Benziger Named ‘Plan A’ Director

James G. Benziger, professor of English, has been appointed director of "Plan A," Southern's special honors program for academically talented students.

Benziger replaces Claude Coleman, also a professor of English, who headed "Plan A" since it was started in 1961. Coleman has been appointed chairman of a new student-faculty commission to study the role of the University in society, and participation of students in University affairs.

A member of the SIU faculty since 1950, Benziger holds both the bachelor's and doctoral degrees from Princeton University. At Southern, his teaching assignments have ranged from television lecture classes on English literature to direction of a summer-long seminar for SIU students conducted on the campus of Oxford University, England.

Benziger is the author of "Images of Eternity," a book on poetic imagination which was published by the SIU Press in 1962. His other writings include a number of publica-
tions in scholarly journals.

Before coming to Southern, he taught at Northwestern and New York universities and Carleton College, Minn.

Regular Schedule of Classes Starts

* * *

161 Students Overassigned In Housing

This fall, 161 students have been overassigned in the various University housing areas, according to Joseph B. Gasser, supervisor of contracts.

This is down considerably from last year when the University had to place extra students in regular rooms to handle the overflows.

Reason for the overassignments, according to the Housing Office, is to allow students to enter school and live in the temporary quarters until vacancies occur in the regular rooms.

Gasser said he expected most of the overassigned students to be moved into permanent quarters by the end of the first week, filling vacancies left by students who do not arrive at their rooms within 24 hours of the beginning of classes. The rest will be given permanent rooms during the coming weeks as vacancies occur. All students living in temporary quarters were notified of the fact before they signed contracts, so will not be eligible for reimbursements.

Overassignments include six students each of two men's and three women's halls at Thompson Point. At University Park there are 32 overassigned by Woody Hall and 60 in the two triads now open. Woody Hall was overassigned 24 students and Southern Acres 15.

Students are housed in base-
ments in all areas except Woody Hall, where they are housed in the lounges, Gasser said.

Car Registration Deadline Nears

The office of Student General Affairs issued a reminder to all students with automobiles that all cars must be regis-
tered before Monday.

A student with an unregistered car after Monday will be subject to a $50 fine and/or other disciplinary action for a first offense, and suspension for a second offense.

Morris Opens Series

Fall Freshman Convocations Open Today;
Record 4,481 Enrolled on Credit Basis

Enrollment Mark Expected Again

The fall quarter started for real today.

Regular day classes began at 8 a.m., although a few classes were held Wednesday night.

The start of every quarter usually brings record enrollment and this year promises to be no exception. Actual figures will not be available until the first week in October, but SIU officials are expecting an increase of more than 13 per cent over last year's 20,471 students.

More than 3,000 new freshmen are getting their first taste of college life.

Although construction of classroom and office space is struggling to keep pace with enrollment, no limits have been set yet. The Board of Trustees voted this summer to retain the "open-door policy" to admit as many students as physically possible.

Program changes "for the convenience of the University" rather than for personal preference will be processed today and Friday.

This includes changes that must be made due to errors and conflicts. All students seeking program changes will be screened at the Arena registration area.

Tuesday is the last day to register for the fall quarter or to add a course without written approval of an aca-
demic dean.

President Delyte W. Morris will open the 1965-66 Fresh-
man Convocations with an ad-
dress to new students at 10 a.m. and 2 p.m. in Shryock Auditorium.

Paul Hubs, convocation director, will introduce Morris.

A record 4,481 students have enrolled for convocation credit this quarter. To receive credit, these students must attend at least nine convoca-
tions each quarter including at least five from the regularly scheduled Thursday sessions.

The full schedule:

Sept. 30: Henry L. Scott, "Man and a Piano."

Nov. 4: Earl Ubell, "Will Science Destroy Society?"

Nov. 11: Gordon Hall, "Extremism: Sickness of the Sixties."

Council Meeting Set

The University Council will meet at 2 p.m. Oct. 22 in the Renaissance Room of the Uni-
versity Center.

Nov. 18: Craig Spence, "Viet Nam Now."

Nov. 20: Thanksgiving program.

Dec. 2: "Touring Theater."

Dec. 9: "Holiday Convocation.

Program Changes

Council will

Nov. 1: "Supplementary Convocations:

Nov. 3: Community Concert

Nov. 8: Audubon program.

Nov. 12: "How to Get Off." 8: First Chamber Dance Keene.

Convocations Will Hear Morris, Foreign Student Coffee Hour Set

President Delyte W. Morris will address the Freshman Convocations at 8 a.m. and 1 p.m. in Shryock Auditorium.

New Student Week leaders will have a buffet at 6 p.m. in the Faculty Room of the University Center.

Summer Music Theater rehearsal will be at 7 p.m. in Shryock Auditorium.

Freshman Talent Show rehearsal will be at 7 p.m. in Furr Auditorium of University Center.

An International Relations Club coffee for foreign students will be held at 7:30 p.m. in Room D of University Center.

The Baptist Student Union will meet at 7:30 p.m. in the Baptist Foundation.

The Students for Democratic Society will meet at 7:30 p.m. in Room D of University Center.

Edward, My Son

"Edward, My Son," the story of a mother and father fighter pilot and their son, will be shown on "Film Classics" at 9:30 p.m. today on WSIU-TV. Spencer Tracy and Deborah Kerr star in the movie.

Other programs:

5 p.m. What's New: A visit to the Bahamas.

6:30 p.m. The French Chef.

8 p.m. Passport 8: "High Road to Danger," a motorcycle trip across the Arizona desert.

8:30 p.m. Chamber Concert: Sinfonia in D minor for two flutes and strings by Bach, trio in E minor, "Dinky," by Dvorak and "Ragtime for Eleven Instruments" by Stravinsky.

Freedom Demands Prudence

The Carbondale campus was relatively quiet this summer. New Student Week always takes place by being almost constant from the 50 states and as many foreign countries.

These talks were not even the Movement Against RAM, and an American student is the Office is throwing an extra gathering in University housing in these quarters the Housing in these benefits. What all amounts to is that SIU, like those of other universities, have been seeking a more active role in university affairs.

Harry Golden, editor and publisher of the Carolina Horribles, observed on a network television show that the American student is assuming a political role, a role that his foreign counterparts have long enjoyed. Golden cited the role of student demonstrators in the deposing of Korea's President Syngman Rhee.

The Berkeley students achieved a measure of success in their struggle. This year they enjoy a more lenient university policy and have considerably more "freedom of the press." Although many people regard this wave of student action lightly, with contempt or derision, few deny that America can be transformed into a significant political force in both national and international relations.

But it is also true that success or failure of student action is likely to determine major decisions for the sake of America's expediency, rather than with regard for the validity of the cause.

Ep Rapetti

A Slob By Any Other Name . . .

Each year SIU has allowed its football team to live together in South Hall during the pre-school training period.

This is no doubt beneficial to the team, since temporary housing arrangements and the coaches have ready access to each player during practice and games.

The Athletic Department should realize, however, that by allowing the team to stay in these quarters the Housing Office is throwing an extra burden on itself, a burden that can only be maintained for a few hours a team the move outted until the first residents move in, yet rooms must be cleaned and set in order.

This year the cleanup crew worked diligently and all players would be out of the hall by 8 a.m., Sunday, allowing two hours for cleaning. With cooperation from the football team, the Housing staff should have been adequate.

However, several players did not leave until just before the permanent residents moved in. When they did leave, many rooms were akin to garbage dumps. The cleanup crew found leftover food, half-full milk cartons, and piles of waste paper.

No paying student would ever be allowed to vacate a room in such a state.

We think that the minimal rules for cleanliness and order in University housing should apply to the football room as well as to paying guests. We feel that all activities that impede the proper use of the rooms might be considered for the permanent residents movement.

U.S. Children Pre-Condemned to Mediocrity; Russian Youth Are Assumed to Be Capable

By Robert M. Hutchins

In the United States we talk about universal education, but we believe in universal schooling because it is democratic, not because it keeps children out of worse places until we are ready to have them go to work.

The benefits of "schooling" are real and economic, and we think that all should share.

The benefits of "education" are much greater, and we think that in these benefits only the foible is eliminated.

The massive support received by vocational training is a clear demonstration of what education means to a people that have to work.

Our "democratic" school system is indeed based on a true democratic principle, the principle that some people have more minds than others do not have.

Who those who have minds and those who have not are given vocational training and shielded off into the labor market as soon as possible.

All the evidence from every country is that the difference we think of as a difference in ability is merely a difference in the environment in which the pupil is brought up. Everybody has a mind, everybody's mind can be developed. A child's report from the dental system is not caused

by lack of mental capacity. It results from the shock experience of a child from a bad environment to the alien culture of the school. Recent studies of London and of Harlem show that the average child in these unfortunate areas never recovers from this shock. He becomes more and more in comparison with the sover end of his schooling he is other than when he began. Within the limits of testing his IQ has actually declined.

The Soviet Union has the idea that there are different kinds of people, some with minds and some without. Soviet children go to school at the age of fifteen they all go through the same program. They all study the same subjects: mathematics, biology, chemistry, literature, etc. They all take three years of a foreign language. Parts of the country below 50% literacy rate, that had not written language, now have flourishing universities and academies of science with a full panoply of modern education.

Those who are concerned about the future of our country, those who believe that we must improve our future lives in proving better than Russia's, might ask themselves where we are going to be in 1970. Our Union if we continue to shift on educational task.

De Gaulle Enigmatic About Far East Plans

By Alain de Leyer

Copley News Service

PARIS—Neither France nor the United States appears willing to change even slightly in their conflicting policies on essential issues facing the Western Alliance.

This is the impression gathered at the recent Franco-American talks in Paris—which turned out to be more show than substance.

Perhaps the principal result of the sessions was that President Charles de Gaulle and U.S. Undersecretary of State George W. Ball were to puncture a high-flying pallone, or as one U.S. official put it, "a high-flying souffle".

The "souffle" in question was the "De Gaulle dream" role as an intermediary or, better, as a mediator in the Vietnamese war.

Such a role, U.S. officials took pains to stress, was neither requested of De Gaulle, nor accepted by him. The in­­v­­an­t­­ce­­n­­u­­l­­a­tion on the subject was essentially based on a misunderstanding. A statement made recently in a television interview.

The statement was interpreted in some quarters in France as a desire to put to rest the idea that the United States had all the contacts it needs with Peking and Hanoi, and that it has no need of Gaulle diplomacy to communicate with either.

It was indicated that the conference amounted to a simple exchange of respect for views concerning both Viet Nam and the Atlantic Alliance.

De Gaulle is reported to have for some time the belief that the United States has all the contacts it needs with Peking and Hanoi, and that it has no need of Gaulle diplomacy to communicate with either.

Southern Continued to Make News This Summer

First of a Series

For 11,088 students, summer at Southern was just another term—full of studying, exams, and sultry, hot weather. In one respect, summer term at Southern remained unchanged from any other term; SIU continued to make news.

In addition to filling 47 summer issues of the Daily Egyptian, news of the University appeared in papers across the state and nation. Probably the most unpleasant were stories about the outburst at the University's Job Corps center at Camp Breckinridge, Ky. A week after SIU alumnus and Negro comedian Dick Gregory led a march of civil rights workers on the camp, charging discriminatory practices, 50 trainees started a riot outside a mess hall, injuring 14 persons. The riot was quelled soon after, and about 150 trainees left the camp. Racial conflict was first said to be the cause. Later, trainees gave poor food, waiting in line, a protection racket, thefts of clothing and money and idleness as reasons for their unhappiness with the government-supported anti-poverty program.

Camp officials took immediate steps in answer to some of the complaints. In other news, a Senate investigation of the running battle between the National Collegiate Athletic Association (NCAA) and the Amateur Athletic Union (AAU) followed SIU Athletic Director Donald N. Boydston's protest over a ruling that SIU's Women's Gymnastics Club was ineligible to compete in the June AAU championships. AAU officials ruled the team ineligible because of its participation earlier in the year in the United States Gymnastics Federation championships, which is affiliated with the NCAA.

Boydston sent letters of protest to President Johnson and Illinois' U.S. senator. Sen. Paul Douglas then asked Secretary of State Dean Rusk to investigate. The Senate inquiry followed.

Coach Herb Vogel received some consolation, however, when his two Canadian gymnasts, Gail Daley and Irene Haworth, placed one-two in the Canadian AAU Gymnastics Championships.

In other news, Gov. Otto Kerner unseated Republican John Page Wham, chairman of the SIU Board of Trustees, by appointing Democrat F. Guy Hitt, a Benton banker, to fill Wham's expired seat. The appointment, which was heavily criticized by key GOP state senators, changed the composition of the Board from a 4-3 Republican majority to 4-3 in favor of the Democrats.

Vice Chairman Kenneth L. Davis of Harrisburg was later named to serve as chairman of the Board until a permanent chairman is elected in January.

Likely the most pleasing news to students was the pay hike which became effective July 1, raising the minimum wage from 85 cents to $1 an hour. A month later, payday was moved back five days, from the 15th to the 20th day of each month.

General Studies to Transfer Offices to University Center

A local wag once said that SIU offices and departments do more shifting than a grand prix race driver.

As more and more space becomes available, shifts are made to increase efficiency. General Studies is moving to the second floor of the University Center, adjacent to the Sectioning Center.

Advisement and executive offices of General Studies will be in this area as soon as offices are ready.

J. H. W. Voigt, executive officer of the General Studies program, said that in addition to this new space, which will speed up processing of students, his administrative staff has been increased by three, and eight advisers have been added to the counseling staff.

Andrew T. Vaughan, former assistant professor of health education, has been named executive assistant in General Studies and will share administrative duties with Amin Black.

A secretary for advisement and a faculty supervisor have also been added to the staff.

Advisement and executive offices of General Studies will be in this area as soon as offices are ready.

J. H. W. Voigt, executive officer of the General Studies program, said that in addition to this new space, which will speed up processing of students, his administrative staff has been increased by three, and eight advisers have been added to the counseling staff.

Andrew T. Vaughan, former assistant professor of health education, has been named executive assistant in General Studies and will share administrative duties with Amin Black.

A secretary for advisement and a faculty supervisor have also been added to the staff.

The additional advisers will bring the staff up to about 30 which, Voigt said, should help to alleviate the strain of increased enrollment.

All entering freshmen are enrolled in General Studies until the completion of at least 24 hours, after which they are eligible to transfer to an academic unit of their choice.

Voigt explained that if the current proposal to reduce General Studies requirements to 69 hours is accepted, it could allow students a wider range of course selection.

Two new audio-tutorial laboratories (similar to the language labs) are being constructed for use this quarter. One located in the Allyn Building will be used in the General Studies biology curriculum.

Use of library resources at SIU's Carbondale campus last year climbed 26.3 per cent over the preceding year, according to Ferris S. Randall, librarian.

Circulation at the Morris Library reached 1,341,361 items - books, periodicals, microfilms, maps and other materials.

In addition to on-campus use, the library had a lively trade with other libraries and research agencies, Randall said. Inter-library loans enable scholars to have access to library materials not available at their own institutions, he said.

Last year, Southern loaned 690 items in response to requests from 156 different institutions in this country and abroad. Loan requests were received from such institutions as the John F. Kennedy Memorial Library, California State Library; Extrakartenswerk, Hamburg, Germany; McGill University, Montreal, Canada; Notre Dame Women's College, Tokyo, Japan; and Pretoria State Library, Pretoria, South Africa.

The SIU library obtained 1,310 items on inter-library loan from 197 other libraries. "We had to send out 1,913 requests to locate the thirteen hundred items needed, however," Randall said.

A meeting of former members of the Aquaettes, SIU's women's swimming club, will be held at 5:45 p.m. Tuesday at the University School pool.

Indo-Pakistani Shooting Halts; Talks on Kashmir Dispute Seen

NEW DELHI, India (AP) — Military radios crackled out orders to troops of India and Pakistan to stop the shooting war over Kashmir as of 3:30 a.m. Indian time Thursday (5 p.m. EST Wednesday). A wave of relief swept through many world capitals today after the belligerents' acceptance of a U.N. Security Council order for a cease-fire.

President Johnson promised in a telephone talk with President Mohammad Ayub Khan of Pakistan that the United States will fully support the words and deeds efforts by the United Nations to achieve a final settlement. Diplomatic sources in Moscow said Indian and Pakistani acceptance of the cease-fire order enhanced the prospects of peace talks on Soviet territory and cut the red tape of good offices of Premier Alexei N. Kosygin.

India's Prime Minister Lal Bahadur Shastri accepted Ayub's offer in principle in a speech in New Delhi. Ayub's government earlier had the cease-fire idea, but said the question of the cease-fire must be worked out first.

The neighboring nations, at each other's throats for three weeks, agreed to the Security Council's proposal at least to quit firing and try to resolve their fundamental differences, including the future of disputed Kashmir, by peaceful means.

The Communist Chinese, sheltered on India's Himalayan frontier in ostensibly support for the Pakistanis, appeared at last on the surface reluctant to upset the Asian applecart by serious penetrations that possibly might activate opposition from an unlikely partnership of the United States and the Soviet Union.

However, a report that a Red Chinese patrol was sighted five miles inside India's Uttar Pradesh State, on the central front of the 1,400-mile-long border, sustained tension.

A Defense Ministry spokesman said Indian police glimpsed the patrol, made up of 50 or 60 soldiers, in that wild and largely trackless area at noon Tuesday. He said bad weather prevented police from determining whether the Chinese settled down in Indian territory or withdrew. India filed a protest with the Chinese Embassy in New Delhi.

A sudden reduction of the tension started early Wednesday when the Communist Chinese, who had threatened "grave consequences" unless the Indians dismantled some old military emplacements on the border of the Indian protectorate of Sikkim and Red-Ruled Tibet, broadcast an announcement that the terms of their ultimatum had been met. They said the Indians had complied, tearing down the outposts.

The Indians declared they had not and Shastri said "all this is a product of their imagination," but the situation was accepted with considerable satisfaction in New Delhi.

Shastri said in an emotion-packed speech to Parliament: "Peace is good... We went as he told of the Indian casualties of war, but said proudly that the nation has come through its greatest trial. The times have been difficult, he said, but they have served a great purpose.

In Karachi, Ayub told his nation in a broadcast: "I have ordered the armed forces to cease fire and they will not fire on the enemy so long as they are not fired upon. Our forces will stay in position for the time being until asked to move out."

The Indian forces also propose to stay put.

Red Cross Rejects 'Tropic of Cancer'

PORTLAND, Ore. (AP) — The Oregon Trail chapter of the Red Cross began soliciting paperback books last week for shipment to servicemen in Viet Nam. This week the chapter announced that Henry Miller's novel, "Tropic of Cancer," had been screened out.
SIU Journalism Grad Assigned to Viet Nam

(Bob Poos, a 1955 graduate of SIU’s Department of Journalism, has been assigned to Saigon, Viet Nam, as an Associated Press correspondent.)

It was a “dream come true” for the ex-Marine, said Howard R. Long, department chairman, who described Poos as the “youngst student in his class.” Poos, who has worked for the AP in its St. Louis bureau for eight years, has always wanted to be assigned overseas, Long said. (While at Southern Poos was editor of the Egyptian.)

By Bob Poos

BEN SALT, VIET NAM (AP)—With shrill yelps and cries of “kill em, kill em,” the line of U. S. paratroopers plunged forward into hip-deep water and faced Viet Cong fire. The enemy fire stopped abruptly.

A young private grinned and said, “Well you couldn’t expect ‘em to give up all that stuff without a fight.”

He referred to a large cache of Viet Cong radios and a portable, gasoline-driven generator which troopers of Charley Company of the 173rd Airborne Brigade had found moments before.

Charley Company commander Capt. Henry Tucker of Columbus, Miss., said it was possibly “the most important intelligence find we’ve made so far. You just don’t capture Viet Cong radio equipment.”

The action occurred in a battalion-sized helicopter-borne attack by three companies near Ben Cat, deep in Viet Cong-controlled territory. The paratroopers have been sweeping the area since last Tuesday.

Capt. Tucker’s men hit the drop zone and made a wide, sweeping movement that was to link them up with A and B companies of the battalion.

Charley Company jumped into water and tall grass and then moved into dry jungle that soon became swampy. They encountered a sniper who fired one round, then scurried away under heavy fire.

The troopers came on an unmapped village atop a honeycomb of tunnels, which they said was a trademark of a Viet Cong headquarters.

The troopers captured two girls, aged 14 and 17, and interrogated them. Only a few yards away, Charley Company came across a hut crammed with the radio equipment and what the interpreters said was Viet Cong literature and letters to Viet Cong soldiers.

As the troopers examined the equipment, a shot rang out. Then more enemy fire poured in. Troopers crouched in the deep water and fired back as Capt. Tucker gave orders and talked on his radio to the battalion command post.

He shouted, “Let’s move out of here,” and squads from the first and second platoons launched their charge.

The troopers plunged on through swamp, tall grass and more jungle, finding one small tunnel system, which they blew up and sealed as they had the first.

Senate Debate On Union Shop Bans Planned

WASHINGTON (AP)—Senate Democratic Leader Mike Mansfield was asked what his plans were:

"It is my present intention," he said Wednesday, "to call up 140 very likely sometime next week."
Frosh Football Team Works Out, Sparks Optimism By Coaches

By Bob Reincke

One of Southern's most promising young football teams in several years is now going through drills. Coach Joe Lutz is optimistic about the coming year. "We feel that ability-wise this team is above average and should be better than some of the teams we have had in the past few years," Lutz said. Lutz said Dave Shroyer, the varsity head coach, also thinks highly of this year's team.

Lutz has good size at the fullback spot with Al Buchanan, 6-1 and 205 pounds, from Moline; Bruce Nannini, 6-1 and 195 pounds, from Dakota; Ken Titus, 5-11 and 180 pounds, from Savannah; and Chip Marlow, 5-6 and 196-pounder from Herrin.

Student Wounded In Gun Accident

Paul William Fearday, an SIU student from Effingham accidentally shot himself in the right leg Monday. He was drawing a .22 caliber revolver from a holster. He was alone in a trailer at the time of the accident, he told SIU Security Police.

He is in Doctors Hospital.

Motorbike Tour Set for Friday

A motorbike/motorcycle tour of two area parks, in the form of a poker run, is being sponsored by Cycle Sport, Inc., the motorcycle club of Carbondale. It will begin at 7 p.m. Friday and take about two hours. The route covers 30 miles. It will be paved with side excursions on paved or "good gravel." It will include both small bikes and large cycles.

Interested persons should meet between 6 and 7 p.m. on the parking lot northeast of the University Center for registration. Donations of $1 are requested.

Following the ride, the group will meet at the University Center for refreshments.

For further information, students may contact the "captain," James Hill, telep. 549-3732.
Shroyer Seeks More Line Strength

After seeing films of Saturday's 23-10 victory over State College of Iowa, Coach Lew Hartzog's Salukis open the season against South-West Plains, Canada, will be running top shape and that according to Hartzog. He was a pre-season all—star selection in the league and many football experts feel he will surpass the many passing records set last year by University of Tulsa quarterback Jerry Rhone.

Hartzog says Shroyer is a 191-pound guard. to an offensive guard position. He felt that the lack of depth of position will replace Shroye.. Shroyer is a 191-pound guard. to an offensive guard position. He felt that the lack of depth of position will replace Shroyer. As a result Shroyer plans to switch Al Jenkins, a 264-pound defensive tackle, to an offensive guard position. Jenkins will replace senior Vic Pantaleo. Shroye.may then switch Chuck Korsen, a 191-pound guard. to Jenkins' old position. Shroyer felt that the lack of interior line blocking was the biggest stumbling block to SIU's ground game that netted 165 yards against the Panthers.

Mike McGurk's 10,000 meter run in Others in the freshman meet Friday.

DAN SHAUGHNESSY

Season Opens Saturday

Cross-Country Vets Give Hartzog Hope

Cross-country will get under way here Saturday when Coach Lew Hartzog's Salukis open the season against Southeast Missouri.

Dan Shaughnessy, of Allston, Canada, will be running strong in the 4-mile event scheduled for 11 a.m. Saturday. Shaughnessy, a sophomore, set a record last year at Chicago's Washington Park. His time was 19:30.2. Later, he won the 10,000 meter run in the U.S. Track and Field Federation meet last November.

Three other lettermen are returning this year. Among them is Al Ackman, a junior from Mount Vernon, who will be backing Shaughnessy. Two veteran seniors will give further depth to the SIU team. They are John Throwbridge, a junior from Alton and Jack LeRoy, a senior from San Mateo, Calif.

Sophomores Tom Curry, of Chicago, and Bob Carr, of Mount Prospect, round out the team.

Hartzog said the varsity men need conditioning, because they were not under supervised training during the summer.

However, with twice a day workouts, the team looks better than any since 1961, according to Hartzog. "I have a wait and see attitude," he said. "We will know how we stand after Saturday's meet."

The SIU Marching Salukis

If the more than 75 musicians and 11 majorettes who comprise the Marching Salukis aren’t in shape now, they will be before they end their season Dec. 5 in St. Louis.

The band members, who are under the direction of Mike Hanes, returned to school a week early to practice for the half-time show they gave at the SIU-State College of Iowa game.

The band members still have five more appearances in addition to performances in Salem, Chicago and St. Louis.

The weekend of Oct. 9 and 10 is scheduled to be the busiest.

Last week was difficult, Hanes said. We practiced some 30 hours in the space of four days in preparation for last Saturday’s half-time show.

The band’s next performance will be Friday night in Salem at half time of the Salem-Bridgeport high school football game.

“We try to have at least one area performance a year,” Hanes said.

The band will then have two weeks to get ready for its biggest weekend of the season.

After performing at half time of the SIU-Lincoln University game, the band will leave Sunday morning for Chicago, where it will perform at half time of the Chicago Bears-Los Angeles Rams professional football game.

Four more Saluki half-time shows and one at the St. Louis Cardinals-Los Angeles Rams game Dec. 5 will close out the season.

“We’ll have a different theme for each of the home appearances,” Hanes said.

Last Saturday the band presented SIU spirit as its theme. In the next home game the band will present the Flower Drum Song.

Future shows will include both jazz and classical music.

“We’re trying to appeal to the audience by being as diverse as possible,” Hanes said.
John D. Mees Accepts Post In Secondary Ed

John D. Mees, principal of University School for 19 years, has transferred to SIU's Department of Secondary Education, a position he is expected to retire from in the fall.

Mees has served as assistant principal of the department for some years, has transferred to SIU in 1962 and was appointed principal for a one-year term.

The leaders, all volunteers, were selected by Jack Graham, dean of students, to assist in the orientation of more than 3,000 freshmen and transfer students. They were picketed on the basis of leadership in campus activities and scholastic achievement.

New Student Week is administered by the Student Affairs Department, with the cooperation of the student government. John F. Wilhelm of Joliet and Annette Battle of Metropolitan were cochairman of the student week leaders.

The Student Week leaders included:

* Tom Boyd, Jane Hughesin, David H. Varacca, Luella Dall, Dennis J. Henseleit.
* Jeanine Kulesza, Brenda Loomis, Elizabeth Luz, Keith Phoenix, Corlina Sauer.
* Lavona Shes, Barbara D. Voellinger, Kenneth Wayne Buryznak,
* Bill Carell, Jerry Lee Carell.
* Don Formanek, Lynda Von Kriegsfield, Diane F. Armstrong, Teresa Burriss, Ed Meadows.
* Janice L. Sprague, Oneta R. Spence, Rosemary Brown, Vicki Erickson, Karen Hinnert.

Selected for Leadership

200 Upperclassmen Help Orient 3,000 Fresh, Transfer Students

More than 200 upperclassmen returned early to campus to serve as leaders in New Student Week activities.

The leaders, all volunteers, were selected by Jack Graham, dean of students, to assist in the orientation of more than 3,000 freshmen and transfer students. They were picketed on the basis of leadership in campus activities and scholastic achievement.

SIU Botanist Named to Panel To Study Space Biosciences

William D. Gray, professor of botany, has been named to a joint American Institute of Biological Sciences-National Aeronautics and Space Administration council on space age research.

Formed specifically to consider research in basic bio-science during manned earth and orbit space missions, the council is one of several regional groups of scientists formed by NASA and the AIBS. Its initial meeting will be Saturday and Sunday in Minneapolis.

In addition to Gray, council members include representatives of Michigan State and Ohio State universities, the universities of Wisconsin and Minnesota, Missouri. Ky.

WILLIAM D. GRAY

State College, and the AIBS.

Gray, a Jacksonville, Ill., native who joined the SIU faculty in 1964 after 17 years on the staff at Ohio State, has gained international attention for his studies on the nutrition of the world's plant protein by use of fungi.

Gray has led to a process for developing a high-protein food supplement for readily available waste-plant products.

A former Fulbright lecturer at the University College of England, Gray has studied extensively in a variety of scientific journals. His writings include the book, "The Relation of Fungi to Human Affairs."
Brought to Illinois in 1851

150-Year-Old Spinning Wheel
Presented to SIU Museum

A spinning wheel nearing 150 years of age has been presented to the SIU Museum by Mrs. Emma Parlow Hicks and Mrs. Elfie Parlow Copeland, both of Mulkeytown. The spinning wheel was used by Mrs. Hicks’ mother, Nancy Elfie Furlow Copeland, and later moved to Mulkeytown.

The wheel was already well-used at that time, however, for it had originally belonged to Mrs. Davis’ mother, Nancy Ann (Mrs. Benjamin) Rose, according to the donors. After being used by Mrs. Davis, the spinning wheel was given to the Museum after it has been preserved not only the wheel but also the original cards which their mother used to prepare the wool for spinning, some wool she spun, her knitting needles, and several garments she knitted from her homespun wool.

Museum Features

Bottle Collection

The ancient invention of the blowpipe provided the process that has served to produce bottles for centuries. This is just one of the Historical objects that has been added up by Jack E. Porter, education curator for the SIU Museum, in preparing descriptive cards for a collection of antique bottles which has been placed on exhibit in the Museum.

Thompson collection belongs to Porter and his wife and he said most of the bottles were obtained at Key West, Fla. Glass-blowing was first used in Egypt to make articles of personal adornment—beads, jewelry and such items. Porter later, utilitarian objects such as vases and bottles were developed, the earllest ones made by pouring or winding molten glass around a clay form or mold.

After the blowpipe was invented, technological advances were made which permitted blowing the glass into wooden molds and, later, into iron molds.

Current Museum visiting hours are 8 a.m. to 5 p.m. Mondays through Fridays and 8:30 a.m. to noon Saturdays.
Prison Officials From Africa
Train at Corrections Center
SIU is conducting an 18-week training session at the University’s Center for the Study of Crime, Delinquency and Corrections, for eight prison officials from Tanzania and the Somali Republic.
It is the center’s fourth program since June, 1962, for foreign prison officials under the auspices of the U.S. State Department’s Agency for International Development, according to Robert J. Brooks, coordinator of the program.
Participants from Tanzania are John Bullet Kasidi, superintendent of prisons; Ambilikile Mwakalobo, prison officer; and Peter Lipambila Mzeka and Stephen Godfrey Katambala, officers in charge of district prisons. Those from the Somali Republic are Ali Nur Glama, second lieutenant in charge of prison industries; Ahmed Abdul Mahamoud, second lieutenant and administrator of the custodial service; and Omar Mohamed Gulaid, chief administrator of the northern region prisons.
Classroom study will include correctional institution management, probation and parole, the design of correctional institutions, methods of staff training and development, and the role of the courts in the correctional process. The group will tour correctional institutions in Illinois, Indiana, Missouri and Wisconsin, and will study independently at prisons throughout the nation for two weeks.

Robert W. MacVICAR

MacVICAR Speaks
To 200 Freshmen-
Robert W. MacVICAR, vice president for academic affairs, was speaker at a special convocation Sunday at Lentz Hall, Thompson Point.
Housing officials and student government leaders also welcomed the more than 200 freshmen present, Thompson Point residence halls house 1,300 students, more than half of them freshmen.

SIU Innovates Plan
To Finance Housing
An innovation in federal financing of a housing project for moderate-income college families is planned at SIU.
The $4 million project for at least 350 families in the first approved under the special section of the Urban Renewal Act, according to John S. Rendleman, vice president for business affairs.
The SIU project would be the first of its type financed by the Federal Housing Administration. Rendleman said other universities with family housing plans have been closely following the FHA’s action on the SIU request.
To allow the action, the FHA changed a section of the urban renewal program to enable colleges to get FHA financing for facilities for their students and faculty.
One reason for going to the FHA, Rendleman said, was to take advantage of a new three per cent interest rate approved for that agency.
The University will not provide plans and specifications for contractors. Prospective bidders will submit their own package designs—including roads, utilities and landscaping—at a Nov. 16 bid opening here.
The winner will be the one who, in the judgment of University architects, “gives the school the most for its $4 million,” according to Paul Isbell, director of business affairs. Completion is expected by the fall of 1967.
Because the University can’t mortgage state property, the financing has been channeled through the SIU Foundation, a non-profit corporation which operates in the University’s interest.
A 39-acre tract owned by SIU at the west edge of Carbondale’s city reservoir was deeded to the Foundation. Acting as mortgagee, the Foundation then applied to FHA for the $4 million loan, which has been allocated.
It will pay off the contractor, and lease the apartments to SIU for the duration of a 40-year loan period. The rent money will go back through the foundation to pay off the loan.

Illinois & College Open 8 a.m. to 11 p.m. Daily
Counseling Is More Than Tea and Sympathy

By Diane Keller

The pressures and tensions of college life have been widely publicized. Most college students at least once during their four-year stay feel the pressure to get grades, to date, to join, or to keep up. SIU has two services geared to deal with adjustment problems arising from campus situations. The Counseling and Testing Center and the Cooperative Clinical Services Center help the student solve his personal, academic or vocational problems.

The Clinical Services Center is staffed by professional diagnosticians, therapists and counselors and serves all of Southern Illinois University and his parents. The student finds himself at odds with the university and his parents what he is taking his four-year stay feel the pressure to get grades, to date, to join, or to keep up. SIU has two services geared to deal with adjustment problems arising from campus situations. The Counseling and Testing Center and the Cooperative Clinical Services Center help the student solve his personal, academic or vocational problems.

The Clinical Services Center is staffed by professional diagnosticians, therapists and counselors and serves all of Southern Illinois University and his parents. The student finds himself at odds with the university and his parents what he is taking his four-year stay feel the pressure to get grades, to date, to join, or to keep up. SIU has two services geared to deal with adjustment problems arising from campus situations. The Counseling and Testing Center and the Cooperative Clinical Services Center help the student solve his personal, academic or vocational problems.

Another common problem is a feeling of inadequacy. This is the malady of those freshmen who feel they are receiving little attention from an impersonal campus. The clinic will listen to this student and attempt to provide a base of comfort from which the student can draw strength. Both services are often confronted with the student who cannot concentrate or who is unable to make the grade academically. To solve this problem, a counselor tries to get the student to discuss what is worrying him. The inability to study is usually just a symptom of something bigger.

Joe C. Eades, counselor at the Clinical Services Center, said counselors at both services would like to have students come to them while these symptoms are mild, instead of waiting until the trouble gets serious.

The clinic, located in the Wham Education Building, is busy all year, although activity seems to pick up at the end of winter quarter. "We get a lot of love problems during spring term when many students are pondering the questions of marriage," said Eades.

During the fall term, the clinic will expand its services. A remedial reading service, under a new director, will be emphasized more. Therapy is available to students who have speech defects. A hearing evaluation program also is available. Most students who take advantage of these services are referred to the clinic by the Health Center. However, Eades emphasized that any student may be treated. For the most part, students wait until their sophomore or junior years before bringing their problems to the counselors. It takes a while for the person to realize that he has a problem, and this usually occurs during his second or third year.

Of course, a few students try every term to get an emotional excuse to receive a "W" grade. This happens at the end of the term, for some reason.

The basic problem most students face is that of learning to live with other people. Another common situation freshmen encounter is a negative bias against the General Studies program. In this case, the student usually takes his complaint to other offices and then, when he receives no sympathy or results, ends up at the clinic.

So the next time you fret or fume over a problem, forget it. Save money by not buying aspirin, sedatives or nerve pills. Take your worry to the clinical center or the testing center and get fast relief.

**DIETZGEN Slide Rules**

A slide rule is a lifetime possession... few purchases ever deserve such careful selection

This year, as every year, thousands of students will confuse the training where the purchase of a slide rule is required. This is not only a new experience, but one that means something to most people. A slide rule is not purchased like a text book for a few months' use and then sold or shelved when the classwork is over. A slide rule is a lifetime possession, a constant companion throughout the career for which the young man is training. If cheap and shoddy, it cannot possibly serve him properly...or inspire the respect for precision and fine craftsmanship which is so essential to success.

It is most difficult for anyone to judge the merits or claims of any slide rule by mere inspection. There is a sort of lure in the few hurried moments before its purchase. That is why so many say, "Buy a Dietzgen Slide Rule and be sure." The Dietzgen Slide Rule is a lasting investment, and only safeguards the purchase, it makes sure the owner will always be proud of his lifetime possession. Dietzgen Slide Rules are sold by the better dealers everywhere.

100 W. JACKSON
CARBONDALE, ILL.
100 Students to Be Employed
Keeping 'High - Rise' Clean

Southern's newest housing marvel, the University Park Residence Halls, will get a lot of care from student workers, according to George P. Connell, supervisor of physical facilities for the University.

More than 100 students will be sought for janitorial duty in the complex, which will eventually house 2,000 students.

"There will probably be around 300 hours of work put into the complex daily," Connell said. Besides the student workers, the complex will have one foreman, two subforemen, and four maids.

"The biggest problem will be the amount of area to cover," he said.

There are 44,063 square feet of glass in University Park, or more than one acre.

Motorcycle, Car Collision

A motorcycle driven by Tom W. Wallert of Chicago and an automobile driven by Robert Locke of 419 N. 8th St. in Murphysboro collided at the corner of Illinois Avenue and Oak Street at 5:03 p.m. Monday. No one was injured.

The 2,402 rooms in the complex contain 5,243 light fixtures, and 1,945 plumbing fixtures.

And just to play it safe, there are 2,599 locks in the building. There are 2,661 doors in the dorma.

Seniors, VTI Grads

Scheduled for Obelisk Pictures

Seniors and graduating VTI students may have their pictures taken for the 1966 Obelisk from Sept. 27 through Oct. 16.

Students with last names beginning with letters from A through Q should go to Neustadt Studio, 213 W. Main St. Students with last names beginning with letters from R through Z and all VTI students should go to Rolandso's Studio, 717 S. Illinois Ave.

No appointment is necessary. The pictures can be made between 9 a.m. and 5 p.m. Monday through Saturday.

Students should wear the clothes they want to appear in the picture.

American Methods

Germans In Advertising See SIU

Eighteen Germans recently visited the Department of Journalism as part of a four-week tour to study American advertising.

The group, representing German advertising firms, newspapers, magazines, publishers and educational institutions spent all day on campus.

Cooperating with the department in presenting a program for the guests was the Advertising Club of St. Louis, Speakers included two Monsanto Chemical Co. representatives from St. Louis, George Mack, corporate advertising manager, and Henry Siegle, director of advertising research.

They joined Howard R. Long, chairman of the department, Donald G. Hileman, head of the department's advertising sequence, and Bryce W. Buckner, director of the department's graduate program, in addressing the group on aspects of advertising.

Keith Fowler of Anheuser-Busch, St. Louis, discussed "The Importance of Special Promotions to Sales" at a dinner meeting at the Southern Illinois Golf Club.

Charles D. Tenney, vice president for planning and review, gave the official welcome at a luncheon meeting.

Just call him "Smooth Sam"

HE'S WEARING "DACRON"* "ORLON" Ultrastatic Prud Haggar dress slacks. Even when the humidity hangs hot and heavy, he's so cool, he's in a sudden shower, 70°F. "DACRON" polyester-65% "ORLON" acrylic keeps these fine dress slacks smooth and sharply creased. They even take reported washings without a wrinkle. And Haggar styling gives him the trim fit he wants in fine dress slacks. No wonder the gala go for "Smooth Sam". 10.99

WIN A FORD MUSTANG or one of 30 other big prizes. See your Haggar dealer for details.

DIETZGEN
Drawing Instruments

The choice and pride of engineers the world over!

Few purchases ever deserve such careful selection as a set of drawing instruments. First, such instruments become a lifetime possession, a constant companion throughout the career for which the young man is training. But of even greater importance, when the student uses fine instruments, their precision imparts precision. Pride of ownership imparts pride in accomplishment. It must be more than mere coincidence that so many successful engineers use and recommend Dietzgen Drawing Instruments.

Dietzgen Lifetime Service Policy

Many "haggar" sets of drawing instruments are either orphans or soon become orphans: their makers out of business, repair parts and replacements impossible to obtain. The Dietzgen Lifetime Service Policy enclosed in each set of Dietzgen Drawing Instruments provides that Dietzgen will maintain master stocks of all instrument parts for the full lifetime of the set's original purchaser.

Dietzgen Drawing Sets are offered in a wide range of sizes and prices to meet every need... featured by the better dealers everywhere.

3 MILES EAST ON RT. 51
SEMINAR WILL STUDY WORKER SATISFACTION

SIU will host the first International Work Measurement Seminar on Oct. 1 and 2. The results of 18 years of continuous research in organizational structure and employe satisfaction will be discussed.

The seminar will hear Elliott Jaques, who developed the work-measurement theory, and Lord Wilfred Brown, chairman of the board of the Glacier Metal Company of Alpenon, England, where the theory has been studied and applied. They will present their findings.

Fremont W. Shull, chairman of the SIU Department of Management and seminar director, said this will mark the first appearance of the two recognized authorities in the United States as a give-and-take seminar with scholars and businessmen.

Shull said another feature of the seminar will be discussions of the Allen Project. Jaques has gained international acclaim for the Glacier Study, but only recently has his theory been recognized in American business. Currently the theory is acknowledged as "England's finest study of worker satisfaction" and "one of two major contributions to organization design."

In his attempts to obtain an operational definition of work and to develop less arbitrary measures of work than those provided by time-and-motion study techniques, Jaques demonstrated the relevance of three independent variables in structuring and testing organizational designs and employment roles to be: (1) "Time-Span of Discretion," which refers to the length of time the worker is allowed to use his own discretion, without having his decisions reviewed by a superior; (2) "Fair-Felt Payment," used to establish an equitable salary range, and (3) "Earning Progression in Real Wages," used to relate employe advancements through positional role to the changing capacity of his employment abilities.
$8,761 Granted for Study of Gifted Students

John P. Casey, assistant professor of education, has received an $8,761 grant to study the problem-solving processes of gifted high-school pupils.

The Illinois Plan of Program Development for Gifted Children made the grant to Casey, who is in the Department of Student Teaching.

The basic research project, which will continue for two years, will be conducted in cooperation with the Illinois Superintendent of Public Instruction’s office.

Casey will work with juniors and seniors at University School, SIU’s education research laboratory. He estimated the experiment will involve about 60 students, to be chosen by their teachers on standardized tests.

He said he hoped the project will determine significant differences, if any, between gifted and other normal upper-grade students in processes used in solving their problems.

The work with students began with resumption of University School classes this month.

Paul W. Wendt, chairman of the Department of Instructional Materials, and Robert J. Donnelly, former guidance director at University School, will be project consultants. Casey will be aided by research assistants from the College of Education.

Casey, who obtained his doctor of education degree in 1963 from Indiana University, has taught in the public schools of Columbus, Ohio, and at Ohio State University.

This coupon, plus just $2.00, will thank Mom and Dad five days a week.

DAILY EGYPTIAN
SOUTHERN ILLINOIS UNIVERSITY

973 to Get Academic Degrees Tonight

...Because it will send them a copy of your college paper every day it’s printed— for a whole term. With a gift subscription to the Daily Egyptian, your parents will be able to keep abreast of what’s going on at SIU— and it might even tell them a couple of things you forget in your letters!

Dad is sure to get a thrill out of watching the Salukis go, go, go (as in victory, we hope), and Mom is sure to get a chuckle out of Gus Buda. And everybody’s sure to be interested in the editorial page, reflecting student opinion. And there is campus news and activities and intellectual things and lots more.

So, why don’t you just clip out the coupon, mail it in with two bucks (or be a sport, and enclose six dollars for four terms)? Mom, Dad, brothers, sisters, grandparents, aunts, uncles, girl friends, boy friends are just a few of the people who might be interested. Mail it in today.

SOUTHERN ILLINOIS UNIVERSITY NEWSPAPER

DAILY EGYPTIAN
Research Staffs Will Be Told Of Trends in Federal Funds

Harry Arader of IBM will visit SIU Thursday to discuss trends in federal funding to all interested University personnel in the Ohio and Illinois Rooms of the University Center.

Arader, who lives in Washington, D.C., is in daily contact with personnel in the various federal agencies granting support to research projects in universities.

A schedule has been arranged to allow personnel to meet with Arader.

From 8:30 until 9:45 a.m., academic deans, the Budget Office, the Office of Research and Projects, and the Research and Projects Fiscal Supervision office are scheduled to meet with him.

From 1 to 2:30 p.m., Arader will meet with those whose particular interest is research in the areas of biological and social sciences, social studies, etc.

From 2:30 to 4 p.m., he will meet those whose interests are in research areas of technology and physical sciences.

Virginia Harrison, who will retire this fall as the coordinator of pre-clinical nursing on the Carbondale campus, has found that a very demanding professional career hasn't interfered with a feminine devotion to gardening, sewing and cooking.

Miss Harrison is still judged over the eight ribbons she won this summer in the Carbondale Garden Club show — "the first time ever entered a garden show!"

She came to SIU in 1955 to head the new Department of Nursing. She served until two years ago when the department headquarters were moved to Edwardsville.

Now, as coordinator, she guides the academic life of about 60 freshmen and sophomores taking their first two years before transferring to Edwardsville, and about 15 registered nurses who are working toward academic work for the bachelor's degree.

"The first two years of the nursing program will still be available on the Carbondale campus," she said. "We already have about 85 new freshmen starting this fall." Miss Harrison, a native of St. Louis, previously headed the nursing program at the University of Missouri, and for three years worked with the State Board of Nursing Examiners in Mizzou. She helped St. Louis officials set up a School of Practical Nursing.

Prior to that she taught in the School of Nursing in St. Joseph's Hospital in Alton, and taught and directed the nursing schools at the Homer G. Phillips Hospital in St. Louis, St. Luke's Hospital, San Francisco, and St. Luke's Hospital in Kansas City, Mo. In several of these institutions she also headed the nursing service.

"I was past 24 years of age when I finally went into nursing," Miss Harrison said. "My father frowned on the profession as 'untidy.'"

She took her basic training at St. Luke's Hospital School of Nursing in St. Louis and attended Washington University on the side; nights when her shift was over, she'd be there for the whole course of work. She still has one more year to go until she receives her bachelor of science degree in educational psychology.

She also received a scholarship to Vanderbilt University where she took a postgraduate course in operating-room nursing.

Since coming to SIU Miss Harrison has maintained an eight-room home on an acre east of Carbondale, where she exercises her "green thumb" the year around, starting with narcissuses and crocuses in the early spring, through some 100 varieties of iris, peonies, lilies of 35 kinds, annualls, and on to the late fall chrysanthemums.

But she also grows vegetables, and this season has put up 37 quarts of tomatoes, vast quantities of applesauce, beets, corn and other produce.

State Funds Advance Plan For TV ‘Satellite’ of WSIU

The next step in SIU’s plans to construct an educational television station at Olney is the granting of a Federal Communications Commission permit to operate on UHF channel 45, according to Buren C. Robbins, director of the SIU Broadcasting Service.

Gov. Otto Kerner signed a bill appropriating $400,000 for the project late this summer. Approval of a matching grant by the U.S. Department of Health, Education and Welfare is expected shortly.

Robbins said the station should be on the air no later than September, 1969, under normal construction conditions. It will act largely as a satellite of WSIU-TV on the SIU Carbonado campus, feeding educational programs to regional schools now on the fringe or outside of WSIU-TV’s present coverage area.

Noon Films at Morris Library Offered as Cultural Addition

Starting Monday, the Audio Visual Services will sponsor weekday noon-hour films in the Morris Library Auditorium from Monday through the academic year. Famous contemporaries, the graphic arts, music and biographies of the classical masters will be on the program.

During the fall quarter the films will be shown daily because of scheduling problems, but will be shown daily in the winter and spring quarters.

Each week a different area of interest will be highlighted, and the first will be "The Week of Music." Monday, Igor Strawinsky, renowned composer and conductor, will discuss his life and works and his youth under the guidance of Robert Craft.

Tuesday, "Grand Canyon Suite" will be shown. It features the music of Ferde Grofe with graphics in color by Walt Disney.

Wednesday the cello virtuoso Pablo Casals will speak of his life and his exile from Spain.

Sep. 20, "Schubert and his Music," film in Vienna, will present the life and times of Franz Schubert.

Oct. 4, a performance of Tchaikovsky’s "Rococo Variation" by cellist Leonard Rose will be presented.

Oct. 11, "Leonardo da Vinci and his Art" will be featured.

Touring Choir To Sing at Rally

A Baptist Student Union rally at which all Baptist students will be held at 7:30 o’clock tonight in the Baptist Foundation Chapel.

The rally will feature music by the BSU touring choir and reports by student summer missionaries.

Officers of the Baptist organization will also be present, followed by a discussion on "Religions of the World," presented by Stan Huling.

Following the rally there will be a fellowship period.

DAILY EGYPTIAN

FOR RENT

Air conditioned home. Male students. Lake, beach, horseshoe pitching. 3 3/4 miles west of campus. 950. Call 549-3008.

FOR SALE

650 Triumph, custom built. Excellent condition. $750 or best offer. Call 549-4582. Ask for Rob. 975

1965 four door Chevy, 4 stick shift. Best offer. Call after five. 979

1965 Fiatvelle. Full roof, recent body work. Contact Ron 116 East Park, Number 3. 977

600 W. Freeman Dorm To Hold Poolside Dance

All students are invited to a poolside dance at the 600 W. Freeman dormitory from 7:30 until 10:30 o’clock this evening.

718 S. ILLINOIS "Near the campus"
Cal Y. Meyers, associate professor of chemistry, was one of four guest lecturers at the American Petroleum Institute's annual meeting at the University of Wyoming summer science camp near Laramie.

He discussed "Benzothiophenes and Their Sulfoxides: Syntheses and Reactions."

This was one of several projects completed this summer by SIU's Department of Chemistry that have been, or will be, discussed at various national and international conferences.

Meyers also attended the national meeting of the American Chemical Society in Atlantic City, N.J., Sept. 13, where he presented a paper on "An Evaluation of Sulfonyl d-Orbital Interactions and Carbonyl p-Orbital Interactions in Mono- and Diaryl Carbonyl Compounds."

He will present one of four lectures at the Polymer Symposium on Oct. 2 at Northwestern University. He will discuss "Sulfone Polymers: Molecular Requirements for Thermal and Chemical Stability."

Melvin D. Josten, assistant professor of chemistry, described his recent research to the American Chemical Society meeting in Atlantic City. One paper presented, "Complexes of Furfurylamine and of N-methyltetrahydrofurfurylamine," was based on research in collaboration with Kenneth G. Claus, who recently received his M.A. degree.

At the Symposium on Phosphorous Chemistry, Josten described "Models for the Pyrophosphate and Triply-phosphate Linkages," based on his research with James F. Forbes, graduate student, and Joseph P. Hoppey, undergraduate.

Boris Musulin, associate professor of chemistry attended the Alberta Symposium on Quantum Chemistry held Aug. 23 to 27 at the University of Alberta in Edmonton. At this symposium, sponsored by the Division of Theoretical Chemistry, Musulin presented a summary of research dealing with molecular screening constants. He and his students are engaged in theoretical studies of molecular bonding.

James N. BeMiller, assistant professor of chemistry, was invited to the annual Starch Round-Table Conference, sponsored by the Corn Industries Research Foundation, Inc. This year the sessions were held Sept. 8 to 11 at the Pocoro Manor, Pocono, Pa. BeMiller and his students are active in research dealing with the chemistry of carbohydrates.

BeMiller was also a visiting professor of biochemistry during the summer session of the University of Illinois. Richard J. Roch, assistant professor of chemistry, spent eight weeks at Oregon State University. In collaboration with W.F. Slaught of its chemistry department, he investigated the thermal decomposition of organo-clay complexes. The study was sponsored by the National Science Foundation.

9 SIU Juniors Win ROTC Scholarships

Nine SIU juniors are among the first 977 Air Force ROTC cadets selected nationwide for new Air Force scholarships in the professional officer course.

Scholarship winners are Ronald W. Buckley of Barrington, Thomas J. Anton and Russell F. Trymla, associate professor of chemistry, attended the advisory panel meeting for College Teachers Research Participation during September in Washington, sponsored by the National Science Foundation. He also attended the Institute in History and Philosophy of Science in June and July at the American University in Washington.

Joseph R. Janestic of Berwyn, Sheldon Rittenhouse of Chester, Dennis D. Culverman of Litchfield, Robert M. Deck of Morton Grove, Rayburn K. Diddenhoofer of Walch, Robert W. Menestrina of Westville, and Lawrence W. Hartland of Yonkers, N.Y.
