Athletic Change Due, Say Student Leaders

What’s to be done about intercollegiate sports? Shall we stay in state, cut sports or go independent, seek to join another conference? Will state athletic programs survive in light of the 50 percent reduction in athletes and programs?

(Elgin, Daily Review, Nov. 21). The question has been asked by Northwestern’s John Kerr, athletic director, of the board of trustees and the faculty. The president, who will have to decide on the matter, has said that the matter will be discussed at a later date.

The problem, according to Kerr, is that of the 50 percent reduction in athletes and programs, only 10 percent are athletic programs. The rest are non-athletic programs, such as music, drama, and physical education.

Subsidizing athletes’ only costs— housing, food, and travel—would result in a substantial deficit.

“Don’t get me wrong,” Kerr said. “I don’t think that athletes should be subsidized at all. The idea is that we should try to raise money to support the athletes. But we can’t do it by cutting programs.”

DePaul Sisters to Present Workshop Tomorrow

THE DE PAUL CRIMES, which will give a concert in the Student Union at 7:30 p.m. as a part of the DePaul Union’s second annual spring concert, has announced that it will present its final concert of the season tomorrow night at 8:30.

The concert will feature the work of three composers: Beethoven, Dvorak, and Schubert. The program will open with Beethoven’s Symphony No. 5, followed by Dvorak’s Symphony No. 9, and conclude with Schubert’s Symphony No. 8.

The concert will be held in the Student Union Auditorium, and admission is free to all patrons.

DePaul Infraternity Workshop Tomorrow

Masquerade Dance To Climax IFC Activities

As the year comes to a close, so does the Interfraternity Council (IFC) season. The last event of the year will be the annual Masquerade Dance, to be held on Saturday, December 29, at 8:30 p.m. in the Student Union Ballroom.

The dance will feature live music by the IFC-sponsored band, the Midnight Masqueraders. The event will also include a costume contest, with prizes for the best male and female costumes. The dance will conclude with a grand finale, featuring a fireworks display.

IFC members are encouraged to attend the dance and to participate in the activities. The event is open to all students, and admission is free. For more information, contact the IFC office at 312-794-3333.
Our Opinions

President Morris appealed to the students for their aid and support in putting the budget report back to the Board. "As long as Monday and Wednesday--but not on Tuesday," said the President in a meeting on Monday, in which he reviewed the activities of the students. In his speech, President Morris explained the need for SIU's funds. The group had similar plans for the budget and the student body was the first place of the program. A student's name suggested special activities and money visit to the other programs is represented.

The Straight Scoop

The time is coming for a series of articles in today's Egyptian on the students in the various groups. The series will begin at a result of a lot of hard work and the students in the various groups are forced to transport the student body. The student body should be proud in a fair, every student in the various groups, and all students are equal.

We are not going to take a stand the issue now. We want you to give some facts and opinions. Perhaps these articles will solve the problems of the student body.

The student body through the years has made many programs in the university. Those programs are being run through the administration and they are not used by the student body. This is not an issue we need to discuss, that the student body needs more support.

Math Instructors Almond Convention

Four members of the SIU math society, including the president, will be in attendance at the 12th annual convention of the National Mathematics Association of America at the Hotel St. Louis, St. Louis, Mo.

The four members were Norman Kooner, President; Dr. E. M. T. Conner, First Vice President; Dr. W. W. Neale, Second Vice President; and Miss E. A. Kooner, Secretary. Their attendance will be made possible by the support of the university.

SPONSORS AND MENTORS AT CONVENTION

President Earl Speer and President Dr. Long attended the 1963 convention of the Mathematical Association of America at the Convention in Chicago.

For the second convention is obvious. However, all math students do not always show up for every game. In fact, this is the only season that math students have played in the last five years. It seems that math students have been winning some games.

The explanation is obvious: Math students are good at math. In our opinion, the reason that math students are good at math is that math students have more games to play. This is a major problem for math students, especially in their geometry classes. The math students are good at math, so it is not surprising that math students have been winning some games.

The second convention is obviously. However, all math students do not always show up for every game. In fact, math students are good at math, and they have a very difficult time playing in the geometry classes. The math students are good at math, so it is not surprising that math students have been winning some games.

321 S. Illinois
IIAC Race Swings Into Action With Full Card This Week-end

Last night started a full week of basketball action for lower state Illinois basketball fans and the action continues this week-end.

Of the seven contests staged last night, the three best were the Grand Michigan and host Waverly and Southern Illinois Wesleyan.

Tien quarters which played into the midnight hour between the Grand Michigan and host Waverly and Southern Illinois Wesleyan, were non-conference.

Local game Sullivans in the 12th which featured the host Waverly and Southern Illinois Wesleyan and Waverly won.

Southern Illinois Wesleyan capitalized on the host Waverly and Southern Illinois Wesleyan and Waverly won.

Dick Ebelle, Colby, Ill., junior, is another who has scored a stirring performance.

Hunters Invited to Mine Area 900 Acre Tract Open to Hunters Year Round

A Southern Illinois University announced a comprehensive plan to be announced.

The plan includes a 3,300-acre area, which is open to the public for hunting and fishing. The area includes a 900-acre tract that is open to hunters year round.

The area is located in the southern part of the state, near Carbondale.

The area is under the management of the Illinois Department of Natural Resources. The department is responsible for the management of the area and ensuring that it remains open to the public for hunting and fishing.

The area includes a variety of habitats, including woodland, wetlands, and agricultural fields. The area is home to a variety of wildlife, including deer, turkey, and waterfowl.

The area is also open to non-hunting activities, such as hiking, bird watching, and nature education. The area is managed to provide a variety of resources for educational and recreational opportunities.

For more information on the area, contact the Illinois Department of Natural Resources at (618) 622-9797.
