Land purchasing for urban renewal behind schedule, says city official

By David L. Mahmassan

Daily Egyptian Staff Writer

Purchase of land for urban renewal projects behind schedule with little hope for claiming more than 139 acres by the end of the year, according to William Burns, director of the city's Urban Renewal Division.

Burns spoke Tuesday night before the Carbondale City Council and some 70 Northeastern Illinois residents during an informational meeting on urban renewal. No action was taken at the meeting.

Of an estimated 80 parcels of land to be purchased this year, Burns said only 17 have been acquired. He added, however, that he expects to have about 40 more parcels by the end of the year.

Burns cited four reasons for not being on the schedule which has been submitted to HUD (Department of Housing and Urban Development):

1. A decrease in the urban renewal staff.
2. A delay in relocation guidelines.
3. A slower rate of work than usual on land titles.
4. Reorganization in HUD.

Speaking on the delay in relocation guidelines, Burns explained that most people will not sell their land until they know how much assistance they will get in purchasing new land. He said that purchasing did not begin until July for this reason.

The guidelines for which Burns was waiting allow up to $3800 for moving expenses, up to $15,000 in addition to what a landowner has paid for his property for purchasing a new residence and up to $4,000 over four years for rent. Also, tenants who are forced to move because of property's sale in urban renewal may receive up to $6,000.

Burns said that the slower than usual rate on work on land titles is due to problems in determining who owns what land. He explained that some tracts of land in Northeast Carbondale were never subdivided, so it is difficult to tell the property boundaries of persons living on that tract.

Besides citing the four problems in delaying land purchases, Burns said that the 80 parcel estimate was an ambitious one, as it was made in order to get the greatest amount of HUD money possible. He added that the estimate probably be criticized for setting goals too high, but said he felt it was necessary for Carbondale to gain the greatest benefit from the program.

Burns suggested seeking a three-month delay in the timetable rather than attempt to finish land acquisition in haste. He said that errors in bookkeeping could appear if a rush job were attempted. If this was to happen, the city of Carbondale would be responsible for paying for any errors, Burns said.

If purchasing is done correctly, with the three month extension, the urban renewal director said Carbondale may have a better chance of receiving more Neighborhood Development Program funds from HUD next year.

The council will meet in regular session 7:30 p.m. Nov. 5 in the city council chambers in the Carbondale City Hall.

The SIU undergraduate student body has apparently gone to a one-party system, as the list of Student Senate candidates released Tuesday is any indication.

Action Party is the only campus political group with which candidates claimed affiliation, Gary Dickerson, elections coordinator, said Tuesday. Fifteen of the 45 candidates who filed for election said they were affiliated with that party.

The remaining 30 candidates will be listed as unaffiliated on the ballots for the Nov. 10 election, Dickerson said. Four candidates claimed affiliation with the Young Socialists Alliance (YSA), but the YSA is a recognized student organization and cannot officially sponsor candidates for office, Dickerson said.

Parties which sponsored candidates for past elections, including Majority, Students and GIM, are now apparently defunct, Dickerson said.

Candidates for student government offices who ran under these party banners in the past were unavailable for comment Tuesday.

Senate candidates, listed by district, include:

- Brush Towers: Ken Bartela, John Center, Mark Harris, Jim Kania, Penny Severn, unaffiliated, and Buzz Talbot, Action.
- Small group housing: Jeff Beckron and Barin Pinnear, unaffiliated.
- Thompson Point: Craig Anderson, Bob Cerchlo, Gloria Crutcher, Jay Johnson, Frank Okun, unaffiliated, and Dennis Grimm, Ken Walk, Action.
- University City: David Dost, unaffiliated.
- University Park: Eric Peterson, Leonard Williams, unaffiliated, and Don Batterson, William Schermer, Action.
- Westside dorm: Jack Silver, unaffiliated, and Don Dusmanc, Action.
- Two seats will be filled from Brush Towers, with five candidates: two eastside dorm, three eastside non-dorm, one small group housing, one Thompson City, two University Park dorm, one westside dorm, and three westside non-dorm seats also open.

By Check Huchterfield

Daily Egyptian Staff Writer

The Illinois Board of Higher Education (IBHE) indicated Tuesday that SIU’s Engineers have agreed to identify what they feel to be SIU’S lower priorities in the engineering program.

This indication came from a report released by James B. Holmberg, executive director of the IBHE, which said that with a single exception, the several systems were cooperating with the IBHE’s lower priority programs.

The report said that the Board of Regents, the University of Illinois, SIU and the Jumper College Board have agreed to submit the IBHE’s request.

The report is contrary to announced stands by both SIU and University of Illinois officials who said they will not submit the IBHE.

The single exception mentioned was the board of Governors, its executive director and five predepricants have "unanimously concurred that they cannot identify lower priority programs for the Pre-Doctoral programs for the current academic year." 1972, the report said.

The deadline to submit the priority lists was extended by the IBHE from Oct. 8, to Nov. 8, the report said.

Two SIU officials have assured the IBHE staff that the SIU Board of Trustees and staff and institutional officers of the two SIU campuses will meet with it "at the latter's convenience in the days immediately ahead," the report said.

The two officials who gave their assurance were identified in the report as the chairmen of the SIU Board of Trustees and the University chief of board staff.

By Gus Bode

Daily Egyptian Staff Writer

Gus says he thanks it would be unkind for anybody to say that the faculty art show should have opened on Halloween.

Harold R. Fischer, Grapet City, is the chairman of the Board of Trustees, and the chief of board staff is James H. Brown.

"At these meetings," the report said, "the institutional officers will identify lower priority programs on the order of 15 per cent of their operating budgets.

These officers will also "cooperate in assessing the impact of any program reductions," the report said.

It added that the SEU Board of Trustees "expects to consider its systems priorities officially at its November meeting."

The report is contrary to the position Robert G. Lauer said to University is taking.

In his letter released Monday, Lauer said the University was restricted to compile the list, requested by the IBHE.

(IBHE hints SIU will indicate priorities (Continued on Page 12))
SGAC studies Arena programming

By Barry H. Richardson Daily Egyptian Staff Writer

The Student Government Activities Committee (SGAC) turned its attention last week to an arena show problem at Monday night meeting, as SGAC discussed various aspects of programming to the chagrin and dismay of the membership.

"The stage shows and convocations scheduled for fall quarter have simply not taken into account the wishes of the students on this campus," said one member of the cultural affairs committee.

Stanford W. Jones, chairman of the newly formed Black Programming Committee, said that one black performer has been booked for a fall quarter performance.

"It seems sometimes for us all here to do nothing until spring when kids get their heads back on South Illinois," said Jones.

"We've got to do something to make these people more responsive to the students," he said, referring to those who arrange Arena stage shows and convocations.

"We need to make it clear that we are not going to do with Arena, and convocation programming," Tom Kelley, chairman of student activities, told the committee.

Kelley said that programming for stage shows in the Arena is done by W. Dean Justice, Arena manager.

An advisory programming board is made up of six student representatives, but the advisory board has not been called into session this quarter, he said.

The SGAC group, however, is working with six student representatives, has no budget and no power to subject performers on its own, Kelley said.

SGAC has not yet consulted with Justice regarding programming in the Arena, but a resolution on the matter is expected to be considered at the SGAC meeting Monday night, Kelley said.

Exceptions made to work maximums

By Ralphy Stipekhan
Daily Egyptian Staff Writer

Exceptions to President Robert G. Layter's guidelines limiting student workers to 20 hours of work per pay period are being granted in certain cases by the Officer of Student Work and Financial Assistance, according to John P. Canale, coordinator at the student work office and member of the Financial Aid Committee.

To get an exception, Barnes said, a department has to submit a formal request to the committee, stating the nature of the problem and detailing what specific jobs are to be granted an exception.

After a request has been received, he said, the committee meets with the department to decide what a reasonable number of jobs to be granted exceptions.

The committee then, as a result of this meeting, recommends to the student work office what jobs to be excepted, and the student work office simply puts them into effect, Barnes said.

Some 35 to 40 departments have submitted requests for exceptions to the hours requirements this quarter, Barnes said.

"Of those about half of the departmental requests have been acted upon favorably by the committee either entirely or in part," he said.

However, Barnes declined to say which departments had been allowed exceptions. He said if this were known, other departments who had their requests denied might feel slighted.

How does the committee evaluate the requests?

There are six criteria we use to decide whether a particular job can receive an exception to the hours requirements," Barnes said.

Frat to accept talent show entries

Entries for persons interested in participating in the upcoming Talent show, sponsored by Kappa Alpha Psi fraternity, will be accepted beginning Nov. 4, according to Artis Taylor of Kappa Alpha Psi.

Taylor said shows will be held Jan. 21, in a 10-year-old tradition which includes a variety of performances in the show.

The last day to submit entries is Dec. 8 and all should be sent to Artis Taylor, Kappa Alpha Psi, 112 Small Group Housing, Rehearsals and multiple final dress shows will begin the second week of winter quarter.

Court's ruling will allow action against 'Hair'

ST. LOUIS (AP) - The St. Louis Court of Appeals Tuesday allowed the possibility of legal action against 'Hair' in its management.

The possibility came when the court reversed a lower court injunction barring enforcement of an anti-obscenity ordinance.

The latest ruling struck down a Court of Appeals reversal of a lower court injunction barring enforcement of an anti-obscenity ordinance at the confectioner's request that the court review the lower court's determination that the production was not obscene.

Fury over the flag; are the laws too harsh?

The arrest last week of Jim Veltiri, an SIU student, for improper display of the United States flag should raise some doubts as to the fairness of the Illinois statute involved and the penalties it incurs.

The alleged violation occurred when Veltiri was stopped by Security Police and was found to have a United States flag draped across the ceiling of the van he was driving. According to Veltiri, the flag had not been damaged or defaced.

Specifically, Veltiri was charged with publicly displaying "the United States flag in such a manner as to cast contempt, ridicule or tyranny upon the United States flag or the United States Government, or with any person who is convicted for such crimes as theft, armed robbery, arson, kidnapping or aggravated battery.

The offense that Veltiri is charged with hardly seems as serious as these others, but in the context of Illinois law it is considered to be.

Another example is the penalty handed down for bribery of a public official which is the same as what Veltiri could face if convicted. It would seem that bribery of a public official would be considered a weightier offense, but it is not according to Illinois statute.

It is argued that any juries of the United States flag should be dealt with harshly due to the flag's symbolic nature. But it is useless to try to coerce respect for the flag through harsher penalties. Any respect for the flag evolves, from respect for the country and flag consequent—and that has to come from inside the individual.

Les Smith

Letters to the editor

Some don't like it hot

To the Daily Egyptian

It was a curious experience Saturday for me to stagewalk through Morris Library and see my fellow classmates sprawled along the tables gasping for air while their classmates slept a little to see many students working (apparently, unaware of the 120 degree heat which engulfed them). It's really not so hard to get used to if you can read in an inverted swear. If you're accustomed to reading in an upright position, however, sweat begins to pour onto the pages and it becomes difficult to turn them. Perhaps an oxygen tank system could be implemented and small canisters of life-sustaining O2 could be passed out to entering victims, to give them at least a hope for survival. The students are constantly under the fear that someone could turn the fans off and close the doors suddenly and a mad stampede for freedom could end in tragedy via suffocation. Please administration—suffocation is not the answer!

Ann Sibley
Junior, Education

'Eight-hour sauna'

To the Daily Egyptian

I want to complain about the extreme heat in the Physical Science building. For 2 or 3 days, the past week, the temperatures in the offices (not the halls) have been at 80 degrees or higher, and calls to the Maintenance Section of the Physical Plant have gone unanswered. Yesterday I was told "too bad, that is the way it is." If they can turn off the air conditioning, why can't they turn off the heating system—this would certainly economize some of that precious coal. According to the Maintenance Section, it is "a hassle to be changing back and forth from heat to cool if the weather changes." I do not see the logic to this rationalization.

It is impossible to work in an office where there is no ventilation and the temperature in the morning is over 100 degrees. One of the workers nearly fainted yesterday. One of the professors in the department recorded a temperature of 114 degrees in Necker A202.

Something has to be done before we all melt. An eight-hour Sauna bath is NOT healthy.

Maria Hoeger

Math Department

'Token representation'

Editor's note: Because typographical errors distorted the following letter on yesterday's first and second pages, it is being reprinted here in full.

To the Daily Egyptian

The mayor and city council named the members of the Goals for Carbondale Steering Committee at Tuesday's Council meeting (Oct. 26, 1971). Students were recommended to serve on the committee, yet only one of the 15 members is a student. Three of the 15 (20 per cent) are women. Once again, two vital groups of our society have been neglected.

I have faith in the one student to do a fine job, but the point is, one is not enough. The city has been trying to annex an area in which approximately 4,600 students live. It is unfortunate that the city is concerned with the revenue that annexed students can bring them rather than involving the students in the city itself.

No one can negate the fact that there is a discrepancy between 15th of the committee being students while approximately 23,000 students live in the city or on the city's outskirts.

It seems the mayor and council, with whom the final decision on the composition of the committee rested, purposely ignored two segments of the community—students and women.

Furthermore, if the mayor and council did not receive adequate nominations in these two areas, then they should have sought others, rather than to have ignored students and women to the point of giving them token representation.

Long march to a dead end in Vietnam

By Harry S. Ashman
Los Angeles Times Syndicate

The conviction that we are engaged in an unjust war in Vietnam may well have come to dominate the thinking of many about the diminishing conflict. At least the antioxidant measures that has generally taken its stand on moral grounds, and the justification for the year-old cease-fire have refused to serve their country in Southeast Asia is similarly rooted.

But there are recurrent reminders, as in the recent reports of mutiny at Firebase Face, that the Southeast Asian misadventure also must be regarded as a truly stupendous experiment. One of the single one of the basic assumptions upon which we have acted has stood the test of unfolding events.

This might have been expected, since it is defying the prevailing historical trend when we elect to take up the colonial burden abandoned by the defeated French at the very moment when the colonial system was being dismantled, by force or consent, everywhere in the world.

This was done on the assumption that a continued client regime in Saigon could provide an inexpen-

sive means of containing the spread of a presumed Com-
munist monolith extending from Moscow to Peking. The nonaggressive nature of the movement with a new front it is hard to believe that sensible men ever accepted such a cross-cultural ideological combination as a human possibility.

Smashing butterflies

To the Daily Egyptian

Mr J Hartly

If any beseeched students cut English Literature 15X when Mr Swilfo 'A Modest Proposal' was discussed and its literary form explored! that is unfortunate. While my personal writing style is ignored the need of the course is that not. Not so, has been recognized by twelve years old. Perhaps I should have understated the word 'right' in 'right thinking' as a ground to the naive.

Your broadside. Mr Hartly has missed the boat.

My comment was directed to the selective im-
pression of legal matters in a way that can hardly be construed as justice. That it concerns the flag is a secondary issue.

The danger of a justice department, that select-

ively enforces the law through personal whim or prejudice, is to me more dangerous than the most wanted criminal, and to my mind a deplorable situation.

I suppose Mr Hartly it is more obvious to smash butterflies with sledgehammers, but it is more fun to try to beat tigers to death with a feather.

Abortion and liberation

To the Daily Egyptian

In answer to the letter Oct. 28 by Vicki Thomas, I would refer her to the letter of Nov. 12, 1976 as follows.

"May we expect miracles, maybe it is too much to expect a mother of six children (who have no Dad) to have any more. Perhaps it's too much more to expect that single women or unmarried girls hold enough that she can control her emotions while with a guy. But the same for the men, they helped the unwanted pregnancy to evolve. There can be no embryonic development without both sexes engaging.

Abortion is more needed than a cure, just like a disease. The Bible tells a great deal about how to accomplish this, but too few ever bother reading it.

Abortion is murder, no sidestepping please. How far a human has developed, how useful, how intelligent with all the ills, in some ways would have it. I doubt most people would kill a person just because it was born yesterday. But, it is all the way to think as some unfortunately are. Yet, this is the characteristics of an embryo. Often abortion takes place after three months, or even before, when the fetus has started taking full human shape.

"Hello flower - looks like another beautiful day on Amchiks"

Daily Egyptian, November 3, 1971, Page 5

Less, which made certain catholics for his policy absurd that they were winning, when there was no chance of winning.

In fact, the whole policy was so absurd and get-
ing so dangerous that it had to be reversed, so their public language he likes, by a great forward pass. That was the China policy. That reason him from the damage and the collapse of his army, which in Vietnam that couldn't be done by withdrawing.

The ultimate irony of the war is that - aside from the countless Southeast Asians who have been ground up in the conflict - the principal soldiers may turn out to be the American military establishment, the Army in particular.

It is reported in Western war chronicles that the greatest pressure on Mr. Nixon, although brought to office by spreading public recognition of the futility of the course pursued by his predecessors, has made his own fitting conclusion this sustained assault on elemental common sense. What we may all hope is the final solution is the Nixonian dream of gaining victory in Vietnam by withdrawing the only effective fighting forces in the area.

Walter Lippmann, who earned the right to a touch of asperity by pointing out the futility of the American intervention from the outset, has summarized the result of what the President chose to call "Vietnamization":

"This was really absurd, considering that we didn't win the war when we had our troops in it. In order to cover the failure and absurdity of that policy, Nixon made the dashes into Cambodia and

There are many humane arguments both for and against abortion, but it is my opinion that most of the ones for it are using this as an excuse for justifying and are trying to find a way out of social embarrassment, as very few married women desire abortion compared to those expecting out of wedlock.

As for the choice by the woman of whether or not to have a child, she should not be entirely up to her. If she isn't married she shouldn't have any, and if she is, her husband should have a "little" to say about it, as it is going to effect them both.

Come to think of it, maybe the man should be the one to decide as "God gave man dominion over all things" (Gen. 1:26). But then Women's Liberation probably don't read the Bible either; for it says women should remain silent (1 Cor. 14:34) and learn in silence (1 Tim. 2:11) and have not the right to authority over men (1 Tim. 2:12).

My conclusion, Women's Liberation has no right to anything they don't already have.

Red China appoints two to United Nations posts

UNITED NATIONS, N.Y. (AP)—The People's Republic of China has named two new knowledgeable in Soviet and American affairs to head it into the United Nations.

Peking sent word Tuesday that a deputy foreign minister, Chao Kuan-hua, will head its delegation to the General Assembly. Its ambassador to Canada, Huang Hua, will be permanent U.N. representative and deputy head of a 10-man delegation to the Security Council.

Chao is 57. Since 1969 he has been

Chao's chief negotiator in border disputes with the Soviet Union. He visited Moscow with Premier Chou in November 1969, just after the fall of Nien Chao in the Kwangtung.

Huang, 36, became ambassador to Ottawa last July amid speculation that he would put his Western knowledge to work in contacts with the United States.

Diet Algard, Norway's am-

使者 to Peking and a General Assembly delegate, called Chiao "a perfect choice for China to send here."

"He is a very able, very in-

tellligent diplomat," Mr. Algard said. "That the Chinese have chosen him reflects what we have thought all along—that China intends to play an active and responsible role in the United Nations.

An East Asian scholar at Colum-

bia University, Donald Paulson, said that China was the "best possible man" and Huang the "best best."

The U.S. spokesman said the American mission "will be dealing with the Chinese on a direct basis."

Moving expenses may now be added to the list of items which have fallen under the chopping block in attempts to balance the University's budget.

President Robert G. Layer issued a memorandum Friday to administrative and academic officials announcing that the practice of paying partial moving expenses for new faculty and administrative staff members will be discontinued at SIU.

Thus policy, to become effective immediately, affects all personnel at the Carbondale and Springfield campuses.

Executive Vice President Will D. Malpass estimated that this would amount to a saving of approximately $200,000.

Riding team will compete in meet

The Saluki Saddle Club riding team will compete with Springfield Junior College at 10:30 a.m. Saturday at the Saluki Stables.

The Saluki team consists of 17 western riders, 10 hunt riders and six saddle-pleasure riders.

Springfield Junior College will be bringing 12 horses and 16 riders to the meet.

Ralph G. Goddard, an American Quarter Horse Association approved judge from Marvon and as of yet unannounced, second judge will judge the competition.

Riders will be given in each class and a perpetual trophy will be presented to the winning team. The meet is open to everyone and admission is free.

Navy jet attacks N. Viet battery

SARGON (AP)—A U.S. Navy jet darted into North Vietnamese Tuesday to attack a battery that fired two missiles in an attack on the bombing inland base, the U.S. Command reported.

The plane was not hit in the missile attack and the results of its strike at the North Vietnamese site, still under heavy fire from the downed American, were not immediately known.

The command said the missiles came up as the Navy A-4 Intruder from North Vietnamese territory while a bombing mission was underway over the Ho Chi Minh supply trail. It was the 36th so-called "prudent reaction" strike by U.S. warplanes inside North Vietnam this year.

The command also announced that enemy gunners had shot down two more American helicopters Monday in the central highlands. Raing outtotal U.S. aircraft losses in the war to 9,804.

Moving expenses will be paid in those cases for which written commitments have already been made, but no further commitments are to be made, according to the memorandum.

One thing about DE Classified there's never any wrongdoing in them.
Civil rights film set for showing

The film, "King: A Filmed Biography," by Monty Shaw and Claire Williams, will be shown at 7:30 p.m. Nov. 12 in the Student Center.

Tickets for the three-hour documentary sponsored by the Student Activities Board and Student Senate are priced at $2 and are available at the Student Union and Third World Record Store.

A recent graduate of the class of 1964, Martin Luther King Jr. is the leader of the civil rights movement, which bears his name. The Sundance Film Festival has honored him with a "Best Dramatic Feature" award.

"King" is a recreation of the sit-in, bus boycott and other demonstrations for legal rights. The film depicts the events as they actually happened, using newsreel and television footage.

The film has no narrator but it includes readings by such noted actors as Harry Belafonte, Ruby Dee, Ben Gazzara, Charlton Heston, James Earl Jones, Paul Newman, and Artis Quayle.

Hillel plans protests of Soviet anti-Semitism

The Hillel Foundation of SIU is planning a series of events to present a full treatment of Jews in the U.S.S.R.

According to Rabbi Earl Vincenzo, head of the Hillel Foundation, the first in the series of events will show actual film smuggled out of Leningrad showing new Jews on trial because they asked to go to Israel. The movie will be shown free of charge at 7:30 p.m. on Nov. 15 in the Student Center's Activity Room A and B.

The second event in the series will be a religious service to offer prayer for Jews being persecuted in Russia, and Rabbi Vincenzo. It will take place at 7:30 p.m. Nov. 15 at the Hillel Foundation.

The last event in the protests will be a movie entitled "The Fixer" showing what Jews in the U.S.S.R. face and how they fight back.

Grad Wives Club to hold fashion show, bridge party

The SIU Graduate Wives Club is sponsoring a holiday fashion show and bridge party Nov. 13 at Xavier Hall of St. Francis Xavier Catholic Church, 300 S. Poplar St., according to James Presley, publicity chairman.

Holiday fashions donated by Carbondale merchants will be modeled by club members and their friends at 11:30 p.m. Bridge will follow the fashion show. Door prizes, also donated by local merchants, will be awarded at 3 p.m. to holders of ticket stubs randomly drawn during the afternoon.

Tickets are now on sale at $2 per person. According to Mr. Presley, tickets can be obtained by advance sales only by phoning 540-4114, 540-3939 or 540-8282.

The public is invited and refreshments will be served.

Homecoming sale in need of arts and craft displays

Got leather, ceramics, photos, pottery, art, clothing or other art or craft that could be put up for sale or display? If so contact Nancy Malone, coordinator of the Homecoming arts and craft sale to be held Saturday from 11 a.m. to 3 p.m.

Miss Malone says there are only three entries so far. She said her committee would accept any craft or display which could be displayed or sold for the event, which is open to the general public. There is no fee.

Miss Malone said to leave a message at the Student Government 358-2261, describing the art or craft being entered.

Decatur firm low on oversales bid

The J.L. Simmons Co. of Decatur submitted the low bid of $31,800 for the construction of the second Pingoli protection screen for the pedestrian overpass which crosses Illinois 52 and the Illinois Central railroad tracks, according to three entries so far. She said her committee would accept any craft or display which could be displayed or sold for the event, which is open to the general public. There is no fee.

Miss Malone said to leave a message at the Student Government 358-2261, describing the art or craft being entered.

The program, to be shown in
Manson found guilty of two more murders

LOS ANGELES (AP) - Charles Manson, the maniac leader under sentence of death in the seven Sharon Tate murders, was convicted Tuesday on two more counts of first-degree murder.

He was found guilty in the killings of his two followers Gary Hinman and a three-year-old child named Donald "Shorty" Shea. No. 2 body has been found.

The prosecution contended both were slain within a month of the Tate killings in August, 1969.

Although Manson already was a condemned man when the trial started last June, the district attorney said all charges against him would be prosecuted.

Manson, at 28, had been exonerated from the courtroom for most of his trial because of disruptive behavior.

The jury of eight men and four women deliberated for more than 43 hours before reaching the guilty verdict Oct. 21.

Under California law, a separate penalty trial must be held to determine the fate of seven sentences. It was set for Oct. 26.

Wednesday afternoon and evening schedule on WJSU-TV: Channel 4

**NOW director says women must pressure state, HEW**

By Sue Roll
Daily Egyptian Staff Writer

Women at SIU have been told that unless they organize and put pressure on the state legislature and the U.S. Department of Health, Education, and Welfare, they have little chance of changing their status as they continue to be victims of discrimination.

This was the message of May Jones, a representative of the National Organization for Women (NOW), who spoke Friday at an organizational meeting of NOW at SIU in the Student Center.

Ms. Collins-Robins and two others from the University of Chicago talked with SIU faculty women and students, explaining the role of NOW at the student level and its part as a pressure group in the fight to gain women's rights.

Over 400 members of NOW in Illinois have been members of the organization for four years.

"We have been contacted by the federal government with sex discrimination charges," she said.

"And anyone who says there is not gross sex discrimination against women in the United States is out of their minds." Ms. Collins-Robin said that NOW and other women's pressure groups have worked together to force the government to act on the issue.

Sphinx Club to send names to Who's Who

By Sue Miller
Daily Egyptian Staff Writer

Ever wonder how SIU plans about admitting the 36 names of the School for the Who's Who in American Colleges?

Well, the suspense is over. The Sphinx Club, which selects all 36 names of Who's Who in American Colleges, is asking students and departments that know of any under-graduates who have contributed something to the university and are interested in entering the club, to contact Rhonda Starnes, president of the club, before the Friday deadline.

The only additional qualification for club membership is that the student have either 90 credits or 40 hours at SIU if the student has transferred here.

The club membership for each year is limited to 36 undergraduate actives. This number is the limit set by Who's Who.

Ms. Starnes said that the club has three classifications of club members: undergraduate, honorary, and alumni.

"Once you are in the club, it's for life," she said. The members' classification merely shifts around his progress.

The honorary classification consists of former actives who have graduated and are on the staff, faculty, administration, or are graduate students at SIU. Other graduates not connected with the club are considered alumni members. Ms. Starnes said that active undergraduate members are concerned with tapping someone for the club.

Presently the club has eight under-graduate activities. The remaining 28 positions will be filled during the summer term. Any vacancies that occur during the rest of the year will be filled during the spring term.

Ms. Starnes said that the stop of the club membership in the summer term appears to be completed during the spring term.

The club reacts formally twice a year and at other times on an informal basis. The deadline for the terms of the terms of the potential for the club, owing to the deadline for the Friday deadline, has been established by calling Rhonda Starnes at 536-2103.

**Perhaps The Most Important Film Documentary Ever Made**

--Philadelphia Bulletin

University is considered by members of the Sphinx Club to be a "Supreme Court" in such an example, "This matter is going to take a lot more," she said.

"If-s any event between women and students in the state's public schools that is a united front between them, the pressure group that the government simply could not ignore.

Attacking equality for women is going to cost billions of dollars in salary adjustments, said Ms. Collins-Robin. She added that President Nixon is not likely to allow pulling of federal contracts from discriminatory institutions on the wide scale that is needed without much more pressure from women.

"The time to move is now," she said. "Do what must be done, keep the pressure on and fight on." Ms. Smith, a graduate student in history at the University of Chicago, spoke of the difficulties women graduate students have in establishing a professional rapport with professors and their colleagues in their departments. "Women are not taken as professionals," she said.

She also pointed out that the sexual factor is one reason for these difficulties, even if it need not be.

"Basicami has been a rather stupid thing for women to go to great school because of the obvious fact that they won't get jobs," she said.

She criticized the practice of distributing job opportunities primarily within departments and said that men are the main benefactors of the favors that are given to them.

Ms. Starnes said the publication of the club, "Perhaps The Most Important Film Documentary Ever Made," will be released on November 12, 7:00pm at the University Center Ballroom D.

National Aeronautics and Space Administration (NASA) engineers are currently refining a high-gain antenna control system developed for a space shuttle by Curtis W. Dodd, assistant professor in the School of Engineering and Technology. Dodd spent 12 weeks this summer working at the Marshall Space Center in Houston, developing the system.

Lockheed Aircraft received a contract this fall to research and produce the antenna, refining the system developed by Dodd. The high-gain antenna control system is needed to ensure immediate communications with a space shuttle that will circle the earth.

The 12-week program was sponsored by NASA and the American Society for Engineering Education. The 22 participants working at Houston were selected from universities throughout the U.S.

Don J. Norwood, producer for the SIU Broadcasting Service, served as chairman of one of the juries of film experts judging entries in the semi-finals of the Kodak Teenage Movie Awards at Rochester, New York.

Norwood is a member of the University Film Association which is responsible for judging film entries—on the basis of originality, story or informational content and camera technique—in the competition open to filmmakers, through age 19, in the United States and Canada.

The 1971 Kodak Teenage Movie Awards chose films from among the winners for showing at overseas film festivals.

Academy members of the SIU Vocational-Technical Institute 11 are authors of two articles in the recently-published 1972-73 Technicians Education Yearbook.

VTI Dean Arden L. Prail wrote "New Occupational Programs in Environmental-Ecological Education," one of nine articles in a section devoted to new issues, problems and proposals. "Training Building Construction Technicians at Southern Illinois University" is the title of an article by VTI architectural technology supervisor Paul LaQuey and graduate assistant Morris E. Fletcher in a section of the yearbook devoted to case studies of programs in schools.

The Technicians Education Yearbook, in addition to the two editorial sections, contains occupational information for technicians, a directory of professional organizations and a listing of 1,361 institutions offering programs in technician education.

Three SIU foresters are making a study to evaluate the state's forest resources and to analyze potential uses. The work is for the Illinois Division of Forestry in the Department of Conservation under a $16,000 state contract.

Raymond S. Ferrell, assistant professor of forestry, is heading the project. He will concentrate on studies of the timber resources and forest-products marketing potentials. Fan Hao Kung, assistant professor and Raymond Muschon, instructor, are working on other phases.

The University of Illinois Department of Forestry was awarded a similar contract. Primary objectives announced for the studies are to provide useful guidelines for determining the best land uses of existing forests and standards for selecting additional state forest land as budgets and time permit. Both are to be completed by March 1.

Connecticut chemist, Canadian win Nobels

STOCKHOLM (AP) - The 1971 Nobel prizes for physics and chemistry were awarded on Tuesday to a Connecticut scientist who found a way to make high-speed colour television and a Canadian who explored inside the mitochondrion, the organelle producing energy in living cells.

The Swedish Royal Academy of Sciences gave the physics award to Dr. Dennis Gabor of the University of Cambridge for his discovery of electron microscopy and autoradiography - an idea he said he got while watching a tennis match. Gabor was born in Hungary, became a British citizen and now works at the Columbia Broadcasting System Laboratories in Stamford, Conn. He is in no relation to the Gabor sisters who also come from Hungary.

The chemistry prize went to Dr. Gerhard Herzberg of the National Research Council of Canada in Ontario, for the chemistry prize. It is given to those who "create free radicals" - molecular fragments which take part in chemical reactions and help produce the smog that irritates the eyes of city-dwellers.

Herzberg, 60, and Gabor, 71, both studied physics and mathematics at the University of London and served as research assistants at the National Research Council of Canada.

Senator Democrats oppose foreign aid extension plan

WASHINGTON (AP) - The chairman of the Appropriations Committee is leading key Senate Democrats Tuesday in opposing President Nixon's plan for a temporary rescue of the foreign-aid program.

Secretary of State William P. Rogers, however, joined the administration's case and urged the Senate to override the veto of the aid bill. He told reporters Tuesday that if the United States was to remain a strong power, it had to maintain its international negotiating position and approach to the world community to "correct this damage that has been done.

The administration wants Congress to extend the present aid program at least one month beyond the Nov. 15 expiration of existing authority.

Sen. Allen Ellender, D-La., chairman of the Appropriations Committee, said he would oppose any temporary extension unless Congress was prepared to extend the program on authorizing "a shortened, revised version of our aid operations."

In that case, the Louisiana Democrat added, he might agree to extension of the existing program.

Planning heads list

John Baker has job of many tasks

By Jim Bell
Daily Egyptian Staff Writer

John Baker says his job given him a lot of headaches, but it is a function he enjoys doing for long time.

He heads the Office of Planning, Development and Research, and his job is to coordinate programs in the four major administrative areas of student affairs, business affairs, academic affairs and public relations, and to translate these programs into budgetary terms.

Working in the budgetary end of this mammoth task is the comptroller, who sets the new office on campus.

Both run two areas of programming and budgeting have been changed because long-range planning must be immediately translated into budgetary terms if it is to be effectively evaluated.

"It's important to get away from the make-up-day-by-day system where everything is judged by the student credit hours in a department produced," said Baker. This does not pay any attention to production of the quality or value of what goes on in a given program.

Baker also pointed out that the force of planning is served by the large number of research and

the classroom

preferences have changed consid-

erably since departments formu-

lated the 18 year plans which were a major input into the Master Plan for higher education. Baker

said.

After we got around the im-

mediate cross of the present budget situation, one thing I hope to is encourage academic departments here to look at the 18-year plans and see what modifications may have become necessary," said Baker.

Baker said the new thrust of the University toward upper division programs and graduate education coupled with the lowering of enrollment must be considered in further plan-

ning.

He attributed the decreased enrollment to a number of things in cutting the enrollment ceiling of

20,000 imposed on the University by the Illinois Board of Higher Education (IBHE). The new em-
phasis on community colleges and the high tuition of state universities.

Future planning must be oriented toward keeping room for in

the 1960s. Each receives $25,000 with the prestigious award.

Herzberg was in the Soviet Union when his award was announced. Participating in a Soviet-Canadian scientific exchange program.

In Stanford, Gabor told a symposium reporter his first im-

pression was to rush the prize money. But he did a quick turnaround and vowed "I'll buy my wife a new coat.

His lensless 3-D invention already has created a worldwide business and its future applications promise to be vast. It could be used for memory cores in computers, to add perspective to television and to many other uses.

Unlike some earlier 3-D methods, his new invention can show objects photographed from all angles, giving the viewer the impression of looking at a window or of its projected uses in medicine, where surgeons hope to use photographs "look around around a tumor to judge its size and possible malignancy."

The Swedish Academy said research by Herzberg has led to "a profound reevaluation of current ideas on chemical reactions in gases.

SPORTS FANS I

BET YOU DIDN'T KNOW!

Steve Blarke,
One of the most unusual foot-
ball stories of the season concerns a
boy named Bill Anderson, who played at the University of Iowa. When Anderson was a junior in 1964, nobody thought he had much physical ability, so he played mostly defense that year. But the next year, Anderson became the regular quarterback, and established the all-time national record by completing 84 passes...No one since in the history of college or pro football has ever completed 80 passes in a single season...Yet the boy who did it was good enough to play quarter-
back.

There's a surprising trend in pro football that many fans aren't aware of...There are fewer and fewer long runs from scrimmage. For example, last season in the National Football League there were only seven runs of 50 yards or more all year.

Of all the men who ever played pro football, certainly there's no record for fumbling the most in a single game. The general consensus is, if there's a man who's never dropped a pass, it's the man who now an-
nounces the Monday night TV program as " If you don't have the record for the most fumbles, I'm here in Dallas in 1964.

I bet you didn't know that college graduates have a larger life expectancy than people who are not living five years longer now than in 1964. That's one of the factors that have to be taken into con-
sideration as we look down the road in the next five or two years.

Daily Egyptian, November 3, 1971, Page 11
Daniel Llords brings variety of talents to Thursday convocation

Daniel Llords will bring his multitudinous talents to SIU Thursday beginning with the convocation show at 1 p.m. in the Arena, followed by a seminar sponsored by the theatre department.

Llords' "International" is a concertfestival for adults. It is a one-man show which features Llords as choreographer, sculptor, musician, actor, singer and director.

Llords has designed, created and produced more than 300 figures ranging from elephants to shadow figures for a "Macbeth" production. His designs so stunned one critic that he called Llords the "Pygmalion of the woodland." He debuted up a sense soliloquy with a professional symphony under the direction of Otto Klemperer at the age of seven. His childhood career included singing and acting and was in over 20 motion pictures. He appeared in movies directed by Frank Capra.

Max Rheinhardt and Alfred Hitchock.

Llords has a masters degree in theatre arts. While here at SIU, Llords will conduct a seminar-workshop demonstration at 7:30 p.m. in the main theater of the Communications Building.

He will begin the seminar-workshop with a production of Stravinsky's "The Firebird" done marionette style.

Llords has given presentations at the University of New Mexico, Western Illinois University, state university colleges of New York, Mount Mary College and Idaho State University.

He has also conducted master classes at the University of the Philippines, University of Manitoba, the Royal Academy of Dramatic Arts of London, University of Hawaii, Philippine Women's College and the University of Free Berlin. He has appeared in concert tours around the world three times.

Llords will illustrate and discuss simple puppets quickly made from common classroom and household objects.

Llords shows elaborate productions involving hundreds of attractively strong and costumed marionettes. He claims his seminar is especially designed for students and teachers in the areas of education, teacher training, audio-visual, theater, art and music education.

Topics to be discussed or demonstrated include the construction and use of puppets and marionettes as a teaching aid in the classroom, poetry in therapy and as an aid in diagnosis and treatment of emotional disorders and as a useful tool in public relations.

Critics around the world have called Llords show "amazing," "viewable," and a show with "virtually that stagers time and time again." He has appeared at festivals and symphony performances numerous times.

Following the seminar-workshop demonstration at 7:30 p.m. there will be a coffee hour in the Communications lounge sponsored by Student Government. The public is invited to attend both presentations and the coffee hour, admission is free.

Higher board hints SIU will submit priorities list

(Continued from Page 1)

Although the letter did not say flatly that the University would not submit a list, it "remained firm" with the letter. Layler said the University's position was not to submit a list.

Layler said that if he adheres to the procedure outlined by the IHBE in its report "it would be to explore the matter and not to submit the priority list.

"This exploratory would be "to see how they construe what is in the 15 per cent limitation," he said.

Layler said he would also agree with the IHBE that it was necessary to "trade off the old programs for the new."

He reiterated his statement that he would be willing to discuss with the IHBE programs if positively would consider inappropriately.

He said he wants to find out if the IHBE is using its Master Plan Phase III as a guideline to establish the priorities.

"When asked about the meeting the IHBE said it had received from the new University officials, Layler said he knew nothing of them. Brown was reported out of town.

Tuesday Fischer could not be con-
U-Senate leader says man issue is fixing group's role

David Kenney, newly-elected president of the University Senate, said he would change the role of the U-Senate to the main problem of the group is the "unnecessary friction and animosity." Kenney, who was elected Monday night to replace William Muth, said, "The Senate must clarify its function and quickly to gain public confidence that it is an effective body." Muth, president of the University Senate, had said he would run for a second term as president. Kenney, who was elected Monday night to replace William Muth, said, "The Senate must clarify its function and quickly to gain public confidence that it is an effective body." Muth, president of the University Senate, had said he would run for a second term as president. When asked what his plans are for the Senate, Kenney answered that he simply wants to serve as a representative of the 75 members and that he will work to bring the Senate together as one organization. "I don't want to use the word 'union,'" Kenney told the newspaper. "But I do want to bring the Senate together as one organization." Kenney added that his goal is to make the Senate more effective and to improve its public relations. When asked what his plans are for the Senate, Kenney answered that he simply wants to serve as a representative of the 75 members and that he will work to bring the Senate together as one organization. "I don't want to use the word 'union,'" Kenney told the newspaper. "But I do want to bring the Senate together as one organization." Kenney added that his goal is to make the Senate more effective and to improve its public relations.

Talk on wage freeze to begin Mobe strike

The SIU Student Mobilization Committee will begin a student strike at 11 a.m. Wednesday in Mobe Library Auditorium with a speech by President Harold Spalding. The strike is part of the "Wage Freeze" movement in a response to the "Sitting in" at the University of Illinois. The SIU Strike will be coordinated with the national "Sitting in" in an effort to bring about a national movement against the wage freeze.
Freshman hits, gets hit

Hitting on gridiron grows on you

By Ernie Schweitz

Daily Egyptian Sports Writer

Ask any freshman football player about the differences between high school and college gridiron action, and he'll say it's the hitting. This is what he says in the hitting.

In college, they say, it's a matter of survival. You've got to hit or be hit or you don't live long enough to get a pass thrown your way, to be the man on the other team's hit list.

Gary Powell has been one of the fortunate ones in this respect. He had a few of these crossfire moments at both sides of the line of scrimmage in high school, but it's nothing like to hit hit and be hit.

"I really didn't like to hit when I came here," confessed Powell, "who sees action at both defensive and offensive back, but not much anymore.

"But when I'm getting hit by some of these varsity players, I can't practice my tackling. You know, it's kind of grown on you.

Love of hitting is not the only thing that's grown on this 6-foot 3-inch, 230-pounder from Galesburg. With the sometimes violent action on the field, Powell said he is developing a mean streak. "I'm really surprised how mean I'm getting," he said.

Playing both ways has given Powell a new found appreciation and fun in the game. "I like to play offense since it's my first love," he said.

There is no real bother in switching from one to another though. "In fact, it's kind of fun. On defense I like to hit the backs and on offense I like to try and make the backs miss me," he said.

Powell hasn't had much chance to show his offensive wares to the freshman coaching staff, but he has seen action playing defensive halfback.

Against Illinois State, he intercepted a pass returned it 32 yards to set up a key SWI field goal. The three points sent the Gamecocks on their way to a 27-20 victory.

Interceptions are nothing new to Powell. He was a high school in addition to running the football to the tune of 500 yards in his junior year and 560 his senior campaign.

"It's really the same up here," said Powell, talking about other differences in the game. "Oh, the people are bigger up here and of course they are better. By the time you go to college you're weeding out the others who really shouldn't be playing.

There's been a good reason why Powell hasn't seen much offensive action—its called Bob O'Neal who is sending the freshman squad in that direction. The two ball carriers however present different styles in doing their thing.

"I'm in the kind of runner who likes to run away from and around people," Powell said. "While Bob will take out after a defensive man and run over him."

A fairly standard phenomenon freshman coaches find is that ball players in the retention of habits from their high schools days. Sometimes the habits are good, but more often than not they are bad.

Powell's lack of offensive activities might have hurt him in this respect. Powell really don't know what kind of halfback I have at running back because I haven't been up here long enough to learn how to play the position, he said.

"It's a different story on defense though. "On defense it's just a matter of getting your head in front of the half back carrier, buying more aggressive and hitting." And hitting in one half Powell doesn't want to break.
Lesson comes from Indiana State: isolated stadium site means trouble

By Mike Klein
Daily Egyptian Sports Writer

TERRE HAUTE, Ind. — Pierre Burke, Indiana State assistant athletic director, had a roast beef sandwich on one hand and a walkie talkie in the other.

"What’s the problem, station two?" he yelled three times into the little talking box, between munches on the sandwich.

"What’d you say?" the little box said twice.

The talking box finally understood Burke and said there was a rope blocking a driveway outside ISU’s Memorial Stadium Burke said moved the rope.

As he gazed down from high in the Memorial Stadium press box, Burke administered authority easily, getting that menacing rope out of the way.

But he couldn’t do anything about the very small crowd that watched as Indiana State defeated Southern Illinois.

"I don’t care if we are losing (four in a row). That is terrible. And it’s the students," Burke said. "They aren’t showing up. It is especially disappoin-
ting when we bring in a good team like Southern."

And when you’re in town of 70,000 people.

The estimated attendance was listed at 4,500 for last Saturday’s warm weather, sunny skies, Salukis-Sycamores game. But Memorial Stadium looked far from one-third full. It held 20,500.

In fact, the Marching Salukis and three other bands appeared to need as much space as the localities. Attendance, really a lack of it, is a three-fold problem for Indiana State.

"Losing is the big thing here today," Burke said before leaving into the roast beef again. The Sycamores carried a 2-5 mark into Saturday’s game. But when we have had weather, there’s just no way we’re going to get students out here. A three-mile walk in the wind will discourage anybody.

That’s problem No. 1. Indiana State completed a two-year Memorial Stadium, complete with Astro-Turf, on the site of its old field, three miles from campus.

The impressive concrete stadium which has a ‘200 Club’ for rich spec-
tators sits on land leased for 99 years from Terre Haute.

It seemed the best place to build a stadium at the time, says Burke. Now he’s not so sure and advises, "When Southern builds a new one, I hope they keep it where it is.

Memorial Stadium has never filled to capacity in its two-year history. The largest crowd, 16,200, was recorded at last year’s homecoming.

The smallest gathering ever was 2,500 for the season opener against Eastern Kentucky last fall. Or was it winter?

The temperature was around nine degrees, the wind coming out of the north and it was sleeting. Nobody came out," said Burke.

Those few who did watch the Sycamores get whitewashed, 9-4, Indiana State’s 1971 average attendance is just over 10,000 per game, less than half the school’s capacity. And that figure is buoyed by a 16,200 homecoming crowd.

Stadium location isn’t the only problem Indiana State faces although SU head football coach Dick Towers said there is no evidence the record and I’ll guarantee you they would have had one bell if a crowd there, over 12,000.

The Sycamores are located 45 miles from Indiana University, 80 miles from the University of Illinois and 75 miles from Purdue University.

“We have six home games this year. Five of the games, Indiana University is at home. All six. Notre Dame is at home. So we’re battling them head-to-head," said Burke who had finished the roast beef sandwich and was working on a peck.

"After I found that out, I didn’t even bother to check Purdue. But they’re home today so that’s at least one date.

Purdue and Indiana State have home games on the same Saturday three times this season. The dates overlap three times with the University of Illinois.

That puts Indiana State in competition with the big boys for the fans’ money. And it’s pretty hard to battle the big boys when you’re a little boy.

Even a little boy with a new stadium.

Ken Nalder aids harriers in comeback

By Ken Stewart
Daily Egyptian Sports Writer

Unlike Hungry Dummy, the ISU cross country team could be put back together again after a staggering and disappointing start to its fall campaign.

True, the Illini men’s squad didn’t fall off a wall, but the tardy opening of practice because of the tightening of the budget on campus left the team unprepared for its first dual meets subsequently, the Salukis lost their first three encounters.

It was a sort of torture and have situation in an effort for the team to develop, into a top-notch squad and catch up with the more experienced and developed teams that had started prac-
ticing weeks earlier.

Eventually, the tortoise grew wings and won four of its last five dual meets, losing only to Kansas, a strong contender for the NCAA championship.

Placing second at the Illinois Inter-
collegiates last week also indicated that the Salukis were finally a team to be well respected. Southern missed spar-
ting favored Illinois by a scant five points.

And now protecting the Midwest Conference throne from pretender Ball State Saturday in DeKalb doesn’t seem out of the question.

The tortoise ‘n hare analogy can best describe the Saluki Ken Nalder and his part in the team get back on its feet.

"Right from the start, I worked real hard and gave them (his teammates) something to chase," said Nalder, a rugged Australian with a 5-foot-10, 140 pound frame.

Series breakdown listed

Here is a series-by-series breakdown of how the Saluki defense and offense performed in last Saturday’s tilt at Indiana State.

DEFENSE
1. The Sycamores Glenn Daemen passed after one series.
2. Daemen passed after one series.
3. ISU regained 71 yards, scoring first touchdown.
5. Daemen after one series.
6. After one first down. Daemen passed.

Offense
1. ISU matched two first downs before ISU’s Glenn Daemen passed after one series.
2. Daemen after one series.
3. Daemen passed after one series.
4. After one first down. Daemen passed.
5. Daemen after one series.
6. ISU recovered a Saluk fumble and kicked a 24-yard field goal.
7. Daemen after one series.
8. SU had no passers in the game.场地

Winged team to meet

There will be a meeting of the Winged Wheels basketball team at 7:30 p.m. Wednesday in the Thompson Point Cafeteria.

Those interested in participating in the wheelchair basketball program should attend the meeting.
