By John Epperheimer

Keneith Davis, chairman of the SIU Board of Trustees, said Monday that he is "definitely in favor" of the proposed increased activity fee for athletics. "We would either step up the program or go back to intramural football," Davis said.

Davis said the proposal will probably be acted on at the second Board of Trustees meeting this year, if it is recommended by the Student Senate and the administration. About 3,000 students voted in the advisory referendum, last term and approximately 55 per cent of them favored the increase.

Under the proposal, $6 a term from the activity fee would go to intercollegiate athletics, earmarked for National Collegiate Athletic Association work-free scholarships for major sports. Some of the present work-type scholarships at SIU never would be maintained for minor sports.

The referendum was sponsored by the Student Senate. The committee now drawing up a complete proposal and the Senate must pass it before the Board can act.

George Paluch, student body president, said Monday that before he will sign any athletic fee bill passed by the Student Senate he must have written opinions from top administrators.

NOTHING TO SMILE ABOUT--After waiting in the long registration lines at the SIU Arena, students get little to smile about. Registration for winter term continues the rest of this week. (Photo by Hal Stoele)

Pre-Holiday Assault

Murder Case Hearing Slated Wednesday; Hinkle Held in Slaying of SIU Student

A preliminary hearing will be held Wednesday to discuss the possibility of grand jury action against Donald Lee Hinkle, now being held in Jackson County Jail on a charge of slaying an SIU student.

Hinkle is accused of murdering Charles M. Douthit Jr., a Chicago junior majoring in engineering. As the two walked west on Old Illinois 13 west of Carbondale early Dec. 15, Douthit's body was found in a drainage ditch alongside the highway the afternoon of Dec. 15. An autopsy, which set the time of death at about 1:30 p.m., revealed that the student died as a result of a heavy blow on the back of the head which crushed the skull.

The medical examiner ruled the death a murder by a weapon described as a black instrument like "a hall bat, a whisky bottle or a black jack," according to Dr. Lewis J. Ooster, who performed the autopsy.

Thom K. Leffler, security officer, said a quart beer bottle was found in the weeds near the body and it is being tested as a possible murder weapon.

The day after the discovery of the body, Richard Richman, Jackson County state's attorney issued a warrant charging Hinkle with the murder.

Witnesses had earlier told police they had seen Hinkle. The U.S. commissioner in Carbondale signed a federal warrant against Hinkle charging him with unlawful flight to avoid prosecution, thus bringing the FBI into the search.

Hinkle was finally apprehended at a service station at 315 N. Illinois Ave. on Dec. 29, after an anonymous telephone call to the Carbondale police advising them of the caller's description of a man who resembled Hinkle on the drive of the station, according to Police Chief Jack Hazel.

According to the patrolman who picked up Hinkle, the wanted man gave the officer a false name and said he didn't know why the police were looking for him.

Hinkle, a former mental patient, apparently had been travelling in Illinois and Missouri prior to his arrest. Hinkle said he and Douthit had been drinking from a bottle of vodka while walking west on Old Illinois 13 west of Carbondale. Hinkle told police that he caught a ride back to Carbondale and left Douthit with the remaining liquor. He said that they hadn't argued or fought and said, "I'm not guilty."

**Baptist Students Will Sponsor Conference**

**To Emphasize Summer Missionary Work**

The Baptist Student Missionary Conference will be held Jan. 14 and 15 at the Baptist Foundation.

The conference will begin at 7 p.m. on Jan. 14 and will continue all day Jan. 15 starting at 8 a.m.

The purpose of the conference is to emphasize the summer missionary program for students which is sponsored by the Southern Baptist Convention Home and the Foreign Mission Board.

The program will consist of reports of summer missionaries who served during 1965. The speakers will be Janice Eady of Jonesboro, who served in Louisiana; Mary Lou Miller of Decatur, who served in Colorado; Mr. and Mrs. William Shahan of Centralia, who served in Texas; and Florella Crumlin of Carbondale, who served in Jamaica.

Nathan Porter, assistant personnel secretary of the Home Mission Board, Atlanta, Ga., will be the guest speaker. His board gives the students an opportunity to serve as part of the US-2 mission.

This consists of two-year appointments for college graduates under the age of 27.

Linda Linzy of Crittendon County, Ky., is an SIU appointee to the Lincoln Place Mission at Granite City and Alva Fretz of St. Louis is serving in Chicago by working with the Polish Baptist church.

Social Sororities Will Begin Annual Coed Rush Jan. 16

The conference cochairmen are Glenn Brooks, president of Student Housing and Norma Meyer of Centralia.

The SIU Conference will be entertained by the chapel singers.

Activities

Musical Rehearsals Set Today

The Brass Ensemble will rehearse from noon to 1 p.m. and from 4 to 5 p.m. in Shryock Auditorium.

A Chamber Music rehearsal will begin at 1 p.m. in Shryock Auditorium.

Symphonic Band rehearsal will begin at 3 p.m. in Shryock Auditorium.

An Arnold Air Society meeting will begin at 9 p.m. in Davis Auditorium in the Wham Education Building.

An audio-visual program will be presented at noon in Morris Library Auditorium.

New Student Week will operate from 8 a.m. until 9 p.m. in Activities Rooms E and F at the University Center.

Inter-Varsity Christian Fellowship will meet at 7:30 p.m. in Activities Room E of the University Center.

Radio to Air Talk On Space Medicine

Bioastronautics, the study of human factors in outer space, will be discussed tonight on "Space Medicine," the first program in a series, "Their Other World," on WSIU Radio.

Other programs:
- 8 a.m.: Morning Show
- 10 a.m.: Pop Concert
- 12:30 p.m.: News
- 8:35 p.m.: This Is Baroque
- 11 p.m.: Moonlight Serenade

Yearbook Orders Will Be Accepted From Newcomers

New students and those who have transferred to SIU this term will have an opportunity to order copies of the 1966 Obelisk, the SIU yearbook, this week.

Members of Alpha Delta Sigma, advertising honorary society, will be taking orders from 8 a.m. to 5 p.m. Wednesday through Saturday in the activities area of the University Center.

Students ordering the book will be required to pay $3, and the remainder will be taken from their activity fees. The yearbook will be delivered in June.

Physical Fitness Program to Start

The faculty noon-hour physical fitness program will resume with an organizational meeting at noon Wednesday in Room 127 of the Arena.

Now members should contact Ronald G. Knowlton, assistant professor of men's physical education, in Room 127 of the Arena or call 3-2575.

Protesters "Neo-Isolationists"

Folk singers have been involved in social movements for the past few years since the United States has been heavily involved in the war in South Vietnam. As a result, a great number of the country's white, college-age people, that were once involved in sit-ins concerning integration questions, are now participating in teach-ins that advocate withdrawal from South Vietnam. These protesters seem to oppose the slogan of the movement, "Do-in-the-field and hospital in Vietnam.

The following follow-up marks by cartoonist Al Capp sum up his feelings on campus non-conformity.

Joan Baez keeps advising the President in song how to win the war. Namely, to run, Peter Seeger also sings foreign policy folk songs telling the U.S. Army to take it easy on the Communists. His advice is to stop shooting at them before they become Casual. Tragically, however, many people are content to leave our would-be superpower in the hands of the White House, the U.S. Senate and the State Department. The Communists even write their own one-hit record to their name.

When asked if our young rebels should be given credit for having humanitarian ideals, Capp replied that he is suspicious of these ideals because he thinks, dress and riot exactly the same, giving them a unitary look: "Here comes hysteria."

Because student protesters generally argue against from emotional basis, their arguments can usually be discounted from a political or economic outlook. This was brought out in a recent debate on the SITU campus between the national vice president of Students for a Democratic Society and government professor B. Jacobson. The SDS spokesman told of inhuman actions of the South Vietnamese army, while Jacobson spoke of the power of Asia. Of course, torture and death cannot be simply passed over, but they are secondary in considering our role in Vietnam. A minority of college professors, clearly seen as a group called "Women for Peace in Viet Nam" argue along the recently wrote that, we have over-extended ourselves militarily and politically in the war in Vietnam. which a New York Times magazine writer describes as a "costly" war. The world's more popular among the "pull-out-of-Vietnam" group, gives the war escalates in Viet Nam, isolationism is preached by more and more people. This is similar to the attitude of some Americans before World War II, when our "Vital interest" was thought to be only in Europe and the Americas, and not across the Pacific. The following follow-up marks of this type of thinking could put us in the same defensive position that we had to operate from in 1941.

John Goodrich

War Policy Violates U.N. Charter

By Robert M. Hutchins

This new year would look much brighter if it offered any prospect of peace in Vietnam.

Nobody in Washington has seen what conditions would end the aggression of the Vietnamese. Michelle with theing中华民族, the United Nations or the North Vietnamese.

What will happen then? In 1952 the French held every village in the country. They had to withdraw in 1954. If the United States is more fortunate than France, it is able to stay longer, it will roap a harvest of hatred that will make it necessary to maintain overwhelming military power in the country for many years to come.

Undoubtedly, the United States could conquer China. The effort would cost millions of lives; for there is no reason to suppose that the Chinese people are eager to await our occupation. What about the Communist Chinese Air Force? Don't be a Peking fan! What about the Communist Chinese Navy? What about the Communist Chinese Army? We have over-extended ourselves militarily and politically in the war in Vietnam. which a New York Times magazine writer describes as a "costly" war. The world's more popular among the "pull-out-of-Vietnam" group, gives the war escalates in Viet Nam, isolationism is preached by more and more people. This is similar to the attitude of some Americans before World War II, when our "Vital interest" was thought to be only in Europe and the Americas, and not across the Pacific. The following follow-up marks of this type of thinking could put us in the same defensive position that we had to operate from in 1941.

A group of scholars, including David Cavers of the Harvard University, and Al Capp of the University of Virginia and Walter Millis of the Center for the Study of Democratic Institutions, has lately said, "A war in which enormous damage is being inflicted on the Vietnamese, both South and North, and which is likely to cause increased suffering to Americans, is the worst way to proceed to the negotiating table. It is said the need of future dangerous rivalries and conflicts."

These critics also call attention to an aspect of this unfortunate affair that is consistently ignored in Washington and in the American press, the role of the United Nations.

They point out that the United States is not an ordinary U.N. member, but a Permanent Member of the Security Council. As such it has special responsibilities. Under the U.N. Charter, member states may undertake a military action against another country except in self-defense if an armed attack occurs. Even then it may do so only until the matter has been reported to the Security Council.

The plain meaning of the Charter is that the Security Council must be asked to take over.

The group concludes: "Certainly a Permanent Member of the Council has a special responsibility to ensure that the spirit and the letter of the Charter are observed. It is difficult to see that the United States is setting an adequate standard of right behavior by continuing to extend its present military action in North Vietnam."

It is difficult to see what the United States thinks it is accomplishing by continuing and extending its present military action in North Vietnam.

Copyright 1965, Los Angeles Times
Red China Concentrates on Atomic Weapons

HONG KONG—Out on the barren expanse of the Loess Plateau, near Lanchow in northwest Kansu province, two atomic explosions were demonstrated to the world that Peking is intent on developing atomic weapons. At present the Red Chinese military is basically a defensive force, and the military is certainly with better equipment than the name might suggest. More importantly, however, the nation’s top brains have been heavily taxed resources—most of which are called to the front of military development. Nevertheless, it is clearer than ever that Peking is willing to invest an estimated three percent of its inadequate national budget in atomic research and development.

The country’s limited number of highly skilled scientists and technicians has been assigned to military projects. Peking also has devoted five of its eight ministries of machinery building to development of munitions for arm forces.

China committed to assisting Hanoi in the Viet Nam war, it is quite likely that military expenditures will have to be increased.

No hard figures are available on how much China spends on military hardware, nor is it known for certain how developed its logistics industries are or how well trained. But the number is not believed large.

And with five of the country’s eight machinery-building ministries concerned with military industries, it must be assumed that a large proportion of China’s technical and scientific personnel work in military enterprises.

China’s military industries are not believed to be developed to the point where Peking can maintain a lengthy war, but with considerable effort being placed on weapons development it would be quite possible to maintain a lengthy war.

The great shortcoming of all this effort is that it deprives the Chinese people of the consumer goods and higher standards of living they could have.

Copley News Service

Estimates are that the plant is capable of producing enough material to build one bomb a month.

As for other nuclear installations, the estimates on numbers of both atomic reactors and their size are very wide. The first nuclear reactor went into operation in Peking on Sept. 29, 1958. Other reactors were believed to be under construction near Lanchow in China’s northwestern Kansu province. It covers an estimated 10 acres and is supported with hydroelectric power from the Yellow River.

Thinking Things Over Of Men and Angels

By Vermont Royster

The late Thomas P. Fowdow, whose thoughts on social Darwinism made a great impact some years ago, was wont to return often to a search which was once thought worthy of the perplexity of philosophy. The search was to answer the simple question, What is Man?

To these ends the late philosopher frequently wrote, as he did voluminously, on very practical matters which accrued remote from metaphysics—from monetary policy, for example, or speculation in the stock market or foreign policy problems of all sorts.

"We chatter fatuously of dictators and democracies," he remarked on the eve of World War II "as if it were merely a matter of governmental forms or, even, economic theories that is in question, it is not final form but rival vantage points that face each other—the most fundamental of all ideas, man’s idea of his own nature, man’s concept of himself and his destiny."

So he urged his readers to see the brewing war as a conflict over the nature of man. So he saw many political issues, as a reflection of the conflict over whether the State should be the main source of knowledge and of philosophers reputed for their wisdom. It is not only a rejection of modern, but rival vantage points that face each other—the most fundamental of all ideas, man’s idea of his own nature, man’s concept of himself and his destiny.

Sometimes at Christmastide he would state the question explicitly: Man is either nothing more than the development of an atom machine, or he is the man of the Psalms, "Blessed are the pure in heart, for they shall see God, and shall be crowned with glory and honor." * * *

Today the very form of the question would strike most people as quaint, To our generations angels are no more prevalent than witches. Yet Francis Bacon’s "familiar spirits" is only the highbrow version of what people do at seances. In the year 1900, at the tender age of 34, H. G. Wells wrote, in "The War of the Worlds," "The real natural and impious of human beings must therefore be banished from the earth, but the angelologically pure are alone, in theory, the real hopeful words."

This is not the opinion of the natural

trifles of men. Cruelty and deceit are not imperfections which we may all be brought to simplify because we are not gods; the plea is not even that these failings are understandable, and forgiven. Sadism and dishonesty are virtues to be acquired as they are useful. For animals—Is it not said—are not one, and being one is indistinguishable.

Such is the modern lesson taught under the ages of both asceticism and anti-asceticism. It is not only a rejection of modern, but rival vantage points that face each other—the most fundamental of all ideas, man’s idea of his own nature, man’s concept of himself and his destiny.

Finally, there is Hiram Bingham offering a jeremiad against our society which violence and cruelty and vindictiveness openly every day and where sexual exhibitionism concentrates on women and which is atomic.

Mind you, these are not the voices of the bourgeoisie. They are the voices of modern, sophisticated weapons development, and the question is: Are you not in the atomic age?

There certainly is no lack of talent behind Peking’s nuclear effort. Wang Kan-chang, who studied in Germany in the 1930s and was deputy director of Russia’s Duna Institute in 1939, is believed to be China’s top atomic scientist. Chien Shao-ching, director of China’s Institute of Atomic Energy, was trained at the University of California and taught briefly in the United States.

In other areas of sophisticated weapons development—missiles, rocketry, trained scientists and technicians—China still does not have a large core of highly trained scientists and technicians.

No figures are available on how much China spends on military equipment, nor is it known for certain how developed its logistics industries are or how well trained.

M. R. R. S. with "somewhere a trace of trace."" Finally, there is Hiram Bingham offering a jeremiad against our society which violence and cruelty and vindictiveness openly every day and where sexual exhibitionism concentrates on women and which is atomic.

Mind you, these are not the voices of the bourgeoisie. They are the voices of modern, sophisticated weapons development, and the question is: Are you not in the atomic age?

Yet if Man, in the words of the anthropologist, is "a predator whose natural instinct is to kill with a weapon," can we deny the instinct which, being natural, is thereby virtuous? We may fear the predator for ourselves, as the lamb does the lion, but what moral reasoning can there be for condemnation?

Haydn is sliced up on a park bench by a pack in human form for the joy of seeing him bleed, and our sympathy is not for the dead beagle but for the non-human that they have to occupy their time. A tortured woman stands on a soapbox and the condescending police officer, "Jump!" for a lunch-hour thrill. Why not?

Lust, cruelty, selfishness are indeed instincts we possess. Why not, then, give those instincts new philosophy, new dreams, then what point is there in heroism, courtesy, charity, chastity, respect for honor?

But, if wise men today lament the consequences they see of the "manic depression" ethic, one wonders if they do not recover the vision of the Apostles, that man is both good and bad, that they have a view that "humanity is pried midway between the gods and beasts." That, after all, is not too far from where the angels differ.
SIU Receives $296,298 Grant For Student Workers' Wages

SIU has received an installment of $296,298 on a half-million dollar grant from the U.S. Office of Education under the Economic Opportunity Act to cover winter and spring wages for 522 students working under the federal college work-study program. The students are among 4,714 holding part-time campus jobs in a student work program which will have a total budget approaching $3,200,000 this year, according to Frank C. Adams, director of the Office of Student Work and Financial Assistance.

The federal program is designed to assist students from low income families, of which 73 per cent of those involved in student work at SIU come from basic family groups whose annual income is less than $3,200, Adams said.

The federal college work-study program provides an extension of Southern's established student work program, one of the nation's oldest and largest.

---

Dona Cap and Gown
African Student Called Home, Gets Degree Six Months Early

An African graduate student at SIU received his degree six months early because his country needed him back on the farm.

Wadson B. Deleza, 29-year-old agronomy major, donned cap and gown to be received formally in the office of President Delyte W. Morris shortly before Christmas. Wearing his own academic robes, Morris congratulated him and bade him farewell.

Malawi, the year-old republic in which Deleza's home, needs agricultural experts.

Although he completed requirements at SIU in December for his master's degree in agronomy, Deleza had planned to stay in the U.S. and continue study for a doctorate. He would have received his master's along with other members of SIU's class of '66 next June.

However, because flint crop technicians have been leaving the former crown protectorate of Nyasaland, since it won independence and changed its name in 1964, the government asked Deleza to come home early.

Deleza was the first student to come to SIU under the African-American Fellowship plan sponsored by the African-American Institute.

Deleza, who received a bachelor's degree at Ethiopia's Halla Selasie University, came to SIU because the crop-growing conditions and agricultural environment in the area are much like those in Malawi.

He concentrated on plant industries and did his master's research on corn, major human food crop in Malawi. He says one of his country's pressing agricultural needs is to boost corn yields with more variety and introduction of hybrids.

"I've learned a great deal that can certainly benefit my return to America for my doctorate," Deleza told Morris. "I hope I can return to America for my doctorate"

Alfred B. Caster, chairman of the Department of Plant Industries, said Deleza should have no difficulty qualifying.

"He was an excellent student and we'd love to have more like him."

On-Campus Living Spaces Still Available for Men, Women

SIU students living off campus who wish to move to University housing may apply for spaces for men in University housing.

All of the available spaces are temporary, living quarters, mainly in the lounges of residence halls, according to Joseph W. Gasser, supervisor of contracts in the SIU Housing Office.

Gasser said the University will continue to write contracts until all the spaces are filled.

The deadline for students to fulfill contracts is 10 a.m. today. After that time, students in temporary quarters will be reassigned to permanent quarters.

There are temporary spaces at Thompson Point Residence Halls for about a dozen women in basement lounges, No. girls to a lounge. At Woody Hall there is room for 15 rating in floor lounges, four girls to a lounge.

University Park has spaces for 10 girls in Neely Hall and Roosevelt. There are temporary living quarters, mainly in the lounges of residence halls, according to Joseph W. Gasser, supervisor of contracts in the SIU Housing Office.

Gasser said the University will continue to write contracts until all the spaces are filled. The deadline for students to fulfill contracts is 10 a.m.
Students Expelled For Vandalism
Louis F. Sauer, 18, a freshman from Champaign, and James E. McCauley, 19, a sophomore from Glendale, Mo., were suspended Dec. 10 for being allegedly involved in an incident involving vandalism and a fire alarm in Neely Hall early that morning.

The students were ordered to be out of their living quarters in Warren Hall and were barred from taking final quarter finals. They will not be eligible for readmission until spring quarter.

The students allegedly gained entrance to Neely Hall through the steam distribution tunnels. In Neely, they rode the elevator to the 15th floor where they painted the floor with aluminum paint.

They then walked down the stairs according to reports, leaving the hall in a state of disrepair.

They were alleged to be possession of five other students.

Two Students Die in Wreck Over Holiday
Two SIU students were killed in an auto wreck in Herrin during Christmas vacation.

Frances Lee Mastal P., 19, a freshman, was pronounced dead at a local hospital, while William I. Brechie, 18, a junior, is in critical condition. The driver of the vehicle was Jimmy Warren, 20, of Herrin, received minor injuries.

Will Build Indian Lodge

Students Will Build Indian Lodge

Construction of an exact replica of an Indian earth lodge on the Plains Indian earth lodge is being planned by a class of students here. The site for the lodge will be the Outdoor Education Center at the southeast side of Little Crassy Lake.

Before the earth lodge was chosen, the duplication was described as being the major attraction in a celebration of Mound Building and Indian culture.

Students Will Build Indian Lodge

 Construction of an exact replica of an Indian earth lodge on Little Crissy Lake is being planned by a class of students here. The site for the lodge will be the Outdoor Education Center at the southeast side of Little Crissy Lake.

Before the earth lodge was chosen, the duplication was described as being the major attraction in a celebration of Mound Building and Indian culture.
Yanks Pursue Viet Guerrillas Into Mekong Delta Swamps

SAIGON, South Viet Nam (AP)—American paratroopers struggled through the mud of the Mekong River delta in pursuit Monday of withdrawing Viet Cong forces, but reported only occasional contact.

Minor skirmishing was reported on other warfronts and the United States abstained from bombing North Viet Nam for the 11th day, as the Communist guerrillas slipped away.

Viet Nam to Get First Television

SAIGON, South Viet Nam (AP)—U.S. Ambassador Henry Cabot Lodge signed an agreement Monday with the government to give this embattled nation its first taste of television.

Two channels will be operated, possibly by the end of this month. One will broadcast an hour of Vietnamese programs daily. The other will provide three hours of entertainment to the U.S. armed forces, including some popular American shows.

Three thousand 23-inch television sets will be brought from the United States by the U.S. aid program and the Defense Department. U.S. post exchanges will sell 800 of them.

Officials said sets eventually would be put in community centers in villages, giving the government a new channel of communication with the people. Until permanent ground stations are built, the broadcasts will be beamed from circling aircraft.

CUBAN GOVERNMENT LEADERS—Prime Minister Fidel Castro (right), President Osvaldo Porticcu (center), and armed forces chief, Commander Raul Castro, are watching Cuban military units and weapons in a parade commemorating the 17th anniversary of the triumph of the revolution against the Batista regime. Johnston Talks With Top Aides On Viet Nam War, Steel Issue

WASHINGTON (AP) — President Johnson conferred for about an hour Monday with seven of his top advisers Monday for conferences on Viet Nam and foreign policy, economic conditions and the effects of a steel price increase by the Bethlehem Steel Corp.

He said exploding steel prices would force the government to pull a buddy out of the mud.

Johnson returned to the White House Sunday night after an extended stay at his ranch in Texas.

Back in Washington

Humphrey Returns From Asia, Calls Trip 'Rich, Rewarding'

WASHINGTON (AP)—Vice President Hubert H. Humphrey returned from a week's visit to Far Eastern countries Monday and said that while he had good assurance that the United States would withhold specific comment until after reporting to President Johnson, he was not met at Andrews Air Force Base by the diplomatic eavesdropping of the Philippines, Japan, Nationalist China and South Vietnam and by the dean of the Washington diplomatic corps, Ambassador Guillermo Savilla-Sacasa of Nicaragua.

Humphrey told newsmen, "we've had a very rich and rewarding trip," he declined to comment on any talks he may have had in furtherance of the Viet Nam peace drive of the Johnson administration.

"We came back feeling good about the areas we visited," he said and described the four nations in which he stopped as "surprising allies and good friends."

The vice president flew home for a recovery in Hawaii.

Reapportionment Ruling Requested

SPRINGFIELD (AP)—Attorney General William G. Clark has been asked to rule on whether townships in form counties should be reapportioned in line with one-man, one-vote representation.

State's Attorney Richard Richman of Jackson County, who made the request, said a study shows his county board is the most malapportioned in the state from a population standpoint.

In an example he noted, that Carbondale Township, with more than 40 percent of the county's population, has only eight votes on the 26-member board.

Richman said an opinion by Clark would give counties a standard to follow in pursuing the problem.

The present apportionment could result in an action either by a law or a court decision.

The legislature this year scrapped bills to bring about township reapportionment. The bill called for a sharp reduction in the size of county boards by providing for elections of one member in each proposed district, which would be a 15,000 population.
U.S. Diverts Orders On Price-Hiked Steel

WASHINGTON (AP) -- Secretary of Defense Robert S. McNamara Monday directed the shifting of orders for future deliveries of steel away from the Bethlehem Steel Company and other firms raising prices.

McNamara issued a statement Monday saying he had directed "all defense procurement officials, wherever possible, to shift orders for future deliveries of steel on which prices have been raised to companies which have not increased their prices."

Just as Asst. Secretary of Defense Arthur Sylvester was reading McNamara's statement to newsmen, the Inland Steel Co., was announcing a boost to 50 cents a ton to Bethlehem's $5-a-ton increase in certain "forms of structural steel." McNamara ordered that defense procurement officials "take all practicable steps to insure that defense contractors adopt the same procedure to avoid procurement of steel from companies with which have not increased their prices.

The Defense Department ordered a price hike of $100 a ton of structural shapes and piling. This amounts to 2.5 per cent of total industry output, which has been running at about $4 billion a month. Sylvester left open the possibility that current contracts may be canceled.

"We don't know until the contracts are studied," Sylvester said when asked about the effect of McNamara's order on present contracts.

Bethlehem is the chief supplier of structural steel for the Defense Department.

"The question of the Defense Department's ability to meet its steel needs has now become quite critical," McNamara said in a statement to newsmen. "The Steel Industry's decision to raise prices may hold the key to the success or failure in the Vietnam peace talks."

McNamara's order was used as evidence to discourage a price increase.

And in April 1962 McNamara took an action similar to today's to help defend an announced industry-wide steel price increase. The same administration sources had been hinting the government might refuse to purchase certain key steel products, thereby increasing the impact of McNamara's order.

Air Force Chief Cites Buildup

SAIGON, South Viet Nam (AP) -- U.S. Air Force Secretary Harold Brown, winding up a three-day trip to South Vietnam as part of his tour of American bases in South Viet Nam, Monday night described the buildup of forces against the Communists as "just the start." Without taking anything away from the Berlin airlift in 1948, the World War II lift "over the hump" to Asia or the airlift of the entire 2nd Armored Division to Germany in 1963, Brown declared:

"None of those was more impressive and perhaps this is the most impressive of all. Remember this is an evolving transport and construction, combat, fighter planes and reconnaissance."
Stuck With Boring Date?
Take Her Home Quickly

By John Epperheimer

Girls, want to succeed on that first date? Then beware of the male who professes sleepiness or the necessity to get home early to study. And be sure to talk to him, but don’t talk too much. That’s what several 311 males said about boring dates and how to cope with them. Most of them thought that girls who don’t talk at all are more boring than the talkative ones, and the guys revealed some new ways to end a boring date early.

Keith McCall, a junior from West Frankfort, advised, “Be glad they have hours; if she is too boring, buy her a Coke and take her home.”

Bill Brasel, a freshman from Norris City, said, “Take her home when she is boring. Tell her you have a previous engagement or have to work.”

Rush Davis, a freshman from Harrisburg, has another attitude, “Don’t hurt her feelings,” he advised, “swear it out.”

Darrell McKissic, a freshman from Carbondale, feels the same way, “Be nice to her,” he said, “even if you take her home early.”

One male believes in trying to make the best of a situation, but takes firm action when all else fails. “After a maximum attempt to enjoy myself, take her home early,” said Dave Waite, a sophomore from Harrisburg.

Doug Kopecky, a senior from Berwyn, may have the best answer to boring date problems, “It’s your own fault if your date is boring. Use foresight and better judgment on the next date.”

Coeds’ Woe
Monologist Sphinx as Date Needn’t Bore, Poll Shows

By Cathy Lavin

What’s more boring than spending three hours on a date discussing the six tenses of the English language? Possibly hearing all about the intricate workings of a radiator, or maybe going on a hayride with a guy who rides back with another girl.

What really is a boring evening? What does a girl do if she is with a bore, and how does she raise dates an hour or two? All coeds gave interesting replies to these questions.

“I never really had a boring time on a date until this year,” said Kathleen A. McCormick, a freshman from St. Louis. “That was only because I was with a guy so dumb I thought that all freshmen had to drink to keep up and get thoroughly drunk!”

Ninnie L. Knudsen, a sophomore from Marion, Mo., recalled the time “I went to a concert with a guy who only talked about radio and how they worked. We got lost on the way home and I tried to see how long he could talk on and on. It got to the point of being funny after an hour and a half when I had to wash my face.”

Opinions were mixed, however, about which is the worse bore—the one who talks all the time, or the one who doesn’t talk at all.

Virginia P. Randolph, a junior from Champaign, Ill., said, “Sure, the guy is boring who talks about himself all the time, but he is a challenge. You can learn from him and perhaps make more of yourself, too.”

The guy who talks about himself all the time is the worst bore. He doesn’t seem interested in you, just himself,” Theresa A. Ladd, a sophomore from Carbondale, said.

Judith A. Mosler, a sophomore from LaSalle, said, “I can’t remember being on a really boring date. I try to keep talking and find something interesting to talk about.”

“‘When you go on a date it is to find out more about each other, not just to tell what you have been doing or what your own interests are”’ Linda K. Durkee, a freshman from Chester, said.

Everyone seemed to agree that what one considers a boring time, and what to do in case of a boring date, depends on the situation. Cynthia L. Krazer, a junior from Belleville phrased it, “Simply try to make the best of the situation.”

Dateless Drudgery
Summertime Livin’ Was NOT Easy for 3 SIU Gymnasts

By John Goodrich

The problem of keeping up a social life while working eight hours a day, attending summer school and working out before bedtime was a headache for three SIU gymnasts last summer.

It all started when Paul Mayer, El Cerrito, Calif., invited teammates Rick Tucker and Fred Dennis to stay at his house for the summer.

During his freshman year last spring, Mayer wrote a letter to the physical education director of the Berkeley YMCA asking if work would be available for three boys.

They landed recreation jobs which kept them busy from 8 a.m. to 4 p.m., daily.

Immediately after work, they would run to the University of California’s gym where they worked on routines for two hours.

Then they rushed home to eat dinner and attend physics courses at Berkeley at night.

Upon returning from class, they studied for an hour or two, and, finally, exercised with weights before going to bed.

On nights that they didn’t have classes, they took ballet lessons for two hours.

“The ballet lessons are far more exhausting than one would imagine,” said Mayer. “The emphasis is entirely on the legs and our purpose for taking the lessons was lower-body strength,”

Dennis added that after every lesson they were so tired they could hardly move.

On weekends, the three gymnasts took trips to the mountains, or attended meets in Sacramento and Reno, Nev.

After nine weeks of this rigorous schedule, they thought it was time to take a break, and besides, none of them had had time for a date all summer.

A trip to Los Angeles’ Muscle Beach solved this problem, and the boys stayed there for a week, surfing, swimming and even performing in an informal beach gymnastics meet.

Mayer had one date, Tucker had two, and Dennis was the winner with three.

At the close of the summer, the boys went to a YMCA camp in the mountains for a week’s intensive workout at a gymnastics clinic.

“We had campfire dances, and it was a conditional camp, but we were so pooped after working out all day that we really didn’t feel like much night life,” Dennis said.

Before school started, Mayer and Tucker hitchhiked to Tucker’s home in Houston, Texas, and Dennis hitchhiked back to his home in Waukegan, Ill.

Tucker and Mayer competed in the Iowa Invitational Tournament, but Dennis was unable to go because he had pulled his shoulder in the Chicago meet the weekend before.

Mayer said that it will be the same story next year, but with no summer school, and a few more of the extra pleasures in life,” Whatever that means.

VOLUNTEERS SOUGHT
FOR AID PROGRAM

Terry M. Holcombe, regional director for ACCION, a private, nonprofit, nonpartisan organization which does social aid work in South America, will be on campus Jan. 10 and 11 recruiting and doing public relations work for the group.

Students interested in talking to Holcombe may make an appointment with him by contacting Sherry Muggs in the International Services Division (3-3661).
Salukis Go into 1966 on Top of Heap in Poll

Holiday Season Highlighted by SIU Upset of Wichita

By Bob Reincke

Southern's basketball team is beginning this season ranked No. 1 in one national poll and second in another after picking up three victories over the Christmas break.

The Salukis got their biggest boost in the balloting from their prestige-packed 89-68 victory over Wichita Dec. 20. The year's previously unbeaten and eighth-ranked team, undoubtedly was the biggest factor in leading Coach Lew Hartzog and the Salukis. Besides the victory over Wichita, the Salukis also picked up wins over two other Western rivals Dec. 17 and 18. After humbling Nevada 99-45, Southern followed up the next night by clobbering San Diego State 84-35.

The biggest win of all was the upset of No. 1 Arizona Ottoma in 47-42. In the first seven minutes, the Salukis dropped in 24 points while limiting the visitors to a measly one point. Boyd O'Neal led the scoring for Southern with 22 points. He was joined by three other teammates in double figures as Coach Jack Hartman credited the defense with playing a significant role in the victory. Employing a tight pressuring defense over the full court, the Salukis were able to keep the home favored Shockers off balance.

In the other holiday games, neither Western opponent was a match for Southern.

Against Nevada, the Salukis soared to a 19-0 lead before the visitors could light up the scoreboard. The Wolf Pack's 42 of 87 shots from the field in the 99-45 dornbustera Meicled scored scorsers for Southern with 19 points. He was joined by three other teammates in double figures as Coach Hartman led 11, and Lee and Smith added 12 apiece.

Nevada was ice-cold in its shooting and trailed the Salukis 41-15 at halftime. The Wolf Pack hit only 16 of 69 field goal attempts. It was much the same story the following night in Southern. Nevada raced to a 64-35 win over San Diego State. The Aztecs tried to keep the game's tempo slow and succeeded in staying close to the Salukis early in the game.

With the score knotted at 10-all, however, Southern came clamped down with its tight defense. Seventy-nine points in 17 minutes and his teammate in the backcourt, McNeil, added 11, Smith 1, the other one. Saluki in double figures in 10 points.

The victory now leaves Southern with a 6-1 record heading into the new year. The next game will be Saturday night against Washington University at St. Louis.

GEORGE WOODS

DAILY EGYPTIAN

George Wood's Sets Record
At New Orleans Track Meet

The Sugar Bowl Invitational Track Meet in New Orleans kept nine of SIU's trackmen busy away from home Christmas Eve.

George Woods, Stikeston, Mo., set a shot put record of 4 feet, 11.5 inches. Woods' previous mark was 4 feet, 6 inches.1

Oscar Moore, freshman from White Plains, N.Y., was top challenger to Kansas runner John Lawson in the 5,000 meter event, but was unable to equal Lawson's record time of 14:19.

Moen has lost to Lawson in two meets now, but track coach Lew Harrington believes that he is potentially the country's finest distance runner.

Moore holds national records in the mile and 3,000 meter, and 1-mile mile relay. The 5,000 meter relay team was also honored by an invitation to the Sugar Bowl classic. The mile mile relay team ran 3:48.5, fifth in the nation.

The mile mile relay team was also honored by an invitation to the Sugar Bowl classic.
SIU Wrestlers Place 4th in Midland Open

While some SIU athletic teams were enjoying Florida's sunny skies, 25 members of the wrestling squad competed in the Midland Open meet in chilly La Grange Dec. 27-28.

The cold climate of the north didn't bother the matmen in the least, for they placed fourth in a strong field of 27 teams, with a total of 801 individuals competing.

Iowa State, last year's NCAA champion, was second with a high total of 66 points. The Chicago Wrestling Club, with former SIU wrestler Al Kristoff competing, took second place with 59 points.

Michigan was third with 50 points, followed by SIU, with 43 points.

Coach Jim Wilkinson described his team's performance as "great, considering the fact that we were not represented in four weight divisions, and that 10 former NCAA champions were competing."

SIU wrestlers were also challenged by many outsiders who were competing unattached, and could prevent the Salukis from scoring valuable team points.

Terry Magapon placed second in the 115 weight division for SIU. Wayne Lenharares won third place in the 153 division, as did Don Snyder in the 177-pound category.

George McCready was fourth in the 160 division, Bob Roop lost to Ertind in the heavyweight division, placing fourth.

Only one man could represent a team in each weight division that he competed in.

Al Lipper was injured in his last match and probably will not compete in Saturday's meet with Miami of Ohio. Southern's 11th ranking in the wrestling News will most likely be moved up in the top 10 after the Midland meet.

Satur­day's meet will begin at 7:30 in the Arena. Miami is the defending Mid-America wrestling champ. It placed second in Midland Open.

Wilkinson's matmen will hold five practices this week in preparation for their Saturday meet, provided that they can find a place to practice in the Arena. The Arena schedule is well, perhaps place in the top 10, if they can get more experience with the tougher teams.

3 Graduate Students Will Get Space-Related Study Grants

SIU will begin participation in the National Aeronautics and Space Administration's predoc toral training program during the 1966-67 academic year.

SIU Graduate School announced that three graduate students will be selected to take part in this space-related study program. In all, 1,335 graduate students will begin work toward doctoral degrees in space-related areas under grants to be received by chosen universities throughout the country.

Each graduate student selected will receive a stipend of $2,640 for 12 months of training, with an additional allowance for dependents.

If he maintains a satisfactory record, a student may be assured of three years of predoctoral study, NASA officials said.

The predoc toral training program is one phase of the broad NASA program of participation by the nation's colleges and universities in research and development in space. Long-term benefits include helping meet the nation's future needs for highly trained scientists and engineers.

Gymnasts Chosen For World Meet

Two SIU women gymnasts will represent the United States in the world trampoline meet to be held later this year.

The pair, Judy Willis and Nancy Smith, clipped the honors by finishing first and second in the world trampoline team selection finals. The meet will be held Friday at Sarasota, Fla.

Miss Smith held a narrow half-point lead over her team­mate until the last event, when a sparkling performance netted Miss Willis first place.

The world championship meet will be held in April at Lafayette, Ind.
