

MISCELLANEOUS.

RICHARD DEDEKIND.

Julius Wilhelm Richard Dedekind died on February 12, 1916, at the advanced age of eighty-three, at his home in Brunswick, Germany. He had won international renown for his work in the theory of numbers, and two of his classical pamphlets have been translated by W. W. Beman under the title

Essays on the Theory of Numbers, and published by the Open Court Publishing Company. In the current (July) number of *The Monist*, Mr. Philip E. B. Jourdain, of Fleet, England, presents an appreciation of Dedekind's scientific achievements and we refer our readers to this article for further details.
