Summertime at Southern
Honorable & Mentionable . . .

Coordinated drug raids in the Carbondale area in May, conducted in cooperation with SIU, resulted in the arrest of 20 persons and confiscation of what authorities termed a "large haul" of controlled substances.

George Halpin, Chicago, the deputy regional director of the Federal Bureau of Narcotics and Dangerous Drugs, said SIU President David Derge had "declared war on hard drugs" at an August 7, 1972 meeting with law enforcement officials.

Agents said controlled substances picked up included marijuana, LSD, PCP and what agents termed a "large stock" of about 8,000 Amytal tablets.

President Derge issued a formal statement following the early morning drug raids, stating:

"We realize that all campus communities face a serious drug problem. It is our intention to make the Southern Illinois University at Carbondale environment so hostile to pushers and users that people with this unfortunate propensity will find it extremely difficult to stay here.

"Our dedicated goal is to eradicate the drug problem.

"Our intention to do so is clearly shown by the University's continued cooperation and interest in ending this problem."

In an editorial on the drug raids in its May 21st edition, the St. Louis Globe Democrat called Derge "the tough-minded president of Southern Illinois University at Carbondale" and said he "easily could qualify for some sort of an educator-of-the-year award. Maybe of the decade."
Admissions are down at colleges and universities all over the country. And SIU, like other senior institutions, is trying to do something about the declining enrollment. Alumni can help too. See page 2.

Spring Fest '73, a week-long celebration for students and the Carbondale community, featured a wide range of activities planned by the Student Government Activities Council. The story in pictures starts on page 4.

Karen Craig, chairman of the Department of Family Economics and Management in the School of Home Economics, wrote the article beginning on page 6 for Alumnus. It's all about the high price of food today—how it got that way and what you can do about it.

Cover photo: Lake-on-the-Campus scene by Bernie Weithorn

In an effort to stop the "student recession" which institutions of higher education are experiencing, the Southern Illinois University at Carbondale Admissions Office is trying to personalize their recruitment tactics. By working in smaller geographic areas rather than concentrating on state-wide campaigns and by recruiting on a one-to-one basis, the office hopes to stem the admissions drop which has become a reality for colleges and universities all over the country.

Visitors have always been welcome to the campus, but now these visits are encouraged. Besides bringing the student to the University, the Admissions Office is also responsible for taking the University to the student—at high schools and community colleges throughout the state. SIU's recruiting officers expect to travel approximately 70,000 miles this year taking news of the University to students all over the state.

The office also has an honors recruitment project each spring and fall when academic achievers are personally invited to visit the campus. A program designed to cater to the academic-talented provides them with information about departmental offerings, University programs specifically for scholars and the oppor-
Here's How You Can Help With Student Recruitment

If you know high school seniors or other prospective students who are still undecided about college, tell them about SIU. In addition, let the Admissions Office know who the students are so that they can send application forms and information. Just call: (618)-453-4381 or write:

Jerre Pfaff
Director of Admissions
Southern Illinois University
Carbondale, Illinois 62901

...tunity to meet with faculty members in their respective disciplines.

Jerre Pfaff, director of admissions at SIU, says his goal is “to boost the number of new admissions while continuing to provide meaningful services to new students.”

In the three-year span from 1969-72, the total number of new first-quarter freshmen dropped significantly. In 1969, there were 3,809 new freshmen enrolled fall quarter. In 1972, 2,632, a 31 percent decrease.

SIU, of course, isn’t the only state university facing this problem.

In a report made to SIU’s Board of Trustees in December, it was noted that “the fall 1972 enrollment figures for Illinois higher education show a continuation of the steady five-year decline in the rate of increase in overall enrollment from a peak in 1968 of 10.2 percent to 2.3 percent in 1972. This increase represents the lowest annual increase in Illinois since 1953. The actual rate of increase also falls short of the 3.5 percent increase which had been projected. Sixty-nine of the 148 campuses in Illinois suffered a decline in enrollment. The pattern in Illinois is similar to the national trend.

“Of the three sectors of higher education in Illinois—public universities, public junior colleges, non-public institutions—only the public junior colleges met growth expectations in the fall. The public junior colleges passed the public senior institutions in total enrollment for the first time with an 8.6 percent headcount increase, compared to a 0.7 percent decrease for the senior public universities.

“The public senior institutions and the non-public institutions have suffered decreases in enrollment totaling some 4,500 students. These decreases are due in part to the larger number of students attending public community colleges, for the data indicates that the greatest enrollment decreases were at the freshman and sophomore levels.”

A comparison of fall quarter freshmen in the last two years shows 2,632 matriculated last year and 3,742 accepted as of May 1 for the fall term of 1973. The ’73 figure is misleading, however, as only about 50% of those accepted actually matriculate. So again, the admissions show a downward trend.

It hasn’t always been this way for Southern Illinois University. The decade from 1956-65 marked a total enrollment increase of 184 percent from 6,104 to 17,356. Enrollments hit an all-time high in 1970 with 23,843 students attending SIU (at both campuses).

These years saw the growth of an “open door” policy which still exists. Although SIU is more selective during the regular academic year of September through June (students must rank in the upper one-half of their graduating class or achieve equivalent test scores on the American College Test), any Illinois high school graduate who does not meet regular admissions policies may begin an education during the summer term on a probationary basis.

In 1968, the University (both campuses) ranked 17th in full-time enrollment among the nation’s colleges and universities. SIU was ranked 22nd in the nation in 1972.

Sometime during the last few years, high school students began looking at higher education differently. Some want to work or travel for a year before college, some go into the service and others select community colleges. Many are simply confused and don’t know where to get their questions answered.

This is where the SIU Admissions Office comes in. And this is the purpose of individualizing their approach. Not only the welcome mat, but also the red carpet, is out for new students at SIU.
Spring Fest '73 Offers Varied Activities

Alternative '71 and Alternative '72, both programs designed to offer options to the disruption and chaos that took place in the spring of 1970 at Carbondale, were replaced this year with a new type of celebration—Spring Fest '73.

The Student Government Activities Council at SIU put together the week-long affair which featured all sorts of entertainment for both students and the community. Events such as canoe races, frisbee contests, casino night and a municipal fair were offset with free balloons, snow cones and watermelon and highlighted with a Sonny and Cher concert at the end of the week.

Activities were plentiful this spring and, once again, the campus was quiet.
Rising Food Prices--How Can We Cope?

by Karen Craig

The Survey Research Center of the University of Michigan reports that "during the last few months the American people's thinking about economic matters was dominated by their personal experience in grocery stores." 1

Many factors are contributing to consumers' attitudes toward food purchasing. The very nature of food—that the supply must be regularly replenished—helps maintain the furor over the increased prices. Although the price of housing has increased at a faster rate than food, people aren't reminded of the price increase each week. Another factor making satisfaction of the food want difficult is the nature of the kind of food we choose to consume. Most people do not buy food for purely nutritional reasons. If so, the cost of liver, not steak, would have increased to $2.69 per pound; the nutritional value, supply, and ultimately, demand would have increased the cost.

Our desires for food are a reflection of our culture, self-perception and environment in general. At another time in history when households grew, caught or obtained food for themselves on a day-to-day basis, there was a greater tendency to prefer what was near-at-hand. Today, a whole variety of foods is as available as the closest supermarket. Individual moods and preferences can be more easily accommodated.

If the need for nourishment only were satisfied, then fewer items and less complex food preparation would be acceptable in all households.

Added to the difference in individual preferences are the changing wants. An obvious reason for changing food preference is the desire to lose or gain weight. Depending upon the goal, foods richer in carbohydrates or foods rich in protein may be preferred.

Although everyone eats and food is one of the few commodities needed by all segments of the population, individual differences in food preferences make it exceedingly difficult to recommend either specific foods to meet minimum daily requirements or acceptable ways to reduce food costs.

FOOD PRICES

Changing food prices are inevitable; food prices are very sensitive to both supply and demand.

Supply

Factors considered significant in food supply include nature, marketing practices and policies and technology. Few commodities are more directly related to natural disasters such as floods, droughts or hail. The growing season which is late or shortened because of cold or wet weather may reduce by half or more the supply, ultimately driving the price of food up with no increased profit for the farmer or middleman.

Marketing policies and practices may also cause the price of food to increase at what appears to be an astonishing rate. Changes in transportation charges (wage increases or fuel shortages) cause an increase in food costs. The number of middlemen who have a part in transporting food from farm to market may also play an important role in increasing food prices.

The volume of the retailer from whom the food is purchased is also a significant factor in the price of groceries. If there is slow turnover, the store probably cannot participate in special quantity buys to obtain products which can be sold for lower prices.

The effects of technology can be observed at all levels of food production, from improved efficiency for the farmer to more efficient (hence less expensive) production and transportation of food to the consumer.

Demand

Demand for any product is reflected by how much people are willing to spend for that given product. Until recently, the American people wanted food—meat in particular—enough to pay whatever price might be asked by the retailer. As with all price/demand relationships, however, the price of food reached the point where people were no longer willing to pay the price. When that happened food purchases were affected. In early April, consumers organized to express their dismay at high prices of meat. It was hoped their collective demand would be more observable, thus decreasing the price of meat to the point where they would again be willing to buy.

Other factors more regularly a part of consumer demand for food are cultural, including religion and
health. The change in policy by the Catholic churches of the world with regard to fish only on Friday undoubtedly has had an effect on the demand for meat.

Health concern also influences rather directly the demand for meat. The American public which is repeatedly reminded of its overweight, high cholesterol diet, and need for “good health” has changed its eating habits substantially in the past 50 years. Eggs, which had until mid-century been a standard breakfast food, have become less prevalent in breakfast menus because of the high cholesterol content. Calorie content of American diets has changed too. A relatively small proportion of the American people are employed in heavy-work jobs which require more calories to sustain the body.

The shift in demand for foods is the result of many factors. People prefer meats and fresh vegetables which tend to be more sensitive to supply produced, as well as being extremely vulnerable as perishable items. Even so, people prefer these products; thus the demand and ultimately the price is high.

How High is High?

Food prices have increased to an all time high. Between December, 1972 and April of this year, food prices increased 8.5 points which means that a bag of groceries which cost $12.60 in December cost $13.45 in March.

Thus the cost of feeding a family on a “moderate” food budget would be:

So what precipitated the drastic price increase in such a short time? Special circumstances which include a drought over much of the earth causing an increased demand for U.S. food products, the devaluation of the dollar and the release of Phase 2 controls of industry in favor of Phase 3 controls which took effect January 11 of this year have all contributed to the extreme changes in food prices.

Reductions in personal income taxes, increased social security benefits and Federal Reserve activities all contribute to the relatively strong economic expansion right now. American consumers may be experiencing a case of “inflationary psychology”—a pervasive skepticism about the nation’s ability to hold prices down. Some feel prices are high now, but they will be higher later on.

In analyzing the change in prices for the different food categories, the Monthly Labor Review for May shows the following price changes. Changes are shown in relative measure on a point basis.
largest increases—undoubtedly because they were used as substitutes for beef which most Americans prefer. Other items which show substantial changes are fresh fruits and vegetables and eggs.

COPING WITH HIGH PRICES

Granting that food prices are high and will probably continue to be high, what can be done.

Budgeting for any commodity involves three steps:
1. What do you want? What goods will satisfy your wants?
2. What resources are available for your use?
3. What resources can be allocated to obtain the goods?

Needs and Wants

In evaluating what needs and wants exist, several factors must be considered. Are there special diets which must be accommodated? Is there a special constraint on the time available for food preparation activities? What are the food preferences of the household?

What kinds of foods do you want? Some family food managers may want to encourage food consumption which emphasizes a less expensive food group to reduce the overall cost of food for the household. The share of the food dollar spent for each group is to some extent a function of personal preference. Families may be willing to use economical choices of one group if they can splurge on another; for example, buy less meat and more cereal products which meet some of the same nourishment needs. Others may be more economical with food costs at home and spend the difference eating out.

In some foods, convenience may result in lower cost to the consumer. For example, built-in convenience in most processed potato products and in orange juice frequently results in lower cost. Small packages of dehydrated potatoes and frozen fries cost about the same as home-prepared ones. Buying the large package results in worthwhile savings. These potato products are processed and relatively compact, and they can, with proper storage facilities, be kept longer and more conveniently than fresh forms.

Orange juice made from three processed forms—store-squeezed, canned juice and frozen concentrate—costs much less than home-squeezed juice. Frozen concentrate costs 44 (6 fluid ounce can) and 41 (12 fluid ounce can) percent of the home squeezed cost.7

Another area influencing current food buying practices is the promotion and demand for organic or health foods. An estimated $400 million was spent in the U.S. last year on health foods and food supplements. While the distinctions between different types of health foods are somewhat unclear, organic foods are generally understood to be meat or produce grown without aid of man-made fertilizers and chemical sprays. Natural foods, which may or may not be organically grown, are minimally processed and free of preservatives, artificial coloring, flavoring or other additives. In a comparative shopping activity for chicken, eggs and bread the following results were obtained:

—A frozen organic chicken was on sale for $2.19 or 80¢ per pound, while frying chickens, presumably inorganic, were selling for 29¢ a pound in a nearby butchershop.

—Extra-large eggs cost 99¢ a dozen in a health food store. The carton described them as fertile and laid by hens whose feed was free of hormones and antibiotics. A dozen grade A, extra large eggs were on sale in a nearby supermarket for 69¢.

—A loaf of sprouted-wheat-bread was selling for 69¢ in a health food store while a special health loaf—also made of sprouted wheat but packaged under a nationally advertised brand name—was 51¢ in a specialty grocery.8

How To Obtain Food

Although buying food at the nearest supermarket is the major means of obtaining food, other sources may also be available to the household. It is sometimes possible to obtain food at no cost. Free foods may come from government or private sources including but not limited to gifts from friends and relatives.

Other families may expand the purchasing power of their food dollar by producing some foods at home. Gardens and food preservation activities are two of the most popular forms of household production of food.

The third source for expanding the purchasing power

* Although milk is not used to replace meat in meals, it is an economical source of good quality protein. Protein from nonfat dry milk costs less than half the protein cost of whole fluid milk.

** One-third of the daily amount recommended for a 20-year-old man.
of the dollar is through special buying arrangements, such as buying from a wholesaler, buying a half-of-beef or buying from neighborhood vendors. All can be sources of less expensive food, although they must be carefully screened for true value or "good buys."

Reducing Food Costs

The U.S. Department of Agriculture regularly develops budgets for food plans—low-cost, moderate-cost and liberal. The costs assume that the family buys all the food it uses during the period and pays prices similar to average prices paid by U.S. urban families.

The plan selected for a household will depend largely on the incomes and size of the family, as well as the importance the family attaches to food in relation to other needs. If the family is fairly typical it can probably use the suggested budgets as a basis for planning the food budget.

The economy budget is about 20% less than the low-cost plan. These cost plans do not include paper products, snack foods and other miscellaneous items often purchased in the grocery store. Almost a fourth of most people's grocery bill isn't groceries at all—it is something to wear, read, listen to or clean with.

The food manager who wants to get more for the food dollar spent buys more milk and milk products, vegetables and fruits, cereal and bakery products, and spends a smaller proportion of the food dollar for foods in the meat and other foods (fats, oils, sugar, sweets, coffee, tea and soft drinks) groups.

Meat, poultry and fish are usually the most expensive items in a meal. They are nutritionally valued for their protein and for B-vitamins and minerals. Eggs, dry legumes, peanut butter and cheeses also provide valuable amounts of these nutrients and thus can be valid alternates for meat in meals. A table which shows the average cost of 20 grams of protein from specified meats and meat alternates is shown on the previous page.

These are only some ways of evaluating how food money should be spent. Other things to be considered in the food budget are prices in the store where purchased, special sale prices on food items, brand of product selected and the quality, variety and packaging of product selected.

Reduction or maintainance of food costs for a household is an individual decision. There is no dollars-and-cents solution to the problem. The family should spend enough to obtain nutritious meals they enjoy eating.

It is possible to save up to 25% in buying food if care is used in planning, buying and storing of food products. For more specific information on buying food, order Home and Garden Bulletin No. 183, "Your Money's Worth in Food," from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402. The cost is 25¢.

A good diet depends on the foods selected—not the cost!

FOOTNOTES

Woman Named Trustee

Gov. Daniel Walker has named a 32-year-old school teacher from Madison, Ill., Margaret Blackshere, to a six-year term on the Southern Illinois University Board of Trustees.

A graduate of SIU at Edwardsville, Mrs. Blackshere received a bachelor's degree in 1965 and a master's degree in 1972.

She replaces Dr. Martin Van Brown '25 of Carbondale on the SIU board.

News of the Campus

Walker also confirmed the reappointment of Ivan Elliott Jr., Carmi, who is the current board chairman.

Mrs. Blackshere is the second woman ever to be appointed a trustee since the SIU board was reorganized in 1949. Several women served on an earlier board when SIU was Southern Illinois Normal University.

Stella Collins, West Frankfort, was the first woman appointed to the board. She served from 1953 to 1961.

Derge Goes to China

Two U.S. basketball teams made an eight-game tour of the People's Republic of China in an American exchange delegation which was headed by David Derge, president of SIU at Carbondale.

The U.S. State Department announced the three-week trip which took place June 16–July 7 as part of the U.S.-China exchange agreements spelled out Feb. 22 by Dr. Henry Kissinger.

Derge was chief of party for the delegation which included a 12-man all star basketball squad selected by the U.S. Collegiate Sports Council and the National AAU women's team from John F. Kennedy (Neb.) College.

Derge said he thought the fact that he had over the past four years undertaken U.S. and foreign diplomatic assignments for the State Department and his experience working with college-age people were factors in his selection.

He said he was the first college president to visit Communist China since U.S.-China relations warmed up. "I hope that when the Chinese approve formal exchange programs for college students and faculty members, SIU-C will be among the first schools to take advantage of it," he said.

Veterans Choose SIU

Returning veterans are turning in growing numbers to SIU at Carbondale, where associate degree programs conducted by the new School of Technical Careers are tailor-made for turning service-acquired skills into college credits.

Veterans constitute about 20 per cent of the nearly 1,500 students currently enrolled in technical careers at SIU-C, according to Dean Arden Pratt.

Many are engaged in studies related to skills picked up in the service—electronics, automotive technology, dental laboratory technology, aviation and avionics and mortuary science.

They find the School of Technical Careers attractive first of all because as a unit of SIU-C it is fully accredited and all veterans' benefits are available. But beyond that, they like the individualized instruction and the career-oriented approach to education.

"We offer three alternatives to the traditional class attendance, all of them particularly beneficial to veterans," Dean Pratt said. "First, within the guidelines of the school, we grant credit for work experience, including military occupational specialties. Students also may earn credit through competency testing or by demonstrating proficiency.

Robert Huntley '38, Cert. Spec. '57, DuQuoin, stands tall in admiration of his three sons, all of whom receive degrees this year to bring the father-son degree total at Southern Illinois University to nine. From left, son Benjamin '66, M.A. '67, who will receive his Ph.D. in higher education this August; Bruce, who received his B.S. in education at spring commencement ceremonies; and Bob '65, M.S. '70, who received his specialist's degree in education this June. The father, veteran of 36 years of teaching in Illinois schools, currently teaches at DuQuoin High School.
These approaches help the veteran to turn his military experience into a valuable tool in preparing for a civilian career.

The School of Technical Careers is a brand new name on the SIU Carbondale campus, but the basic concept of career education from which it was developed is far from new. The School began functioning officially on July 1—taking over the role previously assigned to the Vocational-Technical Institute.

Associate degree programs are currently offered in 19 fields in four major occupational clusters. Allied health and public services programs include correctional services, dental hygiene, dental laboratory technology, law enforcement, mortuary science and funeral service and physical therapy assistant. In the applied technologies, architectural, automotive, building and civil construction, electronics and tool and manufacturing technology are offered. Both aviation and avionics are conducted at the Southern Illinois Airport near Carbondale.

Commercial graphics design and production, electronic data processing, media technology (library assistant) and secretarial and office specialties are offered in the graphic communications field.

An associate degree nursing program is being developed in cooperation with area community colleges, according to Pratt.

"More than a fifth of our students come from the Chicago area, because we are offering programs which aren't available elsewhere in the state," Pratt said.

Pending approval of the Illinois Board of Higher Education, the School of Technical Careers will conduct, beginning this fall, flexible career-oriented programs leading to the bachelor of science degree.

Minority Report

In an Illinois Board of Higher Education citizen's committee report, otherwise critical of minority hiring and recruitment efforts at state universities, SIU at Carbondale and Edwardsville received generally high marks.

The BHE's Citizens Review Committee, in a final report after a year of study and campus surveys, said:

—SIU-Carbondale and SIU-Edwardsville are the only Illinois senior institutions (of 12 interviewed) with recognized campus Affirmative Action programs where "specific actions have been taken to effect campus hiring practices and hiring practices of firms conducting business with campus officers;"

—The same two schools are the only ones where participation in campus-related labor relations is considered a part of Affirmative Action programs;

SIU-C and SIU-E are the only schools where the Affirmative Action director has been given formal authority to initiate minority hiring practices or intervene in institutional practices;

—SIU-C and SIU-E are among five of the 12 schools where the Affirmative Action program director has been given specific time commitments to perform the duties of his office.

The committee was chaired by Illinois Sen. Richard Hewhouse, Jr. It was formed in 1972 to examine employment practices at state senior universities.

The 153-page report concludes that state universities have responded to equal opportunity regulations in "token fashion" and that the entire Illinois higher education system has not set up a program designed to give equal job opportunities to minorities, including women.

Administrators Resign

A number of upper-level university administrators have recently resigned from their positions at SIU.

Willis Malone, formerly executive vice president and provost, was reassigned to the position of special assistant to the president for planning July 1. Presently on a professional leave of absence, Malone will start work in his new job in October. Danilo Orescanin, vice president for administration and campus treasurer, has been given the additional title of executive vice president. Keith Leasure has been promoted from assistant provost to provost and vice president for academic affairs.

Kenneth Miller resigned June 1 as executive director of the SIU Foundation. Joseph Goodman, administrative assistant to Vice President T. Richard Mager, has the interim assignment of responsibility for the Foundation.

Among other resignations, Raymond Dey, dean of the Division of Continuing Education, announced in May his intention to retire in September, after 27 years at SIU.

Willis Moore, chairman of the Department of Philosophy, will retire Sept. 1 after 18 years at SIU. David Clarke, associate professor of philosophy, will serve as temporary department chairman.

Wendell Keepper, dean of the School of Agriculture, has requested reassignment to teaching duties by July 1 of next year.

John Olmsted, dean of the School of Graduate Studies resigned from his position July 1 to return to teaching in the department of mathematics.

Roger Beyler, dean of the College of Liberal Arts, has requested reassignment to teaching duties in September of next year as reported in the June issue of Alumni News.

In addition, Ed Hammond associate dean of students, resigned July 1 to accept a position at Seton Hall University in South Orange, New Jersey. Assistant Dean of Student Life Jefferson Humphrey also turned in his resignation to accept a position at the University of Illinois July 1.

The Illinois Fact Book and Historical Almanac, 1673–1968
By John Clayton

In 1818, when Illinois was admitted to the Union as the twenty-first state, it had three incorporated municipalities and a population of less than 50,000. In its sesquicentennial year in 1968, the prairie state had 1,250 municipalities and over 10,000,000 residents. This book, thoroughly indexed, is the first publication to bring the statistical facts, general information and history together in one book, concisely and authoritatively.

Interrupted Melody
By Marjorie Lawrence

An autobiography by the great opera star, Marjorie Lawrence, this book details the story of a woman who managed to remain in opera even after illness with polio. Recently retired from the position of research professor of music at SIU, Miss Lawrence has performed at the White House for President Roosevelt, at Buckingham Palace for Queen Elizabeth and the Princesse and all over the world for troops since her Paris Opera debut in 1933.

Exercise in the Office
By Robert Spackman, Jr.

There is one problem in modern life which increasingly comes home to every one of us: the problem of keeping fit a body exposed to the strains and aches produced not in physical labor but in the comfortable home or office chair. Millions of sedentary workers suffer from aches and pains, expanding waistlines and spreading buttocks. To this group of men and women, age 20 to 90, Robert Spackman brings a ray of hope. Head athletic trainer at SIU, Spackman prescribes isometric and isotonic exercises that can tone muscles and make the body feel better—yet the exercises require little change from one's ordinary activities and are easily performed. The book includes over 70 illustrated exercises.

The Chief Glory of Every People
Edited by Matthew Bruccoli

The twelve original essays, written especially for this volume, appraise our classic American writers and in so doing give fresh insight into the state of American literature today. The writers discussed here, all of whose works are now being published in definitive editions, are James Fenimore Cooper, Stephen Crane, John Dewey, Ralph Waldo Emerson, Nathaniel Hawthorne, William Dean Howells, Washington Irving, Herman Melville, William Gilmore Simms, Henry Thoreau, Mark Twain and Walt Whitman. These twelve varied but brilliantly executed essays on American literature will measurably broaden understanding of the classic American authors and their works.

Save Me the Waltz
By Zelda Fitzgerald

One of the great literary curios of the twentieth century, Save Me the Waltz is a novel by the wife of one of the finest American authors of this era. During the years when F. Scott Fitzgerald was working on Tender is the Night, which many critics consider his best book, Zelda Fitzgerald was preparing her own story which strangely paralleled the narrative of her husband. Save Me the Waltz is, in short, a feminine version of many of the experiences the Fitzgeralds shared and each wrote of in his and her own way. This book is an important confessional of a famous glamour girl who in these pages captures the spirit of an epoch.

Legends and Lore of Southern Illinois
By John W. Allen

Against the cultural and historical backdrop of Southern Illinois, Allen has written sketches of the people of the region—of their folkways and beliefs, their endeavors, successes, failures and tragedies, and of the land to which they came. Today Southern Illinois is on the verge of a
cultural and industrial renaissance. In a few years many of the vestiges of its past culture will have disappeared and will survive only in museums and in the written record. These sketches of John Allen's will be a part of that record.

It Happened in Southern Illinois

By John W. Allen

Included in this book are sketches of the early pioneering days, when wolves were literally chased from the door, stories about the many Indian artifacts discovered among the rolling hills and valleys of the area and articles pertaining to the historic strategic role this region played during the Civil War. Here are glimpses into the past activities of such famous Illinois-born heroes as "Bat" Masterson, "Wild Bill" Hickok and Wyatt Earp. This book can well serve as a reference guide for touring some of the landmarks of historical interest and natural beauty found in abundance in Southern Illinois.

The God We Seek

By Paul Weiss

"Paul Weiss is a lucid writer. Most paragraphs begin with meaty, topical sentences. His style and language make this good reading . . . This study is the cream of thirty years of teaching at Yale University."

—George Earle Owen

The Christian

"The strong aspect in this book is in the author's sharp analytical power revealed as he deals with religious language . . . There is an amazing range of resources provided in these pages. For that reason it will be valuable to the clergy and to the layman interested in keeping up with the times."

—M. J. Timbs

SIU Alumni Office
Southern Illinois University
Carbondale, Illinois 62901
Association Names New Officers

Larry Jacober '62, M.S. '65, Carbondale, was installed on Alumni Day as the new president of the SIU Alumni Association. He succeeds Ted Taylor '44, Washington, D.C.

Other new Association officers are Albert Shafter '48, M.A. '49, Harrisburg, president-elect; Paul Schoen '67, Carbondale, vice president; Pat Lill Schroeder '42, vice president; and Eugene Payton '38, secretary. Roger Gray '64, Cobden, was appointed treasurer earlier in the year after the Association decentralized to include Carbondale members only.

Seven alumni were appointed to their first terms on the Board of Directors. They are the Rev. Jack Adams '53, St. Louis; Robert Hardcastle '63, M.S. '64, Chesterfield, Mo.; Jo Ann Cunningham Jungers '52, Alton; Patrick Mudd '55, M.S. '59, Dupo; Jack Murphy '54, M.S. '57, Ph.D. '71, Herrin; Eugene Payton '38, Chicago; and Keith Sanders '61, M.S. '62, Carbondale.

Alumni retiring from the Board were Jane Curry Dycus '57, M.A. '58, Carbondale; Everett Miller '39, Mundein; and Walter Young ex '47, Carmi.

Two members whose terms were renewable and who were re-elected to the Board are David Elder '50, M.A. '51 and Taylor.

Jacober has served the past year as president-elect of the Association. He is the principal at Lincoln Junior High School in Carbondale and a past president of the Jackson County Alumni Club. He and his wife, Judy Schneider Jacober '63, have two daughters.

Shafter, who was first named to the Board in 1970, is a past president of the Saline County Alumni Club.

Members of the Washington, D.C. Alumni Club met April 14 to select new officers and hear speaker T. Richard Mager, vice president for development and services at SIU. Pictured, from left, are Mager; Esther Power, former SIU faculty member; Ted Taylor '44, past-president of the Alumni Association; Delores Vanoy Hospedalos '57, vice president of the Washington D.C. Club, Jane Hardy '65, M.S. '66, secretary-treasurer of the club; Pat Hardy Davis '63, president; Bob Pulliam '48, M.A. '50; and Bob Odaniell '51 executive director of the Alumni Association.

The SIU Alumni Association sponsored a graduation reception in the ballrooms of the Student Center June 8 for graduates, their parents and friends.

The Alumni Association

SIU at Carbondale President David Derge delivered the "State of the University" address at the Alumni Day Banquet.

A special insert is included in your magazine this issue for your convenience in ordering tickets for Saluki football games. It's just another way your Association is serving you!
SIU’s President David Derge (second from left) congratulates Alumni Achievement Award winners Glenn “Abe” Martin ’32, Carbondale; Alice Williams ’32, Mt. Vernon; and David Aiken ’39, Bloomington, Ind.

New life members completing annual installments who were present on Alumni Day were, from left: Front Row: Thelma M. Wair, Shelba C. Musulin, Ritha T. Matthews, Madge M. Presley, Frances K. Axley, Carol H. Cross, Elizabeth J. Leighty, Vesta M. Nichols, Phyllis M. Phillips. Second Row: Fred Wair, Edward Choate, William Matthews, B. D. Cross, Clyde Axley, Donald Christ, George Nekolny, Willard Murry.

Alumni Association President for 1972–73, Ted Taylor presented the Carbondale Great Teacher Award of a plaque and $1,000 to Dr. James Benziger, a professor in English.

Vice President for Development and Services T. Richard Mager gave 50-year certificates to the Class of 1923. He also presented a personal check for $50 in honor of the class.

SIU at Carbondale President David Derge (right), who was the featured speaker at the Alumni Day banquet talks with new SIU Alumni Association President Larry Jacober and immediate Past President Ted Taylor.
"IT WAS SO ENTERTAINING that I hate to see it end," one baseball fan said at the end of the 1973 NCAA District Four playoffs hosted by Southern Illinois University May 31, June 1-2-3.

It was entertaining. In fact, it took 14 innings to decide the final game between the host Salukis and Big Ten champion Minnesota. The Golden Gophers finally won it, 7-6, when SIU catcher Larry "Moose" Calufetti failed to hold on to the ball after tagging out Minnesota's Dennis Allar at home.

Southern Illinois had opened the tournament with a bang, defeating Marshall, 5-2, behind the seven-hit pitching of Scott Waltemate. Minnesota followed the same day with a 3-2 victory over Miami of Ohio.

That set stage for one of the best pitching duels Southern Illinois fans have ever witnessed.

After Miami had ousted Marshall, 5-2, on Friday, SIU's Rick Ware and Minnesota standout Dave Winfield locked up in a hurler's standoff.

Both athletes allowed only three enemy hits. Winfield fanned 13 and Ware struck out 6.

Unfortunately for Ware, the nation's leader in lowest earned-run-average, two errors spelled the difference as Minnesota won 2-0 on a pair of unearned scores in the second inning.

The Salukis stayed alive in the double-elimination tournament by ousting Miami of Ohio, 8-1, behind the five-hit pitching of Jim Bokelman.

What happened next is historic.

On Saturday, SIU and Minnesota played see-saw baseball for 11 innings before Mother Nature decided to postpone the exciting contest with a torrential downpour.

An enthusiastic crowd of 2,500 braved the chances of more showers on Sunday coming to witness the end of the game. It was tied 6-6 after 11 innings.

Neither team scored for three innings before Allar rushed home on a sacrifice fly in the bottom of the 14th.

It was a very successful tournament in every sense. District Four baseball chairman Danny Litwhiler of Michigan State termed the four-day show, "a complete success." Litwhiler said the Salukis and Carbondale would be "given every consideration for future bids to host the District Four playoffs."
Salukis Joe Wallis (centerfield), Stan Mann (shortstop), Rick Ware (pitcher) and Ken Kral (right field) were named to the all-tournament team.

Despite failing to make it to the College World Series, the Salukis wound up 10th in the collegiate baseball ratings.

FOUR MEMBERS of SIU's 1973 baseball team inked professional contracts this spring, raising the number of Salukis in pro ball to 18.

Joining the ranks in 1973 were all-American centerfield Joe Wallis (Chicago Cubs), leftfielder Ken Kral (Chicago Cubs), catcher Larry Calufetti (New York Mets) and pitcher Rick Ware (Cubs).

Four former Salukis are enjoying tours in the majors. They are Bill Stein and Jim Dwyer, outfielders for the St. Louis Cardinals, Mike Rogodzinski of the Philadelphia Phillies and pitcher Jim Panther of the Atlanta Braves.

Other ex-Southern diamond standouts in the farm system of the pro ranks are Skip Pitlock (Chicago White Sox), Bob Eldridge (Cleveland Indians), Rich Hacker (Detroit Tigers), Jerry Bond (San Francisco Giants), Bob Blakely (Houston Astros), Danny Thomas (Milwaukee Brewers), Dan Radison (St. Louis Cardinals), Mike Eden (San Francisco Giants), Duane Kuiper (Cleveland Indians) and Bob Sedik (Atlanta Braves).

BEFORE THE 1973 tennis season started, SIU net boss Dick LeFevre declared, "we should be tougher than nails next year. But this year? Whew!"

Starting an all-freshmen lineup in 1973, LeFevre's Salukis fashioned a respectable 12-13 season won-loss record. "Next year we'll be tougher than heck," LeFevre now promises. "We'll definitely be more competitive."

All those freshmen--Warren Cowley, Kristian Cee, Scot Huguelet, Dane Petchul, Felix Ampon and Steve Temple--return next year. So does Jorge Ramirez, who might have been the No. 1 player this spring but he broke a foot in a pre-season practice and sat out the season instead.

And LeFevre sees an eighth person fitting into SIU's future net plans in Scott Kidd, a newcomer from Alexandria, Va.

"You can't really expect too much out of six freshmen in their first year," LeFevre reasons. "The boys are going to keep getting better, however."

TERRY ERICKSON, BILL HANCOCK, Lonnie Brown, Gerry Craig, David Hill, Jack St. John, Eddie Sutton, Phil Robins, Gerald Smith and Wayne Carmody are some of the finest track and field performers in SIU's history.

And the great part about that fact is they all return for the 1973-74 season.

"Unless we have a bunch of injuries like we did this year, 1974 should be a super year," says SIU coach Lew Hartzog.

The 1973 campaign started out as a "super" year as the Salukis bested Louisiana State, Alabama, Florida and Drake in a five-team meet at LSU, then won the Illinois Intercollegiate Outdoor championship.

But slowly, one injury after another began to cut into the SIU squad's proficiency. Although Hartzog took 13 competitors to the 1973 NCAA championships in Baton Rouge, La., many of them were in sub-par conditions because of season-long injuries.

Top Saluki efforts in 1973? Maybe Hancock's Kansas Relays' victory in the decathlon and world record high jump (7-1) for the decathlon in that meet.

SOUTHERN ILLINOIS UNIVERSITY'S football season already has jumped off to an outstanding 1973 start.

In June the Saluki athletic department was notified that SIU had been added to the "major college" ranks in football. Football was the only sport at SIU prior to that date that was not considered in the university division classification system.

And Saluki coach Dick Towers hopes that step up in prestige is just the beginning. Towers, who begins his seventh campaign as head coach at Southern, returns 29 lettermen including eight starters from 1972, in addition to an outstanding crop of newcomers.
"We have a lot of problem areas to work out," Towers notes, "but we had an enthusiastic and hard-working spring and I'm confident of an exciting fall."

Exciting ballcarriers like senior Larry Perkins, sophomores Joe Laws and Steve Weathersby, young quarterbacks Mike Abegg, Fred McAlley, Leonard Hopkins and Dennis O'Boyle, and several glue-fingered receivers brighten SIU's offensive outlook.

Defensively, Towers will build his squad around veterans linebacker Gordon Richey, halfbacks Edwin Bell and Bruce Corbin, and newcomers, tackle Primus Jones and linebacker Craig Schuette.

The Salukis will experiment with the Veer-T, Wishbone and Multiple-I offenses during fall ball. "At this point, we're not sure which attack we will use during the season. Whichever one suits our personnel best," Towers adds.

The 1973 Saluki football schedule follows:

<table>
<thead>

GLEN STONE, sports information director at SIU, and his assistant, Joe Mitch, have both accepted head sports information positions at separate universities.

Glen has been named the sports information director at Kansas State University at Manhattan. He will assume the new post at the Big Eight Conference school near Aug. 1.

Glen took over the sports information position at SIU on June 1, 1971, succeeding Fred Huff ex '62, who joined the Hayes Fair Acres at Du Quoin. He came here from the University of Oklahoma, where he was assistant director of sports information.

Joe was named director of sports information at the University of Dayton and assumed his duties June 18. He served as sports information director at the University of Illinois at Chicago Circle for two years before coming to Southern Illinois in August, 1970.

Glen and Joe were responsible for writing Deadline Sports for Alumnus.

SIU Athletic Director Doug Weaver is now in the process of selecting a new sports information director for the Carbondale campus.
1917 Clyde L. Flynn, Sr., ex, is assistant superintendent in the Hardin County Educational Service Region. He and his wife, Charlotte, have five children and reside in Elizabethtown.

1919 GRace Marie Boyd, 2, is retired and lives in Berwyn. She has served in the Cicero Public School System as a classroom teacher, elementary principal, primary supervisor and reading consultant.

1922 Joseph Carroll McCormick, 2, is a farmer and volunteer community worker in Olmsted where he and his wife, Mary, reside.

Mr. and Mrs. Herbert Louis Rieke (Evelyn Marie Davis) reside in Ran-toul where Mrs. Rieke is retired.

Ralph Ray TURNer, 2, '27, is retired after being in education for 43 years. He and his wife, Lucile, reside in Bradenton, Fla.

1923 Mr. and Mrs. Emil A. Mueller (Paulette M. Jansen) reside in Granite City where Mrs. Mueller is retired after 31 years of teaching.

1924 Alice Louise Grant, 2, is an English teacher at Southeast Missouri State University. She resides in Cape Girardeau, Mo.

1927 Herbert Mundell, 2, '32, is a retired school administrator and is presently the mayor of Benton where he and his wife, Edith, reside.

1928 Shirley K. Snider, 2, '42, has retired after teaching for 42 years as a first grade teacher in Park Ridge where she resides.

1929 W. Stewart Williams is retired and resides in Springfield with his wife, Evelyn.

1930 Elsie Helen Strothmann Hampleman, 2, '34, is a team teaching leader in the sixth grade at DeLay Middle School in Lewissville, Tex. She resides in Denton.

James Alfred Hood is a retired trainman with the South Pacific Transportation Company. He resides in Tucson, Ariz., with his wife, Hazel.

J. William Howell, ex, is a retired assistant inspector general with the U.S. Department of Agriculture. He and his wife, Vivian, reside in Arlington, Va.

1933 John G. Gilbert, a Carbondale attorney, has received the 1973 Service to Southern Illinois Award, given by the Jackson County Alumni Association. The former Illinois state senator was cited "for his outstanding service to the people of Southern Illinois above and beyond the call of duty," He and his wife, Helen, have three children.

1938 Norman A. Meinkoth has been chosen as an Outstanding Educator of America for 1973. A member of the Swarthmore College faculty since 1948, Meinkoth is chairman of the biology department there.

1940 William Woodrow Cordray is a teacher and head of the educationally handicapped department at Sylmar High School in Sylmar, Calif. He, his wife, Vivian, and their daughter, Janie, reside in Granada Hills, Calif.

1945 Walter B. Young, Jr., ex, has been appointed a regional supervisor for Sigma Pi Fraternity. A former member of the Alumni Association's Board of Directors, he will supervise the social fraternity's chapters in Southern Illinois.

1948 Robert P. Baysinger, M.D., is head of the department of family practice in the Carbondale Clinic and a teaching assistant in the SIU School of Medicine. He and his wife, Patricia, have four children and reside in Carbondale.

Leta Ruth Briesacher is a first grade teacher at Douglas School in Belleville where she resides.

Lloyd Ray EVISIZER, Sr. is a finance and insurance manager with C & H Chevrolet in Santa Barbara, Calif. He, his wife, Barbara, and their two children, Connie and Lloyd, Jr., reside in Goleta, Calif.

James L. NETTLETON is the council director with the Southern Illinois Conference of the United Methodist Church with headquarters in Mt. Vernon. He and his wife, Luella, have three children and reside in Mt. Vernon.

William E. Williams is a district director with the Internal Revenue Service in Boston. He and his wife, the former Theresa V. Ivanuck '45, have three children and reside in Lynnfield, Mass.
1949 Mr. and Mrs. Wayne William Halboth (Betty Ann Martin Halboth) and their two children, Henry and Barbara, reside in Compton, Mrs. Halboth is a fourth grade teacher at Blackstone School in Mendota.

Russell Dale Kittle is an associate professor of speech in the City Colleges of Chicago where he resides.

Robert Edward Luetzow is a station director with U.S. Customs in Prince Rupert, British Columbia, Canada where he resides.

1950 Elberta J. Ewbank is a librarian in the Cumberland Trail Library System. She resides in Flora.

Charles R. Heinz, M.S., ’59, is an education specialist with the Illinois State Department of Education. He and his wife, Betty, have six children and reside in Mt. Vernon.

Jack K. Mawdsley, M.S., ’54, is superintendent of the Battle Creek Public Schools in Battle Creek, Mich., where he, his wife, Norma, and their two daughters, Kim and Beth, make their home.

Eugene D. Neihaus is a mining engineer with the Peabody Coal Company. His wife, the former Lois M. Sprinkle ’48, is a counselor in the Owen Valley High School. The Neihaus’ have two children, Christina and Marc, and reside in Terre Haute, Ind.

Charles Kenneth Williams is a manager in the engineering and technical integration department of the SKYLAB Program at NASA. He, his wife, Judith, and their three children, Suzanne, Brent and Mark, reside in Seabrook, Tex.

1951 The Rev. Harry W. Steele is pastor of the Hillcrest Baptist Church in Hobart, Ind. His wife, Bernice Evelyn Gordon Steele, ex ’62, is a secretary to the director of food services of the Gary Public School System. The Steeles have four children and reside in East Gary, Ind.

Deaths

1925  Lorraine Louise Huck, 2, '45, Centralia, died February 15 at the Centralia Care Center after an illness of six months. She retired from teaching in 1965, having taught third grade in the Centralia Grade School System for 40 years. Survivors include a brother and three sisters.

1926  Mrs. Walter R. Lilley (Margie Bise Lilley, 2, '40), West Frankfort, died April 3 in Union County Hospital after a long illness. A retired school teacher since 1963, Mrs. Lilley had taught for 37 years in the West Frankfort elementary schools. Survivors include her husband and a brother.

1933  Frederick W. Hallagan, Hilton Head, S.C., died March 28 in Memorial Medical Center after a brief illness. Mr. Hallagan had served as a colonel in the U.S. Air Force and was retired from civil service. Surviving are his wife, the former Elizabeth Barnes '31–2, and three sisters.

1934  Paul Jean Brown, a Carbondale real estate and insurance agent, died of leukemia May 14 at Methodist Hospital in Rochester, Minn. He had been in the real estate business in Carbondale since 1948 and was a former member of the State of Illinois Real Estate Examining Committee, having held the office of vice-chairman for seven years. Mr. Brown served on the Board of Appraisers at SIU for over ten years and appraised for the Department of Public Works and Buildings. A Carbondale Township Tax Assessor from 1965–1966, he also had served on the Carbondale City Council from 1946–1950. He is survived by his wife, the former Rhoda Mae Baker '34, a son and two daughters.

1966  Carl C. Kimbrel, Jr., Minnetonka, Minn., died May 18 after a two-month bout with cancer. Mr. Kimbrel had been a regional sales manager with Medtronic, Inc., in Minneapolis. He played half-back with the 1961–1962 Saluki football team. Surviving are his wife, Karen A. Kimbrel '65, and three sons.

RET FAC  Marshall G. Clark, emeritus assistant professor of agriculture at SIU, died April 8 after a lengthy illness. He had taught vocational agriculture for eight years at high schools in St. Joseph and Dundee, and served as an assistant instructor in animal husbandry at the University of Illinois and the University of Missouri. Before joining the SIU Division of Rural Studies faculty in 1947, he had been self-employed for 10 years as a farm consultant and farm planner. Mr. Clark retired from SIU in 1954. Survivors include his wife, Martha McCammon Clark, M.A. '53, and two daughters.

The Alumni Office also has been notified of the following deaths:

1926  Russell H. Tate, 2, Yates City, September 22.

1934  Mrs. George Herschbach (Ruth Velma Harris, 2, '48), Chester, February 3.

1935  Edgar Bain, Champaign, January 24.

1937  Jesse E. Harbison, October 25.

1969  Dr. Frank S. Gonzalez, Ph.D., St. Cloud, Minn., December 29.

1971  John Michael Carpenter, Carbondale, April 19.

- White with maroon letters and edging @ $2.45

Price includes tax, postage and handling.

“Land Between the Rivers”

We have received a new limited supply of Land Between the Rivers for sale to members of the Alumni Association. There has been a great demand for the book and it is very possible this will be our final consignment. The supply—as long as it lasts—will be sold on a first come-first served basis. Cost to members is $12.00 (20% savings). Add 50¢ for postage and handling. Illinois residents must add 60¢ sales tax.

Land Between the Rivers is a 9 x 12 book containing 224 pages with over 300 photographs, 30 of which are in full color. The book begins with a survey of Southern Illinois’ topographic and other physical features. It describes the Indian past, dating back some ten thousand years and more, with its remarkable remnants and artifacts. In photographs and text the book continues, concentrating on the region’s main economic activities—farming, lumbering, mining, manufacturing and recreation—surveying as well as the economic life of the great rivers along its borders. An uncommon portrayal of American life in a distinctive region, the book provides a memorable journey both in time and place.

Southern Illinois University Glasses

Here’s a conversation piece with practicality that’s exclusively ours! A 12½ oz. set of glasses with chip resistant rims, weighted bottoms, and baked on crest and lettering. Safe for use in automatic dishwashers. Packed for safe shipping in cartons of eight. The price of only $6.00 includes handling charges, packaging, postage and tax.
