Big SIU budget hike asked

SPRINGFIELD, III. (AP)—Gov. Daniel Walker proposed Monday the first budget ever to top $1 billion for the current fiscal year, which begins June 30.

Included in Walker's recommendations is a $5 million increase in SIU's budget for operations and grants. The governor recommended a $68.8 million budget for the University, compared with the fiscal 1975 appropriation of $63.8 million.

Walker's 1976 budget recommendations provide a 12 percent increase in capital appropriations, the total budget request comes to $1.27 billion, compared with $905 million for the current fiscal year, which begins June 30.

Walker said the budget would enable tuition at state colleges and universities to remain at their current levels, which he said was the second lowest in the nation.

He added that the budget would allow increases in salaries for faculty members and non-teaching employees on an average of 10 percent. The governor also said he would urge the Illinois State Scholarship Commission to continue its current emphasis on helping middle-income families under the expanded scholarship program.

"We are also increasing the maximum grant by $100 to $1,000, which will pay 60 percent of the average tuition and living costs at Illinois private colleges and universities," he said.

The Illinois Board of Higher Education had requested $143 million for capital improvements. Walker faked the amount by $42 million to include projects scheduled under his accelerated building program to create jobs.

Of this amount, $30 million is earmarked for projects at private schools. All other budget recommendations made by the education board were adopted by the governor except for a request for an $11.5 million increase in pension system contributions.

Walker recommended a $6.5 million increase, saying this move was consistent with his policy of providing only enough money to cover pension fund expenditures.

The governor also said he supported a board's request for a supplemental appropriation of $7.2 million for the current fiscal year to cover unexpec tedly high fuel costs.

Fischer bows out of mayoral race

By Bruce Harkel
Daily Egyptian Staff Writer

City councilman Hans Fischer announced during Monday night's city council meeting that he will not run for mayor despite his Feb. 25 primary nomination.

City Clerk Elizabeth Leighty said Fischer's withdrawal automatical makes Irene Altschuler, whom Fischer beat out in the primary, Mayor Neal Eckert's only opponent in the April 15 general election.

Citing a number of reasons for his decision, Fischer said he mainly wants to devote more time to his children and "my being too involved in civic affairs has kept me from that in the past."

Fischer defeated Altschuler in the primary by receiving 560 write-in votes. Altschuler received 530 votes. Fischer ran for mayor in 1971, when he lost to Eckert by 82 votes.

In a statement released to the press, Fischer said, "I trust my friends and supporters will judge me too harshly for reaching this decision. I can assure them that it was not an easy one to make."

Contacted at her home, Altschuler expressed surprise and pleasure. She said she was unaware of Fischer's decision.

---

House committee could affect fee hike

SIU will need legislative approval to raise student fees if a bill scheduled to reach the House Committee on Higher Education and Finance is passed by the General Assembly.

The bill, sponsored by Rep. John Hirschfeld, R-Champaign, would directly affect a proposed $12.25 increase in student fees to go before the SIU Board of Trustees in March or April.

The fee increases reflect proposed hikes of $5 for athletics, $5 for the Student Center and $2.25 for activities.

The bill is one of four stemming from a report of the Subcommittee on Student Fees which found abuses in Illinois universities' mandatory fee policies.

The subcommittee, chaired by Hirschfeld, studied the breakdown of student fees at 12 Illinois public universities. The subcommittee heard testimonies from administrators and students before making a report in December.

A fee bill would require the state to fully fund the health facilities of the University, including staffing, overhead and equipment.

"Hirschfeld said, "I see no reason why this bill won't be passed by the legislature." He conceded that a good chance exists that Gov. Daniel Walker might veto the measure.

In fiscal 1974-75, SIU students paid an estimated $1,206.125 to fund the Health Service. "It's a drop in the bucket," Hirschfeld said. "The state has more than enough to cover the costs. The trouble is that Illinois is spending more money on higher education than on education." The third bill in the package would demand that no student fees be used to retire bonds sold to fund construction of future buildings. "This bill is the most controversial and is in for tough sledding," Hirschfeld said.

He said university administrators are opposed to the measure, SIU President Warren W. Brandt said Monday he knew nothing about the Hirschfeld bills.

The subcommittee found that although abuses exist in the mandatory fee policy, the fees "are a vital and a necessary element at our public universities."

The subcommittee report said the subcommittee "goes on record supporting the concept of student control in campus decision-making processes that affect the use of student fee monies." In appraising the situation at SIUC, a report said, "Students have been quite active at SIU, Carbondale, and have exerted influence in many areas. But students have not been able to establish a consistent structure of student-dominated control over their various fees... Administrators have been involved in the activity fee allocation and this has hurt student power. Decisions affecting athletics and the recreation fund have also been controlled by the administration."
Synergy expands number of services

Synergy, founded in 1970 as a drug counseling center, has grown from a students-only service to a full-fledged counseling center which has expanded since 1970 from dealing exclusively with students' drug-related problems to include handling life-related problems. This first story describes Synergy's programs. The second part will explain the center's counseling techniques.

By Mary White

Daily Egyptian Staff Writer

Synergy, in 1970 as a drug counseling center, has grown to more than 50 members, 20 of whom are paid staff. The center now also receives more than $200,000 per year in revenues from the University. Staff members say that Synergy is different from most counseling centers, not just in that it works with more students, but also in that it offers more services to meet the needs of more students, both drug related and non-drug related. Synergy now offers a variety of services to individuals, couples, and groups. It is also working to expand the number of services, not all drug related.

Staff members Alie Shanas and Scott Vierky said Synergy offers a variety of services, including a crisis intervention, a medical emergency, a crisis intervention center for drug-related and life-related crises, and a drug counseling center.

Growth groups. each having about eight people. Growth groups are open to anyone in the community, including those who are not drug related. Synergy has compiled a program of growth groups that are part of the community for use at Synergy.

Pharmaceutical and street drug identification and information is available through the Physician's Desk Reference. Anyone wanting information about a drug is free to look it up in the encyclopedia.

Growth groups are open to anyone in the community, drug related and drug unrelated. Shanas said that the facilitators in the growth groups are part of the groups, and grow with the groups.

Synergy is presently conducting three groups, one during each semester, with eight members. Although these groups are new, they have been going on for years at various times, usually at the beginning of the semester. Growth groups meet regularly.

Rich Tracy (left), an SIU student volunteer worker, and Synergy staff members Ron Shanas and Susan Barnes discuss future plans for Synergy in the informal setting of the center's lounge. The center recently revamped its program and now offers assistance in more than 10 areas. (Photo by Chock Fishman)

Just passin' time...

synergy is part of SIU health services' prevention program. Shanas said that Synergy services are available to all members of the community. The center is open from 7:30 a.m. to 9:30 p.m. and is open on weekends. Shanas said that the center is open on weekends.

Shanas said that Synergy is part of the SIU Health Service's prevention program.

The security office operation presently has 57 employees, Trummer said. There is voluntary retirement for police, four captains, five lieutenants, eight sergeants, 37 police officers and three secretaries. Early retirement programs for police will help reduce the number of employees. Mike Norrington, working full time with students and the community to improve police-community relations. The study was conducted from June 16 to 21, 1974. The biggest problem has been employing personnel in appropriate jobs. Trummer said the personnel director has been reorganized to accommodate the new personnel requirements. "I think a lot of the shifts are 'getting short,'" Trummer said.

Because of the shortage of officers on some of the shifts, there has been a shortage of sergeants to assume routine patrol duties. To alleviate the problem, officers have been concentrated on the shifts where they are needed, such as the late night shift, he said.

Instead of having sergeants patrolling the campus, they are being used in a training and advisory capacity.

"My philosophy is participative—have those who have the most interest in the job," Trummer commented, but some of the positions are relatively short time commitments. The position description has been altered so that the "get it done" philosophy is more prevalent.

One of the problems stressed in the Holloman report, which cost $1,500, concerned an over abundance of security personnel. This problem is being alleviated through attrition, Trummer said. The position established the fewest positions for the "full" capability of employees. That, Trummer commented. Missing employees on some shifts, this is the philosophy that has meant that officers have been given new or additional duties.

Defenders of the campus have been at the disposal of the police for the past 15 years. This year, according to Trummer, the force reached a maximum of 82 employees.

Patronage

Jackson County government faces a severe test if the backsliding trend of hiring and firing on a patronage basis is continued. The problem lies in trying to find the happy medium of satisfying the needs of political workers wanting patronage jobs and satisfying the general public's need for effective government.

Patronage is a fact of political life in most Southern Illinois counties and this county certainly is no exception. Most jobs on the county payroll, with the exception of the sheriff's deputies, are either elected or politically appointed as a reward for political support, usually on the state and federal levels.

In the cozy-turvy politics of Jackson County, Republicans have long enjoyed control of the County Board of Supervisors which controls the hiring of all county personnel by allocating the job slots and exercising final approval on all applicants. With this control, Republicans were forced to look elsewhere for political jobs, usually on the state and federal levels.

Last April, however, the Democrats gained a majority on the board for the first time in 12 years. This victory was followed by a sweep of county offices in the general election last November. The Democrats finally gained the chance to hire workers from their ranks at the county level.

The basic stipulation for employment at this level is a record of party service. In most cases this is enough. The job given is not complicated and does not require extensive on-the-job training. But, in the recent trend of firings, the county board has given little consideration to qualifications or to past records of service.

When the county board voted along party lines not to rehire Lowell Holler, Republican supervisor of assessments, they not only sacrificed his four year's experience of the job as assessor by requiring a new person for the job but also the experience gained by the four people working in the supervisors office. Holler said the staff of his office will also be replaced by the incoming supervisor. Hundreds of man-hours will be lost to a new staff determines the working of the office in charge of coordinating all property tax assessments in the county.

The county board does have the right to hire and fire as it chooses but it must stop the trend of dismissing professional employees simply because of a disagreement on politics. As was pointed out in the board meeting in which the firing took place, the county cannot afford competent employees not only from outright firing, as in the case of Holler, but in the flight of trained workers to more stable positions outside government.

This county should either make the merit system used in hiring deputies apply to all county executives or face the possibility of this modern urban county faltering on the archaic 'to the victor belong the spoils' system. The taxpayers deserve a government with a minimum of inefficiency caused by the changes of political fortune.

Divorce law and ERA: The pay'n will hurt less

By Jerie Jayne

True or false? Equality for women will strip away alimony and child custody rights. In light of court precedent, constitutional equality for women will not leave them unable to claim these rights. It is true that the Equal Rights Amendment (ERA) will make it unconstitutional to award alimony solely on the basis of sex, but in Illinois the law already provides that either the husband or wife may be granted alimony.

In all divorce cases, other factors are involved besides gender. Financial contributions or equivalent contributions in homemaking services to the marriage partnership are taken into consideration. A woman can still claim alimony based on her age, lack of education or training, length of the marriage and her need for support.

In 1973, a Mississippi court noted that a woman who was a housewife for 24 years without business or professional skills was entitled to alimony.

The court said that where the wife has contributed to the accumulation of the property of her husband, by doing her part as a housewife, she is entitled to alimony.

The court required only that she did her part as a housewife to collect. It doesn't seem likely the courts would have ruled any differently if the woman had been considered constitutionally equal because her financial status would have remained the same.

"Equality of rights under the law" seems to be the most misunderstood and controversial phrase of the ERA. Equal rights won't make it mandatory for a woman to stop being a housewife, but would allow her to do such things as own property and enter into contracts without her husband's consent.

In recent years courts have shown a preference to non-working divorced mothers in child custody decisions. In 1979, an Iowa court gave custody to a woman who was "ready to settle down and rear a family" and disallowed custody to another woman who wished to work for reasons other than financial need and who wanted to be "out and around." Undoubtedly this is fair to the woman who never has wanted to work outside the home. The ERA won't change this attitude of favoring women who don't want to work. But what about the woman who wants to work? Is she to be penalized as a neglecting mother because she wants more responsibilities than just child-rearing? Perhaps the ERA can help her.

An Arkansas court in 1971 favored giving the father custody of the child because his wife by remarriage did not work and would not have to place the child in a day care school as the divorced working mother would.

A Missouri court gave a similar dim view to a divorced working mother in 1979. The mother won custody of her child only by promising to give up her job to provide, "a proper upbringing" for the child. Clearly, the courts have favored the traditional woman's role as child caretaker first and foremost. Most of us will be mothers, just as most men will be fathers. The ERA will allow, not demand, that women have the right to be other things besides being mothers, just as fathers carry other responsibilities outside the home.

Perhaps the passage of the ERA will stop some rulings against women who are being denied support. In 1979, a New York state court denied a woman alimony because of "loathsome misconduct." Her misconduct was wanting to start her own business and approaching her husband's friends for business loans. And by failing to be a proper housewife by declining to cook and entertain her husband's clients, she was granted support on a welfare level.

She wasn't constitutionally free to be anything but a proper housewife. Women who don't want to work outside the home have nothing to fear from the ERA's passage. Women who want to be something more than housewives and mothers will be denied that right until their "equality of rights under the law" is recognized.
PENDING TAX CUT COULD HURT MORE THAN HELP

By Edmund Pinto
Associated Press Writer
WASHINGTON (AP) — Unless Congress takes steps to prevent it, the tax cut bill as passed by the House could amount to a tax cheat for millions of American tax payers.

The House-passed bill reduced withholding in 1975 for all taxpayers and gave a tax cut to low and middle-income taxpayers who use the standard deduction.

But for 14.2 million taxpayers with incomes of $7,000 to $20,000 who are expected to itemize, there is no tax cut, only less money withheld from paychecks.

While the immediate effect will be more money to spend now, when it comes time to compute 1975 income taxes the result could mean a smaller return or no return.

This would be especially true for married couples where both husband and wife work, because their taxes are apportioned at lower individual rates but their combined incomes often put them in a higher tax bracket.

News Analysis

"Middle-income taxpayers who itemize shouldn't be deceived by this bill. The intent of lower withholding money into the economy is to make life easier for the people who file standard deductions," said a staff member of a committee that helped write the bill.

For some taxpayers who itemize, the lower withholding could mean a tax deficiency, said the staff member.

The standard deduction is a percentage amount taxpayers are permitted to subtract from their income. In the new tax reform bill it is increased from 15 per cent to 16 per cent of adjusted gross income with a maximum of $2,500 for single persons and $3,000 for joint returns. The present maximum is $2,000 for both single and joint returns.

The report of the House Ways and Means Committee on the bill warns of the lax deficiency possibility.

A staff economist of the Joint Economic Committee said the Senate will consider the problem when it takes up the tax bill. He said there is some talk in the Senate of a tax reduction for itemizers who did not get a tax cut when the House passed.

It could be accomplished by any of several bills already introduced. Some would permit optional tax credit at the place of the $250 personal exemption.

Environmental Science

To the Daily Egyptian:

Three years ago I became an Environmental science major because I was informed that the Board of Trustees were soon to adopt a new Environmental Science curriculum. I began to study the proposed curriculum for this major because it seemed to me the most relevant educational opportunity available.

No action has yet been taken and no action is anticipated in the near future by the Trustees.

This forces me and several others in the same situation to petition for a special major in environmental sciences and studies. I can't understand why the university presently has not set up a major in this field of concentration. The world needs people who understand the problems we face and can offer solutions to these problems. I believe the university is neglecting an area of much practical relevance in today's world.

Letters

When glancing through the catalog of classes, one sees majors offered in areas of minimal importance in the practical sense, yet we don't have an environmental science curriculum. I believe it is important that immediate action be taken and the proposed environmental science curriculum be adopted.

Student Senate is powerless

To the Daily Egyptian:

A person doesn't need to be a political science major to know why students are apathetic to student government. The Student Senate is powerless; and has always been a training ground for middle class administrators. This was never as newsworthy. The fact that Mayor Eckert nor counselor Fischer seem to be able to sustain a coherent political and economic thought for more than a minute at a time while there has shown that she possesses an intellectual depth, keen awareness of the local problems and issues and an ability to present views to proposed solutions in a well articulated, reasonable, and interesting way was more than a cynical, non-romantic, and unfair editorial and reporting staff could cope with.

Milton Altschuler

Claims press was unfair

To the Daily Egyptian:

The Southern Illinoisan and the Daily Egyptian have displayed a calculating and willful management of the news that they see fit to present to the public. Aside from the creation of non-interesting and the ballyhooing for a non-candidate, these examples of monopoly press control have ignored the public appearances and talks given by the first woman candidate for the office of mayor in the history of Carbondale. This was not seen as newsworthy. The fact that Mayor Eckert nor counselor Fischer

Deadline nears for model U.N. sign-up

The deadline to become a delegate to the Model U.N. has been extended until Friday.

Appointment to register is no longer necessary

Students wishing to register for summer or fall semester no longer need an appointment. Henry Andrews, assistant director for registration, said Monday that the appointment system was eliminated because of a lack of staff to staff the registration office in the center building on Monday.

Andrews said the need for an appointment was eliminated because of the need for a.n administrative space in the registration center no longer exists.

He said registration by appointment ended Monday morning. "We went to requiring an appointment," Andrews said.

Plans to be made for local 'Food-Day'

Plans for a local observance of "Food Day 1979" will be made at 5 p.m. Sunday at the student center.

Following a potluck dinner, a committee will be formed to plan the day's events. Hugh Muddon, coordinator of the Carbondale Peace Center, said the center will assist in planning the observance.

"Food Day 1979," which will be held on April 17, is being coordinated nationally by the center for Science in the Public Interest.

British graduate student sets art exhibition at Allyn Gallery

An exhibition of paintings by graduate students will be shown at the Allyn Gallery through Friday. Baggaley terms the paintings "an Englishman's response to landscape."

Baggaley, who is working on a master's degree in higher education with an art concentration, said the work is on display for three weeks.

Department of Design slates revised curriculum next fall

By Cathy Tukarski

Student Writer

The Department of Design will start a new fall semester around a core curriculum, five specific design areas and a requirement that courses be taken in sequence.

The curriculum bears "almost no resemblance" to the old program, said John Lonergan, department chairman. The previous program had been criticized for lack of structure and emphasis on student specialization.

The core curriculum is "the basic strength of the program," explained Lonergan. "The courses have been set up as the main thrust of the general field of design. The central core will facilitate both the theoretical approach of systems development to accompany project courses."

Certain general studies requirements have also been selected for the new program. These courses will "prepare the potential designer to acquire pertinent knowledge, and also help him decide on a direction for the junior level," Lonergan said.

At the junior level, design students will have the opportunity to choose from graphical, computerized design, industrial design, interior design, urban and regional planning and consumer analysis. Juniors will continue to select courses from the core curriculum, he said.

"The new curriculum is geared to "educate design students in the best possible way," said Lonergan.

Beg your pardon

The Daily Egyptian published a headline in Saturday's paper which incorrectly reported, "High schools to offer new courses." High schools are not offering the new courses described in the article. The Environmental Workshop at SIU's Touch Nature Environmental Center is offering the courses to high school students. The author apologizes for any confusion this may have caused.

Resource center granted $3,000

A $3,000 grant has been awarded to the proposed Study Resource center by the Office of the Superintendent of Public Instruction, according to Carol Blessing of Specialized Student Services.

The study center will be adapted for the needs of the visually impaired students.

Blessing said suggestions for the fund’s use include a cassette duplicator, a machine which transforms writing into larger type, a “talking textbook” of Audio Visual programs, and adapted text books allowing visually impaired students to find material for themselves.

Model United Nations

Here's your last chance to join the Model U.N. Family

We are making an offer you can't refuse

The deadline date to represent a country for Model U.N. has been extended to March 7!!! There are 70 countries yet to be represented.

So get going to the Student Activities Office, 3rd floor of the Student Center and pick up an application for a delegation or call Student Activities at 453-5714 and ask for Toby Peters, Bob Saieg, Bill Fornadel or Mike Raczyński.

Some 14.8 per cent of the freshman class and 30.5 per cent of the senior class used the pass-fail grading system during summer 1972, according to the Office of Institutional Research and Study. The O.E. incorrectly reported the percentages as 6.4 and 13.2, respectively, in Friday's edition.

Arthur Stinchcombe, University of California at Berkeley professor, will speak at 8 p.m. Wednesday in the Student Center Mississippi River Room. The public lecture, sponsored by the Sociology Club and partially funded by the President's Academic Excellence Fund, will be on "A Structuralist Approach to Major Social Boundaries: Race, Sex, Citizenship and Age in Comparative Sociology."

Spring semester proficiency exams for the Foreign Language and Literature department are scheduled for 10 a.m. Saturday for all students enrolled in the department. Application forms, available in Faner 2160, must be completed by Wednesday.

Nancy Quisenberry, elementary education assistant professor, will attend the first meeting of the Region V Office of Child Development Task Force on Head Start Supplemental Training-Child Development Associate (HSST-CDA) program, March 5-6 in Chicago. Quisenberry was just named to the program and is the project director for the HSST-CDA grant at SIU.

Two SIU plant and soil science faculty members received a joint research grant for studies of non-conventional tillage systems in growing soybeans. Chairman of the Illinois Soybean Program Operating Board, Allan Aves, presented the $2,500 check to Donald J. Stucky, assistant professor, and George Kapusta, supervisor of plant and soil science research units.

When a new calculator is introduced—you can see it here...first.

No training for delivery. Your University Calculator Center has the largest inventory of quality units available anywhere. Plus, we specialize in the calculator requirements of the college student.

HP-21. This new scientific calculator weighs a mere 6 ounces and fits effortlessly into your shirt pocket. Though smaller than most, it solves a remarkable range of problems. All the basic arithmetic and scientific functions—adding, subtracting, multiplying, dividing, and trigonometric calculations. Choose degree or radian mode. Polar/rectangular coordinate conversion. A separate addressable memory with full register arithmetic. Automatic decimal point positioning capability with selective round-off. It even spells E-111-01 when you've asked it to do the impossible! Includes instruction manual and deluxe padded carrying case. And, of course, Hewlett-Packard's uncompromising quality $125.00.
Black studies specialist will speak Thursday

A specialist in Black American Studies will speak on "The Moral Legacy of the Founding Fathers." 8 p.m. Thursday in Davis Auditorium.

John H. Franklin is professor and former chairman of history at the University of Chicago. The SIU Department of History will sponsor his talk. Following the speech, Omega Psi Phi black social fraternity will sponsor a reception for Franklin in the Wham faculty lounge.

Spring Festival committee plans April circus for SIU

The theme for this year's spring festival will probably be "The Circus," according to Dave Epstein, committee chairman.

Plants are being discussed for a professional circus to be held in the Arena. Various other circus-related activities will be part of the festival.

Presidential panel gets plan for new learning skills lab

By Lee Chudlik

A proposal by the Developmental Skills Program to establish a Comprehensive Learning Skills Laboratory has been submitted to the SIU Board of Trustees. An executive committee, said Jessie Hauger, director of Developmental Skills.

The lab would offer all SIU freshmen and sophomores an opportunity to improve their study, vocabulary, reading and writing skills, Hauger said.

The lab would be staffed by graduate students who have backgrounds necessary to assist students in these areas. Graduate students would be used to provide those interested in teaching on the secondary and junior college level with student training experience and also to save money by not having full-time people, Hauger said.

Faculty members could also utilize the lab by referring their students, and by making use of materials provided in innovative teaching methods and counseling, Hauger said.

Tutoring also would be provided for a select group of freshmen and sophomores in various academic areas.

The skills lab has been proposed because many students have identified a need for it, Hauger said.

"What we're doing here in Developmental Skills is what many students have asked us to do," Hauger said.

A study done by the Testing Center showed that of 2,090 1972 freshmen, 30 per cent had ACT composite scores under 20; 7, the same score.

"Walk-ons and students referred to us from other academic units are presently being turned away, or, at the very least, are given limited tutorial assistance in their courses. With the expansion of these services, it's hoped that an estimated additional 400 to 500 students will be helped," according to the Developmental Skills office.

The yearly budget for the lab would be approximately $10,000, Hauger said.

"If the response to the proposal is yes, it says the university is concerned with the academic status of its students. If they don't fund us to establish the lab, I wonder," Hauger said.

It is hoped that the proposal will be brought to the board of trustees to get approval so the lab can be set up for summer conditional and other freshmen and sophomore students who are in need of services that year, according to the Developmental Skills office.

The head of the SIU Counseling Center has been chosen to co-ordinate a new campus-wide network of information systems designed to "streamline overall management of the University." President Warren W. Brandt made the announcement after consultations with the coordinator of management information systems, a half-time position that is subject to approval by the Board of Trustees. Mr. Miller will report directly to Brandt.

SII police arrest man for disorderly conduct

SIU Security Police arrested a 34-year-old Carbondale man at 11:15 p.m. Friday on disorderly conduct charges after he allegedly refused to leave a student's apartment.

The police report said Victor B. Moore knocked on Clarissa A. Dungan's door at 11:15 a.m. of the Pyramids and asked during a visit to her apartment if the woman was "hooded." The report said Moore had no hood.

The report said Dungan complied but when Moore did not leave after

Survey to determine international interests

A survey to determine the "interests and capabilities of faculty, staff and graduate students at SIU" is being conducted by the Office of International Education. Gene Newshower, assistant professor in charge of the survey said:

"A questionnaire asks respondents for personal data such as educational background, language capabilities and special interests in foreign countries. Newshower said 3,600 questionnaires were mailed last week to selected members of the SIU community."

Newshower said in the past, it has been necessary to know SIU's international capabilities so the University may provide a definite program of international activities and projects.

-- From time to time this office is asked for requests for proposals by the Office of International Education. Newshower said, "Unless we know what talents we have on campus, there's a long delay before we can take any action.

SIU will send three faculty members and 20 students to Haiti this summer, said Newshower. The students can get extra work hours during break

Students with on-campus jobs may work up to eight hours a day during the March 23-31 semester break. William R. French, coordinator of on-campus employment at SIU, reported Friday he has received many calls from interested students.

"Civil Service Merit Program requirements state that students can receive extra hours during this time," French said.

"The individual departments at SIU have specific budgets that must be met and therefore they will decide the total hours the student will receive."

Statistics department at the Student Work Office show that $4 million in student wages are paid out at SIU annually. Only a small portion of this amount comes from state funds. The rest, approximately $3 million, is received from research grants and private gifts from the local business community.

The remaining $200,000 is accumulated in the SIU Student Loan Fund. Federal funds have been cut over the years, because the government has increased its contributions to participant funds, said French.

"Junior college students have shown an increase in work programs, substantially," he added.

Motorcycle hit by car, student suffers injuries

An SIU student suffered minor injuries about 1 p.m. Friday when the motorcycle he was riding was hit by a car in front of the Student Center. George Cenczek, a junior in engineering technology, was treated for bruises and abrasions at the SIU Health Service and released.

Police report Cenczek was northbound on Lincoln Drive when a Volkswagon driven by David Park of a sophomore in journalism, pulled out of a parking space and hit the motorcycle.

No tickets were issued. Damage to the car was estimated at $300. Damage to the motorcycle was estimated at $100.

Elite gymnasts win two more

By Martha Sarfard
Dailv Egyptian Sports Writer

The SIU elite class women gymnasts were
weekend in winning their 20th and
record-breaking victory over a
three-year period. Friday the
Salukis downed the Lewisville Gym
Club by a close score of 109.30-
108.85. Saturday, however, did not
as well individually, but
managed only a respectable 105.15.
Missouri State, 107.50-102.00.
Friday the Salukis knew they
would be up against some tough
competition. The Lewisville club is
comprised of many younger girls
who are always stiffer competition
than some college women. SIU
placed first in only two of the four
events, while the Jesseville's Donna
Payton took first in the other two.
Payton also placed first all around,
followed by SIU's Sandy Gross with a
score of 36.25 and Stephanie
Stromer with a 35.35.
In individual events, Denise
Didier of SIU tied for first in
vaulting, Payton, both with a
score of 9.2. Stromer placed second
with a 9.1, and Cindy Ludwig of
Lewisville took third.
Payton then took first in bars with a
score of 9.5, followed by Beth
Shephard of SIU with 9.5 and Didier
and Ludwig tied for third.
Payton also placed first on beam.
again with a 9.6, and tied on floor and
took second and third with scores of
9.2 and 9.5, respectively.

Christian 235 (1) vs Aurora Central
Catholic 20-7 115).

At the end of three events, the
score was 109.15 in the meet came
to a turning point in the beam round
and was scratched from the final
event. Ludwig had placed third
in the first two events and, if
her performance had been
continued, SIU may not have won the

Thursday's meet went well with SIU placing
first in all four events. But individual
problems plagued the Salukos from the
start. In the first event, vaulting,
Sheppard re-injured an ankle and was
out for the rest of the meet. In
that event, Stromer and Gross tied
for first with a 9.1, followed by
Didier and Sheppard.
On bars, Didier and Gross tied for
first with 9.0, followed by Pat
Hillman and Stromer.
The Salukos then had problems on
the beam with Gross and Stromer
racing for first with a 9.1, but
Gross took second and third
in the event, Stromer missed
the beam, hurrying their scores.
Both women had completed the
stunts successfully the night before.
In the final event, floor exercise,
Stromer took first with the highest
score of the evening, a 9.2. Didier
took with SWMO's Cheryl Diamond
second and Harston took third.
The women now will have a
weekend break until the March 16
Central AA meet to be held in
Chicago.

Stromer's second and third
situation in the state gymnastics
tournament, but will hold this weekend at NHS. The
SIU teams finished fourth overall in the
12-school competition.

Wiesen only wrestler into nationals

By Dave Wiesneg
Daily Egyptian Sports Writer

Expectations were high, but the only Saluki that will be going to the NCAA wrestling championships on March 13 at Princeton, besides coach Lonn Lang, will be Mark Wiesen, SIU 167-pounder.

Early last week, Long had visions of five of his wrestlers possibly making it to the NCAA finals by securing a spot at the Eastern Regional Qualifying rounds last Friday and Saturday in St. Louis.

As it turned out, Wiesen was the only qualifier, and Long was disappointed, to say the least.

"Overall, when you stop and look at it," Long said, "the team did a really good job throughout the season. Mark (Wiesen) and Dennis (Lewis) were a couple of the tournament.".

"The others have to be able to do what those two did," he said. "Just went out and competed and wrestled. That's what you have to do if you're going to be successful. A wrestler has to get the edge and keep pushing himself.".

Lang also singled out Lewis because his performance came close to earning him a spot in the finals. Lewis' record of 8-12-3, going into the tournament was "not impressive," said his coach, but Lewis went out and defeated one seeded wrestler and beat another man who earlier beat a seeded man.

"What I'm really good at," Lewis said. "Wiesen last year, the junior from East St. Louis, won the 177-pound title, and this year he competed at 181 and finished third. It was a tough route for Wiesen, wrestling five matches in two days, which included two wins on Friday, and then a semifinal loss to Jim LeBether of Illinois State, and then two more wins in the consolation round Saturday, earning him the trip to Princeton.

Wiesen was seeded third in the tournament at 167.

"Mark did a heckuva job," Long praised. "You have to take into consideration the circumstances that Mark had to wrestle under. He had wrestled into the semifinals, and that was very important to win the championship, but lost it on Saturday and dropped into the consolation round.".

Long continued. "Wiesen had to wrestle two matches after his loss on Saturday, and it's always difficult pointing you lose. He had gotten his mind set all on going to the finals and then lost. 'Some guys' minds would be all wound up after getting their fingers stepped on like that," he said. "But Wiesen passed that through his mind and didn't let it bother him.".

To take third place, Wiesen beat Jimmy Londro, Slippery Rock Pa., 65-2 and Gene McNaught of Cleveland State, 6-3.

Long also praised Lewis for his comeback efforts. Lewis won his first match against Pat Simpson of Middle Tennessee, but then lost to the eventual champion from Penn State, John Fritz. Lewis snapped back, however, in his next two matches in the consolation round, before losing to Chris Laughlin of Indiana State. Lewis collected fifth place honors.

The wrestling season would normally be over for the Salukis, however, Wiesen asked Long if the whole team would practice this week to help him prepare for the nationals.

"I asked him who he wanted to practice with because there are some things that we have to straighten out of he's going to do anything in the finals," Long said. "He would need some guys to help him work on his technique and sparring partners and so forth.".

Wome n cagers second in state

By Martha Sanford
Daily Egyptian Sports Writer

Usually finishing second place in a season tournament means the end of the season, but second place in the Ohio Valley Conference women's basketball team means an opportunity to send two teams to the regional tournament this week at Illinois State.

The Salukis finished second last weekend in the OVC tournament after being defeated in the championship game by Southern Illinois at ISSU, 67-47. Until the second half of the last game however, the Salukis were looking like a pretty exciting weekend.

The tournament action was off to a good start Thursday afternoon as the Salukis defeated SIU-Edwardsville, 97-37.

"The game was pretty much as I planned," said Head Coach Charlotte West. "We had a formidable lead that we played most of our substiutes and saved our first string for the second game.

The second game, against Northeastern, the Salukis held only a seven-point lead at the half, but went on to finish the game with a 64-44 win.

Friday's action got under way with SIU pitted against the U of I in the semi-finals, which went into overtime.

Salukis smoke Jays in 53-47 finale

By Ron Sutton
Daily Egyptian Sports Editor

Now comes that discomforting wait-'n-see period.

At least the Salukis have the comfort of knowing the wait may be worthwhile.

The NIH-hopeful Dogs held on in a physical brow-beating battle with 13th-ranked Creighton Monday night at the SIU Arena to scrape out a 53-47 win and a final 1-8 record.

The visiting Bluejays, pretty much assured of an NCAA bid themselves, didn't play like anything was at stake. Perhaps the only thing that kept the Omaha, Neb.-based squad from flying home victorious was a brilliant controlling of the boards by SIU center Joe C. Merwireather.

Merwireather, managing just 16 points against a sagging defense, dominated under the basket throughout in gaining 21 rebounds, his season high. Meanwhile, the rest of the Salukis chipped in to give the hosts a 44-28 rebounding advantage, which was the lone visible difference between the two teams.

"You have to appreciate a rebound effort like Joe's," Lambert remarked. "Crehought kept him away from the boards, but he still came up with the rebounds."

Is an NIT bid assured?"

"If the NCAA committee is looking at records and how teams play, they have to consider this team," Saluki coach Paul Lambert said, changing the subject slightly. "To win 18 games with this schedule and 12 games at home is a good record.

"I was really pleased tonight," he added. "We did a super job of adjusting. That was the ballgame right there."

The Salukis, in noting both their offensive and defensive scoring lows of the year, seemed confident that any kind of win meant a tournament bid. Unable to pull away because of lack of an outside shooting threat, the Dogs finally settled into a stall over the final four minutes to ice the win.

The Salukis, in winning their 18th straight home game while ending Creighton's 14-game win skid, scored their last field goal with 5:51 left. Mike Glenn's 17-foot jumper at that point gave the hosts a 47-43 lead, and Creighton could never get closer.

After the Bluejays' guard Tom Anderson missed a jumper, Merwireather came back with two for SIU, and it was 49-43. Creighton coach Doug Brookins came right back with a 25-foot fadeaway from the right corner; but SIU stalled down to the 1:46 mark, where Cory Abrams canned a free throw.

Eventually, Tom Rici added another jumper, and Merwireather added two more, before Brookins wrapped up the scoring with a final bucket underneath.

The Salukis had a chance to take firm control of the game in the first half, but they let an 11-point lead dissipate into six at the half.

Merwireather, Glenn and Abrams led the brunt of an offensive attack that died in the final two minutes after the Saluki center retired to the bench with two personals. It was the third time Lambert had made the move this season as a precaution against losing him in the second half, and in none of the cases were the remaining Salukis able to maintain the size of their lead.

Still, the Salukis led 29-23 at the intermission after frittering away four points off the lead in the final minute. Creighton battled into an early 8-4 lead, but it didn't last. Abrams staffed in a rebound bucket, then Merwireather tallied five straight points, and SIU led, 11-8.

The lead steadily crept to its peak at 36-15 with 5:22 remaining in the stanza, thanks largely to the shooting of the key trio as the board stocked up an 18-2 and reserve Mel Hughlett. At the half, Merwireather had grabbed 12 rebounds, and Hughlett contributed four long ones, with a blocked shot.

Brooks keyed the Bluejays' attack with four markers, but he picked up foul number 3 at the 5:52 mark and went to the bench. Actually, that was when the Bluejays began coming back, which seemed to have no connection.

The Saluki trio was either matching or ahead of Brookins in scoring, though Glenn had 16, Abrams nine and Merwireather eight before intermission, leaving just two others for Rici.

In the end, Merwireather and Glenn soldiered for 18 points apiece—although taking different trails. Merwireather hit just four of nine fielders, but added eight of 11 free throws through the physical effort while Glenn sank eight of 11 field goals.

Abrams chipped in with 12 for SIU while Brooks led the visitors with 14 and Anderson added 11.

Guard Perry 'Hines missed most of the contest with lingering injuries from Saturday night's game, and senior Ricky Boyceyon, in his final home appearance, saw as much action as he had in any game this season.

"Jerry just couldn't play tonight," Lambert said. "The injury is bad—he pulled a muscle in his right calf. He should be all right in a week or so."

It didn't seem to faise the 8,045 patrons, though, as long as SIU held on its lead.

"Great, great—they were really ready for this game," Lambert said of the fans adding wryly. "The only bad thing is I think we have a couple of games they really want to get up for—just like the players."

Luckily, this was an 'on' night for both the fans and players, and, as a result, Creighton is now 2-9, and SIU may have a chance to shoot for 20 wins themselves.

Totals

CREIGHTON [47Smith] 2-3: Heave 1-0 2: Brookins 7 7 16: Bulter 4-1-9: Anderson 3-5 8: Scrutches 0 0-0: Groves 1-0 2. Apek 2-0 4.

SUI 22-24-47

Salukis trump Aces while fans saw logs

By Ron Sutton
Daily Egyptian Sports Editor

For those persons who slept through Saturday night's Evansville-SIU basketball game, here's what happened.

Actually, wasn't that bad, but the's already mounted the cheerers as the Salukis sanueted to an easy 81-67 win over mismatched Evansville.

The hosts had the 6,166 fans up 'n roaring for the first seven-and-a-half minutes as they exploded into a 15-2 lead over the befuddled Purple Aces, but after that, it had to come up with an encore.

"I thought the first two-thirds we played very aggressively," Saluki coach Paul Lambert remarked after the game. "They gave us up, or we gave them up, and we were going to blow out" and start playing.

"It reminds me of the commercial on TV: 'Thanks, I needed that,' he said. "I think we've been let down by players because they get scared of being blown out."

Evansville coach Arad McCutchan countered, tongue-in-cheek, with, 'Yah, it always worries me when I get ahead 18-26.'

The Salukis lost their momentum after the early minutes, and Evansville continued its flatness, almost in the same manner, with a 15-4 run in the next nine minutes, staying within 34-18 with 3:46 left in the half. Then they took charge.

They cashed in on five buckets and four free throws while Mike Glenn, hitting the only Saluki fielder, and the half was 36-32 SIU, with the crowd boising.

The second half was no contest, though, as Glenn led a 14-4 onslaught of the outset. With 14:16 left, Perry 'Hines' arching 25-footer from the left corner after a behind-the-back pass from Glenn put SIU 36-28 in front. Lambert settled his squad into a matter of playing out the string.

The victory boosted SIU to a 1-14 record, pending Monday night's regular season finale against Creighton. The Purple Aces finished their season at 13-11.

McCutchan, who has won almost 63 per cent of his games during this 25-year tenure at Evansville, was missing two starters from an 11-4 January loss to the Salukis. Jeff Feyer, the team's leading scorer, broke his ankle Feb. 1, and two-week starter Ed Shelby missed the last six games after being kicked in the thigh.

Four men scored in double figures, led by John Ed Washington and Mike Fie, with 13 apiece. Joe C. Merwireather topped all scorers with 22 for SIU, while Glenn and Hines matched 16 apiece and Tim Ricci added 10.

Totals

EVANSVILLE 67—Washington 6 1-13; Wheeler 2 0-0 4; Johnson 4-2 10; Skinner 2-1-3 3:33; Duvall 8-4 2:57; Mukivic 0-0 0-0; Helfrich 1-0 1-2; Atkins 0-0 0-0; Fie 11-1-11; Young 0 0-0 0; Eubanks 0-0 0-0 0; Glenn 0-0 0-0 0; Hines 6-6 0-0 0; Eubanks 0-0 0-0 0; Johnson 0-0 0-0 0; Fie 42-2 .
