MEMBERS OF SIGMA ALPHA PI MOVE TO NEW HOME ON CHAUTAUQUA STREET

FELLOWS LEAVE OLD HOME WITH RELUCTANCE BUT ARE PROUD OF NEW DOMICILE

The boys of the Sigma Alpha Pi are leaving their old home and 638 South Normal Avenue at the end of the Fall term, and going into new quarters at a Chautauqua street address. The new house, which they are moving into is large enough to accommodate a larger membership than the Sigma Alpha Pi now has, and so a number of pledges are expected.

The new home is a two-story building, thoroughly modern in every respect. The rooms are large and comfortable. The fellows will be accommodated in each room. The house is heated by a hot water heating system.

Meals will be served as usual. The former moderate rate will be charged for them.

The location is especially desirable on account of the proximity to the campus. It is also near the line of the street car which in turn in which the new house is located.

Although there are traditions connected with the old house that is being left and it is with reluctance that it is being deserted, we feel that the traditions and legends will go with the fellows to their new home, and more, the good Fellowship that has characterized the organization in former times will continue. So it is with a certain amount of expectation that the boys look forward to entering their new home.

In order to properly decorate the new domicile, to give it the air of the old place, it is planned to defer the decoration of this house until the beginning of the Winter term. According to the plans of the fraternity, this should come at the end of the Fall term instead. Invitations to this housewarming will be sent out to old members.

At this time new pledges may take the first degree of their initiation.

New officers of the fraternity were chosen at the meeting on Monday (Continued on Page Six.)

S. I. U. STUDENT GETS POSITION

George Calhoun goes to a position as principal of a six-room six-room building at Two-Card Park, a suburb of Chicago, December 2. There are 600 pupils in the school of whom Mr. Calhoun will be principal.

It is of interest to the students at the S. I. U. that the new institution wants Mr. Calhoun, a graduate of the College of Education. Mr. Calhoun was principal of the Sigma Alpha Pi during the Fall term this year. During the time he was principal, he has been principal of the Junior High School at Johnston City.

Mr. Wham was instrumental in securing Mr. Calhoun this very desirable position.

Football Boys Enjoy Banquet

Monday evening the football boys reaped a very substantial benefit for their season of effort. This was the big banquet which was given at the University Cafe. About forty of the Alpha Pi, part of them brought their girl friends along. Speeches were made by Captain McAndrew, Coach Lingle, Messrs. Henry and Goshko of the Community High School, Dean Wham, the four graduating football stars, Lutz, McCarthy, Newton, and Well, and to keep up the traditions of the house, the Circle of the Big Red also showed their appreciation of the girls by showing their appreciation of the girls by showing their appreciation of the girls. There were several speeches on the subject of the game against the Bears and how the Bears were defeated—one of these being decided by a break and finished with a very good showing in the Little Nineteen Conference.

Society Enrollment May Be Limited

Each literary society has grown this term from a membership of about a baker's dozen to such a size that the society sponsors are seriously debating setting a limit upon the enrollment. The aim of the society is not merely success but to make the best of the members who come under its wing. The last point in its charter is that it has to reach eighteen because there are more members than this number it would be impossible for each one to take part in the program. Of course one derives some benefit from listening but he would gain the most value from what he himself gives. The more one gives the more one gets.

George Calhoun goes to a position as principal of a six-room six-room building at Two-Card Park, a suburb of Chicago, December 2. There are 600 pupils in the school of whom Mr. Calhoun will be principal. It is of interest to the students at the S. I. U. that the new institution wants Mr. Calhoun, a graduate of the College of Education. Mr. Calhoun was principal of the Sigma Alpha Pi during the Fall term this year. During the time he was principal, he has been principal of the Junior High School at Johnston City. Mr. Wham was instrumental in securing Mr. Calhoun this very desirable position.

Article on Art Published by National Board of Education

This month the Board of Education of Washington, D. C., will publish a twenty-five hundred word article on "The Art Museum's Educational Service to the Industrial Arts in Developing an American Style of Design." This article was written by Miss Gladys Williams of our faculty. It is an article concerning her master's thesis which was complete, and she took her master's degree in the University of Cincinnati. Miss Williams has been with this school for twelve years. Before that she had considerable experience in other high schools of St. Louis and Milwaukee. In asking her to contribute this article the Board of Education recognized Miss Williams as an authority in this particular field of educational work. She spent much time in this research at the Cincinnati library. There has recently been an increased interest in art. This is a subject which, according to the opinion of those who are well informed in the art world, is one that is sure to be of great interest and importance. The only thing that we have produced which could possibly be worthy of your attention is the Miss Williams's article which will be published this month.

Obelisk Pictures

Due in December

The making of individual pictures is coming along slowly, according to Harvey Phillips, business manager of the 1929 Obelisk. Apparently the students do not realize how much time is necessary to make the pictures be made during the month of December, so that they can be mounted and sent off to the engraver in January.

"Every year," said Rea Winchestor, editorial editor, "a lot of people decide that they are going to have to step on it if they want to have their pictures in the book. They rush down to the photographer's in the last two or three days. Naturally, he does a less-than-satisfactory job, but he can't accommodate everyone. And a good many people suffer for their haste by having to take inferior pictures, and some of them are turned away.

Harvey Phillips will be in the Egyptian office to accept engravings every day during the next two or three weeks. Students should see him at these hours: from 8:30 to 8:45, and 1:30 to 3:45.

Normal Baskets to Play First Game with St. Louis University

NORMAL WILL HAVE STRONG TEAM FOR INVASION OF MISSOURI SCHOOL

Our basketball squad, under the tutelage of Coach McAndrew, is working hard every afternoon to prepare for a schedule of twelve games or more. Some of the basketball squads have had daily workouts under the direction of Captain Wilcox for several weeks and are in fair condition. As has been the case for the past two years, the first game of the season will be played against St. Louis University there as December 8. Phillips is the team of veterans, our quintet was defeated last year 22 to 11. The first game with them will be played in the Big Red and means that our boys must get some conditioning and develop an attack spirit. Perhaps, if they are doing a good showing they may be able to play St. Louis in the second season close. The new material seems to be good with several freshmen showing through in becoming real assets to the team.

The squad will be led this year by Virgil Wilson who is actung as Cap- tain for the second year. He was unanimously elected at the close of last year, without a doubt, to the team in which one of the new men or whether he chose to run or not. This action was due in part to his ability as a leader and to his good sportsmanship, but largely in recognition of his value to the team and his ability as a player. "Clark" always plays a consistently good defensive game and in offensive work he is excellent. His accurate shooting has pulled many a game to victory.

The first home game will be on January 11 against Washington who pushed us out in football.

Twentieth Players Get Football Letters

Science Club Does Not Hold Meeting

Last week the Science Club postponed its regular meeting until Wednesday, December 11. At this meeting Mr. Peterson will talk about the products of the Blast Furnace. In this discussion he will first talk about the different kinds of iron—wrought iron, cast iron, and malleable iron. Next he will take up the different kinds of steel, open hearth steel, and electric crucible steel. Last he will discuss the by-products of iron and steel.

The Science Club urges the attendance of all teachers or students who may be interested.

Requirements for College Entrance

English is a requirement for entrance in each of the 531 colleges and universities discussed by William Martin Proctor and Edwin J. Brown in School Life, a publication of the United States Bureau of Education. A foreign language is required by 75 per cent of the colleges, Latin or Greek, or both, are required by nine per cent of the institutions. Forty colleges, or 14 per cent of the women's colleges, require Latin as one of the foreign languages to be offered. Mathematics is required by 60 per cent of the colleges reporting.—Educational Bulletin.

Practical Christmas Gifts

Something in ready-to-wear or dress accessories is most practical to give, for it expresses the true spirit of Christmas. This store is aglow with brilliant stock of practical gifts, and prices are as practical for you as the presents are for those to whom you will give them.

The School as a Specializing Agency

By L. C. WARD
Superintendent of Schools, Fort Wayne, Indiana.

Most of us who think at all about the social forces at work upon our people and our civilization will agree that the twenty-five years just passed have witnessed tremendous changes in our national life. We have seen that time the great drift of our people from the country to the city. We have seen the replacement of our man power by the machine, with the consequent development of mass production. We have seen the means of transportation and communication so multiplied and expanded that very few families are now isolated from the world. We have seen far-reaching changes in our habits of thought, in our modes of action, most of them proceeding from the enormous changes in our physical surroundings. These changes have deeply affected every institution of society.

The home of today is very different from the home of the last generation. The play space of the children is now taken by the garage. The chores of yesterday, valuable educational assets, are gone from the family life. Telephones, radios, automobiles, tend to destroy the peaceful atmosphere which children need. All of us, young and old alike, are keyed to a high emotional pitch by modern civilization. Our children must take their chance in a world definitely off the old track, and growing for a new way of life. Surely the school cannot evade its responsibility. As never before, teachers must help their pupils to find themselves; must correct, as far as possible, society's line of omission and commission; must unseal to children sane nurture, man-play, and sane living.

The church, as organized religion, has shared in the tremendous changes brought about by the machine age. Yet the purpose of the church, to do and to teach righteousness, is fundamental. None of us is willing that it should pass from the lives of our children. In these days when old standards are falling, when the ancient conventions are disappearing, there is greater need than ever before for earnest thought upon simple goodness, for determined effort that the things which are of right and righteously altogether shall be deeply impressed upon our children. In these times of unprecedented prosperity, when money is easily obtained, when costs are scarcely counted, it is perhaps only that rigorous honesty should be so often supplanted by questionable practices. We of the schools may not for an instant relax our vigilance. We dare not trust to business the task of building honest character. We must build character in the school in order that business may live. The teacher will lose no opportunity to drive home the lessons of honesty, courage, and fair dealing which alone can maintain the highest ideals of business integrity.

The State suffers today as other institutions. None of us wishes for any impairment of the idea of government of the people by themselves. None of us believes that this idea can long survive unless the people are wise enough to make good laws and obedient enough to demand the enforcement of such laws when they are made. Upon the hope based on this doctrine and such obedience the public school was founded and is maintained. Surely what the original inspiration we may have of the purpose of the school, none of us will gain if the chief of purpose is the maintenance of an effective free citizenship. Never in our history as a nation, not even in the dark days of the fifties, was popular government so threatened by internal forces. Never was the necessity so great for combating those feet through education in the principles of free government. As an instrument for teaching only. Evidently the old days of the school, the fundamental tools subjects are gone. The school of today must do what the old school did, but in addition must become the integrating factor which binds the people together. Wherever other institutions may fail in their duty, the school, as the agent of the State and the servant of the people, must correct its failure, must become the agency which makes of us one nation. The teachers of today have in their hands the welfare of this country, a welfare to be obtained only as we see in the schools of this generation the one available instrument for eliminating hatreds and prejudices, for establishing domestic tranquility. This is the socializing aspect of the work of the school, which, under present conditions, is probably its most important aspect.—Normal Instructor and Primary Principal.

Two Courses Offered
In Public Speaking

There will be two courses in public speaking offered this year: an elementary course during the winter term and an advanced one during the spring term. The elementary course gives junior college English credit and is offered for sophomores primarily, although talented freshmen may be admitted. The advanced course gives senior college English credit and has no prerequisites. During the first class meeting or before, the instructor will be glad to advise students whether or not to attempt the work.

The aims of the first course are as follows: To teach the student how to develop and use his own voice, to detect pathological and bad habit defects in the voices of his pupils, to organize and deliver speeches, to register pure enunciation, enunciation and to gain confidence and platform presence before an audience.

Visitors are not only allowed but cordially invited to attend any of all class meetings.

Marks: I don't know what to do with that dog. I've tried a dozen times to give him away, but no one wants him.

Zinks: Tried to give him away? Why that's no way to get rid of a dog. Ask fifty dollars for him!
BECAUSE THEIR DEEDS ARE EVIL?

Those dark gloomy days have revived a question in my mind. As I go from room to room I am impressed with the gloomy darkness of the English and Art rooms. Do the instructors in charge of these rooms believe that students' good deeds are evil? If they do, I suggest that they may be given light. I am tired of getting red eyes. It is with eyes-straining precision that these teachers speak. After they have spoken the gloomy darkness of the classroom hovers over their heads. Students, our eyes have lights by which they can whittle. Why are our English and Art students kept in darkness?

THE PHYSICAL EXAMINATIONS

There seems to be a good deal of sentiment against the continuation of physical examinations. It would seem that in part this criticism is justified; on the other hand, however, the value of these examinations is overlooked. Several rather important benefits can be enumerated. Incoming students are given advice concerning their physical condition, which should be of service to them. Physical training classes can be classified from the examination data. Inoculating cases of contagious disease among new students can be detected and the proper steps taken to prevent their spread. Most of the criticism would say that all this is well and good as far as it goes, but would add that if the examinations are continue the students should choose or altogether resist, as in the case of contagious disease, since it is hardly to be supposed that newcomers alone are subject to the examinations. While it is true to say that the effective it would seem the part of wisdom to either extend them to the whole student body, or otherwise confine them solely to the physical education classes.

In a recent edition of a city newspaper appeared a statement to the effect that a college education is not fatal to an individual if he is willing to be taught after he graduates. Of course, the statement was intended to be facetious. It is an accepted fact that a college education is very desirable and that college graduates are preferred for the responsible positions in all industries and professions. William R. Dawes, a successful banker of Chicago, reflects the attitude of the business world towards college graduates when he says, "I believe a law degree has a better chance to make a man in the business world than a man without college training. A college education cannot perform miracles by endowing any man with business acumen; but a college degree can, if it is properly used, indicate the student's capacity to meet the requirements of his position. The student must first have the will and courage to endure disappointment and defeat. His final measure of success will then depend upon his ability to interpret his dreams in the language of every day affairs. Some people have succeeded in life without a college education, but they have been rare exceptions rather than the rule. One of the outstanding of these is James Ramsey McDonald, but he recognizes his limitations when he says, "I never attended a university. But my education was quite as good as some that I have read."

The story of the Bachelor of Arts degree is one of the many students of the college department. The story is to be told in the next issue of the "Egyptian." The graduating story of 1917 will be published in the issue of December 19. This issue is to mark the end of a highly disciplinary literary form of writing.
Among the Rural Practice Schools
(Continued for Last Week)

James Akin, an 8th grade student at the Pleasant Grove school, shot his left forefinger off last Monday morning while hunting. He is back at school and seems to be improving nicely. Mr. Merwin is again among us visiting his six weeks' teachers. A Parent Teacher meeting was held at the Bridge school Nov. 16 at 7 o'clock. A short program by the children consisting of songs and poems learned this term was given. Mr. Bailey of the Normal faculty was the speaker of the day. He gave a very interesting and instructive talk on Nature Study. He brought with him a microscope and entertained the children for a time by showing them various simple things under its powerful lens.

Twenty parents and friends were present. They organized for this year and made plans for a meeting at an early date.

This idea of letting your girl tell everybody she has made a man of you! You don't hear your wife saying that about you! No, but I heard her tell Smith that she had done the best she could.

Y. W. and Y. M. C. A. Joint Meeting

For the last meeting of the term, the Y. W. C. A. and the Y. M. C. A. held a joint meeting. Since these educational groups are auxiliary organizations and since it was so near Thanksgiving they very appropriately chose as the theme of the night's program, "O come, let us give thanks unto the Lord." Special attention was given to music. After the prayer a hymn of Thanksgiving, "Come Ye Thankful People, Come," was sung as a duet.

The history of Thanksgiving was related by Eva Marie Ash. Later in the evening an open discussion conducted by Julia Mason was held. Miss Wilson, an active helper, though not directly connected with the school, contributed much to the topic, answering to how and why we should give thanks.

The closing hymn, For the Beauty of the Earth, was chosen, also because it is a hymn of Thanksgiving.

The music of the recitational impressively dismissed the meeting.

"I don't need none," said the lady of the house before the hawk had opened his mouth.

"How do you know? I might be sellinggrammar."

Alumni News

HARRISBURG

Mrs. Reonce Pollyman, superintendent of the Harrisburg city schools, has been ill several days with tonsillitis. His condition is improving, however, and he is expected to return to his work soon.

The Saline County Institute was held at Harrisburg, November 21-23. Former S. I. U. N. P. who attended and were prominent in campus activities are as follows: Miss Quin (Kessette) Allen, Harvey Mungay, Clara Bell Hopkins, Muck Barrett, Roy and Arthur Caffee, Mary Mathis, Nell Reed and Charles Runnig.

Mr. and Mrs. Virgil Perry are now living in Ohio. Mr. Perry is an employee of Kreges. Mrs. Perry was formerly Joan Sullivan.

Friends of Edna Gregg, Simco, Ill., will be glad to learn that she has returned to her home. She has been in a tuberculosis sanitarium in Texas for the past six months.

Miss Hazel Stanley, Chester, Ill., is doing some commendable work in health and hygiene in grade five. Her pupils were given good places in a recent health project conducted by the county nurse.

John Orth was able to leave the lighter hospital today where he has spent the last two weeks. He and Alice Jarrels were driving to Carbondale when they had a collision with another car. Mr. Orth's eyes were badly bruised and he received abdominal injuries. Miss Jarrels was bruised considerably, too.

Ethel Gathman, who has attended several summer sessions, has been delicious for two months with scarlet fever.

Dale Wilson and Pat Brewer, both members of last year's orchestra, are teaching violin and clarinet classes beside their regular class room work.

Marion Taylor '25 is studying medicine at the University of Illinois School of Medicine, Chicago. Reports that he is working hard. Junior this year. Is working his way through college. Employed as a nurse.

Clay V. Winkler '28 is teaching in the Marion Township High School.

Carl O. Smith '25 is teaching in the Marion Township High School.

Ethel Parr, Junior College '24 is working off her master's at Illinois. J. Cary Davis '25 is getting his A. of M. at Chicago this year.

"Gabbiges" Floyd '20 was a visitor here last week end. "Gabbages" is assistant coach at Marion.

Roy White '22 is teaching science in Marion Township High School where he has been for the last eight months.

Dr. Dwight York, graduate of Junior College '23, is teaching mathematics and directing the orchestra and band in the High School at Marion.

Maude Brackett '26 is teaching history in the Hurl-Bush High School.

Theresa Kers and Ruth Walton of Belleville, Junior College '24, were visitors here this morning.

**NATIONAL SECRETARY VISITS Y. W. C. A.**

The Y. W. C. A. had an unusual program last Tuesday evening. Miss Julia Mae Hamilton, the National Y. W. C. A. Secretary, talked, giving the young women of the Association a new appreciation of the value of the society and of life itself.

Miss Hamilton said that every girl should realize the privilege she had of spending an hour in spiritual worship each week, in meeting new friends, and in revealing her inner thoughts by taking part in this religious organization.

Besides stressing the value of the society, she spoke of what it meant to be a friend. She said she must learn gradually to be a friend and that we must find a key to the personality and the soul by careful study.

Friendship employs technique; one must really love and appreciate a person before she is capable of being trusted with the valuable blessing of friendship. She said: "Let your life be a laboratory where you see and develop the influence of friendship. Feel your responsibility to give your best always. Learn to have eyes that see only the good; blind yourself to the petty things of life.

It isn't because its cheaper that so many people eat in cafeterias. It's because more honest. You have to wait on yourself.

First Bridge Partner: Don't be a fool!
Second B. P.: Why, do you want a monopoly on the business?"
