Sigma Pi, Tau Kappa Epsilon Fraternities
Move Into Greek Housing In Fall Quarter

By Joan Frick

The first fraternities, Sigma Pi and Tau Kappa Epsilon, have been chosen to serve as the first Greek fraternities to enter Greek housing on November 1st. These two fraternities will take oat residence beginning the fall quarter of 1959, unless some special problems come up.

The first move to make in some of the house has not yet been announced as these groups are still in negotiations.

The Sigma Kappa, Theta Xi, and Delta Chi Fraternities will move in during the winter quarter and the second quarter of 1959. The first two quarters' houses will be 45, the maximum 65 in times of emergency.

The organization meeting is to set the final house plans for June 1959, unless some special problems come up.

According to William R. Rapp, Director of Student Activities, the University's "won'ts won'ts and won'ts" (the minimum requirement) unless the groups cannot fill the houses with their own members and we need the space.

The qualifications for occupancy in the house as specified in the letter rates were organized as follows:

1. Each individual assigned to a house is to be given a main room with full, a desk, a bed and a closet.
2. The individual must have a bed and a desk with a light and a closet.
3. Each individual must have a bed, a desk and a closet with a light and a closet.
4. Each individual is to be given the same basic equipment as above not to exceed.

Curb Fire Carelessness
Fire is a highly dangerous and unpredictable peril. Recently there have been two fires on the campus. The first one developed over the faculty residence on the Homewood Point road; the blaze spread to the wooded area east of the apartment building.

Fortunately neither fire contributed to any serious injury, but the potential destructiveness was very real. The first fire started when high winds blew the fumes of a trash fire west of campus. The second fire started from a discarded match in an unoccupied apartment, and was probably the result of a carelessly tossed cigarette.

Since the campus is a place of restricted fire, the possibility for fire damage could cause disaster for a student whose home is in one of the residence buildings.

The solution to fire problems is relatively simple. First, never throw away matches or other items that could catch fire. Second, keep fire extinguishers in working order. Third, do not smoke in the dormitories or in any other part of the campus.

When Your Mind’s not on your driving, you’re dangerous! Your car’s not thinking. That’s your department—the driver’s. So think about this. When your mind is on anything else but your driving, anything can happen—including an accident! Last year, nearly 6,000 Americans died on our highways. Many might still be alive if they or others had kept their minds on the road—demanding your full attention, so stay alert and stay alive!
PSYCHOLOGY CLUB MEETS THURSDAY

Thursday, April 9, at 8 o'clock, in the auditorium of the Psychology Club. Dr. Robert Ohtsuka will present a lecture on the psychology of the Japanese. The audience is encouraged to participate in the discussion. The meeting will be open to the public.
