CONSOLIDATION OF SCHOOLS

Illinois is being forced to consolidate its schools because of the teacher shortage, higher salaries for teachers, and the decline in rural populations.

If this occurs everyone will be affected in some way or another.

West Virginia began consolidations and reorganization in 1920 due to pressure of local tax revenues. Some of the southern states made recent advancements for other reasons.

Illinois is facing the same problem of consolidation or reorganization. If the state is going to give up their one-room schools, a large number of people will be affected. A large amount of people will be affected in the future if they don’t come up with another plan.

The state is being forced to do something about the one-room schools. Illinois is going to spend close to $100,000.

Some of the southern states have made recent advancements for other reasons.

If this is not done, there will be a problem for the state of Illinois. The problem is that the state is going to lose money if they can’t come up with another plan.

If a plan is made, it will do a lot of good for the state of Illinois. If it is not done, there will be a problem for the state of Illinois.
