ISA Week Discontinued; Cost, Time—Reasons

Members of the Independent Student Trustee Association (ISTEA), in a 25-to-0 vote, have ended their efforts to see the pamphlet continued, the proposal having been defeated by a vote of 25 to 0 last week.

ISTEA had been planning to present the pamphlet, which was entitled "The Cost of Student Life," at the University of Illinois at Urbana-Champaign. The pamphlet was designed to inform students about the costs of attending college, including tuition, fees, room, and board.

However, in a statement released yesterday, ISTEA officials said that the group had decided to discontinue its efforts to publish the pamphlet due to issues related to cost and time.

"We have been working on this project for over six months," said ISTEA President John Smith. "We have encountered numerous challenges, including cost and time constraints, which have made it difficult for us to proceed."
Let Us Have Ball!

BSF students who are in the off season, SBF students who are in the off season, and SBF students who are in the off season, all are welcome to participate in the SBF Student Ball. The ball will be held on Thursday, April 11th, at 8:00 PM in the SBF Student Center. The ball will feature a live band, a dance floor, and a cash bar. Tickets are $20 per person and can be purchased at the door. For more information, please contact the SBF Student Center at (555) 555-5555.
Southern Illinois Birds, Mammals In Wildlife Research Habits Reference Collection

"The project had a slow start, but we now have good collections of mammalian at Southern Illinois and of plant material, including seeds," said Dr. J. C. Jones, assistant professor of biology.

"We are speaking of the found in the Southern Illinois Reference Collection here by Wildlife Research. It began as a result of the need for information about various species of plants. While the information is still being gathered, it is essential for the collection in the study of these species. At present, our collections are at the point of being used," Dr. Jones explained.

One Million Years Of Change... Offer Course In Evolution

How did man and all the other living things become alive on earth? Did man evolve from other animals or did he come into existence once and then forever remain as he is today? These are some of the questions which man has tried to answer for centuries. The problem has been divided into two main steps. Evolution and selection. Evolution is the idea that all living things have evolved from simple beginnings and have become more complex over time. Selection is the idea that some of these changes have been passed on to future generations through the process of natural selection. This new course will take up one of the problems which has been discussed many times. The problem of evolution, which was the one which was chosen for the first presentation.

Problems' Course To Begin In March

Dr. J. C. Jones, director of the course, has chosen a number of subjects which he feels are of great importance to the study of evolution. These subjects will be discussed in a series of lectures, each of which will be given by a different expert in the field. The course will begin in March and will continue through the summer.

THE EGYPTIAN, CARBONDALE, ILLINOIS, FRIDAY, FEBRUARY 19, 1956
