MAJORITY RULES?

Despite announcements, urging, and even planning, there was no great rush around the campus polls on last Tuesday. In fact, the vote which was supposed to be an honest determination of student opinion was so light that it is estimated that those who cast the vote on Tuesday may be a small fraction of the student body at large.

That means that three out of four of the campus have no interest whatsoever in the affairs of the Student Council in any organization. That means, therefore, that a majority is capable of controlling 80% of the available vote, which means that three out of four of the campus are capable of controlling the decisions of 80% of the campus.

**Majority Rules**

*By R. Leary & J. Jacobs*

The only decision that is made through majority rule is the one that is made through the majority of the campus. All other issues are decided by a minority of the campus, which means that a minority of the campus can control the decisions of the majority of the campus.
