REEMPLOYMENT OFFICE IS TO OPEN TODAY

A temporary office is being opened in the public-assistance building in Carbondale for the purpose of accepting applications for employment in the Federal Government.

Circumstances surrounding the establishment of the office are explained by Paul Quinn, the public-assistance director.

"The office will be open during the regular business hours of the office, and it will be staffed by trained personnel who have been selected by the Federal Government," Quinn said.

"Applicants will be required to present identification and complete an application form, which will be processed and returned to them in a timely manner."  

HACKETT-DAVIS RECITAL GETS GOOD RECEPTION

Operative Tenor Better Of Two; Largely On Experience

Practically all critics agreed that the tenor performance by Mr. Davis, the new member of the Hackett-Davis recital, was much better than the previous one. Mr. Davis, who is known for his tenor voice, was praised for his clear pronunciation and expressive singing.

"His voice is remarkably clear and expressive," said one of the critics. "It is a pleasure to listen to him sing." The audience was also impressed by his musical understanding and stage presence.

COUNCIL MEETS; COMMITTEE FOR ADVICE NEEDED

The council met last night to discuss the matter of the committee for advice needed. The committee was established to provide advice and counsel to the council on various matters.

"We need a committee to help us make important decisions," said one council member. "I think we should appoint someone to the committee at the next meeting." The council members agreed to appoint a committee at the next meeting.

UNDERGROUND WIRING SYSTEM TO BE INSTALLED

Transformers Are To Be Installed In Current

For those who use both electricity and gas, the installation of transformers will be a great convenience. The transformers will be used to convert the electrical energy into a form that can be used in the home.

"The installation of transformers will make it easier to use both electricity and gas," said one council member. "It will also save money on the electricity bill." The council members agreed to proceed with the installation of transformers.

HAYDURF FLOOR AND STEEL STAIRS IN OLD SCIENCE

Library Walls To Have Blue And White Color Scheme

The old science building will be renovated in the near future. The walls will be painted blue and white, and the floors will be replaced with new hardwood.

"The renovation of the science building will make it a more attractive place," said one council member. "I think the blue and white colors will look great." The council members agreed to proceed with the renovation of the science building.

1937 OBELEISK TO BE CHANGED; BOOK SMALLER

The current obelisk in the center of the town will be changed to a smaller one. The obelisk will be made of bronze and will be inscribed with the words "In Memory of the Fallen of 1937." The size of the obelisk will be reduced to make it more accessible to the public.

"I think the smaller obelisk will look better," said one council member. "It will also be easier for people to read." The council members agreed to proceed with the change.

PRACTICE ASSIGNMENTS SHOW STEADY RISE

The practice assignments of the students in the music department have shown a steady rise. The assignments have been increased by 20% in the past year, and the students have shown a marked improvement in their performance.

"I think the increase in practice assignments is helping the students improve," said one music teacher. "They are working harder and showing better results." The music department will continue to increase the practice assignments to help the students improve.

MACDOWELL CLUB GIVES ORATORIO TODAY

Hendelassum's "Eliphas To Be Given By Choral Group

EDWIN COCKRUM WILL SING LEAD

Other Soloists By McCallum, Friedlein, Bower, Hancock, Jones

The MacDowell Club will present today's concert featuring an oratorio composed by Hendelassum. The oratorio will be sung by the Choral Group, with Edwin Cockrum as the lead soloist.

The Choral Group will be joined by other soloists, including McCallum, Friedlein, Bower, and Hancock. The performance will be held in the auditorium at the MacDowell Club.

OUTLINE FORM OF STADIUM NOW TAKING SHAPE

With approximately ten feet of earth removed, the stadium is now taking shape. The work is being done in phases, with the final phase to be completed next week.

"I think the stadium will be ready for the games," said one member of the construction team. "The work is progressing smoothly, and we expect to complete the stadium on time." The construction team will continue to work on the stadium to complete it for the games.

KAPPA PHI KAPPA INDUCTION

NEW MEMBERS

At its regular meeting last Thursday evening, a new chapter of the Kappa Phi Kappa fraternity was installed. The chapter was installed in honor of the new members who have joined the fraternity.

"I think the installation of the new chapter is a great accomplishment," said one member of the fraternity. "It shows that the fraternity is growing and becoming stronger." The fraternity members will continue to work to make the chapter a success.

The installation of the new chapter was followed by the installation of the new officers. The new officers were installed by the national headquarters of the fraternity.

MUCKLEOR MAKES ADDRESSES AT TWO 4-H CLUB MEETINGS

This evening, Muckleor made addresses at two 4-H club meetings. The first meeting was held at the Crystal Lake Club, and the second meeting was held at the Forest Club.

"I think the addresses were very well received," said one member of the 4-H club. "Muckleor always makes great addresses." The 4-H club members will continue to work with Muckleor to learn more about agriculture and other topics.

FRENCH CLUB HEARS STRUKTUR DISCUSSION IN FRENCH ART

At the meeting of the French Club held last Tuesday, the topic of Struktur discussion in French art was discussed. The discussion was held in French, and the members were able to learn more about the subject.

"I think the discussion was very interesting," said one member of the French Club. "It was great to learn more about Struktur in French art." The French Club members will continue to learn more about French art and other topics.

GERBACHER AND STEAGAL WRITE SCIENTIFIC PAPER

Doctor Mary H. Weijert and Staff W. C. Gerbach of the chemistry department have collaborated on a scientific paper. The paper is titled "Chemistry in the Modern World," and it will be published in the Journal of Chemistry.

"I think the paper will be a great addition to the journal," said one member of the chemistry department. "It shows that Gerbach and Weijert are doing great work." The chemistry department members will continue to work on scientific papers to further the knowledge of chemistry.

THE REAL DESIGN TO BE FOLLOWED DURING WINTER

The real design to be followed during winter is to be well prepared. The winter season brings many challenges, and it is important to be prepared for the worst.

"I think it is important to be well prepared for winter," said one member of the community. "It is better to be prepared than to be caught off guard." The community members will continue to plan for winter to ensure a safe and successful season.

GREETINGS FROM THE SUMMER SESSIONS

This summer, the summer sessions will be held at the community center. The sessions will be open to all members of the community, and they will be held during the months of June, July, and August.

"I think the summer sessions will be a great addition to the community," said one member of the community. "It will be a great opportunity to learn and have fun." The community members will continue to work on the summer sessions to make them a success.
Among the many things to be hoped for in the near future is the establishment of a central library in each of the large cities of the country. This library would be open to all citizens of the city, without regard to race, color, or creed. It would be a place where books and periodicals could be borrowed and returned, and where reading material of all kinds could be obtained. The library would be equipped with the latest in library technology, including computerized cataloging and searching systems, as well as audio-visual materials. It would be a place where people could come to learn, to be entertained, and to grow in knowledge and understanding of the world around them.

Among the books that would be available in the library are those that are currently out of print or unavailable in other libraries. This would include rare and valuable books, as well as modern classics that are in high demand. The library would also have a collection of materials on all aspects of the humanities, including literature, history, philosophy, and the arts. There would be a strong emphasis on works that are currently being published in the United States, but there would also be a selection of works from other countries.

The library would be staffed by knowledgeable and experienced librarians who would be available to help patrons find the materials they need. There would also be reading rooms where patrons could sit and read in comfort. The library would be open seven days a week, and there would be extended hours on weekends.

The establishment of a central library in each of the large cities of the country would be a significant step forward in the development of a culture of reading and learning. It would provide a vital resource for all citizens, and would help to ensure that everyone has access to the materials and information they need to succeed in today's world.

The next step would be to establish similar libraries in communities of smaller size. These libraries would be smaller in size, but they would still provide the same kind of valuable resources and services. They would be a place where people could come to learn and grow, and where they could find the materials they need to succeed in their personal and professional lives.

In conclusion, the establishment of a central library in each of the large cities of the country, and in communities of smaller size, would be a significant step forward in the development of a culture of reading and learning. It would provide a vital resource for all citizens, and would help to ensure that everyone has access to the materials and information they need to succeed in today's world. We encourage all citizens to support this important initiative, and to work together to make it a reality.
QUESTION VALUE OF VACCINATION

R. B. Brown, C., W. Goodwin and D. R. Halil and C. E. J. of the at the that we have been doing for over 100 years, and we are going to continue to do it for the next 100 years. The value of vaccination has been proven in the past and will continue to be proven in the future.

In horse racing, vaccination is a must. It protects the horses from the diseases that are common in the industry. It is an investment in the horses and the industry.

The value of vaccination has been proven in the past and will continue to be proven in the future. It is an investment in the horses and the industry.

The value of vaccination has been proven in the past and will continue to be proven in the future. It is an investment in the horses and the industry.

The value of vaccination has been proven in the past and will continue to be proven in the future. It is an investment in the horses and the industry.

The value of vaccination has been proven in the past and will continue to be proven in the future. It is an investment in the horses and the industry.

Delta Sigma Epsilon

Delta Sigma Epsilon is a national fraternity in the Delta Sigma chapter at the University of Kansas. It was founded in 1894 to promote educational activities and to provide opportunities for leadership in various fields.

John Stegeman is employed by the University of Kansas in the area of Educational Affairs and is responsible for the Delta Sigma Epsilon chapter.

E. T. Eddowes is a Phi Beta Kappa student at the University of Kansas, and is also a member of Delta Sigma Epsilon.

The Delta Sigma Epsilon chapter is located in the Phi Beta Kappa Sorority building.

On Saturday, November 12, Delta Sigma Epsilon will be hosting a social event at the University of Kansas.

The event will feature presentations by members of the chapter, as well as a reception for new members.

Delta Sigma Epsilon is open to all students who wish to join, and does not discriminate based on gender or race.

For more information, please contact E. T. Eddowes at the University of Kansas.
