Study Indicates Activity Fee Hike Needed

The Student Council's Activity Fee Study indicates that the 1963-64 programs will require approximately $60,000 -- a $148,000 increase over last year, according to George Graham, Family Housing Senator.

If all requests for funds are granted without being trimmed, he added, the undergraduate student activity fee will have to be hiked $4 from the present $9.50 to 13.50 next year.

Graham made it clear that the fee study does not attempt to raise fees, but to examine needs.

"In my opinion, any proposed fee hike should be subjected to a referendum," Graham said.

Counterfeit Decals Discovered On Cars

Campus authorities are questioning two students who allegedly were involved in the sale of counterfeit decals issued to other students. The students were using the counterfeit decals on their cars, which were identical to decals being used by other two students.

Authorities said the original decals were apparently photographed and other techniques used in the copying process.

Could Jump To $13.50 To Cover Fund Requests

A referendum, Graham said, should offer the student body alternatives between programs which they are willing to support.

In the end, however, the SIU Board of Trustees maintains the right to make final decisions on the allocation of student fees.

Graham said he anticipated the calling of a referendum and suggested that the Board of Trustees would give due consideration to the results.

Accounts which are asking for major increases from student fees are SIU's Health Service, Athletics, Communications and Music.

Graham said the Health Service, which last year was granted $104,000 from student fees, is now asking for $185,000, which breaks down to a request for $1.85 from each student.

This increased, Graham said, would greatly improve service and possibly enable the Health Service to acquire needed equipment.

The Athletic account, which last year received $72,000 in student fees, is asking for $107,000, or about one dollar per student.

Graham said that the Council may recommend that other accounts besides student fees be used to finance the increases. The possibility is being studied now by the Council's finance committee.

Graham said the Council could recommend that other programs be delayed or that an increase be called for.

The fee study has not been completed and Graham is not sure what the final report will be.

The completed study, which was presented to the Council this quarter, would run over a hundred pages, Graham said.

Graham said that he felt the Council should establish a study group to make a thorough examination of needs in the activity fee area.

He pointed out that without an activity fee increase, SIU's enrollment would bring unexpected income from $315,000 to $352,000.

Lecture On Oceanian Art Tonight At 8

Anthropology and art will join hands at SIU today to present an illustrated lecture on "The Scultpure of Melanesia," by a noted art historian, according to Philip J. C. Dark, professor of anthropology.

Allen Wardwell, associate curator of the primitive art department at the Art Institute of Chicago, will speak on the subject Thursday night at 8 o'clock in Mckelroy Auditorium in the Agriculture Building.

Wardwell, who studied at Yale University and the Institute of Fine Arts, New York, was formerly on the staff of the Museum of Primitive Art in New York, and has concentrated research on the African and Oceanian art.

His lecture is jointly sponsored by the departments of art and anthropology at SIU.

125 SIU Students Take Initial Test For College Bowl

Some 125 SIU students have taken an initial screening test in preparation for participation in the G. E. College Bowl television program.

The comprehensive objective testing of 32 students will be selected to take oral exams on an individual basis. Then 16 students from the Carbondale campus and eight from the Edwardsville campus will be picked to compete in local television competition and stimulating the College Bowl.

A faculty team will select the final team of four from the 32 students who compete on local television.

A test "on-exam" for eligible students who missed exams March 29 and 30 will be held today at 2 p.m., in Mckelroy Auditorium.

Boyardton denies Athletes’ Work Checks Short

SIU Athletic Director Donald Boydston, has denied charges that athlete on at least two occasions failed to receive the full amount due them through the athletic work program.

At the Student Council hearing on Athletic Department finances, Tuesday night, Boydston called on William Fenwick, student body president, to bring all complaints out into the open.

"It is hard to plan a program with people feeling there is something wrong in the Athletic Department," he said.

Boyardton said he had personally checked out statements made by Fenwick and found them "not to be true." Fenwick said his public statements are that "athletes have complained of not receiving the full paycheck due them. I still feel there is some basis for the statements." He said all statements and accusations could not be brought up "until the charges are substantiated."

"We have to determine whether Student Council wants to establish the validity of the charges by requesting athlete's cancelled pay checks from Springfield," Fenwick declared.

"I wish you would get the checks," Boydston returned.

"I know the charges are not true," he said. The athletic program was being harmed by "charges hanging over it."

George Graham, family housing senator, suggested "a board of some sort where athlete's complaints could go to be followed up."

Graham said a complaint board would also aid Student Council in future activity fee studies, because the board would become familiar with the athletic program.

"Now you are getting into something else," Boydston retorted. "I think I'll just turn my job over to you folks."

"I think you are being very negative, sir," Fenwick said.

Boyardton replied that he had been told that the hearing was being conducted by the Finance Committee and was surprised to find out that he was facing the Student Welfare Committee. He said he had come fully prepared to face questions on athletic finances.

Graham said he would like to make a request at this time for clarification of the student's status in the policy declarations of the National Student Association, and to bring to his attention the data that they were being violated at Southern but not at the other schools.

"Academic entrance requirements, maintenance of academic status, and all other academic (Continued on page 2)
Diplomat Says America Helps Pakistan Grow

Pakistan is the fastest developing country in Asia today as a result of U.S. support, a Pakistani diplomat told an SIU audience Wednesday night.

M. Masood, a minister in Pakistan's embassy in Washington, asked that his country is still underdeveloped. But he added that his countrymen are dedicated to the hard work that is necessary for economic progress and better education.

Masood spoke at a meeting of the International Relations Club in Morris Library Auditorium.

"The greatest enemy of freedom and the greatest friend of communism is poverty," he said.

A man who is hungry will seek something better and this is the reason Pakistan must achieve economic stability, he added.

Despite the shadow of communism that hangs over his country, Pakistan has aligned itself with the free world powers because of the "social, religious and historical values felt by the Pakistani people," he said.

Masood also called on the United States to facilitate negotiations to bring feuding India and Pakistan closer together for the benefit of free Asia.

Masood said that this union of India and Pakistan relations would be very meaningful to Asia, because Pakistan and India are the core of Asia.

Five Party Boys Face Suspension

University disciplinary officials have recommended for suspension one of five students who were reportedly having a noisy party at their trailer last week.

Authorities said the student admitted breaking a window in a nearby trailer and having mixed group parties at which alcoholic beverages were served to underage persons.

The group was also ordered to make restitution for the broken window and other damages.

Basketball team participated in the Evansville tournament during final week last quarter and asked Boydston if a team did have the option, or should have the option, to defer finals so that they could participate in athletic events during finals.

Boydston replied that the situation last quarter was unfortunate, but that the SIU intercollegiate Athletic Council has expressed the feeling that there should be a blanket exception for athletes with respect to deferment option.

Graham read furthermore: "All direct university scholarships should be based on financial need and on scholastic standing. No scholarships shall have athletic ability as a sole condition for their awarding."

Boydston said this was the written policy of the Athletic Department.

"No scholarships are given solely on athletic ability," Graham asked.

"To be honest," Boydston said, "I recommend very few scholarships to students unless they have athletic ability."

Arthur Swanson, coordinator of financial assistance, has the final say on our scholarships, he said.

Graham asked Boydston about the athletic tutoring program.

Funds for tutoring come from gate receipts and sale of programs, Boydston said.

"I was Mr. Piccone ever acted in this capacity?" Semnick asked, "No," Boydston replied.

The hearing then continued, more relaxed, with questions and answers on the fiscal problems of the Athletic Department, Boydston said SIU's food and lodging level of its athletes on the road was far below most schools.

Before leaving, Boydston said he would inform the Student Council by today whether his budget request will bring athletes living standards on the road up to those recommended.

Graham said the Student Council committee's program recommendation would be presented to council.
Income Tax Assistance
For Students Starts Today

A cooperative effort goes into operation at 10 a.m. today to assist students and any member of the SIU community in filling out their income tax forms. The deadline is the immediate future; April 15.

The members of Alpha Kappa Psi, professional business fraternity, are offering their services free of charge.

The Student Activities office has arranged the space.

Ron Wolford, president of the fraternity, said the office, Room A of the University Center, will be staffed daily from 10 a.m. to 1 p.m. He said the students will profit by the experience and the students who need help, will get it.

Other activities which will be undertaken today include a graduate coffee hour, jointly sponsored by the Graduate School and the Office of Student Affairs. Special invitations went out to the staff of the libraries in the library's day's affair.

All graduate students are invited. The time is 11 a.m. in the Mississippi Room of the University Center.

Ice will be available for those who make their coffee on the rocks.

In other matters, the following events have been scheduled for today:

Morris Theatre will hold a rehearsal in Shryock Auditorium at 9 a.m.; Pre-professional Agriculture students will be held all day at 10 a.m.; and, Agricultural economics majors, will meet in the Morris Room Seminar at 10:10 a.m.

There will be a health and audio-visual aids conference for student teachers in the Student Theatre starting at 3 p.m. Last afternoon events include Women's Recreation Association volleyball in the Women's Gym at 4 p.m.; Pi Delta Epsilon, college publication fraternity, meeting in Room C at 4 p.m.; and an Angora brooch sale, called for Gym 114 at 5 p.m.

One meeting is called for 6:30 p.m. The Christian Science Organization will meet at that time at 708 W. Mill Street.

FIVE co-operative
students interested in
home economics as a
possible career will converge on
the campus from some 65 com-
partments of the state Saturday
for a "Highlights in Home
Economics" program.
Sponsored by the depart-
ments of food and nutrition
and of home economics educa-
tion, the program will em-
phasize the variety of careers
open to trained home econo-
mists, through a panel of
student speakers; a play, "The
day the Sky Went to School,"
by Southern Players; a student
food demonstration; a group
of films, and exhibits in the
Home Economics Building
prepared by area high school
homemaking departments.

The visitors will be wel-
come by Mrs. Eileen B.
Quigley, dean of the School
of Home Economics, and W.J.
McKeefery, dean for academic
affairs. Southern's Male Glee
Club will give a short concert at
the morning session.

Joyce Hurson, student from
Seccas, will preside at the
general session in Shryock
Auditorium starting at 9 a.m.
Students who will appear
on the careers panel include
Joyce Breymeyer of Orona,
Cindy Milligan of DuQuoin,
Bonnie Soderquist of Ever-
green Park, (9224 S. Trum-
bull); Doris Osborn of Carter-
ville, Sheryl Walquist of Car-
bondale, Norma Benner of Mt.

McMillen of Ocala, Fla;
Deanna Kline of Casey, Barbara
Pulley of Marion, Nancy
Weess of Pocahontas, and
Joyce Shipp of Springfield.
The food demonstration on
pastry making will be pre-
sent by Alice Naurer of
Galatia.

Nine Graduate Students Receive
Science Foundation Fellowships

Nine SIU graduate students
have received National
Science Foundation Fellowships.
It has been announced by David
Kenney, assistant dean of the
Graduate School.

Five co-operative graduate
fellowships are for work at
Southern during the 1964-65
academic year. There also are
four NSF summer fellowships
at Southern for graduate
researching assistants. Stipends
average $200 per month plus
dependency allowances.

Co-operative graduate fel-
lowships went to James L.
Phillip, Carbondale, in psy-
chology; Robert D. Klemm,
Carterville, in zoology;
Matthew H. Hill, Olympia,
Washington, in anthropology;
Rose-mary E. McClain, Rosamond,
III., in geology; and George
Underbrink, Quincy, in botany.

Summer fellowships went to
U.S. Deeds, Carbondale,
in chemistry; Kenneth L.
Weiss of Carbondale, in
carroll.; Martha A. Straw,
General, in zoology; and Donald K.
Jewell, Carly, Ind., in psy-
chology.
FUTURE FARMERS — Newly elected officers of the SIU chapter of the Future Farmers of America are (left to right, front row) Alakh Kelley, Lawrence Chambers, president, and Donald Knop, secretary. And (back row, left to right) Ralph lives.

Third Visit:

University Museum Scientists Exploring Mexican Mountains

After nine months spent analyzing and recording artifacts from two previous expeditions, scientists from the SIU Museum are off again for a third season of archaeological explorations in the mountains of Northwestern Mexico.

A detailed report of the first year's work has just been completed by Museum Director J. Charles Kelley and forwarded to the National Science Foundation, which is financing the two-year project in cooperation with the University, and to the Mexican government, which authorized the investigations and is participating through its National Institution of Anthropology and History.

Museum field crews have worked in the area, known as the northern frontier of Mesoamerica, since 1952. The area spans the Mexican states of Durango, Zacatecas, Jalisco, Guanajuato and San Luis Potosi.

Excavations have searched for evidences of the early periods of the Chichihuites and Canutillo cultures (probably 300 to 800 A.D.) and seeking to trace the pattern of fluctuation of the frontier as the culture shifted from nomadic hunting and fishing tribes to a citizenry of fortified villages and religious ceremonial sites.

"There is a chain of large fortress-like ceremonial centers distributed along the northern frontier," Kelley explained, "apparently guarding it against nomads to the north and east. But it is evident that these were abandoned, reoccupied and rebuilt during succeeding periods. Sometimes the villagers took their gods with them, sometimes they destroyed them before departure."

Previous expeditions have yielded some 1400 specimens of whole or restorable pottery vessels, figurines, bells, tools, jewelry and weapons, as well as almost 3,000 potsherds or broken pieces of pottery.

During the next three to four months Kelley and his party will continue work in northern Zacatecas, then will move 150 miles into extreme and isolated northern Jalisco, to dig at the site of Totoate where valuable archaeological materials were found about 1900 by the noted archaeologist Alex Hellicks.

Accompanying Kelley this week will be Ellen Abbott, supervisor of Museum laboratories; Philip Weigand, a doctoral degree candidate in anthropology, and his wife; and Carl Kiefer of Carbondale, a student, who will serve as photographer. They will be joined for part of the time by Dr. Bertha Dutton from the state museum of New Mexico, and an anthropologist from the Mexico institute who will also work with the field expedition.

Later in the season other University scientists, Pedro Armillas of the Museum staff and Walter W. Taylor, chairman of the anthropology department, will also go to Mexico to work on other phases of the Mesoamerican Frontier project.

Peace Union To Meet

The Student Peace Union will meet Friday at 7:30 p.m. in Room C of the University Center.

The program will include a briefing on current tests ban negotiations and plans for a campaign to gain popular support for the treaty. The meeting is open to all interested persons.

We Fail to Teach Our Teachers

Requirements Frozen Into Law by Self-Serving Group Repel Good Students

James D. Knoerz in The Atlantic Monthly

James D. Knoerz received his Ph.D. in American studies at Washington University. After teaching at several universities he is now serving as president of the Council for Basic Education, and recently completed a twoday study of 'teacher education.'

The education of American teachers, school administrators and other professionals is more often a failure than a success. It has become an unwieldy, slow-witted, bureaucratic machine, standing on a flimsy foundation built on sand. It is a device, taking its substance from the academic fields, all of which it has digested, while adding little that is uniquely its own.

Although education does not yet know how much or what kind of professional preparation is needed by teachers and administrators, it has constructed mandatory training programs on the assumption that it does. These remain frozen in law as state certification requirements.

The principal subjects are almost never taught and the textbooks almost never written by persons who are themselves trained experts in teaching. Frequently, a strong strain of anti-intellectualism is discernible.

There is a universal devotion to the "discussion method," which must drive the student, as it does in public schools, to a semblance of general-ization, that is, to a randomizing of his education. Success has reduced the field into arrogance and administrative hypocrisies.

The intellectual caliber of the education faculty is the fundamental limitation of the field. Any long-range improvement in teacher training will have to wait upon improvement in those who staff schools and departments of education.

Cardinal Newman, who wrote one of the great treatises on literati education, said only one reason for courses: "The general principles of any study you may learn by books at home; but the detail, the colour, the tone, the air, the life which makes it live in us, you must catch all those from those in whom it already lives." It does not live in the greatest part of the present education faculty.

Weak students gravitate to weak faculties. Education students, along with students in agriculture and business administration faculties, fill the poorest part of the academic ladder. Every major study has arrived at the same conclusion: education students show up badly. The idea acceptance of this condition deteriorates better faculty from entering the field and raising standards that would attract better students into better programs.

No beaver is being made, so far as I can see, on admissions standards at the all-important graduate level. Traditionally, it is often easier for one to be admitted to graduate study in education than to undergraduate programs. The masters and doctors turned out become administrators who hire teachers, conduct curricula, and make standards in public schools; they also staff professional associations, accrediting agencies, and become professors of education.

The education courses themselves deserve more criticism. If our college courses are indeed passive, repetitious, dull and ambivalent — incompletely — two factors make them this way: the limitations of the instrument and the limitations of subject matter.

Our Teachers...
1963 Tennis Team Called 'Strongest SIU Ever Had'

‘This is by far the strongest tennis team SIU has ever had,' Dick LeFevre, SIU tennis coach, said after the Salukis opened their season with impressive victories over Ohio State and Tulsa universities.

SIU dropped the Ohio State Buckeyes, 9-0, and Tulsa, 5-1. Lance Lumsden, Pacho Castillo, Bob and Roy Sprengelmeier, Wilson Burge and George Domenech are the reasons for LeFevre’s early optimism.

Lumsden is a sophomore from Jamaica and has won both of his singles matches so far. He is perhaps the best tennis player SIU ever fielded.

Castillo is a junior and captain of this year’s tennis squad which figures to cause opponents considerable grief. He was Most Valuable Player on last year’s squad.

The Sprengelmeiers brothers are back after a year’s absence. Bob and Roy came to SIU from Dubuque, Iowa, where they attracted national attention with their tennis ability.

Bob and Roy are undefeated in singles play in the two matches to date. In doubles they are also unbeaten.

Burge is a sophomore netman from Danville and currently in his first year of eligibility for LeFevre’s tennis squad. Burge is playing at the number five singles position and won his only appearance this season.

In doubles play he teamed with Bob Sprengelmeier to win a match against Tulsa. Burge and Sprengelmeier are the only senior on this year’s squad which reflects the.

In San Francisco:

Kristoff, Houston, Hartzell Enter National AAI Wrestling Competition

Larry Kristoff, Ken Houston and Bill Hartzell will represent SIU this weekend in National AAI competition at San Francisco’s Olympic Club.

Kristoff, a Carbondale Community High School product who two weeks ago barely missed winning the heavyweight NCAA title, will be entered while both Houston and Hartzell will be competing in the 191-pound flight.

Houston, a former Oak Lawn prep star who has captained the Salukis for the past two seasons, was selected as the most outstanding performer in the NCAA’s college division meet three weeks ago.

Both he and Kristoff are veterans of national competition after placing second in Pan-American Games trials last December.

Hartzell, who prepped at St. Louis’ Ritenour High School, is one of the most promising sophomores on Southern’s squad, despite working behind Houston. Hartzell has compiled a fine 4-1 record in collegiate action and recently received a third-team All-American rating by Wrestling News.

In reaching the NCAA heavyweight finals, Kristoff defeated Oklahoma State’s top-ranked Joe James. But then lost a 3-1 decision to Syracuse’s Jim Riniee in the title bout.

Houston will be winning up his collegiate career with the meet.

PACHO CASTILLO, CAPTAIN OF SIU’S TENNIS SQUAD

get Lots More from L&M

more body in the blend
more flavor in the smoke
more taste through the filter

It’s the rich-flavor leaf that does it! Among L&M’s choice tobaccos there’s more of this longer-aged, extra-cured leaf than even in some unfiltered cigarettes. And with L&M’s modern filter—the Miracle Tip—only pure white touches your lips.

Get lots more from L&M—The filter cigarette for people who really like to smoke.
Gym Coaches Elect Meade

Bill Meade, SIU gymnastic coach, was elected first president of the recently-formed National Association of Collegiate Gymnastic Coaches last weekend at Pittsburgh.

Meade, a former collegiate talent at Penn State, has directed the Salukis to three straight second-place finishes in NCAA championship competition.

The NACGC is a member organization of the United States Gymnastics Federation.

Student Art Show
In Magnolia Lounge

Lee Spalt, a fine arts student and candidate for the master of fine arts degree, will exhibit a group of his works in the Magnolia Lounge of the University Center from April 15 to May 1.

The group includes six paintings, 20 prints and several woodcuts.

CRAB ORCHARD MOTEL & CAFE

(A sign points the way)

SOUTHERN LEW HARTZOG HOLDS ARMFUL OF TROPHIES SIU WINS

Hartzog Pulls Southern From Track Poor House

It was just three years ago that SIU’s track fortunes appeared on the brink of disaster, but then Lew Hartzog came to SIU and now it ranks with the best track schools in the U.S.

Last year SIU finished fourth in the NCAA track and field championships with only three men. It was the first time Southern had competed in this event.

This spring Hartzog has the track squad working out hard in hopes of doing well in the various relay meets and the nationals.

"Last year’s finish was simply tremendous," Hartzog commented before leaving for Austin (Tex.) and the Texas Relays. "I fully hope we will do well in meets this spring."

Hartzog would not comment on moving up in the final point standings. He is concentrating on the Texas, Kansas, Drake and California Relays which will bring some of the U.S. top track schools together.

This spring SIU will be counting on veterans Jim Duperre, Bill Cornell and Brian Turner to lead the way. Last year the trio accounted for all of SIU’s 26 points in the NCAA meet.

George Woods, Bob Brandt, Bob Green, Al Pulliam, Jim Stewart, Ed Houston, John Saunders and Ed Houston will be thrown into score points in meets this spring for the Salukis.

"This spring we will compete every weekend until the nationals in Albuquerque (N. Mex.)," Hartzog said. "We should do well but we will be competing against the best."

"Last year for example Nebraska went to the Drake Relays with hopes of winning a relay event," the coach added. "We were relaxing in our yellow upholstered chair being Mickey Andrews Stadium.

"But we won the distance medley event. They have been 25 years trying to win a relay at Drake but we were competing for the first time and won. You can imagine how mad they were," Hartzog continued.

"The students here have an excellent chance to see some of the U.S. top track men perform here."

"This spring the Chicago String Quartet will conduct an open rehearsal Sunday for the weekly "Creative Insights" program at 7:30 p.m. in the University Center Gallery Lounge.

Assignment: build superior stamina into our cars!

Result: Ford-built cars demonstrate outstanding durability in competitions like the Daytona 500

Results of recent competitive events prove dramatically the durability and reliability of today’s Ford-built cars. Our cars swept the first five places in the Daytona 500 for example. More important to you-Ford-built entries had the highest ratio of finishers in this grueling test of stamina! Less than half—just 23—of the 50 starters finished; 13 of them were Ford-built!

Competitions such as the Daytona 500 are car killers. Piston rings can fail, transmissions can be demolished and engines blow up under these maximum efforts. It’s a grueling demand for total performance and Ford-built cars proved they could take it better than any of the others.

Quite an eye-opener for car buyers. And conclusive proof that superior engineering at Ford Motor Company has produced more rugged engines and transmissions, sturdier bodies and frames and better all-round durability for today’s Ford-built automobiles.
