Executive Director  
Robert Odaniell '51

Field Representatives  
Jacob King '51  
Warren Stookey '50

Board of Directors
Bert Casper '25-2, '27, President
Maurice P. Clark '38, M.S. '53, President-Elect
Andrew H. Marcec '56, Vice President
Roger Spear '49, Vice President
Bill Hudgens '48, Treasurer
Jane Curry Dycus '57, M.A. '58, Secretary
Dr. Jack Barrow '49
William Bracy '49
John Lester Buford '24-2, '28
Richard A. Hunsaker '58
Jo Rushing Koeneman '54
Dr. Guy W. Lambert '33
Charles S. Mayfield '39
Everett E. Miller '39
Hilda Stein '22-2, '25
W. Stewart Williams '29
Walter B. Young, Jr., ex '47, Retiring President

On the Cover
This is the kind of action football fans may expect when the 1965 season opens September 18 with the Salukis playing host to State College of Iowa. In this 1964 photograph, four Salukis gang up on a North Texas runner in action from the Homecoming game. The three Salukis identifiable, Rudy Phillips (25), Bill Chmielewski (64), and Lewis Hines (72) all were seniors last year. Sports publicity director Fred Huff previews the '65 season on pages 16-17.

The Mail Bag

Note to '21 Class
Last week Quincy had the privilege of entertaining 34 beautiful girls—contestants in the Miss Illinois Pageant, Miss Adams County and Miss Southern Illinois University among them. Unfortunately, I was unable to attend any of the affairs—an accident at the beginning of a vacation trip, April 14, grounded me. I'm getting along fine and should be good-as-new before long.

The Alumni Day pictures in the last issue of the Southern Alumnus reminds me the "Twenty-omers" better start rubbing out the wrinkles and crow's feet as we have our 45th anniversary next spring.

Mrs. L. H. Sims  
(Lora Marten '21)

46 Lincoln Hill  
Quincy, Illinois
A Backward Glance...

Names and events which appeared in the campus news during the early fall of 1960, 1955, 1940, and 1915.

Five Years Ago

The Jackson County Alumni Club is sponsoring a smorgasbord at the Carbondale Elks Club before each home football game this season. Alumni and guests are invited. A bus will transport fans to and from the game to minimize parking problems. . . .Fred Huff, sports editor of the DuQuoin Evening Call, is the new sports publicity director at SIU. He replaces William J. (Bill) Young '55, who has become sports publicity director for the University of Wyoming.

Music for the Homecoming Dance, to be held October 22, will be provided by the Skitch Henderson orchestra. . . .At the annual convention of the American Alumni Council, held in Washington, D.C., the Southern Alumnas received an honorable mention for excellent appearance. . . .The 1960 Elijah Parish Lovejoy award for courage in journalism has been awarded to Hazel Brannon Smith, editor of the Lexington Advertiser in Mississippi, by the International Conference of Weekly Newspaper Editors at SIU.

Ten Years Ago

Al Kawal, Chicago native and Northwestern graduate, is the new head football coach at SIU. He came to Southern from Temple University. He succeeds Bill O'Brien, who was granted a sabbatical leave to work on his doctorate at Indiana University. . . .Some 1,800 freshmen are expected to enroll at Southern later this month, the largest freshman class in the history of SIU. . . .Ralph Flanagan will be the featured orchestra leader for Homecoming, scheduled November 5. The Salukis play Washington University.

Two additions have been announced for the Alumni Office staff. Jacob W. King '51 will serve as field representative, and Mildred Caviness, a graduate of DePauw University, has replaced Mrs. Robert A. Wiggs (Betty Bowen '46) as editor of the Southern Alumnas. Mrs. Wiggs has joined her husband, who is doing graduate work at Iowa.

25 Years Ago

New Southern Alumni Association officers are Paul B. Chance '23, Salem, president; Mrs. Ella Pickles Sanders '05, Anna, vice president; and Mrs. Alice Di Giovanna '32, Carbondale, secretary. . . .Anthony Hall, the girls' dormitory, has been allotted $15,000 for redecoration and new furnishings. The committee on decorations is composed of Burnett Shryock, art instructor; Miss Sara Baker, former head of Anthony; and Miss Julia Minnette Barber, present director of Anthony Hall. . . .A campus beautification program now in progress will include reconstruction of the old fountain east of the Main Building and the cleaning and deepening of Lake Ridgeway.

50 Years Ago

What promises to be one of the strongest football teams in Southern Normal history has begun practice for the 1915 season. Outstanding performances are expected from Frank Hays, Jesse Feller, Edward Parker, Ralph Hamilton, Elbert Harriss, Leland Fuller, Harry Warner, John Harriss, Sydney Parker, Ralph Lingenfelter, LaRue Lawbaugh, Fred Boswell, and John Lee.
New Commission at Work

The University's new student-faculty Commission to Study the Role of the University in Society and the Role and Participation of Students in University Affairs will actively seek the views of all interested people on the SIU campuses, Chairman Claude Coleman announced.

The Commission held its initial meeting in July and has been meeting about every two weeks. Dr. Coleman, professor of English and director of the Plan "A" Curriculum, said after the first meeting, "We want students, faculty, and administrators to come and see us—any of the commission members. I'm going to be in the President's office to meet with those who want to talk, and if this doesn't bring results we'll issue specific invitations."

Dr. Coleman said he thought some of the commission members were surprised to learn of the extent to which President Delyte W. Morris has called upon students for their opinions in the past. As a specific example, he said, Dr. Morris outlined at the first Commission meeting the way in which he and other University officials had met with students in planning residence halls.

Members of the commission, nominated by the Graduate Council, the Faculty Council, and the Student Council, represent both the Carbondale and Edwardsville campuses.

Dr. Coleman, who was the recipient of the Alumni Association's Great Teacher Award in June, attended a three-day institute on "Order and Freedom on the Campus" at Berkeley, Calif., in July. The purpose of the institute was to study means of improving communications among all parts of a university—faculty, administration, and students.

Show Wagon Built for Area

A gay show wagon, the first of a projected calvacade of wagons, has been built by the Department of Recreation and Outdoor Education in cooperation with the Carbondale Park District.

The show wagon and the calvacade are the idea of William Ridinger, associate professor of Recreation and Outdoor Education. Others planned are a combination puppet and marionette wagon, a crafts wagon, and a science wagon.

The first wagon, which can be used for concerts, plays, talent shows, style shows, and other events, is available to Southern Illinois area cities.

1965–66 Budget $52,021,200

Southern Illinois University will operate on an internal budget totaling $52,021,200 during the first half of the current biennium, an increase of $11,823,000 over the budget for the 1964–65 fiscal year.

The University's anticipated operating income for the year includes $37,015,000 from legislative appropriation and tuition charges; $6,879,200 from operation of auxiliary enterprises, such as residence halls; and $8,127,000 in restricted accounts, including $661,000 in student activities fees.

In presenting the 1965–66 budget to the Board of Trustees at a meeting in August, President Delyte W. Morris noted that only moderate salary increases were possible and that they had been recommended on a merit basis after careful evaluation of the work of individuals.
"A major portion of the additional personal services funds budgeted for the year is to provide for continued enrollment increases," Dr. Morris said.

Personal services account for 76 per cent of the state-appropriated funds.

Budget allocations for 1965-66, as approved by the Board, include:

Educational and General Expenses, $43,487,284; Auxiliary Enterprises, $6,888,410; Permanent Improvements, $300,000; Refunds, $154,000; University Student Activities, $661,000; and Student Aid (scholarships, grants, fees, and fellowships), $539,716.

Trustees Name Chairman

Kenneth L. Davis '36, Harrisburg, will serve as chairman of the SIU Board of Trustees until a new chairman is elected in January.

Formerly vice president of the Board, he replaces John Page Wham, ex '28, former chairman who was not re-named to the Board by Gov. Otto Kerner.

The Governor appointed F. Guy Hitt, Benton banker, to the Board to replace Mr. Wham.

Land Transactions Approved

Two unusual land transactions involving Southern Illinois University and the Federal government were approved by the University Board of Trustees at a meeting in August. Both concern the site of the University's Vocational Technical Institute east of Carbondale.

Originally part of the World War II Ordill Ordinance grounds, the 138 acres occupied by the University were deeded to SIU by the government last February 5. The quitclaim deed from the Department of Health, Education, and Welfare, however, contained certain restrictions concerning use.

Now the U.S. Forest Research Center, a Federal agency, wishes to construct an experimental building on the land to test and demonstrate uses for native hardwood lumber.

The University, meanwhile, wishes to contract for construction of residence halls on the VTI campus. Each transaction requires legal paper work.

In the first instance, the Board of Trustees voted to lease one-eighth of an acre to the U.S. Forest Service on which to construct the experimental "A" frame building next to the Wood Products Pilot Plant.

In the second instance, the Trustees voted to buy, at the assessed valuation of $500 per acre, the 2.52 acres desired for residence hall construction. This would eliminate the stipulations concerning use contained in the quitclaim deed.

The University is negotiating a cooperative construction agreement whereby the completed buildings would be leased through the SIU Foundation to the University and operated by the SIU Housing Office the same as other campus housing units.

Graduate Dean Named

William E. Simeone, professor of English and a member of the University faculty since 1950, has been named dean of the Graduate School at SIU.

He replaces David T. Kenney '47, M.S. '48, associate professor of government and acting dean for the past year. Dr. Kenney will return to his former teaching duties.

Dr. Simeone, a Wisconsin native, has served on many University committees and was chairman of the Graduate Council. He held a Guggenheim Fellowship in 1959-60 to study 19th and 20th century folklorists in Italy.

The new dean received his doctoral degree from the University of Pennsylvania. He is author of Anatomy of A Legend, Essays on Robin Hood. His specialization is folklore.

Computer Aids Heart Study

By simulating the operation of the human heart and circulatory system on an electronic computer, medical science can gain in minutes information which otherwise would take years to gather, according to indications of an engineering study at SIU.

First developing an electrical circuit equivalent to heart action, SIU engineers then simulated the circuit on an analog computer. The computer in turn was found to produce electro-cardiogram waveforms "satisfyingly similar" to actual heart measurements.

It also was found that the computer could simulate transfusion of blood into the system and various physical deficiencies such as inefficient heart valves, hemorrhage, or leak.

The SIU study was revealed in a master's degree thesis written by Charles A. Rawlings, who in June received the first graduate degree in engineering ever given by the University. A Paducah, Ky., native, Mr. Rawlings received a bachelor's degree in electrical engineering at the University of Illinois before coming to SIU for his graduate work.

Working with him on the study, in addition to a number of School of Technology faculty members, was Dr. J. P. Gibney, a Carbondale physician.

Mr. Rawlings also conferred by telephone with H. R. Warner, director of the cardiovascular laboratory at the Latter Day Saints Hospital in Salt Lake City, Utah, and chairman of the bioengineering department at the University of Utah.

SEPTEMBER, 1965
Alumni campers at Little Grassy Lake usually have only one complaint—the week slips by too quickly.

A family just needs more than a week to swim, sun, sail, fish, practice archery and crafts, shoot skeet, eat three hearty meals a day, and still work in those siestas which headed the list of vacation musts before the whole thing began.

But mostly the Alumni Camp experience is fine; in fact, several families haven’t missed camping at Little Grassy since the program began eight years ago. Many stay for two weeks in order to take advantage of all that is offered.

One of the beauties of the camp is that parents may participate in camp activities, assured that their children are in the capable hands of trained counselors, some of whom are SIU students gaining practical experience as they study for careers in recreation and outdoor education.

Meanwhile, the kids are playing harder, eating more, and sleeping sounder than they ever did back home. Just the sight of tanned children, rosy-cheeked and healthy, convinces mother and father that the vacation idea was a good one.

The Alumni Family Vacation Camping Program is open to all members of the Alumni Association, including members of the faculty and staff. For an inexpensive vacation week (guaranteed to be all too short) it can’t be beaten.

Tom Sill '57, Carbondale, joins his wife (Susan A. Crews, VTI ’58) after a swim in Little Grassy Lake. Son Jeffrey, 5, was hard at play with his own group.
A feature of each camp week is steak night, held on Wednesday. Children go “overseas” to an island for their own cookout.

Alumni Camp is a child’s paradise. Here (top, 1 to r) are four future alumni: Wendy Proctor, daughter of Mr. and Mrs. Perry Proctor ’51 (Mary Ann Johnston ’50), Normal; Laura Keefe, daughter of Mr. and Mrs. Harvard Keefe ’57, Peoria; Jane Baysinger, daughter of Dr. and Mrs. Robert Baysinger, ex ’49, (Pat Rose ’48), Carbondale; and Steve Kamm, grandson of Mrs. Elizabeth Lewis ’32, Carbondale.

Counselors Peg Pavolish, Nashville, and Joyce Bullard, Mt. Vernon, demonstrate archery techniques for children.

This is the Play Pen where the smaller youngsters are cared for. Counselor Leon Peacock, Mt. Vernon, holds Douglas Larson, 2, son of Mr. and Mrs. Karl H. Larson, ex ’52, (Gale Brown Larson ’52), as Keith and Troy Large play. They are the sons of Mr. and Mrs. Jack Large ’60 (Billie Lou Ryan, ex ’60), Carbondale. Keith is 4. Troy is 3.

Little Grassy maintains a stable of horses for the enjoyment of adults and children.

Jane Nast, 3, daughter of Capt. and Mrs. Wayne Nast ’54, Indianapolis, Ind., builds a sand castle with the help of counselor Karen Maline, Mt. Vernon.
Alumni Camp (continued)

The Crafts Shack is popular with both children and adults. A variety of crafts are made, with the guidance of expert craftsmen.

A faculty member leads the popular weekly discussion group. English Prof. Claude Coleman led a lively exchange of ideas with (clockwise) Oliver A. Kueker '52, Champaign; Tom Berger '51, Belleville; Bob Carmody '50, Springfield; Hubert Loftus '50, Addison; Ken Medley '47, Arlington, Va.; and Dick Gruny, Carbondale, SIU legal counsel.

Hamsters are nice pets, according to (1 to r) Suzette Keefe, daughter of Mr. and Mrs. Harvard Keefe, '57, Peoria, and Kelly and Marty Berger, children of the Tom Bergers.

Worse thing about Alumni Camp is having to leave. Mr. and Mrs. Tom Berger '51 (Mildred Lee Martindale '50), Belleville, attach camp trailer to car as they prepare to depart. Mr. and Mrs. Ken Medley '47, Arlington, Va., and son Rick, 16, take down their tent on their final day in camp.
You men know such a very great deal more about my subject than I do that I would be worse than stupid to go into the history of fishing seriously. In fact to go into the history of anything seriously is exactly what I propose not to do. Only one phase of the history of fishing interests me. When the first man pulled the first fish out of the first stream, was he fishing because he wanted something to eat or just for the hell of it? I have an idea that primitive men fished for some thousands of years before it occurred to some half-witted ancestor of ours that he was having fun. This really bugs me. I would like to be wrong about this. Is fishing an industry or a sport?

Well, of course, it could be both. When we think of the fishing industries that have sent their ships to the most remote spots in the wide oceans, we know that thousands of men have regarded it as the most toilsome and hazardous sort of business. In the
great American classics of fishing, *Moby Dick* and *The Old Man and the Sea*, there is not the remotest suggestion that anyone enjoys fishing. In Hemingway’s *The Sun Also Rises*, you find a truly wonderful trout fishing episode, but the fishing hardly does more than furnish a background for some of the best conversational give-and-take in the world’s literature.

In some of Hemingway’s Nick Adams stories about the big Two-Hearted river, you also find some good fish stories; but the really excellent fish stories do not bulk large in the world’s writing. I do not know what you think of Izaak Walton’s *Compleat Angler*, but apparently Izaak himself enjoyed sitting by the fireside and dreaming about fishing more than he did the real thing. Old Izaak had too much basic integrity to brag about his catches. There is not a fish more than eight inches long in the entire book. Like most fishermen, he could talk learnedly about the proper clothes to wear, the kind of bait to use, and the best places along the stream in which to cast, but he didn’t catch much of anything. And when he did manage to hook on to something, he could bore you for three pages about the identification of the species. Sometimes he is a bigger bore than the guy who spends seven minutes on the re-playing of a bridge hand.

Come to think of it, Old Izaak was only the first of a long line of compulsive talkers who have gone fishing. He did not develop the art of lying to its present status, but he encouraged other windbags to string out the stories of their adventures from one season to the next, and lying was sure to follow.

As Sir Francis Bacon says, “The mixture of a lie doth ever add pleasure,” and no one has done a better job of mixing a lot of lies with a little bit of truth than the fisherman. I know, and you know, college professors and scientists and men in industrial research who are so pernickety and meticulous on the job that they bog down over a god-damned comma, and spend two weeks trying to measure the difference between tweedle-dum and tweedle-dee, men who are so painfully accurate that they triple check every experiment and then in writing up their report will dare only to say, “It would seem,” or “It appears to be so,” or “On the basis of what we have discovered so far,” carefully hedging and qualifying every statement. And you know and I know some of these same men who will come back from fishing trips with the most fantastic and fabulous yarns about the fish they caught, the sparkling little hidden tributaries of streams far up north where no white man has ever been before where the virgin fish—that is, virgin in the sense of never having been flirited with by fishermen—fairly yearn to be caught.

Somehow, without intending to, I have reminded myself of a story that has nothing whatever to do with fishing. You will remember the story as an old one but it has a new twist. A sweet old lady was subpoenaed by the House Committee on Un-American Activities and asked if she was or was not a Communist. “Of course I’m not a Communist,” she said, “and the only reason you ask is that I lived for several years in Russia. I lived in Germany a long time, too. Why don’t you ask me if I am a Nazi? For that matter,” she went on, smiling a little as if she remembered something, “I lived for several years in the Virgin Islands.”

For some reason or other this one reminds me of the bride who stood before the shelves of canned fish at the grocery store. She picked up a can of tuna and gazed at it thoughtfully, “I can’t understand it,” she said. “I’ve been giving him tuna every night, and he still wants to go fishing.”

Well, a bride whose husband wants to go fishing has arrived at the critical point in their marital experience. She can now make one of a number of decisions, all of which will be wrong. On the premise that he will be a happy contented husband only if he is allowed to go fishing whenever he feels like it, she may give him her blessing and let him go, only to discover in the course of time that she plays second fiddle to a fish, a fish that may be expensive if the old man buys a tenth of the equipment that the fishing enthusiast likes to have. If she puts her foot down and says “No fishing” and makes a big issue of it, she will find out that she has married a mouse instead of a man; and you all know how women regard mice. She may invite herself to go with him, and this creates its own special problems. Although I know one couple that goes fishing happily together, I know several others that struck snags on the way. The gal had better not catch the biggest nor the most fish. She must learn to manage her own equipment. She must not be the first to suggest going in. She had better be prepared for mosquitoes, heat, dampness, sudden cold blasts from the north, and robust language. Also important, as she will quickly find out, other men’s wives will make nasty, disparaging remarks.

Perhaps a wise lady under these circumstances will not make any
drastic decisions. She says on one occasion, "Go ahead without me, dear. I prefer to stay home and mow the lawn." Another time she says, "May I tag along?" Occasionally she may veto the fishing expedition in favor of an evening at the opera. But not very often. Say once about every twenty years. The wise gal, I suspect, knows that she will have to share her husband with a lot of other enthusiasms, and so long as one of his enthusiasms is not a long-legged, blue-eyed blonde, she will be content and relatively happy.

There is a philosophical problem but I barely have the courage to mention it. For my part, I question the intelligence of a man who will go forth intrepidly into fickle spring weather to blister his hands with the oars rowing a boat across or around a lake or stand ass deep in the muck along a lake shore or sit in a kind of stupor all day along the bank of a polluted creek, knowing all the time that the proverbial fisherman's luck—a wet ass and a six-ounce bass—is all he has any reason to expect. Only an incurable romantic will spend the thousands of dollars necessary to equip himself for a trip to some far Northern river where he may—and then again may not—find big fish a-plenty.

Have you ever noticed that the good fishing is "about a hundred miles north of here?" Ask just about any native at any crossroads in the United States where you can find some good fishing, and every time he will tell you about a place a hundred miles north where the fish are real eager. I have tried out this question in Raton, N.M.; Stevens Point, Wis.; Fort Dodge, Iowa; and Mullan Pass, Idaho, with identical results.

You know also that if you keep going until at long last you find a fisherman's paradise, a lake or stream alive with bass or trout or muskie, that the weather will be wrong, either too damned hot or too damned cold or both. The air pressure will be wrong, either too high or too low, but whichever it is, the fish will not be biting.

I have an idea that there is a stream that runs into Hudson's Bay in Northern Ontario that is literally crowded with fish, and that if you should happen to arrive there on July the eighteenth and if you get down to the real serious business of fishing about six o'clock in the morning and if you happen to bring along the right lures or the right bait and if the Eskimos or the Indians had not been there the day before, that for 30 minutes or so before the sun gets too high, you may have some honest-to-God spectacular fishing, provided of course that you do not have a hangover that morning and oversleep.

The other way to enjoy fishing is the Izaak Walton way. Take along minimum equipment—a bent pin and a can of worms—keep a sharp eye out for hillsides covered with daffodils, violets by mossy stones half hidden from the eye, blue birds, chickadees, and nuthatches—and I'll bet half of you do not know a nut-hatch from a scarlet teen-ager—pause frequently for deep breaths of clean air, find a fairly dry place on the bank of a stream, bait your hook, stick your pole down more or less firmly in the mud, fill your pipe and light it, smoke a while, lie down in the dry grass and take a nap, and wake up after a while for sandwiches and a thermos of hot coffee. If you are the kind of person who enjoys reading, you can spend a couple of hours pleasantly reading Richmond Lattimore's translation of Homer's Iliad. And, oh, yes!! just before sun-down glance casually at your pole. If it is bending and shaking, you may have hooked a fish or a turtle.

I hardly know who has done the most to destroy fishing in this country—you guys or the damned industrialists. I live about a half mile from the Big Muddy and I have to say it is about as near nothing as any river I ever saw. It probably never amounted to much, but in these latter days it carries the pollutions of factories and homes, most of the trees are gone from its banks, it carries a quick runoff after a heavy rain and practically dries up every August. Even so, the Big Muddy is better off than the Embarrass or the Little Wabash, both of which used to be right bright little rivers—or so I remember them as a lad. So it is all over the 48 states. Few streams remain free from the defilement of industry.

So now you guys come along and you propose to re-establish fishing for the people of this country. You propose to stock ponds and small lakes, to teach the farmers how to breed and feed fish, to make fish a staple and popular item in our diet. This is the last absolute goddam straw.

Last summer I visited a state park over in Missouri near Salem. I forgot the name of it. It was a beautiful place where a spring flowed from under a rock. A state hatchery there produced thousands and thousands of fish—trout, if I remember correctly—and every morning a dozen or more people came with licenses and permits and casting rods to fish downstream from the hatchery. And the experts counted the number who came to fish and carefully released five times that number of trout. And these poor tired people stood there hopefully, doing their carefully controlled fishing under the eyes of wardens.

This is what is known as a sport. It compares roughly with the intrepid hunter issuing forth to the farmer's pasture to shoot a calf that has been fattened for market.

Two fishing trips stand out in my memory. In December, 1956, after landing at Aukland in New Zealand, we took a bus trip on North Island. After visiting a Maori village and the thermal area on North Island, we ar-
Claude Coleman arrived at a village on the shore of Lake Taupo, a lake that I was told was 17 miles wide and 28 miles long. Four of us rented a motor launch and went fishing. I did not do any fishing myself, just went along to see the beauties of the rugged mountains and the blue water. One man pulled out a five-pound speckled trout. The scenic effects of summer clouds, distant mountains, and clear water gave me intense pleasure.

I once had a lot of fun fishing. Five of us went down to the Rio Grande in the Big Bend country of Texas. We put out trot lines and ran them four or five times a day. Several times the river rose five or six feet within thirty minutes and washed our lines away or buried them in the shifting sand bars. We happily dug them out or put out other lines. For four days we caught catfish and fried them and ate them along with hush-puppies with keen appetites. We played poker. We drank whiskey. We shot at targets with twenty-two's. We saw no one but ourselves. We had the grand back-drops of mountains, the majestic effects of fast growing cumulus clouds, spectacular beauties of cactus, century plants, and ocotillo. All this was 18 years ago. It remains as one of the bright spots in my memory, and I wish every living person might have this experience of limitless space, of limitless freedom, of quiet peace. If you want to do some-

thing for people besides filling their bellies, I suggest you try to bring back to America the kind of fishing that fills men's souls.

Directors Name Ten Committees

The Alumni Association Board of Directors named the following committees to carry out the program of the Association for the year ending June 30, 1966:

Athletics—Roger Spear '48 (chairman), Dr. Guy W. Lambert '33, and W. Stewart Williams '29.

Clubs and Workshops—Richard A. Hunsaker '58 (chairman), Everett E. Miller '39, and Walter B. Young, Jr., ex '47.

Constitution and By-Laws—J. Lester Buford '24–2, '28, (chairman) and Charles Mayfield '39.

Family Camping—Mrs. Jane Curry Dycus '57, M.A. '58, (chairman), Miss Hilda Stein '22–2, '25, and Andrew Marcec '56.

Finance—Bill D. Hudgens '48 (chairman) and William T. Bracy '49.

Awards—Mr. Bracy (chairman), Mrs. Dycus, and Dr. Jack Barrow '49.

Continuing Education—Mr. Miller (chairman), Maurice Clark '38, M.S. '53, Mr. Buford, and Dr. Cameron Meredith, director of the State and National Public Services Division.

Homecoming and Alumni Day—Mr. Clark (chairman), Dr. Barrow, Mr. Bracy, Mrs. Jo Rushing Koeneman '54, and Mr. Young.

Membership Retention—Mr. Williams (chairman), Mr. Hunsaker, and Mr. Mayfield.

Public Information—Miss Stein (chairman), Mrs. Koeneman, Dr. Lambert, and Dr. Meredith.

The Executive Committee includes Bert Casper '25–2, '27, president; Mr. Clark, president-elect; Mr. Spear, vice president; Mr. Marcec, vice president; and Mr. Hudgens, treasurer.

Alum is United's First Negro Pilot

William Norwood '59, former Saluki quarterback who holds the record for the longest pass play in Southern history, is the second Negro to become a pilot on a major airline.

He graduated recently from the United Air Lines pilot training school in Denver, Colo., and will be stationed in Chicago.

A native of Centralia, the 28-year-old pilot is an Air Force veteran and former jet bomber pilot.

The first Negro quarterback for an SIU team, Norwood threw a pass that resulted in a 67-yard scoring play, the second longest pass play in the Saluki history.

He and Mrs. Norwood (Molly Cross Norwood '61) have two children.

He received a bachelor's degree in chemistry and won his commission through the Air Force ROTC program at SIU. Mrs. Norwood received a degree in education.

ALUMNI CALENDAR

SEPTEMBER 10 Jackson County Fish Fry; City Park, Carbondale; dinner 5:30 P.M.
12 Chicago Area SIU Picnic; Bemis Woods, Chicago; luncheon 1 P.M.
12 Springfield Reception; Illinois Education Building; alumni, current students, and incoming freshmen invited; 2 to 5 P.M.
19 Springfield Area SIU Picnic; Douglas Park, Springfield; dinner 5 P.M.

OCTOBER 9 Club Officers Workshop
30 Homecoming

SOUTHERN ALUMNUS
In 1869 the 2,000 residents of Carbondale voted to sell $100,000 worth of general obligation bonds in order to attract Southern Illinois Normal University to their community. This cash offer plus a $50,000 bond issue by Jackson County, and a donation of land by a local citizen valued at $75,000, and the excellent transportation facilities provided by the Illinois Central Railroad proved sufficient to persuade the site selection committee that Carbondale was the best choice among many competing towns in Southern Illinois.

The Carbondale newspaper, which at that time was called the New Era, was one of the prime movers in the effort to attract the University. As a part of the supporting arguments the New Era asserted editorially that, "Carbondale has never had a drinking saloon, doggery, billiard room or place of dissipation or idle resort within its limits and is absolutely free from these temptations to vice and idleness." Whether this claim influenced the selection committee's decision is unknown.

From this auspicious beginning, Carbondale over the years became so closely linked to the activities of SINU that people all over Southern Illinois referred to the University as "The Carbondale College" or "Carbondale Normal." Although now widely known as SIU or "Southern," many Carbondale residents to this day refer to it simply as "the school."

For the first 80 years of its existence, SINU was a comfortable, con-
Carbondale's economy is supported by Southern Illinois University

Convenient and prestigious asset to the people of Carbondale but not a major factor in its economy or growth. Until about 1950 the Illinois Central Railroad was the economic backbone of the community. As the post-war decline in railroad employment set in and simultaneously the University began to expand from a teachers college to a full-fledged institution of higher learning, the economic base of the city shifted profoundly and rapidly.

The Carbondale Comprehensive City Plan Report issued in 1962 analyzes it this way:

"Carbondale’s economy is supported by Southern Illinois University. The spectacular growth of the University during recent years has increased job opportunities at the school itself and also in community services which, to a great degree, depend directly, or indirectly, upon the University for their livelihood.

"The railroad still provides some employment, but only to a small degree. The influence of the existing manufacturing industries in the city or within the region upon the economic base is relatively minor."

Between 1950 and 1964, University enrollment climbed from 3,086 to 13,847 and the city's total population grew from 10,921 to 18,500. About 50 per cent of the city’s headcount includes students residing within the city limits. Another 25 per cent of the students live on campus immediately outside of the City limits and may be considered as part of the City’s population as far as many services and facilities are concerned.

On its Carbondale campus, the University employs over 2,700 faculty, staff, and civil service workers. A large percentage of these employees live in or near the City of Carbondale. They participate in and contribute to all aspects of the community’s life: economic, social, political, religious, educational, recreational, and civic. In fact, the impact of University-connected citizens is apparent in all major local organizations, both public and private. Many of these citizens are high ranking officers in community organizations.

University alumni are also among the most influential and dedicated leaders in all phases of community life. Although alumni rarely feel called upon to represent the University’s interests or viewpoint, there is obviously a special feeling of loyalty and a strong desire to overcome any potential town-gown conflicts. Alumni represent probably the most effective channel for SIU-City communication and the best instrument for improved understanding and cooperation.

It is perhaps axiomatic that rapid growth has its agonies as well as its satisfactions for both institutions of higher learning and the communities in which they are located. While the University has been struggling to catch up with problems of staff, classroom space, housing, internal traffic, and recreation associated with a precipitously expanding student body, the City of Carbondale has had to deal with companion problems all down the line. The needs for water and sewer services have been continuously outstripping the supply in spite of repeated expansions. It is now estimated that the City must finance $4–5 million worth of water and sewer expansions within five years or face a severe crisis in overloaded lines and treatment facilities and inadequate sources of supply.

Construction of all types of private structures has been running at the rate of $6–8 million per year which is comparable to rates in cities of 100,000 population. A modern zoning

Thomas Easterly, ex '40, (left), Carbondale's building and zoning administrator, discusses the extension of water lines with Eldon Gosnell, consulting engineer. Mr. Easterly and his staff are responsible for inspecting $6–8 million in construction in Carbondale each year. Growth of Southern Illinois University is responsible for the city's construction boom.
ordinance, subdivision regulations, and building and housing codes have been adopted by the City Council and are being enforced by the City Plan Commission and the Office of the Building and Zoning Administrator. However, the flood of construction has been so heavy that enforcement personnel are barely able to manage the necessary inspections.

Traffic volumes have far exceeded past projections made by traffic consultants. The major downtown intersections of Main Street and University and Illinois Avenues are now carrying over 20,000 vehicles per day. Very little of this is through traffic. Over 90 per cent is generated within the community.

Many neighborhood streets are now carrying volumes of traffic which match those of Main Street 15 years ago. It is painfully clear to City officials as well as residents that the width and quality of most of these streets is completely inadequate for the traffic loads they are bearing.

The citizens of Carbondale recently voted to bond themselves for $1,400,000 for street construction. This work, which is expected to begin in November, 1965, will result in the widening and reconstruction of four miles of major City streets. The Division of Highways has estimated that another five to six million dollars worth of construction are needed to create an internal thoroughfare system adequate to meet projected traffic volumes. A major obstacle, of course, is the realization of plans for improved internal traffic flow, both in the City and on the Campus, is the location of the Illinois Central Railroad in the core area.

At the same election in which the bonds were approved for street improvements, the voters gave assent to another $3 million in bonds for expansion of elementary and secondary schools and the expansion and development of parks and recreation areas.

Major new subdivisions created to meet the housing demands of new residents have generated additional problems of storm drainage and street maintenance which must ultimately be solved by the City government. Expansion in all directions from the former City limits has proceeded now to the point where the flood plains of several major creeks are being impinged upon. Demands are now being heard for the City to impose flood plain zoning or some other type of control to prevent construction which would reduce the capacities of these channels to carry storm runoff water.

This catalog of the difficulties fostered by rapid growth could be strung out almost indefinitely. It should be noted, however, that the growth which is taking place is also a source of considerable pride and satisfaction to the people of the community. More significantly, the problems of growth have been instrumental in bringing the University and the City into much closer and stronger working relationships.

The City and the University have been sharing the costs of studies and

The University and Carbondale shared the cost of this modern water storage tank. It serves the southwest area of the city.

physical improvements which are of mutual concern. These include city planning and zoning studies, the reconstruction and widening of Mill Street bordering the Campus, the expansion of water storage facilities, and studies to determine ways and means of relocating the railroad tracks away from the center of town and the campus.

Effective working relationships have been fashioned on a day-to-day basis between the City’s Police Department and the University’s Security Office. Maintaining order and law enforcement have become substantial tasks which require a high degree of coordination not only in the apprehension of violators but also in the judicial and disciplinary functions of the City and the University.

The City’s building code and zoning enforcement activities are also aided by the University’s housing officials, who are endeavoring to upgrade the standards of student housing.

A cooperative program with particularly important implications for future City and Campus development is the urban renewal effort being sponsored by the City’s Community Conservation Board, with Federal financial assistance. Planning for the first project on the border of the Campus is now well advanced. Through this project the City will purchase, clear, and sell 10 acres of land to the University for Campus development. Implementation of this project and future projects now in the planning stage will enable the City to qualify for over $12 million in Federal grants for projects wherever they may be needed in the City. These credits are derived from a provision in the Federal law which allows land acquisition expenditures by universities in or near urban renewal projects to be used for matching purposes to meet the local share of project costs.

Urban renewal funds will make it possible to replan and rebuild areas

SOUTHERN ALUMNUS
Flashing railroad signals halt traffic several times a day in the core area of City and University. Relocation of the Illinois Central tracks is a joint project for University and City.

of the City bordering on the Campus and to rebuild or rehabilitate areas of dilapidated housing in other parts of the City. It is also likely that urban renewal assistance can be used in the joint City-University effort to relocate the railroad.

Perhaps the high-water mark of the stronger and closer relations which have been evolving between the University and the City was the successful effort recently made by a team of City officials and Chamber of Commerce leaders to persuade Governor Kerner to restore cuts which had been made in the University’s capital improvements appropriations. This group of men, entirely on their own initiative, visited the Governor personally to plead for a restoration on the grounds that the community as well as the University would be adversely affected by the cuts.

A realistic assessment of SIU-Carbondale relations should certainly reflect a positive and optimistic viewpoint, as this article attempts to do. It would be dishonest, however, to pretend that stresses and strains do not exist or are unimportant. Differences of opinion between the University and the community have been very sharp on issues vitally affecting both. Questions of Campus expansion, zoning, and annexation of University property to the City, to name a few, have given rise to bitterness and disappointment in the past and may do so in the future. There is a legacy of mutual suspicion and distrust from the early years of rapid growth which has been greatly diminished although it has not been entirely dispelled.

Both President Delyte W. Morris and Mayor D. Blaney Miller have been instrumental in changing University-City relations to its present positive and improving climate. Their own feelings about the present state of affairs and the prospects for the future were expressed in recent interviews. President Morris said:

“I am very pleased and encouraged by the progress we have been making toward harmonious and effective relations with the community of Carbondale as a result of persistent efforts, patience, and good will on all sides. I believe that we have established the mechanisms necessary to maintain continuous communications and foster deeper understanding. As we become more proficient in the use of these mechanisms, University-City relations will inevitably grow stronger.”

Mayor Miller put it this way:

“I feel that the City and the University have learned the art of compromise in dealing with each other. Our mutual interests are far more important than disagreements about particular problems. We are intensely proud of the growth and the position of leadership in Southern Illinois which the University has brought to the City of Carbondale.”

In closing, it may be observed that building strong, effective relations between any two large human organizations with somewhat divergent interests is a complex and difficult task. It takes time and experience, as well as the good will which is prerequisite, to acquire the insights, understandings, and human relations skills which are essential.

In this regard I believe that the University, the City government, and other civic organizations and leaders can take pride in the progress which has been made in a relatively short period of time. There is, of course, much room for improvement, but the tide is running strongly in favor of continued progress. It is safe to say that, disagreements and complaints to the contrary notwithstanding, the people of Carbondale in 1965 would still vote whatever size bond issue might be needed to attract or keep SIU in its present location.

Frank A. Kirk is coordinator in the office of President Delyte W. Morris and is commissioner of streets and public improvements on the Carbondale City Council. He formerly served as regional director of the Board of Economic Development.

Widening of narrow Mill Street, one of the main traffic arteries in the University area, is another cooperative venture for the City and University.
A sophomore-dominated squad, sprinkled with a few veteran holdovers from last year's 2-8 club, will represent SIU on the football front this season as Coach Don Shroyer begins his second campaign here.

With a rebuilding program already well along the way, varsity untested sophomores will receive an early baptism of fire this season when the Salukis host powerful Tulsa and meet a rugged Wichita State team on the road. Eight other opponents complete the schedule.

The Tulsa tussle will be the featured event of Southern's Homecoming activities and despite the fact the Hurricanes were complete masters in a battle with Shroyer's forces last year, the former St. Louis Football Cardinal assistant hopes to make a contest of it this year.

"We have a lot of uncertainties," Shroyer said. "You're bound to have a few when you're relying on so many sophomores. But I'm sure of one thing...these kids showed us they could—and would—hit in spring drills and we just may be able to fool a few folks this season."

Heading the 48-player squad when it returned to campus September 1 for pre-season drills was quarterback Jim Hart. The 6-2, 195-pound Morton Grove, Ill., product owns every passing record in SIU's record book now and could be a major factor in how far back up the ladder the Salukis will be able to climb this season.

Certain of being a pro draft choice, Hart in two seasons of varsity ball has thrown for 27 touchdowns, a
staggering total when one recalls the former SIU career record was just seven. Hart has also accounted for 2,635 yards gained while connecting on 183 of 419 attempts.

The former Proviso West all-around sports star will be without his four favorite targets of last season, however, as Tom Massey, Bonnie Shelton, Rich Weber, and Rudy Phillips have all departed.

Filling their spots will be sophomores up from last year’s 4-1 freshmen team which was generally considered as being the best in Southern’s history.

John Ference, Parma Heights, Ohio, and Bill Blanchard, Olympia Fields, Ill., are a step ahead of other end candidates although Bill Hohs, Skokie, Ill., is a fine receiver. Hart may also direct more of his aerials to halfbacks this season as newcomers Hill Williams, Laurel, Miss., Eddie Richards, Memphis, Tenn., Arnold Kee, Wheaton, Ill., and Norm Johnson, Philadelphia, Pa., all rank as capable pass receivers.

Despite Hart’s presence, however, the Salukis may attempt to better establish a running game this season as Shroyer is particularly proud of his big front line and hopes the club will be able to capitalize on it.

Williams indicated in spring ball that he may be Southern’s best running back since the days of Amos Bullocks. Although he still has a number of things yet to learn, Williams has speed and power and seemingly thrives on body contact.

Richards also could be of help, with speed his chief asset. While Monty Riffer, Vandergrift, Pa., is the top-ranking rushing back returning from 1964, he may be switched to a defensive position providing Shroyer and his aides can come up with a suitable replacement at fullback. Candidates are Rich Hopper, Park Forest, Ill., and Rich Busch, Villa Park, Ill. The former showed well a year ago as a frosh and may be able to free Riffer for exclusive defensive work.

It’s from tackle-to-tackle, however, that Shroyer enjoys talking about.

Isaac Brigham, 6-3, 230-pounder from Chipley, Fla., ranks as top returning tackle with Al Jenkins, a 6-3, 270-pounder from New Orleans, La., the number one newcomer. But both have strong competition from within the ranks.

A pair of Memphis, Tenn., products, Lewis Hines and Willie Wilkerson, are also returning tackle lettermen while Ralph Galloway, East Aurora, and Ted Cunningham, Addison, are promising rookies.

Guard candidates are led by veteran Mitchell Krawczyk, Cleveland, Ohio, with Dave Cronin, Oak Park, Larry Wolfe, West Frankfort, and Vic Pantaleo, Chicago, providing excellent depth.

Newcomers will be forced to occupy the center spot, but Wolfe could switch to the position should Rich Hawkins, Park Forest, or Joe Ewan, Canton, be unable to handle the situation.

The Salukis open at home September 18 against State College of Iowa. Remainder of the schedule follows:

- September 25, at Louisville; October 2, at Youngstown, Ohio; October 9, Lincoln, here; October 16, Drake, here; October 23, at Wichita; October 30, Tulsa, here (Homecoming); November 6, Northern Michigan, here; November 13, at Ball State; November 20, Southwest Missouri State, here.

1910

Another book of poetry by Mrs. Lawrence M. Hilton (Mina Myrhine Allen, 2) has been published. Across a Kindling Continent is the second volume by Mrs. Hilton, who lives in Coblentz. Her first volume of poetry, entitled Wild Echoes Flying, was published in 1962.

1924

Mr. and Mrs. Harry J. Brinkman, 2, '40, (Rosa I. Fierce '32-2, '57) live in East Carondelet and he is principal of Columbia Community Unit School, Columbia. The Brinkmans have a son and a daughter.

1928

Ethel M. Farthing, 2, '52 is retired and lives in Salem.

Roye R. Bryant, 2, '30, director of the SIU Placement Service, is vice president of the National College Placement Council, which has membership throughout the United States and Canada. He joined Southern in 1948 and has been director of Placement Service since 1950. He has the doctoral degree from Washington University, St. Louis.

1937

Mr. and Mrs. Everett W. Ferrill (Mary Ruth Chapman '40) live in Muncie, Ind., and have two daughters.

1940

John F. Gaines, chairman of the Department of Geography at California State College, Los Angeles, has been promoted from associate professor to professor. He and Mrs. Gaines (Wilma Brown '41) live in Reseda.

Mr. and Mrs. Robert W. Lewis (Bertha Janice Hill, ex) live in Houston, Tex., where he is assistant chief chemist with Shell Oil Company.

Curtis W. Smith, Berkeley, Calif., has been named manager of research and development for Shell Chemical Company's industrial chemicals division in New York. He had been director of industrial chemicals research and development at Shell's Emeryville, Calif., division. He has been with Shell since 1943. He received the doctoral degree from the University of Illinois.

Philip E. Smith is associate dean of the University of Oklahoma School of Medicine. He received the master's degree from the University of Illinois and the doctoral degree from Johns Hopkins. He and his wife live in Oklahoma City and have four daughters.

1945

Hewey E. Tweedy has been named principal of Du Quoin High School. He formerly was principal at Newton. Mrs. Tweedy is the former Helen B. Craine '50.

1946

Richard Powers, ex, group superintendent of Central Illinois Public Service Company in Murphysboro, has been elected president of the Murphysboro Rotary Club.

A. E. Ramsey, ex, vice president of J and R Electric, Carbondale, has joined the staff of the Southern Illinois Power Cooperative near Marion. He also will continue in his position as Public Safety Commissioner for the City of Carbondale.

1948

Joseph C. Evers, for five years pastor of Epworth Church, Belleville, has been appointed pastor of St. Paul's Methodist Church, East St. Louis. At a recent session of the Southern Illinois Annual Conference of The Methodist Church, Dr. Evers, who received the doctoral degree from Asbury Theological Seminary, Boston University, won first place in the sermon contest sponsored by the Board of Christian Social
Concerns. The winning sermon was preached at Epworth Methodist Church on Race Relations Sunday 1965. The title of the sermon was "A Single New Humanity." Dr. and Mrs. Evers have three children.

David P. Richerson, Christopher, health officer of the Franklin-Williamson Bi-County Health Department, received the Award of Merit in the spring at a meeting of the Illinois Public Health Association in Chicago. The award was presented to him for outstanding contributions to the field of public health. He received the doctoral degree from Tulane University.

1949

William T. Bracy, Herrin, past president of the Alumni Association and a member of its board of directors, has been appointed to the SIU Foundation Board to replace his late father, Floyd Bracy, ex '16. He will serve until June, 1966.

Mrs. William Bracy (Dorothy Jean Hill, ex), Herrin, has opened a knitting shop in Herrin and plans to offer classes in knitting as well as knitting supplies.

Barnie Genisio, M.S. '52, has been named principal of Benton High School. He was assistant superintendent of schools in Franklin County for 10 years. From 1949 to 1955 he was coach and mathematics teacher in the Shawneetown schools. Mrs. Genisio is the former Virginia L. Brown ing, ex '45.

1950

James F. Cannon, M.S. '51, is assistant to the president of James Flett Organization, Inc., Chicago.

Loren Eddleman, M.S. '51, has resigned as superintendent of Dongola Unit School District 66 to become assistant county superintendent of schools in Union County. He taught for 15 years in Dongola and was superintendent for four years.

1951

William George Martin received the master's degree in electrical engineering from St. Louis University earlier this year.

Maj. Robert C. Williams has graduated from the Air Force Air Command and Staff College at Maxwell AFB, Ala. He has been assigned to Craig AFB, Ala.

BORN: To Mr. and Mrs. Denver M. Brewer, Steeleville, a son June 15 in Herrin.

1952

Navy Lt. Cmdr. Charles G. Tate, Harrisburg, has taken command of the subma-

rined USS Tirante at the U.S. Naval Station, Key West, Fla. He last was assigned to the headquarters staff of the 6th Naval District, Charleston, S.C. He and Mrs. Tate (Sharon Lee Watkins, ex '51) have a son, Gregory, 10.

BORN: To Mr. and Mrs. Duward Dee Bean (Lavina Phelps '51), Benton, a daughter June 16. Mr. Bean is agency manager of Country Mutual Insurance in Franklin County.

1953

Mr. and Mrs. Stewart B. Cochran (Marjorie King Sturm) live in San Diego, Calif., and she is a sixth grade teacher in the San Diego City Schools.

Burton J. Williams, M.A. '59, former assistant professor of history at Baker University, Baldwin, Kan., has been appointed to a similar position at the University of Cincinnati. He has the doctoral degree from the University of Kansas and is the author of several articles on Civil War and Western history. He and his wife have six children.

1954

Dean Barringer, M.S. '60, former coach at Shawnee and principal for the past two years, has been named unit superintendent at Egyptian, a consolidation of former Tamms and Thebes schools.

Mrs. Joyce Sturm Crouse, M.S., '58, Murphysboro, has been awarded the first Letitia Walsh doctoral fellowship in home economics at SIU. An instructor in the Department of Food and Nutrition at SIU, she is the wife of George T. Crouse '52, M.A. '57, and the mother of three children. The Walsh fellowship was established last winter by a $30,000 cash grant from Letitia Walsh, former visiting professor in the School of Home Economics.

1955

Capt. James R. Aiken is an electronic munitions system officer in a Pacific Air Forces unit responsible for helping train Vietnamese forces in air tactics and techniques for combat.

Robert Francis received the doctoral degree in law from Washington University, St. Louis, in June. He and Mrs. Francis (Jeanne Damron '55) live in Granite City and have a daughter, Anne.

John A. Hellmer, ex, Murphysboro, has joined the staff of the Robert Heins Insurance Agency, Murphysboro, as an associate. He formerly was with the Metropolitan Life Insurance Company, East St. Louis.

George J. Kuhn, M.S. '58, has been
named principal of Carbondale Community High School for 1965–66, replacing Harold O'Neil '58, M.S. '60, who has been named administrative assistant to the superintendent for one year. Mr. Kuhn will serve as principal of a second Carbondale high school now under construction east of the city.

Mrs. Thelma Mathis, M.A. '57, a member of the SIU Department of Art staff, has accepted a position teaching art during 1965–66 at Midwestern College, Denison, Iowa. She is a four-time winner in oil painting and drawing at the Du Quoin State Fair.

Robert Raymond Schmatz, M.S., has received the doctoral degree in education from Michigan State University.

Mr. and Mrs. Rex Steele, ex. (Betty Jean Cunningham '55) live in Albuquerque, N.M., and he is a staff associate in the manufacturing and development area of Sandia Corporation. The Steeles have two children.

1956

Lony D. McHaney is a claims adjuster for Country Mutual Insurance Company in Mt. Carmel. He and Mrs. McHaney have two sons and a daughter.

BORN: To Mr. and Mrs. Wilbert Bromley (Sue DeBaun Thomas), Cobden, a daughter June 18.

1957

Capt. Harold D. Casleton is a member of the Outstanding Strategic Missile Wing Crew of the Month in his Strategic Air Command (SAC) unit at Little Rock AFB, Ark.

Louis D. Cheli is a cartographer for Aeronautical Chart and Information Center in St. Louis. He and Mrs. Cheli have three sons and a daughter.

Capt. Thomas A. Baker recently was selected Outstanding Instructor Pilot of the Month in his Tactical Air Command unit at Luke AFB, Ariz.

Camille Becker, M.S., is associated with the executive branch of the European Economic Commission and has offices in Brussels, Belgium. He is president of the Benelux SIU Alumni Club.

Alex C. Huang has joined a management consulting firm, Towers, Perrin, Foster, and Crosby, Inc., in Chicago. He has the master's degree from Northwestern.

Fran Mazenko, principal assistant to the industrial relations manager at the Owens-Illinois Alton plant, has been promoted to industrial relations director at the St. Charles closure division plant. He joined Owens-Illinois in 1960 as a personnel trainee in the Alton plant.

Michael McCarty, M.S. '59, has joined the faculty of Southwest Missouri State College, Springfield, as an instructor in health and physical education.

Wilson Maxwell Montgomery received his master's degree in business administration from Washington University, St. Louis, during commencement exercises in June.

MARRIED: Kathryn Porter, Murphysboro, to Jerry Tarantino, Hurst, in Murphysboro. He is an industrial arts instructor at Hurst High School. They live in Vergennes.

1958

Mr. and Mrs. Dale Ashmore (Carla Cojaf '59) live in Paxton and he is an attorney with Pacey and Pacey. He received a law degree from the University of Illinois.

Capt. Marshall T. Hill is a forward air controller in a Pacific Air Forces unit responsible for helping train Vietnamese forces in air tactics and techniques for combat.

Mrs. Theodore F. Kalb (Elizabeth Ann Gossett) lives in Galesburg and she and her husband have a daughter, Deborah.

Mr. and Mrs. Edwin W. Meyer (Evelyn Louise Irwin '57) live in Yorkville where he is manager of Kendall Farmers Oil Company.

Jerry Rombach has been named sports editor of the Chronicle-Telegram in Elyria, Ohio. He had been sports editor of the Southeast Missouri in Cape Girardeau for four years.

Douglas A. Rossman, assistant professor of zoology at Louisiana State University, has received a $22,900 grant from the National Science Foundation to conduct basic research in snake taxonomy. He will spend three summers, two in Mexico and one in California, collecting garter snakes for skeletal studies which could establish a new approach to the taxonomy (scientific classification) of many kinds of snakes. Dr. Rossman, who joined the LSU faculty in 1963, received the doctoral degree from the University of Florida. He taught two years at the University of North Carolina before joining the LSU faculty.

Lewis A. Songer, assistant band director at the University of Missouri at Kansas City, has been appointed to the faculty of Westminster College where he will be an instructor in music and band director. He received the doctoral degree from the University of Missouri in June. Prior to joining the Missouri faculty, he was an instructor in music at Cottey College, Nevada, Mo., for three years. He is co-founder of the Mid-West Composers Alliance and has written three original compositions. In 1964 he received the Jonathan Buebendorf Memorial Award for Composition. He and his wife, Marcia Jeanette Songer '58, have two sons and a daughter.

Len R. Zabroski is physical education and driver education instructor in a Lansing high school. He and Mrs. Zabroski have two children.

MARRIED: Esther Marie Schiefelbein, Madison, Wis., to Gaylor Alvan Rybolt, Jr., M.S. '60, in Madison, Wis. He is a psychologist at Central Wisconsin Colony.

Mr. and Mrs. Donald T. Dudeck (Joyce H. Dudeck), New Athens, have adopted a daughter, Mary Jean. They have an adopted son, Daniel Ralph, three years old. Mr. Dudeck is now secretary-treasurer of the New Athens Savings and Loan Association and Mrs. Dudeck is a substitute teacher.

BORN: To Mr. and Mrs. Herman Eugene Stettler, M.S. '61, Marion, a son June 25. He is a teacher at Crab Orchard High School.

1959

Mr. and Mrs. George R. Klaun live in Freeburg and he is an accountant with Don Rice and Company, Certified Public Accountants. The Klanns have two sons, Richard and Ronald.

Beryl F. McLerren, M.S. '60, Ph.D. '63, associate professor of speech at Eastern Illinois University, was named one of the Southern Alumnus.
10 "outstanding young speech teachers" in the central states at a meeting of the Central States Speech Association in Chicago. He joined the Eastern faculty in 1964 after serving as a lecturer at SIU. Mrs. McClennen is the former Dorothy Ann Quick, ex '49.

Mr. and Mrs. Albert F. Meyer, M.S., (Edra T. Brickr '55, M.S. '56) live in Carbondale and he is a member of the Information Service staff at SIU. Mrs. Meyer teaches at University School.

Kenneth E. Monschein, M.S. '60, is vice president of Serv-U-Manufacturing Company, Inc., Kirkwood, Mo. He and Mrs. Monschein (Donna Schuchard, ex '61) have a daughter, Beth.

Capt. Robert G. Price is a C-123 Provider pilot in a Pacific Air Forces unit responsible for training Vietnamese forces in air tactics and techniques for combat.

Milburn H. Smith, M.S., is an art teacher in the junior high schools of Champaign. He and his wife live in Charleston and have four children.

BORN: To Mr. and Mrs. George P. Blatter, Herrin, a son July 7. Mr. Blatter is production control clerk for Norge in Herrin.

To Mr. and Mrs. Sherman R. Johnson, Murphysboro, a daughter June 16.

1960

Mr. and Mrs. Robert L. Barrow, M.S. '64, (Oleta Flo Hall, M.S. '63) live in Girard where he is a school principal and she teaches home economics.

James I. Costigan, M.S., assistant professor of speech and debate coach at Fort Hays State College, was elected professor of the year by the student body in the spring. He has been a member of the Fort Hays faculty since 1960 and is a former television announcer for station WRNL, Bloomington.

Lt. Richard L. Frassato has been awarded the U.S. Air Force Air Medal at Da Nang Airport, Viet Nam, for aerial achievement. A pilot, he won the award for his personal bravery and airmanship in the fight against Communist aggressors in Viet Nam.

David L. Hankins, VTI, is assistant manager of F. W. Woolworth in Waukegan.

Jim Jarrett, M.S. '61, former physical education teacher at Roosevelt Junior High School, Decatur, will study for the doctoral degree at Florida State University and teach part-time. He also expects to assist in coaching the Florida State tennis team. He coached the Millikin University tennis team in the spring.

Arleigh Burke Trophy Winner

Roger Aydt Commands Pacific Fleet's Best

The ocean tug USS Cree, based in San Diego, Calif., and commanded by Lt. Roger D. Aydt '56, won the annual Arleigh Burke Trophy in May for achieving the greatest improvement in battle efficiency in the Pacific Fleet.

Adm. Thomas H. Moorer, Pacific Fleet commander-in-chief, personally presented Lt. Aydt an ordinary broom, with gold stars and bars painted on its handle, symbolic of the Cree's clean sweep in the competition.

Lt. Aydt, a native of Dahlgren, joined the Navy after graduation from SIU and served three years. When he was discharged he accepted a position with the Bank of America. Later, he returned to the Navy, his first love. Of some 10,000 lieutenants in the Navy, he is one of 110 allowed to command a ship. Married in 1961, he and his wife Barbara have two sons, Greg and Brian, and live in Chula Vista, Calif.

Marion E. Kallenbach is elementary principal of Community Unit No. 5 in Waterloo. He and Mrs. Kallenbach have a daughter, Cynthia Lou.

Richard L. Smith, M.S. '63 has been named an instructor in the Botany Department at Eastern Illinois University. He is completing work on a doctoral degree.

Mr. and Mrs. Richard Stegeman (Beatrice Stegeman) are living in Cairo, Egypt, where he is teaching at the American University. He formerly was Carbondale city editor of the Southern Illinoisan. She was working on a doctoral degree in English at SIU.

Mr. and Mrs. Ronald R. Williams, M.S. '64, live in Kalamazoo, Mich., and he is executive director of Youth Opportunity Unlimited, Inc. He and Mrs. Williams have two daughters.

BORN: To Mr. and Mrs. James E. McEntire, Jr., (Joyce Ann Nava), Herrin, a son July 15.

To Mr. and Mrs. Donald L. Perkins (Joyce Anne Hart Perkins, ex '59), Plainfield, a daughter, Margaret Anne, January 24. The Perkins have a son, Edward, seven, and daughters, Betsy, five, and Mary, four. Mr. Perkins is liaison engineer at Argonne National Laboratory.

1961

Mr. and Mrs. Forrest E. Harding, (Judith Grammer Harding, ex), live in Dekalb and he is an instructor in marketing at Northern Illinois University where he received the master's degree in 1964. He is studying for the doctoral degree at the University of Michigan. Mrs. Harding completed the bachelor's degree at Northwestern and is now working on a master's. I myself started in the first grade at the Training School in 1914 and advanced until in 1929 I received my bachelor's degree."
The lowly house mouse—the housewife’s nemesis—will be the subject of an exhaustive study by the SIU Cooperative Wildlife Research Laboratory. A grant of $3,000 from the National Pest Control Association will make the study possible. Willard D. Klimstra, laboratory director, said he and his assistants will study the life history of the rodent pest and evaluate current and experimental techniques for mouse control.

**Telephone System in Use**

A new, fully automatic telephone system is in use at the Edwardsville campus. Called Centrex Service, the system resembles a small duplicate of a modern city’s telephone network. It now serves 500 lines. A 2,600-line system is predicted in a few years.

Julian H. Lauchner, dean of the Southern Illinois University School of Technology, has been named educational consultant for a project in Brazil by the U.S. Agency for International Development. He spent much of the month of July in Brazil meeting with educators developing programs in engineering and technology.

Charles Pulley, University architect, has been elected president of the Association of University Architects, which serves universities in the United States and Canada.

Summer enrollment reached a record high when 11,088 students registered for classes on the Carbondale and Edwardsville campuses. Last year’s enrollment was 9,380. Freshman enrollment increased by 49 per cent over a year ago.

**Student Jobs Abundant**

Campus and area jobs for students should number more than 5,000 when the fall quarter begins, according to Frank C. Adams, director of the Student Work Office. He said 3,500 students will work on campus and another 1,500 in communities within a 50-mile radius of the University. On-campus employment offers plenty of variety—more than 200 different kinds of jobs.

An estimated 4,500 students will be living in on-campus housing when the fall quarter begins, about 1,400 more than last September. The big increase is accounted for by University Park, the new $9.5 million residence project dominated by the 17-story tower, or Neely Hall. The tower, designed for 816 women, and two of three men’s halls under construction in the project, will be occupied at the opening of fall term. The third men’s hall will be ready in January.

**Grant Supports Aztec Study**

Pedro Armillas, archaeologist for the SIU Museum, has received a $23,800 grant from the National Science Foundation to finance his study of the ancient Aztec Empire. He will use the money to support a two-year project of mapping by aerial photography the lakes area of the Federal District and the State of Mexico to locate ancient irrigation ditches, aqueducts, and agricultural terraces. His objective is to reconstruct a picture of the region as it was at the time of the Spanish Conquest in 1519, although his investigation may yield information on agricultural practices of the Aztecs going back 1,000 to 1,500 years before the arrival of Cortez.

**Drapes Eight Miles Long**

Drapes for the windows in the 17-story women’s residence hall and the two three-story men’s halls in University Park will measure close to eight miles in length, interior designer C. D. May said. The drapes will be in six basic shades of blue, green, red, and yellow. In the tower they will be hung so that alternate stripes of color are visible from the outside, running the entire height of the building. Since the exterior of the tower itself is unfinished concrete, the room curtains will provide the main design treatment.

Foster M. Russell, editor of the *Sentinel-Star* in Coburg, Ontario, Canada, was named winner of the 1965 Elijah P. Lovejoy Award for courage in journalism. Presented by the University, the award was made during a July meeting of the International Conference of Weekly Newspaper Editors, which has headquarters at SIU.
