Governor Proposes $11 Million Budget: “Far Short Of Need”

**Backstage’s Chosen-Voices**

A committee to handle “behind-the-scenes” business at the Union has been formed, according to Dr. Charles D. Caster, vice-president for administration. The committee’s purpose is to handle the activities of the Student Union, as well as to advise the Student Union Board on various matters. The committee is composed of Dr. Caster, Dr. George L. Doster, vice-president for instruction, Dr. W. G. Hathaway, director of student services, and Dr. J. B. Sturgis, dean of the College of Agriculture.

**Hospitality Weekend To Draw 200 Here**

About 200 high school students are expected to come to SIU for its annual Hospitality Weekend, April 15-16. In addition, about 150 high school students from the St. Louis area will also be at the University for the Hospitality Weekend.

**Vaucluse Show Entries Due At Union Thursday**

For the first time in SIU history, the Vaucluse Show will be held in Vaucluse, a small town in the French Alps. The show will feature a variety of exotic animals, including a large elephant, a giraffe, and a monkey. The elephant will be the star attraction of the show, and will perform several tricks, including riding a bicycle and playing the piano.

**KTEK Tennis Tournament**

The Tennis Tournament is scheduled to begin on Saturday, April 23. The tournament will feature both singles and doubles matches, and will be held on the University Tennis Courts. The tournament is open to all SIU students and will be sponsored by the SIU Tennis Club.

**Debaters Need West—Maybe**

Whether SIU debaters 5 or 6, or 7 or 8, or 9 or 10, will attend the national KPI Tournament, University, Calif., is the subject of a Student Council meeting last night. The Council voted against the request, as it did several times before.

**Widespread Racial, Religious, National Origin Discrimination Found In Job Placement Survey**

The survey was conducted by the Anti-Discrimination League of Illinois, which is sponsored by the Illinois College Employers Association. The survey was conducted by telephone, and was administered to the college placement offices of 120 colleges and universities across the state.

**Sieston Lectures in Pop Concert**

The Sieston Lectures were held last night, and featured a series of lectures on a variety of topics, including music, art, and literature. The lectures were given by members of the University faculty, and were designed to give students a better understanding of the arts.

**KTEK Tennis Tournament**

The Tennis Tournament is scheduled to begin on Saturday, April 23. The tournament will feature both singles and doubles matches, and will be held on the University Tennis Courts. The tournament is open to all SIU students and will be sponsored by the SIU Tennis Club.

**Sisters in Spain For Grad Announced**

Fifteen sisters from the St. Louis Convent will be in Spain for their graduation. The sisters will be staying in a convent in Madrid and will be attending a variety of events, including a concert, a museum visit, and a trip to the beach.

**Dread End Honeymoon**

Debaters need West—Maybe. Whether SIU debaters 5 or 6, or 7 or 8, or 9 or 10, will attend the national KPI Tournament, University, Calif., is the subject of a Student Council meeting last night. The Council voted against the request, as it did several times before.

April Fool!

By Dan Hens

To say that a day in the life of Dr. Frank Bridges is a busy one is an understatement. He estimates that he does a pass at one of four speech exercises, at least one of which is a speech he has taught before.

Alas, Dr. Bridges, an expert in speech and pronunciation, only has time for one class and three workshops each week. He is acting school representative in his classes and an assistant for the speech department. He also chairs the speech department and coordinates the speech department.

Although Dr. Bridges, an expert in speech and pronunciation, only has time for one class and three workshops each week. He is acting school representative in his classes and an assistant for the speech department. He also chairs the speech department and coordinates the speech department.

In the past three months, Dr. Bridges has had the following schedule: 9 high school students.

'Boys' Frogs' Aid In Research

By Paul Finn

Those curious tadpoles are a recent innovation in the research department.

Dr. Charles L. Tate, arrived in Dr. L. Smith, from Georgia Tech and Kent, is actually growing toads from the tadpole stage in his laboratory in hopes of shining light on disease-determining wet.

The experiment is to test various drugs to try to change these toads, vitamins and other elements to test the effects on the glands.

Studies were made as early as 1954 on warm-blooded animals, but very little has been done on amphibians, four years. He has been working for the past year with snakes.

This week will continue, how-
ern, but he believes some immu-

YOUNG ENGINEER is responsible for design analysis of $3,000,000 turbine-generators.

The average large steam turbine-generator costs $3,000,000 and takes two years to build. It is the largest single piece of electrical equipment made. Yet its thousands of parts are put together so carefully as a fine watch. Even a small change in design can affect the stresses and vibrations of the turbine, and the way it performs. At General Electric, several men share the responsibility of predicting those effects before the turbine is built. This is the job of 25-year-old E. D. Zwick, Jr.

The analytical engineer

Here’s what Ted Zwick does. He takes a proposed design feature, describes it mathematically, breaks it down into its simplest parts, and feeds it to electronic computers. (It may take two months to set up a problem; the computers actually use more than 2,000 punch cards. Then Zwick takes the answers from the computers, translates and interprets them so they can be followed by design engineers.)

23,000 college graduates at General Electric

This is a responsible job. Zwick was readily for it in a careful program of development. Like every one of our 40,000 college graduates, he is given a chance to find the work he enjoys most and to realize all his full potential. For General Electric believes that when young minds are given freedom to make progress, everybody benefits—the individual, the company, and the country.
