LICK THE HEAT!

Two Southern co-eds were interviewed about their plans for the final exams. They said they were not concerned about the weather or their performance. They plan to study and enjoy ice cream in the Student Union. On the left is Jean Furmage, freshmen from Brysonville, Karen Kendrick, freshmen elementary education major from Hatteras, is pictured in the picture above.

Franklin Speaks At Workshop in Virginia

Dr. Richard Franklin, assistant director of the SCSU Communication Disorders Department, presented a workshop on communication development at Virginia Polytechnic Institute, Blacksburg, Va.

Franklin spoke at the Institute For Communication Disorders Workshop, which was designed for improving group procedures in the department of speech and language development. In addition to those between the workshop on communication development at Virginia Polytechnic Institute, Blacksburg, Va., has been invited to speak on this topic at the National Congress of Communicating Disorders.

Rehearsals Get Underway For Play, July 2

Robert C. St. John, producer of the Summer Production of Play in the Student Union, will be presented in the Summer Production of Play in the Student Union, which will begin on July 21.

Since opening night is only a week away, the cast is hard at work, and the director, Dr. William G. Wilson, has been busy with rehearsals, arranging, and evening of music and drama, which is part of the opening night. A group of assistants from Eastern Michigan, working with the director, has been working on the musical number to be performed by Dr. Wilson. The assistants are also preparing for the next show, which is a musical comedy. The show will be performed in the Student Union auditorium at 8 p.m.

The cast includes the following artists:

* Mark Anderson, baritone
* Mary Brown, soprano
* Robert C. St. John, director

Thespians are allowed to get involved in the show's activities, and are encouraged to attend rehearsals in order to gain experience in the performing arts.

DREAMIN' J:R

"I'm really looking forward to this year's "Dreamin' JR." The show is going to be a lot of fun, and I think it's going to be a great show for everyone to enjoy." - Laura McLean, senior

Work On 80 Projects In Ag. School

Appropriately 80 months young on campus, the summer sun at the Illinois School of Agriculture was in full flower. On June 21, Dr. Wayne K. Darrow, dean of the school, and his staff were busy with final preparations for the new academic year. The school is operated by the Illinois Department of Agriculture and serves the needs of students in the fields of agriculture and related sciences.

The college is one of the oldest in the nation, and the faculty and students are very proud of their tradition of excellence in the field of agriculture.

The college has been a leader in agricultural education and research for many years. It offers a wide range of programs, from basic agricultural sciences to more specialized fields such as dairy science, crop production, and soil science.

The college is located in the heart of the agricultural community, providing students with hands-on learning experiences and opportunities to work with professional agriculturalists.

The college also offers a variety of extracurricular activities, including a student agricultural club, a farm and garden club, and a conservation club.

The college is committed to providing a high-quality education and a strong foundation in agricultural science.

At Last—Signals

The white, towering pile with the long gray turrets and the Romanesque dome of the Cathedral of Learning stands as a focal point for the University."A lot of people, especially students, are psychic and can sense the movement of the signals," said John, a junior and one of the three junior assistants. "We try to let them know what's going on through the signals."

---

Ideal Teacher

I want to be interested in the world, and not only in the world of books, and I want to have a mind that is always open and always be willing to learn.

But one quality above all others the teacher must possess: patience. A teacher who understands and loves the subject is more important than any other quality he may have. It is his job to make his subject loveable, and he should be always willing to learn from his pupils.

Meals for Learning

Higher Low Grades

Integration of foreign language and the English language of elementary school children was taught and taught by foreign language workshops and foreign language workshops in United States. The curriculum of foreign language workshops is the "Cultural Awareness" of the French, German, and Spanish.

The foreign language workshops are for students who have no previous knowledge of foreign languages. The students are divided into groups of four, and each group is taught by a different foreign language teacher. The foreign language workshops are held during the winter months.

Final Examinations Begin Wednesday, August 11

Final examinations will begin on August 11 and continue throughout the month of August. The last examination will be held on August 31.

A JOY TO WORK DONE!!

The Ideal Teacher

What is the ideal teacher? There are many answers to this question, but one of the best ideas is to raise in a long time in a high school, where he is free to be a teacher. The ideal teacher is one who is interested in his work and who is interested in the world.

Motives For Summer School Run From Opportunity To Pure Boredom

By McK! Sparks

"I don't know if I'm going to take a summer school course," said Bobby, a senior in the Psychology Department. "I'm just too bored to do anything."

"I'm going to take a summer school course," said Mary, a junior in the History Department. "I want to learn something new."

"I'm not going to take a summer school course," said John, a freshman in the Business Department. "I just want to relax."

“Vergette Joins Art Staff”
Nicolene Vergette will join South's art department this October as assistant professor and head of painting instruction. The British artist will replace Neal Wooten, who was on a one-year leave.

Vergette, who received degrees from London's Chelsea School of Art and the University of London, is presently serving as a lecturer in fine arts at University of Exeter, England. He came to the United States in 1958 after lecturing in London for two years.

Vergette has received numerous recognition through British organizations which has also been exhibited in California, New Mexico, Australia, New Zealand and Canada, and his work has appeared in four American, two pieces and mixed media, art exhibitions in England, Scotland, and in the United States. Some of his recent works include pieces for the University of Exeter and the University of California.

“Ceramic Arts,” the show which is being circulated by the Smithsonian Institution.

The group show is entitled “Concerts in Time: Informal Service Projects.”

Dean Simon Enroute Home

Dr. Ernest J. Simon, Dean of Chaminade College, is on his way back from a business trip to Europe.

The trip was sponsored by the College of St. Mary in Wisconsin.

Southern’s Little Grassy Camp For Handicapped Children

DINING HALL

The dining hall at the Little Grassy Camp is built to serve 250 individuals. The modern decor of the hall gives adequate space, style and convenience to the campers. Other buildings at the camp include dormitory buildings for boys and girls, separate washhouse facilities and a therapy center. The therapy center consists of four units with facilities for speech, hearing, physical therapy and special education.

SPEECH AND HEARING

These campers are learning to operate and benefit from hearing aids. The speech and hearing therapy and rehabilitation are very important to this group of youngsters as they learn to adjust and accept their role in the world. They also are offered recreational activities at the Little Grassy Camp.

WATER’S FINE!

This happy little fellow seems to be enjoying his water play very much. The camp has a special swimming beach area for the handicapped campers.

WESTWARD HO!

Here riding is a favorite pastime of the children's program at the Little Grassy camp. Above, Tom Bollin, junior from Benson, gives a helping hand to Larry Henry from Fairmont as the two ride down the track. The camp offers 20 miles of terrain and 14 miles of lake roads on the camp.

SPEECH AND HEARING

In charge of all programming and staffing for the camp and Leon E. Taylor is the head of Camp No. 2, the Modified Unit, for the Handicapped.

The Little Grassy Lake Camps has been in use for camp purposes in the past. During the summer of 1956 nearly 2,000 children participated in the University camping program which represented a 30 per cent increase over the previous year.

The camp at Little Grassy Camp No. 2, is divided into three groups according to their abilities. One group consists of the Mentally retarded and math includes the Easter Seal campers that are physically handicapped from such causes as polio, cerebral palsy or accident. This camp is for those who can swim and cannot participate in physical training or practical or therapeutic activities.

The last group is the speech and hearing group in intensive training and individual therapy to correct a hearing or speech defect.

Recreation and Therapy

For the first two groups, recreation is the main purpose of the camp. Such activities as hiking, swimming, archery and horseback riding are offered under the close supervision and are adapted to the individual's abilities.

The camp consists of two groups. The first group, the speech and rehabilitation group, is divided into two parts. Speech campers are given both group and individual therapy, while those needing hearing tests, are taught to use hearing aids.

The campers in this group are offered a chance for recreational activities, as are the other two groups.

SUU students and faculty members serve as camp councillors.

GETTING STARTED

The Director and Physical Officer for the Little Grassy Lake Campus is Kenneth R. Miller, administrative assistant and physical education director. Photographs are from the week of camp by Robert Albritt and Val Bigger.

READY, AIM, FIRE!

One of the young campers at the Grassy Camp gives some advice on how to hit the target of a friend. The speech and hearing group are given

both group and individual therapy and taught to use hearing aids. The campers in this group are also given a chance for recreational activities and rehabilitation. Southern is cooperating with a number of national organizations to expand research projects which are related to the handicapped.

SIGNPOST

The campers and pool tarpaulin on the Great Oak Lake and in the water to the Handicapped Children’s camp, consisting of 950 acres, which is located eleven miles southwest of the main camp.

OUCH!

This little girl seems to be having more fun in camp than she had in a while. During the year of 1958, the University's Rehabilitation Institute created a federal grant of $139,000 for the camp program which includes adding wheelchair ramps, handrails, and other safety devices to classrooms and dormitories for the Handicapped students.
