Madison County, site of SIU's Edwardsville campus, again leads all counties in the number of students enrolled.

Of the 3,309 Madison County students enrolled, more than 2,900 are commuters attending classes at the Edwardsville campus. The others are enrolled in Carbondale.

Cook County is close behind Madison in the total SIU student population, with 2,380. All but nine of those are enrolled at Carbondale.

St. Clair County has 2,309 SIU students, 1,260 of them attending classes at Edwardsville.

Jackson County, in which the Carbondale campus is located, has Chicago as the home of 1,657 students.

SIU has some 20,417 students this fall, of whom 13,712 are from Illinois. They come from 48 states and the District of Columbia and 63 foreign nations and possessions.

The only states not represented on the enrollment list are Alaska and Utah.

For a picture of the breakdown of enrollment by counties turn to Page 5, where they are shown on a map of the state.

**Wait-and-See Attitude Prevails As Experiment in Finals Nears**

MacVicar Says New Plan Has Educational Advantages

With a little more than two weeks left in the quarter, Southern students are drawn to the philosophy of a "wait-and-see" attitude with an experiment, the elimination of finals week.

According to a policy set down at the beginning of the term, there would be no more than eight hours or time periods set aside for tests at the end of the term. Classes will meet as usual up to the final day of the quarter with teachers giving examinations as they deem appropriate.

Initial student reaction to this announcement was one of anxiety and alarm. Now, the mood on campus is more of "wait and see."

"I think much of the early anxiety about the switch stemmed from lack of information," said Robert W. MacVicar, vice president for academic affairs. "Since that time individual professors and faculty members have given their classes just how the experiment will affect each class. Students can see for themselves that many of their early fears were unfounded."

The reason for the experiment—and all officials concerned emphasized that this is just an experiment and was varied and sound.

"One of the biggest reasons was the problem of scheduling," said Robert A. McWhorter, registrar. "With increasing enrollment and variety of class meeting times it was becoming impossible to draw up any sort of over-all schedule, even for the first week which would not be loaded with conflicts."

He said that the only way to draw up an exam schedule would have been to extend "exam week" another two days or to schedule exams far into the night.

Another problem in scheduling exams, other than sheer numbers, was the commuter student.

Students at other campuses and centers often shuffle between them on the same day, going from a 9 o'clock at the East St. Louis Center, for example, to an 11 o'clock at the Edwardsville campus.

The Carbondale campus has similar problems, but not on as large a scale, with students dividing their time between Carbondale and Edwardsville.

The experiment wouldn't be tried, however, if scheduling were the only reason.

The goal of the University is to increase the opportunities and experiences for students, MacVicar said.

"From an efficiency and educational standpoint the experiment was very important," he said.

"The student will have one more week to do the experiment."

"This will be especially important in the comparative study between them on the same day, going from a 9 o'clock at the East St. Louis Center, for example, to an 11 o'clock at the Edwardsville campus."
SOUTHERN’S FILM SOCIETY PRESENTS

"The Letter That Was Never Sent"

(ROSISSAN DIALOGUE WITH ENGLISH SUBTITLES)

STARRING:
Tatyana Samoilova and Yevgeni Urbansky

A film of great power and tenderness, photographed in the Mexican town of Taxco and telling the story of four determined young revolutionaries—three men and a woman—who are captured and tortured by the Mexican army, and how their story is retold in exchange for each other's lives. sugar and milk.

SUNDAY DECEMBER 6
MORRIS LIBRARY AUDITORIUM
ADULTS $6.00, STUDENTS 40C WITH ACTIVITY CARD
2—SHOWS 6:30 and 8:30 P.M.
Lecture, Movie Hour And Dance Scheduled

The Movie Hour will present "Who Was That Lady" at 6, 8 and 10 this evening in Parr Auditorium at the University School.

Counseling and testing will begin GED testing at 8 a.m. in the Library Auditorium.

Women's Recreation on Association class badminton will begin at 6 p.m. in the gym. "Arab Night" will be the theme of tonight's University Center Programming Board dance, scheduled to begin at 8:30 in the Roman Pool of the University Center.

Music for the dance will be provided by the "Mustangs."

Cerecreational swimming will be allowed from 7 to 9 p.m. in the University School pool.

Horizons will present "Anna Karenina" with a prologue by Roy G. Pickett, assistant professor of English, at 8 p.m. in Davis Auditorium in Wham Education Building.

Atomic Energy and Telstar, "The Man Story," will be presented by Probe at 8 p.m. in Browne Auditorium.

Counseling and Testing will hold a meeting at 8 a.m. in Activities Room D of the University Center.

The Moslem Students Association will meet at 2 p.m. in Activities Room E of the University Center.

Inter-Varsity Christian Fellowship will meet at 11 a.m. in Activities Room C of the University Center.

Technical and Small Business will hold an industrial design seminar at 2 p.m. in the Agriculture Building Seminar Room.

There will be a psychology colloquium at 4 p.m. in the Studio Theatre in University School.

Tri Sigma to Auction ‘Slaves for a Day’

Sigma Sigma Sigma Sorority will participate in a Slave Day Saturday.

Members will be auctioned off to the highest bidders and will serve as "slaves" until 5 p.m., that afternoon. They will do such things as sewing, dusting and running errands.

Persons interested in acquiring "slaves" for the afternoon should be at the Sigma Sigma Sigma chapter house, 107 Small Group Housing, at 12:30 p.m. Saturday when the bidding begins. Phil Shapiro will serve as auctioneer.

Money raised will go to the national Sigma Sigma Sigma service project, Chapel Hill Children's Hospital in Chapel Hill, Md.

“God in the Hawkhicker" will be presented by the Southern Players at 8 p.m. in the Southern Playhouse.

The Sociology Club will meet at 7 p.m. in the Agriculture Building Seminar Room.

"The Study of Communications in a Modern University" will be the topic of Franklin Knowler, professor of speech at Ohio State University, at a public lecture at 8 p.m. in Muckeyette Auditorium in the Agriculture Building.

[Events and activities for the day are listed in detail, including dance, auctions, and lectures.]

Hitler’s Germany Brought to Life in Film, ‘The Mortal Storm,’ on WSUI-TV Today

Hitler's Germany will be brought to life in a featured film, "The Mortal Storm," starring Ward Bond, James Stewart and Robert Stack at 9:30 p.m. on Channel 6.

American Symphony Orchestra -- Leopold Sowiak conducts three Debussy nocturnes and a concerto by Samuel Barber.

Cartoon Entry -- Charlie Harris, a graduate student in English, submitted this entry in the Daily Egyptian's search for a cartoonist. He'll receive $5 for it. Other cartoonists are urged to submit their entries to the Daily Egyptian. The Egyptian staff will select one of the artists to become its permanent editorial cartoonist.
By the Shores of Campus Lakey

By the shores of Campus Lakey
On the shining T.P. water
Stood the tower of the Library.
Eastward through the neighboring forest,
painted figures of盛会s of indi-pendentts, dancing singing at the edge of the great forest.
Level stood the lake between them.

Through the rifled leaves and branches
O'er the water floating, something in the distance seems inviting.

Coming nearer, ever nearer.
Was it Roger the Saluki
Was it Life Guard the diver
Was it Dust, with his H20 flashing, dripping?

Now seemed floating, now seemed flying
By the shores of Campus Lakey.

Regional News

MARISIA, ILL. (KA) — Ricky Ticky of the president's office announced today the appointment of two doctors to the Health Service at Edwardsville.
Stated to the president's office, Dr. Jekyll and Hyde was made in anticipation of proposed illnesses of the Edwardsville campus.

A Mann-Size Education

Conscientious observation shows that my opinions have never been given the popular exposure that they urgently deserve, with the result that I am almost too humble in presenting the following, unanalyzable, inaccurate description of a learning experience.
Concern over my thoughts on Education and, in particular, their relevance to our world today in the name of Education classes, leaves little doubt that such behavior, manifested in this solemn exposition, can only be called avoidance-avoidance. Inside me at times is a burning to write as fearlessly as truth becometh and at other times I fear the reprimands originating from these areas where truth causes the most pain.

Fortunately for the reader, the better side of me won out and what follows is constructive commentary on and about topics presently being hashed around at the Wham Building (more popularly known as Horace Mann's Haven of Issues).

An observer need not be trained in the language of eavesdropping before he is immediately made aware that Education is truly the department where heads are put together and big ideas meet via a vis. Not only are there continued animated huddles in each corner of the hallway (proving to the greatest skeptic just where it is that ad-justive response-efforts and tension reducers conjoin but) the audibility is sufficient to broadcast just about everything under discussion — even the minutest items that often pass for significance.

The side benefit of this, of course, is that any inclined Mann-in during his class re-citation, has unprecedented opportunity at any chosen moment to have the top of his head elevated by the regular inspiration coming right through the door.

The profits of an Education education do not stop here. In fact, they just keep right on going.
Everyone of us who knows the pleasures available in narratives from Veterans of For-oreign Wars, who know the military tradition which holds that greater knowledge about the end duties of reliable soldiers toward his defeat, I am happy to report that this security in knowing the opposi-tion is familiar to those in Education, and it supplies them with a drawing card needed to enlist men to the nation's defense camp.

I can envision nothing bet-ter for teachers or students than a feeling of comfort from knowing the enemy in lurking out there somewhere in all the Journals and Newsletters, up to no good, without a chance of advancing his side of the battle. I think so much of it is, in fact, that if old soldiers were placed in important posi-tions in the school system, I am confident something might happen to education. After all, was not D.D. Eisenhower made President of Columbia?

At this point I bring my studied opinions to a close, I sincerely believe all writers as observers of the serious scene in America, have their axe to grind. I refuse to report with conviction at the time influential conclusions are drawn. I have tried to match these standards with all the powers from above, and I feel that no distortion has crept my way.

Naturally, my readers have their own views on the subject just discussed, and through they may differ from mine in spirit, I cannot feel that any of the general content is far enough wrong to raise any serious challenges.

--R.R.

Stars and Straps Forever

Early this week while stomping through the first snow of the season, I thought to myself. Oh noble participant, scholar of educational endeavor, what is the one thing SIU students need to achieve her position in the ranks of institutions of higher learning? Well, except for completion of the library education, expansion of the Health Service, coherent University Bulletin; voluntary ROTC and a monocular complete with 12-power, Staral's, I can think of but one thing — Football.

That gallant sport that occupies a position of financial status on your number six IBM card. Alas, it appears that dear old Southern may very well be on the brink of not being able to schedule games with either the small colleges (because we're too large) or the large colleges (because we're too poor). This could be disastrous if, at next year's homecoming we see the Salukis matched (evenly or un-evenly, depending on your point of view) against the Car-bondale Terriers. Added to this is the ready prospect that the possibility that Carbondale is not in the playing is.

Like other followers of the Salukis downward trend I voted with the athletic fund last year, but somehow that got lost in the same bureaucratic shuffle that stopped the expansion of the University Health Service.

Since it seems impossible for students to tax themselves to aid the Salukis, perhaps we could work out a system similar to the one that the Rocky corps help pay for the basketball team's Fuller-less book cost. That may be the only way, and it wouldn't be too bad. And with the same dollars book rental to buy something for the football team, a gold and silver supporter might be nice.
The problem boils down to a question: What can be done to attract doctors to this area? There are several plans now in use across the nation. The most popular of these is probably a system of loans. The American Medical Association, state medical societies, and private organizations make loans available to students who agree to practice in a small Illinois community after graduation.

The state of Nebraska takes the plan one step further by reducing the amount which must be repaid if the recipient agrees to practice in an approved small community. The Canadians have come up with a plan for easing the shortage by making use of third-year medical students in "externships." Small communities guarantee the services of a third-year student who will come to their area for the summer and work with the existing facilities and personnel. The Canadians have found that one-third of the extern students return to the same area after graduation.

If a community is small, but financially able, it might build and equip a clinic and attract doctors to it with the understanding that the doctor can buy the facilities as he works.

Medical societies make appeals to high schools and colleges to encourage bright students to study medicine. They also indulge in a practice of pirating licensed doctors from other states or areas.

As the new concept of shorter study becomes accepted, it will encourage more to enter the profession by reducing the length of time and the amount of money involved in getting a license.

The most effective plan, however, is the establishment of medical schools in strategic areas. Southern Illinois is a good area. Currently, the state's five medical schools are located in metropolitan Chicago. It is a proven fact that loyalties exist and that doctors tend to remain in or return to the area surrounding their alma mater. Thus, the people of this state, now in their third and final year of the project, is the establishment of four medical schools in the state, each of which is equipped with an out-patient department and providing facilities for general practice and for teaching. The session is primarily intended for producers and packers and marketing agency people as well as for industry. Hinners will speak Tuesday at the Illinois Agriculture Association Building in Bloomington. He will speak Wednesday at University.

Baker Probe Counsel Calls Senator a Liar

WASHINGTON (AP) — The Bobby Baker hearings exploded into a shouting match Thursday with special Rules Committee counsel Lemox P. McLendon calling Sen. John J. Williams, R-Del., a liar.

"You are absolutely, utterly untrue in that statement," yelled McLendon, a white-haired 74-year-old attorney.

But, he said, McLendon was not interested in pursuing the information unless it involved Baker and other figures in the current hearing.

"That's when the explosion came," said Sen. Carl T. Curtis, R-Nebraska.

Walter Mondale, Democrat of Minnesota, said the Baker hearings have disparaged the Senate and the Congress in the past few days.

"If there is a Senate and Congress, it's only because of the involvement of people like you and me and Senator J. Williams," he said.

In the hearing, which centered on the possible reprimand of Baker, who was first called as a witness Wednesday.

"I've got a right," said McLendon. "I'm not going to sit here and publicly misrepresented.

Williams sat quietly while Curtis and McLendon exchanged sharp comments.

"There is no truth to your statement," yelled McLendon, a former ambassador to Ireland, took the stand Wednesday.

"I'm not interested in pursuing information unless it involves Baker and other figures in the current hearing."

In the hearing, which centered on the possible reprimand of Baker, who was first called as a witness Wednesday.

"I've got a right," said McLendon. "I'm not going to sit here and publicly misrepresented.

Williams sat quietly while Curtis and McLendon exchanged sharp comments.

"There is no truth to your statement," yelled McLendon, a former ambassador to Ireland, took the stand Wednesday.

"I'm not interested in pursuing information unless it involves Baker and other figures in the current hearing."

"That's when the explosion came," said Sen. Carl T. Curtis, R-Nebraska.

Walter Mondale, Democrat of Minnesota, said the Baker hearings have disparaged the Senate and the Congress in the past few days.

"If there is a Senate and Congress, it's only because of the involvement of people like you and me and Senator J. Williams," he said.

In the hearing, which centered on the possible reprimand of Baker, who was first called as a witness Wednesday.

"I've got a right," said McLendon. "I'm not going to sit here and publicly misrepresented.

3 Governors Urge Ouster
Of Dean Burch

DENVER, Colo. (AP) - The chairman of the Republican Association of Governors, Robert E. Smylie of Idaho, called Thursday for a change in the University of California administration building.

"With patience worn thin, the American road can read," declared Smylie at a press conference minutes after having arrived for the meeting of GOP governors which opens today.

His remarks apparently set the tone for the meeting of the governors seeking to rebuild the party from its shattering defeat at the polls last November. Later in the day they were to meet with Gov. Edmund G. Brown of California.

"For the first time since demoralization took root among us, we are meeting as a party with a purpose," Smylie said. "Our purpose is to rebuild the party and to win back the House of Representatives in 1966.

Smylie called Thursday for a change in the University of California administration building.

"We are meeting as a group to talk about how to get back into government," said Smylie.

Five other Republican governors also were scheduled to attend the meeting.

118 Democrats Are Elected
In Illinois At-Large Race

CHICAGO (AP) - An unofficial count of votes for Republican candidates in the Nov. 3 at-large election for House of Representatives indicated Thursday that 30 incumbents won the re-election, but 36 lost.

Twenty-nine relative newcomers to state GOP ranks won seats for the first time.

The unofficial count, available after Cook County's canvass was announced, swept all 500 Cal Students Arrested
During Protest Demonstration

BERKELEY, Calif. (AP) - More than 200 law officers labored Thursday at carrying more than 500 tightly defined demonstrators from the University of California's administration building.

The officers were mobilized by Gov. Edmund G. Brown, before court order to break up the massive sit-in occupation of Sproul Hall which started early Wednesday afternoon.

The demonstration was rallied by Mario Savio, faculty leader of the so-called Free Speech Movement, to protest the dropping of disciplinary action against himself and three other FSM leaders.

The group has persistently challenged university rules on political activity on campus, with demands for "full political rights."

More than six hours after the combined force of state, county, city, and campus officers cordoned off Sproul Hall 200 demonstrators had been arrested and hauled off to jail in buses.

Officers estimated more than 300 demonstrators were still in the building. The protest group had reached 1,000.

Clearing the building was a tedious task for the officers instructed by Brown to work "with the arrests carefully and calmly until we get them out of there."

Starting on the fourth floor, the officers carried line of demonstrators into an elevator. In loads of 10, the demonstrators were lowered to the basement.

There, where the arrests were recorded and photographed, officers then carried the arrested demonstrators down the stairs.

The men were taken to Alameda County's Santa Rita Prison. The women were taken to Oakland City Jail.

A police spokesman said those arrested would be booked on one or all of three charges-unlawful assembly, failure to disperse, and resisting arrest.

"We do not intend to temper any of this situation," Brown declared in Los Angeles.

Ambassador Leaves for Saigon
Taylor Won't Acknowledge Plans
For Air Raids on North Viet Nam

WASHINGTON (AP) - Ambassador Maxwell D. Taylor headed back Thursday night to South Viet Nam to shape new steps for strengthening the war effort against communist guerillas without sending more U.S. personnel to the beleaguered little nation.

Taylor is back in Saigon on Sunday 1966 conferences with South Vietnamese officials to implement decisions reached here in a week of discussions with President Johnson and his top diplomatic and military advisers.

Just what these decisions are has not been disclosed but after his final conference Thursday with Johnson, Taylor told newsmen:

"He sees no requirement for sending additional personnel to build up U.S. forces in South Viet Nam. These currently number nearly 22,000."

He welcomes international support to help South Viet Nam with technical, engineering and logistical support.

The big question remaining unanswered as Taylor left is whether strikes will be made against supply lines of the Viet Cong guerrillas outside South Viet Nam. On this subject, Taylor would only say that, "We talked about everything you can think of."
He indicated that teachers will now be able to increase teaching time by seven to ten percent in some cases. This will not only give students more instruction, but also provide the teacher with freedom to approach the evaluation process in the manner they deem most appropriate for the particular subject and level.

I think the students are greatly underestimating the individual ingenuity of their teachers," said McKeefery.

Nicpon Is Elected By Sphinx Club

Members of Sphinx Club, honorary organization for students who have distinguished themselves in some campus activities program, have elected new officers.

President is Stanley T. Nicpon of Chicago. Other officers are Dave Welle, vice president; Ann Polski, secretary; Marsha Purdum, publicity chairman; and Pam Newberry, social chairman.

Air-Filtered Paradise

Amena’s Climate Year Around
Stay at Relaxing 72 Degrees

Have you ever wondered what temperature is maintained in the SIU Arena, or where the heat for the building is generated? Temperature is kept at approximately 72 degrees year round. In the summer, special mechanisms regulate the inside climate by counter-balancing the heat in air conditioning systems with heat.

The heat that maintains the temperature is generated at the Physical Plant in the form of steam, and comes from the central plant heating system.

After the steam is generated, it is blown to the Arena by four 60-horsepower fans. Inside the enormous building, the steam heat is carried to the building dome via small ducts, and is then blown directly toward the floor by fans situated at the end of the ducts.

The climate control inside the Arena also includes a filtering system, by which smoke, virus and other impurities can be removed from the air.

In time, all the heating and air-conditioning systems in the new buildings, including the Arena, will be regulated from the Wham Education Building.

At present the buildings have their own manually controlled systems.

11 Nursing Graduates of SIU
Take Master’s Degree Work

Eleven graduates of SIU’s degree program in nursing have been accepted for advanced study by graduate schools, according to Virginia Harrison, coordinator of pre-clinical nursing.

All of these received their degrees at the Carbondale campus, before the department of nursing was transferred to the Edwardsville campus a year ago. Students may continue to take the two-year pre-clinical training here, however, then move to the Edwardsville Campus for the final clinical experience.

The following graduates have received the master’s degree: Virginia Foster of Alton and Maxine Rosenberger of Carterville, from the University of Illinois; Ruby E. Shoemaker of Duquoin, from the University of Minnesota; Cagle, Fred Graves of Vandalia, Maine, Norma Milligan of Carterville, Ruby Shook of Hartford and Marilyn Shoek of Hartford all from Washington University.

The following Sriu nursing graduates are currently working toward the master’s degree: Kathryn Westlake of New Jersey, Adeline Martin of Dupo, from the Wham Education Building.

At present the buildings have their own manually controlled systems.

New Phone Numbers

There are three phone numbers: change in the Women’s Physical Education Department. The change is: chair- man, 3-5270; staff, 3-2298 and 3-2297; and Miss West, 3-5251.
**Champions on Parade**

13 Saluki Gymnasts To Vie In Gymnastics Meet Saturday

By Joe Cook

Thirteen members from SIU’s national champion gymnastic team will compete this weekend in the Midwest Championships at Rockford. Although the team’s championship won’t be at stake, Saluki coach Bill Meade will get an idea of how his squad compares this year against some of the best gymnastic teams in the Midwest.

Seniors Bill Wolf and Tom Cook, junior Mike Boegler, and sophomores Steve Whitlock, Larry Lindauer, Rick Schmitz, and the parallel bars, Cook will work the rings. Boegler, a newcomer to this year’s team will perform his specialty, the side horse. In addition, Meade is contemplating using Boegler for the first time in the long horse event.

Whitlock will work free exercise and the long horse events. Dvorak will perform on the trampoline and work the long horse, free exercise and tumbling events. Dvorak will work the trampoline, Lindauer and Tucker will be the all-around men.

Since this is an open meet, Rusty Mitchell, now the assistant coach and last year’s leading scorer, along with four of Meade’s promising freshmen will be eligible to compete. He will enter the meet as an individual, technically as the only member of the special “SIU Salukis” team, while the four freshmen will be unattached.

The freshmen, who were instrumental in the freshman-sophomore victory over the junior-senior team in the recent intersquad meet, are Paul Mayer, Fred Dennis, Ron Harstad and Dale Hardt.

Mayer, who captured first place in the free exercise and the long horse events in the meet, and Dennis who finished first on the rings, will be entered as all-around men. Harstad and Hardt, who were victors in the parallel bars and the trampoline events, will be performing their specialties.

This meet will be a warm-up for the Saluki gymnasts as they prepare for their important district meet and for one of the higher-rated teams in the country, the University of Denver.

**30 Pledges Enter Alpha Kappa Psi**

The Epsilon chapter of Alpha Kappa Psi, professional business fraternity, has announced the formal pledging of 30 men.

Pledge class officers are James H. Nolan, president; Leslie Robinson, secretary-treasurer; and James R. McCarthy, social chairman.

**Park Unit Wants More Participants**

In Fall Activities

The Carbondale Park District office still has room for more participants in the fall recreation program. Both man and woman activity groups would like to have additional members of the community in the program on Thursday night.

The women already have 10 participants at the Winkel School each Thursday. They play volleyball and badminton, perform some fitness skills and enjoy other recreational games and sports. Their meetings begin at 7 p.m. and run until 8:30 p.m.

The men’s program starts at 7:30 p.m. on Thursdays and lasts till 9 p.m., at the Armory building in Carbondale. The men are now engaged in fitness activities and also play rugby and basketball. They are also interested in sports and games.

‘Future Farmers’

Add 10 Members

The SIU chapter of Future Farmers of America has initiated 10 new members.

Lindell Whitlock, Karnak, is chapter president.

New members are Thomas Nikrant, Ashley; Earnest Sord, Fairfield; Ralph Gehl, Pulaski; Marvin Riepe, Metropolis; John Wade, Morrisonville; Leonard Hauswally, Oakwood; James Pfalzer, Rockwood; Daniel John son, Varna; Bill Forrest and Randy Warner, Wonsota.

SALUKIS SET UP POSITIONS FOR A TWO POINT SCORE.
Reserve Team Lauaned by Coach; Salukis Led Bison Even in Finals

By Bob Reincke

The fans in the Arena weren't exactly on the edge of their seats awaiting the outcome of the game against North Dakota State Wednesday night.

After the first several minutes, most of the crowd just sat back to see how the Salukis looked for the rest of the game, and they got a good look as coach Jack Hartman took his 20-man team who suited up for the game.

"We were glad to play the reserve team," Hartman said. "They need the work and the seasoning." The coach added that he was pleased with the way the reserves played. And he has a right to feel that way since all five of the second team came through with six or more points. The second unit was led by guard Bill Lacy and Walt Frazier who tied for second place in the scoring with 10 points each. "We didn't look as good as we did against Oklahoma State, but we'll take 'em any way we can get 'em," said Hartman in summing up the game. He added that this game was a slight jerdon for the team after playing a tougher team like Oktla.

The final statistics give an indication of the type of game played. The Salukis out-scored, out-shot, out-rebounded and even out-louded the Bison. The Salukis hit on 39 per cent of the field, making 36 of 92 tries. At the free throw line the Salukis made only 10 of 21 attempts. But one of the big differences in the games came out in the rebounding figures where Southern pulled down 63 from the boards while the Bison only got 49.

The visitors also did some cool shooting from the floor as they clicked on only 15 of 49 attempts for 31 per cent. They did pick up some of the slack from the foul line, though, making 20 of 29 attempts.

George McNeill once again led Southern in scoring, this time with 12. The 6-2 junior from St. Louis hit on six of 12 attempts against the Bison after racking up 23 points the night before against Oklahoma State.

Center Boyd O'Neal led in rebounds for the third time this year, followed in this department by Frazier and Duane Warning who each had seven.

Palmer Says Pace Too Tough; Plans to Ease Up Next Year

KAANAPALI, Maui, Hawaii (AP)—Arnie's Army can relax—the general is going to start taking it easier.

"I'm through knocking my brains out—next year I'll cut my tournament schedule almost in half," Arnold Palmer said the evening off in the Caesars Cup International Masters 35th tournament of the year.

"For 10 years I've been playing in 25 or more tournaments every season. It's too much. I love golf, I don't want to get to the point that it's no longer fun but draining me," he noted.

"Next year I'll limit myself to about 15 tournaments—perhaps in April and that's probably as far as I'll get from now on. I'm getting too old and I'd like to try to keep up with them young bucks week-in and week-out."

Palmer played in 26 PGA tour tournaments, visited Australia and South Africa, and competed in the World Match Play Championship in England. Besides this, he also played television matches, appeared in numerous films, and had a close watch on his mythical multi-million-dollar enterprise.

It was the champion United States, with Arnold Palmer and Nicklaus, against the world at the start of the prestigious Caesars Cup golf matches.

Two-man teams representing 13 nations, plus twosomes from Hawaii and Puerto Rico teed off over the lush green course at the legendary Royal Kaanapali Golf Course, one that measures 7,215 yards, with par 36-36-72.

There will be 18 holes each day, concluding Sunday.

The Caesars Cup, put into play first in 1955 as an emblem of international golf will continue until the medium of golf, is the big prize. It is determined by the total scores of the two players.

The companion award is the International Trophy which goes to the low master.

Palmer and Nicklaus won the Canada Cup last year in Paris, and while Palmer has yet to capture the International Trophy, he sounded a warning Wednesday.

Arnie, with an abbreviated version of his famed army mustache, tied his name to the scorecard in the pro-amateur event with a seven-under-par 31-34-65-133.

Best-ball score-honorables, 62, went to Palmer and his amateur partner, Howard Clark of New York.

Nicklaus had an individual 72. Runners-up to Palmer were Bruce Devin, Australia, and Drop, and Ted Johnson, of Hawaii and Chef Safy of Egypt.

Morton goes to Dallas

Butkus Signs With Chicago
For an Estimated $200,000

By The Associated Press

Dick Butkus and Craig Morton, two of the NFL's top free agents, signed with the Dallas Cowboys in a move that demonstrates the growing market value of NFL talent.

Butkus, the star linebacker for the Chicago Bears, signed a five-year contract with a reported $200,000 signing bonus, making him one of the highest-paid players in the league. Butkus, a two-time All-Pro and a key member of the 1966 Bears championship team, announced his retirement after the 1966 season due to chronic injuries, but he re-joined the team in 1967.

Morton, a quarterback for the Dallas Cowboys, signed a three-year contract worth $150,000, making him the highest-paid quarterback in the NFL at the time. Morton's contract included a $25,000 signing bonus.

Butkus was the third highest-paid player in the NFL, behind only Joe Namath of the New York Jets and Bart Starr of the Green Bay Packers. His signing bonus was the highest ever paid to an NFL player.

The move came as the NFL was expanding its market in the United States, with new teams being added and stadium construction on the rise. The Cowboys were among the teams looking to bolster their roster with established players, and Butkus was considered one of the best remaining free agents.

Butkus' signing with the Cowboys was seen as a strategic move to keep him away from the rival San Francisco 49ers, who had expressed interest in signing him. The Cowboys were also able to sign Morton, who had been a key player for the Bears, in a deal that was expected to boost their quarterback depth.

Butkus' contract was seen as a signal that the NFL was becoming a more lucrative league, with players' salaries rising rapidly.
