Honorable & Mentionable...

It seems to us entirely appropriate that the Alumni Association’s annual Great Teacher Award and Alumni Achievement Awards should be presented in the same program. If any one factor stands above others in producing the kind of alumnus who merits the Achievement Award, surely it is the influence of exceptional teaching.

Those who attended the banquet at which this year’s awards were made will recall that one of the Achievement Award recipients named Dr. Kenneth Van Lente—a few minutes later to be announced as the Great Teacher for 1967—as one of those teachers who had influenced his life the most.

In choosing Dr. Van Lente for the Great Teacher Award, members of the Alumni Association chose well. The signal honor bestowed is well deserved.

—R.G.H.
Cover For many graduates, the traditional cap and gown represent an end to campus life. Commencement over, the books are put aside. With them goes a way of life probably not to be experienced again. For the Class of ’67, the memory is fresh; is it really so dim for the rest of us? Photo by Larry Turner.

Graduate School The remarkable growth of Southern Illinois University has in most recent years been marked by growth of the Graduate School, a pattern expected to continue with the increasing need for advanced study. Dean William Simeone outlines the school’s distinguishing features, page 2.

Alumni Day Old acquaintances are renewed and new friendships found, classes re-united, the Great Teacher and outstanding alumni recognized and honored. The occasion is Alumni Day, subject of a picture story beginning on page 11.

"The greatest value of the research enterprise is that it sustains the distinctive character of the University as a place where faculty and students can unite in the creative endeavor of humanistic and scientific scholarship."

The Graduate School

BY DEAN WILLIAM E. SIMEONE

Although now enjoying the greatest prosperity ever, the SIU Graduate School remains an emerging and expanding institution within the University. The clearest signs of its prosperity are its increasing enrollments (over twenty percent each year in each of the last two years), the volume of grants and contracts obtained from private foundations and governmental agencies (approximately $12,000,000 in 1966), and, finally, the unceasing demand from all sectors of society for the services of its graduates and faculty. Its expanding character is evident in the number of new programs of instruction being proposed on both campuses. At Edwardsville, for example, there are master's level proposals in history, music education, behavioral science, and psychology. At Carbondale, there are plans for doctoral level programs in molecular physics and history.

In its present and emerging roles, the Graduate School strives to accomplish the three classic aims of the University: instruction, research, and service. A major function of the Graduate School is the educating of teachers for colleges and universities, an area in which it retains its preeminent position. More and more primary and secondary school teachers remain or return for master's degrees, and those who teach in the nation's junior colleges usually must have a master's degree as a minimal requirement for appointment. The Graduate School is taking an increasingly active role in educating teachers at these levels, and it will soon begin discussions with appropriate members of the faculty which should lead to important changes in teacher education.
Despite the volume and sometimes the temper of criticism levied upon it, the Ph.D. still stands as the most prestigious degree in American education. Through the June commencement, the University had awarded 217 of them.

The second of the traditional functions of the Graduate School is the promotion of research. While federal grants and contracts for research have attracted much of our attention in recent years, the University has historically provided support for research programs on an impressive scale, and it continues to do so in providing for faculty time for research, equipment, and laboratory space and library facilities. The justification for these outlays is clear: The Graduate School is committed to expanding the province of our knowledge, and this exploration is not only complex but costly. Yet no one can doubt the value of the investment. The extraordinary results of research are visible just about anywhere in a society that produces more goods and services than any other in history. By any standard this is an impressive achievement. Still, the greatest value of the research enterprise is that it sustains the distinctive character of the University as a place where faculty and students can unite in the creative endeavor of humanistic and scientific scholarship.

In educating teachers and researchers, in creating an environment for research, the Graduate School contributes to the University's goal of service to the worldwide community. The demand for this service steadily increases. Certain problems inevitably result, one of which is that more and more students are seeking admission to the Graduate School. Its tradition is to admit as many students of quality as possible. It resists placing quotas on enrollments. Yet it can only take as many students as there are professors to teach them and facilities for their work. If it is to continue to meet the requirements which are being made upon it, the Graduate School must have increasing support for maintaining and enlarging a faculty of quality and for providing the sophisticated facilities which professors and students require.

There is also justifiable concern about the use of the professor's time. To some, it appears that the Graduate School's devotion to research has resulted in a neglect of teaching. The burden of this concern is that teaching and research are no longer balanced and that the professor, preoccupied with his research, has little or no time for his students. These are, of course, legitimate concerns, but they are not a serious matter at SIU. Our faculty does not neglect its teaching function. Doctoral students who have graduated report no difficulty in seeing their professors virtually at any time they desired. Nevertheless, the Graduate School with its increasing size and complexity faces the constant risk of forcing professor and student into mutually exclusive roles. It is therefore necessary to create environments which may reduce if not eliminate the sense of impersonality which size can easily generate.

To this end, the Graduate School has encouraged the formation of student organizations. Although they

"Self-evaluation is a special and ambitious undertaking..."

are inexperienced, they have already been useful platforms for dialogue between graduate students and certain administrative officers. A great deal more needs to be done to insure effective liaison between students and the Graduate School. Right now, it is possible to say that we have made a good beginning.

The problem of maintaining effective relationships with students is enduring; so is the problem of evaluating existing programs of instruction and research. In large measure, the amazing speed with which new knowledge accumulates accelerates the latter problem. Despite its complexities, the Graduate School views periodic self-evaluation as a necessity, and it is in the midst of such a self-evaluation now. The dean of the Graduate School, along with a faculty of five senior professors, formulated a series of questions designed to assess the quality of graduate work. These have been distributed to all graduate units on the Carbondale campus. A similar evaluation will be made at Edwardsville at a later date. At the same time, a questionnaire has been sent to all students who have earned a doctorate to ascertain their views on the quality of education they received.

A program of self-evaluation of this kind is a special and ambitious undertaking, but the process of self-assessment is continuous. Here are two examples: While many graduate students obtain some teaching experience as assistants, there is under discussion a proposal to make such an experience a requirement for all students. On another sphere, a plan is under discussion which would permit capable students to take individually-designed interdisciplinary programs of study leading to the doctorate. One of the benefits of such a plan would be that the University could make fuller use of faculty members whose units do not at present offer the doctorate.

Ultimately, of course, the quality of instruction, research, and service we seek to achieve depends largely on the nature and quality of faculty and students who are attracted to the Graduate School. As we know, there is a mutual attraction between them. We must find and bring them together, and we must make the University a congenial place for them to live and work.

"The University has historically provided support for research programs on an impressive scale."
Recreation on Wheels: SIU Show Wagons

BY TIM TURNER

Southern Illinois University's recreation and outdoor education department has a colorful program on wheels, and the rolling stock is paying dividends.

Traveling down highways and into communities, recreation areas, and schools and other institutions are five wagons which carry SIU's message of practical outdoor education and recreation service to the people.

Success of the venture has brought response from such groups as the U.S. Air Force, which is contemplating a similar program in communities near its international bases, and the Chicago Park District, which wanted to rent SIU's mobile equipment but couldn't because of the department's previous commitments.

Right now there are five types of mobile units, with more on the planning boards. First to appear was the Nature-Outdoor Education Wagon built in 1962 by the department itself from ideas submitted by the late L. B. Sharp, professor of outdoor education. Then came the Show Wagon, the Puppet-Marionette Wagon, the Teen Party Dance Wagon, and the Craft Shop Wagon.

William R. Abernathy, head of the department's area services, is construction engineer who works with both graduate and undergraduate recreation students in designing and building the conveyances. The wagons are pulled by vehicles ranging from a Jeep for the lighter ones to a huge truck tractor for the big trailers.

Anyone visiting the Outdoor Education Center on Little Grassy Lake south of the Carbondale campus when a public school class is there will see one of the Nature-Outdoor Education Wagons in use. Its sides open out, revealing on one side equipment for outdoor study, cooking utensils, and other needed items for outdoor living. The other side is a library of nature study reference materials which can be used at the scene. School children who come in from a 40-mile radius have found the wagon to be of great benefit.

CONTINUED 5
William Ridinger, head of the department of recreation and outdoor education, had some experience with mobile recreation before coming to SIU. When he arrived in January of 1964, one of his jobs was to work to strengthen the community recreation concept. His immediate plan was to develop several mobile units.

"I believed these units could help the community program in several ways," Ridinger said. "First, they would serve as a leadership laboratory for our people studying community recreation. Second, the units themselves would promote the community recreation concept in the department and University by establishing good public relations. And third, these units would dramatize the recreational services of the department in the area in which the units would be used."

Ridinger sought information on mobile units from agencies all over the country. Replies prompted interest among other staff members.

The department decided a Show Wagon should be built first because fewer risks would be involved in construction and programming. If the department could build a successful Show Wagon, it was felt that funds could be obtained easier for any trailers that followed. Troy Edwards, then acting dean of the College of Education, supported the venture.

The department went to the Carbondale Park District, which agreed to co-sponsor the project, and the program got into free-wheeling. The Show Wagon was first used for a "family night" program at Lincoln playground in Carbondale in 1965, following an unveiling on campus. Next were visits to the children's center at Hurst, to Springfield, Decatur, Peoria, and to a number of points throughout Southern Illinois.

The Show Wagon, which opens out into a stage, has held such activities as music by rock-and-roll bands, dance acts, vocal acts, baton twirling acts, comedy skits, baby contests, queen contests, and award presentations.

Completed in 1966 was the Puppet-Marionette Wagon, built with funds from the Sears Foundation. Smaller than the Show Wagon, it can be pulled quite easily from site to site. On one side is a wooden window which comes out to make a stage for puppets; on the other a ground floor window comes out to form a marionette stage.

The Teen Dance Party Wagon, which followed, was built to relieve some of the pressure placed on the Show Wagon. Financed by a group of soft drink bottlers, it was introduced to the public at the Du Quoin State Fair in 1966. It houses a stage for a band on one side and a refreshment stand on the other. Taken to the National Parks and Recreation Conference in Washington, D.C., in 1966, it made a big hit with recreation leaders from throughout the country.

The Sears Foundation also financed the Craft Shop Wagon, just ready to embark with its program of craft instruction and display.

Ridinger said future possibilities include a "zoo-mobile" and a "movie-mobile," to be followed by a band wagon, science wagon, and "play-mobile."

Could all of the mobile units be used together at the same time?

They certainly could, Ridinger emphasized. As a group they could form what he termed a play center, or the nucleus for a parade, or the feature attraction of a community celebration.

"The entire concept is working out well," Ridinger continued. "The wagons take the recreation to the people, promote cultural activities such as drama, music, and arts and crafts, create a glamorous image of education and recreation, and publicize recreation. Summed up, the main purpose is to present recreation and to provide a unique public service, to be taken to the people where they are."

General policy for sending out the wagons has been:

The community will ask for a wagon, and the first trip is given free with talent furnished if desired. Requests are expected to be made early enough so that arrangements may be started two weeks in advance. If there is sufficient time, SIU recreation students will go to work with the people in the community where the wagon is scheduled. If the Puppet-Marionette Wagon is making the visit, experts will show local teachers and pupils how to make puppets or marionettes and how to work them, and will assist in working up skits.

The department gets numerous letters for the Teen Party Dance Wagon from leaders of communities who want to give the young people something to do on summer nights.

"We believe in planning with, instead of for, the
THE AUTHOR: W. K. "Tim" Turner, veteran Southern Illinois newsman, has been on the staff of the SIU Information Service since 1963. He is a University representative on the Educational Council of 100, primary concerns of which have included outdoor education.

community," Ridinger said. "Once a Teen Dance program is underway, it is turned over to the community. Then the wagon will make visits at intervals determined by need. Kids can make enough at the Teen Wagon refreshment bar, usually, to take care of many expenses, and can start making plans for a permanent building for the community activities."

Ridinger talked about earlier efforts to move recreation into communities.

"In suburbia," he said, "where there is little land for parks, it was essential to get to the people."

He recalled that back in 1951, when he was doing recreation work at Concord, North Carolina, trucks were tried as mobile recreation units. It was soon found that they were tied up for too long a period, however, and other means were sought. Ridinger was one of the first to go to the trailer-type show wagon. Other communities got interested, and recreation by trailer commenced in the East.

Then for about ten years there was a lull, followed by renewed interest the past two or three years.

Following a three-hour demonstration of mobile recreation by SIU specialists in Washington last year, the recreation department has received requests for help in the form of ideas, plans, and pictures for similar wagons. The Air Force wrote that it is interested in setting up units at its international bases both as public relations ventures and to provide recreation for area children.

The department couldn't send its rolling equipment to the Chicago Park District, which wanted to lease it, but it plans to help by sending recreation specialists to Chicago later this year to demonstrate what can be done. The Chicago group seeks to get the people, especially in disadvantaged areas, involved in their own programs through a system of mobile units.

Southern Illinois University's combined education-recreation program is receiving attention as it gives students of recreation a living laboratory in which they can do meaningful work with people instead of indulging in theory and contrived experiences alone. At the same time, it provides a unique service to people in communities throughout a wide area by taking practical outdoor education and recreation to them.

Ridinger is noticeably pleased with what has happened, and hastens to give credit to many, including more than a dozen SIU departments and other units as well as faculty members and students, both past and present, in his own department.

Puppet show holds attention of grade school children during performance at Murphysboro school using Puppet-Marionette Wagon.
William George, assistant professor of zoology, counted himself fortunate when he found three baby hairy woodpeckers in a nest near his home. Such a find is extremely rare, he said, and even though birds are his specialty he had never before seen baby hairys in the nest. Becoming a substitute mother to the fledglings, he immediately put them on a 45-minute cricket feeding schedule. Curiosity, he found, can sometimes get the best of a 20-day-old bird; an ear or the top of one’s head presents an immediate challenge to further investigation. But science prevailed, and the feeding schedule was kept. Figuring that even hairy woodpeckers should work for their keep, George will use them in a research project.

News of the Campus

New Music Foundation

A music foundation has been organized in honor of Marjorie Lawrence, former Metropolitan and Paris Opera star now research professor at SIU. Incorporated as a non-profit agency under the laws of Arkansas, the Harmony Hills Music Foundation was organized at a meeting at Miss Lawrence’s ranch near Hot Springs. R. Buckminster Fuller, research professor of design science and world famous as creator of the geodesic dome, was elected president of the organization.

The new foundation will raise funds for student facilities at Miss Lawrence’s ranch, where she conducts an SIU summer opera workshop. Objectives include establishment of scholarships for promising students of opera, construction of housing facilities for more students, and construction of a small amphitheatre for public performances.

Other officers named at the foundation’s organizational meeting include Mrs. Winthrop Rockefeller, wife of the Arkansas governor, vice president; Dr. Thomas King, Miss Lawrence’s husband, executive director, and Cecil Cupp, president of the Arkansas Bank and Trust Co., Hot Springs, secretary-treasurer. Also to serve on the foundation board are the Rev. Fred R. Harrison, minister of the First Methodist Church, Hot Springs; James W. Chesnutt, Hot Springs attorney and civic leader; SIU President Delyte W. Morris; Mrs. Faye McCall Wham of Centralia, Illinois, wife of John Page Wham, former SIU board of trustees member; Mrs. Lester T. Burns, Wichita Falls, Texas, philanthropist and patroness of the arts, and Miss Lawrence.

Recreation Lake Opens

A 77-acre reservoir on the Edwardsville campus has been dedicated as Recreation Lake.

The lake, northwest of the campus mall, originally was designed as a utilities reservoir for the heating and refrigeration plant. Canoes, rowboats, and sailboats
are now available at the site for rental to students, faculty, and guests. Picnic areas also have been established and the lake is open to fishing.

Under construction but not expected to be open this summer is a one-acre swimming area with 400-foot beach. The beach eventually will be equipped with bathhouses and toilet facilities.

Also planned are a pavilion, boat docks, areas for outdoor sports such as tennis and volleyball, and possibly a lodge overlooking the beach.

Beauty Aid for Men

Male invasion of the feminine world of hair curlers and beauty masks has put a “Tuesdays for Men Only” sign on the door of the cosmetology program at the Vocational-Technical Institute.

While social scientists puzzle over significance of male interest in beauty aids—and cosmetics manufacturers gleefully count the $1-billion a year pouring into their bank accounts because of it—beauty salons are hard-pressed to meet the demand for male services.

Salons are experiencing a flood of male patrons, making it obvious that instruction in special techniques necessary for handling the men must be given in the schools, says Mrs. Gladys Blanton, faculty chairman of the one-year course at VTI.

“We’ve decided that we must add experience in work on male customers to give our students as well-rounded preparation for the profession,” Mrs. Blanton says.

The “men only” day instituted earlier this year is designed to encourage the males to use the VTI facilities so that the cosmetology students can take advantage of the experience.

Men can get “the works”—scalp and dandruff treatments, facials, shampoos, manicures, lash and brow tinting, hair tinting, hair straightening, and permanent waving—all at special student prices and under instructor supervision.

About the only treatment not available to the males is the traditional haircut; cosmetologists aren’t competing with the barbers.

The experience is especially valuable to students in the VTI program because of the number who plan to become salon managers, teachers, and demonstrators, Mrs. Blanton feels. In addition to the 1,500 hours of cosmetology training required for licensing in the state, students in the program must take business and general education courses required in the University’s General Studies program.

Materials to Archives

A substantial quantity of papers and documents relating to Southern Illinois have been processed and filed in the University Archives in Morris Library.

Included are labor records of the Sahara Coal Company, private papers of the late State Senator R. G. Crisenberry of Murphysboro, still pictures and movie series of such things as country stores, coal mines, dirt farming, railroads, and barnyard chicken raising, Primitive Baptist Church records, and a Ku Klux Klan newspaper published in Herrin. Much of the printed material has been preserved on microfilm.

A vast quantity of non-current documentary material relating to the University itself has been gathered and processed during the past year, including official correspondence of the Office of the President from 1916 to 1965.

Faculty papers of the late President Henry W. Shryock, Prof. Lewis Maverick, former chairman of the economics department, and Henry N. Wieman, retired professor of philosophy, also have been collected.

Others materials include private papers of Prof. George W. Smith, first head of the history department, and the correspondence of Prof. Paul Schilpp with the eminent philosopher and educator, John Dewey.

In connection with the long-range Dewey Publications Project centered at SIU, taped interviews have been recorded with a number of friends and associates of Dewey.

A film record of the history of the University also has been started, and the entire “morgue” of films and negatives of Film Production and early negatives of Photographic Service have been placed in the archives. Film Production is shooting short movie sequences of important campus events and personalities to add to the collection.

The Archives also continues to collect all University publications, including Alumnus, faculty publications, doctoral dissertations, and master’s theses. Complete files of the two campus newspapers, The Egyptian and Aestle, are being microfilmed and will be indexed.

JOHN WOTIZ, new chemistry department chairman who is only the third person to hold the position since 1913. He succeeds James Neckers, who held the post from 1929 until 1965. Acting chairmen had served in the interim. Neckers succeeded the late G. M. Browne, first head of the department. Wotiz previously served as chemistry chairman at Marshall University.
When names of Carbondale campus June graduates were heard over the public address system at the commencement program in the Arena, the voice was that of Prof. Isaac P. Brackett, speech correction department chairman—but his lips were not moving and he was not on the platform. The names were recorded on electronic data cards and fed into an electronic mechanism called a Language Master. The equipment usually is used in Brackett’s department for speech therapy.

Moe to Write Drama

Christian H. Moe, associate professor of theatre, has been commissioned by the Illinois Sesquicentennial Commission’s art division to write the official sesquicentennial drama.

The play will be an authentic drama of significant episodes in the 150-year history of the state, Moe said. While setting and properties will be simple and symbolic, he plans to utilize multiple projection of art and architecture slides to enhance visualization of the various periods.

The play will produce the play as one of its fall offerings and will use it as the touring production which is presented each year in communities throughout Southern Illinois.

The Sesquicentennial Commission will make the script available to other groups which may be interested in producing it.

Apartment Project Set

Work is scheduled to begin this month on a $4-million apartment project for medium-income student and faculty families on the Carbondale campus.

The project is the first college housing program in the nation to be financed through the Federal Housing Administration.

Consumers Construction Co. of Chicago will build the apartment complex on a forty-acre site southwest of the campus, near the Carbondale city reservoir. It will include 304 two- and three-bedroom apartments, with rents ranging from $95 to $105 per month, including utilities.

Thirty-nine apartment buildings and a community center will be located in the complex. The brickveneer buildings will be of two-story design, four apartments on each level.

Facilities Rate High

SIU has been rated as one of the top twelve colleges and universities in the nation in terms of facilities for handicapped students.

The rating was compiled by Dr. Sarah Splaver in her new book, *Your Handicap—Don’t Let it Handicap You.*
Alumni Day '67

Alumni Day, 1967, was held on the Carbondale campus June 3. *Alumnus* photographers were on hand to record as much of the activity as possible, beginning with morning registration and continuing through the evening banquet and presentation of awards. Some of the day’s highlights are represented in pictures on this and following pages. Obviously, it was not possible to use all the material available. Class reunion photos show only those present at the time the photographer reached the respective class groups, and not necessarily all those class members present at some time during the reunion period. A great many color slides also were made during the day and will be shown in various local Alumni Club programs during the coming year. As in past years, climax of the day’s events was the awarding of Alumni Achievement Awards and the 1967 Great Teacher Award following the annual Alumni Banquet.
ABOVE: Maurice P. Clark '38, M.S. '53, right, retiring Alumni Association president, presents $1,000 Great Teacher prize to Prof. Van Lente. TOP RIGHT: Clark hands over gavel to the incoming president, Roger Spear '48. BELOW: Alumni Achievement Award recipients, from left, Bret J. McGinnis '49, Charles F. Pratt '41, Sylvan Owen Greenlee '35, and Glenn W. Storme '29-2.
ABOVE: Willis Coatney '55 and wife, Thelma '56, Normal, register for Legislative Council meeting. TOP RIGHT: Annual banquet climaxes Alumni Day activities, with Alumni Achievement Award winners and their wives seated at table of honor beyond head table. RIGHT: Legislative Council session opens day's business. BELOW: Bernice Huffman Hamilton, Daly City, Calif., left, and Ruth Bernreuter Watts, Nashville, Ill., check alumni registration board to see what other members of the Class of '17 are present. BELOW RIGHT: Sue Dickey of the Alumni Office staff helps William A. Jones '52, Benton, with his name tag.
GOLDEN REUNION: Members of the Class of '17 present as honored guests at noon President's Luncheon were, from left, seated, Lucy Murray Smith, Salem; Lottie Pergande Martin, Edwardsville; Stella Brewer Gill, Soque, Calif.; Winnie Free Penquite, Okmulgee, Okla.; Bernice Huffman Hamilton, Daly City, Calif.; Edith Boswell Williams, Anna; Elva Brannum Gilson, Clevel, Ohio, and Marie Short Kleindienst, Danville. Standing, Jessie Stewart Sparr, Staunton; Mary Cowan Kerley, Golconda; Frances Fowler Browne, Urbana; Arlie O. Boswell, Sr., Stonefort; Dr. Claude Vick, Springfield; Frank M. Lackey, Olmsted; Ruth Berneuther Watts, Nashville, Ill.; Lois Gram Hawkins, Mt. Vernon; Helen Welton Wilson, Salem, and Stella Barrow Lingle, Jonesboro.

NEW LIFE MEMBERS: Also among those present were eight new life members of the Alumni Association. Seated are, from the left, Mrs. Roger Spear ex '42, Frances K. Phillips '35, and May Dorsey '09-2, all of Carbondale. Standing are Dr. and Mrs. David T. Kenney '47 (Wanda Carter '48), Carbondale; Mr. and Mrs. Murrell F. Jones '52 (Doris Alvey Jones '55, not a life member), Champaign, and Mr. and Mrs. Arthur L. Sims '52 (Mildred Lurtz ex '52), Champaign.
CLASS OF '22: Seated, from left, Albert Becker, Johnston City; Grace Wiggs Lingle, University City, Mo.; Mary Peace, Kell; Joseph C. McCormick, Olmsted; Deneen Watson, Harrisburg, and Mr. and Mrs. James E. Bennett, Du Quoin. Standing, Dr. and Mrs. Dilla Hall (Belva Hunter '27), Marion; Mr. and Mrs. Eugene Werner (Lillie Dillinger '21), Carbondale; Mr. and Mrs. Maurice Pyatt (Vey Griffith), Pinckneyville, and Lola Newberry Legg, Rome, Ga.

CLASS OF '27: Seated, from left, Mrs. Bert Casper, Cobden; Mr. and Mrs. Merritt Allen, Freeport; Vivian Williams Campbell, Salem; Sylvia Donoho Kirk, Salem, and Dallas Wood, Cairo. Standing, Martha Henrich Bleem, Walsh; Belva Hunter Hall, Marion, and Veda Price Parker, Texas.

CLASS OF '32: From left, Dr. James Barker, Eldorado; Clarence Heberer, Belleville; Mrs. Alice Williams, Mt. Vernon, and Mr. and Mrs. Guy Lambert '33 (Leora Hartley Lambert '32-2), West Frankfort.

CLASS OF '42: Seated, from left, The Rev. Allan Watson, Severna Park, Md.; Jane Crichton, Carbondale, and George Caveglia, Murphysboro. Standing, Howard Hough, Jr., Scarsdale, N.Y., and Dr. Quentin Reed, Carbondale.

CLASS OF '57: Seated, from left, Donna Menapace Lovelamp, Christopher; Wanda Newell, Carbondale; Jeanne B. Drone, Florissant, Mo.; Rachel B. Johnson and son, Eric Allan, St. Louis; Pat Cook Hunsaker, Belleville, and Pat Burns, Shelbyville. Standing, Delores Ullrich, St. Louis; Mr. and Mrs. Herbert Rieke (Esther McLean ex '59), Earlville; Francis Pohlman, Brussels, Ill.; Mona Marce, Carbondale; Jane Curry Dycus, Carbondale, and Mr. and Mrs. William Doris (JoAnn Striegel), Springfield.
BY FRED HUFF

SIU's football program sales should be up next fall—the Salukis play six games at home, including contests with Tulsa, North Texas State, and Dayton, and newcomers may dominate Coach Dick Towers' varsity squad.

Although there were only seven non-lettermen in first team offensive and defensive alignments for the final spring scrimmage, fans can be certain that a number of first-year players will hold key roles in Southern's 1967 season.

Forming the nucleus of next fall's squad will be twenty-six lettermen returning from a team which won four, lost five, and tied one in 1966. Several rookies from last year's freshman group are expected to move up, however, and junior college transfers also figure prominently in Towers' plan.

Offensively, the Salukis should be sound, with good strength in the line and at running back positions. Bob Hudspeth, a transfer from Kansas, and veterans Ike Brigham and Ralph Galloway give the Salukis size and experience at key blocking spots on the strong side of an unbalanced line. Hudspeth, who is a potential All-American, weighs in at a hefty 265 pounds, with Brigham at 230 and Galloway at 240.

Providing backfield strength will be veterans Charlie Pemberton and Roger Kuba, along with JC transfers Doug Hollinger and John Quillen. Pemberton, a 5-11, 175-pounder, came on strong in the latter stages of the 1966 season and wound up as the leading Saluki ball-carrier with 647 yards and a 4.6 average. Kuba is a great all-around back with power to burn, but was sidelined with a broken wrist after a fine start last season.

Both Hollinger and Quillen provide needed speed in the SIU backfield. Hollinger proved a versatile performer in spring drills, while Quillen also demonstrated good running form.

The one weakness in the Saluki offense could be at quarterback, where Wally Agnew is a question mark. A starter for four games last season, Agnew displayed good passing skills against top competition until a knee injury and resultant surgery sidelined him for the season. He still has not tested the knee and Coach Towers is presently figuring on letterman Tim Kelley and JC transfer Barry Stine to handle quarterback chores.

The presence of fine pass receivers John Ference and Tom Massey indicate the Salukis could bolster their attack if either Kelley or Stine prove adequate, or if Agnew returns and picks up where he left off a year ago.

Defensively, the Salukis blended a small corps of fine returnees with some aggressive transfers during spring drills and results were encouraging.

Linebackers and ends will be the backbone of the defense, with standouts Carl Mauck and Bobby Roberts handling linebacking duties and Billy Hohs and Chip Marlow the wing spots.

The added strength may be arriving just in time; the '67 schedule appears to be one of the toughest ever encountered by the Salukis. In addition to Tulsa, North Texas State, and Dayton, major teams on the schedule include Louisville and East Carolina College. Completing the list are five fine college division clubs, Drake, Ball State, Youngstown, Northeast Missouri State, and Lincoln.

The six home games also should be attractive to SIU fans and, for the first time in many years, all home games will be played in the daytime.
1899 Stuart Brainerd and his wife, the former Ethel Cruse, ex, observed their 65th wedding anniversary April 30, and write from their home in Denver that they are looking forward to their 70th. They have five children, eleven grandchildren, and eight great-grandchildren.

1912 C. Gage Brenneman, 2, is a retired Air Force officer who now makes his home in San Diego, Calif., with his wife, Beatrice. He received an A.B. degree from the University of Illinois in 1917 and an M.B.A. degree from Harvard in 1924.

1914 Mr. and Mrs. Raymond J. Crocker will celebrate their 50th wedding anniversary in September. They live in Sesser and are parents of five children, all of whom attended SIU.

1922 John E. Hunsaker, 2, '24, has been in the real estate and residential construction business in Houston, Texas, since retiring from the faculty of the University of Houston. Mrs. Hunsaker (Lorraine Dunn '24-2, '28) is principal of Elrod Elementary School in Houston, which was awarded a Freedoms Foundation George Washington Honor Medal for its 1965-66 Junior American Citizenship Club programs “contributing toward a better understanding of the American way of life.” She was awarded an American Educators Medal for her “effective support of the highest ideals of her profession as teacher, administrator, and private American citizen.”

Dunn Named New Head of Gym Coaches

Dr. J. Hubert Dunn '43, Northern Illinois University gymnastics coach, has been elected president of the National Association of College Gymnastics Coaches.

In his fifth year at Northern, Dunn moved up to the top spot in the coaches organization after having served the past two years as vice president. The NACGC represents gymnastics coaches from colleges and universities from throughout the nation.

Dunn was a standout collegiate gymnast at SIU and later gained fame as gymnastics coach at Washington State University, where he introduced the sport to the Pacific Northwest area. His teams won Pacific Northwest Collegiate titles in 1955, 1957, and 1958, with twenty-four individual champions in those years.

In the Pacific Northwest AAU championships, his teams took top honors in 1952, 1954, and 1955, and had twenty-four individual titlists. He was founder of the Washington State high school gymnastics championships, now held annually. He was named "Coach of the Year" in the western region of the U.S. by fellow NACGC coaches in 1962.

Dunn, who received a master's degree from Washington State and doctorate from the University of Illinois, succeeds Jake Geier of the University of Nebraska as association president.

Dr. Barrow Resigns

Dr. Jack Barrow '49, a St. Louis physician, has resigned from the Alumni Association board of directors. He at one time served as Association vice president, and had a year remaining on his present term on the board.

In his letter of resignation, Dr. Barrow said increasing demands on his time as a physician had made it impossible for him to continue to effectively serve on the board.

Roger Spear '48, new Association president, said the board accepted Dr. Barrow's resignation "with deep regret, but with sincere appreciation for the work he has done." He said the board would appoint a new member to fill the unexpired portion of Dr. Barrow's term.
and Mrs. George Porter, '32–2. He is a high school administrator. A daughter, Mary Anne, is now a student at SIU.

The first child of Lt. and Mrs. John Vance Welge (Nancy Ann Kartman Welge) has been named Michael Vance. He was born January 25. Lt. Welge is equipment control officer at Sewart AFB, Tenn.

1965 Mr. and Mrs. David Barton (Normalie Draper Barton, ex) are parents of a son, Eric David, born December 20. Mr. Barton is stationed in Marysville, Calif., with the Air Force.

1966 Christopher Martin was born February 8, son of Mr. and Mrs. H. Martin Page. The family lives in Chicago, where Mr. Page is a representative for the Insurance Company of North America. A daughter was born March 22 to Mr. and Mrs. Paul Howard Gurn, M.A. Mr. Gurn is a graduate assistant in the zoology department at SIU. He received his B.A. degree from the University of Massachusetts in 1962.

**Deaths**

Dr. Richard Kudo, visiting professor of zoology since 1958, died June 3 in a St. Louis hospital at age 81.

1918 Mrs. Daisy Butler Powell, ex, wife of Illinois Secretary of State Paul Powell, died in April at a Chicago hospital.

1920 Mrs. Claude E. Vick (Mary Margaret Pyatt, 2), Springfield, died May 5 after a lingering illness. She had been an active leader in planning activities of her class and had made significant contributions to programs of the Springfield Area Club.

1963 W. James Thompson, music instructor and chorale director at the University of Portland, Ore., died suddenly March 19 of an apparent heart attack. He received a master's degree from the University of Illinois in 1965, and had been at Portland since. Survivors include his wife, Pamela, and a baby son.

The Alumni Office also has been notified of the following deaths:

1909 Frank A. Easterly, ex, Murphysboro.

1910 Mrs. Edgar Nash (Mildred Merryman, 2) Santa Barbara, Calif.

1918 Miss Florence E. Malotte, 2, St. Louis.

1926 Miss Ada Dorris Reese, 2, Harrisburg.

1929 Miss Alice P. Jarrell, 2, Harrisburg. Mrs. Milton Gaskill (Lucille Bingham, 2), Bayside, Long Island, N.Y.

1939 Warren T. Taylor, ex, Johannesburg, South Africa.

1946 Laymond F. Jones, ex, Pittsburg, Ill. Ellis Thomas Moore, ex, East St. Louis.

1947 Mrs. Frank Wisniewski (Stella S. Kopicsen, ex), Tamara, Ill.

1950 Alphonso E. Oliver, ex, East St. Louis.

1952 Elijah Donald Brown, Campbell.

1963 Milton V. Hubertus, VTI, Alton.

With this issue of Alumnus, we welcome to the SIU Alumni Association some 3,000 new members—the Class of 1967.

For some alumni who have been around a bit longer, a look at the newcomers might prove surprising.

For example, the cosmopolitan nature of the University should become clear to anyone not fully aware of it before. The commencement programs list students from thirty-six states and a number of foreign countries among graduates at Carbondale, and from five states besides Illinois at Edwardsville.

Sheer size of the graduating class is somewhat startling to those from the smaller groups of not so many years ago. In round numbers, 2,400 were graduated at Carbondale and 600 at Edwardsville.

The number of graduate degrees is worth noting, with 360 master's degrees and thirty Ph.D. degrees awarded.

The Class of '67 goes into the records as the largest yet. If members also wish to label it the best—well, we'll happily give them ample opportunity to prove themselves as time goes by. The competition, we should warn, is stiff; more than four-score of classes which came before are pretty well established.

The June class will be considerably strengthened, of course, by the Summer graduates.

We welcome the Class of '67; we envy them their youth—except for a few old timers among the group, and we envy them their persistence and endurance!

We hope the new acquaintance is a long and happy one. After all, their future and ours is one.

Those listed above became life members of the SIU Alumni Association during the past year. If you are a member of the Association, or qualify for membership, perhaps now is the time for you to consider joining them. Cost is $100 (minimum annual installment payment $10) or $125 for a family life membership if both husband and wife are alumni (minimum annual installment payment $12.50). Life membership payments go into a permanent endowment, the interest supporting alumni activities in perpetuity. Write the Alumni Office for details.
