Opening the SIU Chicago Information Office
Honorable & Mentionable . . .

President David Derge wielded the scissors as Southern Illinois University at Carbondale formally opened a Chicago information office in mid February. Dr. Derge snipped a red ribbon at the office's sixth floor reception area in the Six Twenty Five Building (625 N. Michigan Ave.).

"This communications center will serve as a device to convey information to prospective students, parents, alumni, the media and other friends of SIU in the Chicago area," Derge said.

"A large portion of our student body comes from the Chicago area, and we are convinced that by opening this office, we will be better able to serve those students and their parents."

SIU Alumni Association President Ted Taylor traveled from his home in Washington, D.C. to attend the opening, and said it was "long overdue and absolutely necessary."

Taylor, a 1944 SIU graduate, thought the convenience of an information center in an area representing nearly a third of all SIU's in-state students will be its most attractive feature.

"It's going to be a lot better for students, prospective students or parents to be able to make instant contact with University people here than to drive all the way to southern Illinois or wait a day or two for a letter," Taylor said. "When I went to school, there probably weren't 100 students enrolled from Chicago. That's not true anymore. I'm very glad to see this office open."

James Fenton, an assistant admissions director who works out of the Chicago office, said the Michigan Boulevard center already has made a hit with the high school and junior college counselors in Cook County.

"Everyone I've talked to says it's a fantastic idea," Fenton said. "They like the fact that they can get up-to-the-minute information on SIU-C right here at their doorstep. It's going to be good for student recruiting, and counselors are the key to that."

The office has been doing business since January, even though the formalities weren't observed until February. Administrative teams from the SIU Schools of Law and Medicine have been using the office for counseling discussions with Chicago area junior college and high school representatives, and a student teacher director from the Carbondale campus called in trainees for seminars when they were pulled out of their Chicago classroom duties by a teachers' strike.

Calls for information about SIU-C have been coming in regularly since the office opened, according to Bernard O'Connor, public information officer. But it may take awhile before the identity of the telephone listing—SIU—is fully established.

"A man phoned the other day looking for a job," O'Connor said. "He thought we were the Seaman's International Union."

Pictured on the cover, front row from left, are Bernard O'Connor, public information officer for the Chicago office, David Derge, president of SIU at Carbondale, Ted Taylor, president of the SIU Alumni Association, Wayman Presley, southern Illinois businessman, and Mrs. David Derge.

Southern Illinois University is published six times a year, in January, March, May, July, September, and November, by the Southern Illinois University Office of Alumni Services, Carbondale. Member of the American Alumni Council. Payment of Membership dues of $5.00 annually or $125 for lifetime membership entitles an association member to all alumni publications. Subscription to the Alumnus is by membership only. Second class postage paid at Carbondale, Illinois. All information concerning alumni or special feature material should be addressed to the editor of Alumni Publications. Address changes should be sent to the SIU Alumni Office, Carbondale, Ill. 62901. Please allow four weeks for changes. Printed by the SIU Printing Service at Carbondale.

"Can somebody help me please?" is a request heard often in the Ombudspersons Office on the SIU campus. Undergraduates, graduate students, faculty and staff alike are frequenting the office in ever-increasing numbers as they find themselves victims of inconsistent or rigidly inflexible administration of rules and policies which govern campus constituents. The story of ombudsing at SIU starts on page 4.

Basketball—SIU Style means pom-pom girls, cheerleaders with soul, maroon and white streamers, coke and popcorn, puns from the Saluki Loyalists, a band with lots of class, a team with lots of talent and a coach with lots of hope. See page 8.

The SIU Merchandise Center on the back inside cover offers you chairs, t-shirts, playing cards and a new item—glasses—from the Alumni Association. Different products will be added as they become available, so be sure and watch Alumnus for new items.

"A good teacher has the ability to inspire and motivate people. You can lead a horse to water and you can make him drink if you salt him well enough first. It's the salting process that's important," says Anna Carol Fults, professor of home economics and recipient of the SIU at Carbondale Alumni Association's 1972 Great Teacher award.

A native of Tracy City, Tenn. and a 20-year alumna of SIU's home economics faculty, Dr. Fults was chosen by secret balloting of the Association's membership. She was honored as the Carbondale campus 13th Great Teacher at the climax of the Alumni Day banquet last June.

"If you inspire a student," she says, "he will do far more than ever required of him. Of course, the teacher must be competent in his subject matter, goals and philosophy. Nobody is competent in everything, however, and if teaching is to be the cooperative process it should be, the teacher learns along with the students. We're all in this together."

Dr. Fults feels that students have changed since she started teaching.

"It may be the affluence under which today's students have been reared. They aren't as creative in their ways of approaching teaching," she says. "They haven't had to cope with as much while growing up, so they can't cope with as much now."

Questioned about the large undergraduate lecture sections, Dr. Fults agreed that they are a problem.

"The dynamics of learning are really in the teacher-pupil relationship and when the student gets so far removed from the teacher, I think you've lost the dynamics. If you're teaching 100 students, you can't possibly have a relationship where everyone is participating in a learning process."

Being chairman of the department of home economics education, Dr. Fults is involved in the restructuring of the School of Home Economics. All departments within the School except education, will be realigned under the new College of Human Resources. Home economics education will move into the College of Education.

"The College of Human Resources was conceived to deal with the quality of human life and that's what home economics is all about," says Dr. Fults, "so it didn't seem appropriate to have a college and a school dedicated to the same thing."

"Our department will probably go into career education, when that is organized, where all the various vocational educational units—business education, agriculture education, occupational education, etc. will be housed. The higher board and the University have said that those groups that are the most alike should be together—I guess it's more economical and they can work together more readily."

As a personal teaching philosophy, she has a simple motto: "Teaching Is Immortal."

"What it means actually," she explains, "is that a teacher influences someone and that someone teaches and influences someone else and it just goes on and on. Teaching is a tremendous opportunity to positively influence the lives of other people."
1973 Great Teacher Ballot

All living faculty members, active or retired, are eligible for the Great Teacher Award, except previous recipients.

Previous Great Teachers

DOUGLAS E. LAWSON, 1960
E. G. LENTZ, 1961
THOMAS E. CASSIDY, 1962
GEORGIA WINN, 1963
ROBERT D. FANER, 1964
CLAUDE COLEMAN, 1965
JAMES W. NECKERS, 1966
KENNETH A. VANLENTE, 1967
DOROTHY DAVIES, 1968
TED RAGSDALE, 1969
RANDALL NELSON, 1970
RAYMOND RAINBOW, 1971
ANNA CAROL FULTS, 1972

Members of the SIU Alumni Association have annually, since 1960, chosen the Great Teacher of the year—an honor which carries with it a $1,000 cash prize.

Again this year, a living member of the faculty—either active or retired—will be honored for outstanding classroom teaching. This is your invitation, as a member of the SIU Alumni Association, to join in selection of the Great Teacher for 1973.

Your Great Teacher ballot is included in this issue, in the form of a postpaid return envelope inserted behind the covers. Magazines addressed to husbands and wives holding family membership should contain two envelopes.

Because members of the Association are the only people eligible to vote, the relatively small number of copies going to non-members do not contain the specially inserted ballots. This is the total extent of the Great Teacher mailing. There will be no other material.

To vote, simply remove the ballot envelope from the magazine, list your choices for the 1973 Great Teacher in the space indicated, seal and mail. Remember, deadline for receipt of ballots is Monday, May 14.

In completing your ballot, please list three Great Teacher choices in order of preference. Include a brief statement supporting each choice. Keep in mind that the Great Teacher Award is bestowed in tribute to exceptional classroom performance. Other things—such as research and administrative accomplishments—should not be considered.

Campaigning on behalf of any candidate is strictly forbidden by Alumni Association rules. Such practice, with or without the teacher's knowledge, will disqualify a candidate. Your personal choice is desired.

The Award is financed—as it should be—by contributions from alumni. If you wish to contribute please enclose your check payable to the SIU Alumni Association in your ballot envelope.

Please vote whether or not you contribute to the cash award. But your gift, large or small, will help continue the Great Teacher Award.

The Great Teacher Award will be bestowed upon the fourteenth Carbondale recipient at the annual Alumni Day banquet, Saturday evening, June 9. Until that time, identity of the 1973 Great Teacher will not be disclosed.
"I Don’t Know Whether You’ll Be Able To Help Me Either, But…”

Right smack in the middle of the SIU campus in one of the last of the drab brown Chautauqua housing and office barracks sits an office with two helpful people, one smiling secretary and a bunch of people with problems.

Commonly known as the ombudspersons office, it is the last resort for many who have tried "all possible ways to resolve this situation."

There's a little poem by Ric Masten on the front door of this unpretentious place which makes you feel like the people inside really understand your situation even before you've had a chance to spill out your frustrations to them. It goes, in part, like this:

```
put me in your human eye
come taste
the bitter tears
that I cry
touch me
with your human hand
hear me with your ear
but notice me
damn you
notice me
i'm here

we can't be
bothered now
the distant voices said
when i'd come
to share
the butterfly i found
and i'd look
up
```
"I don't make a student fill out anything here—I feel like he has to fill out enough stuff all over campus."

into the nostrils
of the faces
overhead
and i never caught
the giant
lookin' down

Kris Haedrich and Marcus Jones, both SIU graduates and both in their late twenties, are SIU's ombudspersons. They listen, mediate and try to resolve numerous problems for students, faculty and staff members of this University. They are not always completely successful, although that truly seems to be the exception rather than the rule. People with problems are nothing new to them.

For instance, a severely handicapped student was stymied in trying to help himself as best as he knew how. It was necessary for him to check 12 or 13 books out of the library in order to work on a paper in his dorm room. To accomplish the transportation of these books from the library to his dorm, he was forced to impose on a friend for help. When it came time to renew these books, the student was faced with the transportation problem all over again. Being reasonably intelligent, it occurred to him that the renewal process involved only the cards in the books and his I.D. card. He therefore stopped by the library to request that he be allowed to bring just the cards. His appeal was refused. When he asked why, he was told, "That's our policy."

A student received her grade slip for spring quarter in late summer because of a mix-up in addresses. She felt that one of the grades must be a mistake, so she went to the department to check on it only to find that the instructor in question had returned to his native country and left no records behind. The student was told nothing could be done.

A faculty member was forced to drive his wife's car to work when his own, which exhibits the required University parking sticker, would not start. In an attempt to cover himself, the faculty member did display an official parking permit in the rear window of his wife's car when he parked it on campus. Nevertheless, he got a ticket which he appealed and was denied. He further appealed it and was repeatedly denied. When he questioned a member of the appeals board, he was told, "We generally don't approve these types of appeals—that's our policy."

A young man came to the ombudspersons office with a frustrating situation. "I was trying to register and after standing in all those lines, I got to one station and they told me I couldn't complete registering because there was a bursar's hold on my registration. I said, 'What for?', and was told they didn't know—I would have to talk to the bursar about that. At the Bursar's Office, I was told the hold was from Textbook Service. Again I said, 'What for?', and was told I would have to ask Textbook Service about that. I explained that I was trying to get registered and that I had run across the book that must be in question just the day before in unpacking and that I would return it, but that I wanted to complete registration today. I was told that if I wanted to go ahead and pay the fine ($12.00) I would be given a hold clearance so I could finish registering and then when I took the book to textbook rental with my receipt from the bursar, the money would be refunded. So that's what I did; but the people at Textbook Service said there was no way they could refund my money. Is there anything I can do?"

These are only a few of the many problems that people in the University community are faced with today. When they experience these problems, they have not only an outlet for their anger and frustration, but also some people to turn to who specialize in "straightening things out."

The Ombudspersons Office at SIU was officially established at the beginning of the fall quarter in 1969. Organization of the office was due largely to the efforts of the Campus Faculty Sub-Council and a five-person Ombudsperson Advisory Panel was appointed to act as the administrative body when the office was formed.

Originally the office was staffed with one full-time ombudswoman, but during the three years since its
conception, a second full-time position was created to meet the needs of the University community it serves.

The word "om­buds­man" had its origins in a primitive legal order. In the decentralized governments of the Germanic tribes, it referred to a fine collector. Using the ombudsman as a fact­finder and mediator between citizens and their government came into existence centuries ago in Sweden. In the past fifty years, variations of the ombudsman have been used in at least seven other countries, including the United States.

The first attempt to adapt the ombudsman concept to higher education was in 1965 at Simon Frazer University in Vancouver, British Columbia, Canada. A year later, in 1966, Eastern Montana College in Billings became the first U.S. campus to experiment with such an office. Since then, approximately 200 colleges and universities have established some form of an ombudsman service on their campuses.

At SIU, the ombudspersons have found that problems and complaints coming into the office seem to fall into several main categories of origin: 1) a breakdown in communications; 2) individual circumstances for which there are no established channels of resolution; 3) dissatisfaction with existing conditions, no apparent procedure by which to make dissatisfaction known; 4) rigid, harsh and inflexible administration of rules and policies; and 5) lack of experience or naivete.

Kris feels very strongly that a breakdown in communications is the root of most problems coming into her office.

"It has become obvious to me," she says, "that in this large bureaucratic structure, as my secretary so aptly puts it, 'the right hand doesn't know what the left is doing most of the time, and sometimes not even the right knows what the right is doing.'"

"Also," she continues, "On any given day, I have become aware of the fact that dozens of people (especially students) are herded from one office to another by those who conveniently choose to pass the notorious buck."

Concerning the rigidity of rules, she emphasizes, "Sometimes people have an attitude toward rules and policies that is so rigid and inflexible that individuals feel as if there is no room for them anymore. People come to me and say, 'I know that's what the rule is, but this and this and this happened to me and I simply could not fit my life around that rule; and now they're trying to tell me that I have to suffer this and this and this consequences.' If we have a policy that is generally good but doesn't always fit special cases, then we should deal with the special cases in a flexible manner."

The two ombudspersons function independently, handling cases as they come in, either on a walk-in basis or by appointment. "You need personal skill in dealing with other people," says Kris, "so we work separately."

People seeking advice are given the option to choose which ombudsperson they wish to see if they have a preference; otherwise the flow of traffic is directed by the secretary to the ombudsperson who is, or first comes, available.

Each ombudsperson treats her or his case load
“People come to me and say, ‘I know that’s what the rule is, but this and this and this happened to me and I simply could not fit my life around that rule; and now they’re trying to tell me that I have to suffer this and this and this consequences.’ If we have a policy that is generally good but doesn’t always fit special cases, then we should deal with the special cases in a flexible manner.”

exclusively, keeping personal records of each contact according to individual need. All cases are completely confidential.

When a person comes into the office, he or she is usually frustrated or angry and ready to tell what the problem is.

“As he tells me what the problem is,” says Kris, “I start formulating in my mind what kinds of information I need from him to work on the problem. Then I take a case report sheet and fill it out myself. I don’t make a student fill out anything here—I feel like he has to fill out enough stuff all over campus. You know, fill this out, fill that out, write this down, write that down, eat this, don’t eat that. I just let him sit and talk.”

The ombudspersons try to get both sides of the story, put them together with their homework (checking rules and regulations, looking through records, consulting with people) and then try to come up with what seems like some viable alternatives.

A complete record of every action taken on every problem—every phone call, every meeting, etc.—is kept by the ombudspersons.

“I have been repeatedly asked,” says Kris, “if I am often confronted with irrelevant or ridiculous problems and complaints which really have no merit at all, and if so, what I do in such cases. I can’t really answer this question because I refuse to make value judgments about another human being’s concerns. It is my belief that no one who takes the time and trouble to bring his or her concern to my office could feel that it is irrelevant or ridiculous. But obviously those who ask this question must not be of the same opinions; and I would guess that it is probably from their offices and classrooms that my clients come.”

Both of the ombudspersons make referrals when the situation calls for someone more specialized to handle the problem. They usually call and arrange this meeting.

“I don’t want them to feel like they just came here to get sent someplace else, so I set it up,” says Kris.

Some problems brought into the office can be handled in a matter of minutes, others take days, weeks and some even months, depending on the complexity of the situation.

According to statistics released by the office, undergraduate students visit the ombudspersons more than any other group of the University community, although graduate students, faculty and staff bring their problems to the office too.

“The majority of students that came to see me during the last two quarters,” said Marcus, “were black or nonwhite. The black American student population frequented my office more than any other racial or ethnic group.”

In comparison to last year, the number of students visiting the office is about the same. But with total enrollment down about 2,000, this is indicative of increasing use of the office.

Kris and Marcus feel that sometimes just lending a sympathetic ear in a moment of frustration or desperation or taking the time to offer a reasonable explanation or presenting the other side of the coin so that a new understanding can foster acceptance of what was thought to be an intolerable situation are solutions in themselves.

Perhaps Kris summed up their jobs best when she said, “I am hired by the University to assist that bureaucracy in monitoring its performance insofar as the dignity and uniqueness of the individuals it deals with are concerned.”
Basketball--SIU Style

Enrollments in Illinois

For the first time in 20 years, the percentage of college age persons enrolled in Illinois colleges and universities dropped slightly in 1972, members of the SIU Board of Trustees were told by Edward Flentje, deputy chief of the Board staff, from a report prepared by the staff.

While the drop to 61.3 per cent was only fractional, Flentje said most educational planners had expected a steady increase to the year 2000, with a top of 80 per cent attendance by that time.

News of the Campus

In Illinois, the rate of enrollment increase in 1972 was 2.3 per cent instead of the 3.5 projected for the 148 campuses in the state, and 69 of these, including SIU, showed declines. Public junior colleges, however, had an 8.6 per cent headcount increase in total enrollment and for the first time jumped ahead of public senior institutions, which showed a decrease of 0.7 per cent. In numbers, the statewide increase was 10,767, bringing the total to 489,000.

In public senior universities, there was a drop this past fall of 509 at the undergraduate level, where a 4,300 increase had been projected. The drop was attributed to community college expansion and a smaller number of transfers from junior colleges than had been anticipated. All state university systems showed losses this year at the lower division level with the exception of the University of Illinois, where the increase was 4.9 per cent. The U. of I. campus at Urbana showed the greatest increase but did not completely regain the losses of 1971, Flentje reported.

Noting that SIU System enrollment had almost tripled between 1960 and 1970, when the total reached 37,543, the report indicated that the total for 1972 had dropped to 32,184, with 20,349 at Carbondale and 11,835 at Edwardsville.

New Scholarships

Southern Illinois University at Carbondale is stepping up a scholarship program to attract top high school graduates in Illinois.

SIU-Carbonada President David R. Derge has announced that starting in the fall the University will offer 210 awards to the highest-ranking high school seniors on the list of Illinois State Scholars. The list included 15,200 students as of Nov. 1 and SIU-Carbonada has asked 500 of them to compete for the new awards.

Derge said 10 of the SIU-C scholarships will be four-year "full ride" awards covering tuition, fees, room and board. They are valued at $1,800 per year.

Another group of 75 selected students will be offered tuition-fee scholarships worth approximately $600 a year for the full length of winners' undergraduate education.

A third group of 125 winners will get guaranteed campus jobs providing money to cover room and board in a campus residence hall. Recipients will be required to work a minimum of 20 hours a week.

Derge said scholarship winners must maintain 4.25 overall grade point averages (on a 5.0 scale) to keep their awards.

Admissions Director Jerre Pfaff said a testing program is being designed by SIU's Counseling and Testing Center and test dates will be announced later.

It's the second major new scholarship program launched by SIU-Carbonada this school year. The President's Scholars office in September offered 10 four-year and 20 one-year tuition awards to leading scorers on nationwide college board examinations and Illinois students with top 10 per cent scores on the American College Test.

Utilizing Biofeedback

Are you nervous, tense? Do you suffer from migraines, asthma, a spastic colon? Ulcers? Hives? These symptoms are among many which may be psychosomatic in origin, according to Dr. Terry Travis, associate professor of psychiatry at the Southern Illinois University-Carbondale School of Medicine in Springfield, who foresees a method for relieving sufferers dragged down by these symptoms of tension. He is engaged in a relatively new research field utilizing biofeedback, a method by which a bodily process is monitored through the use of an electronic device.

Processes monitored are those over which people usually have no control or awareness, such as heart rate,
blood pressure, muscle tension, or brain waves. This information is then given back to the subject through the use of signals such as a light or a tone.

Dr. Travis came to SIU Medical School from the University of Iowa, where he began research examining specific brain waves known as alpha waves using the biofeedback technique. The alpha waves were so named because they were the first brain waves to be isolated by electronic means. The results of earlier studies showed that these waves, more often than not, were produced by people who were in a relaxed state.

The relationship between alpha waves and relaxation was again shown when a group of scientists tested several Asian meditators with a brain wave machine and discovered that while in meditative states these men produced a considerable amount of alpha.

This finding led to many questions. For example, if the production of alpha can be controlled, can people learn to relax without the use of artificial means, such as drugs or alcohol? Is this the "natural" high that mankind is seeking?

The answers are neither simple nor immediately forthcoming.

Initial experiments to see if people can be taught to increase their alpha production and how they feel while producing it are still underway. The person is hooked up to the biofeedback monitor and told to try to produce a signal, which may be either a light or a tone. The subject may or may not be told that alpha production initiates the signal. He is asked to try to keep the light, or the tone, on as much as possible.

When the session is over, the person is asked how he felt when the signal was on. In previous studies several of the subjects were surprised to have found themselves having a very positive, pleasurable experience, many comparing their sensations to a "high" similar to that produced by various drugs or alcohol. Other subjects, however, found the experience neutral, or even negative.

The next step was to try to isolate what the subjects did to produce the alpha. This is no easy task, and as yet no conclusions have been drawn.

It is known that more alpha is produced with eyes closed than with eyes open. It seems also to occur when the subject has a blank mind, and is not concentrating on anything in particular. Many of the subjects could not pinpoint what it was that they did to produce the alpha. However, most of the subjects were able to increase their production of alpha.

Now comes the most important question of all: how can these studies be applied to those of us who are suffering from the varied consequences of tension? Again, the answer is not clear. Dr. Travis predicts the biofeedback method may be developed as another tool of the psychiatrist to help his distressed patient. Where drugs or counseling may be the "answer" for some people, this technique, whereby you learn to control a part of your own body, may work for others.

Some researchers predict a time in the not-so-distant future when alpha bottles will line the streets and people can enter and hook up to them whenever they want to relax. Dr. Travis is not so gung-ho in his predictions, however. Though he is enthusiastic about his research, he feels there are many unanswered questions concerning the eventual applications of control of alpha production.

School Replaces VTI

The SIU Board of Trustees has acted to establish a School of Technical Careers to assume the redefined role of the Vocational-Technical Institute at SIU at Carbondale.

Associate-degree programs and third-year post-associate specialities and related courses currently offered by VTI have been assigned to four major divisions in the new school.

Only those VTI programs which meet Illinois Board of Higher Education guidelines for inclusion on the university level have been carried over into the new School of Technical Careers, according to Dean Arden Pratt.

The Division of Allied Health and Public Services includes programs in correctional services, dental hygiene, dental laboratory technology, law enforcement, mortuary science and funeral service, and physical therapy assistant.

The Division of Applied Technologies administers programs in architectural technology, automotive technology, construction technology (both building and civil), electronics technology, and tool and manufacturing technology (numerical control).

Aviation technology and avionics technology are included in the Division of Aviation Technologies.

Contained in the Division of Graphic Communications are programs in commercial graphics (both design and production), electronic data processing, media technology (library assistant), and secretarial and office specialties.

Assignment of programs in the divisions was based on similarity in goals, curricula, equipment, facilities, potential new associate degree program areas, projected interrelationship of programs, and proximity after relocation to the Carbondale campus, Pratt said. The new organization will take effect July 1.

Enrollment in the 19 associate-degree programs assigned to the new School was up 7.8 per cent to 1,219 students winter term, compared to the same term in 1972.

Eight programs formerly offered through VTI were phased out in 1972 in response to IBHE guidelines eliminating studies which are readily available in community colleges.
For Members ONLY—SIU Press and University Graphics books at 20% off the published price!

It’s only one way you’ll benefit from belonging to the SIU Alumni Association.

For those of you who have been awaiting the release of *Land Between the Rivers*, we thank you for your patience and understanding in this delay. The book has encountered numerous printing problems, but advance proofs indicate the quality of both text and pictures will be outstanding. Also we are able to inform you that all copies ordered thus far will be personally autographed by all three authors.

For those of you who still haven’t ordered this book, we urge you to do so now. All copies ordered before May 1 will be autographed and all will sell to alumni members at $10 through the Association. As of May 1, the price to members will be $12.50 ($15 to non-members). Order yours today!

**A Secret War: Americans in China, 1944–1945**

*By Oliver J. Caldwell*

This inside story of American undercover activities in China during World War II provides unique insights into the operations of Chiang Kai-shek’s secret service. Caldwell tells his story not only for historians and government leaders, but because he feels that the “American people should know how disastrous U.S. policy in East Asia has been during this century.” The secret war described in the book is the clandestine and sometimes brutal struggle between the OSS and the dreaded secret police headed by the sinister General Tai Li and the efforts of a “third force”—the Triad of Chinese secret societies—which enlisted Caldwell’s efforts to secure American help in ousting Chiang.

**The First Freedom**

*By Bryce Rucker*

This book is a substantially documented account of the dangers threatening all mass media through monopoly, chain and cross-media ownership trends. The book focuses particularly on the appalling lack of diversity of voices in the marketplace of ideas. Rucker provides a brief historical base for each medium and service discussed. He examines chain and monopoly control of the print and broadcast media, the monopoly influence exerted by news services and feature syndicates, the problems that plague broadcasting: the rating services, payola and plugola, the sorry conditions of UHF television and FM radio, the stranglehold over TV maintained by the networks, domination by advertising, community antenna television (CATV), subscription television (STV) and noncommercial television. This is a highly valuable book, not only for those interested in the various media, but for every thinking, listening, watching person.

**New Earth**

*By Jack Chen  
Illustrated by the Author*

Until now, very little firsthand information about Communist China has been available in this country. Of extraordinary importance, therefore, is the story of an early collective farm in East China’s Chekiang Province in the 1949–56 period. The county chronicled in this book is Hsinteng County, one of China’s 2,082 counties. It offers a typical example of the cooperative movement that swept the Chinese countryside and formed the basis of the Green Revolution, a part of the overall policy drafted by Mao Tse-tung. This volume, now published for the first time in America, will provide the general reader, the student and the China specialist with valuable background information which will broaden the understanding of today’s China.

**Land Between the Rivers**

*By C. William Horrell, Henry Dan Piper, John Voigt*

Lying in an area bordered by the Wabash, Ohio and Mississippi rivers, the Southern Illinois country is rich in history, folklore, scenery and natural resources. At about the latitude of southern Virginia, and extending from the prairie farmland of central Illinois to the rugged “Illi—
nois Ozarks,” called locally the Shawnee Hills, the area is the natural terminal boundary for hundreds of plant species reaching out to all points of the compass. It is also the oldest and more sparsely populated part of Illinois, a region of small towns and independent people, typical of the vast mid-American region of which it is a part—the heartland of the U.S.A.—but with unique qualities, features and attitudes which the authors movingly describe in words and pictures. In black and white, as well as color photographs, and in text, the book portrays the region’s physical features, its history, its people, life and customs. An uncommon portrayal of American life in a distinctive region, the book provides a memorable journey both in time and place.

Two Planets
By Kurd Lasswitz
Translated by Hans Rudnick

This fascinating tale of today, yesterday and tomorrow has for decades captured the imagination of Europeans. The utopian vision and technological fantasy of Two Planets has undoubtedly influenced German astronautical thought as well as the fancies of countless readers who have turned from its pages to gaze at the stars and dream of other worlds. In 1897, Kurd Lasswitz, mathematics teacher and philosopher, published a novel about man’s first encounter with beings from another planet. Lasswitz’s Martians differ little from man physically, but ethically, scientifically and socially, they are the prototype of the ideal human being. The story revolves around a group of German scientists who, when seeking the North Pole, come upon a Martian settlement there. The Martians have built an artificial island, adapted to their needs, above which hovers their space station, a giant ring such as twentieth-century astronautical scientists have seriously speculated upon. The action of the story is seen through the eyes of several characters, both Martian and human, and is drawn together by the love affair between a beautiful Martian girl and a member of the exploring party.

The Origins of Civilization
By Carroll Riley

For the beginning student and general reader, this brief, concise ac-
count of the great movements in time of culture and civilizations will be especially valuable. Coverage of the Old World and the New in the book is well balanced, and includes much new material. Special chapters are devoted to the more important areas, such as Egypt, Mesopotamia, the Indus, the Levant, Crete, The Greeks, the Western Mediterranean, China, Mesoamerica and the Central Andes. Illustrated with photographs, drawings, charts and maps.

**Think Back on Us...The Social Record**

*By Malcolm Cowley*  
*Edited by Henry Dan Piper*

This volume illuminates the issues, problems and ideas of the 1930's. Several general essays are included which discuss the familiar themes of the Thirties—communism in its various forms, the pacifist crusade, the crusade against world facism and the collapse of the American economy.

"A rare and exciting collection which makes me want to re-read at least a score of the books from that time"

—William Hogan  
*San Francisco Chronicle*

**Think Back on Us...The Literary Record**

*By Malcolm Cowley*  
*Edited by Henry Dan Piper*

"The book serves the purpose for which Professor Piper edited it—to give young people some idea of what the Thirties were like. . . One thing undergraduates are bound to learn. . . is that the decade is not to be summed up in a single generalization."

—Granville Hicks  
*Saturday Review*

This book covers the literary world in a detailed, week-by-week fashion, roughly from the stock market crash in 1929 to the Pearl Harbor attack in 1941.

**The Illinois Fact Book and Historical Almanac, 1673–1968**

*By John Clayton*

In 1818, when Illinois was admitted to the Union as the twenty-first state, it had three incorporated municipalities and a population of less than 50,000. In its sesquicentennial year in 1968, the prairie state had 1,258 municipalities and over 10,000,000 residents. Why did Illinois grow so rapidly and assume such an important role in the nation's economy? What contributions has the state made to the arts, to the conservation of natural resources, to science, to social work, to recreation and who were the people who helped in the development of Illinois. This book, thoroughly indexed, is the first publication to bring the statistical facts, general information and history together in one book, concisely and authoritatively.

**It Happened in Southern Illinois**

*By John W. Allen*

Included in this book are sketches of the early pioneering days, when wolves were literally chased from the door, stories about the many Indian artifacts discovered among the rolling hills and valleys of the area and articles pertaining to the historic strategic role this region played during the Civil War. Here are glimpses into the past activities of such infamous outlaws as Samuel Mason and the Harpe brothers—who found the area's caves and rivers an attractive location for outlawry—as well as the famous Illinios-born heroes, "Bat" Masterson, "Wild Bill" Hickok and Wyatt Earp. This book can well serve as a reference guide for touring some of the landmarks of historical interest and natural beauty found in abundance in southern Illinois.

A Nickel’s Worth of Skim Milk
By Robert Hastings

Life was not easy for the family of a miner in a small Southern Illinois town during the Depression. The area was largely dependent on coal, and when the mines closed, leaving thousands of men without work, the local economy collapsed. Hastings, a 1945 graduate of SIU, remembers this period as it appeared to a small boy. Born in Marion, Illinois, he was six years old when his father announced, “The mine is closed. It’s all over.” A few days later his parents closed their neighborhood store because nobody had money to pay for groceries. But if this sounds like a dreary life, the author found it far from that. Friends and relatives—and the City Dairy—shared what they had and offered a hand whenever it was needed. “Visiting” was a source of entertainment, as were picnics, church socials and fishing trips. Laughter and tears are mingled in this book of reminiscences.

Siege and Survival
The Odyssey of a Leningrader
By Elena Skryabina

From the Foreword
“When the 900-day siege of Leningrad was finally lifted and the gaunt, brave survivors had basked a bit in the fitful spring sunshine, the Soviet government made one of its rare graceful gestures to these heroic people. It awarded to the survivors the Medal for Defense of Leningrad. Those who had chanced to come through alive got the medal. In all, more than 300,000 medals were passed out—it may sound like a very large total. But when you consider the fact that something like 3,300,000 persons were trapped within the siege lines when the long blockade began on September 8, 1941, the number is not so large. Of course, between 1,100,000 and 1,500,000 persons died during the siege—of hunger, of cold, of disease, of German bullets, bombs and shells.

“A valuable supplement to books that provide a broader view of Soviet life under Stalin” —Saturday Review

SIU Alumni Office
Southern Illinois University
Carbondale, Illinois 62901

I would like to order the following books through the Alumni Association at a 20% savings. I understand that if my order totals $10 or more, I may purchase Siege and Survival, The Odyssey of a Leningrader for $1.05 (80% off the original cost) as a special bonus.

I have included $______ for the cost of the book(s) to members
$______ total Illinois tax on book(s) ordered
$______ .50 postage and handling
$______ total cost

□ I wish to add $1.05 for Siege and Survival. My purchase totals $10 or more.

Alumni Day Activities Scheduled

Alumni Day 1973 has been set for Saturday, June 9, and will feature Class Reunions in all classes ending in “8” and “3” plus the Class of 1972.

Other traditional events of the day will include presentation of Alumni Achievement Awards and the Great Teacher Award. They will be given at the Association’s annual Alumni Banquet.

New officers of the Alumni Association are also to be installed at the banquet. These include Larry Jacober ’62, M.S. ’65, who will succeed Ted Taylor ’44, as Association president.

Jacober is principal at Lincoln Junior High School in Carbondale. He is a past president of the Jackson County Alumni Club.

A complete schedule of Alumni Day activities, along with reservation form and other information, will be included in material to be mailed soon to all alumni members.

Association Seeks Alumni Board Candidates

The SIU Alumni Association is requesting recommendations for nominees for nine positions on its Board of Directors.

Five positions will become vacant this spring when the designated four-year terms expire. There are four seats now vacant as a result of Association decentralization with the Edwardsville campus.

After names have been received, selection of candidates will be in the hands of a nominating committee which will present its slate to the Legislative Council on Alumni Day.

Board terms expire this year for: David Elder ’50, M.A. ’51; Jane Curry Dycus ’57, M.S. ’58, secretary; Everett E. Miller ’39; Ted Taylor ’44, president; and Walter Young ex ’47. Elder and Taylor are the only ones of the group whose terms are renewable.

Suggestions for the board of directors should be sent to Robert Odaniell, Association executive director, at the Alumni Office in Carbondale. All suggestions will be forwarded to the nominating committee.

Drawing club officers and board members from the Evansville, Ind., Wayne, White and Saline County alumni clubs, the regional club officers’ workshop in Carmi was held Jan. 27th. Three of those in attendance were, from left: Dan Rogers, board member of the Wayne County Club; Jim Saul, vice president of the Evansville, Ind. Area Club; and Don Worden, president of the Evansville Club.

BUSY. INTERESTING. Confusing. Challenging.

All of these adjectives fit Doug Weaver's first week on the job as Southern Illinois University's new director of intercollegiate athletics.

"My first week impressions?" Weaver pondered the question aloud. "Well, in one busy week I've had numerous productive meetings with many of the great administration and faculty members who I will be in direct contact with in the future.

"And I have been extremely impressed with their cooperative attitude and their desire to help us have a great program."

Weaver was the man SIU-C chose last February to handle Salukis' athletic director chores. He appears to be glad he accepted. And so does SIU.

"We were fortunate to be able to recruit Doug as our athletic director in the face of stiff competition," T. Richard Mager, SIU-C Vice President for Development and Services said of the 42-year-old Weaver.

"Doug had several choices to make, and the fact that he chose Southern Illinois University makes the future of athletics here much brighter.

Weaver is ideally suited to the program at SIU because of his broad and varied background with great athletic programs of the prestigious Big Eight, Big Ten and Pacific Eight conference," Mager continued.

Weaver assumed his duties at SIU on Feb. 20. He filled the position held for 15 years by Donald Boydston until last October, then temporarily held by Saluki assistant AD Bill Brown.

Before coming to SIU, Weaver was a highly-successful assistant football coach at UCLA.

He was impressed with SIU's administration, faculty, student body, alumni and university friends from the start.

"Their zeal was contagious," he remembers.

Southern Illinois University President David Derge welcomed Weaver to Carbondale by saying, "I am delighted that Doug Weaver chose to accept the position of athletic director at SIU. His athletic and academic credentials are impeccable. Beyond that, he is a man of great moral character who has the experience and abilities necessary to move our athletic program forward."

Weaver served as the assistant head football coach at UCLA under Pepper Rodgers the past two years. He served as defensive coordinator and defensive secondary coach in addition to his administrative duties there.

He had accompanied Rodgers to UCLA from Kansas in 1971.

Weaver was out of coaching in 1970 while practicing law. Previously, from 1967 through 1969, he had been a member of Rodgers' defensive staff while a full-time law student at KU. He passed the Kansas
The new Saluki athletic director served as head coach at Kansas State University for seven seasons (1960-66) before going to KU to study law. Before that he was the first assistant coach to Dan Devine at the University of Missouri in 1959 and line coach at MU in 1958.

For two years prior to that he was an assistant mentor at his alma mater, Wichita State, as frosh coach in 1956 and as a varsity aide in 1957.

Weaver was a linebacker on the 1950-1-2 Michigan State teams, with the Spartans being voted National champions his senior season. After graduating from Michigan State with honors, he was in the Air Force for three years.

Doug prepped at Goshen, Indiana High School where he gained all-state honors as a center in 1948 and was valedictorian of his senior class.

The Alumni Association recently presented Athletic Director Doug Weaver (right) with a maroon-colored suit, maroon sport coat, plaid slacks and maroon tie. Many SIU administrators have been wearing maroon sport coats as a sign of school spirit. The presentation was made on behalf of the Association Board of Directors by Executive Director Bob Odaniell (left) and President-Elect Larry Jacober.
centers Jim Blamy (1.5) and Ed Benton (1.6).

"We have a good nucleus of players returning for next season," said Lambert. "Of course, we will have to find a replacement for Hawthorne."

Hawthorne closed out his career as the 10th leading scorer in SIU basketball history. He scored 240 points as a sophomore, 311 as a junior and 450 as a senior to finish with 1,001 points and move ahead of Don Hepler, who had 1,000 points from 1958-61.

WHAT KIND OF SUCCESS SIU'S baseball team will have this spring will depend to a large extent on the pitching staff.

SIU coach Itch Jones lost three of his four top hitters from a year ago so he's building his hopes around five veteran hurlers and two newcomers.

Starters Scott Waltemate, Steve Randall and Rick Ware and relievers Jim Bokelmann and Robin Derry all return from the 1972 staff which led the nation in fewest runs allowed (based on a 1.90 per game average).

Added to that list are Bill Dunning and Bob Klass, two rookies who figure very high in Jones' pitching plans.

"With 100 per cent concentration," said Jones, "this pitching staff could lead us back to the College World Series."

Itch admits the Salukis may not have the overall power that was present last season. Biggest losses are Mike Eden (.412), Danny Thomas (.369) and Dan Radison (.362), who combined for nearly half of SIU's run production in '72.

Still, the Salukis have five regulars back among their 11 returning lettermen. One of those is center fielder Joe Wallis, who earned second team all-American honors last season after finishing with the third highest batting average (.446) in the country.

Jones can also count on second baseman Howard Mitchell (.333), right fielder Ken Kral (.301), catcher Larry Calufetti (.256) and shortstop Stan Mann (.231).

"We may not have the overall power we had a year ago," said Itch, "so instead of going for the long ball, we'll be emphasizing bat control more than before."

SIU TRACK coach Lew Hartzog hopes his thin-clads are able to enjoy the same degree of success outdoors this year as they did during the 1973 indoor campaign.

In February, the Salukis ran away with the Illinois Intercollegiate indoor championships and the Central Collegiate Conference indoor championships crown to raise their string of consecutive major track titles to eight in a row over two years.

And Hartzog thinks his troops will be even better outdoors.

His goals for SIU's trackmen in 1973 are simple:

"First, we want a higher national ranking. Second, we want a much-higher finish in the NCAA outdoor championships."

In 1972, Southern had 13 tracksters to qualify for the NCAA championship meet and 12 of them return this year.

The Salukis' only major loss, personnel-wise, was Ivory Crockett, a two-time all-American sprinter.

NCAA qualifiers returning include--Mike Bernard (fifth-place finisher in the high jump), Bill Hancock (long jump and high jump), David Hill (mile and three miles), Jack St. John (steepchase and three miles), triple jumpers James Harris and Phil Robine, "Gerry Craig (three miles), Stanley Patterson (220), Terry Erickson (440), the Saluki mile relay (Erickson, Lonnie Brown, Gerald Smith and Eddie Sutton) which finished fourth, and three-fourths of the 440 relay tandem--Erickson, Sutton and Patterson.

Chances are excellent that Gerry Hinton, middle-distance and distance sensation as a freshman four years ago, has finally recovered from a nagging foot injury in time for a sound senior season.

Other returning lettermen are quarter-milers Ed Wardzala and Ken Scott, Al Stanczak (880), Randy Ullom (pole vault), Guy Zajonc (pole vault), Jeff Bayles (steepchase), Kent Kasik (discus and shot), Tom Liesz (javelin), Lino Bramucci (440 I.H.) and Bill Barnett (hammer). Freshmen Gary Mandehr (Antioch), Joe Laws (Memphis, Tenn.) and Wayne Carmody (Belleville) provide additional strength.
Alumni, here, there...

1921 Elizabeth Kenney, 2, is retired and lives in Belleville.

1922 John Page Wham, 2, Honorary L.L. D. ’66, former chairman of the SIU Board of Trustees, is a lawyer with the firm Wham and Wham in Centralia. He was a recipient of the Alumni Achievement Award in 1966 for outstanding professional achievement. His wife, the former J. Faye Sneed, ex ’28, president of the SIU Foundation, has been appointed to the Board of Trustees of the Teacher Retirement System with the State of Illinois. The Whams make Centralia their home.

1927 Mr. and Mrs. Lewis J. Baldwin (Grace May, 2, ’33) reside in Union, Mo. Mrs. Baldwin is the third and fourth grade teacher in the St. Clare Catholic School.

1928 Margaret Armentrout, 2, ’30, resides in Benton where she is retired. Mrs. Jacob C. Frank (Grace K. Frank, 2, ’56), lives in Belleville where she is a retired elementary school teacher.

Marvin M. Muckelroy, 2, ’30, who was a test engineer with the Grand Tower power station of the Central Illinois Public Service Company, has retired after serving more than 20 years with that company. He and his wife, the former Dorothy Benner, ’29–2, make Murphysboro their home.

1930 Mr. and Mrs. C. B. Rippley (Mabel McMinn, 2) live in Alton where Mrs. Rippley is retired from the Alton Community School Unit.

1931 H. Walton Holifield, 2, is president of the Brookport National Bank. He and his wife, Verna, make Brookport their home.

1932 James D. Gillmore, 2, ’36, is a vice-president with the Bank of DeSoto. He and his wife, Pauline, make DeSoto their home.

1935 Robert A. Chamness is the owner of Belle Valley Nursery in Belleville where he and his wife, Ida Niebruegge Chamness ’67, reside.

1937 Loren H. Allen is a media coordinator with the Okaloosa-Walton Junior College. He and his wife, Doris, live in Fort Walton Beach, Fla.

1938 Carl G. Perry is a self-employed attorney and resides in Kansas City, Mo.

1940 Mrs. Walter S. Meyer (June Menees) lives in Walnut Creek, Calif., where she is director of food services.
with the Walnut Creek School District.

1941 G. TAFT BAKER is superintendent of Carterville Community Unit #5. He and his wife, the former EDITH BARWICK, ex '41, live in Carterville.

CHARLES PRATT is a vice-president with American Export Industries, Inc. He and his wife, the former BARBARA FRANCES TODD, ex '43, have two children and reside in Alhambra, Calif.

1942 WALLACE W. PRICE, a specialist in personnel administration and urban affairs, has been named corporate director of urban affairs and equal employment opportunity with Pan American Airways. He and his wife, Hortense, have three children.

1943 JOHN W. REED, Sr., ex, former vice-president of the SIU Foundation Board, sold his business, The Physicians Supply Company located in Herrin, and has retired to the Fort Myers, Florida area.

1945 LORRAINE L. HUCK lives in Centralia where she is retired.

Mr. and Mrs. Albert Lee Shavers (MONETTE E. VAUGHN, ex) live in Tamms where Mrs. Shavers is a retired substitute school teacher.

1948 ROBERT J. WILLIAMS, ex, has been named acting director of the Illinois Agriculture Department by Gov. Daniel Walker. He previously was director of the Wabash Valley Interstate Commission and the Wabash Valley Association. Williams, his wife, Dorothy, and their two children, Kevin and Nancy, live in Mill Shoals.

1949 ROY K. WESHINSKEY, M.A. '50, is an instructor at SIU. He, his wife, the former DOROTHY GRACE FULKERSON '52, who is assistant to the dean of General Studies, and their two children, Gwenna and Kern, make Carbondale their home.

PAULINE C. WRIGHT has been assigned to the AID Foreign Service Personnel in Washington, D.C. Prior to her Washington assignment, Ms. Wright had served 14 years overseas with the Agency for International Development.

1950 Mr. and Mrs. Charles C. Ingold (MARY V. INGOLD) reside in Alexandria, Va. They have returned to the U.S. after spending seven years in Southeast Asia, where Ingold was assigned as an architect to USAID/LAOS.

1951 GEORGE R. DENISON is a journalism and English teacher in the San Diego High School. He makes his home in San Diego, Calif.

DOUGLAS A. GARBER, ex, is a branch manager flight systems engineer with Douglas Aircraft Company. He, his wife, Lois, and their two children, Melodie and Mark, make their home in Palmdale, Calif.

JACK D. MOORE is an associate di­ rector with the U.S. Army Audit Agency. He resides in Alexandria, Va.

1952 Mr. and Mrs. Eric V. Brummitt (PATRICIA ANN BURKS) and their two children, Stephen and Marjorie, make their home in Collinsville where Mrs. Brummitt is a third grade school teacher in the Collinsville Unit.

1953 Mr. and Mrs. Stewart B. Coch­ ran (MARJORIE KING STURM) and their son, Douglas, live in Santee, Calif. Mrs. Cochran is a sixth grade teacher for gifted students in the San Diego City Schools.

1954 DEAN BARRINGER, M.S. '60, Ph.D. '71, has been appointed head of

the Illinois Department of Registration and Education by Gov. Dan Walker. His wife is SHIRLEY WOMICK BARRINGER 62.

Harold Gene JOHNS has been re-elected to the State Senate from the 59th district in southern Illinois. He and his wife, the former EVA CAROLYN PRINCE, ex '50, live in Marion.

1955 Air Force Major CLIFFORD A. KARCH, professor of aerospace studies at Holy Cross College, has been awarded the Air Force Meritorious Service Medal. He has three daughters, Kaye Gail and Kim.

Patrick H. Mudd, M.A. '59, is superintendent of the Dupo School District. He, his wife, MARTHA A. GOODWIN Mudd '70, and their three children, Connie, Patrick, and Carol, live in Dupo.

Norman E. Strotheide, previously stationed in London, England, is a radar navigator at Seymour-Johnson AFB, N.C. Assigned to a unit of the Strategic Air Command, Strotheide has completed a tour of duty in Vietnam. He and his wife, GLENNA MORRIS Strotheide, ex '54, have five children.

Major Lewis J. Thras her, M.S. '56, has received his second award of the U.S. Air Force Commendation Medal at Luke AFB, Ariz. Having completed a duty in Vietnam and 18 months in the Republic of Korea, Thrasher is director of medical services with the 26th Air Division at Luke.

1956 Charles B. Borgers, M.S. '58, is a guidance counselor with the Dongola Unit and Goreville School System. He, his wife, Patricia, and their three sons, Charles, Steve and David, make Metropolis their home.

John C. Golish has been appointed director of compensation with the Anchor Hocking Corporation. He formerly was manager of compensation with the Remington Rand Division of the Sperry Rand Corporation. He and his wife, Roseanne, have three children and reside in Lancaster, Ohio.

Russell L. Peithman, M.A. '61, director of the Nature Museum in Charlotte, N.C., has received the Elsie M. B. Naumberg Award from the National Science for Youth Federation. Formerly curator of the museum at SIU, Peithman, his wife, LOIS JEAN BAUERNFEIND, VTI '55, and their daughter, Lynn, reside in Charlotte.

Joseph J. Perjak, VTI, is a division controller with the Wayne Feed Supply Company, a division of Allied Mills, Inc. He and his wife, Clara, have four children and make Fort Wayne, Ind., their home.

1957 George W. Bain is director of family services with Tarrant Baptist Association. He and his wife, Mabel, reside in Ft. Worth, Texas.

Mr. and Mrs. John E. Beasley have two sons and reside in Knoxville. Mrs. Beasley is a fourth grade teacher at the Lincoln Middle School in Galesburg.

Archie D. Grimmett has been appointed director with the office of equal employment opportunity at the Smithsonian Institution in Washington, D.C. He and his wife, Jessie, have two children and reside in Woolbridge, Virginia.

1958 Douglas H. Craig is a supervisor and engineer with the Southwestern Illinois Coal Corporation. He, his wife, Eileen, and their two children, Susan and David, make their home in Steeleville.

John A. Gelch, M.S. '59, is athletic director and director of physical education at William Rainey Harper College. He, his wife, the former Shirley Acuff '57, M.S. '62, and their two children, Lynne and Tony, make Arlington Heights their home.

Dana R. Grantham is a soil scientist with the Soil Conservation Service. He, his wife, Barbara, and their two children, Debbie and Kevin, make Rockford their home.

Robert T. Mig hell has received his Master of Religious Education degree from the Southwestern Baptist Theological Seminary in Ft. Worth, Texas.

Maxine Rosenbarger, Ph.D. '70, former director of the Southern Illinois Health Services Coordination Program, Inc., is an instructor at SIU.

Major and Mrs. James R. H. Stumpf (Kathryn J. McManigal, ex '59) and their two children, Don and Dawn, make George AFB, Calif., their home. Stumpf is a weapons system officer with the United States Air Force.

Glen E. Zilmer has been appointed hospital administrator with the Suburban Cook County Tuberculous Sanitarium District. He and his wife, Jennie, live in Hinsdale.

1959 Donald D. Batts is director of special education with the Taylorville Public School System. His wife, the former Rachel Jane Kinison '54, M.S. '65, received her Ph.D. degree in special education from St. Louis University in 1971. The Batts make their home in Taylorville.

Illinois Gov. Dan Walker has appointed ROLAND BURRIS director of the General Services Department with the state. He was formerly second vice-president with the Continental Illinois National Bank and Trust Company of Chicago.

Gerald Cuendet, M.S. '63, has been named superintendent of the Carterville Unit School System, effective July 1. Presently superintendent of the Unity Point School District south of Carbondale, Cuendet was formerly at the Carbondale Community High School for five years. He and his wife, Patricia RAE DEY CUENDET '59, M.S. '68, have four children and live in Carbondale.

Harlan R. Highsmith, who is assigned to a unit of the Air Training Command, is an operations officer at Randolph AFB, Texas. His wife is BARBARA ANNE WILLIAMSON HIGHSMITH, ex '59.

Rosa I. McLain lives in McLeansboro where she is a retired teacher.

William M. Ozburn has been appointed supervisor of conferences with the University of Georgia's Center for Continuing Education.

The Rev. ERNEST D. STANDERFER, former pastor of Carterville First Baptist Church, is the assistant director of stewardship development with the Southern Baptist Convention. He and his wife have two children and live in Nashville, Tennessee.

Mr. and Mrs. Leroy A. Woodard (ZEITHER OWEN WOODARD, M.S.) have two daughters and reside in East Alton where Mrs. Woodard is an elementary school teacher in the East Alton School District.

1960 William K. Ickes, Ph.D., chairman of the department of speech and theater arts with Texas Tech University, has been named a Fellow of the American Speech and Hearing Associa-
tion. Prior to becoming department chairman in 1969, Ickes served seven years as director of the Speech and Hearing Clinic at that university. He and his wife, Shirley, have four children and reside in Lubbock, Tex.

Robert P. Schulhof is a self-employed attorney in Carbondale where he, his wife, Marge, and their two children, Robert and Kristina, make their home.

George T. Weaver, M.S. ’63, is an assistant professor with the SIU Department of Forestry. He, his wife, Marita Hogue Weaver ’67, and their three children, Bradley, Douglas and Eric, make Anna their home.

Robert S. Yuill is marketing manager with American Fiberglass Inc., of Goreville. Yuill formerly was a vice-president with the Yuill Music Company in Herrin. His wife is the former Margorie Selle, ex ’65.

1961 Norbert R. Backs has been appointed to regional credit supervisor with the agricultural division of the Olin Corporation in St. Louis, Mo. He and his wife, Carol, live in Ellisville, Mo.

Mr. and Mrs. William H. DuFour (Mary Lingle DuFour) live in Marion. Mrs. DuFour is a caseworker with the Illinois Department of Public Aid.

William B. Hastings, M.A., has received the honorary degree of Doctor of Humanities from the Combs College of Music in Philadelphia, Pa.

Wayne Douglas Kirk has received his third award of the U.S. Air Force Commendation Medal at Andrews AFB, Md. Cited for meritorious service as a supply management staff officer with Headquarters Air Force Systems Command, Kirk has completed a tour of duty in Vietnam. His wife is Patsy Sue Eveland Kirk, ex ’65.

Mary Jane McLain is a second grade school teacher in the Carmi Community Unit.

A past superintendent of Palasade School in Hinsdale, he was principal of the Marie Schaefer Elementary School in O’Fallon at the time of his death. Mr. Barra is survived by his wife, Elizabeth, a daughter and a son.

1970 John W. Jones, M.S., of Chicago, died January 12 of a heart attack. Leo M. Krause died August 26 after a kidney transplant attempt. He is survived by his wife, Kathie, his parents and a sister.

1971 Charles A. Gilpin III died December 6 in Miami, Fla., after an illness of one year. He was a free-lance artist. While at SIU, Mr. Gilpin was a writer for Grassroots, The Search, several literary journals and the Daily Egyptian, co-authoring the cartoon strip, “The God Squad” for that paper. Survivors include his parents and grandparents.

The Alumni Office also has been notified of the following deaths:

1909 Emma Cruse Schutte, Ashland, Ore., December 20.

SIU CHAIR WITH CREST

Captain's chair ($42.00) or Boston rocker ($36.00) ruggedly constructed of yellow birch and finished in black lacquer with antique gold trim. The SIU seal is silkscreened in gold on the backrest. All orders shipped express collect direct to you from the factory at Gardner, Mass. Delivery in six to eight weeks. Illinois residents add 5% sales tax. Check with your local REA express for shipment costs: arm chair—33 lbs., rocker—26 lbs. (Approximate shipping cost of arm chair to Chicago—$17.40, to Washington, D.C.—$14.40, to Dallas—$21.60, to San Francisco—$27.80.)

T-SHIRTS FOR CHILDREN AND ADULTS

Adults and children alike will love these easy-going cotton knits in the SIU colors with SIU imprint—and you'll love the price. Available in children's (C) sizes S, M, L and Adult's (A) sizes S, M, L, X-L.

Maroon with white letters @ $2.25
White with maroon letters @ $2.25

Available in adult sizes only:
Maroon with white letters and edging @ $2.45
White with maroon letters and edging @ $2.45

Price includes tax, postage and handling.

SIU PLAYING CARDS

Handsome SIU playing cards feature the finest patented Redi Slip plasticized finish which resists wear and can be wiped clean with a damp cloth. One deck backed in white and gold, the other in maroon, white and gold—both with the SIU seal in gold. With an extra joker for canasta in each deck, they're packed in a twin-tuck gold carton and mailing case. The perfect gift and only $3.00 a set. Illinois residents add 5% sales tax.

SOUTHERN ILLINOIS UNIVERSITY GLASSES

Here's a conversation piece with practicality that's exclusively ours! A 12 1/2 oz. set of glasses with chip resistant rims, weighted bottoms, and baked on crest and lettering. Safe for use in automatic dishwashers. Packed for safe shipping in cartons of eight. The price of only $6.00 includes handling charges, packaging, postage and tax.

Summer jobs, both part-time and full-time, are becoming more and more important to an ever-increasing number of SIU students. Scholarship and loan funds simply haven’t kept pace with student needs in recent years. For many students, summer presents an opportunity to get out and earn more money to finance an education through the rest of the year. At the same time, a summer job can be an educational experience in itself. A full roster of summer jobs in the Student Work and Financial Assistance Office could spell opportunity for a great many SIU students. Summer work can play a great part in career goals and individual maturity.

Information on jobs in federal and state agencies is available, but we need information on job openings in local government agencies and private businesses. We believe that you in the Alumni Association, recognizing that a primary objective of your organization is to help students, can be of assistance. You may not be in a position yourself to offer summer employment, but if you know someone who is, please let us know. We’ll be grateful, and so will a lot of students! Please write or fill out the form below and send today to:

Summer Employment Coordinator
Office of Student Work and Financial Assistance
Southern Illinois University
Carbondale, Illinois 62901
(618) 453-4334

Or, if you live in the Chicago area, write or call the SIU Chicago office:

SIU Information Office
625 North Michigan
Suite 500
Chicago, Illinois 60611
(312) 337-0158
