. Lemons (Alice Carol Fugate), church organist at Trinity Episcopal Church in Arlington, Va., for 16 years and choir director for two and a half years, died December 31 in Arlington at the age of 47. Native of Kirksville, Mo., she was a member of Sigma Alpha Iota music fraternity, past president of Northern Virginia Music Teachers Association, and scholarship chairman for Arlington Symphony Orchestra. She is survived by her husband, Hoyt L. Lemons, chief of the geophysical sciences branch of the Army Research Office and professor of climatology at the University of Maryland, and three children.

Paul Helms, ex, Hillsboro High School teacher, died November 16 in Hillsboro at the age of 43. He was born in Herrin.

Mrs. Robert W. McMillan (Marjorie Pette McMillan, ex) died in Grinnell, Iowa, December 30 at the age of 43. She is survived by her husband, Robert W. McMillan '37, former acting chairman of the SIU Department of Art and member of the faculty from 1950 to 1960 and now chairman of the art department at Grinnell College, and three children.

Mrs. Ray Williams (Helen Reames Williams, ex) Creal Springs Post Office clerk for many years, died December 13 in Benton at the age of 59. She was born in Redbud.

Joseph B. Clarida, sales representative for General Insurance Company of America, Canton, Ohio, was killed in an automobile accident October 1 enroute to Youngstown, Ohio. Surviving are his wife (Carol Lee Bell '57) and daughter Amy.

Alta M. Johnson, special education teacher at Harrisburg Junior High School, died December 10, 1962, at Evansville, Ind., at the age of 64. At one time she was principal of Lincoln School in Harrisburg.

Donald J. Gidecumb, industrial arts and driver education instructor at Onarga High School, died December 16 at Onarga, the result of a hunting accident. He taught at Equality a year before going to Onarga. His wife and two children survive.
Southern Sketches

More students than ever in southern Illinois are seeing and hearing their teachers on television sets. In the third year of instructional television on WSIU-TV, Channel 8, 101 school districts (15 more than last year) have joined the program which transmits 20 grade and high school courses. The area covered reaches to St. Peter to the north, Freeburg to the northwest, Chester to the west, Anna-Jonesboro to the south, and Harrisburg to the east.

The University's year-long observance of the 400th anniversary of Shakespeare's birth opened January 28 with the program, "An Evening with Basil Rathbone."

Award for "Motion Picture"

An abstract travel film, "Motion Picture," produced by Frank R. Paine, supervisor of Film Production Unit, was awarded a bronze medal in the International Film Study Festival. His was the only entry from the United States to receive an award at the Amsterdam, Holland, festival. Films from 18 countries were entered in the competition sponsored by the Netherlands International Bureau for Cultural Activities. The selection jury praised the film for the "pure pleasures of its rhythms of light, color and sound." It has been selected for showing at the San Francisco Film Festival later this year.

Nearly 100 upperclassmen and graduate students are resident fellows in University residence halls and off-campus rooming houses.

Upperclassmen Coming Up

Winter term enrollment reached a record 18,247 with a significant increase in upperclassmen and graduate students. The junior class showed the greatest gain—from 2,736 last year to 3,468 this term. The senior class grew by 666 to a total of 2,853, while graduate enrollment climbed from 1,615 last year to 1,921. There are 12,707 students on the Carbondale Campus and 5,540 on the Edwardsville Campus—an increase of 11.4 per cent over last year's winter term—and 37 students more than last fall.

Southern has a total of 3,719 Illinois Teacher Education scholarships this year on both campuses. At Carbondale 3,210 hold such scholarships—or one out of every four students. Next year the figure will be even larger with an increase of scholarships by some 800 on July 1.

Circle K at Southern

An SIU chapter of Circle K International, service organization for college men, received its charter recently. The college counterpart of Kiwanis clubs in the community, it has 10,000 members at 490 college campuses in the U.S. and Canada. Officers are Thomas F. Wunderlich, Harrisburg, president; John L. Tepley, Harrisburg, vice president; Roy M. Gulley, Benton, secretary; and William R. Turkington, Carbondale, treasurer.

Thompson Point Programming Board has "adopted" six-year-old P. T. Santhamma of Kerala, South India, through the Christian Children's Fund. The board provides $10 a month toward the little girl's care.

A fund drive has been conducted on the Carbondale Campus to establish a John F. Kennedy Living Memorial Scholarship. A number of student organizations have pledged money to the scholarship which was first suggested by Richard Virgin, East St. Louis. At Edwardsville Campus 219 students made the Dean's List for the fall quarter—50 more than last year.

Flight Notes from AF ROTC

Blue-eyed, blonde Kathy Jones of Joliet is 1964 Military Ball Queen. A junior biological science major, she was crowned at the gala ball February 1 in University Center Ballroom. Her court included Andrea Anderson, Belleville; Judy Foehler, Du Quoin; Nancy Pearce, Carbondale; and Marcia Walters, Forsyth.

Two new organizations have been formed in the ROTC—the Eagle Squadron for underclassmen interested in the Air Force or other military branch as a career after college, and Pershing Rifles, military drill fraternity which has 195 active units throughout the nation.

Not so entranced with the military were a score or more of students who picketed the President's Office to abolish compulsory ROTC at Southern.
