Charles W. Groennert, '58 (accounting), is the vice president of financial services at Emerson Electric Co., St. Louis, where he has worked for 19 years. A Certified Public Accountant and a Certified Internal Auditor, Groennert is listed in Who's Who in America. "I have no desire to move outside of the financial area," he says. "I have accomplished my career goal of attaining a senior financial management position."

He and his wife, Margy, are parents of three children aged 21, 19 and 16. He enjoys reading and golf, and is a football, basketball and baseball fan.

Gary L. Lindsay, '66 (economics), business director of Monsanto Co., St. Louis, is responsible for overall business management of one of St. Louis's largest employers. In 1968, Lindsay earned an MBA at Indiana University, a degree that was "somewhat important. The more in-depth studies in accounting and finance have been useful." His career goal is to "achieve at least a general manager position."

He and his wife, Ann, have two children: Matthew, 10, and Megan, 5. They live in Chesterfield, Mo.

How important is an MBA?
Quite important, according to most of the respondents who have earned one. "My MBA from SIU allowed me to start my career at a level above my contemporaries," said Seth B. Fargen, MBA '77, division business manager for United Technologies Communications, St. Louis. "In addition, it has allowed me opportunities for advancement into higher-level positions," David Whitney, 77, MBA '79, felt that "returning to school for the advanced degree allowed me the opportunity to get a job with a 'big-eight' CPA firm. The 'big-eight' experience was helpful in my landing a better-paying job." Whitney is a financial analyst with Evershron Electric Co. in St. Louis. And James C. Tracy, MBA '80, a supervisor with Ernst & Whitney in Chicago, said his MBA is "absolutely vital. I wouldn't have been able to enter my career or advance in my profession without it."

The MBA opens doors, several SIU business alumni reported. "My MBA helped me be noticed in getting my first job," according to Donald R. Engelski, '74, MBA '78, an analyst at Union Carbide Corp. in Connecticut. "It gave me an extra edge. It was instrumental in my next job with the same company, where financial skills were required." Louise E. Maloney, MBA '77, an accountant with Kroll & Co. in Springfield, Ill., said that her MBA "got me an interview" that led to her current job.

What are your career goals?
Almost all of the survey respondents are both happy with their current jobs and planning on moving ahead. Carole Willis Garnett, '80, an auditor for Ernst & Whitney, St. Louis, said she is planning on "a promotion to rank of audit supervisor within the next nine months. Eventually, I'll return to college for an MBA." Ronald P. Davis, '77, a CPCU designation. A past career change to the Ohio Casualty Insurance Company in San Antonio, "I have appr...
Record Number May Graduates. Preliminary figures released by the SIU Office of Admissions and Records show that the Class of 1984 may be SIU's largest graduating class to date. At press time, 6,290 undergraduates and graduate students had applied for the May 12 graduation—a boost of 529 over last year's number of applicants, according to Roland Keim, associate director of Admissions and Records. Keim stressed that this is only a preliminary indicator. Final tabulations will not occur until five or six weeks after commencement. A breakdown of the applications shows 4,911 undergraduate degrees, 688 master's degrees, 614 associate degrees, 106 Ph.D. degrees, 105 law degrees and six specialist degrees. Three ceremonies will be held to honor each student individually. Previously, undergraduates only stood in a grand with college. The first ceremony, at 8:30 a.m., will recognize undergraduate degrees in Communication and Fine Arts, Education, Human Resources, Liberal Arts and University Studies. All graduates, including masters, will be honored at 11 a.m. Undergraduates from Agriculture, Business and Administration, Engineering and Technology, Science and the Arts will be recognized at 2:30 p.m. SIU alumnus Fred Basolo, '60, Morrison Professor of Chemistry at Northwestern University, will be SIU's honorary Doctor of Science degree for bringing "distinction to his field of study, to the State of Illinois, and to SIU."

How has your education at SIU been a particular help in your job?

The University—and some specific faculty members—earned good praise from the 43 business graduates who answered our survey.

The respondents particularly singled out the contacts they made with a wide variety of faculty and students; the skills they learned in writing reports and presenting public speeches; computer communication techniques that have well served them in their careers; management courses; the excellent curriculum; accounting and finance; the self-motivating atmosphere; the hard discipline expected by the faculty; the beauty of the campus and environment which allowed for periods of relaxation and introspection; the well-rounded curriculum and choices made available to students; the intercollegiate and intramural athletic programs; group participation in special projects; and the help given to minority students.

Faculty members who were singled out include Gola Waters, Mary N. Barron, Susie E. Ogden, Phillip G. Neal, Ralph hen and James R. Mace.

"Two instructors really prepared me for professionalism," wrote Janet S. Lan, and, '80, a senior accountant at Coopers & Lybrand, St. Louis, "Phil Neal in the accounting department and Gola Waters in business law. They set standards of performance beyond the normal classroom expectations." Garland Bradley Wease, '62, most recently the senior management assistant at the Dept. of Public Works in San Francisco, credits SIU with his acquiring the ability to think beyond the gratification of immediate needs or the acquisition of wealth. "I essentially learned the business enlightenment required of a responsible citizen." The most helpful aspect of SIU for Sharon A. Pekos, '68, was "meeting, talking to and learning from the students and professors who came from all walks of life and who had diverse personalities. They helped me learn how to manage people and solve people problems." Pekos is a manager with the Social Security Administration in Chicago.

Have you all gone into the private business world? Sometimes not. That a business degree can lead in different directions is witnessed by the diversity of the careers among the survey respondents. They may be involved in any level in the business world. Or they may do something a little more unusual with their degrees.

Wallace B. Wood, '73, MBA '74, for example, is now an assistant professor at the University of Cincinnati. He received his DBA degree in transportation and logistics from the University of Tennessee in 1980. After earning tenure at the U. of C., Wood plans to start a consulting practice and eventually switch to industry or government work for a few years. Larry J. Wule, '57, is a major in the Air Force and the squadron operations officer for the 38th Stratotactical Reconnaissance Squadron at Offutt Air Force Base near Bellevue, Neb. Following his retirement from the military after 20 years of service, he would like to pursue a career in corporate/ commercial aviation or accounting. Sam Panayotovich, '74, is now a general partner and State Representative from the Chicago area. Panayotovich wishes to "continue my political career, make a contribution to the state and the voters allow me to do so." Following graduation from SIU, he became a teacher and then a businessman before running for public office.

Several of the survey respondents are self-employed, including Elizabeth Hankla Hershey, '78, who develops microcomputer software, installs accounting software, and gives instruction to clients from her home in Hendersonville, N.C. Her career, she said, "has allowed me to live comfortably while gaining valuable experience in the areas I enjoy."

And what advice would you give to current SIU business students?

The voices of experience and wisdom sound loudly through the survey forms.

"Plan your whole life," wrote John D. Foote, '68, administrative assistant staff for Eastman Kodak in Rochester, N.Y., and holder of an MBA from the University of Rochester. "Start with what you want to have by the time you die and work backwards to what you need to do and when you need to do it—to accomplish your desires."

Joseph J. Neimann, '50, of Kendall Park, N.J., said that students should "explore all possibilities. Don't limit yourselves to traditional business environment." Neimann has evidently followed his own advice. After taking early retirement from General Electric, Niemann became the vice president of customer sales and service for Pandick Press, Inc.

"Pay attention to grades," said most of many of the survey respondents, including Gerald E. Lange, '68, the director of Corporate Relations at The University of Wisconsin-Madison. Students should also get a well-rounded education. Lange said, "especially in people skills such as writing, communications and English."

And "get serious," said these business graduates. There is tough competition for jobs, and most of the competition is mediocre." Stephen C. Eaker, '74, explained, "Toughness in yourself and setting high standards will bring you above the crowd." Eaker is the vice president and controller of the apparel manufacturer Macmanus Mauritius in St. Louis. Lynn S. Hendry, '77, tax accountant at Peabody Electricity Co. of Chicago, encouraged students to "get more exposure to the real business world via interview projects, internships, etc." Her advice was seconded by Charles P. Richards, '71, partner in Southwest Affiliated Representatives, who recommended students to "get more exposure to the private sector, if possible. Get practical experience in the field. Decide early on your professional and personal goals."

So, are all business graduates alike? Not hardly, judging from our survey. Business graduates are diverse individuals. They share some characteristics in common—clear goals, well-rounded lives, a desire to be the best, and talent and education allow. But they also follow different paths, enjoy diverse careers and seek different rewards from their education.

As for SIU, their single common experience, they remember it well as the ground-work for both their careers and their personal enrichment.

LARAIN E. OMALLEY
Art Awards

Four SIU student artists are sharing the richest prize ever offered for undergraduate achievement at SIU. This year's $20,000 Rickert-Ziebold Award was divided among three senior art students and a recent graduate. The four winners, whose names were announced on March 5, 1984, were chosen from a field of 16 finalists. Thirty persons had entered work in the competition, which was open to SIU art students receiving their undergraduate degrees between fall semester 1983 and summer session 1984.

The cash award is made each year from proceeds of the estate of Marguerite L. Rickert Ziebold, a native of Waterloo, Ill., who died in 1971. She left one-third of her estate to SIU for the establishment of an annual art award. The stipulation was that it be used to reward the accomplishments of outstanding senior art students.

The cash awards, which may be used by the winners in any way they wish, have been presented since 1975 and have gone each year to as many as 10 persons and as few as two.

The works of all entrants in the Rickert-Ziebold competition go through a rigorous review that includes a final evaluation by all SIU School of Art faculty members. Cash awards were presented on March 26 at a buffet at the home of SIU President Albert Somit. Works by the winning artists were on display at SIU's University Museum through April 22.

Education is key to change, Shaw tells DuPage County alumni

A retired French diplomat returned from a tour of South America with a rare treat for the students at the DuPage County alumni chapter meeting. "I have the SIU's "101 Club" T-shirt awarded to Bob Hardcastle, Vince Sauget and Don Truedsale for their long-standing support of SIU athletics.

St. Louis alums give Ray Dorr enthusiastic response

Ray Dorr, SIU's new head football coach, couldn't have asked for anything more in the cheering response of alumni at St. Louis. The keynote speaker at the St. Louis Alumni Association chapter meeting on April 12, 1984, Dorr challenged a supportive group of 110 alumni to give "101 percent" to SIU, matching his promise for the football team next season: every ounce, plus one percent more, in every game.

Dorr also announced the formation of a 101 Club, "101 alumni who want to make SIU the best football club in the division." Dorr then gave "101" SIU T-shirts to three men who have long supported SIU and SIUI freshman ACT scores higher than national average

The average freshman who entered SIU at Carbondale in the fall 1983 semester had a composite ACT score of 18.8 by 2.6, according to a recent profile study compiled by SIU's Institutional Research and Studies office.

The freshmen also compared favorably on ACT scores to national averages in the individual testing categories: 18.6 in English, compared to 18.2 nationally; 20.5 in math, compared to 17.4 nationally; 21.1 in social studies, compared to 17.8 nationally; 23.8 in natural sciences, compared to 21.2 nationally.

The average SIU freshman was likely to have had three or more achievements in athletics, work experience or music while in high school. Some 96 percent expected to be full-time students, 70 percent expected to work while in college (compared to 56 percent nationally), and 78 percent expected to apply for financial aid (compared to 68 percent nationally).

On average, SIU freshmen planned to obtain at least a bachelor's degree with a major in computer science, engineering, and health professions, communications or the social sciences. This average student is expected to rank special curriculum or college major as the most important factor in choosing a college or university.

Most students expressed plans for extra-curricular activities while in college. Some 87 percent plan to participate in a social interest group; 59 percent plan to join intramural athletics; 47 percent interested in fraternities, sororities or other social clubs; 39 percent planned to become involved in radio or television activities; and 36 percent each wanted to take part in varsity athletics and campus/community service.

The average SIU freshman also expected to need degrees in special educational assistance. Fifty percent said they needed help in making educational and occupational decisions. Some 45 percent wanted help in improving their study skills, while 40 percent wanted help in improving their math skills. Other interests included a need for reading speed and comprehension (27 percent), better expression of ideas in writing (26 percent) and help with personal concerns (24 percent).

Prestige in Psychology. The counseling psychology program in psychology to which SIU's program is third among colleges and universities in the U.S. and Canada. SIUC is the only Illinois school to crack the national top 20 in the counseling psychology program to which SIU's program is third among programs at the universities of Minnesota, Missouri and Wisconsin, as well as Northwestern University and the University of Chicago. The other survey ranked SIU seventh nationally in terms of the number of articles published by its Ph.D-degree graduates during the years 1985 to 1981. Director Howard A. Shaw said: "My goal in the next five years is to bring in 1,000 Advocates working for SIU. The participants make a contribution to the University. And they get an Advocate program or a specific information about SIU and the issues affecting it."
Illinois counties which have participated in the Telefund: that the funds raised in each county participating, a boost in their health and energy, and talents in ways that enrich the University and its students, faculty, staff and alumni. If you or your alumni chapter is interested in becoming a part of this "no-loss" campaign—one that is so vitally important to so many SIU students—call Anne Carman at the SIU Foundation in Carbondale, Ill., at (618) 529-5900.

The Telefund reaches toward goal of $20,000 for scholarships. There’s a “no-loss” campaign going on all over Illinois and the rest of the U.S. that by April 16, 1984, had already secured $14,985 in pledges for the SIU Alumni Association. Telefund Campaign, conducted by the SIU Foundation and the SIU Alumni Association.

The Telefund benefits the University, encourages students to attend SIU and is fun. It’s rewarding for alumni who volunteer their time to make the calls.

Here’s how it works: alumni gather in one place to call other alumni in their counties and ask for the SIU Foundation for student scholarships. Alumni called are guests of the Foundation at dinner, where they can exchange stories and memories of SIU. The main goal, however, is to get more ambitious, enthusiastic high school students with SIU scholarships from the contributions of alumni through the Telefund.

"We’re only $5,000 away from our original goal of $20,000, and I feel sure that we will meet and surpass it," said Anne Carman, director of Annual Giving at SIU Foundation. In Illinois, 4,229 SIU alumni had called between February and April this year. They have talked with one of the 202 volunteers in nine different Illinois counties which have participated in the Telefund.

"The nice thing about the campaign is that the funds raised in each county provide scholarships to local students to encourage them to attend SIU," Carman said.

By April 16, the following Illinois counties had taken part in the Telefund:

- Jackson County: 54 volunteers, $2,900 called, $3,797 in pledges. Jim Osberg, ’58, chaired the campaign.
- Peoria County: 9 volunteers, 160 alumni called, $430 in pledges. Jim Hartford, ’64, chaired the campaign.
- Williamson County: 9 volunteers, 202 alumni called, $2,153 in pledges. Bud Cross, ’53, chaired the campaign.
- Franklin County: 4 volunteers, 70 alumni called, $2,153 in pledges. Larry Aust, ’70, chaired the campaign.
- McLean County: 12 volunteers, 138 alumni called, $965 in pledges. Jim Glidersleeve, ’72, chaired the campaign.
- St. Clair County: 13 volunteers, 259 alumni called, $899 in pledges. Pat Mudd, ’58, and Pat Hunsicker, ’57, co-chaired the campaign.
- Saline County: 12 volunteers, 236 alumni called, $883 in pledges. Joe Tison, ’72, chaired the campaign.
- DuPage County: 4 volunteers, 70 alumni called, $176 in pledges.
- Sangamon County: 40 volunteers, 668 alumni called, $3,200 in pledges. Larry Aust, ’70, chaired the campaign.
- "As you can tell from these results, the number of volunteers in the campaign directly related to the amount of dollars pledged," Carman said.

Byproxime, Telefunds were also scheduled in these counties in Illinois, Missouri and Washington, D.C.: St. Louis (Mo.) County April 16-18, Dan Trondstad, 76, chair. Randolph County April 23-24, Barbara Brown, ’76, chair. Union County April 30 and May 1, Roger Dillon, 70, chair.

"We plan to add more alumni chapters to the roster next year," said Carman. "The more people we get involved, the more successful our entire campaign will be and the more students we can all help bring to SIU." The SIU Alumni Association is assisting the Foundation with the Telefund, which is one of the major events scheduled for the year by individual county chapters.

If you or your alumni chapter is interested in becoming a part of this "no-loss" campaign—one that is so vitally important to so many SIU students—call Anne Carman at the SIU Foundation in Carbondale, Ill., at (618) 529-5900. You and your group can make a big difference in the lives of many deserving young people through the Telefund.

at SIU: W. Texas State

October 27

at SIU: Southern Illinois University

November 3

at Drake

November 10

at E.W. Missouri State
The 1984 New Orleans World’s Fair combines the magic of Mardi Gras with a celebration of “The World of Rivers—Fresh Water as a Source of Life.” The SIU Alumni Association invites you to join us for a fun-filled visit to the fair!

The 1984 fair is a return to the great fairs of the 19th century, a potpourri of magic and fun, everything from renovated warehouse shops to the artificial bayous and a monorail that encircles the fairgrounds.

Networks of lagoons, streams and aqueducts wind through the 82-acre site on the banks of the Mississippi River. State, corporate and international pavilions line the riverfront promenade where sightseeing boats and floating exhibits docks.

And choose from an international cuisine that will fit every budget. All this, plus the French Quarter and downtown shopping at the fabulous Canal Place just a few minutes’ walk away!

New Orleans World’s Fair

$240 PER PERSON (Double Occupancy)
Single Accommodations, an Additional $60

INCLUDES 6 DAYS & 5 NIGHTS WITH:
• Tour escort
• Round-trip transportation from Carbondale, Ill., by deluxe chartered motorcoach
• Lodging en route at Jackson, Miss., Holiday Inn (going) and at Memphis, Tenn., Quality Inn (return)
• Lunch en route each way
• Three nights’ lodging at Tulane University student residence hall (two twin beds each room, two rooms share bath)
• Two-day admission ticket to fairgrounds

Reservations are accepted as received, and must include a $75 deposit per person. Final payment due 45 days prior to departure.
